Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

V12N5   **May 2014**

Welcome to the V12N5 May 2014 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report covers **World Wide Web Reference**. In todays cyber world we must constantly be diligent in observing the latest cyber and www resources as well as the appropriate changes to keep us current in all the various facets of our business, social, and personal life including the latest world wide web reference resources and happenings. The below list of sources is taken from my Subject Tracer™ Information Blog titled World Wide Web Reference and is constantly updated with Subject Tracer™ Information Bots (STIB) at the following URL:

http://www.WWWReference.info/

These resources and sources will help you to discover the many existing and new pathways available to you through the Internet to find the latest world wide web reference resources, sources and sites. Today's cyber and web world has become one of the most important areas that we must constantly monitor and be aware of all the happenings that will have a significant impact on our future business, social, and personal activities!

World Wide Web Reference on the Internet

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

World Wide Web Reference on the Internet is a comprehensive listing of reference resources and sites about the Internet designed for webmasters, IT professionals as well as interested World Wide Web users! The below list of sources is taken from my Subject Tracer™ Information Blog titled World Wide Web Reference and is constantly updated with Subject Tracer™ bots at the following URL:

http://www.WWWReference.info/

These resources and sources will help you to discover the many pathways available through the Internet to find the latest references about the world wide web. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently.

Awareness Watch™ Spotters

Start Up Resources for Entrepreneurs
http://www.StartUpResources.us/
Start Up Resources is a brand new publication from the Virtual Private Library and freely available from the above URL. Sections include: a) Idea Validation - How To Validate Your Startup Idea; b) Bootstrapping; c) Pitching; d) Launching, e) Landing Page Optimization; f) PR/Press/Marketing; g) Conversion Rate Optimization; and h) Subject Tracer™ Information Blogs. This is a 21 page pdf document (216KB) and in prepublication with actual publication listed for April 1, 2014. This will be added to Entrepreneurial Resources Subject Tracer™.

Hackhands - The Next Generation of On Demand Mentorship
http://www.hackhands.com/
Instantly connect with a qualified programming expert, pay per minute and keep hacking. HackHands is the fastest online service for 1:1 development education and problem solving. Features include: a) Instant - HackHands broadcasts and distributes requests to verified experts in real-time without scheduling; b) Hands on - A qualified expert will instantly connect to provide hands-on mentorship using video chat, screen share and scripting collaboration; and c) Affordable - Pay one dollar per minute plus tips. Pay nothing if session ends before 5 minutes. Only pay for the time you use. This will be added to Script Resources Subject Tracer™. This will be added to Tutorial Resources Subject Tracer™. This will be added to Internet Experts Subject Tracer™.

e-Science Central - Cloud Based Platform for Data Analysis
http://www.esciencecentral.co.uk/
e-Science Central is a Cloud based Platform for Data Analysis. It supports secure storage and versioning of data, audit and provenance logs and processing of data using workflows. Workflows are composed of blocks which can be written in Java, R, Octave or Javascript. e-Science Central is portable and can be run on Amazon AWS, Windows Azure or your own hardware. The e-Science Central platform along with basic analysis blocks are provided under an Open Source License and is available from SourceForge. e-Science Central is developed by a team based at Newcastle University, UK. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Statistics Resources and Big Data Subject Tracer™.

Directory of United Nations System Organizations
http://www.unsceb.org/directory
This page categorizes and links to UN system and related organizations. You may also view an alphabetic ordering. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™. This will be added to International Trade

Resources Subject Tracer&trade. This will be added to Directory Resources Subject Tracer™.

Project Open Data - Open Data Policy - Managing Information As An Asset
http://project-open-data.github.io/
Data is a valuable national resource and a strategic asset to the U.S. Government, its partners, and the public. Managing this data as an asset and making it available, discoverable, and usable – in a word, open – not only strengthens our democracy and promotes efficiency and effectiveness in government, but also has the potential to create economic opportunity and improve citizens' quality of life. For example, when the U.S. Government released weather and GPS data to the public, it fueled an industry that today is valued at tens of billions of dollars per year. Now, weather and mapping tools are ubiquitous and help everyday Americans navigate their lives. The ultimate value of data can often not be predicted. That's why the U.S. Government released a policy that instructs agencies to manage their data, and information more generally, as an asset from the start and, wherever possible, release it to the public in a way that makes it open, discoverable, and usable. The White House developed Project Open Data – this collection of code, tools, and case studies – to help agencies adopt the Open Data Policy and unlock the potential of government data. Project Open Data will evolve over time as a community resource to facilitate broader adoption of open data practices in government. Anyone – government employees, contractors, developers, the general public – can view and contribute. Learn more about Project Open Data Governance and dive right in and help to build a better world through the power of open data. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Statistics Resources and Big Data Subject Tracer™.

LLRX> Business Intelligence Online Resources: An Internet Annotated Link Dataset Compilation
http://www.llrx.com/features/busintellguide2014.htm
Marcus P. Zillman's new, comprehensive guide comprises the most current and accurate business intelligence source available via the web, free and fee based. Zillman includes resources and sites mined from both the visible and invisible web. His carefully selected business intelligence resources and sites are described along with their current URL address, providing researchers with mission critical tools and techniques relevant to immediate and ongoing projects.

Wellcome Images - One of the World's Richest and Unique Image Collections
http://wellcomeimages.org/
Wellcome Images is one of the world's richest and most unique collections, with themes ranging from medical and social history to contemporary healthcare and biomedical science. All their images are available on demand in digital form. Search online or use the expertise of their professional scientific and historical researchers. Whether it's medicine or magic, the sacred or the profane, science or satire - you'll find more than you expect. This unrivalled collection contains historical images from the Wellcome Library

47

collections, Tibetan Buddhist paintings, ancient Sanskrit manuscripts written on palm leaves, beautifully illuminated Persian books and much more. The Biomedical Collection holds over 40 000 high-quality images from the clinical and biomedical sciences. Selected from the UK's leading teaching hospitals and research institutions, it covers disease, surgery, general healthcare, sciences from genetics to neuroscience including the full range of imaging techniques. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog. This will be added to Healthcare Resources Subject Tracer™.

