

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V13N12

December 2015

Welcome to the V13N12 December 2015 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **ShoppingBots and Online Shopping Resources 2016** and is a comprehensive listing of shoppingbot, online shopping, coupon, discount codes and deal resources and sites on the Internet. This is the 20th annual listing of this directory that has been produced and published by Internet Expert and Guru Marcus P. Zillman, M.S., A.M.H.A. since 1996. These resources have dynamically improved over the last 20 years and now offer you a method to find and enjoy all the latest resources for virtual shopping on the Internet. It covers both the shoppingbots (search engines for shopping) and coupon/discount code/deal sites so you may “Shop with Your Bot Until You Drop”. The site is always updated and is available at the following URL:

<http://www.ShoppingBots.info/>

ShoppingBots and Online Shopping Resources 2016

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

ShoppingBots and Online Shopping Resources 2016 is a comprehensive listing of shoppingbot and online shopping/coupon resources and sites on the Internet. This is the 20th annual listing of this directory that has been produced and published by Internet Expert and Guru Marcus P. Zillman, M.S., A.M.H.A. since 1996. The below list of sources is taken from his Subject Tracer™ Information Blog titled ShoppingBots and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.ShoppingBots.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest shoppingbot resources and sites.

Notes and Suggestions for Virtual Shopping

Whether your gift list is ready or you're wondering how long you can wait to start your holiday shopping, the Federal Trade Commission has [online tips](#) to help you get the best deals. The bottom line: Some extra research can really pay off:

Set a Budget. Create a gift list and check it twice to help you stay on track and not overspend.

Decide What Matters. Especially if you're buying gadgets, know what your "must-have" features are vs. those that are just nice to have.

Use Search Engines. Type a company or product name into your search engine with terms like "review," "complaint" or "scam" to find out more about it.

Read Reviews Online. Reviews from other people, experts, and columnists can give you an idea of how a product performs. But don't put all of your trust in one review.

Consider Reputation. A brand's reputation for quality and good customer service can really pay off.

Check Comparison Shopping Sites. They connect to many retailers selling the same product, sometimes at significantly different prices. Keep shipping costs in mind.

Consider Coupons. Some companies offer discounts via e-mail, and some websites collect and list codes for free shipping and other discounts. Search for the store with terms like "discount," "coupon" or "free shipping."

Read Return Policies. Not all stores have the same rules. Some charge fees for return shipping or restocking things like electronics.

Decide How to Pay. When you shop online, credit cards can offer extra protections.

Look for a Secure Checkout. Does the website start with https (the "s" stands for secure) when you're checking out?

Learn more about researching products online at OnguardOnline.gov/SmartShopper.

For hassle-free online shopping, keep records like e-mails and online receipts in case there's a problem. Also, make sure you know who you're dealing with and protect your personal and financial information, since anyone can set up shop online under almost any name. Learn more about safe shopping online at <http://onguardonline.gov/articles/0020-shopping-online>. Now go shop with your Bot until You Drop!!

Cheat Sheet – 10 Machine Learning Algorithms & R Commands

<http://vitalflux.com/cheat-sheet-10-machine-learning-algorithms-r-commands/>

This article lists down 10 popular machine learning algorithms and related R commands (& package information) that could be used to create respective models. The objective is to represent a quick reference page for beginners/intermediate level R programmers who working on machine learning related problems. Please feel free to comment/suggest if I missed to mention one or more important points. Following are the different ML algorithms included in this article: 1) Linear; 2) Logistic Regression; 3) K-Means Clustering; 4) K-Nearest Neighbors (KNN) Classification; 5) Naive Bayes Classification; 6) Decision Trees; 7) Support Vector Machine (SVM); 8) Artificial Neural Network (ANN); 9) Apriori; and 10) AdaBoost. This will be added [Artificial Intelligence Resources](#) Subject Tracer™.

Machine Learning Algorithm Cheat Sheet for Microsoft Azure Machine Learning Studio

<https://azure.microsoft.com/en-in/documentation/articles/machine-learning-algorithm-cheat-sheet/>

The Microsoft Azure Machine Learning Algorithm Cheat Sheet helps you choose the right machine learning algorithm for your predictive analytics solutions from the Microsoft Azure Machine Learning library of algorithms. The cheat sheet asks you questions about both the nature of your data and the problem you're working to address, and then suggests an algorithm for you to try. Azure Machine Learning Studio comes with a large number of machine learning algorithms for your predictive analytics solutions. These algorithms fall into the general machine learning categories of regression, classification, clustering, and anomaly detection, and each one is designed to address a different type of machine learning problem. Download the Machine Learning Algorithm Cheat Sheet and get help figuring out how to choose a machine learning algorithm for your solution. To keep it nearby, you can print the cheat sheet in tabloid size (11 x 17 in.). This will be added [Artificial Intelligence Resources](#) Subject Tracer™.

