

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V14N11

November 2016

Welcome to the V14N11 November 2016 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers two areas: **Finding People Resources and Sites 2017** and **Finding Experts By Using the Internet 2017**. These sites, resources and tools bring together all the latest information on each of the subjects from the Internet. These resources will make an excellent bookmark for online finding people and finding experts and to develop a critical path and network that will guide you through all the latest happenings in these areas! These resources will also aid you in the further development of your research and investigation for academic, scholarly, entrepreneurial and personal utilization!! Resources for this report were taken from my below Subject Tracers™:

Finding People Resources and Sites 2017

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Finding People Resources and Sites 2017 on the Internet allows you to find those long lost friends through various sites and tools available on the Internet. The below list of sources is taken from my latest Subject Tracer™ Information Blog titled Finding People and is constantly updated with Subject Tracer™ bots from the following URL:

<http://www.FindingPeople.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find those people that you have been looking for.

Finding Experts By Using the Internet 2017

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Finding Experts By Using the Internet 2017 is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. The below list of sources is taken from my Subject Tracer™ Information Blog titled Internet Experts and is constantly updated with Subject Tracer™ bots from the following URL:

<http://www.FindingExperts.info/>

Awareness Watch™ Spotters

Updated> Deep Web Research and Discovery Resources 2016

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2016** and it is now a 52 page 377KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. Currently this has been downloaded over 4,000,000+ times!

October 1, 2016

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 74 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address that can be accessed. It is freely available as a .pdf file (511KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: October 1, 2016].

Other white papers are available by clicking [here](#).

eReference Library Link Dataset Toolkit 2017

<http://www.eReferenceLibrary.com/>

The eReference Library Link Dataset Toolkit 2017 has been completely updated, reviewed with ALL links verified and is now a 67 page freely available white paper link compilation for a selected group of reference resources that are available over the Internet. These resources are designed to be your eReference Library and to give you the latest and greatest reference resources available from the Internet. The eReference Library Link Toolkit 2017 has been created by Internet guru and expert [Marcus P. Zillman](#) who is the Executive Director of the [Virtual Private Library](#) and designed specifically for use on iPads, iPhone, Androids, Smart Phones, and netbooks/laptops. Updates to this toolkit are powered by [Subject Tracer™](#) Information Bots (STIB). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Additional freely available white papers by Marcus P. Zillman are available by clicking [here](#). [**Completely updated including all link validation and new links added October 1, 2016** .pdf 67 pages 465KB]

Dooble Web Browser - Fast, Simple and Secure

<http://dooble.sourceforge.net/>

Fast, simple & secure web browser for all your devices. Features include: a) Bookmarks - Dooble's bookmark system is effectively simple; b) Cookies - An informative display simplifies cookie management; c) Desktop - Dooble includes a delicate desktop. The desktop may serve as a portal to the operating system; d) Download Manager - Dooble contains a friendly download manager. File digests are also included; e) Exceptions - The Web is a vast frontier; f) File Manager - An integrated file manager is an absolute necessity. Drag-and-drop support is included. Operations such as creating directories, deleting entries, and renaming entries are also included. Need to access a file with a specific application? Simply double-click on the file and Dooble shall either launch the assigned application or display an application-selection prompt; g) FTP Browser - Dooble includes an FTP browser. The browser displays both connection information and directory contents; h) History - A history interface is provided. Bookmarking, editing, and searching are just some of the functions included in the History panel; i) Options - Dooble includes advanced and basic options; and j) Web - Legacy and new architectures. AMD, ARM, Alpha, Intel, PowerPC, Sparc. . This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [World Wide Web Reference](#) Subject Tracer™.

Jelly - Search Engine for Busy People

<https://askjelly.com/>

Jelly is a new kind of search engine, without ads, that finds people with experience in the area of your question and delivers helpful answers directly to you. Your questions are kept anonymous whether you create an account or not. Please feel free to ask anything. Jelly uses technology to match your anonymous question with people who have the experience, the opinion, and the will to provide a good answer. Use Jelly anytime. When

you've exhausted researching the web, and you feel awkward asking your social media friends, then you might want to try asking Jelly. Or if you're at a party and don't want to be, "that person on your phone," you can ask quickly and get back to talking with people. Jelly will let you know when you have an answer. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Updated> Drone Resources

<http://www.DroneResources.info/>

My latest Subject Tracer™ is **Drone Resources** and available at the above .pdf and also available through [Business Intelligence Resources](#) Subject Tracer™. This Subject Tracer covers resources and sites for Drones that are available on the Internet. This was updated on October 2, 2016 and is a freely available 17 page 207KB .pdf .

