

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V12N2

February 2014

Welcome to the V12N2 February 2014 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Privacy Resources 2014**. In today’s New Economy we must constantly be diligent in observing the latest privacy resources as well as the appropriate changes to keep us current in all the various facets of our life including the latest resources and happenings. The below list of sources is taken from my Subject Tracer™ Information Blog titled Privacy Resources and is constantly updated with Subject Tracer™ Information Bots (STIB) at the following URL:

<http://www.PrivacyResources.info/>

These resources and sources will help you to discover the many existing and new pathways available to you through the Internet to find the latest privacy resources, sources and sites. In today’s New Economy it has become one of the most important areas that we must constantly monitor and be aware of all the happenings that will have an significant impact on our privacy!

LightZone - Open-Source Digital Darkroom Software for Windows/Mac/Linux

<http://www.lightzoneproject.org/>

If you've ever tried to modify a photo with any degree of complexity, it can be tough. LightZone makes this entire process quite simple and easy. While the program is designed for more expert users, the interface here is user-friendly and visitors will note that there are over 120 filters and customizable options to take advantage of via the program. This version is compatible with all operating systems, including Linux. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.[From The Scout Report, Copyright Internet Scout 1994-2013.

Knowledge Management Toolkit

<http://www.w3j.com/2/>

Knowledge Management (KM) can be a difficult undertaking, both in terms of understanding the concepts, and practical implementation. Fortunately, a kit has emerged to ease this process considerably. The Knowledge Management Toolkit helps you to use Knowledge Management to make sure that key decisions are taken from a fully informed position, as you build upon your existing intranet, data warehouse, and project management investment. It takes you through the needs of an enterprise KM system, from end to end, showing how each stage can serve as a foundation for later enhancements. The Knowledge Management Toolkit is designed to help you manage an extremely wide range of KM tasks: everything from identification of key intangibles, to calculation and maximization of ROI from the KM systems. This will be added to [Knowledge Discovery Resources](#) Subject Tracer™ Information Blog. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Science Exchange - The Scientific Services Marketplace

<https://www.scienceexchange.com/>

Science Exchange is a community marketplace for scientific service providers to offer their services and researchers to get their experiments conducted. Take a tour and see how you can benefit from using Science Exchange. Features include: 1) Search for a service - Find providers of over 1000 different experimental services listed on Science Exchange via the search bar or search page; 2) Compare qualified providers - Compare the service pricing, turn-around time, past client feedback and recommendations of expert service providers at core research and commercial facilities; 3) Request an estimate - Post a description of your proposed project to get responses from interested providers... it's easy and free. You can request an estimate from a single provider, or open your request to all relevant providers; 3) Choose a provider - Once you receive estimates from a provider, you can communicate with them directly via email or the Science Exchange platform. Once you find a suitable provider just click the "Accept This Estimate" button to start your project; 5) Manage your projects - Keep track of your project via the Science Exchange project page. You can easily monitor activity, send messages, and exchange large data files; 6) Pay for completed projects - Pay for your project via credit card, ACH, institutional purchase order or check. Science Exchange handles all financial transactions with service providers (so you don't have to). As a researcher you can post projects and receive estimates for free! SecretInk - Create a Message That Automatically Self-Destructs After Reading

<https://secretink.co/>

SecretInk is a platform for sending secure messages that self-destruct immediately after being read. You can send passwords, account information or just plain fun messages and rest assured that no 3rd parties will read them. SecretInk sends all messages over HTTPS so your message text never touches the network unencrypted. Since they use end-to-end encryption, your message will never be readable by your work, ISP or third party mail hosts. Once a message is opened it is permanently deleted from their database. They never retain a copy and your message will be gone forever. They really believe in the power of secret messages, so they have built SecretInk to send SMS and e-mails for free! You can send messages to any phone number in their supported countries for free and it will be just as secure as every other SecretInk message. No one but the recipient will ever be able to read it. SecretInk is a new product made by PowerInbox. PowerInbox sees the next generation of email as collaborative, real-time, and interactive. The PowerInbox team is committed to bringing the app experience to email. PowerInbox's interactive email plug-in allows users to perform real-time interactions inside emails from sites such as Facebook, Twitter, and LinkedIn. This will be added to [Privacy Resources](#) Subject Tracer™.