Chinese Economic Databases (CED)
http://ics.nccu.edu.tw/eced/
Welcome to the China Economic Databases (CED) project. This site aims to promote research and study for scholars, students, and all persons interested in China's economic development. To meet these goals, they have established a FREE platform with ten databases to collect the most up-to-date information and to connect scholars and experts alike. The ten databases are as follows: 1) Literature Database gives an overview of relevant journal articles; 2) Experts Database connects experts and scholars by providing contact information and expertise; 3) Books Database provides a platform of relevant books and book chapters; 4) Websites Database offers a list of governmental agencies, and research institutions, etc related to China's economy; 5) Government Reports Database provides up-to-date information from government bodies including many full-text articles; 6) Analysis Papers Database gives articles published from various universities and international institutions 7) Conferences Database is a forum to advertise upcoming conferences; 8) Call for Papers Database is related to the Conference Database in providing the most up-to-date info on upcoming and current calls for papers; 9) Renminbi Database is designed to provide the latest news on events related to RMB research; and 10) Additionally, they have constructed an OpenCourseWare (OCW) platform to gather syllabi and related course materials to further promote research and learning in the field of China's economy. The site is available in English as well as both simplified and traditional Chinese. Additionally, they have offer an E-newsletter that is free to subscribe to and they are continually updating the site to maintain its relevance and accuracy. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to International Trade Resources Subject Tracer™.

Academic Phrasebank
http://www.phrasebank.manchester.ac.uk/
The Academic Phrasebank is a general resource for academic writers. It aims to provide you with examples of some of the phraseological "nuts and bolts" of writing organised according to the main sections of a research paper or dissertation (see the top menu on the left). Other phrases are listed under the more general communicative functions of academic writing (see the bottom menu on the left). The resource was designed primarily for academic and scientific writers who are non-native speakers of English. However,

48

native speaker writers may still find much of the material helpful. In fact, recent data suggests that the majority of users are native speakers of English. The phrases, and the headings under which they are listed, can be used simply to assist you in thinking about the content and organisation of your own writing, or the phrases can be incorporated into your writing where this is appropriate. In most cases, a certain amount of creativity and adaptation will be necessary when a phrase is used. The Academic Phrasebank is not discipline specific. Nevertheless, it should be particularly useful for writers who need to report their empirical studies. The phrases are content neutral and generic in nature; in using them, therefore, you are not stealing other people's ideas and this does not constitute plagiarism. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Journalism Resources Subject Tracer™.

Hotel Rates Heatmap
http://labs.orbitz.com/calheatmap
This colorful calendar lets you know what to expect from seasonal hotel rates, so you can either start budgeting for the high season or plan your trip around the great rates of the low season. Hover over a cell to see the average daily rate for stays beginning on that date. This will be added to Entrepreneurial Resources Subject Tracer™ Information Blog.

A Genetic Atlas of Human Admixture History
http://admixturemap.paintmychromosomes.com/
Many researchers have studied human DNA and its history, and this has revealed how humans have spread around the globe. This spreading out produces distinct populations, and small genetic differences between separated populations arise (although most variation is still shared among groups). When groups come back together – for example due to migrations or invasions - and have children, this is called genetic admixture, and leaves a characteristic signature in DNA. THeir work uses DNA from many people around the world to identify these mixture events, and find out first, who the groups were that mixed – often to the level of individual countries – and second, when the mixture occurred. Other researchers have developed important tools to look at one or other these questions but their method is the first to do both simultaneously – allowing us to more fully describe events. By using "chromosome painting", it also offers better power and precision than previously available. They are able to consider complex histories (e.g. several waves of mixing) and have analysed 95 groups across the globe, producing an "atlas" of mixing dates, places and mixing populations. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Biological Informatics Subject Tracer™ Information Blog.

Secretly Meet - A Line for Your Private Encounters
https://www.secretlymeet.me/
Secret, secure and disposable timelines that everyone can use with customers, friends or partners, without leaving any track about the exchanged information. To make a comparison, think to a disposable sheet that you use for taking notes and you will soon throw away. "Secretly Meet" allows to create temporary web sites that exist up to when your browser is open and is connected to the internet. When you close your browser, all is gone. They use a peer-to-peer communication via browser (WebRTC). A peer-to-peer communication via browser means that you can privately and confidently directly share information. There is no more need to send sensitive data through a server or through a third part computer. Features include: a) Link - Paste an url to display the content; b)Webcam - Take webcam snapshots and add cool effects; c) Share images - Upload an image to show on the timeline; d) Embed content - Publish content by adding as HTML/Embed Code; and e) Send file - Share files, archives, documents quickly and easily. ONLINE INFORMATION SHARING MAY POTENTIALLY CAUSE SECURITY AND PRIVACY RISKS. PERHAPS YOU DO NOT KNOW THAT EVERYTHING YOU POST, SEND OR SIMPLY DIGIT WHEN CHATTING COULD BE FOR EVER STORED. Protect your privacy by using their web site, they do not collect what you write and share except of the web usage data. That is their simple privacy policy. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Privacy Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™ Information Blog.

Ashampoo Snap Free Screenshot
https://play.google.com/store/apps/details?id=com.ashampoo.snap.screenshot.free
Capture, edit and share screenshots on the go ... Ashampoo Snap for Android is a fully-fledged mobile application to capture, edit and share screenshots and images on your Android device. Capture screen contents, take photos with your built-in camera or simply load existing images and add stylable arrows, shapes, stamps and texts to get your point across. And when you're finished, share your images through any installed file services (EMail, Picasa, Google+, etc.). Imagine you are browsing Facebook and come across a hilarious post or chat message that could very well be the next epic chat fail. Just take a screenshot and remove sensitive information with Snap for Android and come back to it later. Don't just rely on your memory alone! Use Snap for Android to record and document unfavorable situations such as car crashes and add arrows and notes to detail the sequence of events that caused them. Record thoughts and ideas right in your photos Snap for Android gives you a set of creative tools to draw and write on your images. Enhance your vacation snaps and tell your friends exactly where your room was during your last stay or which places you particularly liked on that beach. Just mark the spots right in your photos with Snap for Android. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™.

ChargeBee - Plug and Play Billing Solution On the Cloud
https://www.chargebee.com/
Consider ChargeBee as your off-the-shelf plug-&-play billing solution delivered on the cloud. You can connect with ChargeBee via API if you are technically inclined or use our PCI compliant hosted payment pages to collect payments, to go-live in minutes. ChargeBee provides a robust & flexible billing system to enable your sales & marketing team to run special promotions, and the right tools for your support team to billing accurately & respond faster for billing queries. And it helps collect payments online from payment gateway of your choice. This will be added to eCommerce Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™.

