

# Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V10N4

April 2012

Welcome to the V10N4 April 2012 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**  
**Awareness Watch™ Spotters**  
**Awareness Watch™ Book/Paper/Article Review**  
**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

## **Awareness Watch™ Featured Report**

This month’s featured report is a special report on my latest research and the associated report/article that has been placed on line through my <http://WhitePapers.us/> . The title of my report is **Privacy Resources**. This comprehensive report comprises hundreds of reliable sources to assist you in identifying the best privacy sites and sources available from the Internet. The information is taken from my constantly updated and expanded annotated white paper titled Privacy Resources available directly online at:

# Privacy Resources and Sites on the Internet

By

Marcus P. Zillman, M.S., A.M.H.A.  
Executive Director – Virtual Private Library  
[zillman@virtualprivatelibrary.com](mailto:zillman@virtualprivatelibrary.com)

Privacy Resources and Sites on the Internet is a comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. The below list of sources is taken from my Subject Tracer™ Information Blog titled Privacy Resources and is constantly updated with Subject Tracer™ bots from the following URL:

<http://www.PrivacyResources.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest privacy sources and sites.

## **Zfone - Secure Voice Over IP**

<http://www.philzimmermann.com/EN/zfone/index.html>

## **Awareness Watch™ Spotters**

### **Textmotivate - Goals Reminder**

<https://www.textmotivate.com/>

Looking for a bit more motivation? Why not try Textmotivate? The program allows users to receive brief text messages that will help remind them of upcoming goals. Visitors just need to sign up for an account, and they can tweak the settings to be reminded at certain intervals over a number of days, weeks, or months. The program has a few preloaded goals that many people might be interested in, such as quitting smoking, and users are encouraged to add their own. This version is compatible with all operating systems. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2012. <http://scout.wisc.edu/>

### **Healthfinder.gov**

<http://www.healthfinder.gov/>

The Healthfinder website was established as part of the U.S. Department of Health & Human Services, and is maintained by the Office of Disease Prevention and Health Promotion. On the homepage, visitors will find a MyHealthFinder tool, which allows users to find health advice for a friend or a family member just by typing in their age and sex. The homepage also features the Health A-Z section, which is an encyclopedia of over 1600 health topics from a variety of trusted sources. Visitors won't want to miss the Personal Health Tools area either. Here they can download health widgets, take brief online checkups, use activity and menu planners, and even send e-cards. Many of the documents here are also available in Spanish. This will be added to [Healthcare Resources 2012](#). From The Scout Report, Copyright Internet Scout 1994-2012.

<http://scout.wisc.edu/>

### **SCIRES-IT: SCientific RESearch and Information Technology**

<http://caspur-ciberpublishing.it/index.php/scires-it>

SCIRES-IT provides a forum for the exchange and sharing of know-how in the areas of Digitalization and Multimedia Technologies and Information & Communication Technology (ICT) in support of Cultural and environmental Heritage (CH) documentation, preservation and fruition. It publishes comprehensive reviews on specific fields, regular research papers and short communications in a timely fashion. The Journal's aim is to encourage scientists to publish their experimental results and theoretical work in a comprehensive way. Restrictions on the length of papers is negotiable with the Editors. There are, in addition, other features that this Journal encourages: Electronic files regarding the full details of theoretical derivations, detailed

experimental results, high-resolution renderings, short video animations and audio/video documentaries can be deposited as supplementary material to support the article.

### **Economics U\$A - Instructional Micro and Macroeconomics Video Programs**

<http://www.learner.org/resources/series79.html>

A video instructional series on micro- and macroeconomics for college and high school classrooms and adult learners; 28 half-hour video programs; 28 audio programs; coordinated text and guides; and Web site. Explore economic history, theory, and practice through case studies and interviews with Nobel-prize winning and major economists. The series covering macro, micro, and international economics features Milton Friedman, Paul Samuelson, John Kenneth Galbraith, Alice Rivlin, and Ben Bernanke, among others. Major economic events, including the 2008 banking crisis and technology's influence on the economy, connect economic theory to the headlines. The full complement of material includes audio interviews and a coordinated Web site. Economics U\$A: 21st Century Edition is produced by the Educational Film Center. This has been added to [Tutorial Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2012. <http://scout.wisc.edu/>

### **Sanborn Fire Insurance Maps**

<http://www.loc.gov/rr/geogmap/sanborn>

A searchable database of the 50,000+ fire insurance maps published by the Sanborn Map Company housed in the collections of the Library of Congress Geography and Map Division. Includes links to 6,000+ digital images in the Library of Congress collection. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Many Eyes - Visualization and Data Sets**

<http://www-958.ibm.com/software/data/cognos/manyeyes/>

The heart of the site is a collection of data visualizations. You may want to begin by browsing through these collections—if you'd rather explore than read directions, take a look! All the visualizations on Many Eyes have an attached discussion forum. As you explore a visualization, you may find a view that you'd like to talk about or share. If you post a comment, your "view" is saved along with your comment so others can see what you're seeing. Each visualization lets you select data items by clicking. Your selection will be highlighted in a bright color, so that you can refer to those items in your comments. This simple feature is very convenient: it's much nicer to say "Look at the circled part of the graph" than "look at the thing sort of at the upper right". On Many Eyes you can: 1) View and discuss visualizations, 2) View and discuss data sets, and 3) Create visualizations from existing data sets. If you register, you can also: 4) Rate data sets and visualizations; 5) Upload your own data, 6) Create and participate in topic centers, 7) Select items to watch, 8) Track your contributions, watchlist, and topic centers, and 9) See comments that others have written to you. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Hans Journal of Wireless Communications**

<http://www.hanspub.org/journal/hjwc/>

Hans Journal of Wireless Communications publishes the latest Chinese advances in the field of wireless communications. Topics include: \* Antenna systems and radio frequency (RF) engineering \* Body area networks and its application \* Broadband wireless access technology \* Cognitive radio and software defined radio \* Microwave and millimeter-wave theory and technology \* Multi-user and multiple access scheme \* Wireless Optical Communication \* Wireless network planning and optimization of UMTS \* Radio resource management and interference control \* Terahertz and infrared technology and engineering \* Vehicle communication and network \* Wireless air interface and connection control \* Wireless propagation channel modeling \* Wireless multimedia communications and computing \* Wireless power transmission \* Wireless sensor networks \* Wireless infrastructure and applications \* Wireless communication and routing Hans Journal of Wireless Communications is available free of charge as an Open Access journal on the Internet. Abstracts available online in Chinese and English. Articles available in PDF format in Chinese.