PDFstash - Never Lose Your Place Again

<https://www.pdfstash.com/>

PDFstash makes it easy to organize and manage your digital library. Features include: a) Your library in the cloud - You're on the move - and with PDFstash so are your documents. Never worry about not having the document you need on your current computer; b) Tracking, Bookmarks, and Folders - PDFstash automatically keeps track of your place as you read and will resume where you left off. Bookmark important pages and organize your documents into folders for quick access; and c) Easy Imports Drag and drop documents from your computer, email documents as attachments, import them from public websites or your twitter stream. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Media Cloud

<http://cyber.law.harvard.edu/research/mediacloud/#>

Media Cloud is a project that seeks to track news content comprehensively – providing open, free, and flexible tools for quantitative analysis of media trends. Print newspapers are declaring bankruptcy nationwide. High-profile blogs are proliferating. Media companies are exploring new production techniques and business models in a landscape that is increasingly dominated by the Internet. In the midst of this upheaval, it is difficult to know what is actually happening to the shape of our news. Beyond one-off anecdotes or painstaking manual content analysis, there are few ways to examine the emerging news ecosystem. The idea for Media Cloud emerged through a series of discussions between faculty and friends of the Berkman Center. The conversations would follow a predictable pattern: one person would ask a provocative question about what was happening in the media landscape, someone else would suggest interesting follow-on inquiries, and everyone would realize that a good answer would require heavy number crunching. Nobody had the time to develop a huge infrastructure and download all the news just to answer a single question. However, there were eventually enough of these questions that they decided to build a tool for everyone. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Journalism Resources](#) Subject Tracer™.

Interactive Visualization of Jobs, Businesses and Other Key Economic Statistics

http://www.census.gov/newsroom/releases/archives/economic_surveys/cb13-193.html

The U.S. Census Bureau recently released a new interactive tool designed to visualize the key economic findings found in the statistical agency's most recent Business Dynamics Statistics report released in July. The Business Dynamics Statistics Visualization Tool spans four decades of information about America's economy - providing key insights on job creation and loss during the most recent recession. Economic measures such as employment, number of establishments and number of firms can be analyzed for a single year or multiple years from 1977 to 2011. The tool has three major components: an interactive thematic map for the 50 states, interactive bar charts that give side-by-side comparisons of states and business sectors as well as time series data comparisons over a range of time. "We are providing a new and easy way for users to look at key economic trends about America's economy by visualizing statistics over time," said Thomas Louis, the associate director for research and methodology and chief scientist at the Census Bureau. "The latest Business Dynamics Statistics report shows older firms dominate the economy, new firms are entering the economy slowly, and there has been an overall decline in job creation in recent years." In partnership with the Ewing Marion Kauffman Foundation, the Census Bureau has produced annual data series for the Business Dynamics Statistics since 2008. For more information on the Business Dynamics Statistics program, go to <<http://www.census.gov/ces/dataproducts/bds/>>. Guidance on how to use the visualization tool can be found at http://www.census.gov/ces/dataproducts/bds/what_to_do_first.html>. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

Anki - Friendly Intelligent Flash Cards Making Remembering Easy

<http://ankisrs.net/>

Anki is a program which makes remembering things easy. Because it's a lot more efficient than traditional study methods, you can either greatly decrease your time spent studying, or greatly increase the amount you learn. Anyone who needs to remember things in their daily life can benefit from Anki. Since it is content-agnostic and supports images, audio, videos and scientific markup (via LaTeX), the possibilities are endless. For example: 1) Learning a language; 2) Studying for medical and law exams; 3) Memorizing people's names and faces; 4) Brushing up on geography; 5) Mastering long poems; and 6) Even practicing guitar chords! Features include: a) Synchronization - Use the free AnkiWeb synchronization service to keep your cards in sync across multiple devices; b) Flexibility - From card layout to review timing, Anki has a wealth of options for you to customize; c) Media-Rich - Embed audio clips, images, videos and scientific markup on your cards, with precise control over how it's shown; d) Optimized - Anki will handle decks of 100,000+ cards with no problems; e) Fully Extensible - There are a large number of add-ons available; and f) Open Source - Because the code and storage format is open, your important data is safe. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial](#)