Updated> Deep Web Research and Discovery Resources 2015

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation titled **Deep Web Research and Discovery Resources 2015** and it is now a 49 page 351KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. Currently this has been downloaded over 3,000,000+ times!

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 69 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address that can be accessed. It is freely available as a .pdf file (462KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: November 1, 2015]. Other white papers are available by clicking [here](#).

Updated> Finding Experts By Using the Internet

<http://www.FindingExperts.info/>

I have just updated my white paper link compilation on **Finding Experts By Using the Internet**. This is now a 23 page .pdf file (228KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [Completely updated including all links validated and new links added on November 1, 2015 23 pages 228KB .pdf]. Additional white papers available by clicking [here](#).

FlackCheck.org

<http://www.flackcheck.org>

Headquartered at the Annenberg Public Policy Center of the University of Pennsylvania, FlackCheck.org offers resources that help students "recognize flaws in arguments in general and political ads in particular." At the time of this writing, with the primaries well underway in the United States, the site has excellent sections dedicated to particular candidates, including "Campaign Watches" about Jeb Bush, Donald Trump, Rick Santorum, and Rick Perry, among others. In addition, the Patterns of Deception section outlines the misleading arguments that surround debates on climate change, immigration, and gun control. For educators teaching critical political thinking, or for anyone who would like a tool for sorting through various policy debates and campaigns, FlackCheck.org is an excellent resource. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

RebelMouse - Social Media Aggregator

<https://www.rebelmouse.com/>

RebelMouse is a social media aggregator. In other words, the links, updates, tweets, photos, and other content that readers post on their various social media outlets (Facebook, Twitter, Pinterest, Instagram, etc.) can now all appear in one place - and that

Awareness Watch V13N12 December 2015 Newsletter

place happens to be beautifully designed, convenient, and free. Readers may sign up with their existing Facebook, Twitter, or Google+ accounts, or they can use the simple email/password function. From there, provide the service with your sign in information for your social media accounts and it will start pulling your updates and blending them into a visually satisfying arrangement. You'll also have more editorial control than on other social media sites with the magazine-like format. The only potential downfall is that, predictably, others will have to also sign up for RebelMouse before they can view your content. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

MeetingBurner

<https://www.meetingburner.com/>

For readers looking for a free online platform for small meetings and webinars, MeetingBurner is a good choice. The free service can host up to ten participants, and includes screen sharing, group chat, audio and video conferencing, and some mobile tools. This can be especially helpful for small organizations with a limited budget, since few web conferencing providers offer free plans. However, to access more of MeetingBurner's advanced features (such as the ability to host up to 50 or 250 attendees and recording options), users must pay a monthly fee. In a nutshell, this basic service is one of the few free web conferencing services available and it is perfect for small business owners or non-profits on a budget. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

Updated> Start Up Resources for Entrepreneurs

<http://www.StartUpResources.us/>

Start Up Resources is a publication from the Virtual Private Library and freely available from the above URL. Sections include: a) Idea Validation - How To Validate Your Startup Idea; b) Bootstrapping; c) Pitching; d) Lean Startup; e) Customer Development (CustDev); f) Minimum Viable Product (MVP); g) Launching; h) Funding/Venture Capital/Seed Capital/Angel Investing; i) Landing Page Optimization; j) PR/Press/Marketing; k) Conversion Rate Optimization; l) Tools and Resources; and m) Subject Tracer™ Information Blogs. This is now a 20 page pdf document (3) and updated on November 2, 2015. This has been added to to [Entrepreneurial Resources](#) Subject Tracer™.

World Bank Group Archives

<https://archivesholdings.worldbank.org/>

The World Bank is open about its activities and welcomes opportunities to explain its work to the widest audience possible. Openness promotes engagement with stakeholders, which in turn, improves the design and implementation of projects and policies, and

