

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V10N1

January 2012

Welcome to the V10N1 January 2012 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers the **Healthcare Online Resources 2012**. These sites, resources and tools bring together all the latest information for finding information concerning healthcare search engines, directories, subject trees and subject tracers in the World Wide Web. Many of these resources represent the latest mashups, latest large data archives, and other newly transparent data sources for the web, social informatics and databases. Resources for this report were taken from my below Subject Tracers™:

<http://www.HealthcareResources.info/>

Healthcare Online Resources 2012

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Healthcare Online Resources 2012 is a comprehensive listing of healthcare resources currently available on the Internet. These include healthcare indexes, subject guides and search engines that supply the latest technology and information about healthcare and how it relates to you. The below list of sources is taken from my Subject Tracer™ Information Blog titled Healthcare Resources and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.HealthcareResources.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest healthcare sources and sites.

Journal of Environmental Protection (JEP)

<http://www.scirp.org/journal/jep/>

The Journal of Environmental Protection (JEP) covers various aspects of environmental issues, such as research, strategies and the state-of-the-art technologies for prediction, prevention and protection addressing up-to-date research in natural and social sciences related to environmental concerns. The journal includes but not limited to research papers, technical reports, subject reviews, short comments and book reviews on relevant aspects of the field. JEP is to provide a platform for scientists, environmentalists, ecologists, project managers, consultants and students wishing to keep abreast of current developments in environmental protection. Journal of Environmental Protection is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Ethnographic Research in Illinois Academic Libraries (ERIAL)

<http://www.erialproject.org/>

The Ethnographic Research in Illinois Academic Libraries (ERIAL) Project is a two-year study of the student research process. The project is funded by an LSTA grant awarded to Northeastern Illinois University (NEIU) by the Illinois State Library. The goal of the project is to understand how students do research, and how relationships between students, teaching faculty and librarians shape that process. ERIAL is also an applied study—that is, research pursued with the purpose of uncovering, understanding and addressing social problems. As such, its goal is to use the results to develop more user-centered library services. ERIAL is built on a unique ethnographic methodology, which employs close observation of students' research habits. Unlike quantitative studies, which count the frequency of social phenomena, this study is qualitative, depicting how students search for information, what obstacles they encounter, and how they seek help. The analysis is interpretive, yielding rich descriptions of students' experiences. Project methods include semi-structured interviews, photo elicitation, participant observation in libraries, mapping exercises, and web and space design workshops. ERIAL is a collaborative effort of five Illinois universities: DePaul University, Illinois Wesleyan University (IWU), Northeastern Illinois University (NEIU), the University of Illinois at Chicago (UIC) and the University of Illinois at Springfield (UIS). These campuses are urban and suburban, residential and commuter, and public and private, with student populations ranging in size from 2,000 to 26,000 and including varied ages, races and ethnicities. As a result of this diverse partnership, the ERIAL team has uncovered a wealth of insights into similarities and differences across library cultures. The project also has been able to enroll more than 40 librarians, 70 faculty, and 140 students in interviews and more than 600 participants total. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

DataCite - List of Repositories for Research Data

<http://www.datacite.org/repolist>

This list is a working document, initiated via a collaboration between the British Library, BioMed Central and the Digital Curation Centre, that aims to capture the growing number of repositories for research data. It is provided for information purposes only: DataCite provides no endorsements as to the quality or suitability of the repositories listed. We encourage community participation in developing this resource. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Callimachus - Framework for Data-Driven Applications Based on Linked Data Principles

<http://callimachusproject.org/>

Callimachus (kəlīm'əkəs) is a framework for data-driven applications based on Linked Data principles. Callimachus allows Web authors to quickly and easily create semantically-enabled Web applications. Callimachus builds on Sesame, Mulgara or OWLIM for RDF storage, AliBaba (a RESTful object-RDF library) and uses a revolutionary template-by-example technique for viewing and editing resources. One of the interesting aspects of Callimachus is its use of RDFa as a query language; templates are parsed to build SPARQL from RDFa markup and then filled with query results. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Advances in Management and Applied Economics

http://www.scienpress.com/journal_focus.asp?Main_Id=55

Advances in Management and Applied Economics publishes high-quality refereed empirical research on all aspects of Applied Economics and Management Sciences. The Journal's emphasis is on empirical, applied, and policy-oriented research in Management and Economics. All empirical methods including (but not limited to) qualitative, quantitative, or combination methods are represented. Articles published in the journal are clearly relevant to applied management theory and practice and identify both a compelling practical management issue and a strong theoretical framework for addressing it. The Journal's purpose is to improve communications between the academic and other research communities and policymakers and operational decision makers. Advances in Management and Applied Economics is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

Factual - Open Data Platform and Community

<http://www.factual.com/>

Factual was founded in 2007 by Gil Elbaz, co-founder of Applied Semantics (which launched ASI's AdSense product). Applied Semantics was acquired by Google in 2003. Gil has had a lifelong passion for organizing and structuring information, and building smart tools which can make better sense of data. To that end, he set out to develop an open data platform and community in an effort to maximize data accuracy, transparency, and availability. Fellow data lovers -- Tim Chklovski, chief scientist & founding

GigaDB - Revolutionizing Data Dissemination, Organization and Use

<http://gigadb.org/>

GigaScience is a new integrated database and journal co-published in collaboration between BGI and BioMed Central, to meet the needs of a new generation of biological and biomedical research as it enters the era of “big-data.” To achieve its goals, GigaScience has developed a novel publishing format that integrates manuscript publication with a database that will provide DOI assignment to every dataset. Supporting the open-data movement, we require that all supporting data and source code be publicly available in a suitable public repository and/or under a public domain CC0 license in GigaDB. GigaDB is the journal’s affiliated data base hosted by BGI to increase the sharing and reuse of large biological datasets. Through our association with DataCite, they assign data DOIs to our datasets to make them more discoverable, trackable and citable. They also work with the BioSharing community and use ISA-Tab tools to maintain the highest data and metadata standards.

isainfrastructure - Investigation/Study/Assay

<http://isa-tools.org/>

Investigation/Study/Assay (ISA) infrastructure is the first general-purpose format and freely available desktop software suite targeted to experimentalists, curators and developers and that: a) assists in the reporting and local management of experimental metadata (i.e. sample characteristics, technology and measurement types, sample-to-data relationships) from studies employing one or a combination of technologies; b) empowers users to uptake community-defined minimum information checklists and ontologies, where required; and c) formats studies for submission to a growing number of international public repositories endorsing the tools, currently ENA (genomics), PRIDE (proteomics) and ArrayExpress (transcriptomics). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

International Journal of Research in Commerce, IT and Management (IJRCM)

<http://ijrcm.org.in/it/index.php>

In this age of Commerce, Economics, Computer & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.

ChartsBin - Web Based Visualization Tool

<http://chartsbin.com/>

ChartsBin is a web-based data visualization tool that will allow everyone to quickly and easily create rich interactive visualizations with their own data. You can then share your interactive visualizations with others by embedding them in websites, blogs or sharing via Facebook or Twitter. We're focused on building the most exciting and engaging destination for statisticians, and computer scientists in the world. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information blog. This will be added to [Statistics Resources](#) Subject Tracer™.

Updated> Academic and Scholar Search Engines and Sources Annotated White Paper

<http://www.ScholarSearchEngines.com/>

I am very pleased to announce that my Internet MiniGuide Annotated Link Compilation White Paper titled **Academic and Scholar Search Engines and Sources** has been just updated and is now a 68 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (440KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated November 23, 2011]

CyberMondayDeals

<http://www.cybermondaydeals.com/>

CyberMondayDeals.com launched November of 2011 with the goal of providing consumers easy access to the internet's deepest Cyber Monday discounts. With this site they have tried to make it as easy as possible for you to search for Cyber Monday deals, find a coupon for your favorite internet retailer, and even share discounts that you've found through our "Add Your Own Deal" feature. They encourage you to vote for your favorite deals and leave comments about what you like or don't like with a particular deal. The highest rated deals always appear real-time on our home page and our "Most Popular Deals" page. So by voting you can help future visitors find these great deals too. This will be added to [ShoppingBots and Online Shopping 2012](#).

