V14N10

October 2016

Welcome to the V14N10 October 2016 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**

**Awareness Watch™ Spotters**

**Awareness Watch™ Book/Paper/Article Review**

**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

## **Awareness Watch™ Featured Report**

This month's featured report covers my **eReference Library Link Dataset Toolkit 2017** and represents the latest eReference resources and sources for discovering new knowledge and understanding the latest happenings and eReference sites on the Internet! The eReference world is rapidly changing as transparency, big data and the ability to access data is all happening now and everyone will benefit from all these new and exciting eReference sources. These eReference sources are constantly updated by my Subject Tracer™ Information Bots and the latest new eReference resources are always available from the following URL:

<http://www.eReferenceLibrary.com/>

This is one of the fastest growing and constantly changing areas for eReference on the Internet and these new resources and sources will help to keep you current and up to date. This library will also help you to discover the many pathways available to you through the Internet to find the latest eReference resources, sources and sites.

### **Vizala - Online Economics, Market Research, Demographic and Industry Database** <https://vizala.com/>

Vizala is an online database that is completely free and open. It combines economics, market research, demographic, and industry data from many different sources and organizes the data for specific areas of interest. Vizala also provides tools that allow you to customize any view of data with filtering and sorting options. You can then save, share, or export any of those customized views. Vizala aims to be the internet's most useful database for country, demographic, social, and economic information. Instead of just providing answers, our robust analytics allow for in-depth analysis and provide a complete picture of your topic of interest. Vizala only uses data from trusted sources and includes links to the original source for maximum transparency. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Reference Resources](#) Subject Tracer™. ### **SOLID - Social Linked Data** <https://solid.mit.edu/>

Solid is an exciting new project led by Prof. Tim Berners-Lee, inventor of the World Wide Web, taking place at MIT and the Qatar Computing Research Institute. The project aims to radically change the way Web applications work today, resulting in true data ownership as well as improved privacy. Solid (derived from "social linked data") is a proposed set of conventions and tools for building decentralized social applications based on Linked Data principles. Solid is modular and extensible and it relies as much as possible on existing W3C standards and protocols. At a glance, here is what Solid offers:

- a) True data ownership - Users should have the freedom to choose where their data resides and who is allowed to access it by decoupling content from the application itself;
- b) Modular design - Because applications are decoupled from the data they produce, users will be able to avoid vendor lock-in by seamlessly switching the apps and personal data storage servers, without losing any data or social connections;
- c) Reusing existing data - Developers will be able to easily innovate by creating new apps or improving current apps, all while reusing existing data that was created by other apps.

### **Unpossib.ly - Code Solutions to Impossible Challenges**

<http://unpossib.ly/>

The best ideas don't just pop into your head in the shower. Well okay maybe they sometimes do. But how about coming up with awesome stuff deliberately, all the time? How you say? By using their mind-stretching formula! Impossible challenge + Immoveable deadline + The right crew = Gold. Using Unpossib.ly to bring these elements together, it's time to go make a prototype! Impossible isn't ... Most people fear the impossible. But not you. You think stuff that seems impossible is a great starting point for genuine innovation. You relish in the challenge of impossible limitations and you know that even partially overcoming it could lead to something great and usable by many. Execution is everything. "Lame. I thought of that 2 years ago" - Everyone when Uber came out. And they believe you. But it doesn't matter. Because they made it and you didn't. They don't just want to be another ideas website where good ideas are left to rust on a shelf. They want to build a community where projects get finished and their impact can change the world. ### **Voyant - See Through Your Text**

<http://voyant-tools.org>

Created by Stefan Sinclair at McGill University and Geoffrey Rockwell at the University of Alberta, Voyant is an online tool for analyzing texts. On this website, users can enter text in a variety of forms, including URL links, plain text, Hyper Text Markup Language (HTML), Extensible Markup Language (XML), Microsoft Word, Rich Text Format (RTF), and Portable Document Format (PDF). Voyant will then produce a word cloud to represent the frequency that each word appears in the text. By clicking on a single word,

users can view an analysis of where in the text that word appears in the Trends box. To analyze or compare multiple documents, users can select Modify under the Documents tab to add additional texts. One notable strength of Voyant, is the various ways it allows visitors to examine written material. While the Trends visualization tool helps visitors analyze where certain words and phrases appear in texts, the Bubble Lines feature allows visitors to compare words across two different texts. A more detailed explanation of how to use and make use of Voyant can be found at <http://docs.voyant-tools.org>. ### Nature Nanotechnology