Treehouse Software - Replicate, Integrate, Modernize and Analyze with Ease

<http://treehouse.com/>

When you purchase a Treehouse Software solution, a mature and proven software package and comprehensive documentation are only part of the contents. Also included is the know-how of a company that's been serving enterprises worldwide with industry-leading software products and outstanding technical support for more than 30 years. Treehouse has solutions and people with the expertise to make your project a success, and a track record to prove it. As a global leader in providing data migration, replication, and integration solutions for the most complex and demanding heterogeneous environments, Treehouse offers a comprehensive and flexible portfolio of software and tools for mainframe platforms. Our portfolio also includes feature-rich, accelerated-ROI offerings for information delivery, and application modernization. This will be added to [Tutorial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Vuvuzela.io - Private Chat System That Protects Metadata

<https://vuvuzela.io/>

Vuvuzela is a private chat system that protects metadata. Using Vuvuzela, adversaries will not be able to see who you chat with, when you are chatting, or even if you are chatting at all! To hide metadata, messages are routed through multiple servers, and each server adds noise. This makes the metadata incomprehensible, even to powerful nation-state adversaries. Vuvuzela is being developed at MIT CSAIL. Follow their development on [Github](#). This will be added to [Privacy Resources](#) Subject Tracer™.

Bots, Blogs and News Aggregators 2017

<http://www.BotsBlogs.com/>

Canvas

<https://usecanvas.com>

Canvas is an online collaborative tool that allows individuals to share ideas by editing documents from separate computers. The tool's utilization of Markdown sets this tool apart from other file sharing and collaborative editing devices. As a writing and notetaking tool, Markdown allows users to quickly and easily incorporate special text forms (i.e. bold or italics), bullet points, to-do lists, hyperlinks, or code blocks using only keyboard commands. (To learn more about Markdown, check out the 10-02-2015 edition of the *Scout Report*). Canvas users can invite others to view or edit their document - or "canvas" - by sending an email invitation or by passing along a security key. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. access to high-quality education for everyone, everywhere. Enhance teaching and learning on campus and online. Advance teaching and learning through research. This will be added to [Tutorial Resources](#) Subject Tracer™.

Windscribe - Internet Privacy and Security As It Should Be

<https://windscribe.com/>

Internet was created so people across the globe could have access to any type of information, no matter where they are. As the Internet matured, various entities have tried to put up walls to control who sees what, while at the same time stepping up surveillance practices, which range from trying to sell you things you don't need, to prosecution of ordinary citizens for ambiguous crimes. At Windscribe they believe that what is happening is wrong and fixable. Since the Internet is a product of technology, these problems can be solved by applying other technologies in a smart way. They aim to develop easy to use yet powerful tools, that allow anyone to circumvent censorship, access geographically restricted content, and minimize their exposure to marketers, criminals and surveillance dragnets. Let's bring back the Internet as it was meant to be. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Research Resources](#) Subject Tracer™.

Finding Experts By Using the Internet 2017

<http://www.FindingExperts.info/>

I have just updated my white paper link compilation on **Finding Experts By Using the Internet 2017**. This is now a 24 page .pdf file (244KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [**Completely updated including all links validated and new links added on October 6, 2017 24 pages 225KB .pdf**]. Additional white papers available by clicking [here](#).