Nuggety - New Vertical Search For Any Topic

<http://nuggety.com/>

Vertical search is a powerful way to focus your intent on topics (like health and shopping) or types of content (like images and videos). But even the most ambitious meta-search engine is limited to a few hundred different topics, built and organized by staff members. Nuggety removes these limitations and allows anyone to create a new search vertical for any topic. This is possible because Nuggety considers every website a potential search engine. This means you can simply list your favorite websites on any topic and Nuggety will generate a search list, enabling you to search each website directly (or as a secondary option, search the website using Google). With Nuggety it is simple to create a search vertical for something specific, like motorcycle parts. If you know of several websites for searching and buying motorcycle parts, you can build a search list that others can use as well. In this way, Nuggety is a social platform that determines the best search resources on every topic through user expertise. Because Nuggety is built around search engines and not web pages, there are many unique search lists that can be made. For example, if you ever wanted to see Google's results for different countries, here is a search list of every international Google. If you've ever had a web page go down, you can probably find a cached version by searching for the URL using one of these caching services. For a final example, this list lets you find different information about a single word, including definitions, synonyms, etymological roots, pronunciation and more. Because Nuggety is new, many topics are in need of expertise. Try Nuggety now, and help build the future of search. This will be added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Curiyo - App Delivers Everything You Need to Know from Top Publishers, Social Networks and Bloggers

<http://curiyo.com/>

Curiyo is a new browser app that brings you everything you need to know from top publishers, social networks and bloggers. Just long-click™ on any word and discover relevant content in a simple popup. Cut the clutter and enjoy instant access to content, facts and commentary from top sources: encyclopedic (e.g. Wikipedia) and dynamic (e.g. Twitter). Say goodbye to dozens of open browser tabs. Curiyo automatically identifies the most interesting topics on any page you're reading and subtly underlines them. It brings information to you, not you to it. Examples: Selena Gomez, ITLAPD, Theory of Relativity, Jennifer Lawrence, East Timor, waif, I Have A Dream, Charles Darwin, Elvis Presley, 2014 FIFA World Cup, Allen Iverson, Olinguito, The Scream, Cubism, Maldives, Ke\$ha. If you're a publisher or blogger, Curiyo can help you engage your readers and make them happier while keeping them on your site longer. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

VoteTrends - Cast Your Vote and Tell the World What You Think

<http://www.votetrends.com/>

Cast your vote & tell the world what you think. Votetrends is a free place to create polls, vote on others' polls, and track trends. Ask questions, voice your opinions, and view trends on what your friends, family, and community think about topics that matter to you. It's simple, easy, and fun! This has been added to the tools section of [Research Resources'](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

International Masterclasses

<http://www.physicsmasterclasses.org/>

Each year about 10,000 high school students in 37 countries come to one of about 160 nearby universities or research centres for one day in order to unravel the mysteries of particle physics. Lectures from active scientists give insight in topics and methods of basic research at the fundamentals of matter and forces, enabling the students to perform measurements on real data from particle physics experiments themselves. At the end of each day, like in an international research collaboration, the participants join in a video conference for discussion and combination of their results. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

MindCiper - Mental Challenges

<http://www.mindcipher.com/>

A social repository of the world's greatest brain teasers, logic puzzles and mental challenges. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Umano - Powerful Narration and Engaging Story Telling Done By Real People

<http://www.umanoapp.com/>

Umano takes insightful content found online and has professional voice actors tell the story. The amalgamation of high-quality journalism and convenient delivery is what makes Umano different from traditional radio, podcasts and other audio news applications. Project Ranks Billions of Drug Interactions

<http://www.bespacific.com/project-ranks-billions-of-drug-interactions/>

[Drugable.com](#) predicts mechanisms through computation: “For decades, drug development was mostly a game of trial and error, with brute-force candidate screens throwing up millions more duds than winners. Researchers are now using computers to get a head start. By analysing the chemical structure of a drug, they can see if it is likely to bind to, or ‘dock’ with, a biological target such as a protein. Such algorithms are particularly useful for finding potentially toxic side effects that may come from unintended dockings to structurally similar, but untargeted, proteins. Last week, researchers presented a computational effort that assesses billions of potential dockings on the basis of drug and protein information held in public databases. “It’s the largest computational docking ever done by mankind,” says Timothy Cardozo, a pharmacologist at New York University’s Langone Medical Center, who presented the project on 19 November at the US National Institutes of Health’s High Risk–High Reward Symposium in Bethesda, Maryland. The result, a website called [Drugable](#) that is backed

