

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V11N6

June 2013

Welcome to the V11N6 June 2013 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report goes back to the basics with **Searching the Internet – A Primer** and represents the latest world wide web resources for searching the Internet for new knowledge and understanding the latest happenings with regards to finding resources and new sites. The world is rapidly changing as transparency, big data and the ability to find and access data from new and now accessible databases becomes a reality! These resources will keep you on the leading edge as the Internet continues to grow at a rapid rate. Understanding the required search analytics, search resources and automatic search alerts will give you the necessary tools to maintain your current position, improve your position and or discover the new knowledge and sites required to be the leader in your profession. These resources are constantly updated by my Subject Tracer™ Information Bots and the latest resources for searching the Internet! Begin your journey today and make this primer your search resource for now and in the future.

Searching the Internet – A Primer

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director - Virtual Private Library
<http://www.searchingtheinternet.info/>

Searching the Internet is now as common place as driving the car and most people consider the use of just one search engine to obtain results that they are looking for. This paper is designed to open your eyes to the many excellent resources on the Internet to search for information and/or to discover new knowledge! This paper will explain to you a number of ways to search for information on the Internet and methods to continue your searches and knowledge discovery. This paper is also designed for the “newbie” to the Internet or for the person who only uses one source to search for information on the Internet.

There are basically four areas to search for information on the Internet: 1) Search Engines, 2) Indexes and Directories, 3) Intuitive Search and 4) Custom Search and Deep Web Search. This paper will give a brief explanation of each area followed by some examples that you may immediately implement! The goal here is to broaden your search horizons so you may make searching the Internet easier to perform. This paper is not designed for advanced or sophisticated searching techniques as these will be addressed in other of my papers, columns and articles.

Search Engines

Search engines on the Internet are powered by “bots” that actively go out and search for meta description and keywords in files that are placed on the Internet. When you visit the search engine and type in the keyword or phrase that you are looking for the results that are generated come from the latest searching by the search engine’s bots that are deposited in the search engine’s database. The currency of the results is purely based on when the search engine’s bots visited the site and brought back the meta information to the search engine’s database. There are literally thousands upon thousands of search engines on the Internet and I will list only a few of the larger and better known. I will also list a “list” of search engines all over the world so you can visit many of them to obtain a better understanding of search engines in general!

ASK Search Engine

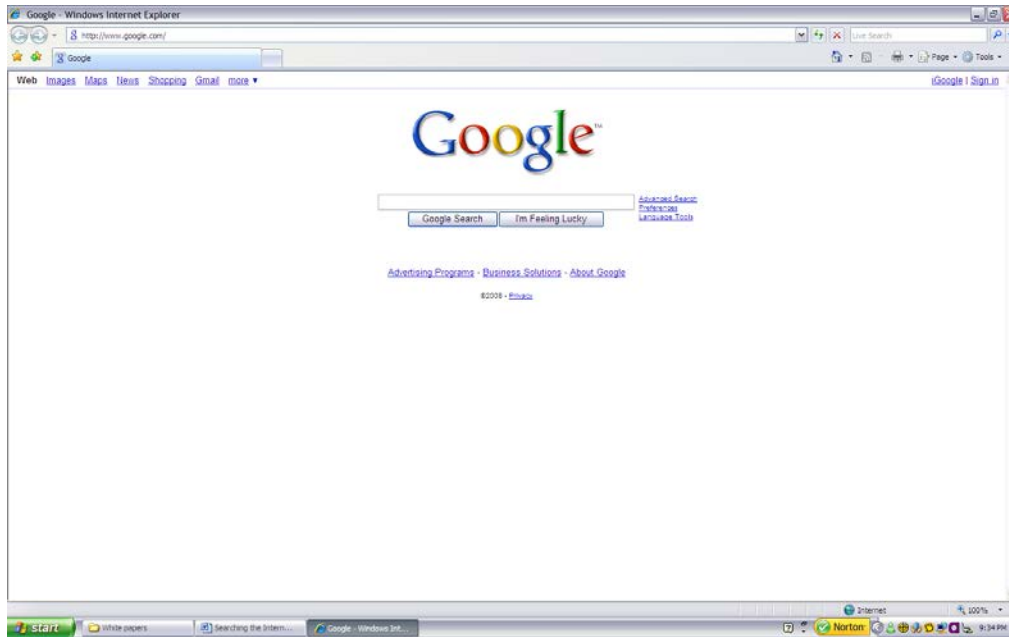

Figure 1: Google™ Search Engine

Indexes and Directories

Most individuals are accustomed to looking for information from directories and indices. This has started with the “telephone” book and then to other similar sources of directory information. The Internet also has a number of directory resources that allow you to search in a more convenient and simple format to find the information that you are looking for by going from menu to menu to menu until you find the subject and/or topic that you are looking for. Many of these are called subject trees, subject directories and are available freely over the Internet. There are literally tens of thousands of directories and subject trees on the Internet and as with Search Engines I will list some of the larger and more popular directories as well as a listing of a Directory of Directories on the Internet.

Intuitive Searching

Intuitive searching on the Internet is a fun way to look for information that could be available. By entering a name ... any name into the search engine it will return potentially relevant results. This is also an excellent way to check out an individual by

Awareness Watch V11N6 June 2013 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

eVoice: 800-858-1462

© 2013 Marcus P. Zillman, M.S., A.M.H.A.

typing in their complete name and observing the results brought back by the search engine. Sometimes this could be very interesting. As an example with Google™ you may search for results from the Web, results from Images, results from Groups, results from Directories and results from News. All these results are available from the labeled tabs at the top of each of Google's pages. Also you may take the intuitive name and add one of the basic seven domain name suffixes to it to obtain potentially relevant results:

IntuitiveName.biz

IntuitiveName.com

IntuitiveName.info

IntuitiveName.net

IntuitiveName.org

IntuitiveName.us

IntuitiveName.ws

Replace the IntuitiveName with the name that you are searching for i.e. Research or ResearchResources, etc. and add one of the suffixes above and then enter it in the URL line of your browser to see if that site exists today on the Internet. Also remember that if you have more than one word that all the words must run together to become a potential domain name (Research.com, ResearchResources.info, etc.). This could be a very interesting and valuable resource to finding information on the Internet and must be done periodically as new domain names are being created daily! If you do not find anything today it could very well be created tomorrow!!