<http://www.nature.com/nnano/index.html>

Since 2005, *Nature Nanotechnology*, part of the *Nature* consortium, has published articles about all aspects of nanoscience, including nanomedicine, nanobiotechnology, and environmental issues. Visitors can read current articles or search through the journal's complete archives. In addition, readers will find sections on Letters, Reviews, Perspectives, and In the Classroom. In one recent Perspectives piece, two scientists argue that scientists should develop a more systems-based approach to studying nanoparts, examining how these parts interact to form a "nanomachine." Meanwhile, a recent In the Classroom feature entitled, "A Tale of Two Disciplines," highlights the perspective of "physician-scientists" Wen Jiang, who describes how he has benefitted from pursuing both nanobiology and medical school. ## **OutWit Hub**

<https://www.outwit.com/products/hub/>

OutWit Hub explores the depths of the Web for you, automatically collecting and organizing data and media from online sources. OutWit Hub breaks down Web pages into their different constituents. Navigating from page to page automatically, it extracts information elements and organizes them into usable collections. Features include: a) A Powerful Tool For Everyone - With simple intuitive features as well as sophisticated scraping functions and data structure recognition, the program covers a broad range of needs. If OutWit's automated scraping is destined to somewhat advanced users with specific extraction needs, the design of the application makes it accessible to anyone. In a single click in the side panel, you change the view and see the extracted data, documents or images; b) Grab & Export Web Content - The contents extracted from a Web page are presented in an easy and visual way, without requiring any programming skills or advanced technical knowledge. Users can easily extract links, images, email addresses, RSS news, data tables, etc. from series of pages without ever seeing the source code. Extracted data can be exported to CSV, HTML, Excel or SQL databases, while images and documents, are directly saved to your hard disk; and c) A Broad Range of Personal and Professional Applications - OutWit Hub is a generic tool, with a wide spectrum of usage, ranging from ad hoc data extraction on specific research topics to daily extensive grabbing of online data to populate merchant Web sites or to perform recurrent SEO analysis. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This has been added to [Web Data Extractors](#) white paper.

## DataSearch - Prototype Research Data Engine

<https://datasearch.elsevier.com/>

DataSearch is a prototype research data search engine, developed by Elsevier's Research Data Management team. They are interested in exploring what a search engine for research data would look like (as opposed to a web search engine or a document search engine), and are talking with users and data providers about their needs and interests. They are indexing images, tables and supplementary data from (Elsevier or Open Access) content sources, and are considering these to be research data components. They are also indexing a series of domain-specific repositories, as well as non-domain specific ones. As of June 2016, they are (completely or partially) indexing the following content sources: a) Tables, figures and supplementary data associated with papers in ScienceDirect, arXiv and PubMed Central; and b) NeuroElectro, Dryad, PetDB, ICPSR, Harvard Dataverse and ThermoML at NIST Thermodynamic Research Center (TRC). They hope to add more content sources in the future. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

## Clearbit: Supercharge Gmail

<https://connect.clearbit.com/>

Find employee emails for any company. Our proprietary data set is unrivaled. Features include: 1) Instant Discovery - Simply type in a company name and a target role to discover email addresses — directly within Gmail's compose window; and 2) Contacts Archive - Clearbit also surfaces your existing contacts alongside the ones it discovers. Never hunt for a forgotten email again. See contextual data when someone emails you: a) How many people work at their company? Other tools only show you generic info. Clearbit goes beyond by providing a tremendous amount of proprietary data; b) How much money has their company raised? Save time and avoid repetitive research. We bring all the relevant details right into Gmail; and c) What is this person's exact role? Our data is updated monthly. No more stale contacts, vague data, or guessing. Be in charge with more information. This will be added to [Entrepreneurial Resources](#) Subject Traver™.

## Hybrid Pedagogy

<http://www.digitalpedagogylab.com/hybridped>

Hybrid Pedagogy Inc. is a non-profit that "focuses on the implementation of critical digital pedagogy in education at all levels" and seeks to "prepare learners, educators, librarians, and administrators to teach, collaborate, and think with digital technology." To further these aims, visitors to the organization's website will find the open-access peer-reviewed journal, Hybrid Pedagogy, as well as the Digital Pedagogy Lab, where there are blog posts, podcasts, and harvested tweets. Hybrid Pedagogy provides a venue for voices in education that might otherwise be marginalized to be published and peer reviewed. For example, academics in the throes of late-summer syllabus writing may be interested in a 2014 article, "Syllabus as Manifesto: A Critical Approach to Classroom Culture." The site can be a little tricky to navigate, and it's hard to tell what portions of the content the site search covers - but a Google search on a keyword or article title + hybrid pedagogy works perfectly. In 2015 and 2016, Digital Pedagogy Lab hosted 3- and 5-day Summer Institutes at the University of Wisconsin-Madison, University of Mary Washington in Virginia, and in Canada at the University of Prince Edward Island. For those unable to attend in person, summaries and comments on talks at the 2016 Institute can be found on the website. This will be added to [Education and Scholar Resources](#) Subject Tracer™. ## Internet Research Task Force