by the US National Library of Medicine (NLM), is still in testing, but it will eventually be available for free, allowing researchers to predict how and where a compound might work in the body, purely on the basis of chemical structure (see [‘Mining for drugs’](#))...Predicting how untested compounds will interact with proteins in the body, as Drugable attempts to do, is more challenging. In setting up the website, Cardozo’s group selected about 600,000 molecules from PubChem and the European Bioinformatics Institute’s ChEMBL, which together catalogue millions of publicly available compounds. The group evaluated how strongly these molecules would bind to 7,000 structural ‘pockets’ on human proteins also described in the databases. Computing giant Google awarded the researchers the equivalent of more than 100hours of processor time on its supercomputers for the mammoth effort.” This will be added to [Healthcare Resources](#) Subject Tracer™. LAMPlatoon - We Put Ads On Notice

<http://thelampnyc.org/lamplatoon/>

LAMPlatoon is putting ads on notice. If you’re tired of ads that deceive, objectify women and men, trade on ethnic stereotypes or simply don’t make sense, LAMPlatoon is your chance to fight back. Join the critical mass when you break down a commercial to expose the techniques and strategies used in media messages we see every day. LAMPlatoon is an initiative by The LAMP (Learning About Multimedia Project) encouraging people to think critically about media they see every day. By unpacking the messages sent through advertisements, you are learning to navigate a world of media which can be overwhelming and confusing. LAMPlatoon is also an opportunity for you to exercise fair use, talk back to mass media, and hold media producers accountable for the ways in which their messages impact our lives. One of their latest and excellent projects is [Media Breaker](#). This will be added to [Journalism Resources](#) Subject Tracer™.

bubbli™ - The App for Making Dynamic Spherical Photos Called Bubbles

<http://bubb.li/>

bubbli™ is the app for making dynamic spherical photos called bubbles. Features include: a) QUICK CAPTURE - Capturing a bubble is easy. You can reproduce the entire scene around you—including sound—by simply painting the space with your iPhone camera; b) AMAZING QUALITY - After capturing, it’s time for our bubble-builder in the cloud to do its magic. State-of-the-art computer vision turns your raw video into a seamless immersive bubble; c) SOCIAL SHARING - You can share your bubbles with the world directly from the bubbli app. Like and comment on bubbles your friends are sharing in our Facebook activity feed; d) VIEW ANYWHERE - You don’t need the bubbli app to view bubbles. Anyone can view your shared bubbles in a standard web browser on their desktop or mobile device—no extra software required; e) REC/PLAY SOUND - Bubbles capture not only what the world looks like—they capture what it sounds like too. Sound adds an extra dimension to your bubbles, making them even more immersive; and f) CREATE ALBUMS - Organize your bubbles the way you want. Create a travelogue or collect your favorites so they are always ready to show. Albums

Sputnik - Simple and Practical RSS Reader

<http://sputnik.szwacz.com/>

Sputnik is a RSS reader for your desktop or laptop computer. Just download it, and start using. No registration, no login, no yet another password to remember. Features include: a) Fun to use - Keyboard (and mouse) shortcuts allows for convenient and fast browsing through articles; b) Tagging - You can tag any article with any tag you like. Very convenient for organized people :); c) Works offline - All articles are stored on your computer, so you don't need internet connection to read them later; and d) Respects your privacy - The app keeps all data on your own computer, and only there. No servers somewhere in the internet involved. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Streak - Unlimited Email Tracking In Gmail

<http://www.streak.com/email-tracking-in-gmail>

Unlimited email tracking in Gmail. Features include: a) Real-time email tracking notifications. Get notified the very moment one of your recipients reads your email. If you're a sales pro, follow up on the phone with potential customers as soon as they start reading the email collateral you sent them; b) The right information in context - See exactly who has read which emails right alongside the thread it self. No more navigating to a separate app, just use email the way you normally do and see who read your emails; c) Dig deeper with Maps and Charts - Want to know even more about how your emails are being read? See the location of readers on a map, what device they are using and how many times they have viewed your email over time; d) Tracking available in your inbox - Streak email tracking shows the status of all your tracked emails right in your inbox. You'll see a green or gray "eye" icon right next to any email in any inbox list telling you whether the email is being read or not; e) Toggle tracking on or off easily - The simplest UI you can imagine, easily toggle tracking on or off. You can choose which emails get tracked and which don't; f) Plays nice with search - Know you sent a tracked email to an important client and want to find it? Refine your search with the "has:tracking" keyword to limit your search to just tracked emails; and g) You're always in full control - Easily toggle email tracking on or off depending on the situation. Want to set the default to always be on? Always off? Streak email tracking lets you configure it just right. This will