## **Open Methodology Framework**

<http://goo.gl/Vw16T>

The **Open Methodology Framework** is a collaborative environment for building methods to solve complex issues impacting business, technology, and society. The [MIKE2.0 Methodology](#) is the pilot project for the Open Methodology Framework. The Open Methodology Framework will be extended over time to include other projects. Another example of an open methodology, is [open-sustainability](#) which applies many of these concepts to the area of sustainable development. The best methodologies provide repeatable approaches on how to do things well based on established techniques. The **Open Methodology Framework** goes beyond the standards, techniques and best practices common to most methodologies with three objectives: a) To Encourage Collaborative User Engagement; b) To Provide a Framework for Innovation; and c) To Balance Release Stability with Continuous Improvement. We believe that this approach provides a successful framework accomplishing things in a better and collaborative fashion. What's more, this approach allows for concurrent focus on both method and detailed technology artifacts. The emphasis is on emerging areas in which current methods and technologies lack maturity. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **StatSilk - Interactive Maps and Visualizations**

<http://www.statsilk.com/>

StatSilk offers a range of web-based and desktop software to cater to diverse mapping and visualization needs. Their software has a common purpose: to make data analysis easy, efficient and enjoyable. They firmly believe that software should adapt to your needs, and not the other way around. Try out the award-winning StatPlanet software to create interactive maps and graphs. Or have a look at the software overview to find out

which software best suits your needs. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Developing Country Studies**

<http://www.iiste.org/Journals/index.php/DCS>

The journal publishes original papers at the forefront of social, economical, trade and legislative issues related to developing countries. Developing Country Studies is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **Wajam - What Your Friends Have Shared**

<http://www.wajam.com/>

Wajam is a social search extension for your browser. You and your friends share lots of great content on social networks like Facebook and Twitter. Wajam lets you find that content when you search with Google, Bing, Yahoo, Amazon, Facebook Twitter and Blekko. You can use Wajam with Firefox, Chrome, Safari, and Internet Explorer. You can search in Google, Bing, Yahoo, Facebook, Twitter, Blekko, Amazon, Yelp, Trip Advisor, IMDB, Wikipedia, Ebay, Overstock, Ask, Best Buy, Shopping.com, Mahalo, and Walmart. At the moment, you can only log-in with your Facebook or Twitter accounts. When you do a search in Google, Bing, Yahoo, Amazon, Facebook Twitter or Blekko, you'll find your most relevant Wajam result at the top of your search results. Along with this result you'll find information about who shared the item, any comments they made about it, and how many other friends also shared that same piece of content. Above your top Wajam result, you'll find a breakdown of friends who have shared the most content that's related to your search. If you've saved or shared any results that are related to your search term then you'll be listed first, so it's easy to find your content again. To see your top 11 Wajam results for your search term, click View more results from friends. To see results for your search term that were shared by a specific friend, click on their name if it appears above your Wajam result, or click on +317 friends (number taken from image above). If a Wajam result was shared by multiple people, you will see Shared by # friends next to the URL. Click on this link to see all the comments about the item. To sort your results by newest or oldest, click Options, then click Newest or Oldest. To filter results by source, click Options, then click on the source(s) that you'd like to filter out. All of the sources that you've added that have relevant results for your search term will automatically be selected. Not finding what you're looking for? Try clicking on one of the search terms under your top result. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **TimeSearch - Search the Web Through Timelines**

<http://www.timesearch.info/>

TimeSearch is a search engine devised by Bamber Gascoigne and designed by Ian Henghes, who are fellow directors of the educational website HistoryWorld. It is an early example of the post-Google generation of online search tools, capable of being more finely tuned to the individual needs of the user. In the case of TimeSearch the user will be

anyone interested in history. This may sound restricting. But yesterday is history. After lunch, this morning is history. The raw material of TimeSearch is events of any kind, whenever they may have happened. By delivering them in the form of timelines, the programme introduces the valuable element of chance discovery. In a conventional search engine you need to know roughly what you are looking for before you can type it into the Search panel. With TimeSearch you only need to say what areas or themes interest you, and at what period, before you discover what surprises history may deliver. A previously unknown event may turn out to be just what you were looking for. And it not only arrives with its own built-in search mechanism. It even lets you decide which site or sites you wish to search - for related information or images. TimeSearch already has nearly 10,000 events in its timelines, and it is growing fast. This material is a spin-off from HistoryWorld, and the TimeSearch project - launched in 2007 - therefore derives ultimately from the origins of HistoryWorld a dozen years before. It is managed by the same team of five who have run HistoryWorld since its launch. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Quipol - Create and Embed Social Polls**

<http://www.quipol.com/>

Quipol is social polling. Create simple & elegant one-question polls, embed them into your blog posts and webpages, and find out where your audience stands on virtually any topic. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

### **International Journal of Advanced Technology and Engineering Research (IJATER)**

<http://www.ijater.com/>

International Journal of Advanced Technology and Engineering Research (IJATER) is devoted to the publication of high quality papers on theoretical as well as practical developments in all engineering disciplines. The International Journal of Advance Technology and Engineering Research encourages submission of innovative and which we will be enhance the original articles in all areas of Information Technology including Computer Science, Software Engineering, Information Systems, artificial intelligence, Computer Systems and Information Engineering and Electronics and Telecommunications. International Journal of Advanced Technology and Engineering Research is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **SetCronJob - Reliable Cron Jobs with Simple WebCron Interface**

<http://www.setcronjob.com/>

**Cron** is a job scheduler in Linux/Unix. It's often used to run a script automatically, e.g at 1:00 AM every day. **Cron job** is very useful to backup files, databases, send mails, clear temporary files, generate invoices, set up and run PHP cron jobs, etc. **SetCronJob** offers reliable **online cron job** service, a good alternative to CronJobs feature which is often disabled on most free or cheap Linux hosting. Register an account and set up your

cronjobs for **FREE!** There are two types of account: a) **Free Account:** You can create unlimited cron jobs **every hour** for FREE; and b) **Premium Account:** You can create unlimited cron jobs **every minute** with all features! Starting price is only \$10 a year. You are not required to verify your site! Just paste the URL! This has been added to the tools section of [Research Resources](#) Subject Tracer™.

### **Desire2Learn**

<http://desire2learn.com/>

Founded in 1999, Desire2Learn Incorporated is a leader in providing innovative learning solutions to K-12, Higher Ed, Corporate, Government and Healthcare organizations worldwide. They have a proven track record of client success. Their outstanding service and support has made them the partner of choice for leading organizations around the globe. Whether your organization is a few people or tens of thousands, they collaborate with you to provide the right solution for your unique vision, specifications, and budget. They take great pride in providing their clients with the best learning environment possible. As their name suggests, they are passionate about creating solutions that can ignite the desire to learn in anyone. They are driven to make a real difference in people's lives, which is why nearly half of our staff is dedicated to research and development. With a focus on user experience, accessibility, mobility, platform security and reliability they deliver systems that their clients and their learners can count on anywhere, anytime. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **SNAPP - Social Networks Adapting Pedagogical Practice**

<http://research.uow.edu.au/learningnetworks/seeing/snapp/index.html>

SNAPP is a software tool that allows users to visualize the network of interactions resulting from discussion forum posts and replies. The network visualisations of forum interactions provide an opportunity for teachers to rapidly identify patterns of user behaviour – at any stage of course progression. SNAPP has been developed to extract all user interactions from various commercial and open source learning management systems (LMS) such as BlackBoard (including the former WebCT), and Moodle. SNAPP is compatible for both Mac and PC users and operates in Internet Explorer, Firefox and Safari. Most of the student data generated from Learning Management Systems (LMS) include reports on the number of sessions (log-ins), dwell time (how long the log-in lasted) and number of downloads. This tells us a lot about content retrieval in a transmission model of learning and teaching, but not about how students are interacting with each other in more socio-constructivist practice. Discussion forum activity is a good indicator of student interactions and is systemically captured by most LMS. SNAPP uses information on who posted and replied to whom, and what major discussions were about, and how expansive they were, to analyse the interactions of a forum and display it in a Social Network Diagram. The following figures illustrate how SNAPP re-interprets discussion forum postings into a network diagram. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