GoalStacker - Todo Meet Today

<http://www.goalstacker.com/>

A Task Manager Focused On What You Can Do Today. Features include: a) Focus On Today: Each task you create focuses on how much time you have. Every day you get a list of tasks tailored to the amount of time you have available. No more feeling overwhelmed by looking at an endless list of tasks. You'll finish each day with a sense of accomplishment knowing you completed everything you had time for; b) Work With

Others: Invite anyone to a project you're working on. You don't have to worry about messy admin accounts and user privileges. Just invite a friend to join a project. Don't want them on the project anymore? It just takes seconds to update your project team. Sharing made easy; c) Attach Files and Images: Whether you're working alone or with a team, finding the files is easy. GoalStacker allows you to upload files to each task, so the file is ready to go; d) Track Time: GoalStacker makes it easy to figure out how much time you're spending on your tasks. You can time each task to track exactly how much time it takes to complete; e) Daily Reminders: Wake up every morning with your personalized Today List. Each day GoalStacker sends you a Today List of tasks tailored to the time you have available. You'll receive an email every morning reminding you what you need to get done today; and f) Works Anywhere: GoalStacker works in all major browsers on PC or Mac and is completely cloud based so you can access it anywhere. Never worry about syncing projects, tasks, or account info; everything is always up to date. We support Internet Explorer+, Firefox 3.6+, Chrome, Safari 4.0+, and Opera 10+. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Journal of Agricultural Extension

<http://ajol.info/index.php/jae/index>

The mission of the Journal of Agricultural Extension is to publish conceptual papers and empirical research that tests, extends, or builds agricultural extension theory and contributes to the practice of extension worldwide. The Journal of Agricultural Extension is devoted to the advancement of knowledge of agricultural extension services and practice through the publication of original and empirically based research, focusing on: Extension administration and supervision, program planning, monitoring and evaluation, diffusion and adoption of innovations; extension communication models and strategies; extension research and methodological issues; home economics; extension youth program; women-in-agriculture; extension and the environment and so on. Content in English. Journal of Agricultural Extension is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Shopping Deals

<http://www.shopping-deals.com/>

Shopping-Deals.com provides a fundamentally better way for consumers to shop. Most people shopping on the web go from store to store to find the products they want at the right price. With thousands of online stores to choose from, this process is tedious and time consuming. Shopping-Deals.com service allows consumers to search for products they want across several stores at the same time. This will be added to [ShoppingBots and Online Shopping 2012](#).

Google Correlate

<http://www.google.com/trends/correlate/>

Google Correlate is an experimental new tool on Google Labs which enables you to find queries with a similar pattern to a target data series. The target can either be a real-world trend that you provide (e.g., a data set of event counts over time) or a query that you enter. Google Correlate uses web search activity data to find queries with a similar pattern to a target data series. The results can be viewed on the Google Correlate website or downloaded as a CSV file for further analysis. Google Correlate is like Google Trends in reverse. With Google Trends, you type in a query and get back a data series of activity (over time or in each US state). With Google Correlate, you enter a data series (the target) and get back a list of queries whose data series follows a similar pattern. Google Correlate contains web search activity data from January 2003 to present. This data is updated weekly. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Greenbeard - Schedules Conference Calls With Experts, Mentors, Tutors and Other Specialists

<http://www.greenbeard.com/>

Have you ever spent hours or days trying to figure something out... wishing you could just get someone on the phone for a few minutes to help you out? Whether you're an individual seeking personal knowledge or you represent a business in need of outside consultation, Greenbeard.com will connect you to the right person with the right expertise. Greenbeard advisors come from a broad range of specialties. You can view feedback from other users and evaluate advisor profiles. Advisor profiles aggregate data from a number of sources to give you a comprehensive picture of each advisor. Advisors set their own rate, charging by the minute. You only pay for the actual time you are on the phone with an advisor. If you get your questions answered in 9 minutes, you only pay for 9 minutes of advice! This has been added to [Internet Experts](#) Subject Tracer™ Information Blog. This will be added to [Tutorial Resources](#) Subject Tracer™.

International Journal of Research in Computer Science (IJORCS)

<http://www.ijorcs.org/>

International Journal of Research in Computer Science (IJORCS) aims to promote and coordinate developments and management of information and computer security in the fields of information and communication technologies, social science, informatics, science and engineering. The Journal invites papers representing synergy between theory and practices to help policy makers and executives manage information and computer security and its related technologies. Emphases will be on the related social, political and economic issues as well as emerging issues of interest to legislators, professionals, researchers, academics, and technical community. The IJORCS publishes original and review papers, technical reports, case studies, conference reports, management reports, book reviews, notes, and commentaries. International Journal of Research in Computer Science is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Vetter - Get More Ideas From Your Team

<http://www.getvetter.com/>

Get more ideas from your team in one neat weekly email. Simple as 1) Ideas are submitted (Product ideas, Efficiency ideas, Event ideas; 2) Ideas are vetted (The submitter is a mystery at this stage to keep things unbiased); and 3) Delivered by email (Submitter revealed! Useful analytics and sharpened competitive edge included). Benefits of Using Vetter include a) Employees will feel more engaged; b) Your business will improve; and c) You will get the most out of your team. You can expect new product ideas, efficiency ideas, cost savings ideas, event ideas, marketing ideas, benefits ideas, HR ideas and more. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

TalkChalk - Where the Classroom Lives Beyond the Bell

<http://www.talkchalk.com/>

Colleges, universities, and school districts across America are constantly looking for new ways to engage students and increase student achievement. The advent of social media has raised the bar for student engagement, creating new platforms for easier, faster, more fun learning. Unfortunately, school districts and universities can face lawsuits and public relations disasters when educators inappropriately utilize social media. TalkChalk offers a safe platform for all parties to interact using Facebook, while eliminating the liability posed by teachers and students viewing their respective Facebook profiles. Features include: Safe Communication: With TalkChalk, you can securely send messages to an individual student, parent, class, or the entire school community. Communication about assignments, snow days, delayed openings, and community events has never been easier; b) Free for Teachers: TalkChalk gives features to teachers for free. TalkChalk was created by former educators who believe that those who make a difference most innovative tools to continue to impact the lives of children. For premium features there are subscriptions plans; and c) Student Achievement: On TalkChalk, students can help each other with questions they have about homework, new material, quizzes, or tests. With the class page and discussion board, students can post questions for their teacher or fellow peers to answer. This will be added to [Student Research Resources](#) Subject Tracer™.

FCC Small Biz Cyber Planner

<http://www.fcc.gov/cyberplanner>

Information technology and high-speed Internet are great enablers of small business success, but with the benefits comes the need to guard against growing cyber threats. As larger companies take steps to secure their systems, less secure small businesses are easier targets for cyber criminals. Use this tool to create and save a custom cyber security plan for your company, choosing from a menu of expert advice to address your specific business needs and concerns. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

International Journal of Social Computing and Cyber-Physical Systems (IJSCCPS)

<http://www.inderscience.com/browse/index.php?journalCODE=ijsccps>

Social Computing and Cyber-Physical Systems can be broadly defined as computational facilitation of social systems and the integration of computation with physical processes. The tight combination and coordination between systems' computational, physical, and social elements make it different from other forms of systems. Social computing and cyber-physical systems have recently become a central theme across a number of information and communication fields and attracted significant interest of the researchers from computer science, computer engineering, electronic engineering, etc.

