Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

Welcome to the V11N2 February 2013 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report covers the following and just released **Knowledge Discovery Resources 2013.** This Internet Annotated Link Dataset Compilation is dedicated to the latest and most competent resources for knowledge discovery available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key is to be able to find the important knowledge discovery resources and sites both in the visible and invisible World Wide Web. The following selected knowledge discovery resources and sites offer excellent knowledge and information discovery sources to help you accomplish your personal, academic and business research goals! This report is constantly updated and available directly from the following:

http://KDResources.info/

Knowledge Discovery Resources 2013

An Internet Annotated Link Dataset Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

This Internet Annotated Link Dataset Compilation is dedicated to the latest and most competent resources for knowledge discovery available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key is to be able to find the important knowledge discovery resources and sites both in the visible and invisible World Wide Web. The following selected knowledge discovery resources and sites offer excellent knowledge and information discovery sources to help you accomplish your research goals! Also visit the very latest resources on Knowledge Discovery at the following Subject Tracer™ Information Blog.

http://www.KnowledgeDiscovery.info/

ACM SIGKDD: Current Explorations Issue
http://www.acm.org/sigs/sigkdd/explorations/issue.php?issue=current
Explorations is published twice yearly, in June/July and in December/January each year. The newsletter is distributed in hardcopy form to all members of the ACM SIGKDD. It is also sent to ACM's network of libraries. Online versions are available on the web free to the general public. Their goal is to make the SIGKDD Newsletter an informative, rapid means of publication and dynamic forum for communication with the Knowledge Discovery and Data Mining community.

Advanced Knowledge Technologies
http://www.aktors.org/
The Advanced Knowledge Technologies (AKT) project aims to develop and extend a range of technologies providing integrated methods and services for the capture, modelling, publishing, reuse and management of knowledge. AKT is a multi-million pound , six year collaboration between internationally recognized research groups at the Universities of Aberdeen, Edinburgh, the Open University, Sheffield and South Hampton.

BAYESIA: Bayesian Networks and Data Mining Tool
http://www.bayesia.com/
The Bayesian Network approach merges and supersedes existing approaches coming from Artificial Intelligence and Data Mining, both symbolic and statistical ones. Bayesian Networks are rigorously justified, provide a distributed knowledge representation, and are as understandable as a rule base. They deal particularly well with uncertainty, and they can be manually generated by consultation of an expert, or inductively built by machine learning.

Bibliomining Information Center - Data Mining for Libraries
http://www.bibliomining.com/
The basic definition is "*data mining for libraries*." For years, bibliometrics has been used to track patterns in authorship, citation, etc. Today, there are many more tools available for discovering similar patterns in complex datasets from data mining and statistics. In addition, tools from management science such as Online Analytical Processing (OLAP) can be used to explore the data for patterns. Therefore, a more complex definition is: Bibliomining is the combination of data mining, bibliometrics, statistics, and reporting tools used to extract patterns of behavior-based artifacts from library systems

Creative Commons RDF-Enhanced Search
http://search.creativecommons.org/
This search engine will help you find photos, music, text, books, educational material, and more that is free to share or build upon. Copyright applies fully and automatically to any work. a photograph, a song, a web page, an article, pretty much any form of expression, the moment it is created. This means that if you want to copy and re-use a creative work you find online, you usually have to ask the author's permission. This "all rights reserved" protection is good thing for many authors and artists. But what about those who want you to use their work freely without permission -- but on certain conditions? This search engine helps you quickly find those authors and the work they have marked as free to use with only "some rights reserved." If you respect the rights they have reserved (which will be clearly marked, as you'll see) then you can use the work without having to contact them and ask. In some cases, you may even find work in the public domain -- that is, free for any use with "no rights reserved."

Conceptual Graphs
http://conceptualgraphs.org/
Conceptual graphs (CGs) are a system of logic based on the existential graphs of Charles Sanders Peirce and the semantic networks of artificial intelligence. They express meaning in a form that is logically precise, humanly readable, and computationally tractable. With their direct mapping to language, conceptual graphs serve as an intermediate language for translating computer-oriented formalisms to and from natural languages. With their graphic representation, they serve as a readable, but formal design and specification language. CGs have been implemented in a variety of projects for information retrieval, database design, expert systems, and natural language processing.

Data Mining Resources
http://www.DataMiningResources.info/
A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring data mining resources and sites on the Internet.

Data Mining : White Papers, Webcasts and Product Information
http://www.bitpipe.com/data/rlist?t=itmgmt_10_40_96
Research the latest Data Mining technologies, tools and techniques. Read white papers, case studies, webcasts and product information from multiple vendors .

Deep Web Research and Discovery Resources 2013
http://DeepWeb.us/
Web search guru **Marcus P. Zillman's** guide extensively documents resources that include articles, books, websites, presentations, search engines, and technology applications that facilitate the challenging task of accessing information, published in many formats, that encompass the hundreds of millions of pages comprising the "deep web."

Explore Open Archives
http://opcit.eprints.org/explorearchives.shtml
This site lists and comments on other lists of individual open archives. This list and its categorisation gives a broad overview of the structure, size and progress of full-text open access eprint archives. This list will be maintained and updated as far as is possible, and is intended to assist further quantitative research on the open access eprint phenomenon for those who want to measure the growth and quality of open access eprint archives.