## **Journal of Medical Science and Technology (JMST)**

<http://www.jmst.webs.com/>

Journal of Medical Science and Technology (JMST) is an international online Journal focused towards the publication of current research work carried out under Medical Science and Technology. This journal covers all major fields of applications in Medical Science and Technology. Journal of Medical Science and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

## **Backlog - Evolutionary Project Management Tool**

<http://backlogtool.com/>

Does your Project Management Tool help your team to cooperate? Do you feel you are boxed in a corner because you were told to use this application for task management and use that application for file sharing. Communication and sharing information among team members are key for smoother team projects. Backlog includes all Project Management features that support your team , such as task management, charts, file sharing and Subversion. Your team members can concentrate on what they are supposed to do by using Backlog. One of the distinctions of Backlog is that its user interface is clear and very easy to grasp. Its features were carefully selected to avoid confusion for the first time user. All team members, including programmers, designers, sales people and administrators, can work smoothly on Backlog. They believe that the best results will be produced when team members work together. As simple as clicking "Like" on Facebook, praising other team members or being praised is a good way to communicate and interact. Backlog helps to bring up motivation and and bring enjoyment to your work. They always listen to user's feedback and never stop looking from the user's view to improve their service. In fact, some of the current features come from user's requests. They will keep Backlog evolving further for all project teams. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **New Economy Resources**

<http://www.NewEconomyResources.com/>

The freely available **New Economy Resources** represents the latest world wide web resources for discovering new knowledge and understanding the latest happenings with regards to the New Economy. The world is rapidly changing as transparency, big data and the ability to access data from new and now accessible databases becomes a reality! Understanding the required new economy analytics, resources and alerts will give you the necessary tools to maintain your current position, improve your position and or discover the new knowledge required to be the leader in your profession. (35 Pages, 346KB, .PDF March 1, 2012)

## **Photosynth - 3D Tools**

<http://photosynth.net/>

Photosynth is a powerful set of tools for capturing and viewing the world in 3D. You can share these views with your friends on Facebook, publish them to Bing Maps, or embed them in your own Web site. Photosynth offers two styles for creating immersive 3D

experiences: synths and panoramas. Choose a panorama when you can capture everything from a single location with a single zoom level. Great for giving a sense of what it feels like to be in a one particular place. Can be 360° in both directions, but doesn't have to be. Simple to navigate - all you can do is go left/right, up/down and zoom in/out. Good for capturing different sides or details of an object. Synths were the original experience on this site, and they remain its unique feature. More complex to navigate than panoramas because you are moving from photo to photo. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **IM+: All In One Messenger**

<http://www.shape.ag>

Use IM+ to connect to Beep, MSN/Windows Live®, Facebook®, Skype™, Google Talk™, Yahoo!®, AIM®/iChat, ICQ®, Jabber®, MySpace, Twitter, VKontakte, Mail.Ru Agent and Yandex IM at the same time! Not to mention, it works on ALL popular mobile platforms. IM+ has the widest selection of unique features that you won't find in any other IM client. Plus, there's no cost per message, so you can send photos, videos, voice msgs, and IM for free and save loads on MMS and SMS with Beep! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **International Journal of Health Sciences and Research (IJHSR)**

<http://www.ijhsr.org/>

The International Journal of Health Sciences and Research (IJHSR) is an open access international journal dedicated to promotion of research in health and allied sciences. The journal publishes original research article from broad areas like Medicine, Dentistry, Pharmacy, Anatomy, Physiology, Biochemistry, Neurology, Surgery, Orthopaedics, Ophthalmology, ENT, Anesthesiology, Community Medicine, Public Health, Physiotherapy, Rehabilitation, Occupational Therapy, Paramedical sciences, Nursing, Health and Hospital Management, Genetics, Biodiversity & Conservation, Pathology, Microbiology, Biotechnology, Occupational and Environmental sciences, Molecular Biology, Clinical Psychology, Psychiatry, Psychotherapy, Dietetics & Nutrition, Yoga etc.

### **Instagram - Fast Beautiful Photo Sharing for Your iPhone**

<http://instagr.am/>

It's a fast, beautiful and fun way to share your life with friends through a series of pictures. Snap a photo with your iPhone, choose a filter to transform the look and feel, send to Facebook, Twitter or Flickr – it's all as easy as pie. It's photo sharing, reinvented and it's free! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Odysci - Academic Search and Technical Collaboration**

<http://www.odysci.com/>

Odysci is a new and free web portal for search and rank of scientific articles published in journals and conferences worldwide, in computer sciences, electronics and related areas. Their focus is relevance of results and technical collaboration, as well as usability. They believe they have many features that set them apart from Google Scholar, MS Academic Search, DBLP, and others. They cover ACM publications, IEEE CS publications, as well as those listed by CiteSeerX, DBLP and many other databases. Besides the usual search by keywords, conferences, etc., Odysci offers new interesting ways to search and to allow the user to control and narrow the results. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#).

## **JISC Elevator - Bringing Ideas to Fruition**

<http://elevator.jisc.ac.uk/>

JISC elevator is a platform for crowd sourcing ideas that will use technology to improve education and research in UK higher and further education institutions. The purpose of JISC elevator is to allow JISC to fund innovative projects that will be valuable to higher and further education. Once an idea has been submitted to the site, people working and studying in UK higher and further education (with an .ac.uk email) will be able to vote if they like the idea. When an idea receives the target number of votes then we will decide whether or not to fund the idea. This crowd sourcing mechanism will allow us to respond to the demands and needs of those working and studying in higher and further education. The combination of crowd sourcing and small agile projects allows ideas to be focused tightly on solving a particular problem that is experienced by many people at a range of higher and further education institutions. It also enables experimentation with new ideas and technology that appeal to a large group of people while keeping costs and risks low. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **International Journal of Research in Pharmaceutical and Biomedical Sciences (IJRPBS)**

<http://www.ijrpbsonline.com/>

This journal has been started with an aim to publish recent advances of research in the form of original research articles, short communications and review articles in all areas related to Pharmaceutical and Biomedical science. Topics include Pharmaceutical technology, Pharmaceutics, Biopharmaceutics, Pharmacokinetics, Pharmaceutical chemistry, Medicinal chemistry, Analytical chemistry, Pharmaceutical analysis, Computational chemistry, Organic chemistry, Inorganic chemistry, Biochemistry, Physical chemistry, QSAR, Pharmacognosy and Phytochemistry, Pharmacology, Pharmacy practice, Hospital and Clinical pharmacy, Pharmaceutical biotechnology, Cell biology, Genomics and Proteomics, Pharmacogenomics, Bioinformatics, Microbiology, Immunology, Animal sciences, Plant biology, Stem cell research, Food sciences, etc.