Civicboom

<https://www.civicboom.com/>

Civicboom is a platform that empowers oPut simply, the Civicboom process is that a content-seeker can set a request for specific content. Then by using our customised mobile app or by uploading to the plug & go site, a content-giver can respond with rich-media directly to that request. All incoming rich-media content can then be managed by the content-seeker, and directed to a customisable plugin to be embedded on a website. rganisations and their audience to collaborate in generating rich media content. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Quoteroller - Create, Track and Send Proposals

<http://www.quoteroller.com/>

Quoteroller automates proposal creation and tracks and notifies. Features include: a) Send and Manage Proposal Online: Super easy to use, Quote Roller saves you time and helps to close deals faster. You will find that creating proposals is a fun and enjoyable process; b) Stay Informed: Know the instant a client opens a proposal. Track clients' activity, get instant notifications and react immediately. Quote Roller will help you to convert your leads into orders; c) Accept, Discuss, Collaborate: Allow clients to instantly accept created proposals. Discuss any questions clients have directly in the system. Enable team work on proposals you create; d) Catalog of Products and Services: Organize products, services and subscriptions into a catalog and reuse items from the catalog in your proposal. Didn't think creating a pricing table was so simple? Watch the video; and e) Use Proposal Templates: Having difficulties drawing up a proposal? Find a proposal template in our extensive community library. Share your templates with others in one click. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Connected2.me - Let People Chat With You Anonymously

<http://connected2.me/>

connected2.me lets people chat with you anonymously. When you create an account you are given a profile: connected2.me/username . connected2.me allows you to chat with whoever visits your profile. You share your profile address with your friends. When they come, they are given anonymous nicknames hence you don't know who you are chatting

Open Journal of Modern Linguistics (OJML)

<http://www.scirp.org/Journal/ojml/>

Open Journal of Modern Linguistics (OJML) is an international journal dedicated to the latest advancement of modern linguistics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern linguistics. The journal publishes original papers including but not limited to the following fields: * Applied linguistics * Biolinguistics * Clinical linguistics * Computational linguistics * Developmental linguistics * Evolutionary linguistics * Historical linguistics * Language geography * Linguistic typology * Neurolinguistics * Psycholinguistics * Sociolinguistics * Stylistics Open Journal of Modern Linguistics is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

TagMyDoc - The New Way To Share Documents

<http://tagmydoc.com/>

This is the first web application that utilizes QR codes in order to share documents. Also, TagMyDoc offers numerous other solutions supported with QR codes that are usually and exclusively available to businesses. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

FindThatFile - Media File Search Engine

<http://www.findthatfile.com/>

findthatfile is a media [file search](#) engine. It locates media for you (documents, audio, video, etc). Everybody knows what a web page search engine is, Bing, Google, Yahoo, etc. findthatfile searches media files rather than web pages from all over the Internet. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Reconnect: Electronic Journal of Social, Environmental and Cultural Studies

<http://reconnect.org/>

Reconnect is the electronic journal of the Region, Environment, Culture research group. It publishes thematic issues three times a year on the field of social, environmental and cultural studies. Articles submitted to the journal should follow the topic of the issue. Theoretical and empirical analysis are both welcome on the editor and reviewers desk, as original scientific works written in Hungarian, Romanian or English language, or translations of original papers published elsewhere.

Reel - Cast Your Ideas, Poll Your Friends, and Reel In the Feedback

<http://www.reelapp.com/>

The online presentation tools out there aren't great right now. They're either too clunky, require special software, or too much overhead. With Reel, getting your ideas out there and polling your audience is like shooting fish in a barrel. Just cast out your line of slides and they'll bite in no time! Reel helps you quickly create and share presentations. Each preso is stored online behind a unique URL, making it easy to poll your audience for their impressions. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Orchestra - Organizes What Needs Doing and Communicates With Others To Get It Done

<http://www.orchestra.com/>

No man is an island, so Orchestra blends organization with communication to make working with others a piece of cake. Every conversation is focused around a specific task, and you can collaborate with anyone in the world - all you need is an email or phone number to start delegating. Some of the most important notes-to-self come at the most inopportune times. The good news: Orchestra makes capturing tasks as easy as holding down a button and speaking into your phone. Using advanced voice recognition technology, Orchestra jots down what you say quickly, leaving your hands and eyes free for whatever else you were doing. Capture tasks, review what needs doing, and chat with others from your phone when on the go, then visit their web app when you get back to your desk. Everything will be automatically, instantly in sync. It just works. How many tasks are currently trapped in your inbox, stuck behind emails with obscure subject lines that say nothing about what you actually need to do? The first time you forward an email to Orchestra, you won't believe the results. Zero inbox isn't just a pipe dream anymore. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ .

Call2Record - Record Audio With Any Mobile Phone and Share It On the Web

<http://calltorecord.com/>

Record audio with just your mobile phone. Features include: a) Unlimited recording durations for \$1/hour; b) Private recordings; c) Share recordings securely with friends and coworkers; and d) 30 free minutes of recording time! Put Call2Record on speed dial, and you can be recording audio with just the touch of a single button. Sometimes pen and paper aren't available when you'd like to formally agree on something. Call2Record can give you the confidence to make a deal. Sometimes carrying around another device for recording can be cumbersome. Call2Record can help you travel lighter. Don't worry about your audio being destroyed or stolen before you can transfer it to a computer. Recordings are stored in the cloud as they are happening. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ISRN Materials Science

<http://www.isrn.com/journals/ms/>

ISRN Materials Science is a peer-reviewed, open access journal that publishes original research articles as well as review articles in all areas of materials science. ISRN Materials Science is part of the ISRN series of peer-reviewed, open access journals that are designed to provide a fast peer review process for all submitted manuscripts. Every ISRN journal is collaboratively run by a relatively large, international Editorial Board of experts in the subject area of the journal.

SliderWall - The Best JQuery Image Slider

<http://www.sliderwall.com/>

SliderWall is 100% based on HTML5, CSS3 and JavaScript and can be used to create all types of sliders, from dynamic feeds to image sliders. The jQuery slider features several templates that can be customized from a single CSS file. But "customize" is not the proper word - with a bit of creativity and experience you can modify the original templates as far as to make them unrecognizable! Features include: a) Tell your story in an interactive way; b) Makes content easier to access on mobile devices; c) Get indexed by search engines; and d) Creates jQuery sliders using multiple templates, modes of navigation and transition effects. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Updated> Online Research Browsers

<http://zillman.blogspot.com/2009/08/online-research-browsers.html>

I have just updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Research Browsers" a 19 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online research browsers available on the Internet. These research browsers allow you to visualize information to find new relationships and associations to create knowledge discovery and obtain new and highly relevant research data. It is freely available as a .pdf file (162KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **November 30, 2011**. Other white papers are available by clicking [here](#).

Pinterest - Virtual Pinboard

<http://pinterest.com/>

Pinterest lets you organize and share all the beautiful things you find on the web. People use pinboards to plan their weddings, decorate their homes, and organize their favorite recipes. Best of all, you can browse pinboards created by other people. Browsing pinboards is a fun way to discover new things and get inspiration from people who share your interests. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Biosharing

<http://www.biosharing.org/>

BioSharing works at the global level to build stable linkages in particular between journals, funders, implementing data sharing policies, and well-constituted standardization efforts in the biosciences domain, to expedite the communication and the production of an integrated standards-based framework for the capture and sharing of high-throughput genomics and functional genomic bioscience data, in particular. This objective is achieved via the creation of web-based catalogues and a communication forum, each of which is further described below. Several data preservation, management and sharing policies have emerged in response to increased funding for high-throughput approaches in major genomics and functional genomics bioscience domain; and nowadays, several funding agencies also require inclusion of data-sharing plans in grant applications, and are beginning to actively monitor adherence. But despite some commonalities, the policies are heterogeneous by nature, given the different types of communities served and the data types they generate. In parallel, an escalating number of community-developed standards (reporting requirements, terminological artifacts and exchange formats) operate to support the harmonization of the reporting process, so that different experiments can be comprehensible and (in principle) reproducible, compared or integrated. The research community, funding agencies, and journals continue to participate in the development of standards and tools to support data sharing, as they must if it is to become practicable and commonplace. There are similar trends in both the regulatory arena (Shabo, 2006; FDA Data Standards) and commercial science (Barnes et al., 2009; Pistoia Alliance) that in particular has invested heavily in procedures and tools that integrate external information with their own data to enhance the decision-making process. The proliferation of these standardization efforts is a positive sign of stakeholders' engagement, but it also brings with it new sociological and technological challenges - creating interoperability and avoiding unnecessary overlaps and duplication of efforts that hampers their wider uptake and interfere with the creations of data sharing tools. Two basic pillars are missing in this endeavor, let aside the ethical, commercialization, credit and other known now issues arising from the public release of data that other groups have started tackling. "One-stop shop" catalogues help centralizing information on bioscience data policies, standards and links to other related portals, and formal communication channels are need to maintain linkages between stakeholders to enable flow of information and mutual support. Hence the creation of the BioSharing project. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Egyptian Academic Journal of Biological Sciences: Toxicology and Pest Control