ReportValue - Data Visualization and WordPress

<https://reportvalue.com/>

ReportValue includes a) Online Waterfall Chart Tool - This web-based tool is designed for you to easily create waterfall charts. Create and customize your chart in a few clicks and download it (SVG or PNG) or embed it on your own website. You can even share it on a dedicated (private) web page on ReportValue.com; and b) Gauge Plugin for WordPress - Liquid Fill Gauge is a gauge plugin for WordPress, to create beautifully animated gauges or progress bars with a circular design. A set of 23 shortcode attributes are available to customize the gauge. Every gauge is rendered as a separate SVG element and you can insert multiple gauges on the same page. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Keepers Registry

<http://thekeepers.org>

Over the last 25 years or so, the majority of large research libraries have transitioned from owning miles of shelves of bound volumes containing scholarly journal back issues, to subscribing to that same content in digital format. This has made archiving and preserving these digital files, or e-journals, of critical importance to scholars. The Keepers Registry is a collaborative effort committed to doing just that. Currently there are 12 participating agencies, including the Library of Congress, the British Library, Cariniana Network, National Science Library, Chinese Academy of Sciences, and the HathiTrust, among others. The aim of the registry is to make it easier to see which archiving organization is taking responsibility for which e-journals, and to make it possible for librarians and policy makers to more easily identify e-journals that might be at risk. Since the beta version of the registry launched in 2011, over 32,000 journals have been archived by at least one of the participating archiving agencies. Follow The Keepers Registry blog at <http://thekeepers.blogs.edina.ac.uk> for more news and updates. This will be added to [Research Resources](#) Subject Tracer™. Copyright © 2016 Internet Scout Research Group - <http://scout.wisc.edu>

PaddlePaddle - Open and Easy-To-Use Platform for Enterprise and Research

<http://www.paddlepaddle.org/>

PaddlePaddle (PArallel Distributed Deep LEarning) is an easy-to-use, efficient, flexible and scalable deep learning platform, which is originally developed by Baidu scientists and engineers for the purpose of applying deep learning to many products at Baidu. Features include: a) Ease of use - PaddlePaddle is designed to be easy to use. It provides an intuitive and yet flexible interface for loading data and specifying model structure; b) Flexibility - PaddlePaddle supports a wide range of neural network architectures and optimization algorithms. It is easy to configure complex models such as neural machine translation model with attention mechanism or complex memory connection; c) Efficiency - In order to unleash the power of heterogeneous computing resource, optimization occurs at different levels of PaddlePaddle, including computing, memory, architecture and communication.; and d) Scalability - With PaddlePaddle, it is easy to use many CPUs/GPUs and machines to speed up your training. PaddlePaddle can achieve high throughput and performance via optimized communication. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

New On LLRX> Crowdfunding Resources 2016

<http://www.bespacific.com/new-on-llrx-crowd-funding-resources-2016/>

This white paper link dataset compilation by Marcus Zillman focuses on reliable and actionable sources and sites on crowd funding from around the world. For many entrepreneurs in the planning stages or for those already creating startups and seeking to develop monetary sources, crowd funding has become an essential part of a financial game plan. This white paper lists many of these sources in alphabetical order to assist researchers and entrepreneurs to leverage a wide range of opportunities specific to their requirements. This will be added to [Financial Sources](#) Subject Tracer. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [StartUp Resources for the Entrepreneur](#) white paper.

Purdue Online Writing Lab: Job Search Writing

<https://owl.english.purdue.edu/owl/section/6/>

Applying for jobs can be a time-consuming, nerve-racking venture even for the experienced professional. It can be especially daunting for recent graduates who are entering the workforce for the very first time. The Purdue Online Writing Lab (OWL), well known for its helpful writing resources, has created this practical guide to assist with Job Search Writing. Readers will find four sections to explore: Preparing an Application, Job Search Letters, Resumes and Vitas, and Video Resumes. This last section may be of special interest as it discusses the use of video aids for job applications, from planning to filming to editing footage. Readers interested in a more traditional application may appreciate the ample collection of Model Letters or a helpful discussion on resume page length among other great resources. This will be added to [Employment Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Updated> Information Quality Resources 2017 White Paper Link Dataset Compilation

<http://www.InformationQualityResources.info/>

The above is the associated white paper link dataset compilation of the [Information Quality Resources 2017](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#). It is a freely available 17 page .pdf document (196KB) listing the latest and greatest online resources and sites for quality information resources! **Completed updated including all link validation and new links added on October 12, 2016.** Other white papers are available by clicking [here](#).