## **Newsle - News About Your People**

<http://newsle.com/>

Newsle is a web app that tracks people in the news. Newsle finds articles about you, your friends and colleagues, and anyone else you care about and notifies you minutes or hours after they're published. Newsle's private beta launched in January 2011, and was covered by TechCrunch. The current version is a major evolution of the original concept. Newsle now combs the web continuously, analyzing over 1 million articles each day - every major news article and blog post published online, as well as most minor ones. Newsle's core technology is its disambiguation algorithm, which determines whether an article mentioning "John Smith" is about the right person. Newsle only indexes publicly available news articles. They do not search for personal records, criminal records, phone numbers, addresses, or other private information. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

## **One Million by One Million**

<http://1m1m.sramanamitra.com/>

One Million by One Million is a global initiative that aims to nurture a million entrepreneurs to reach a million dollars each in annual revenue and beyond by 2020, thereby creating a trillion dollars in global GDP and ten million jobs. Silicon Valley entrepreneur and strategy consultant Sramana Mitra founded 1M/1M to create a framework for Capitalism 2.0, which she envisions as distributed, democratic capitalism. The program was born out of her 2010 New Year Resolution. They offer a case-study-based online educational program, video lectures, lean, capital-efficient methodology guidance, online strategy consulting at public and private roundtables, as well as introductions to customers, channel partners and investors (pre-seed, seed, angel, VC, bank, alternative financing). The public roundtable is a free program accessible from anywhere in the world. The rest of the services are for their paying members only. Please note that they focus on business strategy and execution; capital is optional, and may or may not be appropriate for your particular business. Less than 1% of businesses that seek funding are actually fundable. However, they are perfectly happy to help the other 99% build sustainable businesses as well, irrespective of fundability or interest in external financing. This has been added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Participedia - Strengthening Democracy Through Shared Knowledge**

<http://participedia.net/>

Participedia harnesses the power of collaboration to respond to a recent global phenomenon: the rapid development of experiments in new forms of participatory politics and governance around the world. We live in a world in which citizens of most countries are asking for greater involvement in collective decisions. Many governments, non-governmental organizations, and even some corporations are responding by experimenting with ways to increase public participation. Hundreds of thousands of participatory processes occur each year in almost every country in the world. They are occurring in a wide variety of political and policy problems. And they often supplement

Awareness Watch V10N4 April 2012 Newsletter

and sometimes compete with more traditional forms of politics, such as representative democracy. Participedia responds to these developments by providing a low-cost, easy way for hundreds of researchers and practitioners from across the globe to catalogue and compare the performance of participatory political processes. Practitioners, activists, government officials, and journalists will benefit from Participedia's searchable database of cases, methods, and organizations, including knowledge about how well processes have worked for similar problems, under similar conditions. Social scientists, policy analysts, democratic theorists, and other scholars will benefit from access to a dynamic, diverse, and growing source of comparable qualitative and quantitative data. They encourage you to contribute information on case studies, methods and organizations. The more you participate, the more you will appreciate what this site has to offer. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **International Journal of Management and Tourism**

<http://www.ijmtpublication.com/>

International Journal of Management and Tourism aims to publish research articles, short communications, case studies, literature reviews and book reviews and challenges the authors to develop new methods of conducting research and to push their limits to find new topics or to extend the existing Tourism and Management Sciences Body of Knowledge by creating and imparting knowledge for the future generations to come. International Journal of Management and Tourism is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **LeanLaunchLab - Innovation Management Software for Lean StartUps and CustDev Teams**

<https://www.leanlaunchlab.com/>

The easy way for your team to go lean. Features include: a) Visualize your business model using the canvas; b) Track hypotheses and experiments; c) Store customer interviews in one place; and d) Keep advisors, investors, & managers in the loop. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **DataSift - Powerful Social Data Platform**

<http://datasift.com/>

DataSift offers the most powerful and sophisticated tools for extracting value from Social Data. The amount of content that Internet users are creating and sharing through Social Media is exploding. DataSift offers the best tools for collecting, filtering and analyzing this data. Social Data is more complicated to process and analyze because it is unstructured. DataSift's platform has been built specifically to process large volumes of this unstructured data and derive value from it. Key benefits include: a) DataSift lets you access the full Twitter firehose in a cost-effective way. Pick between pay-as-you-go and subscription models, so you pay just for the Tweets that you use; b) DataSift was architected to handle large volumes of real-time data and immense numbers of

sophisticated queries. This infrastructure supports billions of interactions and queries with regular response times of less than 200 ms; c) DataSift is one of two exclusive re-syndicators of Twitter data. Create filters through our API to just deliver the tweets you need from the Firehose - based on keywords, location, sentiment, influence and other meta-data attached to each Tweet; and d) DataSift partners with leading analytics and visualization companies to offer the most comprehensive suite of tools for extracting the signal from the noise of real-time data. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to my [Web Data Extractors](#) White Paper.

### **Online Etymology Dictionary**

<http://www.etymonline.com/>

This is a map of the wheel-ruts of modern English. Etymologies are not definitions; they're explanations of what our words meant and how they sounded 600 or 2,000 years ago. The dates beside a word indicate the earliest year for which there is a surviving written record of that word (in English, unless otherwise indicated). This should be taken as approximate, especially before about 1700, since a word may have been used in conversation for hundreds of years before it turns up in a manuscript that has had the good fortune to survive the centuries. The basic sources of this work are Weekley's "An Etymological Dictionary of Modern English," Klein's "A Comprehensive Etymological Dictionary of the English Language," "Oxford English Dictionary" (second edition), "Barnhart Dictionary of Etymology," Holthausen's "Etymologisches Wörterbuch der Englischen Sprache," and Kipfer and Chapman's "Dictionary of American Slang." This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Education**

<http://www.mdpi.com/journal/education>

Education is a scholarly international open access journal. It publishes extended full-length research papers that have the scope to substantively address current issues in education. There is no restriction on the length of the papers relevant to any field of study within education. Submissions that synthesize information from disparate backgrounds, place research findings within a broad context, extend our methodological and theoretical understanding, and have the likelihood of informing education policy and practice, are preferred. The journal publishes quantitative, qualitative and mixed method research papers. Extended reviews of substantive research studies and/or technical reports published elsewhere are also welcome. Additionally, Education invites commentaries and original opinion pieces and/or analysis of issues and events of concern to education scholars that have international resonance. Education publishes across all relevant fields of research, including but not restricted to: \* educational administration and educational management, \* educational philosophy and theory of education, \* educational history, \* educational policy, \* curriculum studies, \* educational technology systems, \* educational

technology, \* learning and teaching, \* pedagogies, \* sociology of education, \* special education, \* teacher education, and \* testing and evaluation.

### **MonkeyContact - Personal People Search**

<http://www.monkeycontact.com/>

MonkeyContact allows you to find people by name, company, location, job function, emails, phone numbers or a combination. And it does not matter how you are connected to them. MonkeyContact is your personal people search. Right in Gmail, Google Search or the web. What's their name? Help your memory! Find people by multiple search criteria. Where do I have their email? Save time! Stop copy & pasting emails between different applications! Why does their name not show up? Stop the frustration. More intelligent search brings you better results! This will be added to [Finding People](#) Subject Tracer™ Information Blog.