UFeed - Transforming Compulsive Eating Into Collective Help

<http://ufeed.org/>

From compulsive eating to collective help! You can become a philanthropist in just 4 clicks! How? Watch the video to learn more about UFeed! All their donations go to NGOs that you can find on their map. They have been working for years providing communities with access to safe water, agriculture support and long-term food security. Their help is sustainable and focused on building local capacity to manage and maintain the humanitarian aid programs. Help them to get to every child that goes to bed hungry... and share information about the NGOs that would be interested in joining their charity net. Helping has never been so easy. They don't spend money on marketing – share your donations in social networks and spread awareness about this great cause. Track your donations! Follow their reports on the donations on Pinterest, Facebook and Twitter. This will be added to [Social Informatics](#) Subject Tracer™.

PDF Burger - Create and Convert PDF Files Online Without the Need to Download Software

<http://pdfburger.com/>

PDF Burger is a reliable tool to convert .doc, .docx, .xls, .xlsx, .rtf, .gif, .jpg and other file formats to PDF. Remember that converted files stay available online for up to six hours, but they are available for download the instant the conversion process concludes. Since its launch, portable document format (PDF) has become the most preferred and popular format for document sharing on the Internet. PDF documents have highly advanced features. Vast information can integrate into non-editable files. This equips users with optimum security features that protect sensitive or private data from unauthorized access.

PDF file format can be used to create different document types, including press releases, memos, contracts, newsletters, agreements, bank statements, and other business documents. eBooks can also be created using PDF Burger. PDF eBooks are easy to create, cost effective, and easily accessible to readers. PDF files have the following benefits: a) Compatibility - The PDF file format is compatible with different operating systems that include UNIX, Mac, Linux, and Windows. PDF files created through PDF Burger do not require the download of special software; b) Security - PDF files are safe to share over the Internet. The PDF encryption feature offers optimum protection from anyone who may try to copy or use content in an unauthorized manner; c) File Compression - When you convert your Word, Excel, or PowerPoint files, the size of the file reduces significantly. The file then takes less time to upload or download; and d) Preserved Formatting - Most file formats are incapable of preserving data structure and format when transferred. PDF documents preserve structure, formatting, and properties when shared via the web, local-area network, and email. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Center for Microeconomic Data

<http://newyorkfed.org/microeconomics/>

The Center for Microeconomic Data serves to centralize the collection, acquisition, and analysis of microeconomic data at the New York Fed and act as a catalyst for microeconomic research by promoting engagement with the wide academic community. The wide-ranging data, research, and analysis produced in the Center provide insight into individual-level financial and nonfinancial economic conditions, expectations, and behavior in the U.S. This will be added to [Financial Sources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Earth Observing System Data and Information System (EOSDIS)

<https://earthdata.nasa.gov/>

The Earth Observing System Data and Information System (EOSDIS) is a key core capability in NASA's Earth Science Data Systems Program. It provides end-to-end capabilities for managing NASA's Earth science data from various sources – satellites, aircraft, field measurements, and various other programs. For the EOS satellite missions, EOSDIS provides capabilities for command and control, scheduling, data capture and initial (Level 0) processing. These capabilities, constituting the EOSDIS Mission Operations, are managed by the Earth Science Mission Operations (ESMO) Project. NASA network capabilities transport the data to the science operations facilities. The remaining capabilities of EOSDIS constitute the EOSDIS Science Operations, which are managed by the Earth Science Data and Information System (ESDIS) Project. These capabilities include: generation of higher level (Level 1-4) science data products for EOS missions; archiving and distribution of data products from EOS and other satellite missions, as well as aircraft and field measurement campaigns. The EOSDIS science operations are performed within a distributed system of many interconnected nodes (Science Investigator-led Processing Systems and distributed, discipline-specific, Earth

science data centers) with specific responsibilities for production, archiving, and distribution of Earth science data products. The distributed data centers serve a large and diverse user community (as indicated by EOSDIS performance metrics) by providing capabilities to search and access science data products and specialized services. Learn more about the EOSDIS Science System and details of the EOSDIS Science System's internal and external interfaces. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

