

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V13N1

January 2015

Welcome to the V13N1 January 2015 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Deep Web Research and Discovery Resources 2015** and is a comprehensive listing of deep web search engines, directories, listservs, sources and sites on the Internet. As more and more of the Internet global population is utilizing the deep web resources that are available from the Internet, this V13N1 Awareness Watch Newsletter brings you many of these relevant sources for your virtual private library on your desk top, laptop, tablet or smartphone. Now your deep web information needs are just a click or tap away! The site is always updated and is available at the following URLs:

<http://www.DeepWebResearch.com/>

<http://www.DeepWeb.us/>

Deep Web Research and Discovery Resources 2015

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director
Virtual Private Library

Bots, Blogs and News Aggregators (<http://www.BotsBlogs.com/>) is a keynote presentation that I have been delivering over the last several years, and much of my information comes from the extensive research that I have completed over the years into the “invisible” or what I like to call the “deep” web. The Deep Web covers somewhere in the vicinity of trillions upon trillions of pages of information located through the world wide web in various files and formats that the current search engines on the Internet either cannot find or have difficulty accessing. The current search engines find hundreds of billions of pages at the present time of this writing. This report constantly updated at <http://DeepWeb.us/>.

In the last several years, some of the more comprehensive search engines have written algorithms to search the deeper portions of the world wide web by attempting to find files such as .pdf, .doc, .xls, ppt, .ps. and others. These files are predominately used by businesses to communicate their information within their organization or to disseminate information to the external world from their organization. Searching for this information using deeper search techniques and the latest algorithms allows researchers to obtain a vast amount of corporate information that was previously unavailable or inaccessible. Research has also shown that even deeper information can be obtained from these files by searching and accessing the “properties” information on these files!

This report and guide is designed to give you the resources you need to better understand the history of the deep web research, as well as various classified resources that allow you to search through the currently available web to find those key sources of information nuggets only found by understanding how to search the “deep web”. This **Deep Web Research and Discovery Resources 2015** report and guide is divided into the following sections:

Articles, Papers, Forums, Audios and Videos
Cross Database Articles
Cross Database Search Services
Cross Database Search Tools
Peer to Peer, File Sharing, Grid/Matrix Search Engines
Presentations
Resources - Deep Web Research
Resources - Semantic Web Research
Bot and Intelligent Agent Research Resources and Sites
Subject Tracer Information Blogs

ARTICLES, PAPERS, FORUMS, AUDIOS AND VIDEOS (Current and Historical)

GoAruna - Your Files Are Always With You

<http://www.goaruna.com/>

GoAruna was started originally in 2006/2007 as an internal tool to help them send and share large files with their digital agency customers. It has evolved considerably and today GoAruna is a full time endeavor for their team of 16. Their mission is to provide the best cloud storage service with the easiest access from the most devices. GoAruna – “Your files, anywhere, anytime and on any device.” This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™.

Poacht™ - Covert Job Search For the Currently Employed

<http://www.poachtapp.com/>

Poacht™ is an app/web SaaS platform that helps employers cherry-pick the best, most qualified "free-agent" candidates who are currently employed at other companies. Their algorithm helps to sort, rank, and match the passive candidates to open positions on the platform. The employers can then review the matches or search the candidates database with specific parameters. This will be added to [Employment Resources](#) Subject Tracer™