<https://irtf.org/>

The Internet Research Task Force (IRTF) promotes research of importance to the evolution of the Internet by creating focused, long-term Research Groups working on topics related to Internet protocols, applications, architecture and technology. The Internet Research Task Force (IRTF) focuses on longer term research issues related to the Internet while the parallel organization, the Internet Engineering Task Force (IETF), focuses on the shorter term issues of engineering and standards making. The IRTF is a composed of a number of focused and long-term Research Groups. These groups work on topics related to Internet protocols, applications, architecture and technology. Research Groups have the stable long term membership needed to promote the development of research collaboration and teamwork in exploring research issues. Participation is by individual contributors, rather than by representatives of organizations. The IRTF is managed by the IRTF Chair in consultation with the Internet Research Steering Group (IRSG). The IRSG membership includes the IRTF Chair, the chairs of the various Research Groups and other individuals ("members at large") from the research

### **ARIADNE Foundation**

<http://www.ariadne-eu.org/>

The ARIADNE Foundation is a not-for-profit association that aims to: a) Carry out basic and applied research that will improve creation, sharing and reuse of knowledge through the use of technology; b) Develop and deploy methodologies and software that will provide flexible, effective and efficient access to large-scale knowledge bases; c) Apply the results of its research and development activities to help preserve multicultural and multilingual knowledge assets and collections; and d) Explore how these research and development results can be adopted and sustained so that they support educational and research communities. To support this goal, ARIADNE has created a standards-based technology infrastructure that allows the publication and management of digital learning resources in an open and scalable way. The vision that drives the continuous development of this infrastructure is to provide flexible, effective and efficient access to large-scale educational collections in a way that goes beyond what typical search engines provide. ARIADNE was initially set up by a network of European stakeholders, expanding now into a global network of member institutions sharing the same vision. ARIADNE is a member of the Global Learning Objects Brokering Exchange (GLOBE) Alliance and contributing towards the development of a global learning infrastructure that can be accessible from all. ### **Tehabo - Create An Employee Handbook**

<https://tehabo.co/>

What are the main reasons for having an employee handbook? a) Text is better than voice - The time it takes you to read through a handbook is a lot faster than if your manager comes in and talks for hours about what's what and who's who. With a written guide you can get acquainted with everything and anything in your own comfortable pace; b) You can respect other people's time - and don't have to rely on anyone - It's easier to read about your company's procedures and policies rather than to wait for someone to get out of a meeting, or worse - interrupt them while they're in the middle of their focus time; c) You can attract top talent - Show people what it's like to work with you. By being open and honest about your policies and procedures, interested candidates might decide that they'd rather pick you instead of another place to apply; d) There's no I in teamwork - If you get to know how other parts of the company work and what the company's goals and vision are, you are empowered to make better decisions and work with other teams for a holistic way to make products. A handbook can go a long way further than a company retreat every now and then; e) Onboarding new employees as as painless as possible -

New employees can learn, check and find answers to frequently asked questions like holidays, absences, reviews, and anything else you might want to include. They can get up to speed with your company's basics a lot faster - and integrate more comfortably when they always have the most important info right at their fingertips; and f) An open dialogue improves processes and cuts excess ones - When you let people talk about processes and protocols, it helps to know what the current ones definitely are and how they're defined. That way employees can offer suggestions and tips on how to improve them and make them more efficient. A frictionless flow is the best way to boost morale, loyalty, and overall productivity. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## **Awarenesswatch™ Paper Review**

**Securing Private Data Sharing In Multi-Party Analytics** by *Gowtham Bellala, Bernardo Huberman*

<http://firstmonday.org/ojs/index.php/fm/article/view/6842>

### **Abstract:**

A general class of problems arises when datasets containing private information belong to multiple parties or owners and they collectively want to perform analytic studies on the entire set while respecting the privacy and security concerns of each individual party. We describe a solution to this problem in the form of a secure procedure for data mapping and/or linkage, which allows to identify the correspondence between entities in a distributed dataset. In contrast to existing methods this solution does not require either a trusted or semi-trusted third party, while being simple, efficient and scalable for both large datasets and number of parties.

## **Subject Tracer™ Information Blogs**

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