Custom Search and Deep Web Research

Searching the Internet with your own SearchBot or developing a resource list of areas of deep web search will aid you in the discovery of new information as well as going where no search engines have traveled or fear to go! You do not need to be a Geek, Nerd or BotMaster to travel these search areas and I will list some of the highly viewed sites and resources. As the creator of BotSpot.com in 1996 I have used and visited literally hundreds of these resources on an ongoing and continuing basis or I have created these resources to aid the Internet community in discovering information and knowledge in the deep and invisible web. Here are a few of these resources:

Consumer Reports - 101 Secrets From our Experts: The Insider's Guide to Practically Everything

<https://www.consumerreports.org/cro/magazine/2013/05/101-secrets-from-our-experts/index.htm>

Consumer Reports - 101 Secrets From our Experts: The insider's guide to practically everything. "Consumer Reports magazine: May 2013 - The testers, reporters, and other experts who create our articles and product Ratings have a dazzling depth and breadth of knowledge about all kinds of products based on their decades of experience. For this roundup, we've asked them for their best tips—money savers, time savers, and just plain interesting tidbits. Enjoy." This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.[Thank you to Sabrina Pacifici of [beSpecific](#) for this find]

Artificial Intelligence App

http://www.appszoom.com/android_applications/education/artificial-intelligence_fkxu.html

This unique application is for all students of Artificial Intelligence across the world. It covers 142 topics of Artificial Intelligence in detail. These 142 topics are divided in 5 units. Each topic is around 600 words and is complete with diagrams, equations and other forms of graphical representations along with simple text explaining the concept in detail. The USP of this application is "ultra-portability". Students can access the content on-the-go from any where they like. Basically, each topic is like a detailed flash card and will make the lives of students simpler and easier. This has been added to [Artificial Intelligence Resources](#) Subject Tracer™ Information Blog.

Worldwide Information - Motor Vehicle Records and Driver's License Records

<http://www.worldwideinformation.com/>

Worldwide Information Inc. is the leader in providing advanced searching software technology using motor vehicle registration and driver's license data direct from state registries of motor vehicles to provide identity validation services that are unmatched in the industry. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

TransAct™ - Real Time Transaction Security

<http://www.transcertain.com/Services.html#TransAct>

TransAct™ is TransCertain's™ Patent Pending adapter based system which handles real time transactions. A transaction is considered a single piece of work associated with a single item of data or information and processed against a single service provider. This flexible system allows for transactions which require payment processing, identity verification, account posting, or any data transformation that may or may not require use

of other cloud based web services. Transactions handled by TransAct™ may be initiated (i) by ProcessOnTime™'s scheduling engine in batches or (ii) directly as single transactions. TransAct™ has the ability to interact and integrate concurrently with one or more different third-party transaction processor platforms or systems using TransCertain's™ Rapid-Adapter™ Methodology which translates data and securely transmits information using the client's legacy data formats and data types. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital [Linkseries](#) Publications.

Younity - Your Personal Cloud

<http://www.getyounity.com/>

All your files, on all your devices, all the time, without syncing. Spontaneously access any file, from any device, without planning ahead. Browse all your devices at once. Features include: a) A personal cloud is a private cloud - They don't store your data online. They can't see your data or access your files; b) Stream or download - Need files for offline access? Download to local storage and remove when you are done; and c) All your files on demand - Spontaneously access any file without syncing or planning ahead. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™.

The Learning Brain: Neuroscience

<http://www.bioedonline.org/lessons-and-more/resource-collections/the-learning-brain-neuroscience/>

The very well-maintained BioEd Online website from the Baylor College of Medicine was recently overhauled and now it's better than ever. This particular resource collection brings together videos, teacher guides, digital slides, video presentations, and related content. The topics covered include brain structure, neurons and the nervous system, human senses and movement, learning and memory, diseases of the nervous system, and the effects of drugs on the brain and body. The entire collection is part of the National Institute of Health's Blueprint for Neuroscience Education program and is funded by the National Institute on Drug Abuse and other partners. Visitors should not miss the Individual Lessons area, which has excellent segments on What is a Neuron?, Hormones and Stress, and seven other topics. This will be added to [Healthcare Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2013.

<https://www.scout.wisc.edu/>

The Digital Archaeological Record

<http://www.tdar.org/>

Billed as "A Service of Digital Antiquity," the Digital Archaeological Record (tDAR) is an international digital repository for the digital records of archaeological investigations. This remarkable archive is overseen by a board of directors with expertise in a range of professional fields, along with experts from the University of Arkansas, Arizona State University, and the University of York. A good place to start might be the sections that

<http://zillman.blogspot.com/2009/08/current-awareness-discovery-tools-on.html>

I have just updated my research white paper titled "Current Awareness Discovery Tools on the Internet" which is now a 27 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about current awareness discovery tools available on the Internet. It is freely available as a .pdf file (608KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 22, 2013**. Other white papers are available by clicking [here](#).

CertainSafe™ - MicroEncryption and MicroTokenization Solutions

<http://www.CertainSafe.com/>

CertainSafe™ is a web-based, offsite secure data-storage vault that gives the owners of data the ability to store and retrieve encrypted data of ANY type. This includes, but is not limited to: Personal Data and Documents, Medical and Legal Records, Secret Financial Documents, Sensitive Corporate Documents, Top Secret Files, etc. CertainSafe is dedicated to secure, encrypted, and compliant storage NOT “bulk data storage.

CertainSafe also has a proprietary permission system that allows stored documents and files to be securely VIEWED or downloaded by others. CertainSafe uses CertainStore, which is TransCertain's industry leading secure storage mechanism. CertainSafe provides selective permissioning which allows stored files/documents to be securely “VIEWED” or optionally downloaded by others. Certain Safe utilizes CertainStore, TransCertain's revolutionary and industry leading secure storage platform. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital [Linkseries](#) Publications.