GMDH - Group Method of Data Handling
http://come.to/GMDH
Group Method of Data Handling was applied in a great variety of areas for data mining and knowledge discovery, forecasting and systems modeling, optimization and pattern recognition. Inductive GMDH algorithms give possibility to find automatically interrelations in data, to select optimal structure of model or network and to increase the accuracy of existing algorithms. This original self-organizing approach is substantially different from deductive methods used commonly for modeling. It has inductive nature - it finds the best solution by sorting-out of possible variants.

Gurteen Knowledge Website
http://www.gurteen.com/
This site acts as a gateway Knowledge Management, Learning, Thinking, Creativity, Personal Mastery; Personal Knowledge Management and the effective use of Technology. The site has been created by and maintained by David Gurteen an UK-based knowledge consultant.

IBM Research - Knowledge Discovery & Data Mining (KDD)
http://www.research.ibm.com/compsci/kdd/
IBM Research has been at the forefront of the exciting new area of Knowledge Discovery & Data Mining (KDD) from the very beginning. Key advances in robust and scalable data mining, methods for fast pattern detection from very large databases, text and web mining, and innovative business intelligence applications have come from our research laboratories. Links to their current projects as well as KDD links are available from this site.

International Workshop on Peer-to-Peer Knowledge Management (P2PKM)
http://www.p2pkm.org/
The P2PKM workshop is intended to serve as an active forum for researchers and practitioners, where they will have the possibility to exchange and discuss novel ideas, research results and experiences, laying in the intersection of the P2P, Knowledge Management (KM), Semantic Web, databases, pervasive computing, agents, as well as other related fields.

ITtoolbox Knowledge Management – Knowledge Management Information and Tools
http://knowledgemanagement.ittoolbox.com/
A comprehensive site for Knowledge Management and Discovery Resources including browse by type of content: Blogs, FAQs, Groups, Jobs, News, Peer Publishing, PR, Research and White Papers. Also available browse by Knowledge Management Topic: Business Intelligence, Business Strategy/Planning, Communication/Collaboration, Data Warehousing, Document/Content Management, e-Learning, Enterprise Portals, General Knowledge management, KM Career, Knowledge Transfer, and Packaged KM Suites.

KBL(sm): A Registry of Library Knowledge Bases
http://www.public.iastate.edu/~CYBERSTACKS/KBL.htm
Library-created or library-related Knowledge Bases. A Knowledge Base / Knowledgebase may be defined as a database with a focus on empirical or practical knowledge. In recent years, Knowledge bases have become common components for many businesses and services.

k-collector – Enterprise Knowledge Aggregator
http://www.evectors.it/itideatools/story$data=ideatools&num=142&sec=5
k-collector is an enterprise knowledge aggregator that leverages the power of social software, weblogs and shared topics to present new ways of finding and combining the real knowledge in your organization.

KDD-2012 - The 18th Annual ACM SIGKDD International Conference on Knowledge Discovery and Data Mining
http://www.acm.org/sigs/sigkdd/kdd2012/
The annual ACM SIGKDD conference is the premier international forum for data mining

5

researchers and practitioners from academia, industry, and government to share their ideas, research results and experiences. KDD-2012 will feature keynote presentations, oral paper presentations, poster sessions, workshops, tutorials, panels, exhibits, demonstrations, and the KDD Cup competition. KDD-2012 will run from August 12-16 in Beijing, China and will feature hundreds of practitioners and academic data miners converging on the one location.

KDnuggets: Data Mining, Web Mining, and Knowledge Discovery Guide
http://www.kdnuggets.com/
KDnuggets.com (KD stands for Knowledge Discovery) is the leading source of information on Data Mining, Web Mining, Knowledge Discovery, and Decision Support Topics, including News, Software, Solutions, Companies, Jobs, Courses, Meetings, Publications, and more. KDnuggets News has been widely recognized as the leading newsletter on Data Mining and Knowledge Discovery.

KmBlogger
http://kmwiki.wikispaces.com/
A resource covering site, resources, communities and related information about the relationship between blogs and knowledge management and knowledge discovery.

Know-Center - Austria's Competence Center for Knowledge Management
http://www.know-center.at
The Know-Center is Austria's Competence Center for knowledge-based Applications and Systems. The Know-Center has its core competences in the fields of information technology as enabling technologies for knowledge management and in human-oriented knowledge management.

Knowledge Discovery
http://www.KnowledgeDiscovery.info/
A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring knowledge discovery resources and sites on the Internet.

Knowledge Harvesting
http://www.KnowledgeHarvesting.org/
Knowledge Harvesting is used to rapidly convert top-performer expertise into knowledge assets that enhance corporate valuation and protect the organization from knowledge degradation. The purpose of this site is to offer an extensive introduction to Knowledge Harvesting.

Knowledge Management Research Center - CIO
http://www.cio.com/topic/1467/Knowledge_Management
Making the most of intellectual capital. Topics in the Knowledge Management Research Center include: 1) Overview, 2) Strategy, 3) Process, 4) Measurement, 5) Technology, 6)

Portal and Collaboration, 7) In the Know, 8) Case Studies, 9) Metrics, 10) CIO Radio, 11) Q&A, 12) Books, 13) Events, and 14) Newsletters. A comprehensive research center presented and updated by CIO.