<http://toxicology.eajbs.eg.net/>

Toxicology and Pest Control is one of the series issued twice by the Egyptian Academic Journal of Biological Sciences, and is devoted to publication of original papers related to the interaction between insects and their environment. The goal of the journal is to advance the scientific understanding of mechanisms of toxicity. Emphasis will be placed on toxic effects observed at relevant exposures, which have direct impact on safety

evaluation and risk assessment. The journal therefore welcomes papers on biology ranging from molecular and cell biology, biochemistry and physiology to ecology and environment, also systematics, microbiology, toxicology, hydrobiology, radiobiology and biotechnology. These include various morphological, anatomical, histological, ecological, toxicological, physiological changes associated with individuals, and populations. In addition, the journal promotes research on the impact of living organisms on their environment with emphasis on subjects such a resource, depletion, pollution, biodiversity, ecosystems etc. Original papers must be written in English. Egyptian Academic Journal of Biological Sciences: Toxicology and Pest Control is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

AppFlower - The Application Builder

<http://www.appflower.com/>

AppFlower is a rapid application development (RAD) framework designed so people can easily create enterprise-ready solutions. No coding, just use the Visual Designer to create your new app. AppFlower makes programming languages, such as JavaScript, XML, HTML, CSS, PHP, and SQL completely transparent (for the beginners); thus, you only have to focus on the business logic of your application. And advanced users can utilize the full horse-power of the underlying framework to customize your app, exactly as you want it. The AppFlower Engine was invented to fulfill the need for a more process-oriented framework, which could make the applications less error-prone and decrease the learning curve for newcomers. The actual work on this project started in early 2009 and has been heavily utilized by ImmuneSecurity for their security product line. Later in 2010, the Danish-based company AppFlower ApS was founded. The goal of the AppFlower Engine is to make the development of enterprise-level applications easy for everyone, while keeping all parts open to further optimization for the high demands of advanced users. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

File Savr - Simple File Hosting

<http://www.filesavr.com/>

FileSavr's goal is to simplify the process of file hosting. We provide fastest and easiest file hosting service as an alternative to sites like MegaUpload and RapidShare. Unlike the other sites, we do not force users to sign up for paid accounts to download files, we do not show long countdown timers, pop up ads, or any other spam related activities. Our goal is simple, to offer the most basic file hosting service so you can share your stuff quickly. Why is FileSavr doing this? To make the process a lot simpler, and because we know how annoying it is to not be able to share files. How long are the files kept? The files are kept forever as long as they are being downloaded. Is the upload size really 10 GB? Yes. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Fresh WebSuction

<http://www.freshwebmaster.com/>

Fresh WebSuction is designed for downloading Web pages or web contents (reference material, software files, online books, e-zines, news articles) for viewing offline, and saving money on Internet connection fees. If you pay fees for the amount of time you are online you can save money by quickly downloading all the Web sites you want to view and disconnecting. The user interface is very easy to use. Just enter the address, and let it download entire web pages while you go. It is capable of downloading up to 50 files simultaneously and speed up your browsing by saving pages to your hard drive, rather than relying on your Internet connection speed. This software is 100% free, no spyware, and updated regularly. Fresh Websuction features include: a) You can configure level limit of the project; b) You can set which file types and file extensions to be handled by Fresh Websuction. File types can be : HTML, Images, Audio, Video, Documents, Archived, User-Defined and others. File extensions can be : htm, html, shtm, shtml, htms, htmlx, asp, pl, stm, stml, idc, htx, xsp, xml, cfm, cgi, http, php, php3, nsf, jsp, aspx; c) Very easy to add, remove file type and file extensions; and d) You can choose to make followed links being converted or not. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Web Data Extractors](#) white paper.

Journal of Transportation Technologies

<http://gulib.georgetown.edu/newjour/nj2/msg28799.html>

Journal of Transportation Technologies is an international refereed journal dedicated to the latest advancement of transportation technologies. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in the areas. This journal invites original research and review papers that address the following issues in transportation technologies. Topics of interest are (but not limited to): * Advanced Driver Assistance Systems * Advanced Emergency Management Systems (AEMS) * Advanced Materials for Transportation Vehicles * Advanced Traffic Management Systems (ATMS) * Automated Baggage Handling and Screening Systems * Automated People Movers * Automatic Vehicle Location and Tracking * Automotive Software Architecture * Bus Transit Systems * Collision Avoidance Systems * Command Control Centres * Communication, Navigation, Surveillance Systems * Computer-Aided Dispatch * Devices to Enhance Pedestrian and Bicyclist Safety * Dynamic Traffic Signal Control * Electronic Fare Collection * Flight Information Display Systems * Health and Wellness in Transportation Industry * Incident Reporting Packages * Intelligent Security Systems * Intelligent Transportation Systems and Traffic Control * Intelligent Vehicles * ITS Architecture * ITS as Decision Support System * Location Based Services * Marine Communication and Navigation Engineering * Maritime Transport Management * Metro-Rail Transportation * Mobile Terminal Displays * Navigation Technology * On-Board Diagnosis * Operational Control Centres * Pedestrian and Vehicle Detection Technologies * Planning and Scheduling Software Packages * Powertrain Management * Railway Tunnels and Tunneling * Railways Management * Smart Card Reader * Socio-Economical Effect of Environmental Friendly Mobility * Sustainable Transport Safety

LazyMeter - Your To-Do List, One Day At A Time

<http://www.lazymeter.com/>

The problem with to-do lists is that they're overwhelming. No matter how much you do, there's more to be done. As a result, people feel lazy. The idea of LazyMeter is not to show you how lazy you are; it's to show you how productive you are. We show you how much you've done, so you can feel good at the end of the day. LazyMeter is not a replacement for a calendar – it is a replacement for your to-do list. Calendars do a great job for things that need to be scheduled. Calendars fail when things need to be done on a day, but not at a specific time. These are the things that are most likely to be forgotten or put off. LazyMeter is currently free. Our goal is to continue to offer a basic version for free, with premium subscription options. If we are to make a drastic change to our model, we will give our users sufficient notice, and we'll make sure you can export your data. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

JamCloud - Spread the Web With This Free Social Music App

<http://jamcloud.com/>

JamCloud is a free social music app that lets you play music and watch videos with your friends in real time. Create listening rooms with an international audience where you can chat about what's playing and vote up or down. With a library of over 325 million songs and videos, JamCloud's awesome music discovery tools make it easy to find what's hot. Features include: a) Enjoy the freedom of watching what you want, when you want, as often as you want; b) Create playlists and share them with the world; c) Share what you're watching on Facebook and Twitter; d) Easy-to-use drag-and-drop interface; e) Supports YouTube and SoundCloud® (with more to come); f) Import videos from your friends' Facebook walls; g) Import YouTube® playlists; h) Sync your content on both Windows® and Mac OS X®; and i) Works worldwide with no international restrictions. Information Quality Resources on the Internet

<http://www.llrx.com/features/informationqualityresources.htm>

This comprehensive, selective, focused, updated guide by web research guru Marcus P. Zillman comprises resources and sources that will help you to discover many reliable pathways available through the Internet to find the latest information quality resources and sites. Published December 2, 2011 [LLRX.com](http://www.llrx.com) .