Campaign Monitor - Send Beautiful eMail Newsletters

<http://www.campaignmonitor.com/>

Campaign Monitor makes it easy to attract new subscribers, send them beautiful email newsletters and see stunning reports on the results. Today more than 700,000 designers, agencies and amazing companies of all shapes and sizes rely on Campaign Monitor to manage their email marketing. On any given week, they are lucky enough to add more than 5,000 new customers to this list. While they continue to add more features and refine the experience, their goal hasn't changed since day one — to make it easy for anyone to send beautiful email newsletters to their audience. This will be added to the tools section

of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Basics of Data Journalism (Video)

<http://freegovinfo.info/node/3916>

Video from NPR Digital Services on the value of government information resources in journalism. Provides examples of data driven stories, discusses where to find data and how to effectively use data without making "rookie mistakes." Also contains information on using the Freedom of Information Act (FOIA) to get data not currently accessible. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This has been added to [Journalism Resources](#) Subject Tracer™.

Free Government Information (FGI)

<http://freegovinfo.info/>

Free Government Information (FGI) is a place for initiating dialogue and building consensus among the various players (libraries, government agencies, non-profit organizations, researchers, journalists, etc.) who have a stake in the preservation of and perpetual free access to government information. FGI promotes free government information through collaboration, education, advocacy and research. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to New [Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

ProcessOnTime™ - TransCertain's™ Patent Pending Enhanced Recurring Process Scheduling Mechanism

<http://transcertain.com/Services.html#Beyond>

ProcessOnTime™ is TransCertain's™ Patent Pending enhanced recurring process scheduling mechanism. It allows an organization to manage business rules which determine when, how often, and what kind of processing to schedule and generate. ProcessOnTime™ uses (i) the CertainStore™ system to securely manage sensitive information from the business rules and (ii) the TransAct™ system to manage the payments with a wide variety of payment processors. Sensitive information, such as an account number, image file or other document, is tokenized, encrypted and stored in CertainStore™'s Vault. The end user interacts with ProcessOnTime™ through straight-forward web calls and XML payloads. A token is used to identify and verify that the customer organization is registered and approved to conduct business. The interaction between elements of the TransCertain™ system (i.e., ProcessOnTime™, CertainStore™, and TransAct™) occurs transparently to the customer. CollectOnTime™ is an implementation of ProcessOnTime™ that allows merchants to create and maintain rules that generate recurring payments on a regular schedule. This system uses CertainStore™ to manage the cardholder data, so its exposure to sensitive information is all contained in that system. Future Event Data Manager™ is a system which permits advanced analytics and manipulates and analyzes data based on client generated rules and processes. When combined with TransCertain's™ Rapid-Adapter™ technology, clients can receive real-time information and data presented in readily consumable formats defined by rules determined by the client. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital [Linkseries](#) Publications.

Texas Digital Newspaper Program

<http://tdnp.unt.edu/>

The University of North Texas (UNT) Libraries was selected as the lead institution in Texas for the National Digital Newspaper Program (NDNP), *Chronicling America: Historic American Newspapers*. The National Digital Newspaper Program is a joint project by the National Endowment for the Humanities (NEH) and the Library of Congress (LOC) to develop an Internet-based, searchable database of U.S. newspapers from 1690 to the present. During the next 20 years, NDNP will create a digital resource of historically significant newspapers published between 1836 and 1922 in all 50 states and U.S. territories. For each two-year phase of the grant, UNT delivers 100,000 pages of digitized newspapers to LOC, and UNT also hosts these images on the Portal to Texas History, for free and open access. Beyond *Chronicling America*, the Texas Digital Newspaper Program seeks to form partnerships with a wide array of groups to digitize as many Texas newspaper titles as possible, through private foundation funding, friends of the library projects, and individual partner self-funding. Our goal is to create a digital newspaper repository that represents all Texas counties, and this is only achievable through statewide collaboration. Our newest initiative is to preserve and host digital newspaper PDFs. Digital newspaper PDFs, which are the PDF print masters sent to a newspaper printing office, are a significant next frontier for newspaper access and

preservation. For all newspapers included in the repository, whether they are scanned from microfilm or acquired through PDF print master, the Texas Digital Newspaper Program draws upon best practice standards established by the Library of Congress and the NEH for the National Digital Newspaper Program. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Reference Resources](#) Subject Tracer™ Information Blog.

VidShot Capturer

http://www.geovid.com/VidShot_Capturer/

VidShot Capturer created for quick screen capturing. You can use VidShot Capturer for capturing anything you see on your PC desktop and record them to video. You can capture windows, region, the entire desktop and even cursor moving. VidShot Capturer helps you for demonstrating features of your website, for making movie, presentation and any other task requires desktop activity capturing. It is very easy and fast for to use. You just select windows or region or desktop and pull “start” button. More over VidShot Capturer allows to adjust the frames of the video. It has an easy to use interface that’s why you can manage it, even if you'r new to making screen captures. Features include: a) Capture Video from desktop; b) Capture video from Window; c) Capture video from region of your desktop; d) Automatic Video options; e) Frame Rate advanced settings; and f) Easy and nice interface. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

uMark - Photo Watermark Software for Windows and Mac

<http://www.uconomix.com/Products/uMark/>

Photo watermark software for Windows and Mac. Features include: 1) Add text and image watermarks - Add your name or copyright notice along with symbols like © ® £ ¥ or your logo as watermarks on your photos. Stamp your authority over your images; 2) Batch watermarking - Watermark hundreds of photos in one go. Add watermarks to multiple photos in minutes with the click of a button; 3) Fully customizable watermarks - Choose the font, font size, style and color for your watermarks. Set custom transparency level, add shadows or rotate watermarks to your taste; 4) Place watermarks where you want - Select from one of the 9 predefined positions to place your watermark or put the watermark at your desired location on the image by specifying top, left coordinates or by drag and drop; 5) Live preview - View the real time preview of the watermark right on the photos you are watermarking so there are no surprises afterwards. Know precisely how the watermarked images will look beforehand; 6) Add EXIF and other metadata as watermarks - Put a date stamp on your photos with uMark's EXIF watermarks. Add camera information or other technical details as watermarks. Put the image name, location and parameters like size and DPI in watermarks; 7) Save watermarks for later use - Create your perfect watermark once and save it for repeated use. Watermark your next batch of photos within seconds without having to start from scratch; 8) Watermark tiling for maximum protection - Repeat your watermark horizontally or vertically or both to cover the entire photo so that no single part of the photo can be used without your consent; 9) Multi platform - Whether you are using Windows PC or a Mac. uMark is

available for you; and 10) Multi lingual - uMark supports 5 languages - English, German, Italian, Spanish and Dutch. Use uMark in your language. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