U.S. Climate Resilience Toolkit

<http://toolkit.climate.gov/>

The U.S. Climate Resilience Toolkit provides scientific tools, information, and expertise to help people manage their climate-related risks and opportunities, and improve their resilience to extreme events. The site is designed to serve interested citizens, communities, businesses, resource managers, planners, and policy leaders at all levels of government. In response to the President's Climate Action Plan and Executive Order to help the nation prepare for climate-related changes and impacts, U.S. federal government agencies gathered resources that can help people take action to build their climate resilience. The impacts of climate change—including higher temperatures, heavier downpours, more frequent and intense droughts, wildfires, and floods, and sea level rise—are affecting communities, businesses, and natural resources across the nation. Now is the time to act. For some, taking a business-as-usual approach has become more risky than taking steps to build their climate resilience. People who recognize they are vulnerable to climate variability and change can work to reduce their vulnerabilities, and find win-win opportunities that simultaneously boost local economies, create new jobs, and improve the health of ecosystems. This is a climate-smart approach—investing in activities that build resilience and capacity while reducing risk. Using plain language, the U.S. Climate Resilience Toolkit helps people face climate problems and find climate opportunities. The site offers: a) Steps to Resilience—a five-step process you can follow to initiate, plan, and implement projects to become more resilient to climate-related hazards; b) Taking Action stories—real-world case studies describing climate-related risks and opportunities that communities and businesses face, steps they're taking to plan and respond, and tools and techniques they're using to improve resilience; c) A catalog of freely available Tools for accessing and analyzing climate data, generating visualizations, exploring climate projections, estimating hazards, and engaging stakeholders in resilience-building efforts; d) Climate Explorer—a visualization tool that offers maps of climate stressors and impacts as well as interactive graphs showing daily observations and long-term averages from thousands of weather stations; e) Topic narratives that explain how climate variability and change can impact particular regions of the country and sectors of society; f) Pointers to free, federally developed training courses that can build skills for using climate tools and data; g) Maps highlighting the locations of centers where federal and state agencies can provide regional climate information; and h) The ability to Search the entire federal government's climate science domain and filter results according to your interests. Version 1.0 of the U.S. Climate Resilience Toolkit was developed over a six-month period in 2014 by a partnership of federal agencies and

Mesosphere - Bringing Google-Scale Compute To Everybody

<http://mesosphere.io/>

Mesosphere offers a layer of software that organizes your machines, VMs, and cloud instances and lets applications draw from a single pool of intelligently- and dynamically-allocated resources, increasing efficiency and reducing operational complexity. It is highly-available and fault-tolerant and runs in production at some of the most agile companies in the world in both private data centers and on public clouds. The core of Mesosphere is based on Apache Mesos, an open source technology invented at UC Berkeley's AMPLab and run at large scale at Twitter. Whether you are hand-tuning your own hardware, virtualizing with VMware, building a private cloud with OpenStack, or leveraging a public cloud like Amazon Web Services, Mesosphere will deliver better resource utilization, elastic scaling, and fault tolerance out of the box. Mesosphere is software that runs on each server in your physical or cloud-based datacenter, on top of any Linux distribution. Features include: a) Eliminate Lock-in - Built on top of open source technology, Mesosphere lets you run in any cloud or datacenter, maintaining your flexibility; b) Scale infinitely - Grow to tens of thousands of nodes effortlessly while dynamically allocating resources with ease; c) Never Fail - Mesosphere keeps your apps running by rebalancing resources and restarting failed tasks automatically; d) Optimize Resources - Mesosphere packs each server with multiple apps, increasing resource utilization; e) Develop Quickly - Developers can build and deploy faster with Mesosphere because they can think about code, not servers; and f) Operate Automatically - Mesosphere brings high-degrees of automation to managing your cluster. Save time and money with more efficient operations. This will be added to [Script Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. SimplySecure - Usably Secure Technologies

<https://simplysecure.org/>

Simply Secure is a small but growing organization. We have expertise in usability research, design, software development, and product management, and are supported by a diverse set of advisors and partners. In brief, they are a service organization. They are here to help the existing open-source security community do what it does – better. They don't want to own it, they don't want to invent it. They believe in collaboration and portable resources, developed with a broad coalition of smart, enthusiastic practitioners.

Awareness Watch V13N1 January 2015 Newsletter

© 2014 Marcus P. Zillman, M.S., A.M.H.A.