re3data.org - Registry of Research Data Repositories

<http://www.re3data.org/>

Research data are valuable and ubiquitous. The permanent access to research data is a challenge for all stakeholders in the scientific community. The long-term preservation and the principle of open access to research data offer broad opportunities for the scientific community. More and more universities and research centres are starting to build research data repositories allowing permanent access to data sets in a trustworthy environment. Due to disciplinary requirements, the landscape of data repositories is very heterogeneous. Thus it is difficult for researchers, funding bodies, publishers and scholarly institutions to select appropriate repositories for storage and search of research data. re3data.org is a global registry of research data repositories that covers research data repositories from different academic disciplines. It presents repositories for the permanent storage and access of data sets to researchers, funding bodies, publishers and scholarly institutions. re3data.org promotes a culture of sharing, increased access and better visibility of research data. The registry went live in autumn 2012 and is funded by the German Research Foundation (DFG). Project partners in re3data.org are the Berlin School of Library and Information Science at the Humboldt-Universität zu Berlin, the Library and Information Services department (LIS) of the GFZ German Research Centre for Geosciences, the KIT Library at the Karlsruhe Institute of Technology (KIT) and the Libraries of the Purdue University. The German partners are actively involved in the German Initiative for Network Information (DINI) and current research data management activities. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

Updated> Entrepreneurial Resources

<http://www.EntrepreneurialResources.info/>

The above is the freely available white paper link dataset compilation of the [Entrepreneurial Resources](#) Subject Tracer™ information resource by [Marcus P. Zillman, M.S., A.M.H.A.](#). It is now a 117 page .pdf document 697KB listing the latest and greatest online resources for the Entrepreneur! [**Updated with all links validated and hundreds of new links added on November 4, 2015**] Other white papers are available by clicking [here](#).

The Concord Consortium - Revolutionary Digital Learning for Science, Math and Engineering

<http://concord.org/>

They are a non-profit educational technology laboratory for science, mathematics and engineering. Their pioneering work brings technology's promise into reality for education. The Concord Consortium is designed for Researchers and Teachers. This will be added to [Education and Academic Resources](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™.

Learn Everything From A Single Space

<http://mylearnpath.com/>

You want to learn something? Start a Path then Collect the Steps and bring in the resources you learn from (videos, articles, online courses, documents and pdf's). Then access everything from a single place using learning sprints (learning based on the time you have)and create Your Path (every step you took while learning)that will allow you to: a) Share - Exactly how you have learned something; b) Track - The progress you have made; and c) Highlights - Keep everything important. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Tutorial Resources](#) Subject Tracer™.

USA Trade Online - The Official Source of Trade Statistics

<https://usatrade.census.gov/>

Provided by the U.S. Census Bureau, USA Trade Online is a dynamic data tool that gives users access to current and cumulative U.S. export and import data. With multiple data sets and capabilities, USA Trade Online can assist different types of customers from a wide range of industries and fields. Manufacturers and other businesses wishing to expand their business globally can utilize USA Trade Online to identify new markets, evaluate existing markets, and perform other market research tasks. The data available through this tool can also support economists in interpreting economic news and performing academic research, as well assist governments and federal agencies in analyzing domestic and international trade policies. This powerful software allows users to create customized reports and colorful charts detailing international trade data at different levels. All data are updated each month with the release of the latest U.S. International Trade in Goods and Services Report. On October 15, 2015, access to USA Trade Online will be FREE to all customers. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This will be added to [International Trade Resources](#) Subject Tracer™.

InquirySpace

<http://concord.org/projects/inquiryspace>

Students should learn science by doing science. They should select their own question, design and execute a study, draw conclusions based on their data, and communicate their findings. InquirySpace provides ideas, approaches, and technologies to make this

Ethereum Frontier Release - A Decentralized Software Platform

<https://www.ethereum.org/>

Ethereum is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third party interference. Ethereum is how the Internet was supposed to work. Ethereum was crowdfunded during August 2014 by fans all around the world. It is developed by ETHDEV with contributions from great minds across the globe. Frontier is the first release of the Ethereum project, tailored specifically for developers. It's a command line only interface with a Javascript environment that allows building, testing, deploying and using decentralized applications on the Ethereum blockchain. Exploring the Frontier presents vast opportunities, but also many dangers, and is not for everyone. This will be added to [Bot Research](#) Subject Tracer™. MIRI - Machine Intelligence Research Institute

<https://intelligence.org/>

The Machine Intelligence Research Institute is a research nonprofit focused on the mathematical underpinnings of intelligent behavior. Our mission is to develop formal tools for the clean design and analysis of general-purpose artificially intelligent systems, with the intent of making such systems safe and reliable when they are developed. The field of AI has a reputation for overselling its progress. In the “AI winters” of the late 1970s and 1980s, researchers’ failures to make good on ambitious promises led to a collapse of funding and interest in AI. Although the field is now undergoing a renaissance, discussion of the possibility of human-level machine intelligence continues to be restricted largely to the science fiction shelf, for fear of recapitulating our past overconfidence. At the same time, researchers largely agree that AI is likely to begin outperforming humans on most cognitive tasks in this century. Given how disruptive domain-general AI technology would likely be, we believe that it is prudent to begin a conversation about this now, and to investigate whether there are any limited areas in which we can predict the technology’s effects. The most common position among MIRI’s researchers is that the strategic questions relevant to future advances in AI have yet to be adequately investigated. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™.