Linguistic Tools for Knowledge Discovery
http://www.montague.com/abstracts/discovery.htm
The gaps between subject and functional boundaries are one of the best sources of breakthrough innovation. Yet for a variety of reasons — managerial, technical, and editorial — it's often difficult to exploit them. In this article they use an example from their own research and experience to show how linguistic tools such as thesauri, glossaries, and navigation schemes can promote knowledge discovery by exposing potential linkages between seemingly unrelated subjects.

my Knowledge Explorer (mKE) and the mKR Language
http://mKRmKE.org/
my Knowledge Explorer (MKE) is an interactive tool for organizing knowledge. It helps the user to record, change and search knowledge, and provides extensive error checking to ensure the internal consistency of the knowledge. Interaction with mKE uses the mKR language. mKR is a very-high-level knowledge representation language with simple English-like statements, questions and commands, plus UNIX-shell-like variables, methods and control structures.

Megaputer Intelligence
http://www.megaputer.com/
Megaputer Intelligence Inc., a Delaware corporation established in May of 1997, is a leading developer and distributor of advanced software tools for data mining, text mining, and intelligent e-commerce personalization. Their tools help reveal knowledge hidden in data. They add intelligence and insight to every step of the business decision-making process. The mission of Megaputer is to provide customers around the world with top quality software tools for transforming raw data into knowledge and facilitating better business decisions.

Open Directory – Knowledge Discovery
http://dmoz.org/Reference/Knowledge_Management/Knowledge_Discovery/ A listing pf knowledge discovery resources broken into the following categories: 1) Books, 2) Business and Cmpanies, 3) Magazine and eZines, 4) Organizations, 5) Software, 6) Data Mining, 7) Information Visualization, 8) OLAP, and 9) Text Mining.

PEPITe S.A.
http://www.pepite.be/
PEPITe is a company specialized in intelligent data exploration and knowledge extraction techniques. PEPITe sells Knowledge Discovery in Databases (KDD) solutions. These solutions combine software modules and services. PEPITe offers a complete range of services and products dedicated to industrial Data Mining (DM) applications.

7

STATISTICA - Data Mining, Data Analysis, Quality Control, and Web Analytics Software
http://www.statsoft.com/
StatSoft's flagship product line is the *STATISTICA* suite of analytics software products. *STATISTICA* provides the most comprehensive array of data analysis, data management, data visualization and data mining procedures. Its techniques include the widest selection of predictive modeling, clustering, classification and exploratory techniques in one software platform. Ideal for the knowledge discovery starter kit ….

The Data Mine
http://www.the-data-mine.com/
The Data Mine was launched in April 1994, to provide information about DataMining (AKA KnowledgeDiscoveryInDatabases or KDD). There are 6 seperate DataMining topic areas (known as "webs"), each with an index. You could also start with the IntroductionToDataMining. Popular pages include: OnLine Analytical Processing (OLAP) , Data Mining Journals, Data Mining Tutorials, Data Sources. Topic areas include: Data Mining Software, Data Mining Index, Data Mining General/Misc, People Working in Data Mining, and Data Mining Companies and Organizations.

The Protégé Project
http://protege.stanford.edu/
Protégé is an ontology editor and a knowledge-base editor. Protégé is also an open-source, Java tool that provides an extensible architecture for the creation of customized knowledge-based applications. Protégé's OWL Plug-in now provides support for editing Semantic Web ontologies.

Visual Analytics - VisuaLinks, Link Analysis, Data Mining Software
http://www.visualanalytics.com/
VisuaLinks® is a platform-independent, graphical analysis tool used to discover patterns, trends, associations and hidden networks in any number and type of data sources. VisuaLinks presents data graphically uncovering underlying relationships and patterns. VisuaLinks addresses the entire analytical process – from access and integration to presentation and reporting – providing a single and complete solution to a broad range of data analysis needs.

WikiPedia – Knowledge Discovery
http://en.wikipedia.org/wiki/Knowledge_discovery#Knowledge_discovery
Knowledge discovery describes the process of automatically searching large volumes of data for patterns that can be considered knowledge *about* the data. It is often described as *deriving* knowledge from the input data. Knowledge discovery developed out of the Data mining domain, and is closely related to it both in terms of methodology and terminology. The most well-known branch of data mining is knowledge discovery, also known as Knowledge Discovery in Databases (KDD). Just as many other forms of knowledge discovery it creates abstractions of the input data. The *knowledge* obtained

through the process may become additional *data* that can be used for further usage and discovery.

UCI Knowledge Discovery in Databases Archive
http://kdd.ics.uci.edu/
This is an online repository of *large data sets* which encompasses a wide variety of data types, analysis tasks, and application areas. The primary role of this repository is to enable researchers in knowledge discovery and data mining to scale existing and future data analysis algorithms to very large and complex data sets. The archive is intended to serve as a permanent repository of publicly-accessible data sets for research in KDD and data mining.

Awareness Watch™ Spotters

YourEconomy.org (YE)
http://youreconomy.org/
YourEconomy.org (YE) is designed to be a practical tool for researchers, business and community leaders, and economic-growth professionals. It provides timely, detailed - yet quick and easy-to-access - information about businesses, agencies and organizations (establishments), and jobs at the national, state, metropolitan (MSA), and county levels. The site also gives policymakers and journalists the benefit of being able to look at regional economies and their business and industry activities in a new way. YourEconomy.org (YE) is a free business census containing 22 million active establishments (over 44 million total) providing unique aggregate information about the performance of businesses through time from a local to a national perspective. YE lets you view businesses through their composition, growth, rankings, and summary graphs showing companies in your community. YE derives its information from the NETS Database, developed by Walls & Associates in conjunction with Dun and Bradstreet (D&B). This valuable database provides a unique 21-year historical snapshot of all D&B establishments. A time series resource, the NETS Database has over 300 fields that uniquely describe each establishment from 1990 to 2010, and can be customized to meet your specific research or project needs. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™. This will be added to Statistics Resources and Big Data Subject Tracer™. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Spundge - Smarter Curation, Awesome Content
http://www.spundge.com/
Spundge lets you collaboratively discover, curate, and create better content. Features include: a) Create a Spundge Notebook to stay on top of a topic, person, company or interest. Spundge Notebooks deliver a stream of relevant content from news sources, Twitter, Facebook, YouTube, Google+, LinkedIn, Instagram, Flickr and SoundCloud. Filter and then save the best of what you discover; b) Invite friends and colleagues to contribute to Notebooks and discover and save new items. They receive notifications