Their ground rules are: a) They work on open source projects - Security and privacy technologies must be trustworthy; to be trustworthy, they need to be open to scrutiny and validation. At the heart of open source is an openness to this type of scrutiny, and a willingness to work collaboratively to fix problems and improve as a part of earning this trust; b) They aim to enable broadly-useful communications technologies - Usability isn't just design. It means providing pleasant, workable technology that meets users needs and expectations. They believe that this means allowing users to continue using the platforms and services they're comfortable with. For this reason, their primary focus will be on technology that secures communication on top of existing platforms and services. How can they encrypt on top of popular name-brand, consumer-facing cloud services?; and c) They commit to running our organization transparently - They are working to solve unsolved problems, which means they will make mistakes. They believe that their mistakes can be as instructive as our successes, and they commit to being open about both in ways that help the community learn, recycle, and improve on our methodologies. This will be added to [Privacy Resources](#) Subject Tracer™.

Checkmarx - A Hacker-Free World

<https://www.checkmarx.com/>

Their mission is to guarantee that released software is free of technical and logical security vulnerabilities. Their company is always in motion, listening and reacting to current and future market needs. They inspire their partners to complement their products with the finest professional services, and drive industry standards. They do this so that they could collectively deliver better solutions with greater benefits. The growing dependence on software coupled with increased exposure and usage of the Internet emphasize that software reliability is becoming increasingly critical to users. Software developers are expected to rise to the challenge and deliver applications which are both safe and secure. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Partner Hunt - Find Business Partners and Investors Locally

<http://partnerhunt.com/>

Partner hunt is a new way to find business partners and investors, locally. Users can post their business ideas and business plans on our map, and other users will be able to contact them via our website. They want to make it easier for you to start your next business venture by making it more simple to find a partner or investor. In order to create a post, hover over the logo of a pen on the upper right hand corner and click the "Post" button. This will take you to a new page where you are able to create your post for other users to view. After you have submitted your post, they will review the listing and it will be posted as soon as they are done reviewing it. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog. This will be added to the white paper [Start Up Resources for the Entrepreneur](#).

Populr - Create and Share Secure, Trackable WebPages

<https://populr.me/>

Communicate your business and sales messages beautifully with web pages you can assemble as easily as powerpoint slides. With Populr, you don't need a programmer or designer to make an impact on the web. Create a one-pager quickly with our drag and drop automatic layout engine. Share your page via social media, email, and more, then track response to that page. Work faster by duplicating your pages, collaborating with others, and tracking revisions. With Populr's powerful features, you'll be able to super-charge your business communication in no time at all with these features: a) Professional Themes - Focus on your content while Populr takes care of impressing your audience with good design; b) Mobile-Optimized - Reach your audience effectively, whether they are at their computer or on the road; c) Sharing & Analytics - Gain insight into your communication loop by sharing your pages and tracking your recipients' engagement; d) Privacy & Security - Secure your private information with password-protected pages and encrypted file transfer; e) Drag & Drop Editing - Know exactly what your pages will look like as you edit them. Drag and edit content and see the results immediately; f) Customized Branding - Reflect your brand by uploading logos, changing the background & font, and pointing custom domains to your pages; g) Library Archive - Avoid wasting time searching for frequently used documents, images, and embeds; h) Duplication - Personalize your message for different audiences by rapidly copying & editing your pages; and i) Collaboration - Enlist the help of others by inviting them to edit your pages. Revert changes if you need to go back. This will be added to [eCommerce Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to my white paper titled [Start Up Resources for the Entrepreneur](#). This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Socialloomph - Tools to Boost Your Social Media Productivity

<https://www.socialloomph.com/>

Boost your social media productivity -- it doesn't have to be a manual time-consuming process! Twitter, Facebook (profiles, pages, and groups), LinkedIn (profiles, groups, and company pages), RSS feeds, blogs, Plurk, and App.net! Easily schedule updates, find quality people to follow, and monitor social media activity! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Social Informatics](#) Subject Tracer™.