Occupational Employment Statistics (OES)

<http://www.bls.gov/oes/>

The Occupational Employment Statistics (OES) program produces employment and wage estimates annually for over 800 occupations. These estimates are available for the nation as a whole, for individual States, and for metropolitan and nonmetropolitan areas; national occupational estimates for specific industries are also available. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Business Intelligence Resources](#) Subject Tracer™. Flow - Single Place For Your Team To Chat, Discuss tasks and Plan Projects

<https://www.getflow.com/>

All your team's communication, clear and organized. Flow is a single place for your team to chat, discuss tasks, and plan projects — all the important stuff that helps you get more done. When your team gets talking, good things happen. Flow makes reaching out to a teammate or having a quick discussion effortless and fun. Just wait and see how much everyone loves you for not sending an email. Know what's happening without even asking. Spending too much time playing catch up? When all your tasks, files, deadlines, and discussions live in Flow, you'll always know what everyone's working on. Work from anywhere, on all your devices. It doesn't matter if you're eating breakfast at home, working late at the office, or clinging to wi-fi in some far off land. Your team comes with you everywhere. Flow is 100% free until you know it's right! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Teen Internet Safety Guide

<http://www.usdish.com/teen-internet-safety>

Just a few years ago, the Internet was connected to stationary desktops, which made monitoring kids' activity on the web relatively easy. But now, teens have access to always-on Internet connections that are tucked into their back pockets and move with them wherever they go. Keeping a watchful eye on your teen's Internet use is no longer as easy as it once was. In this guide, they will give you tips, techniques and advice about how to protect your teen from a whole host of dangers, including fraud and identity theft. This guide will help you teach your teen safe social media behavior and help him or her avoid cyberbullying. Plus, you'll discover the best ways to safeguard your teen from the threats posed by email, instant messenger, and chat rooms. This will be added to [Privacy Resources](#) Subject Tracer™.

qwikLABS® - Real Training, Real Time, Real Environments

<https://qwiklabs.com/>

They offer a complete end-to-end cloud platform, for hands-on software training lab creation, management and consumption. It is delivered anywhere, anytime, on any device, on-demand. In a short period of time, qwikLABS® has achieved worldwide usage and scale, delivering tens of thousands of lab environments every fiscal quarter, around the globe. We are pleased to have been chosen by Amazon Web Services to provide all AWS hands-on training for all of its customers, partners and employees globally. Get hands-on practice working with cloud technologies and software. Train on-demand and learn at your own pace. Choose from a variety of Learning Quests to guide

Smithsonian Research Online

<http://research.si.edu/>

Smithsonian Research Online is a set of services to the research community both within and outside the Smithsonian Institution. Managed by the Smithsonian Institution Libraries, the program assists in capturing the research output of Smithsonian scholars and making it available to Institutional management as well as scientists and historians world-wide. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

DPLA Hub Model - Content and Service Hubs

<http://dp.la/info/hubs/>

The DPLA hubs model is establishing a national network out of the over forty state/regional digital libraries and myriad large digital libraries in the US, bringing together digitized and born-digital content from across the country into a single access point for end users, and an open platform for developers. The model supports or establishes local collaborations, professional networks, metadata globalization, and long-term sustainability. It ensures that even the smallest institutions have an on-ramp to participation in DPLA. DPLA content hubs are large libraries, museums, archives, or other digital repositories that maintain a one-to-one relationship with the DPLA. Content hubs, as a general rule, provide more than 200,000 unique metadata records that resolve to digital objects (online texts, photographs, manuscript material, art work, etc.) to the DPLA, and commit to maintaining and enhancing those records as needed. DPLA service hubs are state, regional, or other collaborations that host, aggregate, or otherwise bring together digital objects from libraries, archives, museums, and other cultural heritage institutions. State and regional hubs agree to collect content that describes their local history, but also content about the US broadly and, when available, international topics. Each service hub offers its partners services that range from professional development, digitization, metadata creation or enhancement, to hosting or metadata aggregation. They may also provide community outreach programs to increase users' awareness of digital content of local relevance. Service hubs provide DPLA with their partners' unique metadata records that resolve to digital objects (online texts, photographs, manuscript material, art work, etc.) through a single data feed, such as OAI-PMH. They serve as the point of contact for the maintenance and enhancement of metadata records. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