ifttt - If This Then That

<http://ifttt.com/>

Put the internet to work for you by creating tasks that fit this simple structure: if this then that. Think of all the things you could do if you were able to define any task as: when something happens (this) then do something else (that). The this part of a task is the Trigger. Some example Triggers are "I'm tagged in a photo on Facebook" or "I tweet on Twitter." The that part of a task is the Action. Some example Actions are "send me a text message" or "create a status message on Facebook." Triggers and Actions come from Channels. Channels are the unique services and devices you use every day. When you put one channel's trigger together with another channel's action, that's a task! Here is a task that saves every new photo I take with Instagram to my Dropbox. Create a recipe to share a task with friends. Tasks can be turned on and off. When turned back on, they pick up as if you had just created them. Tasks poll for new trigger data every 15 minutes. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

BookLikes

<http://www.booklikes.com/>

eGroovy - Worry-Free Online Address Book

<http://www.egroovycontacts.com/>

Have everyone's addresses, emails, instant messaging, birthdays and phone numbers more easily accessible from anywhere. Call it your online address book. Whenever your linked contacts change their data, be it a phone number or address etc., you will be instantly notified insuring you never have to update your contact list again. Why start your address book from scratch. Quickly import all your contacts from Gmail and Hotmail. All imports are automatically organized in minicards.

STEM Resources for Teachers and Students

<http://www.thinkfinity.org/stem>

The Verizon Foundation's Thinkfinity website has a very large section of STEM resources for students and teachers. Near the bottom of the homepage visitors will find "Lesson Plans", "Podcasts", and "Resources and Tools". In addition, there is a community forum where members discuss their thoughts on some of the resources from the website they have found useful, or how they have modified them to suit their classroom situation. Visitors to the site can easily register for free to join the community. The "At Home and Afterschool" tab near the top of the page has a "games and tools" section that includes activities, videos, and collections, as well as other types of resources. The literacy section of the "Afterschool" area has many resources for families and games for early literacy. Visitors can also use the "Professional Development" tab to find information on how to utilize the many Thinkfinity resources. Diagnostics

<http://www.mdpi.com/journal/diagnostics>

Diagnostics: Medical Diagnosis publishes reviews, regular research papers and short notes on the research and development of medical diagnostics. There is no restriction on the length of the papers. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodical details must be provided for research articles. There are, in addition, unique features of this journal: * manuscripts regarding research proposals and research ideas will be particularly welcomed * computed data or files regarding the full details of the experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material Subject Areas include but are not limited to: * Advances in Diagnostic Methods/Approaches * Nursing Diagnosis * Molecular Diagnostics * Diagnostic Medical Sonography * Diagnosis Errors * Clinical Decision Support Systems * Overdiagnosis.

Applied Sciences (MDPI)

<http://www.mdpi.com/journal/applsci>

Applied Sciences provides an advanced forum on all aspects of applied natural sciences. It publishes reviews, research papers and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in a normal way, can be deposited as supplementary electronic material. The journal covers all aspects of applied biology, applied chemistry, applied physics, and applied engineering. The scope includes but is not limited to the following: * Biological Sciences * Chemistry * Physics * Engineering Applied Sciences is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Q-Sensei FeedBooster - Multi-dimensional Search-powered RSS Feed Reader

<http://feeds.qsensei.com/>

The FeedBooster is a free, advanced web-based feed reader that offers a new way of discovering relevant and timely information from the wealth of RSS news, blogs and business feeds. Based on Q-Sensei's powerful search and indexing technology, FeedBooster helps you stay on top of your favorite feeds and get the most out of them. Very special to the FeedBooster is that it provides you with more than just a list of feed items. Every single feed imported into FeedBooster is pre-processed in a way that makes it easier to search, browse and explore your feeds. FeedBooster doubles as a dynamic archive and knowledge/productivity tool to quickly mine for information that is important to you. Powered by Q-Sensei's unique multi-dimensional search capabilities, FeedBooster can easily weed out the irrelevant from the relevant information in a few clicks by specifying a simple or complex combination of specific date(s), author(s), feed source(s), tags, and language options; all in a fully-customizable dashboard to best suit your information needs. Explore the new search experience for news and eliminate the stress of being 'behind' on reading, tagging and bookmarking feeds. Difference Between - Understand and Differentiate Between Two Similar Subjects

<http://www.differencebetween.net/>

Differencebetween.net not only facilitates your understanding of a topic, but it also enables you to differentiate two similar subjects. The site provides you with instant information on various topics. The subjects are organized into a range of categories from Business to Technology. They compile and unify multiple reliable resources for each topic onto a single page, so then readers can gather adequate information very quickly and effortlessly. We are eager to share our wealth of knowledge with you, so keep browsing and share your thoughts with us when necessary. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Rock The Post - Where Ordinary Ideas Become Extraordinary Projects

<http://www.rockthepost.com/>

Rock The Post is powered as a business social network site, serving as a bridge between entrepreneurs and/or talented parties and funding parties in order to take simple projects to the next level. Rock The Post is committed to serving as a bridge and communication platform for business partnerships to form, and to become a place where projects, dreams, and passions become reality. Rock The Post targets entrepreneurs, artists, professionals with a wide variety of specialties, and eager investors who are looking for unique investment opportunities or causes to support. The platform allows individuals from around the world to connect and develop causes and businesses. No matter what stage a venture or project is at – from conception to funding and beyond– Rock the Post provides the tools, connections, and support necessary for projects to succeed. In this regard, Rock The Post erases the intermediary figure, which most of the time gets in the way. Our commitment is to: a) Establish our platform as a trusted online networking resource; b) Make a profound difference in users' lives by serving as a bridge that forges connections with the right individuals; c) Provide equal opportunities to all, and; d) Be a platform that is used, recognized, and respected by millions of people across the globe. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Operations Research and Fuzziology

<http://www.hanspub.org/journal/orf/>

Operations Research and Fuzziology publishes the latest Chinese research in the field of operations research and fuzziology. Topics include: * Mathematical Programming * Fuzzy Mathematics and Systems * Combinatorial Optimization Graph Theory * Stochastic model * Decisions and strategies (game) * Financial Mathematics * Co-ordination * Military Logistics * Computer Simulation * Data Mining * Statistics and predictions * Heuristic algorithm * Fuzzy Information and Engineering * Fuzzy Control * Intelligent, soft computing * Reliability * Management and fuzzy Management.

WeVideo - Video Editing Redefined

<http://www.wevideo.com/>

With WeVideo, you simply upload your video clips and photos, create your storylines, and edit them in the cloud. Oh, that “cloud thing”, it means the delivery of computing as a service rather than a product. For you that means there’s no software to download. All video story creation takes place in the browser on your smartphone, tablet, or computer. You can create videos “in the moment” wherever you are, making the process convenient and timely. They also give you full creative control, and they made it really easy. And with WeVideo, you can collaborate with others on video stories. You can co-create the same video or come up with your own unique versions from the clips in your own cloud-based video library. Once created, you can share your video in basic Internet or high-definition quality on the WeVideo site or publish it to your favorite video-sharing, social-networking, or other online site. They believe everyone has a story to tell. It is time to tell yours with WeVideo. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Q-Sensei - Search Engine for Scholarly Sources

<http://lambda.qsensei.com/>

Q-Sensei Scholarly Search Engine searches and browses through their collection of the following sources: a) ArXiv; b) Ingenta Connect; c) Library of Congress; d) PubMed; and e) RePEc. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

smartQ - Visualize Your Workflow

<http://www.getsmartq.com/>

smartQ is an agile project management app built around a visual task board. It allows you to easily distribute work, track its progress and collaborate with your team online. smartQ can track tasks, issues, tickets - it is customizable to fit any workflow. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Computer Engineering and Intelligent Systems (CEIS)