ScissorsFly - Your Web Clipper and Scrapbook
https://www.scissorsfly.com/
In the spirit of freedom and creativity, they designed Scissorsfly. For the first time ever, you will be equipped with something that frees your imagination to creatively collect and organize everything you love on the web, and share them with friends. Scissorsfly originates from an open hackathon hosted at LinkedIn, when Sillicon Valley tech talents from places like Google, Twitter, LinkedIn, or CMU, MIT, Stanford, Berkerly came to play. They won the championship with the idea called ClipIt, which becomes the magic scissors at your hand today. Web 1.0 gave you static webpages. Web 2.0 gives you interactions and collaborations with the web and the world. Scissorsfly will give you not only that, but also the initiative to tailor the web at will. It will be an experience beyond the long lasting web 2.0... This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to Web Data Extractors white paper.

Typeform - Making Asking Questions East, Human and Beautiful
http://www.typeform.com/
They built Typeform because they wanted to democratize the way people answer questions on screens by making the process more human & more engaging. Early on, they realized that if you provide a space that champions user experience and good design, you would naturally draw the user into being more willing to answer and more likely to give honest answers.So they set out to re-invent the old way of gathering data by ditching everything they knew about online forms and surveys … including check boxes, radio buttons, labels and much of the rules that Jakob Nielsen (the overlord of user experience) would gasp at the thought of getting rid of. Thus, the "typeform" was born: a nimble, fast & surprisingly sexy way to ask questions to your users, customers & peers, on any device. They spared no effort in building a platform that would allow anyone to create typeforms intuitively & effortlessly. They wanted to make sure that the people who would be creating typeforms would enjoy making them as much as the users that would fill them in. They are now a team of 17 pushing Typeform forward and today they are going to start their own revolution: a new Web where answering questions doesn't have to be boring, a new Web where companies, brands and individuals can wear their identity & values on their sleeves whilst collecting data … at least that's the plan. Join them, Ask

51

Awesomely! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entreprenurial Resources Subject Tracer™.

Likeastore - Social Bookmarking for Geeks
https://likeastore.com/
The best way to save useful resources like GitHub repositories, code libraries, fonts, Dribbble shots or Stackoverflow questions. Organize your favorites and find the things you need with full-text search much faster while saving your time and money. Social bookmarking for geeks with storage to collect and organize all your favorites. This will be added to Social Informatics Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Topicgrazer - Graze On Web Pages and Documents
http://www.topicscape.com/Topicgrazer/help.php
Graze on web pages and documents . . . take just what you want . . . Topicgrazer quietly builds a document in the background with the text and images that you choose. And it keeps a record of which web sites you copied, for future reference. Topicgrazer is a Windows program and uses a familiar keystroke for each item to be saved, and you don't have to leave the web page or document you're reading. Imagine holding a virtual highlighter in your hand as you read web pages, documents, or PDF files. You highlight sections of text you want to save and indicate images to preserve, and with a familiar keystroke, send them to Topicgrazer. It works with web sites, text, Word documents, PDF files, spreadsheets and more - anything, in fact, that can be saved to the clipboard. Each snippet is headed with its source if it came from a web site or Word, for example. All the portions you select are extracted and gathered in one place until you decide to finish and save the document. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the Web Data Extractors White Paper.

ShareLaTex - Online LaTeX Editor
https://www.sharelatex.com/
Quickly Start Using LaTeX and Work Together In Real-time. Features include: a) A LaTeX Editor for smooth collaboration - Keep your LaTeX collaborators up to date by letting everyone access and edit the same LaTeX document. The days of making sure everyone has access to the latest version are over; the latest version is always available online. You can even work on the document at the same time as your collaborators with our real-time editor, and our built in chat will help you communicate while you're editing; b) A LaTeX Editor that is easy to use - ShareLaTeX is the easiest LaTeX editor to get started if you've never used LaTeX before. There's no installation needed and our example projects are ready to be compiled with one click. You or your collaborators no longer need to be experts in LaTeX to be able to edit your documents effectively. Our editor also highlights any errors in the LaTeX log to make debugging as simple as possible; c) Work on LaTeX from anywhere - You can access our LaTeX editor and

compile your LaTeX documents from any computer with an internet connection. You don't need to worry about getting LaTeX set up on each computer you use, and compatibility issues are gone. There are no lock-ins and you can download your projects to work offline any time you like. You can also upload existing documents to get your work onto ShareLaTeX quickly; and d) Easily sync with your offline files - Work offline using dropbox. Dropbox sync keeps all of your LaTeX projects synced to your dropbox folder. You can make changes inside your dropbox then see them sync back to ShareLaTeX. Collaborate with users who like to work offline with their own tools by sharing the Dropbox folder with them. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog.

Echobox - Actionable Analytics for News Publishers
http://www.echoboxapp.com/
Echobox analyzes your visitors and generates actionable recommendations in real-time. This will be added to Entrepreneurial Resources Subject Tracer™.

Coursolve - Connecting Course Projects and Needs
https://www.coursolve.org/
Coursolve connects courses and organizations to empower students to solve real-world problems. Students, organizations, and instructors can use their platform to explore needs and corresponding problem solving approaches, collaborate, and envision new solutions to complex challenges. Their platform targets three primary user groups: students, organizations, and course instructors. Students can sign up for course projects created by instructors, and through these projects, connect with needs posted by organizations to address real-world problems. This will be added to Student Research Resources Subject Tracer™. This will be added to Education and Academic Resources Subject Tracer™.

eBooks at GPO
http://fdlp.gov/377-projects-active/1886-ebooks-gpo
To help meet the needs of the Federal Depository Library (FDL) community, the U.S. Government Printing Office (GPO) has made eBooks available in the Catalog of U.S. Government Publications (CGP). These titles are joining the growing number of online resources that have been a vital part of the Federal Depository Library Program (FDLP) for over 20 years. Users can download GPO-provided files of eBooks free of charge, for use on various eBook reading devices. GPO's goal is to expand and provide greater access to U.S. Federal Government content. eBook titles can be accessed via catalog records available in the CGP. Catalog records include descriptive information, as well as Persistent Uniform Resource Locators (PURLs) that link to the eBook titles. PURLs provide web links that can be reliably cited in other publications. Each CGP record displays the available formats for a title—.mobi, .epub, as well as other digital formats. Every month, newly-acquired eBook titles are added to the CGP for public access. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Reference Resources Subject Tracer™.