Exactli - Visual Collaboration for Designers

<http://exact.li/>

exactli provides visual client communication & project review tools for designs. exactli helps you visualize the needs of your team and clients with exact clarity. It's both easy-to-use and easy-to-integrate. Here's how: Simply upload your completed design in any web-friendly format (pdf, jpg, or png). Then, invite collaborators (clients, team members) to review. They receive a secure link over email, click on that link and start reviewing and commenting on your design right away. As you recreate and refine your design, the review process can be repeated as many times as necessary to get you to the final, approved deliverable. For accountability and transparency, you will have documentation of this creative process from start to finish. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Recurify - Subscribe To Any Product

<http://recurify.co/>

Make Life Easy. Recurify Your Shopping! Recurify makes every order a recurring order. Any product, any webshop, always recurring. Features include: a) Shopping made easy - Never be out of your essential and most favorite products. Schedule your orders with Recurify and we make sure you get your orders in on time. You are in control: twice a year, monthly, weekly. No problem; b) No Surprises - Don't be surprised by an empty box. But also: no surprise deliveries or charges. We alert you 3 days before your order so you can make last minute changes or cancel / reschedule if you still have enough; c) Any Webshop - With Recurify you can turn any order, from any webshop you like to use into a recurring order. Don't change your habits, Recurify your orders; d) International - Really. Any webshop. Any product. We are working globally. So you can order from international webshops and use Recurify in any country; e) Any Product - Coffee, toilet paper, shampoo, the things you always forget but don't want to run out on. Any product can be turned into a subscription when using Recurify; and f) One Place: Recurify - One place for all your recurring orders. No surprises, you are in control. Cancel orders, reschedule orders and add orders anytime you want. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Explained, and Symposium for Space Life Science. Within Science Concepts Explained, there are a number of fun, short videos with engaging narrators explaining ideas like mass, density, and states of matter. The Your Brain is You series is another gem, with Dr. David Eagleman explaining the basics of brain function and how are brains define who we are. In many ways, this site offers a nice refresher on many key biological concepts; young and old will find much to engage their critical thinking skills. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2013. <https://www.scout.wisc.edu/>

FindMyShift - Simple Online Employee Scheduling

<http://www.findmyshift.com/>

Create and share employee schedules anywhere, any time in any web browser. It's free for the first month, there's no credit card required and nothing to install. Edit like a spreadsheet. Point, click and type. Easy and intuitive right click menus. Track shifts worked, hours and staff costs. Email your staff or send them a text message. Store, review, accept or reject time-off requests. Select multiple cells and edit them together as a group. View and edit your schedule by facility for a different perspective. Top-level views of staff availability with the time-off planner. Compare estimated staff costs against actual staff costs. Set different pay rates for different employees, days, times and facilities. Track how often staff work the same shifts. Send a message to staff working on a specific shift. Create shift patterns and store them as templates for later use. Record time off and keep track of staff allowances. Like to learn more? Play with our demo for more instruction on how the system works. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Updated> Artificial Intelligence Resources

<http://www.AIResources.info/>

The white paper link dataset compilation of the [Artificial Intelligence Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) is a freely available 19 page .pdf document (208KB) listing the latest and greatest online resources and sites for artificial intelligence! **Updated on January 9, 2014.** Other white papers are available by clicking [here](#).

talky - Truly Simple Video Chat and Screen Sharing for Groups

<https://talky.io/>

No plugins. No signup or payment required. Anonymous. Peer-to-peer. Talky is built entirely on open-source SimpleWebRTC toolkit. SimpleWebRTC is intended to be fully interoperable with any signaling platform (open source servers like SignalMaster, federated protocols like XMPP, and commercial products). Features include: a) Group video chat - Add multiple people to the conversation; b) Screen sharing - Easily add anyone's screen to the conversation; c) Locked rooms - Add a shared key to a room for added privacy; and d) Rockets & stuff - Play rocket lander while you wait for people to join. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Rattle - Data Mining Toolkit in R

<https://code.google.com/p/rattle/>

Rattle (the R Analytical Tool To Learn Easily) provides a simple and logical interface for data mining. It is a new data mining application based on the open source and free statistical language R using the Gnome graphical interface. The application runs under GNU/Linux and MS/Windows. The aim is to provide an intuitive interface that takes you through the basic steps of data mining, as well as illustrating the R code that is used to achieve this. Whilst the tool itself may be sufficient for all of a user's needs, it also provides a stepping stone to more sophisticated processing and modelling in R itself, for sophisticated and unconstrained data mining. This will be added to [Data Mining Resources](#) Subject Tracer™.