<http://www.iiste.org/Journals/index.php/CEIS>

The scope of Computer Engineering and Intelligent Systems (CEIS) includes, but is not limited to, Automated Planning, Knowledge Representation and Knowledge-based Systems, Agent and Fuzzy Systems, Pattern Recognition, SVM/ANN/Genetic Algorithm etc, Distributed Systems, Embedded and Expert System, and computer applications. The ambition of CEIS is to become a recognized top tier journal, acclaimed for redirecting for computer & intelligent systems research and for defining new directions. Computer Engineering and Intelligent Systems is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

ReadCube - Your Research Literature Simplified

<http://www.readcube.com/>

Features include: a) Save Time: Create your article library instantly — import your PDFs in a single step. One-click download of related articles; b) Be Organized: All your articles in one place — they're full-text searchable with your highlights and sticky notes; and c) Discover More: Stay on top of the latest research — relevant articles are automatically recommended every day. Additional features include: 1) Let ReadCube Organize your article collection; 2) Download articles with a single click; 3) Personalize article recommendations; 4) Read and annotate articles; and 5) Cite and create references. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Wishbox - Get User Feedback with Annotated Screenshots

<http://www.jotform.com/wishbox>

Wishbox is a new way to get feedback. With its screenshots, you'll be able to find out exactly what the problem is and receive suggestions. You can use it for online customer support, or even manage web design projects with Wishbox as a form of communication between you and your client. Features include: 1) Feedback Button: A simple, customizable feedback button to engage your users without disturbing their visit; 2) Screenshot: Wishbox can take a screenshot of your website. Let your users show the problem, instead of describing it; 3) Web Form: Jotform, the engine running behind Wishbox, will enable you to embed any web form in your Wishbox; and 4) Email Notification: Get notified instantly by email. You can also reply the email and it will find its recipient. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

EventGrabber- Matching Events with Your Personality Allowing You to Just Click-and-Go

<http://www.eventgrabber.com/>

Simply put, Eventgrabber answers the question "What is there to do around town?". They go out and grab all local events, organize them, and present you with options of things to do tailored to match your personality. No more searching multiple sites for events, they are everything events, they are EventGrabber. Eventgrabber is the first website that totally puts you in the driver seat for all things events. You can: a) View local events by category, theme, location or personal interest; b) Have events automatically recommended for you based on your interests; c) Plan, recommend and share your events with friends and family; d) Know before you go (See ratings and reviews on events from your trusted network); e) Acquire goods and services related to special events from partner providers; f) Promote and Advertise your event for free; g) Quickly and easily rate your experience after attending an event; and h) And much much more. . This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™ Information Blog.

International Journal of Social Sciences and Humanity Studies (IJ-SSHS)

http://www.sobiad.org/eJOURNALS/journal_IJSS/index.html

As an international and multi-disciplinary publication, primary purpose of the International Journal of Social Sciences and Humanity Studies (IJ-SSHS) is to provide an outlet for scholarship in all sub-areas of social sciences, including economics business, management, law, political science, sociology, philosophy, ethics etc. The International Journal of Social Sciences (IJ-SSHS) is a peer-reviewed social science journal. The Journal is biannual and most of the papers are based on selected papers from the annual International Conference on Social Sciences. Content in English. International Journal of Social Sciences and Humanity Studies is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

NationBuilder - The Essential Toolkit for a New Generation of Leaders and Creators

<http://nationbuilder.com/>

NationBuilder provides both a website and a CRM in one integrated service designed specifically for organizing communities. It's especially useful for political campaigns and non-profits who used to have to pay thousands of dollars for outdated tools and the techies required to keep it all working. It's also useful for anyone organizing a community -- online or offline -- from PTAs to sports fan sites. The Internet makes it possible for independent leaders and creators to build their own base of support outside the traditional gatekeepers like political parties, publishing houses, film studios, etc. It's a great opportunity, but now you have to deal with a slew of different technologies with new ones showing up every day. It can be quite overwhelming. NationBuilder allows you to create a real and lasting foundation of support. User engagement and retention are at the core of the NationBuilder design. Encouraging users to take action, whether it be to comment on a blog post, attend a film screening, or call their Senator, builds grassroots support. Anybody can read a web page, but it is when people take that next step of action that they truly become a stakeholder and lasting supporter, who will recruit others to join. Your supporters are out there, but they are dispersed and don't all communicate the same way. With NationBuilder you can connect with them, and the more they get involved, the more their peers will want to get involved, and the more powerful all of you will become. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

The Desmos Calculator

<https://www.desmos.com/>

Although their content platform is still in private beta, you can get a taste of what's to come with their free browser-based calculator! Forged from the Desmos math engine, this is the best browser-based calculator on the web. Powerful, beautiful, intuitive, and free – forever. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Quick ScreenShare - Simplest Way To Share Screens With Anybody

<http://quickscreenshare.com/>

QuickScreenShare.com is the simplest way to share screens with anybody with the following features: a) No registration required and completely free; b) Nothing to install for sharer or sharee (assuming you have Java); c) Works on Windows, Mac, and Linux; and d) Even lets you remotely control mouse and keyboard! This free service is a side project from the creators of Screencast-O-Matic.com and is still in BETA. They use it extensively for remote user support and collaboration. The current version creates a direct peer-to-peer connection, so if you're on a super duper secure school or company network it may or may not be able to connect, but in most cases you'll find it works quite well so give it a shot! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

International Journal of Intelligent Systems and Applications (IJISA)

<http://www.mecs-press.org/ijisa/>

The journal publishes original papers in the field of Intelligent Systems and Applications. International Journal of Intelligent Systems and Applications(IJISA) is a peer reviewed journal in the field of Intelligent Systems and Applications. The journal is published quarterly by the MECS Publisher. All papers will be blind reviewed. Accepted papers will be available on line (free access) and in printed version.

NLMplus - Semantics Search Engines and Biomedical Knowledge Base

<http://nlmplus.com/>

NLMplus makes synergistic use of a variety of novel solutions and technologies to maximally utilize NLM's downloadable data sets, APIs, web services and software tools. NLMplus provides a new level of universal access to the National Library of Medicine's rich and high quality content via a simple and an intuitive user interface. Users will find information on Health Topics (Medlineplus Health Topics); PubMed Reviews (More than 1.6 million PubMed review articles and meta-analyses semantically indexed and searched by WebLib's Semantic Search and Discovery Engine); Pubmed Abstracts (via semantically enhanced queries sent to NLM's PubMed search service); NLM Databases (concurrent access to 60 NLM databases via WebLib's PolyMeta federated search engine); Drugs and Supplements (NLM's Drug Information Portal and Medlineplus Drugs & Supplements databases); News (Medlineplus News); Videos and Tutorials (Medlineplus Videos and Tutorials) and Images (images from NLM's History of Medicine and PubChem databases). This will be added to [Healthcare Resources](#) Subject Tracer™. This has been added to [eHealthcareBot](#) Search Engine script resources.

Identified - Your Market Demand

<https://www.identified.com/>

Identified lets you know how 'in demand' you are in the market right now. That means how much companies value your professional background and what companies or people are looking for someone like you right now. In order to do this, Identified gives you a score from 0 – 100. The higher your score, the more in demand you are in your profession. Identified then gives you tips to help increase your score. This has been added to [Employment Resources](#) Subject Tracer™ Information Blog.

Presentation: Past, Present and Future of Bots on the Internet

Location: Entrepreneurial Society of Naples (ESON), Chamber of Commerce Conference Room, Naples, Florida

Date/Time: December 14, 2011 at 6:00pm

Marcus P. Zillman, M.S., A.M.H.A., Executive Director of the Virtual Private Library and co-founder of ESON, will offer an exciting fast paced presentation discussing the **Past, Present and Future of Bots on the Internet**. You may be talking to one now called Siri or you may have visited a number of Zillman's sites covering bot research, chatterbots, artificial intelligence resources and lots more. Of course we will visit them all as well as review his complete 16th annual listing of ShoppingBots for your holiday shopping. Zillman created BotSpot - The Spot for All Bots and Intelligent Agents on the Net and was awarded the top 100 of all websites on the Internet by PC Magazine Shop With Your Bot Until You Drop!! He predicted 12 years ago that we will all be using our own Bot (Virtual Assistant) by 2012 - 2013 and it looks like it is all happening!! Truly exciting times!!