### **Updated> Academic and Scholar Search Engines and Sources Annotated White Paper**

<http://www.ScholarSearchEngines.com/>

I am very pleased to announce that my Internet MiniGuide Annotated Link Compilation White Paper titled **Academic and Scholar Search Engines and Sources** has been just updated and is now a 68 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address that can be accessed. It is freely available as a .pdf file (440KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated March 1, 2012]

### **Collusion - Discover Who Is Tracking You Online**

<http://www.mozilla.org/en-US/collusion/>

Collusion is an experimental add-on for Firefox and allows you to see all the third parties that are tracking your movements across the Web. It will show, in real time, how that data creates a spider-web of interaction between companies and other trackers. We recognize the importance of transparency and our mission is all about empowering users — both with tools and with information. The Ford Foundation is supporting Mozilla to develop the Collusion add-on so it will enable users to not only see who is tracking them across the Web, but also to turn that tracking off when they want to. Your data can be part of the larger story. When they launch the full version of Collusion, it will allow you to opt-in to sharing your anonymous data in a global database of web tracker data. We'll combine all that information and make it available to help researchers, journalists, and others analyze and explain how data is tracked on the web. Through their work with the Ford Foundation, they will be building outreach campaigns to help people understand online data tracking — both the benefits and the issues — so they can make their own choices about how they want to be tracked (or choose not to be tracked at all). Not all tracking is bad. Many services rely on user data to provide relevant content and enhance your online experience. But most tracking happens without users' consent and without

their knowledge. That's not okay. It should be you who decides when, how and if you want to be tracked. Collusion will be a powerful tool to help you do that. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Privacy Resources](#) Subject Tracer™ .

### **Tell.ly - Business Telephony As a Web Service**

<http://tell.ly/>

Business telephony as a web service that is easy, smart, analyzable and low cost. Features include: a) Record all your calls; b) Analyze your calls; c) Common address book for the whole company; d) Use any phone or even your browser for making calls; e) Personal settings for each employee; f) voice to text conversion; and g) Gtalk integration. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ .

### **Updated> Finding Experts By Using the Internet** UPDATED

<http://www.FindingExperts.info/>

I have just updated my white paper link compilation on **Finding Experts By Using the Internet**. This is a 29 page .pdf file (265KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [Updated March 2, 2012 29 pages 265KB .pdf]. Additional white papers available by clicking [here](#).

### **Cyn.in - Open Source Collaboration Software**

<http://www.cyn.in/>

Cyn.in is a collaboration software that inter-connects your people with each other and their collective knowledge, seamlessly. Cyn.in helps teams to communicate faster and build collaborative knowledge by sharing and discussing various forms of digital content within a secure, unified application. It combines the capabilities of collaboration tools like wikis, social networks, blogs, file sharing repositories, micro blogs, discussion boards and other communication applications into one secure enterprise platform. Cyn.in is designed to be used by businesses and institutions of all sizes. Cyn.in is an open source application and is available as free and commercially supported software as well as a hosted and managed on demand service. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ .

### **Textbook Revolution**

<http://textbookrevolution.org/>

Textbook Revolution is a student-run site dedicated to increasing the use of free educational materials by teachers and professors. We want to get these materials into classrooms. On this site you'll find links and reviews of textbooks and select educational resources. Some of the books are PDF files, others are viewable online as e-books, or some are simply web sites containing course or multimedia content. This will be added to [Student Research Resources](#) Subject Tracer™ .

### **Critical Theory and Social Justice (CTSJ)**

<http://scholar.oxy.edu/ctsj/>

Critical Theory and Social Justice (CTSJ) is dedicated to providing a forum for undergraduate students to develop and share critical research and writing on the intersections of "race", "sexuality", and "nationality" as they relate to problems of social justice. The journal seeks to foster exchange of ideas across disciplines and deepen understandings of systems of injustice, and in this way advances the mission of Occidental College: to develop critical, thoughtful, and active participation in an increasingly pluralistic and conflict ridden global culture. Critical Theory and Social Justice is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **VPNClub - Safe and Secure Virtual and Physical Servers**

<http://www.vpnclub.biz/>

VPNClub offers a high standard Virtual private network solutions. They provide a wide range of VPN solutions, including VPN development, 24/7 support and system management as well as hardware for all the process. You've found perfect privacy solution. They encrypt your Internet connection and keep your identity and privacy protected from prying eyes. They make your existing internet connection secure, encrypted and anonymous - wherever you are. With VPN you can anonymize and encrypt your whole Internet connection. Regardless whether you like to browse, keep a blog, write e-mails, run a business, transfer money, download images, exchange files or chat, you will always be unobserved and safe. Their VPN networking provides customizable software. You don't have to be a computer expert to operate the software, just follow the few simple steps that will be described to you in the How To section to install and pre-configure the software in 5-10 minutes! Your connection will be secure in no time. Experts are still welcome to use any open source software. By giving you a personalized service they guarantee that while you use their service, you will be anonymous, safe and secure. They are not interested in who you are. You can pay anonymously. Their encryption and anonymization are situated in the most privacy-friendly locations on different continents. And the best thing is - you get connection to all of them! This will be added to [Privacy Resources](#) Subject Tracer™ .

## Updated> Finding People Resources and Sites **UPDATED**

<http://www.FindingPeople.info/>

I have just updated my **Finding People Resources and Sites** white paper link compilation. It is now freely available 25 page .pdf document (218KB) at the above URL. These valuable resources will allow you to find long lost love ones, past school and college roommates and friends, and previous business and professional associates. A must internet reference in today's quickly changing world. (**Updated March 3, 2012**)

## Web Control Room - All Your Small Business Information, The One Place, Free

<http://webcontrolroom.com/>

As a small business owner there is a lot of information to get your head around. With all of the online systems used by small business owners, it would take forever to log into each system and get the core information that tells you how your business is really going. Web Control Room (beta) is a free tool that provides a 1-page summary of how you are tracking by talking to the systems you use in your business. Small businesses get their information from a lot of different places (i.e. website stats from Google Analytics, financial data from Xero etc). Web Control Room talks to these services to give you a 1-page snapshot of your overall performance. Their beta version supports 1 report from 7 different systems however they are actively working on more. The number of systems they integrate with will grow as they receive feedback from beta users as will the number of charts from existing systems. Web Control Room gives you colour coded charts to show you at a glance what things deserve your attention. If you see red then you are behind your results from the last reported date (usually month) and therefore what needs to be focused on for improvement. If you see green then things are improving – well done! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## Faviz - Quick Links To Your Favorite Websites

<http://www.faviz.com/>

Quick links to your favorite websites Desktop, Tablets and Smart Phone. One tap or click access to your Favorite websites. Use on smartphones Android, Iphone, Blackberry, Symbian or Windows. No Download required. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## ISPRS International Journal of Geo-Information

<http://www.mdpi.com/journal/ijgi>

ISPRS International Journal of Geo-Information provides an advanced forum for the science and technology of geographic information. ISPRS International Journal of Geo-Information publishes regular research papers, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. There are, in

addition, three unique features of this journal: \* manuscripts regarding research proposals and research ideas will be particularly welcomed. \* electronic files and software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material. \* manuscripts concerning summaries and surveys on research cooperation and projects (that are founded by national governments) to give information for a broad field of users. Scope \* data collection and acquisition \* data structures and algorithms \* spatio-temporal databases \* spatial analysis, data mining, and decision support systems \* visualization theory and technology in real and virtual environments \* cartography \* location based services \* uncertainty handling in spatial data \* topology \* geo-computation \* geo-telematics \* spatial information infrastructures \* interoperability and open systems \* applications of geoinformation technology (all possible domains) ISPRS International Journal of Geo-Information is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **New Economy Resources**