Census Business Builder

<http://www.census.gov/data/data-tools/cbb.html>

The Census Business Builder: Small Business Edition allows small business owners a way to easily navigate to and use key demographic and economic data to help guide their research into opening a new or expanding their existing business. These key data includes the most recent and/or relevant data that Census provides that are useful to small business owners. Key features include: a) Easy to use menus to select your type of business and potential business location; b) An interactive map that allows selection of the area to explore for business opportunities, including comparisons to neighboring areas; and c) Dynamically generated, downloadable and printable business county- and city-level reports (including trend charts) that can be easily incorporated into your business plan and research. NCDD Resource Center

<http://ncdd.org/rc/>

The National Coalition for Dialogue & Deliberation (NCDD) is "a hub, facilitative leader, and clearinghouse for a community of thousands of innovators." The site is packed with thousands of resources and covers best practices for the instigation of dialogue, deliberation, discussion, and the sharing of authentic ideas. The NCDD Beginner's Guide includes clarifying sections about what Dialogue and Deliberation (D&D) is, as well as a Quick Reference Glossary, and advice on how to run a D&D program, among other useful information. The Best-of-the-Best Resources tab narrows down the nearly 3,000 resources available on the site. From there, the search function (conveniently located under the phrase, "I'm Looking For...") allows readers to search the site by Resource Type (e.g. Assessment Tools, Big Picture Tools, Case Studies & Stories, Participatory Practices, and many others). Above all, these resources are designed to help people learn to facilitate meaningful discussion. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Difference Between

<http://www.differencebetween.net/>

What, exactly, is the difference between dark matter and dark energy? How about the difference between Growth and Development Economics? Or the difference between Wahabism and Salafism? For readers who are fascinated by questions like these, the highly erudite and entertaining site, Difference Between, will present a cornucopia of interesting answers. Readers will find much to appreciate in the categories of Technology, Objects, Science, Language, Business, and, of course, Miscellaneous. Additionally, each category features subcategories. For instance, Miscellaneous divides further into Religion, Culture, Politics, Entertainment, and several others. The Google-powered search function may be used to locate differences related to readers particular interests. For example, typing in "land grant" returns articles on the differences between public and private universities, differences between easements and rights of way, and differences between Nymphs and Fairies. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Instapaper - Save Anything Read Anywhere

<https://www.instapaper.com/>

The advantage of Instapaper, one of a number of read-later solutions currently available on the market, is that it is designed to be read. The visual field is streamlined and text-based. There are no frills, ads, or distractions. So, for readers who want a system to store articles for later reading, and who don't want the complications of some of the other read-later options, Instapaper is a good find. It is also free. Sign up requires no more than an email and password. Next, readers will receive an email with links to download a browser extension for either Google Chrome or Safari, as well as links to download the free app for iOS or Android devices. From there, simply tap a button to save articles and then read later. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Regional Economic Research Institute

<http://www.fgcu.edu/cob/eri/>

The Regional Economic Research Institute (RERI) was developed to perform economic research, analysis, and forecasting for both the region and the individual economic development organizations in this area. The structure of the RERI includes partnership with the Southwest Florida Regional Planning Council and the area economic development organizations. The director of RERI is Dr. Christopher Westley, Professor of Economics in the Lutgert College of Business. Beginning with the first quarter of 2012, RERI has issued the Lee County Business Climate Survey Report. This quarterly report is a result of a partnership between The Horizon Council and Florida Gulf Coast University. The Horizon Council is a public-private board established in 1991 to advise the Lee County Board of Commissioners on economic development issues. The Report summarizes the results of the Executive Business Climate Survey. It provides a view of the local economy, based on responses from senior executives of companies from a broad range of industries across the county. In addition to this quarterly report, RERI continues to issue a monthly report: Regional Economic Indicators, which analyzes a wide range of economic data from the 5-county region of Southwest Florida. It also includes National economic data of interest. The monthly Indicators report has been issued since early 2007. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Five Second Test - Landing Page Optimization For your Mocks and Wireframes

<http://fivesecondtest.com/>

Fine tune your landing pages and calls to action by analyzing the most prominent elements of your design. Works as follows: a) You upload a design - Upload your design, set some questions you want answered and wait for the feedback to roll in; b) Users complete your test - Testers have five seconds to view your image and must then answer the questions you have set; and c) They present your results - They collect the responses for you, extract the frequent keywords and then present the data with beautiful graphs. Five second tests help you understand people's first impressions of your designs. By finding out what a person recalls about your design in just 5 seconds you can ensure that