iBillionaire Index (BILLION)
http://www.ibillionaire.me/
The iBillionaire Index (BILLION) is designed to track and measure the performance
those who have, over time, reaped the biggest rewards on Wall Street: financial
billionaires. The index monitors the portfolios of leading billionaire investors, such as
Warren Buffett, Carl Icahn, Daniel Loeb, David Tepper and David Einhorn. It is
composed of the top 30 large-cap equities listed on the S&P 500 in which these financial
billionaires have allocated the most funds, providing ample trading liquidity, and well-
known benchmark, and better results to equity indexation than capitalization-weighted
indices. Devised from 13F filings, the iBillionaire Index provides investors an efficient
and effective way to follow the smart money. In essence, the index works as though one
gathered a group of billionaires and asked them to come to a consensus as to which S&P
500 stocks are the best bets. This will be added to the tools section of Research Resources
Subject Tracer™ Information Blog. This will be added to Business Intelligence
Resources Subject Tracer™ Information Blog. This will be added to Reference
Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject

Updated> Academic and Scholar Search Engines and Sources
http://www.ScholarSearchEngines.com/
Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search
Engines and Sources" is now a 66 page research paper listing selected resources both new
and existing that will help anyone who is attempting to find academic and scholarly
information and knowledge available on the Internet. Each source is described along with
the URL address than can be accessed. It is freely available as a .pdf file (434KB) at the
above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S.,
A.M.H.A. [**Updated: April 1, 2014**]. Other white papers are available by clicking here.

Update> Privacy Resources White Paper Link Dataset Compilation
http://www.PrivacyResources.info/
The white paper link dataset compilation of Privacy Resources Subject Tracer™ by
Marcus P. Zillman, M.S., A.M.H.A. is now a 32 page .pdf document 255KB. [**Updated
April 1, 2014**]. Privacy Resources and Sites on the Internet is a comprehensive listing of
privacy resources currently available on the Internet. These include associations, indexes,
search engines as well as individual websites and sources that supply the latest
technology and information about privacy and how it relates to you and the Internet. This
is a **MUST** reference for today's New Economy where privacy and security have become
major issues!! Keep your privacy and security with this excellent Subject Tracer™. The
website and .pdf have been completely updated as of April 1, 2014.

Updated> Deep Web Research and Discovery Resources 2014
http://www.DeepWeb.us/
I have just updated my white paper link dataset complilation titled **Deep Web Research and Discovery Resources 2014** and it is now a 44 page 312KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. The next major update is scheduled for 2015 with continued minor monthly updates as new resources are added. Currently this has been downloaded over 2,000,000 times!

Be My Eyes
http://www.bemyeyes.org/
Be My Eyes will launch as an app that lets blind contact a network of sighted volunteers for help with live video chat. Features include: a) Blind requests assistance - First a blind person requests assistance in the Be My Eyes app - The challenge that he/she needs help with can be anything from knowing the expiry date on the milk to getting help crossing the street; b) Volunteer receives video & describes - The volunteer helper receives a notification for help and a live video connection is established. From the live video the volunteer can help the blind answering the question the blind needs answered, c) Non-profit - all for love - Be My Eyes is a non-profit, put in this world to make the biggest difference possible for blind people; and d) Open source - go contribute - Be My Eyes is open source - see and contribute to the code on GitHub. This will be added to Accessibility Resources Subject Tracer™ Information Blog.

The Aspen Institute
http://www.aspeninstitute.org/about/blog
The Aspen Institute brings together policy makers in order to talk about the big ideas that are on the hearts and minds of people around the world. Conversations about sustainability, globalization, and other matters are all in a day's work and meditation for these people and this blog is a great way to enter some of these conversations and engage with some large and compelling discussions. Visitors to the site will find pieces on the minimum wage, public school reform, and the role of community colleges in 21st century America. If looking for a specific topic, there are dozens of headings, ranging from the Affordable Care Act to youth sports, that can be perused. This will be added to Research Resources Subject Tracer™ Information Blog. [From The Scout Report, Copyright Internet Scout 1994-2014. https://www.scout.wisc.edu/]

Business Insider
http://www.businessinsider.com/
Businesspeople, and anyone with an interest in the machinations of business-related matters, will find much to enjoy at the Business Insider site. The offerings here include long form reports, current news updates, and topical news offerings divided into such themes as Tech, Finance, and Strategy. First-time visitors might wish to get started by looking at the Trending topics, which cover everything from the smart phone market to stock performance updates. Visitors are also welcome to register online to receive special

updates, newsletters, and other materials that might be of interest. As a great feature of personalization, there is also an option to receive alerts every time items of particular topical interest are added to the site. This will be added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™. [From The Scout Report, Copyright Internet Scout 1994-2014. https://www.scout.wisc.edu/]

ZENODO - Research Shared
https://zenodo.org/
ZENODO builds and operate a simple and innovative service that enables researchers, scientists, EU projects and institutions to share and showcase multidisciplinary research results (data and publications) that are not part of the existing institutional or subject-based repositories of the research communities. ZENODO enables researchers, scientists, EU projects and institutions to: a) easily share the long tail of small research results in a wide variety of formats including text, spreadsheets, audio, video, and images across all fields of science; b) display their research results and get credited by making the research results citable and integrate them into existing reporting lines to funding agencies like the European Commission; and c) easily access and reuse shared research results. Deliverables include: 1) An open digital repository for everyone and everything that isn't served by a dedicated service; the so called "long tail" of research results; 2) A modern look and feel in line with current trends for state-of-the-art online services; 3) Integration with OpenAIRE infrastructure, and assured inclusion in OpenAIRE corpus; 4) Easy upload and semi-automatic metadata completion by communication with existing online services such as DropBox for upload, Mendeley/ORCID/CrossRef/OpenAIRE for upload and pre-filling metadata; 5) Easy access to research results via innovative viewing and as well as open APIs and integration with existing online services and preservation of community independent data formats; 6) A safe and trusted service by providing a sound curation, archival and digital preservation strategies according to best practices; 7) Persistent identifier minting (such as DOI) for shared research results; 8) Service hosting according to industry best practices in CERN's professional data centres; and 9) Easy means to link research results with other results, funding sources, institutes, and licenses. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog.