<http://www.llrx.com/features/neweconomyresources.htm>

Marcus P. Zillman's guide is focused on current web sites, blogs and database sources targeted to researchers whose goal is the discovery and effective use of specific, reliable resources to track the New Economy. These sources assume added importance with the expansion in U.S. government transparency, the rise in prominence of "big data" and the public release by agencies, NGOs, public interest groups and media, of diverse databases of analytics, reports, statistical releases, and customized charts. — Published March 9, 2012

### **DOE Data Explorer (DDE)**

<http://www.osti.gov/dataexplorer/>

Use the DOE Data Explorer (DDE) to find scientific research data - such as computer simulations, numeric data files, figures and plots, interactive maps, multimedia, and scientific images - generated in the course of DOE-sponsored research in various science disciplines. The DOE Data Explorer provides access both to collections and to individual datasets that have been submitted to OSTI by their creator, by a DOE National Laboratory, or by a DOE Data Center. OSTI became a member of and a registering agency for DataCite in 2011 and now assigns Digital Object Identifiers to individual datasets. DataCite provides a good definition of a DOI and why one is important at <http://datacite.org/whatisdoi>. The assigning and registration of a DOI for every dataset submitted is a free service provided by OSTI to enhance DOE's management of this

important resource. The publicly available data collections and individual datasets support DOE research results that are well documented in journal articles, conference literature, and technical reports. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#).

### **The Answer Bank**

<http://www.theanswerbank.co.uk/>

The principle of the AnswerBank is simple – ask a question in any of their subject categories and fellow contributors will supply you with an answer. A lot of questions on the AnswerBank are topical, relating to what is going on in the news or in the world of entertainment and sport. Their popular Quizzes & Puzzles category includes questions from the latest crossword and quizzes from newspapers across the country. ChatterBank is the place to go if you want to casually talk to other users, and their News section is full of lively, interesting stories that spark fierce debate among our user. The AnswerBank is a community of ideas and opinions, they only ask that you respect everyone’s view points no matter how much you may disagree with them and play nice. Any posts that are considered untoward or break Site Rules will be removed. For more information on how to use the AnswerBank, including how to register and post questions and answers, please see their list of FAQs. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

### **Industrial Engineering Letters**

<http://www.iiste.org/Journals/index.php/IEL>

Industrial Engineering Letters is a peer reviewed journal published by IISTE. The journal publishes original papers at the forefront of industrial engineering research, covering theoretical modeling, inventory, logistics, optimizations methods and their applications. The journal is published in both printed and online versions. The online version is free access and download.

### **Congressional Research Service (CRS) Reports Repositories**

<http://archive-it.org/collections/1078>

Congressional Research Service (CRS) is a “think tank” that provides research reports to members of Congress on a variety of topics relevant to current political events. However, the Congressional Research Service (CRS) does not provide direct public access to its reports, nor are they released to the public via the Federal Library Depository Program (FDLP). There are several organizations that collect and give access to subsets of published CRS Reports. This collection attempts to bring all CRS Reports together in one place. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

### **Updated> Accessibility Resources White Paper Link Compilation**

<http://WhitePapers.VirtualPrivateLibrary.net/AccessibilityResources.pdf>

I have just updated my white paper link compilation of the **Accessibility Resources** Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It is a 18 page .pdf document 194KB. [Updated March 13, 2012]

### **Cambridge Digital Library**

<http://cudl.lib.cam.ac.uk/>

Over the course of six centuries Cambridge University Library's collections have grown from a few dozen volumes into one of the world's great libraries, with an extraordinary accumulation of books, maps, manuscripts and journals. These cover every conceivable aspect of human endeavour, spanning most of the world's cultural traditions. While parts of the Library's manuscript collections have already been published in print, microfilm and digital formats, we are now building a substantial online resource so that our collections can be much more accessible to students, researchers and the wider public. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **Itemize - All Your Receipts In One Place**

<https://www.itemize.com/>

Easily track everything you buy. Stay organized and shop smarter. Itemize uses a patented technology to gather and organize online and offline receipts in one central digital place. Using receipts, Itemize enables users to easily track and manage all their purchases. In addition, Itemize offers a suite of shopper tools, including tagging and reporting for personal expense management, and recommendations for future purchases based on each user's shopping history. Itemize is simple and free. Sign up with your personal email account or choose a unique Itemize.com shopping inbox. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **International Journal of Linguistics (IJL)**

<http://www.macrothink.org/journal/index.php/ijl/>

The journal encourages and publishes papers in the field of linguistics, including theoretical linguistics, descriptive linguistics and applied linguistics. In addition to the broad area of language research, the creative approaches to language learning and teaching are also involved, leading linguistics to a higher level of cognitive development. The journal aims to improve the communicative power of the language and consolidate the national language communicative tool available to speakers. The International Journal of Linguistics also provides the opportunities for sharing the resources among members of the academic community. International Journal of Linguistics is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

## **Guide to the Global Economy**

<http://www.theglobaleconomy.com/>

This website can be used by college, Masters and high school students with some or no economics background. In fact, that is one of their objectives: to make knowledge of the global economy accessible to non-experts. Also, the website can be used in the U.S. and internationally which fits with our second objective: to make this knowledge available to anyone anywhere. They use data provided by the World Bank to show the main economic indicators of all countries. Each indicator is presented in comparison to several other countries and in terms of changes over time. They discuss the definitions of the various indicators and provide information about the ways in which one can interpret them. See for example, data for the U.S. economic indicators. Features include: a) Understand how the global economy works: Brief lectures on the global economy with interesting examples; b) Compare countries: Interactive charts allow you to compare across countries and over time; c) Understand the economies of specific countries: Key economic indicators with definitions, comparison, and time charts; and e) Find more resources: Directory of global institutions, news agencies, blogs, data sources, and more. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [International Trade Resources](#) Subject Tracer™ .

## **Updated> International Trade Resources White Paper Link Compilation**

<http://www.InternationalTradeResources.info/>

The above is the associated white paper link compilation of the [International Trade Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) It is a 29 page .pdf document 239KB. [Updated March 14, 2012]

## **Updated> Entrepreneurial Resources**

<http://www.EntrepreneurialResources.info/>

The white paper link compilation of the [Entrepreneurial Resources](#) Subject Tracer™ information resource by [Marcus P. Zillman, M.S., A.M.H.A.](#) has been just updated and is now a 64 page .pdf document 413KB listing the latest and greatest online resources for the Entrepreneur! [Updated March 14, 2012]

## **License123 - Always Be In Compliance**

<http://www.license123.com/>

Is Your Business at Risk? Non-compliance with license and/or permit regulations can lead to expensive fines and/or penalties. Avoid Fines and Penalties, See What Licenses Your Business Requires. Features include: a) Get All Forms Instantly - Access the complete list of federal, state, and local permits your business needs to legally operate. No More Searching; b) Be Fully Compliant - Complete filing instructions and licensing authority's contact information; and c) Complete Cost Clarity - Detailed break down of estimated filing fees. No small print. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