<http://www.zillman.us/>

Innovative Copyright - Unique Resources for Copyright Education

<http://crln.acrl.org/content/72/10/596.short?rss=1>

Learning about or teaching copyright is often frustrating and difficult for both teacher and student because it is a complex area, and, let's face it, reading the text of the law is not always the most exciting way to learn. Endeavoring to address this issue and many others, the Copyright Education and Consultation Program, a project funded by the Illinois State Library, was designed to establish a program to provide authoritative copyright information directly to faculty, instructors, and researchers at the largest Illinois universities. The goals of the program include increasing confidence in use of materials, informing users of copyright education resources available to them, empowering users with knowledge about their own intellectual property rights, and facilitating use of copyrighted material in the classroom. While completing this project, many unique and creative copyright resources were discovered that go beyond the traditional, dry text of the law. The resources presented in this article show that copyright education can be engaging and enjoyable. They include videos, interactive tools, comics, podcasts, tutorials, online courses, Twitter feeds, and blogs about copyright. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ACRL Information Literacy Resources

<http://www.ala.org/acrl/issues/infolit>

Updated> Bots, Blogs and News Aggregators

<http://www.BotsBlogs.com/>

I have just updated my research white paper link compilation titled "Bots, Blogs and News Aggregators" which is now a 21 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf (345KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **December 14, 2011.**

The Missing - Resources On the Web

<http://crln.acrl.org/content/72/6/334.full?sid=ec692111-2e48-411d-96f5-bf782edf1174>

Jennifer Joyce Kesse, missing since 2006 when she failed to appear at work; Ethan Patz, missing since 1979 when he walked two blocks to school by himself; Natalie Holloway, missing since a 2005 high school trip to Aruba; Jacob Wetterling, missing since 1989 when he was biking home with his brother and a friend from a convenience store; and Morgan Nick, missing since 1995 from a Little League baseball game she was at with her mother. Some of the names may sound familiar, others you have never heard of. They are five of the 85,820 active missing person cases as of December 31, 2010, according to the National Crime Information Center (NCIC).¹ This article provides information on resources concerning missing children and missing adults. Information is also provided

Journal of Technology and Science Education (JOTSE)

<http://www.jotse.org/>

Journal of Technology and Science Education (JOTSE) is an international Journal aiming at publishing interdisciplinary research within the university education framework and it is especially focused on the fields of Technology and Science. Jotse serves as an international forum of reference for Engineering education. Teaching innovation oriented, the journal will be issued twice per year (every 6 months) and will include original works, research and projects dealing with the new learning methodologies and new learning supporting tools related to the wide range of disciplines the Engineering studies and profession involve. In addition, Jotse will also issue special numbers on more technological themes from the different areas of general interest in the industrial world, which may be used as practical cases in classroom tuition and practice. Thereby, getting the working world reality closer to the learning at University. Among other areas of interest, our Journal will be focused on: 1) Education; 2) General Science (Physics, Chemistry, Maths); 3) Telecommunications; 4) Electricity and Electronics; 5) Industrial Computing (Digital, Analogic, Robotics, Ergonomics), 6) Aerospace (aircraft design and building, engines, materials); and 7) Automotion (automotive materials, automobile emissions). Content in English. Journal of Technology and Science Education is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Just Buy This One

<http://www.justbuythisone.com/>

Shopping online used to be so simple. Now there are hundreds of shops, thousands of products and millions of reviews. It's information overload. All this choice isn't making our lives any easier or better. Quite the opposite: psychologists like Barry Schwartz have discovered that more choice makes us less happy. And haven't we all got better things to do with our time than shop for a TV, or a camera, or a vacuum? So they made Just Buy This One. They sifted through all the complex technical information available online to work out what really matters. Then they plugged into Reevoo.com's price comparison engine and their database of over a million customer reviews from people who actually own the products. They did it the hard bit – comparing products, totting up review scores, working out which shiny new features are worth your money, finding the cheapest price – then they just give you the best. But there was still something missing. If shopping online is a hassle, organizing returns and refunds and replacements is a nightmare. That's where RoomService comes in. If what you buy from Just Buy This One isn't right for you, we'll

take care of everything from returns and refunds to replacements. They think we've made something that gives you all of the convenience of shopping online and none of the hassle – a trusted, impartial advisor who cuts to the chase and just tells you what you should get. Don't bother with all the rest. Just buy this one. This will be added to [ShoppingBots and Online Shopping 2012](#).

FreeMind - Free Mind Mapping Software

http://freemind.sourceforge.net/wiki/index.php/Main_Page

FreeMind is a premier free [mind-mapping](#) software written in Java. The recent development has hopefully turned it into high productivity tool. We are proud that the operation and navigation of FreeMind is faster than that of MindManager because of one-click "fold / unfold" and "follow link" operations. So you want to **write** a completely new **metaphysics**? Why don't you use FreeMind? You have a tool at hand that remarkably resembles the tray slips of Robert Pirsig, described in his sequel to Zen and the Art of Motorcycle Maintenance called Lila. Do you want to **refactor** your **essays** in a similar way you would refactor software? Or do you want to keep personal **knowledge base**, which is easy to manage? Why don't you try FreeMind? Do you want to **prioritize, know** where you are, where you've been and **where you are heading**, as Stephen Covey would advise you? Have you tried FreeMind to keep track of all the things that are needed for that? This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MeetingWords - Simple Txt Editor for the Web

<http://meetingwords.com/>

MeetingWords is a simple text editor for the web. Your text is saved on the web, and more than one person can edit the same document at the same time. Everybody's changes are instantly reflected on all screens. Work together on meeting notes, brainstorming sessions, homework, team programming and more! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Pure and Applied Science & Technology (JPAST)

<http://nlss.org.in/jpast>

The aim of Journal of Pure and Applied Science & Technology (JPAST) is to promote the integration of research and innovations in all areas of pure and applied sciences e.g. physics, chemistry, mathematics, biological and medical sciences, and of all fields of engineering and technology. It will provide an international forum for the publication of high quality scholarly articles. The organization aims are undertaking, aiding, co-ordinating, and promoting Research and development. It provides academic and professional guidance, advice and consultancy in the field of Basic Education, Higher Education as well as in the Technical Education Research. Journal of Pure and Applied Science & Technology is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Company Check - Search UK Companies and View Full Financial Accounts

<http://companycheck.co.uk/>

Search for any UK company and view full financial accounts for five years including detailed information such as Directors names, cash at bank, company assets, liabilities, website addresses, telephone numbers and more. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Zanran - Search Engine for Semi-Structured Data On the Web

<http://www.zanran.com/>

Zanran helps you to find 'semi-structured' data on the web. This is the numerical data that people have presented as graphs and tables and charts. For example, the data could be a graph in a PDF report, or a table in an Excel spreadsheet, or a barchart shown as an image in an HTML page. This huge amount of information can be difficult to find using conventional search engines, which are focused primarily on finding text rather than graphs, tables and bar charts. Put more simply: Zanran is Google for data. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

International Journal of Business and Management Tomorrow (IJBMT)

<http://www.ijbmt.com/>

International Journal of Business and Management Tomorrow (IJBMT) aspires to reach to the world of researchers for exploring their talents and letting them expose their acumen to exhibit their research pursuit. It would stress on creativity and innovation as the forte; to forge ahead with the new ideas in the emerging new economy and new business. Topics include any of the following areas of business and management: * Accounting and Finance * International Business * Research Methodology * IT Management * General Management * Entrepreneurship * Hospitality Management * Retail Management * Human Resource Management * Operations Management * Project Management * Real Estate Management * Marketing Management * Organizational Behavior * Strategic Management * Supply Chain & Logistics

idee Multicolor Search Lab

<http://labs.ideeinc.com/>

They extracted the colours from 10 million of the most "interesting" Creative Commons images on Flickr. Using their Piximilar visual search technology you can search the collection by colour. Idée Labs is Idée's technology playground for visual search and image recognition. Here you will be able to experiment and play with various implementations of Idée's visual search technologies. The Visual Search Lab allows you to browse through nearly 3 million stock photos from Alamy using Idée's Piximilar technologies to find images that look visually similar. Combine keywords with your visual search to make your results even better. Click on an image to retrieve visually similar images. Or enter a keyword first, and then select an image. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

eBible

<http://ebible.com/>

They built eBible to help you engage the Bible more. They didn't overload it with thousands of features you will never use. Instead, they built it to be simple, fast and easy to use. Features include: a) Notes and Highlights - Scribble notes and highlight, just like a paper based Bible; b) Resources - Scholarly tools like concordances, commentaries and dictionaries, and c) Reading Plans - Revolutionary reading plans that come of age for the 21st century. This has been added to [Theology Resources](#) Subject Tracer™ Information Blog.