Agile Designers - 1434 Best Resources for Designers and Developers

<http://agiledesigners.com/>

Stop wasting your time hunting for resources! Discover the best resources sorted by popularity. Save your favorites and organize them. Features include: a) "Like" the best resources - "Like" a resource to save it for later. You will find all your favorite resources grouped in "Your Likes" page; b) Create Toolboxes - Organize your favorite resources by lists with the "Toolboxes". Create unlimited lists, add comments, and share them with other designers; and c) Stay updated - Each day, we add new resources. Get alerted instantly by following us on twitter or subscribe to our weekly newsletter below. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Trailmix - A Private Place To Write

<https://www.trailmix.life/landing>

Want to know the hardest part about keeping a journal? Actually keeping one. Like most habits, it's easy for the first few days, but soon a lack of motivation or simple forgetfulness sets in. That's why they built Trailmix. Every day, Trailmix sends you an email asking how your day went. All you do is hit reply and start typing. When you're done, hit send, and your entry will be saved instantly. With every reminder email, they will include one of your previous entries chosen at random. You might get one from

yesterday, last week, or last year. This makes opening their emails fun! It's delightful to be reminded of your former thoughts and feelings. Even yesterday's entry can surprise you. This enjoyable feeling will encourage you to write more, so that future-you can enjoy reading today's entry. Before you know it, you're a daily journaler. Once you've built this habit, you get a tremendous payoff: the ability to look back over your life experiences. You'll notice patterns like "I always seem stressed on Wednesdays!" Or "Wow, I was so worried about that talk with my boss, but it turned out completely fine." Insights like these can have a profound effect on your happiness and behavior. They know, because they have experienced it themselves. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Quip - Messaging Plus Documents Combined In One Place

<https://quip.com/>

Quip is a modern productivity suite that enables you and your team to collaborate on any device. It works across iPhone, iPad, Android phones and tablets, and the desktop web. Quip has a simple and elegant interface that combines documents and messages into a single chat-like "thread" of updates, making collaboration immediate and easy. You can share documents, tables, checklists, and more so multiple people can edit and discuss together in a single, shared workspace. Companies across industries from Facebook to New Relic to Taser have adopted Quip to make communication and collaboration more efficient. Quip was founded by Bret Taylor and Kevin Gibbs, who worked together at Google. Bret and Kevin have created or worked on some of today's most widely used products, including Google Maps, Google App Engine and Facebook. They've hired a small team of people who are passionate about technology and about creating products for work that you actually enjoy using every day. Features include: a) Simple design - Edit and discuss in one place. Quip combines documents with messages so you can work faster, on the web or on the go; b) Shared folders - Create a shared folder, whether it's for working together on a team project or organizing recipes with your family; and c) Offline access - Use Quip anywhere, even offline. Your changes will be automatically synchronized when you next come online. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Global Consumption Database

<http://datatopics.worldbank.org/consumption/>

The World Bank designed this enormous database on economically developing countries for two groups: researchers seeking data to analyze and businesses looking to understand or expand their marketshare. For the rest of us, it's just fascinating reading. Start with the short article on the homepage, which explains that the roughly 4.5 billion low-income people in the world collectively spend about \$5 trillion a year - more than the middle and higher income segments combined. Then, explore the two Dashboards. The first feeds back information by country, the second by sector (Food and Beverages, Clothing and Footwear, Housing, etc.). For instance, Albania, with a total population of 2.8 million, saw a 7.6% dip in household spending in 2012, with the lowest segment forking over about \$60 million for Food and Beverages, while the higher segment spent \$265 million on the same category. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Reference Resources](#) Subject Tracer™. PitchBook - Better Data and Better Decisions

<http://pitchbook.com/>

PitchBook isn't just a data provider. By offering instant access to rich, sought-after information, it can also be a strong competitive advantage. You can rely on PitchBook for the information you need to make informed decisions - because they put the same rigor into their research that you put into your due diligence and prospecting. Their process starts with a daily systematic review of thousands of news and public filing sources. They then confirm, clarify and refine this data through direct communication with key contacts at target companies, investors, limited partners, and professional service providers. This ongoing contact ensures that the data is accurate and up-to-date. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Financial Sources](#) Subject Tracer™.

Zillman, M.S., A.M.H.A.](#) is a freely available 20 page .pdf document (206KB) listing the latest and greatest online resources and sites for artificial intelligence! **Updated on December 17, 2014.** Other white papers are available by clicking [here](#).