TransCertain - Secure Your Data

<http://transcertain.com/index.html>

TransCertain's™ modular break through cloud and database MicroEncryption™ solutions provide customers with a flexibility that sets a new standard crossing and creating new boundaries for data security, adaptability, and accessibility. TransCertain's™ platform architecture consists of three proprietary core elements, plus a new and innovative user interface each which utilizes TransCertain's™ revolutionary proprietary technology. Collectively, the elements interact seamlessly and transparently, streamlining protocols and providing an extremely high level of security while minimizing risk exposure, saving clients' time and money. TransCertain's™ services are adaptable, easy to utilize and do not require costly changes to users' business practices or legacy systems. The core module is CertainStore™, a HIPAA, PCI, PFI, PII, PHI, compliant solution which engages proprietary algorithms that MicroEncrypt™ sensitive data, and stores it in a vault. CertainStore™ then generates a unique token which is used as the primary identifier of the data outside the vault. Complementing CertainStore's™ security is its ability to secure any data type from simple text to x-ray files or all other types highly sensitive documents up to 2 gigabytes in size per file. Putting the tokens to task is TransAct™ a flexible SmartAdaptor™ based system that allows any data to TransAct™ with any other third party system, such as payment processing, identity verification, bank systems, account systems as well as any data transformation. The third element is ProcessOnTime™ a recurring process scheduling engine that allows an organization to manage business rules which determine when, how often, and what kind of data processing to schedule and execute. Most data integration requires months of time and up to millions of dollars. TransCertain's™ agnostic integration platform can MicroEncrypt™ a company's files and have them processing data in a matter of weeks with minimal cost. TransCertain's™ solutions are applicable on a global basis across dozens of industries and businesses both large and small. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital [Linkseries](#) Publications.

Green Business Guide

VitalRec - Comprehensive Resource for Locating Vital Records

<http://www.vitalrec.com/>

Resources for United States birth certificate, death records and marriage licenses. How to obtain vital records (such as birth certificates, death records, marriage licenses, divorce decrees, naturalization, adoption and land records) from each state, territory and county of the United States. See the guidelines for information on how to order vital records. If you are looking for vital records from a foreign county, see my links to international vital records web sites. In general, vital records weren't kept in the United States until the early 1900s. Vital records usually contain the full name of the individual involved in the event, the date of the event, and the county, state, or town where the event took place. Many vital records contain much more information. For example, birth records usually have the parent's full names, the name of the baby, the date of the birth, and county where the birth took place, marriage records often record the names and birthplaces of each individual's parents. Divorce records usually list the names of the couple's children. Death certificates often mention where the individual will be buried, and also give the name of the individual who reported the death. and death certificate. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Finding People](#) Resources Subject Tracer™. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Best Backups - They Review Backup Services

<http://www.bestbackups.com/>

They have now reviewed over 50 online backup providers, so they are THE authority on online backups. To read articles about specific topics, e.g. backing up your Mac or Android phone, click on the icons. The top 12 services are shown below that. Sections include: a) By Device/Operating System; b) By Features; c) By Area; and d) Other Pages. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Public Records Online Directory

<http://publicrecords.netronline.com/>

The Public Records Online Directory is a Portal to official state web sites, and those Tax Assessors' and Recorders' offices that have developed web sites for the retrieval of available public records over the internet. For example, some Recorders' offices have marriage and birth records available online. Although not every county and parish has data online, many have home pages, and where neither is available a phone number has been provided. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Knowledge Graph - Learn More About One of the Key Breakthroughs Behind the Future of Search

<http://www.google.com/insidesearch/features/search/knowledge.html>

Discover answers to questions that you never thought to ask and explore collections and lists. With a carousel at the top of the results page, you can get a more complete picture of what you're curious about. Explore collections from the Knowledge Graph and browse lists of items, like [popular movies of 2011] or [museums in NYC], that help you research a topic faster and more in depth than before. Language can be ambiguous—do you mean Rio the city, the movie, or the casino? With the Knowledge Graph, Google can understand the difference, helping you more precisely express what you mean as you enter your search. Go under the hood with members of the team who work on this

WriteLaTeX - Online Collaborative LaTeX Editor With Integrated Rapid Preview

<https://www.writelatex.com/>

WriteLaTeX is a free service that lets you create, edit & share your scientific ideas easily online using LaTeX, a comprehensive & powerful tool for scientific writing.

WriteLaTeX has grown rapidly since its launch in 2011, and today there are thousands of active users who've created over a hundred thousand projects. WriteLaTeX was founded by John Hammersley and John Lees-Miller, two mathematicians who worked together on the pioneering Ultra PRT Project and who were inspired by their own experiences in academia to create a better solution for collaborative scientific writing. Their aims include: a) Effortless Sharing – Every document you create has a secret link. Just send it to your co-authors, and they can review, comment and edit; b) Create Beautiful Documents Together– writeLaTeX synchronizes changes from all authors transparently, so everyone always has the latest version; c) Not Just Papers– Make amazing presentations with the beamer package! The preview helps with complicated tables, figures and graphs; d) Real-time Preview– writeLaTeX compiles your document in the background, so you can see the results right away – great for learning quickly; e) Find Errors Fast– writeLaTeX shows you errors & warnings as you go, so you can catch them early, and you don't have to find them in the LaTeX log; and f) LaTeX in the Cloud– Edit online from anywhere and on any device - works great on your iPad! There's no software to install, and no sign-up required. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

VarieDrop - Generate Multiple Size Images

<http://www.vieas.com/en/software/vdrop.html>

VarieDrop generate multiple-size-images in one operation. The process is started from the drag-and-drop or "Sent To" menu. (Multiple file input is supported.) It can be downloaded from their Software page. This will be added to [Script Resources](#) Subject Tracer™.