when new content is saved, and can add comments to Notebook items. Collaborative Curation enables you to track information, while instantly sharing with friends and colleagues; c) Transform your Notebook into a real-time stream you can embed anywhere on the web. Share what you're reading, or curate a real-time newswire about a breaking event or topic of interest. Embedded Notebooks can be placed on a personal website, topic page, as part of an article or blog post... anywhere; and d) Spundge PRO enables teams and individuals to collaboratively create content and instantly publish to a CMS, email newsletter and social accounts. Writing in Spundge lets you drag and drop images, tweets and videos into any story, effortlessly add attribution, and easily embed and track content. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

SIMIKE Widgets - Free, Open-Source Data Visualization Web Widgets and More
http://simile-widgets.org/
This is an open-source "spin-off" from the SIMILE project at MIT. Here we offer free, open-source web widgets, mostly for data visualizations. They are maintained and improved over time by a community of open-source developers. This has been added to Deep Web Research Subject Tracer™.

SCIRUS - For Scientific Information Only
http://www.scirus.com/
SCIRUS is the most comprehensive scientific research tool on the web. With over 545 million scientific items indexed at last count, it allows researchers to search for not only journal content but also scientists' homepages, courseware, pre-print server material, patents and institutional repository and website information. This has been added to Academic and Scholar Search Engines White Paper.

Resultly - Streaming Search Results
http://www.result.ly/
Traditional Searching For Products, Travel, News, and Information From Your Social Stream Requires That You Keep Searching and Scanning. Over and Over. The information You Care About Finds You In Real Time Via Your Profile, Email, or Mobile Device. Simply Add Your Interests to Resultly To Stop Chasing After The Content You Care About And Instead Let It Stream To You. They Call It Streaming Results. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

OEMSecrets - Free Electronic Component Search Engine and Sourcing Website
http://www.oemsecrets.com/
OEMsecrets is a free electronic component search engine and sourcing website for electronics buyers. OEMsecrets has created a safe market place for buyers and engineers to search, find and buy electronic components online from high quality distributors with in-stock inventory. OEMsecrets does not post any available stock on the website. OEMsecrets' part database contains over 15 million line items of in-stock electronic

components. There is no membership/subscription required to search for parts on OEMsecrets, their entire service is 100% free. OEMsecrets provides users with pricing and inventory information that offers value to electronics buyers/engineers. There is no log in or subscription required to search for parts on OEMsecrets, its 100% free. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Zanran - Search the Web For Data and Statistics
http://zanran.com/
Zanran helps you to find 'semi-structured' data on the web. This is the numerical data that people have presented as graphs and tables and charts. For example, the data could be a graph in a PDF report, or a table in an Excel spreadsheet, or a barchart shown as an image in an HTML page. This huge amount of information can be difficult to find using conventional search engines, which are focused primarily on finding text rather than graphs, tables and bar charts. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Statistics Resources and Big Data Subject Tracer™. This will be added to Academic and Scholar Search Engines and Sources White Paper.

AEON (Automatic Evaluation of ONtologies)
http://code.google.com/p/aeon-project/
AEON (Automatic Evaluation of ONtologies) automatically tags concepts with appropriate OntoClean meta-properties. The implementation can be easily expanded to check the concepts for other abstract meta-properties, thus providing for the first time tool support in order to enable intensional ontology evaluation for concepts. Our main idea is using the web as an embodiment of objective world knowledge, where we search for patterns indicating concepts meta-properties. We get an automatic tagging of the ontology, thus reducing costs tremendously. Moreover, AEON lowers the risk of having subjective taggings. OntoClean is a unique approach towards the formal evaluation of ontologies, as it analyses the intensional content of concepts. Although it is well documented in numerous publications, and its importance is widely acknowledged, it is still used rather infrequently due to the high costs for applying OntoClean, especially on tagging concepts with the correct meta-properties. They believe that evaluation of Ontologies is important. Therefore they are working on lowering the burden associated with it. AEON is a highly valuable first step. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Deep Web Research .

Ewing Marion Kauffman Foundation
http://www.kauffman.org/
The Kauffman Foundation is often referred to as one of the largest foundations in the United States—or as the world's largest foundation devoted to entrepreneurship. Both are true, thanks to Ewing Kauffman's generosity and foresight. However, these "largest" factoids may give the false impression that they can influence society just by virtue of our size or spending power. Review this excellent site with numerous resources for the Entrepreneur. This will be added to Entrepreneurial Resources Subject Tracer™.