e-Infrastructure
http://cordis.europa.eu/fp7/ict/e-infrastructure/
The e-Infrastructures activity, as a part of the Research Infrastructures programme, focuses on ICT-based infrastructures and services that cut across a broad range of user disciplines. It aims at empowering researchers with an easy and controlled online access to facilities, resources and collaboration tools, bringing to them the power of ICT for computing, connectivity, storage and instrumentation. This allows for instant access to data and remote instruments, "in silico" experimentation, as well as the setup of virtual research communities (i.e. research collaborations formed across geographical, disciplinary and organisational boundaries). e-Infrastructures foster the emergence of e-

Science, i.e. new working methods based on the shared use of ICT tools and resources across different disciplines and technology domains. Furthermore, e-Infrastructures enable the circulation of knowledge in Europe online and therefore constitute an essential building block for the European Research Area(ERA). This will be added to the tools section of Research Resources Subject Tracer™ Information Blog.

Updated>Grant Resources
http://www.GrantResources.info/
The above is the associated white paper link dataset compilation of the Grant Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A.. It is a freely available 16 page .pdf document (190KB) listing the latest and greatest online resources and sites for grants! **Updated on April 3, 2014**. Other white papers are available by clicking here.

Trackolade - Everything You Need To Easily Control Your Projects
https://trackolade.com/
They built Trackolade because they wanted to eliminate the costs of complexity that pervade ordinary project management software. They believe that simplicity is beautiful, that elegance trumps endless extras, and that ease-of-use is a measure of success. They looked long and hard at what features are really necessary and truly enhance productivity in a project management tool, and then they built that - and only that - into Trackolade. They think that flexibility and control are more valuable than having a stack of features, so hey designed Trackolade to work the way effective teams work naturally - by making to-do lists, prioritizing through consensus, and collaborating constantly. They knew we were onto something when we started using Trackolade and their productivity, communication, and efficiency shot through the roof. They decided to share Trackolade with the world because they knew they are not the only group of people working together towards a common goal who have experienced disorder, confusion and anarchy. They don't have investors, they are not huge risk takers, and they weren't incubated anywhere (unless you count our homemade office). They are simply a group of creators who want to produce the best work we can and have fun doing it - just like you. They hope their story inspires you, and moreover, that Trackolade empowers you. Features include: a) Projects - Manage and organize projects, SSL secured; b) Task manager - Share, assign, schedule and prioritize tasks; c) Discussion tools - Organize group discussions within projects and tasks; and d) File sharing - Securely store, share, and edit documents. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Unseen - Secure Your Privacy
https://unseen.is/
Unseen brings consumers and businesses very strong secure and private communications. Their skilled and experienced team have been building popular web sites and services since 1995. Before starting Unseen, they developed Before It's News, a leading source of alternative news and information. Because of this, they had numerous people share with

57

them their concerns about internet communications security. They have been aware of most of the recent revelations for years. Their premise is that everyone needs to be able to hear the truth so they can make a good choice for their future. If your communications isn't secure, it could be monitored, blocked or changed without you knowing it. That's not good for anyone. With all the recent spying disclosures, they became concerned about the safety of our customer's data, so they moved the company and servers to Iceland. Iceland has a good track record of doing the right thing for protecting privacy and their past behavior with the bankers and human rights. It's a neutral country where during the height of the cold war, this is where Reagan and Gorbachev had their famous meetings. It's a very developed country with state of the art data centers where your data is safe and under the protection of Icelandic laws. Their Icelandic director is firmly in control of any requests for data and will do everything legally possible to protect their customer's communications. In the future, expect many upgrades to their systems, as they stay abreast of the latest encryption and security technology and do everything they can to continue to earn your trust. Features include: a) Secure - Powerful proprietary 4096 bit encryption combined with secure network infrastructure; b) Offshore - They are based in Iceland because of their very strong data privacy laws; c) Universal - With a state-of-the-art web site, mobile apps and desktop clients, they help you securely communicate wherever you are; d) Private Key - Private key with NTRU, quantum proof encryption. Generate it yourself, secure it yourself. Keep it yourself with Premium; e) Secure Chat + Email - Real time chat and file sharing. Secure email, up to 2GB storage with Premium; and f) Audio + Video Calling - Very high quality p2p calls, conference calls with Premium. This will be added to Privacy Resources Subject Tracer™ Information Blog.

Update> World Wide Web Reference White Paper Link Dataset Compilation
http://www.WWWReference.info/
The above is the associated white paper link dataset compilation of the World Wide Web Reference Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A.. It is a 59 page .pdf document 382KB.[**Updated, on April 4, 2014**]. Other white papers are available by clicking here.

Multimedia Gallery: U.S. Census Bureau
https://www.census.gov/multimedia/
A core feature of the Census Bureau is the wide range of statistical reports and fact sheets that they provide for general consumption. Yet,journalists and others with a penchant for demography will appreciate this online multimedia gallery site that offers up radio features, videos, and photos for general use. Within Videos, visitors can look over clips on data visualizations, Stats in Action, and a nice overview of World Statistics Day. Moving on, the Photos area contains sections such as Census History, Facts for Features, and Lifestyle that document the Bureau's activities. Access to a range of radio features can be found within the Audio section. These features provide great information on the bureau's latest statistical profiles and ongoing research. This will be added to Statistical Resources and Big Data Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2014. https://www.scout.wisc.edu/

Updated> Artificial Intelligence Resources
http://www.AIResources.info/
The white paper link dataset compilation of the Artificial Intelligence Resources Subject
Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. is a freely available
20 page .pdf document (213KB) listing the latest and greatest online resources and sites
for artificial intelligence! **Updated on April 5, 2014**. Other white papers are available by
clicking here.

American FactFinder
http://factfinder2.census.gov/
American FactFinder provides access to data about the United States, Puerto Rico and the
Island Areas. The data in American FactFinder come from several censuses and surveys.
You can also find popular facts (population, income, etc.) and frequently requested data
about your own community. This has been added to the tools section of Research
Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial
Resources Subject Tracer™. This will be added to Statistics Resources and Big Data
Subject Tracer™.