Openera - Identify, Classify and Auto File

<http://www.openera.com/>

Openera Identifies important documents, classifies eMail and cloud files, and auto files according to the rules you set. Features include: a) Auto-filing - Connect your email accounts and cloud storage services to automatically save, organize & backup files & email attachments based on a set of default rules or ones you create; b) Secure - All connections to/from Openera are completed using a secure 256-bit SSL certificate and we take your file security and privacy very seriously; and c) Made for business - Ensure corporate compliance and policies are followed and automatically file attachments in your team/department or entire company. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

thumb® - Instant Opinions Real People

<http://thumb.it/>

A few years ago Thumb was incubated with the goal of helping people get instant opinions while shopping. After launching the concept in 2010, we were surprised to find that people wanted to use the Thumb to get and give feedback in virtually every area of life (music, artwork, shopping, hairstyles, relationships, movies, food, etc.). When combining the breadth and speed of these shared opinions, tons of simultaneous conversations were sparked around things that mattered. And just as quickly, those conversations turned into meaningful connections between like-minded individuals. Today, Thumb is a place where you'll discover interesting things and people via an insanely engaging and instantaneous experience. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

National Science Foundation: Publications

<http://www.nsf.gov/publications/>

Every year, the National Science Foundation (NSF) researches a broad swath of topics ranging from graduate education in geography to the viability of sustainable agriculture. Visitors can scan through these documents here, on a website which includes recent publications like "Collections in Support of Biological Research" and "Baccalaureate Origins of U.S.-trained S&E Doctorate Recipients." The archive contains over 3,200 documents, which visitors search by publication type or specific organization within NSF. Visitors can also elect to sign up to receive notices about newly added publications via RSS feed or email. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

QSnippets - Cross Platform Code Snippet Manager

<http://www.qsnippets.com/>

Start organizing your favorite code snippets and be more productive. Why would you waste time rewriting the same piece of code every time you start working on a new project when you could have all your blocks of code organized in a central snippets library? Start taking advantage of all the powerful features offered by QSnippets. Build and organize your entire code snippets library now. Did I mention that QSnippets is cross-platform and works on Windows OS, Mac OS X and Linux OS? How about that you can place your snippets library on a shared folder so that you can access your library from anywhere at any time? This will be added to [Script Resources](#) Subject Tracer™ Information Blog.

Sharable - Share Files On Wi-Fi

<http://sharable.in/>

Sharable is better than internet based services as it does not use the internet and transfers file only across the wifi network. This means that it is truly free. As Sharable does not depend on any server it is faster than any server based sharing service available. Sharable also has an added advantage that you do not have to manage multiple accounts on various servers to share files with people on your network. Again, Sharable is better than any server based file hosting solution as it shares files using the local wifi network and not an internet server. This means that it does not cost you anything to share a file or folder when using Sharable. Moreover, you don't have to upload files and then download them at the other end. You are not limited by its range. Sharing through Sharable is easy and intuitive, you don't have to be a gadget geek. Moreover, it's free and fast. Just to compare, mail yourself a photograph from your phone to your PC. Try the same thing with Sharable and it will transfer the file from one hand held device to the other in a flash. One of the things we noticed was that you always have to connect your phone to your PC using wires to move music or images from your PC to your phone and then vice versa. Or use Bluetooth, which is both tardy and complex. Sharable solves this problem once and for all. Just add your entire music collection to Sharable and share it. Now you will be able to download whatever song you want from your collection at any time without connecting your phone to the PC. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Detexify2 - LaTeX Symbol Classifier

<http://detexify.kirelabs.org/classify.html>

Anyone who works with LaTeX knows how time-consuming it can be to find a symbol in symbols-a4.pdf that you just can't memorize. Detexify is an attempt to simplify this search. Just draw the symbol you are looking for into the square area look what happens! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

CertainSafe - Compliant File Sharing and Collaboration Vault

<https://certainsafe.com/>

CertainSafe™ allows Enterprise users to mitigate their risk management by storing their sensitive data within the CertainSafe™ platform. CertainSafe maintains a PCI LEVEL (1) CERTIFICATION. This means all users can store **HIPAA, PCI, PFI, PHI, PII**, as well as all other types of sensitive data requiring compliancy that may evolve over time, while being CERTAIN they are always SAFE!! This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital [Linkseries](#) Publications.

Archive-It - Web Archiving Service to Harvest and Preserve Digital Collections

<http://archive-it.org/>

First deployed in 2006, Archive-It is a subscription web archiving service from the Internet Archive that helps organizations to harvest, build, and preserve collections of digital content. Through their user friendly web application Archive-It partners can collect, catalog, and manage their collections of archived content with 24/7 access and full text search available for their use as well as their patrons. Content is hosted and stored at the Internet Archive data centers. They work with over 225 partner organizations in 45 U.S. states and 15 countries worldwide. Types of organizations they work with include: a) College and University Libraries; b) State Archives, Libraries, and Historical Societies; c) Federal Institutions and NGOs; d) Museums and Art Libraries; and e) Public Libraries, Cities and Counties. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Medium - Sharing Ideas and Experience Move Humanity Forward

<https://medium.com/>

Medium is based on the belief that the sharing of ideas and experiences is what moves humanity forward. The Internet is the greatest idea-sharing tool ever imagined, but we've only scratched the surface of its capabilities. More concretely, Medium is a system for reading and writing. A place where you can find and share knowledge, ideas, and stories—specifically, ones that need more than 140 characters and are not just for your friends. It's a place where you can work with others to create something better than you can on your own. Medium is being built for everyone, but because they are still testing and rolling out new features, creating content is limited to a small list (which we're expanding on a daily basis). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

ConvertHub - Batch Image Converter and Resizer

<http://www.converthub.com/>

Converting all common images formats - easy - fast - complete. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Presenter - Easy Web Content Creation

<http://www.ewcpresenter.com/>

Presenter is perfect for: a) Animations for Web or Mobile; b) Web Presentations; c) Interactive Infographics; d) Product Demos; e) Presumes (Interactive Resumes); f) Teasers and Landing Pages; g) Mock-ups; h) Banner Ads and Advertisements; i) Charts and Graphs; and j) Carousels and so much more... Based upon HTML5 so it generates web and mobile friendly content. Presenter helps you create rich interactive presentations & interactive web content. Let your ideas flow through your finger. Drag it, drop it, style it, and even animate it. That's Easy WebContent Presenter. An application that lets you design and publish professional content that is interactive without ever knowing a single line of code. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Clarity - Expert Conversations