Wikipedia Recent Changes Map

<http://rcmap.hatnote.com/>

Wikipedia is constantly growing, and it is written by people around the world. To illustrate this, they have created a map of recent changes on Wikipedia, which displays the approximate location of unregistered users and the article that they edit. When an unregistered user makes a contribution to Wikipedia, he or she is identified by his or her IP address. These IP addresses are translated to the contributor's approximate geographic location. A study by Fabian Kaelin in 2011 noted that unregistered users make approximately 20% of the edits on English Wikipedia [edit: likely closer to 15%, according to more recent statistics], so Wikipedia's stream of recent changes includes many other edits that are not shown on this map. You may see some users add non-productive or disruptive content to Wikipedia. A survey in 2007 indicated that unregistered users are less likely to make productive edits to the encyclopedia. Do not fear: improper edits can be removed or corrected by other users, including you! This map listens to live feeds of Wikipedia revisions, broadcast using wikimon. They have built the map using a few nice libraries and services, including d3, DataMaps, and freegeoip.net. This project was inspired by WikipediaVision's (almost) real-time edit visualization. The Wikipedia Recent Changes Map is open source and available on github. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Huginn - Your Agents Are Standing By

<https://github.com/cantino/huginn>

Huginn is a system for building agents that perform automated tasks for you online. They can read the web, watch for events, and take actions on your behalf. Huginn's Agents create and consume events, propagating them along a directed graph. Think of it as a hackable Yahoo! Pipes plus IFTTT on your own server. You always know who has your

Consumer Expenditure Survey (CE)

<http://stats.bls.gov/cex/>

The Consumer Expenditure Survey (CE) program consists of two surveys, the Quarterly Interview Survey and the Diary Survey, that provide information on the buying habits of American consumers, including data on their expenditures, income, and consumer unit (families and single consumers) characteristics. The survey data are collected for the Bureau of Labor Statistics by the U.S. Census Bureau. The CE is important because it is the only Federal survey to provide information on the complete range of consumers' expenditures and incomes, as well as the characteristics of those consumers. It is used by economic policymakers examining the impact of policy changes on economic groups, by the Census Bureau as the source of thresholds for the Supplemental Poverty Measure, by businesses and academic researchers studying consumers' spending habits and trends, by other Federal agencies, and, perhaps most importantly, to regularly revise the Consumer Price Index market basket of goods and services and their relative importance. The most recent data tables are for 2014, and were made available on September 3, 2015. See Featured CE Tables and Economic News Releases sections on the CE home page for current data tables and news release. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Hail - Easily Create, Publish and Share Engaging Content

<https://get.hail.to/>

Think Tank Search - Custom Search for More Than 590 Think Tanks and Research Centers

http://guides.library.harvard.edu/hks/think_tank_search

Think Tank Search is a custom Google search of more than 590 think tank websites. For the purposes of this search, think tanks are defined as institutions affiliated with universities, governments, advocacy groups, foundations, non-governmental organizations, and businesses that generate public policy research, analysis, and activity. Inclusion is based upon the relevancy of subject area to HKS coursework and scholarship, the availability of the think tank's research in full-text on the website, and the think tank's reputation and influence upon policy making. The list represents a mixture of partisan and non-partisan think tanks. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper. PRISONER - Framework for Running Ethical and Reproducible Social Network Experiments

<http://prisoner.cs.st-andrews.ac.uk/>

Consent goes beyond signing a form. PRISONER helps you run studies which communicate clearly to participants how your experiment handles their data, and has built-in support for minimising and sanitising their data. Automatically generate meaningful consent forms and supporting documentation for IRB approval, and help us raise the standard of social network research. Collecting data from social network sites is easy. Doing this in a way others can reproduce tomorrow, or in five years, is hard. PRISONER helps you archive and share your experimental workflows and data. Sharing is caring, and it helps your work get the citations it deserves. PRISONER is free and open source. We currently support Facebook, Twitter, and Last.fm, but it's easy to add support for other social network sites. Support the community by contributing support for other services, more privacy-preserving transformations, and other extensions to the framework. PRISONER is a project of researchers at the School of Computer Science at the University of St Andrews, supported by the EPSRC. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

place of deposit, available for others to harvest. They have tried to make OpenDepot.org easy or researchers and authors to use. In technical terms, OpenDepot.org does the following: a) accepts deposit of e-prints from researchers at institutions that do not currently have an Institutional Repository (IR). The principal target is postprints, that is articles that have been peer-reviewed and accepted for publication; b) as Institutional Repositories (IRs) are established, OpenDepot.org will support the transfer of relevant content to help populate those new IRs; c) an OAI-compliant interface, so, like other open access repositories, its contents is available for harvesting; and d) re-directs depositors to an appropriate Institutional Repository (IR). Like the Depot, which is an earlier version of OpenDepot.org, they use OpenDOAR and ROAR as the source for information about available repositories worldwide, and they use ROMEO as a source of information about publisher policies. The re-direct function uses technology being developed alongside the JISC-funded OA Repository Junction project, which is providing machine-to-machine mechanism for deposit into multiple institutional repositories. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