Pronunciator - World's Largest Language-learning Service

<http://www.pronunciator.com/>

Features include: a) 60 languages, and b) 3 million lessons. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information blog.

International Journal of Digital Information and Wireless Communications (IJDIWC)

<http://www.sdiwc.net/ijdiwc/>

International Journal of Digital Information and Wireless Communications (IJDIWC) is a refereed online journal designed to address the following topics: critical reviews and opinions on the organisational, social and management issues associated with significant information-based technologies. This includes IT strategy, change, infrastructure, human resources, sourcing, system development and implementation, communications, technology developments, technology futures, national policies and standards. In the field of Wireless communications; the topics include: Antenna systems and design, Channel Modeling and Propagation, Coding for Wireless Systems, Multiuser and Multiple Access Schemes, Optical Wireless Communications, Resource Allocation over Wireless Networks, Security, Authentication and Cryptography for Wireless Networks, Signal Processing Techniques and Tools, Software and Cognitive Radio, Wireless Traffic and Routing Ad-hoc networks, and Wireless system architectures and applications.

Cobalt Project Manager - Plan, Execute and Manage Your Work With an Easy-To_Use, Cloud Based Project Management Solution

<http://cobaltpm.com/>

Cobalt Project Manager was built by [Integrated Business Solutions, LLC](#), a consulting firm founded in 2002 that builds project management and controls solutions for large-scale capital construction programs. Their experience building enterprise-level project management systems has lead them to the conclusion that smaller teams should be able to use similar tools without the high cost typically associated with a large-scale project management system. They built Cobalt Project Manager with smaller teams in mind, to offer a project management tool with enterprise-grade functionality in an easy-to-use, web-based solution at an affordable price. Cobalt Project Manager offers the project management functionality of systems that cost significantly more to implement internally within organizations without the need for IT overhead and costly software upgrades. With Cobalt, you are always running the latest version and they are continually improving the product on a daily basis .Features include: a) Project Planning and Tracking - Create detailed project schedules with Gantt views and assign resources; b) Dashboard and Reports - View your dashboard and reports for the latest project status and upcoming tasks; c) Risk and Issue Tracking - Track project risks and issues to manage and mitigate project problems; and d) Web Based Software-as-a-Service - There is nothing to install and your team can access their projects from anywhere. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

PDFaid - PDF Solutions Online

<http://pdfaid.com/>

They are an online PDF solutions company located in Belgium. Founded in 2006, PDFaid has grown in the last few years from offering one application to about 8 applications in 2011. A new PDF application is being added every couple of months. Some of the applications they offer like the PDF rebrander and extract images from PDF are so useful yet scarce on the Internet. To bring PDFaid into everybodys reach, it is free to use. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Sitesimon - Effortless Content Discovery

<http://sitesimon.com/>

Sitesimon brings you the best articles, videos and other content, automatically tailored to your interests. With so much content hitting the web every day, it's no longer quick or easy to find the content you care about. Sitesimon brings the best content on the web to you, and even better, it's automatically tailored to your interests in real-time. Using a unique combination of social and science (and the help of their awesome browser add-on!), Sitesimon privately analyzes your browsing and who you connect with online, learns what you love, and recommends the best, unique content for you. Additionally, it pulls in content from your other social networks so you're sure not to miss a thing! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog.

Urban Public Economics Review (UPER)

<http://www.uper.org/>

The Urban Public Economics Review (UPER) is a six-monthly journal dedicated to provides a focal point for the publication of research papers in the expanding field of urban public economics. The local public economics plays its role in a particular context owing to global economics, technological changes, large conurbations, environmental problems, aging population and the transition towards a type of economy based on knowledge and the society of information. In this framework, local public economics are turning into urban public economics. Imbalance between the institutional scheme and the real territory, triggers negative effects on the social welfare that public policies are trying to secure. For a variety of reasons, linked to the development of urban settings, rural and urban public finances face increasing financial difficulties. Nevertheless, quantitatively speaking, the former one shows to have turned into just a residual problem. On the other hand, the service sector of local governments, are heading for "intermunicipality". Thus, the exploitation of economics of scale is tried to be faced up, to get financial margins for inversion, contribute to environmental management and fight against exclusion. Urban Public Economics Review is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Twournal - Twitter To Journal

<http://twournal.com/>

Twournal allows you to create, buy and sell twitter books printed from your tweets. All Twournals have color covers, can include replies and photos from services such as Twitpic and Yfrog in color or black and white. You can choose a custom picture for your front cover. Select which tweets you want to start and end at. And you can add a dedication message to appear after your title. They have also added the option to sell your Twournal. Which they hope people will use to create unique products for their friends and fans. Over time tweets can tell a story or remind us of moments. In 20 years we don't know whether twitter will be around but your Twournal will be. Who knows maybe your great grandkids will dig it up in the attic in the next century. Twournal is owned by InvaderMedia LLC and was founded by the Mano brothers Avaz and Feraz. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

The World Health Report

<http://www.who.int/whr/2010/en/index.html>

Good health is essential to human welfare and to sustained economic and social development. WHO's Member States have set themselves the target of developing their health financing systems to ensure that all people can use health services, while being protected against financial hardship associated with paying for them. In this report, the World Health Organization maps out what countries can do to modify their financing systems so they can move more quickly towards this goal - universal coverage - and sustain the gains that have been achieved. The report builds on new research and lessons learnt from country experience. It provides an action agenda for countries at all stages of development and proposes ways that the international community can better support efforts in low income countries to achieve universal coverage and improve health outcomes. This will be added to [Healthcare Resources](#) Subject Tracer™.

A Web Whiteboard - Touch, Draw and Share

<http://awwapp.com/>

A Web Whiteboard is touch-friendly whiteboard app that lets you use your computer, tablet or smartphone to easily draw sketches, collaborate with others and share them with the world. Works on all modern browsers, no installation needed. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Agricultural Science and Technology (JAST)

<http://jast.journals.modares.ac.ir/>

Journal of Agricultural Science and Technology (JAST) is an international research journal published quarterly for the purpose of advancing the scientific studies. The subjects covered by JAST include all aspects of agriculture and natural resources. The journal will consider submissions from all over the world, on research works not being published or submitted for publication towards publication as full paper, review article and research note. Journal of Agricultural Science and Technology is available free of

Awarenesswatch™ Paper Review

Achieving Rigor and Relevance in Online Multimedia Scholarly Publishing

by *Mark Anderson-Wilk, Jeff Hino.*

<http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3762>

Abstract:

This paper discusses the importance of relevance and rigor in scholarly publishing in a new media-rich world. We defend that scholarship should be useful and engaging to audiences through the use of new media, and at the same time scholarly publishers must develop and maintain methods of ensuring content accuracy and providing quality controls in the production of scholarly multimedia products. We review examples and a case study of existing scholarly publishing venues that attempt to maintain quality control standards while embracing innovative multimedia formats. We also present lessons learned from the case experience and challenges that face us in the scholarly publication of multimedia.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