<https://clarity.fm/>

Clarity is a marketplace for business advice. They make it easy for you to find, schedule and pay for expert advice over the phone to grow your business. They have high standards. Search through their extensive lineup of over 9,000 top professionals in just about any given field who are there to help make your problems a thing of the past. Clarity experts are available to help you with anything from design and copywriting to structuring deals or raising funding. You can search by expertise, industry or job title. Once you've selected an expert, pick the date and time that works best for you from the 3 options they present. The experts' per minute rate is highly visible, to help you determine how long you'd like to talk. Submit your request, and within 48 hours, you'll receive a confirmation. Experts are evaluated by how promptly they respond, so you should hear back soon after you submit your request. Ever try emailing someone for advice? You ask five questions and you get a reply which barely answers one. Then the email thread continues for another week only to lead to more confusion. There's nothing like getting on the phone and getting your questions answered right now. Sometimes it's solved before time runs out on the call, and you can bring up other things you might want to talk about. Getting to the bottom of whatever issue you're dealing with, over the phone, with a helpful professional is a huge relief and is a great experience for both sides of the conversation. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

LiveNinja - Speak With an Expert for Advice You Want to Learn

<http://www.LiveNinja.com/>

LiveNinja provides you with a convenient way to find and book video chat sessions with experts, gurus, intellects and specialists on anything you want to learn. LiveNinja is 100% free to join. The only time you would ever pay to use LiveNinja is when you'd like to hire a Ninja that charges a particular rate. No worries though, they have a bunch of Ninjas that give sessions free of charge! LiveNinja is a live video chat marketplace that provides people with direct and personalized access to service providers, or people with

expertise on a particular subject. LiveNinja is fluid, dynamic site that was built with the latest technologies available. Because of this, it might not place nicely with Internet Explorer. If you are still using IE, we highly recommend switching to Chrome or Firefox. These browsers will display sites the way they were intended to be shown. Safari works great as well. These three browsers are all awesome, fast, and free. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

MetroTextual - Windows Text Editor

<http://singularlabs.com/software/metrotextual/>

MetroTextual is a Windows text editor inspired by Microsoft's Metro Design Language. It's designed to be a visually appealing replacement for Notepad; with significant improvements to performance and aesthetics. Hotshot programmers will also enjoy MetroTextual's syntax highlighting; which is powered by Scintilla. Features include: a) MetroTextual is minimalist and lightning fast. It's not feature-packed; but does have some awesome hidden powers; b) You can see MetroTextual's full list of features on this dedicated page; c) Syntax highlighting with file extension detection; d) Lightning fast; thanks to unique multi-threading technology; d) Compatible with all character encodings supported by Windows; and e) Beautiful and simple Metro UI style user interface. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

e-Lis - ePrints in Library and Information Science

<http://eprints.rclis.org/>

Established in 2003, E-LIS is an international Open Archive for Library and Information Science (LIS). E-LIS has grown to include a team of volunteer editors and support for 22 languages. The development of an international LIS network has been stimulated by the extension of the OA concept to LIS works and facilitated by the dissemination of material within the LIS community. These are some of the reasons for the success of E-LIS. In a few years, E-LIS has been established as the largest international open repository in the field of library and information science. Searching or browsing E-LIS is a kind of multilingual, multicultural experience, an example of what could be accomplished through open access archives to bring the people of the world together. Because librarians are so involved in open access advocacy, E-LIS is a key to encourage open access for all repositories, by giving librarians the experience they need to speak with confidence when talking with researchers and open access archives, and the experience to provide the best possible assistance to self-archiving faculty. Authors are invited to collaborate in the growth of this important project, by submitting their works to the E-LIS server, to build up a collection of freely accessible and usable LIS documents, within an internationally compatible OAI system. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

Open Knowledge Repository - The World Bank

<https://openknowledge.worldbank.org/>

Is there anything better than free and unfettered access to knowledge? The World Bank has created this massive archive to bring together all of its "research outputs and knowledge products." The Open Knowledge Repository (OKR) was created to improve access to these materials, and the hope is that the archive will allow "anyone in the world to use Bank knowledge to develop solutions to development problems that will help improve the lives of those living in poverty." Currently, there are over 9,200 works online, including all of the World Development Reports from 1978 to the present, the Policy Research Working Papers series from 2005 to the present, and myriad other publications. Visitors can use the Browse area to look around sections that include Collections, Authors, Topics, Titles, and Author Profiles. One rather interesting feature here is the Map area, which tracks the countries that have downloaded the most papers from the OKR. This will be added to [Knowledge Discovery](#) Resources Subject Tracer™ Information Blog. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. [From The Scout Report, Copyright Internet Scout 1994-2013. <https://www.scout.wisc.edu/>]

OECD Working Papers Series

<http://www.oecd.org/about/publishing/oecdworkingpapersseries.htm>

The mantra of the Organisation for Economic Co-operation and Development (OECD) is "Better Policies for Better Lives." OECD's work spans the world and features a team of economists, sociologists, and others working on problems as diverse as higher education, access to clean water, and energy policy. The OECD Working Papers Series spans 19 crucial areas, including agriculture, development, environment, finance, and health care. Visitors should definitely check out the Tourism papers, as they include the compelling work "Green Innovation in Tourism Services." The Local Economic and Employment (LEED) papers are quite good as well, covering timely topics like urban governance and regional policy decision making. Visitors can sign up to receive updates about new papers as they are released to the site. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. [From The Scout Report, Copyright Internet Scout 1994-2013. <https://www.scout.wisc.edu/>]

Science: Video Portal

<http://video.sciencemag.org/>

The folks at Science magazine craft a wide palette of audio visual materials, many of which can be accessed through their video portal. In the Featured Videos, visitors can learn about some recent explorations into education reform, deep sea explorations, and the Higgs boson. Scrolling down the site, visitors will notice that the videos are divided into seven sections, including Engineering, Environment, and Medicine. It's easy to see how these videos could be effectively used in a number of classroom situations to complement existing lectures and presentations. New users might do well to start with the "Alya Red: A Computational Heart" video and the rather thoughtful "California Meteorite Rush." MicroTokenization™ – Data Security For Today and Well Into the Future