Registry of Open Access Repositories (ROAR)

<http://roar.eprints.org/>

The aim of ROAR is to promote the development of open access by providing timely information about the growth and status of repositories throughout the world. Open access to research maximizes research access and thereby also research impact, making research more productive and effective. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

APA Style Guidelines

<https://owl.english.purdue.edu/owl/resource/560/01/>

APA (American Psychological Association) style is most commonly used to cite sources within the social sciences. This resource, revised according to the 6th edition, second printing of the APA manual, offers examples for the general format of APA research papers, in-text citations, endnotes/footnotes, and the reference page. For more information, please consult the Publication Manual of the American Psychological Association, (6th ed., 2nd printing). This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Source Guides Renewable Energy Directory

<http://www.sourceguides.com/>

A comprehensive renewable energy business directory and buyers guide to more than 27,000 renewable energy businesses and organizations worldwide. Locate renewable energy businesses by geographic location, by product type, by business type and by name, or search for renewable energy businesses using keywords. The Source Guides have been providing comprehensive up-to-date information on renewable energy businesses worldwide since 1995. They add more than 100 new renewable energy businesses each month. To help you locate renewable energy businesses, they categorize the renewable energy companies by where the renewable energy business is located, by the types of products the renewable energy business manufactures, sells or services, and by the types of business services the renewable energy companies provide. You can also search for renewable energy businesses using keywords or browse the entire list of 27,000 renewable energy businesses alphabetically by business name. Stay up to date on the latest renewable energy news by browsing our renewable energy news pages which are updated every 4 hours. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

Stock Image Finder

<http://www.modernlitho.com/stock-image-finder/>

Having trouble finding good images for your print or web project? Tired of bouncing from website to website? Our handy image finder tool lets you search several sites from one handy location. Type your search term in the input box, select the photo site of your

Open Access Repository Junction (OA-RJ)

<http://edina.ac.uk/projects/oa-rj/index.html>

This project builds on and enhances previous work carried out as part of the JISC-funded Depot project. One of the secondary objectives of the Depot was to devise an unmediated (computer-assisted) reception and referral service, called Repository Junction (RJ), which collected information in order to redirect users to existing Institutional Repository (IR) services. This activity supported the principal task of the Depot, which was to provide a repository for author/researchers at institutions that did not yet have an IR. Within the Depot, the RJ component carried out the following functions: i) Working out the institutional affiliation of potential depositors (e.g. by IP lookup; ii) Query of external directories to locate an appropriate location for deposit; and iii) Re-direction of user to the most appropriate repository, given a positive match. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

National STEM Centre: Technology Resources

<http://www.nationalstemcentre.org.uk/elibrary/technology/>

While Britain's National Stem Centre website is loaded with resources related to science, technology, engineering, and math, the technology section is particularly noteworthy. Here readers will find 1,353 unique resources. Topics are aimed at different age groups beginning in elementary school and ending in high school. Subjects include everything from engineering to the culinary arts and usually include multiple resources. For instance, Water for the World, a series of activities designed for high school students, includes a four-minute video, teacher's notes and a technical brief (both in PDF format), and a PowerPoint presentation. One caveat: the site requires a free sign up that takes several minutes and asks for information regarding one's roles (e.g. teacher, administrator, etc.) and the institution for which one works. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Education and Academic Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015.