Followerwonk - Twitter Analytics

<https://moz.com/followerwonk/>

Twitter Analytics: Find, Analyze, and Optimize for Social Growth. Followerwonk helps you explore and grow your social graph: a) Dig deeper into Twitter analytics: Who are your followers? Where are they located? When do they tweet?; b) Find and connect with new influencers in your niche; c) Use super-actionable visualizations to compare your social graph to others; and d) Easily share your reports with the world. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

MIT Crosslinks and OCW

<http://ocw.mit.edu/courses/crosslinks/>

If you're learning about foundational STEM topics, you may want to explore MIT Crosslinks as a guide to OCW and other open educational resources. A sample image showing a topic listing for Discontinuity on the Crosslinks website. MIT Crosslinks describes how STEM topics are introduced, developed and applied across select MIT undergraduate courses. While only the MIT community may create and edit this crowdsourced content, the results are open to the world. Each Crosslinks topic, like the example to the right, starts with a brief definition. That's followed by links to content which MIT students recommend to each other – and to you – to help learn about the topic. To highlight the interconnections among topics, the links are grouped into five "facets of learning": a) Prepare: prerequisite topics for review; b) Learn: material to help you learn about the topic; c) Relate: other topics which are closely related; d) Advance: next topics after this one; and e) Apply: resources that describe how the topic is used in real life. Along with many specific OCW files, such as notes, videos, problems and solutions, you'll find content from Wikipedia, Wolfram, Khan Academy, YouTube, and many other universities. This will be added to [Tutorial Resources](#) Subject Tracer™.

Student Research Resources 2017

<http://www.StudentResearch.info/>

The above is the associated white paper link dataset compilation for [Student Research Resources 2017](#) Subject Tracer™ by [Marcus P. Zillman, M.S., A.M.H.A.](#) . It is a freely available 40 page .pdf (326KB)) document covering all areas for student research available over the Internet! [Updated October 13, 2016] Other white papers are available by clicking [here](#).

Academic Help - Help With Academic Writing

<https://academichelp.net/>

Awesome academic experts that want to help desperate writers get their work done. They answer your writing questions in their Ask an Expert section. Their guides show you how to write any essay, paper, or report. They provide tons of examples of what you are writing. They reach out to other writers on Facebook and Twitter and help them solve their problems. This will be added to [Student Research Resources](#) Subject Tracer™.

Nect - Simple Recruiting Software To Help Build Great Teams

<http://nectjobs.com/>

Nect is a web and mobile app that helps you manage your hiring from beginning to end. Features include: 1) Save time; 2) Hire more Effectively; 3) Collaborate easily with team members; 4) Designed specifically for busy managers; 5) Use it with any job site or social media; and 6) Takes just minutes to get started. Here's how it works: a) Collect - Create a new job post using our templates or design your own. Sync Nect to your favorite job sites and social media to collect applicants in one convenient place; b) Sort - As applicants start rolling in, use our specially designed Nect dashboard to quickly identify strong candidates and archive unsuitable ones; and c) Connect - Use the desktop or

Big Think - A Knowledge Forum

<http://bigthink.com/>

In our digital age, we're drowning in information. The web offers us infinite data points—news stories, tweets, wikis, status updates, etc—but very little to connect the dots or illuminate the larger patterns linking them together. At Big Think they believe that success in the future is about knowing the ideas that allow you to manage and master this universe of information. Therefore, they aim to help you move above and beyond random information, toward real knowledge, offering big ideas from fields outside your own that you can apply toward the questions and challenges in your own life. Every idea on Big Think comes from our ever-growing network of 2,000 Big Think fellows and guest speakers, who comprise the top thinkers and doers from around the globe. Their editorial team regularly sources ideas from these experts, asking them about the most important ideas in their respective fields. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Healthcare Online Resources 2017

<http://www.HealthcareResources.info/>

Healthcare Online Resources 2017 is a comprehensive listing of healthcare resources currently available on the Internet. These include healthcare indexes, subject guides and search engines that supply the latest technology and information about healthcare and how it relates to you. This has been created by [Marcus P. Zillman, M.S., A.M.H.A.](#), Author, Keynote Speaker and Corporate Consultant. [Created on October 15, 2016 pdf 37 pages 322KB]

usability. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Quandl Resource Hub - Alternative Data Sources