<http://transcertain.com/>

MicroTokenization™ is defined as deep, pinpoint, individualized processing of data combined with various proprietary AES algorithm designs (up to and including 1024-bit cipher keys) tokenizing the data up to 2 GB in size, without utilizing any of the original sensitive data to derive the token from, while preserving speed, security, and portability. MicroTokenization™ techniques are the newest method of information security and innovative methodology for data protection. It has evolved data protection technology to new levels never before accomplished. It works off an entirely different premise. Just the opposite of “Bulk Encryption”, the MicroTokenization™ approach protects sensitive data individually, even down to the “Byte” level if that is what is desired and or programmed. MicroTokenization™ maintains speed and accessibility while providing the highest level of security known to the public sector. This modular technology is completely scalable, adaptable, and accessible, and has been designed to meet future needs and evolve with the new best practice in the security world. The core elements of the technology follow along with long enforced and tried methods used by the US Armed Forces and technology powerhouses, but put together in a new innovative and proprietary way. By MicroTokenizing data, the data remains both usable while simultaneously exceeding industry security standards as well as regulation. The creators of this technology come from a respected technology company by the name of TransCertain, LLC. This is an incredible advancement in the way we will think about data protection going forward. Additional information by clicking [here](#).

SyndiFeed - Keep Up With All Your Favorite Sites

<http://syndifeed.com/>

SyndiFeed is a way to keep up with all of your favourite sites, blogs and news sites all in one place. Add almost any website to your account and pull in all the latest content. Found something the world should know about? Like it or share it with your friends on Twitter, Facebook and Google+. Haven't got time to read something right now? Click the bookmark icon to save it to your read later folder and come back to it at any time. Because it uses RSS technology, it works with almost any website that provides an RSS feed. You can no also import your subscriptions from Google Reader using our importer tool. Use the discover tab to find new websites and content that you can add to your account. We have a lot planned, some you may see sooner rather than later but we have a lot of work ahead of us to try and bring you a great reading experience. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

PodCastomatic - Blog to Podcast Conversion

<http://podcastomatic.com/>

podcastomatic.com converts your favourite blog into a podcast feed using text-to-speech technology. Each blog post is automatically converted into a podcast episode. Enter an address to a blog and off you go This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

WhoTalking - Real Time Social Media Topic Search Engine

<http://whotalking.com/>

WhoTalking.com is a simple Real Time Social Media Topic Search Engine, from which you can find who is talking as well as what topic and how it is being talked on some major social media sites. All the contents are public contents from APIs of social media sites such as Twitter, Facebook, Google+, Youtube, Flickr, Picasa, Digg and BordReader. They will be keeping their eyes on any new and useful APIs from more sites to provide richer search results for their users. This will be added to [Social Informatics](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

ChatterBots Resources and Sites

<http://whitepapers.virtualprivatelibrary.net/ChatterBot%20Resources.pdf>

The white paper link dataset compilation of the [ChatterBots Resources and Sites](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) has been just updated and is now a 16 page .pdf document 187KB listing the latest and greatest online resources and sites for ChatterBots! June 2013 Zillman Column - Tutorial Resources and Sites on the Internet

http://Columns.VirtualPrivateLibrary.net/Tutorial_Resources_June13_Column.pdf

<http://www.zillmancolumns.com/>

The June 2013 Zillman Column is now available and is titled **Tutorial Resources and Sites on the Internet** and features a very comprehensive listing of tutorial resources, sources and sites currently available from the Internet. These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest tutorial resources, sources and sites. There you can discover the way professionals find tutorial information and use the results in their active daily research. Download this excellent freely available 23 page 248KB pdf column today and begin your tutorial knowledge discovery!

ThinkFree Office

<http://www.thinkfree.com/thinkfree/thinkfreeMain.jsp>

ThinkFree Office is an office program that enables you to create documents, spreadsheets and presentations. Organized as three programs - Write, Calc, and Show - ThinkFree Office is highly compatible with the office program provided by other competitors. ThinkFree Office also offers a friendly user interface. However, the strength of ThinkFree Office transcends these two points. It is different from ordinary office programs that must be installed in a PC before use. Using ThinkFree Online (web office), you can enjoy the office program through a web browser without installing a separate office program in your PC. ThinkFree Mobile allows you to view and edit office documents using your smartphone. ThinkFree Server connects to your company's business system to provide a cloud environment in which you and your coworkers can work on the same document together. In short, ThinkFree Products provide a perfect 'cloud office' environment, the keyword of today's IT. This has been added to the tools section

AuthorGEN - eLearning Software, Services and Authoring Tools for Efficient Communications

<http://www.authorgen.com/>

Intuitive and usable e-learning software and web services making it easy for PowerPoint presentation authors, instructors, teachers and other knowledge workers to create and deliver rich multimedia content and knowledge via the Internet. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Student Research Resources](#) Subject Tracer™.

Ebook Glue - Turn Your Web Content Into a Reading Experience

<https://ebookglue.com/>

Ebook Glue is a simple API for creating and converting ePub and Mobipocket ebooks from HTML and CSS. It's the best way to make lengthy content easy to read on an iPad, Kindle, Nook, iPhone, or Android device. They want to make ebook conversions faster, simpler, and cheaper than doing it yourself. They have simple and honest pricing with no surprise fees or long-term contracts. Pay as you go, scale as you need. It doesn't matter what programming language, development environment, or deployment constraints you have. If you can send them files over HTTP, their simple ebook conversion API will quickly convert them for you. They provide an inexpensive and scalable ebook converter based on the Calibre open source ebook manager. They embrace open technologies so you can avoid unnecessary vendor lock-in. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

CertainSafe™ - Compliant File Sharing and Collaboration Vault

<https://certainsafe.com/>

CertainSafe™ is a web based and offsite ability to store and/or share important documents, files, and images without compromising security and privacy. They are PCI, HIPPA, PII, PFI and PHI compliant. They use their proprietary CertainStore which encrypts and tokenizes information giving you the ability to upload ANY document or file to the Cloud without software to install. Certainsafe™ offers the only MicroEncryption™ - MicroTokenization™ solution allowing web based accessible file sharing and collaboration all in real time. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Internet Privacy and Security Resources](#) Digital Linkseries Publications.