Authorea - Collaborative Platform for Research

<https://www.authorea.com/>

Authorea is the collaborative platform for research. Write and manage your technical documents in one place. A new way to read, write, publish, and interact with scientific content. Features include: a) Write - Got equations, data, tables, figures? Bring 'em on! Write LaTeX or Markdown and output HTML5; b) Collaborate - Many collaborators? We've got you covered. Lock text blocks while you work on them. And keep track of who's working on the others; c) Cite - Search by author, title, keyword, or DOI, and cite. We'll take care of the rest. (Yes, we'll build your bibliography.); d) Comment - Discuss your articles with your coauthors using private commenting and annotation and allow open review of your articles via public comments; e) Undo - Made a mistake a while back? Undo it and keep writing. We got Git version control to let you easily keep track of change history; and f) Publish - Submitting your Authorea article to a journal or conference? Export it to your journal template of choice in one click. Authorea is a spin-off initiative of Harvard University and the Harvard-Smithsonian Center for Astrophysics. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Saylor Foundation - Free Education

<http://www.saylor.org/>

Free and open courses on your schedule offered by The Saylor Foundation (under its legal name, The Constitution Foundation) and is a 501(c)(3) non-profit organization headquartered in Washington, D.C. The Foundation was established in 1999 by Michael J. Saylor, the Chairman and CEO of the business intelligence company MicroStrategy, Inc. and the Foundation's sole trustee. Mr. Saylor created the Foundation because he had a very simple, very earnest, and very bold idea: Education should be free. As changes in technology have made the distribution of information easier, high-quality educational materials have become increasingly digital and readily accessible to anyone with an Internet connection. Since 2008, the Foundation's free education initiative (www.saylor.org) has focused on exploring the promise of the Internet to drive the cost of education to zero and expand access to quality open educational resources (OER). Toward this end, they have built over 300 free, self-paced, online courses, with many more on the way. They hire credentialed educators to create course blueprints and to locate, vet, and organize OER materials into a structured and intuitive format. Their consulting professors also create original OER content and link to freely posted materials to fill in any gaps. Each course culminates with a final exam, and students receiving a passing grade can download a certificate of completion. Their current focus is on the undergraduate college level with the goal of producing high course and program completion rates. While they do not confer degrees, they do offer the knowledge equivalent of college majors in many popular disciplines, provide a number of professional development options, have a suite of math and ELA courses for grades 6-12, and are making strides in our student credit pathways. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Tutorial Resources](#) Subject Tracer™.

Zooniverse - Citizen Science Projects

<https://www.zooniverse.org/>

The Zooniverse is home to the internet's largest, most popular and most successful citizen science projects. Our current projects are here but plenty more are on the way. If you're new to the Zooniverse, we suggest picking a project and diving in - the same account will get you into all of our projects, and you can keep track of what you've contributed by watching 'My Zooniverse'. The Zooniverse and the suite of projects it contains is produced, maintained and developed by the Citizen Science Alliance. The member institutions of the CSA work with many academic and other partners around the world to produce projects that use the efforts and ability of volunteers to help scientists and researchers deal with the flood of data that confronts them. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Virtual Learning Resources Center