RealtimeBoard - Effective Visual Collaboration in Realtime
http://realtimeboard.com/
Discuss web-site or product interfaces with your team. Add visual materials and screenshots, mark-up, leave comments in mini-chats. Create simple sketches or complex infographics using shapes, texts and mark-up tools. Visualize any data and share it with others. Upload pictures and drawings of interior and exterior, discuss your design projects with your colleagues and clients using comments and chat. Visualize your taskboard and use it with your team. Create tasks with post-its, move them, leave comments – increase your productivity. Plan and discuss your projects in RealtimeBoard – add your Google Docs and PDF-presentations, create mindmaps and collaborate in real time. Use business model template to structure your business activity. Add files, texts, pictures, comments and work together. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Open-i Project - An Open Access Biomedial Image Search Engine
http://openi.nlm.nih.gov/
The Open-i project aims to provide next generation information retrieval services for biomedical articles from the full text collections such as PubMed Central. It is unique in its ability to index both the text and images in the articles. The article retrieval is powered by Essie (the search engine that supports ClinicalTrials.gov). Open-i lets users retrieve not only the MEDLINE citation information, but also the outcome statements in the article and the most relevant figure from it. Further, it is possible to use the figure as a query component to find other relevant images or other visually similar images. Future stages aim to provide image region-of-interest (ROI) based querying. The initial number of images is projected to be around 600,000 and will scale to millions. The extensive image analysis and indexing and deep text analysis and indexing require distributed computing. At the request of the Board of Scientific Counselors, we intend to make the image computation services available as a NLM service. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Grid, Distributed and Cloud Computing Resources Subject Tracer™. This has been added to Biological Informatics Subject Tracer™. This will be added to Healthcare Resources Subject Tracer™.

Mobento - Video Learning Platform
http://www.mobento.com/
Mobento can help by organizing content better, being brutal in quality control, and being top of the class in innovation. Here's what they bring: 1) Comprehensive – Mobento video is an one-stop hub for learning videos; 2) Quality – This is a library and a library has librarians. That's them. They will be rigorous in only uploading high quality, fascinating videos from established academic institutions and learning organizations. For example when they launched on day one they only had 200 videos. Not many by You Tube standards but it delivers about 150 hours sourced from some of the finest speakers at Stanford, Yale, Khan Academy and TED. At Mobento, less is more, and 3) Mobento Search – Since they are bringing together such a wonderful collection of video content they owe it to their users and speakers to make it properly searchable. But searching video the way they wanted to simply didn't exist. So they figured out how to make it exist. They think you'll like it. Mobento Search instantly searches the entire video library for the words that were actually spoken. They are very proud of this. In fact it's hard to believe that this won't be the standard way of searching ALL videos within the next ten years. This will be added to Tutorial Resources Subject Tracer™

LLRX - Deep Web Research and Discovery Resources 2013
http://www.llrx.com/features/deepweb2013.htm
Marcus P. Zillman's research reveals the facets of The Deep Web, comprising in the vicinity of 1 trillion pages of information located in various files and formats that the current search engines cannot find, or have difficulty accessing. Some of the more comprehensive search engines have written algorithms to search the deeper portions of the world wide web by attempting to find files such as .pdf, .docx, .xls, ppt, .ps. and others. These files are predominately used by businesses to communicate within their organization or to disseminate topical information and work product to customers and potential clients. Searching for this information using deeper search techniques and the latest algorithms allows researchers access to a vast amount of actionable corporate information and intelligence. Research has also shown that even deeper information can be obtained from these files by searching and accessing the "properties" information on these files. This has been added to Deep Web Research and Discovery Resources 2013.

Updated> Genealogy Resources
http://www.GenealogyResources.info/
The white paper link compilation of the Genealogy Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. has just been updated and is now a freely available 21 page .pdf document (199KB) listing the latest and greatest online resources and sites for genealogy! **Updated December 29, 2012** . Other white papers are available by clicking here.

WordRake - Editing Software for Lawyers
http://www.wordrake.com/
Compose in Word, hit the "RAKE" button, and in seconds, WordRake suggests edits for a more powerful statement. WordRake saves time and money, and gives you the confidence your brief, letter, or memorandum is as clear and concise as you can make it. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

ThomasNet.com Comprehensive Product Search
http://ps.thomasnet.com/productsearch/
Find the exact product you need by the specifications you require. Experience cutting-edge semantic search technology powered by a robust classification system built for finding parts, components, and products that match your specified attributes. Key features include: 1) Intelligent Engine - Knows exactly how to search for products; 2) Detailed Product Information - Images, spec sheets, schematics, CAD drawings and more; 3) 2-Way Search - Use specifications or part name/number to generate results; 4) Vast Collection - 100 million+ parts from 30,000 manufacturers and distributors; 5) Guided Navigation - Helps you apply additional attributes as you go along; and 6) Robust Classification System - Built by engineers who understand OEM and MRO product specs. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

SWRC Ontology
http://ontoware.org/swrc/
The SWRC (Semantic Web for Research Communities) is an ontology for modeling entities of research communities such as persons, organisations, publications (bibliographic metadata) and their relationships. More details about the modeling of the SWRC ontology can be found in: York Sure, Stephan Bloehdorn, Peter Haase, Jens Hartmann, Daniel Oberle. The SWRC Ontology - Semantic Web for Research Communities. This will be added to Deep Web Research and Discovery Resources.

Updated> Business Intelligence Online Resources
http://www.BIOnlineResources.info/
I have just updated my annotated white paper titled **Business Intelligence Online Resources** and it is now a 92 page (550KB) freely available .pdf document available from the above URL. Each source is described along with the URL address than can be accessed. Also a comprehensive Business Intelligence link compilation is included! This is a **MUST** for all doing business research and business intelligence using the Internet as well as for newbies!