<https://blog.quandl.com/alternative-data>

We've barely scratched the surface of potential alternative data sources. The data sources that will become available in the next decade dwarf what we have access to right now. The Internet of Things (IoT) will incorporate sensors that are orders of magnitude more granular, and orders of magnitude more broadly dispersed, than our current smart phone network. Drones and micro-satellites will provide real-time physical and logistical data far more detailed than our current coverage. Beacons and embedded chips inside products will allow instantaneous knowledge of transactions, usage, obsolescence and more. And companies will evolve to make use of all this data. Today, for every Amazon or Target that runs a rigorous program of data collection, analysis and action, there are dozens of companies that still operate by old-school rules. As time goes by, these firms will either adapt, or die. Either way, the future belongs to businesses that embrace the data revolution. Which means that the amount of business data available to analysts will only continue to grow. But as new data becomes available, "old" data will become commonplace. This is inevitable; and analysts must prepare for this eventuality. The Spectrum of Diffusion for Alternative Data. Data has a natural lifecycle. Newly discovered datasets are rare, jealously guarded, and valuable because they contain alpha. As time goes by, this data diffuses to a wider audience, and its alpha content diminishes; nonetheless analysts continue to use the data because not doing so would leave them at an information disadvantage. Finally, the data becomes old and obsolete: fully priced in by a market that has moved on to the next source of edge. Smart analysts are aware of this dynamic, and are always ready to adapt. They've internalized where we are on the spectrum of diffusion. Download the Spectrum of Diffusion Infographic by clicking [here](#). This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Finance Resources](#) Subject Tracer™. This will be added to [Financial Sources for the Family Office](#) white paper.

Intrapreneurial Resources 2017 White Paper DataSet Link Compilation

A Visual Introduction to Machine Learning

<http://www.r2d3.us/visual-intro-to-machine-learning-part-1>

Machine learning, when "computers apply statistical learning techniques to automatically identify patterns in data," is becoming a bigger part of the everyday life of most Americans in ways that are both embraced and debated. For example, websites like Facebook use machine learning for facial recognition, while banks use machine learning

The Qualitative Report

<http://nsuworks.nova.edu/tqr>

Researchers of all disciplines who use qualitative methods - or students interested in learning more about qualitative approaches to research questions - may want to check out *The Qualitative Report*, an open-access, peer-reviewed, multidisciplinary journal dedicated to sharing, examining, and discussing qualitative work. Edited by an international group of social science scholars, *The Qualitative Report* has been published since 1990 and has been available online since 1994. Visitors to this webpage can download the most recent reports or browse through the journal's most popular articles. Recent items include an examination of the impact of a dissertation writing program on doctoral completion in an educational policy program and an analysis of how consumers of "Green" brand items in India assess their personality. All previously published articles from *The Qualitative Report* are archived here and are available for download. Articles are tagged by a variety of subjects, including Psychology, Teacher Education, and Social Commons. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. CyberCemetery - Government Websites That Have Ceased Operation

<http://govinfo.library.unt.edu/default.htm>

The CyberCemetery is an archive of government websites that have ceased operation (usually websites of defunct government agencies and commissions that have issued a final report). This collection features a variety of topics indicative of the broad nature of government information. In particular, this collection features websites that cover topics supporting the university's curriculum and particular program strengths. The University of North Texas Libraries and the U.S. Government Printing Office, as part of the Federal Depository Library Program, created a partnership to provide permanent public access to the Web sites and publications of defunct U.S. government agencies and commissions. This collection was named the "CyberCemetery" by early users of the site. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Sifyap - Explore and Follow, Read, Watch, Listen, Curate What Matters

<http://siftap.com/>

Reinvented RSS and Social Media reader. It's a suite which let you follow sites, blogs, social media profiles and create own content which can be saved for later or published onto customised feeds with an email digest. Features include: a) Explore - Daily new content from around the web. All your favourite websites and social profiles in one place; b) Create - Add your own posts. Articles, images, videos, audio files. Mix it all with picked stuff from Explore; c) Publish - Personalise feed with logo, layout options, fonts and colours. Publish it onto your own domain; d) Audience - Get subscribers to a email digest. Be followed through network by other users with similar interest; e) Collaborate - Invite contributors. Or move it a step further and make a unity with other users and gather