Zenodo - Share and Showcase Multidisciplinary Research Results

<https://zenodo.org/>

Zenodo builds and operate a simple and innovative service that enables researchers, scientists, EU projects and institutions to share and showcase multidisciplinary research results (data and publications) that are not part of the existing institutional or subject-

Linking Open Data - W3C SWEO Community Project

<http://www.w3.org/wiki/SweoIG/TaskForces/CommunityProjects/LinkingOpenData>

The Open Data Movement aims at making data freely available to everyone. There are already various interesting open data sets available on the Web. Examples include Wikipedia, Wikibooks, Geonames, MusicBrainz, WordNet, the DBLP bibliography and many more which are published under Creative Commons or Talis licenses. The goal of the W3C SWEO Linking Open Data community project is to extend the Web with a data commons by publishing various open data sets as RDF on the Web and by setting RDF links between data items from different data sources. RDF links enable you to navigate from a data item within one data source to related data items within other sources using a Semantic Web browser. RDF links can also be followed by the crawlers of Semantic Web search engines, which may provide sophisticated search and query capabilities over crawled data. As query results are structured data and not just links to HTML pages, they can be used within other applications. This will be added to [Statistics Resources and Big](#)

[Data Subject Tracer™](#). This has been added to the tools section of [Research Resources Subject Tracer™ Information Blog](#).

Szoter - Online Annotation Tool

<http://szoter.com/>

Features for this online annotation tool include: a) load your picture; b) take a screenshot; c) or capture an image; d) then annotate; e) add text; and f) save to disk. Available by launching the szoter online or obtaining desktop (AIR) version. This has been added to the tools section of [Research Resources Subject Tracer™ Information Blog](#).

Open Yale Courses

<http://oyc.yale.edu/>

The Open Yale Courses website provides entry to a wealth of materials from selected Yale College courses to anyone with a penchant for learning. The courses here span the full range of liberal arts disciplines, including humanities, social sciences, and physical and biological sciences. Interested parties can click on over to the Courses area. Currently there are over two dozen courses here, including "Hemingway, Fitzgerald, Faulkner" and "Freshman Organic Chemistry I." Within each course, visitors can find the syllabus, suggested reading, assignments, and in some cases, tests and quizzes. It's a remarkable resource for independent learners, and it's one that is worth bookmarking for return visits. This will be added to [Tutorial Resources Subject Tracer™](#). [From The Scout Report, Copyright Internet Scout 1994-2013. <https://www.scout.wisc.edu/>]

Tellgence - Predicts How Information Will Move

<http://www.tellgence.com/>

Tellgence empowers the enterprise to increase brand advocacy, gain greater response to campaigns and more-efficiently use social marketing resources. Identify the combination of relationships that will significantly increase the reach of your brand's message. This groundbreaking technology fills the current gaps in online social analytics by accounting for context and changes in human behavior. Predict Behavior and more This has been added to the tools section of [Research Resources Subject Tracer™ Information Blog](#). This will be added to [Prediction Markets Subject Tracer™](#). This will be added to [Social Informatics Subject Tracer™](#).

Coupons at Checkout

<http://couponfollow.com/checkout>

It finds the coupons, so you don't have to. Get the browser plug-in that shows you coupon codes automatically, for pretty much anything you buy. Features include: a) Shop - The plugin finds coupons from across the web for you; b) Apply - When you're about to buy, they'll show automatically at checkout; and c) Save - Never search for a coupon again, and always get the best deal! This will be added to [ShoppingBots and Online Shopping 2013](#).

Webzeitgeist - Design Mining the Web

<http://webzeitgeist.stanford.edu/>

Advances in data mining and knowledge discovery have transformed the way Web sites are designed. However, while visual presentation is an intrinsic part of the Web, traditional data mining techniques ignore render-time page structures and their attributes. This paper introduces design mining for the Web: using knowledge discovery techniques to understand design demographics, automate design curation, and support data-driven design tools. This idea is manifest in webzeitgeist, a platform for large-scale design mining comprising a repository of over 100,000 Web pages and 100 million design elements. This paper describes the principles driving design mining, the implementation of the Webzeitgeist architecture, and the new class of data-driven design applications it enables. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog.

TransCertain - Secures Your Data and Remove the Threat of Data Breach

<http://www.TransCertain.com/>

TransCertain™ offers a suite of core services that provide the highest levels of security, while allowing the storage as well as accessibility of images, documents, payment processing data, and or any other data type. Their experience in the large database industry, their ability to obtain and comply with PCI Level 1 Certification, coupled with their expertise as an ACH, C21, and Credit Card processor, give them a significant advantage creating solutions that make an immediate impact when implemented. Ensuring the security of clients "Sensitive Data" is their top priority! While speed and accessibility are critical it is the overall security that remains at the top of their list! The MicroTokenization™ process developed by their Team will change the way sensitive information is stored well into the future. Additional information by clicking [here](#).

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is a 62 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address that can be accessed. It is freely available as a .pdf file (405KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated: May 20, 2013]. Awarenesswatch™ Paper Review

The Pedagogical Foundations of Massive Open Online Courses by *David George Glance, Martin Forsey, Myles Riley*

<http://firstmonday.org/ojs/index.php/fm/article/view/4350>

Abstract:

In 2011, the respective roles of higher education institutions and students worldwide were brought into question by the rise of the massive open online course (MOOC). MOOCs are defined by signature characteristics that include: lectures formatted as short videos combined with formative quizzes; automated assessment and/or peer and self-assessment and an online forum for peer support and discussion. Although not specifically designed to optimise learning, claims have been made that MOOCs are based on sound pedagogical foundations that are at the very least comparable with courses offered by universities in face-to-face mode. To validate this, we examined the literature for empirical evidence substantiating such claims. Although empirical evidence directly related to MOOCs was difficult to find, the evidence suggests that there is no reason to believe that MOOCs are any less effective a learning experience than their face-to-face counterparts. Indeed, in some aspects, they may actually improve learning outcomes.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