Disconnect Search - Search Privately
https://disconnect.me/
Used by over a million people – Disconnect lets you search privately using your favorite
search engine. Your personal info should be your own. But these days thousands of
companies invisibly collect your data on the Internet, including the pages you go to and
the searches you do. Often, this personal data is packaged and sold without your
permission. Understanding online data collection and controlling access to your personal
info should be easy. You should be free to move about the Internet without anyone
looking over your shoulder and without fear that your online activity might be analyzed,
your searches scrutinzed, or your security compromised. Disconnect was founded in 2011
by Brian Kennish, a former Google and DoubleClick engineer; and Casey Oppenheim, a
consumer- and privacy-rights advocate and attorney. Today, they develop award-
winning, user-friendly privacy and security software in Palo Alto, California. By being an
advocate for Internet users everywhere, they hope to create enduring, positive change in
the way personal info is handled online. This will be added to the tools section of
Research Resources Subject Tracer™ Information Blog. This will be added to Privacy
Resources Subject Tracer™.

Updated> Agriculture Resources
http://www.AgricultureResources.info/
The above is the associated white paper link dataset compilation of the Agriculture
Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It
is a 22 page .pdf document 199KB. [**Completely Updated On April 7, 2014**] Other
white papers are available by clicking here.

Experiment - Platform for Enabling New Scientific Discoveries
https://experiment.com/
Their mission is to fund science that moves us forward. As a society, we are in a position to study, learn, and innovate more than ever before. Yet there is one major bottleneck; funding. In recent years, it's become increasingly difficult for new ideas to get off the ground, especially the innovative and high-risk ideas with the biggest impact. Since 2010, 80% of principal investigators spend more time writing grant proposals and 67% are struggling with less funding. 'Big science' has become synonymous with 'budget cuts'. This is about your ability to invest in our future. This is about Science for the people, by the people. Step One - Researchers post projects needing funding on Experiment; Step Two - They share their project to fundraise and spread awareness; and Step Three - Once a project reaches its goal, supporters are rewarded with insight behind the science. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

People Search World
http://www.peoplesearchworld.com/
Billed as one of the most complete people search on the web. Their people search records may include the following: a) phone records; b) education records; c) criminal records; d) email records; e) relatives; f) court records; g) associates; h) address records; and i) arrest data. This will be added to Finding People Resources and Sites Subject Tracer™.

Omlet - Open Messaging Platform
http://www.omlet.me/
Omlet is an Open Messaging Platform, a new standard for mobile messaging applications that leverages the unique attributes of the phone to enable consumers to "share anything, with anyone, anywhere," while owning the data they share. MobiSocial is working closely with a wide range of device manufacturers, telecommunication carriers, and consumer data storage vendors to make Omlet as widely available as possible to redefine and evolve the Open Messaging marketplace. Omlet Chat enables consumers to share anything (text, images, files, video, music), with anyone, from any device (IOS or Android). One of the key features of Omlet Chat is the ability for groups to find, connect, and collaborate with one another. This enables users to create "social galleries" of their photos or chat with new friends without sharing any personal information regardless of what other networks they belong to. By leveraging the power of the phone and its social DNA, Omlet Chat will introduce the new "Open Messaging" experience to the global marketplace. Smartphone and tablet provider ASUS is embedding Omlet Chat as a native

Dragdis - Drag and Drop Anything Anywhere
https://dragdis.com/
Ideas don't come from nothing. That is why we all are in a constant pursuit of discoveries and new sources of inspiration. All these great things, however, have a mischievous tendency to get lost in a mess we make of them, and eventually finding them on our own computer might turn out to be harder than it was on the World Wide Web. Dragdis is here to make collecting things seamless by helping you put your discoveries to the right place the second you come across them. Drag & drop anything anywhere. Collect images, texts, links or videos to your private folders or post directly to Facebook, Twitter & (soon to come) Tumblr, Dropbox, Pinterest etc. Driven by their passion for simplicity, they work hard to offer you new cluster-free habits. They are convinced that Dragdis brings a fundamental shift in how people move content around. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™

Updated> Green Files
http://www.GreenFiles.info/
The above white paper link dataset compilation of the Green Files Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. is a freely available 22 page .pdf document (219KB) listing the latest and greatest online resources and sites for the environment and all things green! **Completely Updated on April 9, 2014**. Other white papers are available by clicking here.

OpenAIRE - Open Access Infrastructure for Research in Europe
http://www.openaire.eu/
The FP7 project OpenAIRE aimed to support the implementation of Open Access in Europe. It provides the means to promote and realize the widespread adoption of the Open Access Policy, as set out by the ERC Scientific Council Guidelines for Open Access and the Open Access pilot launched by the European Commission. Its successor OpenAIREplus is aimed at linking the aggregated research publications to the accompanying research and project information, datasets and author information. The goal is to make through the portal www.openaire.eu, as much European funded research output as possible available to all. This research output, whether it is publications, datasets or project information is not only accessible through the OpenAIRE portal, extra functionalities are also offered, such as statistics, reporting tools and widgets – making OpenAIRE a useful support service for researchers, coordinators and project managers. OpenAIRE relies heavily on a decentralized structure where there is a representation in all member states (the so-called NOADs or National Open Access Desks) who can give

61

specialized advice. If you have a question about a country-specific situation, you can contact them. Researchers working for European funded projects can participate by depositing their research output in their own repository, publish with participating journals or deposit directly in the OpenAIRE repository ZENODO– and indicating the project it belongs to in the metadata. Dedicated pages per project are visible on the OpenAIRE portal. OpenAIRE's three main objectives are to: a) build support structures for researchers in depositing FP7 research publications through the establishment of the European Helpdesk and the outreach to all European member states through the operation and collaboration of 27 National Open Access Liaison Offices; b) establish and operate an electronic infrastructure for handling peer-reviewed articles as well as other important forms of publications (pre-prints or conference publications). This is achieved through a portal that is the gateway to all user-level services offered by the e-Infrastructure established, including access (search and browse) to scientific publications and other value-added functionality (post authoring tools, monitoring tools through analysis of document and usage statistics); and c) work with several subject communities to explore the requirements, practices, incentives, workflows, data models, and technologies to deposit, access, and combine research datasets of various forms in combination with research publications. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Statistics Resources and Big Data Subject Tracer™.