Blrt - Talk, Point and Draw

<http://www.blrt.com/>

Talk, point and draw over images, websites and documents. Communication is easier in person because you can express yourself verbally and visually. Emails can take a long time to write, and important nuances, like voice inflections, can be lost. Blrts are super quick. You simply talk, point and draw to get your message across with emotion. Blrts are 50x smaller than videos making them so much more efficient than video conferences and screen-capture videos. What's more, Blrt Replies use the already downloaded file, so there's no need to upload the media more than once to a conversation. Blrt supports multi-page PDFs, making it easier than ever to review and feedback on documents, drawings, wireframes, photos, websites and so much more. You simply talk, point and flip through pages of the document, just as if you were sitting next to each other. Recipients will see and hear exactly what you recorded. They can reply with their own audio-visual feedback or just type a comment. This has been added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

FontFont - World's Largest Library of Original Contemporary Typefaces

<https://www.fontfont.com/>

Quite simply, they love type and typography. Back in 1990, Erik Spiekermann and Neville Brody wanted to build a foundry where type was made for designers by designers, a place where type designers were given a fair and friendly offer and where type magic was made. From the very beginning, they wanted to bend the rules and test typographic boundaries, to build a library with a collection like no other; a range of typefaces that had different styles, different purposes, that was contemporary, experimental, unorthodox, and radical. Fast-forward over twenty years later and they are now one of the leading font foundries with the largest library of original, contemporary typefaces. Their library is home to over 2500 FontFonts including favorites such as FF Meta, FF DIN, FF Scala, FF Dax, and FF Kievit and newbies like, FF Chartwell, FF Tundra, FF Ernestine, and FF Tisa. At the heart of what they do is a heady mix of intuition, passion, a sprinkling of serendipity, an eye for detail, and a dash of attitude. From the first ever random font FF Beowolf to the release of their Web FontFonts in 2010, they place creativity at the forefront and pride themselves on producing the highest quality typefaces that are technically robust and that continually innovate. Their core team is based in Berlin, have a peek at the faces behind the fonts. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Updated> Finding Experts By Using the Internet

<http://www.FindingExperts.info/>

I have just updated my white paper link compilation on **Finding Experts By Using the Internet**. This is now a 23 page .pdf file (233KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [Updated December 18, 2014 23 pages 234KB .pdf]. Additional white papers available by clicking [here](#).

SeleniumHQ - Browser Automation

<http://www.seleniumhq.org/>

Selenium automates browsers. That's it! What you do with that power is entirely up to you. Primarily, it is for automating web applications for testing purposes, but is certainly not limited to just that. Boring web-based administration tasks can (and should!) also be automated as well. Selenium has the support of some of the largest browser vendors who have taken (or are taking) steps to make Selenium a native part of their browser. It is also the core technology in countless other browser automation tools, APIs and frameworks. Selenium is a suite of tools to automate web browsers across many platforms. Selenium... a) runs in many browsers and operating systems; and b) can be controlled by many programming languages and testing frameworks. This will be added to [Script Resources](#) Subject Tracer™. This will be added to [World Wide Web Reference](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™.

Awarenesswatch™ Paper Review

Pricey Privacy: Framing the Economy of Information in the Digital Age by *Federica Fornaciari*

<http://firstmonday.org/ojs/index.php/fm/article/view/5008>

Abstract:

As new information technologies become ubiquitous, individuals are often prompted rethinking disclosure. Available media narratives may influence one's understanding of the benefits and costs related to sharing personal information. This study, guided by frame theory, undertakes a Critical Discourse Analysis (CDA) of media discourse developed to discuss the privacy concerns related to the corporate collection and trade of personal information. The aim is to investigate the frames — the central organizing ideas — used in the media to discuss such an important aspect of the economics of personal data. The CDA explored 130 articles published in the New York Times between 2000 and 2012. Findings reveal that the articles utilized four frames: confusion and lack of transparency, justification and private interests, law and self-regulation, and commodification of information. Articles used episodic framing often discussing specific instances of infringements rather than broader thematic accounts. Media coverage tended to frame personal information as a commodity that may be traded, rather than as a fundamental value.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