<http://www.virtuallrc.com/>

The mission of the Virtual Learning Resources Center is to index thousands of the best academic information websites, selected by teachers and library professionals worldwide, in order to provide to students and teachers current, valid information for school and university academic projects! The Virtual LRC is both a dedicated index of over 10,000 web pages maintained by a real human being, as well as a meta-search engine that includes in its results information gleaned from many of the best research portals and university and public library Internet subject guides recommended by teachers and librarians. The VLRC includes selected sites in a growing list of subject/information areas including: full-text magazines, newspapers, electronic text archives, art history, biography, biology, career information, psychology, history, government information, literature, medical information, social sciences, legal information, American Civil War, Art, Careers, Crime, Directories, Economics, Education, English Language, Electronic Texts, Foreign Languages, Geography, Genealogy, Government Information, Health/Medical, History, Legal Information, Lesson Plans, Literature, Mathematics, Music, Reference, Science, Technology, Tutorials on the Web, and Writing Style Guides. The Virtual LRC is actually a suite of three databases. In addition to the main index/browser/subject guide, there is also VLRC MagBot, full-text magazine reference and research site offering free hot-topic magazine and journal articles, and VLRC Alphamarks, the subject-classified bookmarks of the Virtual Learning Resources Center. Both VLRC MagBot and VLRC Alphamarks are indexed through the main VLRC index/meta search engine/web directory. These three in combination offer a powerful technology to help users find the most relevant information for their academic needs. The Virtual LRC, a completely free resource, is the creation of Dr. Michael Bell, former state chair of the Texas Association of School Librarians. The Virtual LRC is in a constant state of revision. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Academic and Scholar Search Engines and Sources](#) White Paper. This will be added to [Student Research Resources](#) Subject Tracer™.

BASE - Bielefeld Academic Search Engine

<http://www.base-search.net/>

BASE is one of the world's most voluminous search engines especially for academic open access web resources. BASE is operated by Bielefeld University Library. As the open access movement grows and prospers, more and more repository servers come into being which use the "Open Archives Initiative Protocol for Metadata Harvesting" (OAI-PMH) for providing their contents. BASE collects, normalises, and indexes these data. BASE provides more than 50 million documents from more than 2,700 sources. You can access the full texts of about 75% of the indexed documents. The Index is continuously enhanced by integrating further OAI sources as well as local sources. Our OAI-PMH Blog communicates information related to harvesting and aggregating activities performed for BASE. BASE is a registered OAI service provider and contributed to the European project "Digital Repository Infrastructure Vision for European Research"

(DRIVER). Database managers can integrate the BASE index into your own local infrastructure (e.g. meta search engines, library catalogues) via an interface. In comparison to commercial search engines, BASE is characterized by the following features: a) Intellectually selected resources; b) Only document servers that comply with the specific requirements of academic quality and relevance are included; c) A data resources inventory provides transparency in the searches; d) Discloses web resources of the "Deep Web", which are ignored by commercial search engines or get lost in the vast quantity of hits.; e) The display of search results includes precise bibliographic data; f) Several options for sorting the result list; g) "Refine your search result" options (by author, subject, DDC, year of publication, collection, language and document type); and h) Browsing by DDC (Dewey Decimal Classification) and document type. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Deep Web Research and Discovery Resources 2014](#). This will be added to [Academic and Scholar Search Engines and Sources](#) White Paper.

Updated> Script Resources Subject Tracer™ Information Blog White Paper Link Dataset Compilation

<http://www.ScriptResources.info/>

I have just updated my Subject Tracer™ Information Blog white paper link compilation titled Script Resources which is now a 25 page paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about scripts and codes that are available over the Internet. It is freely available as a .pdf file (229KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was Updated on **January 20, 2014**.

Gwittr - Quick Smart Twitter Search

<http://gwittr.com/>

Gwittr.com's mission is to offer you the smartest and quickest Twitter search on the desktop, tablet and mobile. Gwittr is a Twitter API based search website. It allows you to better search any Twitter account for older tweets, linked web pages and pictures. You simply enter your own or any other Twitter username in the search box and let Gwittr pull up your older tweets. Once they are uploaded you can browse, search and analyse them. You can filter search results by hashtags, @mention and time and sort your searches by relevance and date. Gwittr also allows you to view only web pages or pictures linked to tweets. The statistics tab gives you an access to data, such as your top tweeting hour of the day or the most active tweeting day of the week. At the moment, Gwittr is a single man's effort, mostly developed by @jeteve, a web applications developer based in London, UK. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Understanding the Role of Social Media In Online Health: A Global Perspective On Online Social Support by *Roderick Lamar Lee, Lynette M. Kvasny*

<http://firstmonday.org/ojs/index.php/fm/article/view/4048>

Abstract:

Around the globe, people are increasingly using social media for the provision of online social support. Online social support may be especially relevant for parents who have children that are afflicted with rare chronic diseases such as MECP2 Duplication Syndrome. Despite increasing evidence that online social support enhances a person's psychological well-being, there is little research that seeks to understand how and why various forms of social media facilitate social support. This study develops a theoretical framework from the existing psychosocial and media theories that describes the relationship between social media and social support. This paper concludes with implications for health information systems design.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