National Network of Libraries of Medicine®
http://www.nlm.nih.gov/pubs/factsheets/nnlm.html
The National Network of Libraries of Medicine (NN/LM) is a nationwide program coordinated by the National Library of Medicine (NLM). The mission of the NN/LM is to advance the progress of medicine and improve the public health by: 1) providing all U.S. health professionals equal access to biomedical information and, 2) improving the public's access to information, enabling them to make informed decisions about their health and healthcare. The Network consists of over 6,000 member organizations. These include academic medical libraries, hospital, pharmaceutical and other special health sciences libraries, information centers, public libraries and community-based organizations with an interest in promoting access to health information. Eight Regional Medical Libraries (RMLs), major institutions under contract with the National Library of Medicine, assist NLM with providing timely access to quality biomedical and health information. In addition to the RML contracts, NLM funds contracts for three national centers, the National Library of Medicine Training Center (NTC), the Outreach Evaluation Resource Center (OERC) and the Web Services Technology Operations Center. In support of the Network, the RMLs plan, promote and implement programs, services and outreach within their geographic regions as well as cross-regional collaborative activities. This will be added to Healthcare Resources Subject Tracer™.

Updated> Financial Sources Subject Tracer™ Information Blog White Paper Link Dataset Compilation
http://www.FinancialSources.info/

Zillman, M.S., A.M.H.A. has been just updated and is now a 15 page .pdf document 184KB listing the latest and greatest online resources and sites for ChatterBots! [**Updated on April 11, 2014**] Other white papers are available by clicking here.

Talk.net - Do Phone Numbers Say Enough About You
http://mtalk.net/
Get a free, personal web address (e.g. www.erikablau.mtalk.net) that makes it easy for your contacts and others to call you or text you at no cost wherever they are. Great for personal or business use, this personal web link can be sent or shared easily so that anyone, anywhere, anytime will be able to contact you instantly, for free just by clicking on it. Mtalk lets you customize the web page associated with your click-to-talk address with your name, picture and wallpaper so you can profile what you desire. No more phone numbers required, no software installation, browser based, private and spam proof. It's simple, immediate and intuitive. It just works. Use it for: a) Leisure - Want to get rid of roaming charges and expensive calls when calling friends and loved ones even when abroad; b) Privacy - Want to post your house for sale and let the world contact you easily for free without giving away your phone numbers; and c) Business - Want to profile your hotel or business and include a virtual toll free number? This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Updated> Bots, Blogs and News Aggregators
http://www.BotsBlogs.com/
Research white paper link dataset compilation **Bots, Blogs and News Aggregators** is a 19 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf file (332kb) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. . It was updated on **April 11, 2014**. FreedomPop - Communicate Securely and Anonymously
http://www.freedompop.com/
Protect your privacy from hackers, government agencies and spyware. Privacy is a right
Not a privilege. Enforce your right to communicate anonymously FreedomPop's mission
is to deliver free and fast mobile services to all Americans. FreedomPop is a new wave
telecom company launched publicly in October 2012. It is headquartered in Los Angeles
and backed by Skype Founder Niklas Zennstom's Atomico, Mangrove Capital, and
DCM. Delivering unprecedented value and convenience to the mobile market,
FreedomPop ensures that no American is left off the digital grid.The FreedomPop Team
consists of seasoned web and telecom entrepreneurs who are committed to providing to
customers free mobile services in the same way Skype provides free voice, Dropbox free
data and Spotify free music. Through its innovative model and approach, FreedomPop
currently offers customers free 4G mobile phone service, free wireless internet, and free
home broadband.FreedomPop's high speed wireless internet service runs across Sprint's
LTE network, 4G WiMax and 3G CDMA networks. Features include: a) Communication
Privacy - 1) Encrypts communication for voice calls and text messages; 2) Uses 128-bit
encryption, the same proven encryption trusted by banks and government agencies; 3)
Enables anonymous internet browsing wherever you go; 4) Prevents online marketers
from tracking your web activity; 5) Defends against data monitoring and eavesdropping
from 3rd parties; and 6) Bypasses any website restrictions and connect to any site online;
and b) Mobile Security - 1) Protects your phone from viruses and other malware; 2)
Protects privacy by temporarily making your contacts and all related call history and
SMS correspondence confidential; 3) Protects information from unathorized use if the
device is lost or stolen as well as helps you to locate the device; 4) Blocks unsolicited
incoming calls and text messages; and 5) Blocks malicious websites ad fake (phishing)
websites, which aim to steal your confidential data including passwords. This will be
added to Privacy Resources Subject Tracer™.

Updated> New Economy Resources 2014

http://GenealogyResources.info/
The white paper link dataset compilation of the Genealogy Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. and is a freely available 19 page .pdf document (191KB) listing the latest and greatest online resources and sites for genealogy! **Completely Updated on April 15, 2014**. Other white papers are available by clicking here.

New on LLRX - eCommerce Resources on the Internet
http://www.llrx.com/features/ecommerceresources.htm
Marcus P. Zillman's guide is a comprehensive, diverse and wide ranging listing of eCommerce Resources on the Web. These resources include those in a wide range of areas such as: associations, indexes, search engines as well as individual websites. Also available from http://www.eCommerceResources.info/ .

Updated> Using the Internet As a Dynamic Resource Tool for Knowledge Discovery
http://www.zillman.us/white-papers/using-the-internet-as-a-dynamic-resource-tool-for-knowledge-discovery/
Research white paper titled "*Using the Internet As a Dynamic Resource Tool for Knowledge Discovery*" is a 20 page research paper listing many resources both new and existing that will help anyone who is attempting to perform information and knowledge research and discovery on the Internet. It is freely available as a .pdf file (508KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated on **April 15, 2014**. Other white papers are available by clicking here.

I Know First - Daily Market Forecast
http://iknowfirst.com/
Daily Market Forecast provides accurate and paramount investment foresight based on advanced self-learning algorithms to build superlative investment strategies. Our market forecasting system predicts more than 1,400 markets: stocks, world indices, currencies, ETF's, interest rates & commodities. The algorithm analyzes each asset daily and then chooses the best market opportunities for you to consider as investments. Co-Founder Dr. Lipa Roitman, a scientist, with over 20 years in the artificial intelligence (AI) & machine learning (ML) fields developed an innovative self learning algorithm that tracks and predicts the flow of money from one market to another and produces daily predictions for the following periods: a) Short term: 3 days, 7 days, 14 days; and b) Long term: 30 days, 90 days & 365 days. This will be added to Prediction Markets Subject Tracer™. This will be added to Financial Sources Subject Tracer™.