SendRail - Easily Send Files To Your Friends
http://www.sendrail.com/
SendRail is an app that integrates into your desktop and lets you seamlessly send files from your computer to any of your Facebook friends and email contacts with one click. Features include: a) Safe and Secure - All your files are encrypted with top of the line 256-bit AES encryption. We use Facebook to validate your identity and send the download link directly to the recipient's Facebook message inbox. No one but the recipient will ever be able to access your files; b) No File Size Limits - Tired of being limited to 25MB attachments over email? SendRail doesn't have any limits. Choose any file you wish to send, and we'll take care of the rest in the background; and c) Seamless Desktop Integration - SendRail runs in the background and is there whenever you need it. Need to send a file to someone? SendRail is just a hotkey (CMD+U) or a right click option away! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Updated> Online Research Browsers
http://zillman.blogspot.com/2009/08/online-research-browsers.html
I have just updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Research Browsers" a 17 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online research browsers available on the Internet. These research browsers allow you to visualize information to find new relationships and associations to create knowledge discovery and obtain new and highly relevant research data. It is freely available as a .pdf file (152KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 4, 2013**.

Updated> Finding Experts By Using the Internet
http://www.FindingExperts.info/
I have just updated my white paper link compilation on **Finding Experts By Using the Internet**. This is a 29 page .pdf file (273KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [**Updated January 4, 2013 29 pages 273KB .pdf**].

Updated> Online Social Networking
http://zillman.blogspot.com/2009/08/online-social-networking.html
I have just updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Social Networking" now a 48 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online social networks available on the Internet. It is freely

available as a .pdf file (351KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 5, 2013**.

Updated> Grant Resources
http://zillman.blogspot.com/2009/08/grant-resources-white-paper-link.html
The white paper link compilation of the Grant Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. has just been updated and is now a freely available 17 page .pdf document (187KB) listing the latest and greatest online resources and sites for grants! **Updated January 5, 2013**.

Updated> Healthcare Bots and Subject Directories
http://www.HealthcareBots.info/
I have just updated my Internet MiniGuide White Paper Link Compilation titled "Healthcare Bots and Subject Directories" which is now a 34 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about healthcare search engines and subject directories available on the Internet. It is freely available as a .pdf file (313KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 1, 2013**.

USDA: Plants Database
http://plants.usda.gov/java/
The United States Department of Agriculture's Natural Resources Conservation Service has created this remarkable database to provide standardized information about the vascular plants, mosses, liverworts, hornworts, and lichens of the United States and its territories. As there is a wealth of information here, first-time visitors may wish to start with the I Want to… area. Here they can make their way through shortcuts that include "See a list of the plants in my state" or "Search for and view images of plants." On the left-hand side of the page, visitors can look over topics that include Cover Crops, Documentation, and Culturally Significant. Moving on, the News area contains links to newly released resources, such as the annual National Wetland Plant List and the plant hardiness map. Of course, visitors should not miss the Image Gallery, which contains over 40,000 plant images available for general use. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2013. https://www.scout.wisc.edu/

Journals for Free - Directory of Open Access Journals
http://journals4free.com/
Journals for Free is a directory of open access journals and journals with some kind of open access to their materials. Journals for Free has now more that 8,000 open access journals and plans to be the most complete list of its kind with 10000 titles: in the first phase, they will include all open access journals indexed in the most recognized reference databases (PubMed, Scopus and ISI Master databases); in a later phase, other journals will be added. Journals for Free has a broad definition for what open access journals are:

a) journals that provide free documents immediately upon publication, with no delay; b) journals with free information after a delay (embargo period); and c) journals with free information for a certain period in the past. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Updated> Web Guide for the New Economy
http://www.WebGuideNewEconomy.com/
The **Web Guide for the New Economy** by Marcus P. Zillman, M.S., A.M.H.A. has just been updated and represents the latest world wide web resources for discovering new knowledge and understanding the latest happenings with regards to the New Economy. Understanding the required new economy analytics, resources and alerts will give you the necessary tools to maintain your current position, improve your position and discover the new knowledge required to be the leader in your profession in the New Economy! Download this freely available web guide today! [**Updated: January 8, 2013 38 pages 366KB**]

Updated> Finding People Resources and Sites
http://www.FindingPeople.info/
I have just updated my **Finding People Resources and Sites** white paper link compilation. It is now freely available 26 page .pdf document (225KB) at the above URL. These valuable resources will allow you to find long lost love ones, past school and college roommates and friends, and previous business and professional associates. A must internet reference in today's quickly changing world. (**Updated January 9, 2013**)

Updated> Bots, Blogs and News Aggregators
http://www.BotsBlogs.com/
I have just updated my research white paper link compilation titled "Bots, Blogs and News Aggregators" which is now a 20 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf (340KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 9, 2013**.

Cureus - The Medical Journal for a New Generation - Built for Doctors and Patients
http://www.cureus.com/
Based in Palo Alto, California, Curēus is the medical journal for a new generation of both doctors AND patients. Leveraging the power of an online, crowd-sourced community platform, Curēus promotes medical research by offering tools that better serve and highlight the people who create it, resulting in better research, faster publication and easier access for everyone. They make it easier and faster to publish physician's work - it's always free and they retain the copyright. What's more, the Curēus platform is designed to provide a place for physicians to build their digital CV anchored with their posters and papers. Today, generating an audience for your paper depends almost entirely

on a journal's circulation, limiting exposure to only a few thousand physicians in your field. Medicine is increasingly cross-disciplinary and physicians are reading thought-provoking papers from specialties outside their own - while patients have virtually no access to this important content. Curēus is cross-disciplinary and gives access to leading edge content to everyone. Join the Curēus Community and help them revolutionize how medical knowledge gets published and shared. This will be added to Healthcare Resources Subject Tracer™.