## **Factbites Search Engine - Where Results Make Sense**

<http://www.factbites.com/>

Factbites is a new approach to web searching - the results make sense! Factbites offers users meaningful, relevant sentences from every site in the search results. Ordinary search engines tell you next to nothing about the sites they select for you. How many times have you thought "Well, sure, I know that these pages all contain my keywords, but do they really have anything to do with my topic?" Visiting every site until you find the right one is a hassle. Factbites presents the user with full, meaningful sentences from every site in the search results. This means that you can often gain a great deal of factual information on a topic without ever having to leave the search page! When users do select a page, they can have much more confidence that the page deals directly and informatively with their topic. Factbites searches for matches on the basis of your whole topic area, not just your keyword. This means that it can return relevant, informative results on your topic that don't necessarily mention the word you searched for! The Factbites engine focuses on finding genuine, meaningful content. This makes it very good at filtering out spam sites. If the page doesn't have anything of substance to tell you, it won't rank well in a Factbites search. Factbites is about as fast as you can make a search engine. They challenge you to find one faster. They are currently in beta, so you'll find many searches don't work. For now, stick to topics and avoid unusual combinations of words. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **ISPRS International Journal of Geo-Information**

<http://www.mdpi.com/journal/ijgi>

ISPRS International Journal of Geo-Information provides an advanced forum for the science and technology of geographic information. ISPRS International Journal of Geo-Information publishes regular research papers, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. There are, in addition, three unique features of this journal: \* manuscripts regarding research proposals and research ideas will be particularly welcomed. \* electronic files and software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material. \* manuscripts concerning summaries and surveys on research cooperation and projects (that are funded by national governments) to give information for a broad field of users. Scope \* data collection and acquisition \* data structures and algorithms \* spatio-temporal databases \* spatial analysis, data mining, and decision support systems \* visualization theory and technology in real and virtual environments \* cartography \* location based services \* uncertainty handling in spatial data \* topology \* geo-computation \* geo-telematics \* spatial information infrastructures \* interoperability and open systems \* applications of geoinformation technology (all possible domains). ISPRS International Journal of Geo-Information is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

## **Lexxe Semantic Search Engine**

<http://www.lexxe.com/>

Founded in 2005, Lexxe Pty Ltd (ACN: 117 090 454) has been developing a third generation Internet search engine with advanced Natural Language Processing technology. Lexxe is based in Sydney, Australia. "Lexxe", /leksI/ or pronounced 'leksi', their company name, is derived from a linguistic term "Lexical", which means "related to words". It emphasises the processing of language from the level of words and the meanings associated with them, which is a core issue for Lexxe. Lexxe has been exploring more intelligent ways to find information for users. They believe this method will eventually bring far more accurate and relevant search results than the current search technology. In 2005, Lexxe launched its Alpha version, featuring Question Answering and other Natural Language search methods. Lexxe has decided to launch Beta version with its Semantic Key technology in 2011, while it will continue to commit effort to improve its Question Answering technology. Lexxe's search technology is built upon the foundation of advanced Natural Language technology. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Updated> Anti-Virus, Anti-Hoax, Anti-Myth, Anti-Fraud, and Anti-Spam Resources**

<http://www.InternetHoaxes.info/>

The white paper link compilation of the [Anti-Virus, Anti-Hoax, Anti-Myth, Anti-Fraud, and Anti-Spam Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been updated and is now a freely available 21 page .pdf document (223KB) listing the latest and greatest online resources and sites for Anti-Virus, Anti-Hoax, Anti-Myth, Anti-Fraud, and Anti-Spam! **Updated March 15, 2012.**

## **FindThatFile - Media File Search Engine**

<http://www.findthatfile.com/>

Findthatfile is a media file search engine. It locates media for you (documents, audio, video, etc). Everybody knows what a web page search engine is, Bing, Google, Yahoo, etc. findthatfile searches media files rather than web pages from all over the Internet. findthatfile.com's mission is to provide the most comprehensive file search on the Internet. Common searches are for PDFs, Documents (PPT, XLS, DOC, TXT, etc), Audio, Video, RAR and ZIP compressed files, Fonts, and much much more. They search as deeply as possible to identify the most relevant data from over 300 million files. This means they open each file, identify its author, title, contents, text extracts and all kinds of information that nobody else does. They also search more places than anyone else including 47 file types and 557+ file extensions from over 70 million web domains as well. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

## **Circos - Software Package for Visualizing Data and Information**

<http://circos.ca/>

Circos is a software package for visualizing data and information. It visualizes data in a circular layout — this makes Circos ideal for exploring relationships between objects or positions. There are other reasons why a circular layout is advantageous, not the least being the fact that it is attractive. Circos is ideal for creating publication-quality infographics and illustrations with a high data-to-ink ratio, richly layered data and pleasant symmetries. You have fine control each element in the figure to tailor its focus points and detail to your audience. Circos is flexible. Although originally designed for visualizing genomic data, it can create figures from data in any field. If you have data that describes relationships or multi-layered annotations of one or more scales, Circos is for you. Circos can be automated. It is controlled by plain-text configuration files, which makes it easily incorporated into data acquisition, analysis and reporting pipelines (a data pipeline is a multi-step process in which data is analyzed by multiple and typically independent tools, each passing their output as the input to the next step). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Advances in Physics Theories and Applications**

<http://www.iiste.org/Journals/index.php/APTA>

Advances in Physics Theories and Applications is a peer reviewed journal published by IISTE. The journal publishes original papers at the forefront of physics theories and applications. The journal is published in both printed and online versions. The online version is free access and download.

## **SendtoNews - Distribution Evolved**

<http://www.sendtonews.com/>

SendtoNews.com is a cloud-based, multimedia conduit serving a growing, global community of content creators, news outlets and leading brands. With increased competition, lower advertising revenues and widespread industry cutbacks, newsrooms today are forced to do more with less. SendtoNews serves as a source for fresh story ideas and high quality, third-party content. Best of all, the content is provided to newsrooms at no charge. For governments, universities, sports teams and leagues, travel organizations, public relations firms and other commercial entities, SendtoNews provides an unprecedented direct link with the newsroom professionals that are important to them. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Updated> Astronomy Resources**

<http://www.AstronomyResources.info/>

The white paper link compilation of the [Astronomy Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been updated and is now a freely available 29 page .pdf document (247KB) listing the latest and greatest online resources and sites for astronomy! **Updated March 16, 2012.**

## **FrazeIt - Advanced Search Engine for Phrases**

<http://fraze.it/>

FrazeIt aims to be the world's largest and most comprehensive search engine for phrases and sentences on the Internet. It comes with a powerful suggestion tool for words and phrases, along with a search engine that provides sentences for most terms or subterms. Advanced search features like form or zone filter are supported. FrazeIt supports 2 types of phrase (with more to come): a) Generic: phrases are extracting from the daily news so you get a nice way to see how words are used in everyday language; and b) Famous Quotes (English only): Include quotes from famous authors and Sayings. Search by author, occupation, religion, tag & origin are supported. FrazeIt supports the languages: 1) English; 2) French; 3) Spanish; 4) German; 5) Italian; and 6) Portuguese. Each search result comes with a direct access to google translate and define features as well as a context tab which displays the phrase in its original source. Search results can be narrowed down by selecting one or more filters. Current Filters include: forms (interrogative, negative, exclamative), zones (US, UK), contexts (business, science, health, etc) and rules (starts with, ends with). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Journalism Resources](#) Subject Tracer™.