BrainHat - Natural Language Environment
http://www.brainhat.com/
Brainhat is a computing environment that is programmed in natural language—particularly English. Program statements are propositions (facts) and inference templates (executables). Taken together, they motivate goal-oriented conversations or actions. Brainhat can interact with you and with other Brainhats. It can manage outside processes, learn and remember. Over the years, they have interfaced with robotics, VoiceXML, HTML, IM, email and speech recognition for dictation and telephony. Multiple interfaces can be active simultaneously. The project is in the midst of a long development cycle, with some nice capabilities on the way. In the meantime, they are keeping the site alive and providing code updates every once in a while. This will be added to Artificial Intelligence Resources Subject Tracer™.

Updated> Accessibility Resources White Paper URL DataSet Link Compilation
http://www.AccessibilityResources.info/
I have just updated my white paper link compilation of the **Accessibility Resources** Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It is a 17 page .pdf document 187KB. **[Updated April 16, 2014]** Other white papers are available by clicking here.

Competitor Monitor - Monitoring Your Competitors Prices and Products
http://www.competitormonitor.com/
Competitor Monitor is a service specifically dedicated to monitoring your competitors prices and products. They understand how important it is to ensure that your business stays competitive, and no where is that harder than online. At Competitor Monitor they are well versed in the monitoring and analysis of data from ecommerce websites. They are able to discreetly crawl for data and turn that into easy to follow reports that save you time, keep you informed about your market and deliver information that could position you at the top of that market. The technology that they have developed for Competitor Monitor is focused and streamlined specifically for this type of intelligence gathering. Through the automating of data gathering and report construction, they are able to cut out time consuming and unnecessary processes; passing the cost effectiveness on to you. Competitor Monitor provides fast, effective, informative results that let you get on with doing what you do best; which is running your business. This will be added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Updated> Biotechnology Resources White Paper Link Dataset Compilation
http://www.BiotechnologyResources.info/
The above is the associated white paper link dataset compilation of the Biotechnology Resources Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It is a 13 page .pdf document 171KB. **[Completely Updated on April 17, 2014]** Other white papers are available by clicking here.

The World Top Incomes Database
http://topincomes.g-mond.parisschoolofeconomics.eu/#Home:
There has been a marked revival of interest in the study of the distribution of top incomes using tax data. Beginning with the research by Thomas Piketty (2001, 2003) of the long-run distribution of top incomes in France, a succession of studies has constructed top income share time series over the long-run for more than twenty countries to date. These projects have generated a large volume of data, which are intended as a research resource for further analysis. The world top incomes database aims to providing convenient on line access to all the existent series. This is an ongoing endeavour, and we will progressively update the base with new observations, as authors extend the series forwards and backwards. Despite the database's name, we will also add information on the distribution of earnings and the distribution of wealth. As the map below shows, around forty-five

further countries are under study, and will be incorporated at some point (see Work in Progress). This will be added to Financial Sources Subject Tracer™. This will be added to International Trade Resources Subject Tracers™. This will be added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Updated> Auction Resources
http://www.AuctionResources.info/
The above is the associated white paper link dataset compilation of the **Auction Resources** Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It is a 16 page .pdf document 177KB. [**Updated on April 18, 2014**] Other white papers are available by clicking here.

Updated> Web Guide for the New Economy
http://www.WebGuideNewEconomy.com/
The **Web Guide for the New Economy** by Marcus P. Zillman, M.S., A.M.H.A. has just been updated and represents the latest world wide web resources for discovering new knowledge and understanding the latest happenings with regards to the New Economy. Understanding the required new economy analytics, resources and alerts will give you the necessary tools to maintain your current position, improve your position and discover the new knowledge required to be the leader in your profession in the New Economy! Download this freely available web guide today! [**Updated on April 19, 2014 39 pages 365KB**] Additional white papers by Marcus P. Zillman are available by clicking here.

May 2014 Zillman Column - Bot and Intelligent Agent Research Resources and Sites
http://columns.virtualprivatelibrary.net/Bot_Intelligent_Agent_May14_Column.pdf
http://www.zillmancolumns.com/
The May 2014 Zillman Column is now available and is titled **Bot and Intelligent Agent Research Resources and Sites** and features a comprehensive listing of sources, resources and sites on the Internet for bot and intelligent research. These resources and sources will help you to discover the many pathways available through the Internet to find the latest resources and sites for bot and intelligent agent happenings. Download this excellent freely available 19 page 183KB pdf column today and begin your online knowledge discovery into these excellent bot and intelligent agent resources, sources and sites!.

Super.cc - The Easiest Way To Get Things On Your Calendar
http://super.cc/
Super.cc lets you add events to your calendar from any email and any device. All you have to do is email add@super.cc with your event details. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Framebench - Work Together Visually
http://www.framebench.com/
Framebench is a cloud based communication and feedback platform specially for digital agencies and creative design firms. Its your central workplace where you can store & share your creative assets. Remote teams & clients can then review, mark changes required on the assets and even host discussions on them in real time. All of this is automatically documented for viewing later. Such a visual communication workflow allows for crisp & quick feedback. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Entrepreneurial Resources Subject Tracer™.

Updated> Theology Resources Subject Tracer White Paper Link Dataset Compilation
http://www.TheologyResources.info/
The above is the associated white paper link dataset compilation of the Theology Resources Subject Tracer™ Information Blog which is a 18 page paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about theology resources and sites that are available over the Internet. It is freely available as a .pdf file (191KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was Updated on **April 21, 2014**. Awarenesswatch™ Paper Review

Towards a Methodology for Examining Twitter Follower Accession by *Axel Bruns, Darryl Woodford, Troy Sadkowsky*
http://firstmonday.org/ojs/index.php/fm/article/view/5211

Abstract:
The analysis of content and meta–data has long been the subject of most Twitter studies, however such research only tells part of the story of the development of Twitter as a platform. In this work, we introduce a methodology to determine the growth patterns of individual users of the platform, a technique we refer to as follower accession, and through a number of case studies consider the factors which lead to follower growth, and the identification of non–authentic followers. Finally, we consider what such an approach tells us about the history of the platform itself, and the way in which changes to the new user signup process have impacted upon users.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