Updated> Using the Internet As a Dynamic Resource Tool for Knowledge Discovery
http://zillman.blogspot.com/2009/08/using-internet-as-dynamic-resource-tool.html
I have just updated my Research white paper titled "Using the Internet As a Dynamic Resource Tool for Knowledge Discovery" now a 21 page research paper listing many resources both new and existing that will help anyone who is attempting to perform information and knowledge research and discovery on the Internet. It is freely available as a .pdf file (620KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 10, 2013**.

Updated> Grid, Distributed and Cloud Computing Resources Primer
http://WhitePapers.VirtualPrivateLibrary.net/Cloud_Computing_Primer.pdf
I am very pleased to announce that I have just updated my **Grid, Distributed and Cloud Computing Resources Primer**. This primer is now 32 pages and a .pdf document (250KB) and freely available from the above URL. The primer gives an excellent overview of Cloud Computing along with a comprehensive listing of cloud, grid and distributed computing resources! It will be permanently archived in my White Papers site. [**Updated January 10, 2013**]

Data Portal - The Open Data Hub of the European Union
http://open-data.europa.eu/open-data/
This portal is about transparency, open government and innovation. The European Commission Data Portal provides access to open public data from the European Commission. It also provides access to data of other Union institutions, bodies, offices and agencies at their request. The published data can be downloaded by everyone interested to facilitate reuse, linking and the creation of innovative services. Moreover, this Data Portal promotes and builds literacy around Europe's data. The data publishers, application developers and the general public can also use new functionalities enabled by the semantic technologies. This has been added to the tools section of Research Resources Subject Tracer™. This will be added to Statistics Resources and Big Data Subject Tracer™.

CasesDatabase - Unlock the Value of Medical Case Reports - Search 19250 Cases from 170 Journals
http://www.casesdatabase.com/
Documenting a patient's case history to inform physicians how the patient has been evaluated and the subsequent progression of his or her disease is arguably the oldest method of communicating medical evidence. And in the 21st century case reports play an equally important role. Since the launch of Journal of Medical Case Reports in 2007 and the more recent introduction of case reports to the broad-scope journal BMC Research Notes, BioMed Central has acknowledged the value of case reports to the scientific record. To strengthen this commitment they have developed a valuable new resource – Cases Database, a continuously-updated, freely-accessible database of thousands of medical case reports from multiple publishers, including Springer, BMJ and PubMed Central. By aggregating case reports and facilitating comparison, Cases Database provides clinicians, researchers, regulators and patients a simple resource to explore content, and identify emerging trends. This will be added to Healthcare Resources Subject Tracer™.

Updated> Online Research Tools White Paper URL Dataset Link Compilation
http://www.OnlineResearchTools.info/
This is one if not the most comprehensive white paper URL Dataset Link Compilation available on the Internet and is titled *Online Research Tools* by Marcus P. Zillman, M.S., A.M.H.A. and has just been updated! It literally displays alphabetically listed URL Datasets of thousands of online research tools. These offer various downloadable as well as web applications to allow you to do your research and searching on the Internet far more effective and productive. It is now a freely available 259 page .pdf document (1.37MB) that can be downloaded from the above URL. Other white papers and resources on information retrieval, information extraction and deep web research by Marcus P. Zillman, M.S., A.M.H.A. are available by clicking here. The Online Research Tools White Paper Link Compilation was updated **January 11, 2013**.

FluNet - Global Tool for Influenza Virological Surveillance
http://www.who.int/influenza/gisrs_laboratory/flunet/en/
FluNet is a global tool for influenza virological surveillance. The virological data entered into FluNet, e.g. number of influenza viruses detected by subtype, are critical for tracking the movement of viruses globally and interpreting the epidemiological data. The data is publically available and it is **real-time**. The results are presented in various formats including tables, maps and graphs. The data are provided remotely by National Influenza Centres (NICs) of the Global Influenza Surveillance and Response System (GISRS) and other national influenza reference laboratories collaborating actively with GISRS, or are uploaded from WHO regional databases. This will be added to Healthcare Resources Subject Tracer™.

Symbolab - Scientific Equation Semantic Search Engine
http://symbolab.com/
Symbolab is a semantic web search engine for math and science. It allows users to search for equations, formulas and expressions using mathematical symbols and scientific notations as well as full text search. The stated goal of the site is to provide the most relevant search results that are theoretically and semantically similar, rather than visually. This is done, partly, by applying proprietary machine learning algorithms in order to understand the meaning and context of the search queries. Symbolab indexes the full text and equations of online encyclopedias, dictionaries, academic publications, lectures, books and more currently covering mathematics, physics and chemistry. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources White Paper.

Updated> eReference Library Link Toolkit
http://www.eReferenceLibrary.com/
The **eReference Library Link Toolkit** has just been updated and now is a 71 page freely available white paper link compilation for a selected group of reference resources that are available over the Internet for the creation of your own personal or corporate private eReference Library. This Toolkit has been created by Internet guru and expert Marcus P. Zillman who is the Executive Director of the Virtual Private Library. Updates to this toolkit are powered by Subject Tracer™ Information Bots. [**Updated January 12, 2013** .pdf 71 pages 455KB]

Updated> Green Files
http://www.GreenFiles.info/
The white paper link compilation of the Green Files Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. has just been updated and is now a freely available 25 page .pdf document (233KB) listing the latest and greatest online resources and sites for environmental and all things green! **Updated January 12, 2013**.