Medical Dictionary: Comprehensive Medical Terminology Search

<http://www.medilexicon.com/medicaldictionary.php>

While this visually simple service leaves something to be desired in terms of aesthetics, it is a powerful tool for readers who may sometimes find themselves befuddled by the multitude of terminologies in the medical world. Readers who have a confusing medical word or phrase that they want to understand may simply type or paste it into the search box. For instance, entering "kainic acid" returns the explanation that this substance is "a glutamate analogue that exhibits powerful and long-acting excitatory and toxic activity on neurons." The search engine also allows readers to select "fuzzy search" when they are

not certain how to spell a term. This activates an Internet-wide search that clarifies the search. In addition, readers may scout the dictionary by letter, which can make for hours of entertainment as one scrolls through definitions of C factors, C fibers, C genes, C group viruses, and so on. This will be added to [Healthcare Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

AppsBar - Free Mobile App Builder

<http://www.appsbar.com/>

For readers who would like to design simple apps for their small businesses, classrooms, nonprofits, or other groups, AppsBar can be a helpful service. Readers will want to begin by creating a free account. From there, it can be useful to explore the various templates and code libraries from which one may create a customized app. Typically, it takes three to four hours for first-time users to create an app using AppsBar. However, most users find that the second time around takes about half as much time. While the service is a little rigid, and some users report wanting more flexibility, for ease of use, AppsBar is hard to beat. This will be added to [Script Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

Buffer - A Smarter Way to Share on Social Media

<https://buffer.com/>

For those readers who post consistently on various social media such as Facebook, LinkedIn, Instagram, Twitter, Pinterest, and Google+, Buffer can add some much-needed organization. Put simply, Buffer automates the timing of social media posts so that a user can compose a slew of updates in a short period of time, and then add them to the Buffer queue. Forthwith, Buffer will check the overall reposting patterns of the various social media services, and post one's updates at what it deems to be appropriate times, thereby attempting to increase likes, reposts, and replies. When readers are skeptical of Buffer's suggestions, they may override and time posts themselves. For readers who take their social media presence seriously, Buffer can expedite the process. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015.

R: The R Project for Statistical Computing

<https://www.r-project.org/>

While R might not look like much at first glance, data analysts all over the world use the free, open-source data analysis software to run statistics on everything from psychology research to the stock market. Created in 1996 by two statistics professors in New Zealand, the programming language is comparatively user-friendly especially when paired with R Studio (<https://www.rstudio.com/>), a free downloadable template. Admittedly, learning the language takes work. However, there are a number of sites

around the web with tutorials and tips, as well as easily locatable R help books, online support groups, and videos on YouTube and Vimeo. For data analysts who are tired of the limitations and costs of SPSS and other corporate programs, R is an extremely powerful and fluid alternative. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

National STEM Center

<http://www.nationalstemcentre.org.uk/>

STEM is an acronym for science, technology, engineering and mathematics. STEM subjects are integral to the UK's success: the UK is the world's sixth largest manufacturer, engineering turnover is around £800 billion per year, and whilst the UK makes up only 1% of the world's population, we produce 10% of the world's top scientific research. Despite this, it is remarkable to note that even though STEM graduates have the potential to earn amongst the highest salaries of all new recruits, employers are finding it difficult to recruit STEM skilled staff. And alongside our need for a skilled STEM workforce, it is crucial that all young people, regardless of their future career pathway, have the STEM knowledge and skills they need to be an informed citizen in an increasingly scientific and technological society. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Student Research Resources](#) Subject Tracer™.

Data Transparency Coalition

<http://www.datacoalition.org/>

The Data Transparency Coalition advocates on behalf of the private sector and the public interest for the publication of government information as standardized, machine-readable data. They believe governments should adopt non-proprietary data standards for the information they generate or collect, and publish such information as machine-readable data, especially with regard to their spending, regulatory, legislative, and judicial activity. The transformation of public information generated and received by governments from disconnected documents into interoperable open data will: a) Strengthen democratic accountability by making public data more accessible for citizens and watchdogs; b) Enhance government management by improving data sharing and analytics capabilities; and c) Reduce compliance costs by automating reporting processes. Data transparency also stimulates tech-sector innovation and creates jobs. The Data Transparency Coalition, on behalf of both the private sector and the public interest: 1) Advocates legislative and regulatory mandates for data standardization and publication; 2) Educates government leaders, private-sector innovators, and the public on the benefits of data transparency; and 3) Convenes stakeholders to collaboratively design policies and build technology solutions that will drive the data transparency transformation. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Getting a “Quick Fix”: First-year College Students’ Use of Wikipedia by *John C Garrison*

<http://firstmonday.org/ojs/index.php/fm/article/view/5401>

Abstract:

College students use Wikipedia frequently, despite educators’ highly divided opinions about it, and so it is important to understand how and why they are using it. This study followed a first-year class of undergraduate, liberal arts students over the course of their first semester to see how they used, were influenced about, and rated Wikipedia. Data was collected via two surveys of the first-year class, as well as focus groups and a survey of college faculty. This study found that first-year students are uncertain about the variety of ways to use information sources like Wikipedia, and that a direct and balanced approach to this area from instructors may lead to better outcomes than strict prohibition or silence.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