## **CheckLists.com - Concise Advice To Help You Live Better and Longer**

<http://checklists.com/>

Their primary goal is to greatly improve the lives of people everywhere by providing a place where people can obtain and share useful information in a concise, easy-to-use format. Life is often hectic, confusing and overwhelming. They want Checklists.com to help you take care of things so you can relax and enjoy life. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Natures Sciences Societes**

<http://www.nss-journal.org/>

Natures Sciences Societes publishes articles dealing with all aspects of the relationship between man and nature, including human nature. This may include representations of nature, its use, its transformation due to the biological, physical and chemical processes on which human life depends, and the consequences of these transformations and the manner in which man copes with them. These themes encompass a large number of disciplines (natural sciences, life sciences, sociology, engineering and research processes). The interdisciplinary journal Natures Sciences Societes publishes original material in French and English. Two year moving wall for free access. Abstracts available online in French and English. Articles available in PDF format in French or English.

and depth of integrated unified network infrastructure spanning hosted customer portals as well as operational CRM, CMS and HRM. Work Collaboration seamless integration optimizes your operational processes with the use of the WCS Hive Portal Technologies. They go further by providing Business Process Automation capabilities. Work Collaboration is a cross-industry solution with a modular design and scaled implementation that fits businesses of any size. Project and content management, video conferencing and finance from one source offering: a) No multiple vendors and provides; b) No multiple contracts/terms; and c) Most cost-effective customized solution will fit your business or personal needs like a glove. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Ethics and Economics**

<http://ethique-economique.net/?lang=en>

This journal offers a place to all questions dealing with ethics. The main themes handled vary from general theory to practical ethical questions concerning societies. The journal encourages, but is not limited to studies on the links between economics and ethics. More general economic issues are also sought for. Articles could be submitted by any person/s who would contribute to the debate. Ethics and Economics is available free of charge as an Open Access journal on the Internet. Abstracts available in French and English. Articles available in PDF format in French or English.

### **QR Code Generator and Resource**

<http://www.qrcode.cx/>

QR code is a square image with some information encoded in it. It can be regular text, a URL, a phone number, coordinates of a certain location or an entire business card. The shape and structure of QR codes makes it possible to scan them using camera-enabled mobile phones. All you need to access the content of a QR code is to point the camera at it. The generation of QR codes and the creation of PNG files on the site QRCode.cx is done right in your browser. The information you enter does not leave your computer and your data is kept confidential. If you want to make additional changes to the design into your QR code or you need a QR code that is very big, then save the created picture in EPS vector format. Create T-shirts, stickers, badges and other objects with your own QR codes. The print is done by a print shop at requests via Zazzle. You can order an object with your own unique QR code right now and it will be delivered straight to your home. Make yourself happy and give gifts to your friends. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ .

## ShoppingBots and Online Shopping Resources 2012

<http://www.ShoppingBots.info/>

The latest research shows that when prospects search for your company on the Internet, the top 10 listings are likely to include the following:

- a) 3 listings from consumer posts to blogs, message boards, and opinion sites,
- b) 2 listings from experts,
- c) 2 listings from your own corporate site,
- d) 1 listing from an online publication, and
- e) 2 listings from other sources.

This confirms the need for immediate [business intelligence](#) to constantly monitor and evaluate the prospects ongoing searching results for your company, brand, and product. [Marcus P. Zillman, M.S., A.M.H.A.](#), Executive Director of the [Virtual Private Library™](#), Internet [expert](#), [author](#), [speaker](#), [consultant](#) and creator/founder of [BotSpot.com](#) will be speaking on **The Future of the Internet: eCommerce Security, Cloud Computing, HTML5 and IPV6** with emphasis on the growing areas of bots, intelligent agents, blogs (weblogs), news aggregators, business intelligence, artificial intelligence, RSS, Twitter, FaceBook MashUps, Grids/Clouds, Social Networks and the Web 3.0 . The Internet's future is both theoretical and practical and will relate to all that gather in cyberspace to continue education and to keep current! We truly live in exciting times ..... Will Mash-Ups and the Web 3.0 replace the current Internet as we know it? These and other questions will be discussed during this presentation by one of the Internet's pioneers and bot and artificial intelligence experts, Marcus P. Zillman. His latest links and resources are available by clicking [here](#).

Time: 6:30pm - 7:30pm

Date: Tuesday, March 20, 2012

Group: Rotaract Club of Naples Inc.

Location: Andalucia Clubhouse, Whippoorwill Lane, Naples, Florida

### **Want - Find Desired Products Hand-Selected By a Community of Shoppers**

<http://wanttt.com/>

Want is a highly social and interactive site that connects people with the products they have an affinity towards. Whether it's keeping track of the products they want to buy or receiving personalized product recommendations from the people they find interesting - Want is designed to use an individual's specific tastes to build the ultimate consumer experience. This will be added to [ShoppingBots and Online Shopping 2012](#).

### **AddShoppers - Social Sharing Platform for Online Retailers**

<http://www.addshoppers.com/>

AddShoppers is a -- soon to be patented -- sharing platform built for social commerce. They increase customer engagement by attaching their Social Promo Callouts™ to sharing buttons and measure ROI with just a few snippets of code, free. AddShoppers is the only social sharing platform built for online retailers. They help retailers increase sharing while at the same time providing unparalleled analytics. This will be added to [eCommerce Resources](#) Subject Tracer™ .

### **Journal of Pharmaceutical and Scientific Innovation (JPSI)**

<http://jpsionline.com/>

The Journal of Pharmaceutical and Scientific Innovation (JPSI) is a peer reviewed open access freely available bimonthly online Journal. JPSI publishes research in all branches of pharmaceutical and other sciences. Articles available in PDF format.

### **StudyBlue - Digital Flashcards**

<http://www.studyblue.com/>

StudyBlue is made for students. It empowers a generation of ambitious digital natives who expect and deserve high quality digital study tools. Nobody forces anybody to use it and nobody tells anybody they can't. StudyBlue helps students learn better. Learn together. And get smarter. Over one million students from around the world have already chosen to achieve their goals by using StudyBlue. Study millions of student-authored online flashcards, quizzes, and study guides, or create your own and free. This will be added to [Student Research Resources](#) Subject Tracer™ .

Other white papers are available by clicking [here](#).

## **Awarenesswatch™ Paper Review**

**Censorship and Deletion Practices in Chinese Social Media** by *David Bamman, Brendan O'Connor, Noah Smith*

<http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3943>

### **Abstract:**

With Twitter and Facebook blocked in China, the stream of information from Chinese domestic social media provides a case study of social media behavior under the influence of active censorship. While much work has looked at efforts to prevent access to information in China (including IP blocking of foreign Web sites or search engine filtering), we present here the first large-scale analysis of political content censorship in social media, i.e., the active deletion of messages published by individuals. In a statistical analysis of 56 million messages (212,583 of which have been deleted out of 1.3 million checked, more than 16 percent) from the domestic Chinese microblog site Sina Weibo, and 11 million Chinese-language messages from Twitter, we uncover a set of politically sensitive terms whose presence in a message leads to anomalously higher rates of deletion. We also note that the rate of message deletion is not uniform throughout the country, with messages originating in the outlying provinces of Tibet and Qinghai exhibiting much higher deletion rates than those from eastern areas like Beijing.

## **Subject Tracer™ Information Blogs**

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