Knowledge Discovery Resources 2013
http://WhitePapers.VirtualPrivateLibrary.net/KD_Resources_2013.pdf
http://www.KnowledgeResources.info/
Internet Annotated Link Dataset Compilation white paper titled "**Knowledge Discovery Resources 2013**" is a 30 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about knowledge discovery available on the Internet. Each source is described along with the URL address than can be accessed. Also included is a comprehensive listing of Knowledge Discovery Resources. It is freely available as a .pdf file (217KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A..

SocialSav - Track Competitors, Monitor Performance, Keep Pace With Trends
http://www.socialsav.com/
Keeping up with social media trends isn't impossible...it's free. SocialSav is a simple, weekly digest that helps busy people like you keep up with the rapid changes of social media. Your email includes: 1) A custom summary of major social media news from the last week; 2) Concise articles to read for deeper coverage on those trends, and 3) Key performance stats for your business's and competitors' profiles. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to Social Informatics Subject Tracer™.

Updated> Searching the Internet - A Primer
http://www.SearchingTheInternet.info/
The annotated white paper titled "Searching the Internet - A Primer" by Marcus P. Zillman, M.S., A.M.H.A. has been updated and is a primer for those new to searching the Internet or those using only one search source. It is freely available as a 17 page .pdf document (310KB) from the above link from the Virtual Private Library™. Other white papers are available by clicking here. [**Updated: January 14, 2013**]

Updated> Data Mining Resources
http://www.DataMiningResources.info/
I am pleased to announce that I have just updated my Data Mining Resources Subject Tracer™ and it is now a 29 page (257KB) .pdf white paper document is available from the above URL. It lists alphabetically the latest resources available from the Internet for Data Mining. Additional white papers and resources by Marcus P. Zillman are available by clicking here.

Resume Companion - Build a Resume in Minutes with their Professional Resume Builder
http://resumecompanion.com/

These include articles, papers and the latest datasets including resources and sources. Download this excellent freely available 19 page 193KB pdf column today and begin your learning journey about the very exciting digital world of information futures and prediction markets!!

Monitoring, Analysis, and Interpretation Tool Arsenal (MAITA) Project
http://groups.csail.mit.edu/medg/projects/maita/
Monitoring, analysis, and interpretation (MAI) tasks constitute central elements of many important applications. These tasks vary in scope from narrow process-control monitoring, which require attending only to a fixed set of observable conditions, to national security intelligence analysis, which must attend to a broad range of observations, information, and actionable conditions that cannot be enumerated beforehand. Although commercial knowledge-based system (KBS) technology has proven successful for the narrower process-control tasks, current technology does not support very well the broader, open-ended monitoring and interpretation processes. New information regularly leads analysts to attend to new classes of information and new potential threats, but current KBS technology depends on small groups of system developers hand-crafting carefully circumscribed knowledge bases, and does not permit distributed communities of users, even those highly knowledgable in the domain, to exploit separately-developed large-scale knowledge bases or to add new analysis knowledge and methods to these knowledge bases in many small increments. The Monitoring, Analysis, and Interpretation Tool Arsenal (MAITA) Project seeks to build on existing and under-development tools for rapid, distributed (web-mediated) construction of ontologies and knowledge bases to develop tools that, in the hands of system developers, will enable rapid construction of knowledge-based MAI systems, and in the hands of communities of users, will enable ready extension of such systems to cover new knowledge and methods. To date, the MAITA Project has explored construction of monitoring systems for intensive care units, battlefield movements, and computer security. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Updated> Student Research Resources White Paper Link Compilation
http://www.StudentResearch.info/
I have just updated my white paper link compilation for Student Research Subject Tracer™. It is a freely available 34 page .pdf document 266KB covering all areas for student research! [**Updated January 17, 2013**]

Updated> Business Intelligence Resources

It is freely available as a .pdf file (186KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **January 18, 2013**.

Storyboard That - The Easy Storyboard Creator
http://www.storyboardthat.com/
The mission of Clever Prototypes is to create amazing solutions to make knowledge workers' lives better. They have worked in the corporate environment and know there are many perks, yet there are many tasks that are very tedious. By focusing on making people's lives better via fun and creative solutions, they hope people will love our ideas as much as we love coming up with them. Communication is a critical part of most knowledge workers' jobs. By creating a fun tool to improve how people communicate, they strive to do the world a service and make it a better place. They truly believe that by making it easier for people to describe ideas, user flows, basic processes, and anything else they want, people will be more willing to spend the time to do it. By making the descriptions (Storyboards) so easy to consume, people will want to share them and iterate over ideas. As this increases innovation, it makes everyone happier and more productive. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Awarenesswatch™ Paper Review

The Cost and Quality of Online Open Textbooks: Perceptions of Community College Faculty and Students by *TJ Bliss, John Hilton III, David Wiley, Kim Thanos*
http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3972

Abstract:
Proponents of open educational resources (OER) claim that significant cost savings are possible when open textbooks displace traditional textbooks in the college classroom. We investigated student and faculty perceptions of OER used in a community college context. Over 125 students and 11 faculty from seven colleges responded to an online questionnaire about the cost and quality of the open textbooks used in their classrooms. Results showed that the majority of students and faculty had a positive experience using the open textbooks, appreciated the lower costs, and perceived the texts as being of high

quality. The potential implications for OER initiatives at the college level seem large. If primary instructional materials can in fact be made available to students at no or very low cost, without harming learning outcomes, there appears to be a significant opportunity for disruption and innovation in higher education.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