MindMeld - Advanced Artificial Intelligence To Power the New Generation of Intelligent Conversational Interfaces

<https://www.mindmeld.com/>

MindMeld has pioneered the development of technology to power a new generation of intelligent conversational interfaces. MindMeld was founded in 2011 by Tim Tuttle. A former AI researcher from MIT and Bell Labs, Tim saw how recent advances in AI would enable breakthrough applications driven by natural language, touch and gesture. After 3 years of technology development and 10 patents, MindMeld launched its core offering, the MindMeld platform, in 2014. MindMeld is the first platform that makes it possible for companies to create intelligent conversational interfaces for any app or device. MindMeld has been widely recognized as a leader in the field of natural language understanding and was named by MIT Technology Review as one of the world's "50 Smartest Companies" of 2014. Gupshup - Bot Building Platform

<https://www.gupshup.io/>

Headquartered in Silicon Valley, Gupshup is the world's most advanced bot and messaging platform. It enables developers to quickly and easily build, test, deploy and manage chat bots across all messaging channels. Gupshup has been a pioneer in messaging and bots, long before they became trendy. Gupshup's messaging platform is used by over 30,000 businesses, leading companies such as FlipKart, OLA, Facebook, Twitter, ICICI, HDFC and ZeeTV. Gupshup's platform handles over 4 billion messages per month and over 150 billion cumulative. Gupshup also developed a smart-messaging app, Teamchat, which introduced patent-pending "smart" messages in 2014, only now being offered by other messaging apps. Gupshup's bot platform provides tools for the entire bot lifecycle enabling developers to quickly and easily build, test, deploy, monitor

Internet-of-Things (IOT) Resources 2017

<http://www.Internet-of-Things.ws/>

A resources listing of the Internet-of-Things (IOT) 2017. It is estimated within the next years that almost everything will be connected to the Internet (trillion upon trillion) and these are the resources and sites that will make this all possible. Visit this resource to see the real future of the Internet and the Internet-of-Things!! [15 Pages .pdf 267KB Updated October 22, 2016]

Drone Journalism Lab

<http://www.dronejournalism.org/>

Links, thoughts and research into using drones, UAVs or remotely piloted vehicles for journalism at the Drone Journalism Lab at the University of Nebraska-Lincoln's College of Journalism and Mass Communications. The College of Journalism and Mass Communications at the University of Nebraska-Lincoln established the Drone Journalism Lab in November 2011 as part of a broad digital journalism and innovation strategy. Journalism is evolving rapidly, and journalism education must evolve with it, teaching new tools and storytelling strategies while remaining true to the core principles and ethics of journalism. The lab was started by Professor Matt Waite as a way to explore how drones could be used for reporting. In the lab, students and faculty will build drone platforms, use them in the field and research the ethical, legal and regulatory issues involved in using pilotless aircraft to do journalism. This will be added to [Drone Resources](#) Subject Tracer™. This will be added to [Journalism Resources](#) Subject Tracer™.

GPO Federal Digital System

<http://www.gpo.gov/fdsys>

The Government Publishing Office's Federal Digital System (FDsys) is a website that enables GPO to display and deliver information from all branches of the U.S. government. Materials available on FDsys include the full text of bills, the Congressional Record and the Congressional Record Index (which includes the History of Bills and Resolutions section), congressional calendars, public laws, selected congressional reports and documents, the Daily Compilation of Presidential Documents, the Weekly Compilation of Presidential Documents, the Federal Register, and the Code of Federal Regulations. Coverage for each of these publications varies. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Legislative Information System

<http://www.lis.gov>

The predecessor to Congress.gov, the Legislative Information System (LIS), is still available but only to congressional staff. It is as current as Congress.gov and will continue to be available while further developments and improvements are made to Congress.gov. A specific date has not been set but plans are to retire LIS. Alerts that previously existed in LIS must be recreated in Congress.gov. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Federal Register

<http://www.gpo.gov/fdsys/browse/collection.action?collectionCode=FR>

The FR contains the official announcement of regulations and legal notices issued by federal departments and agencies. It includes proposed and final federal regulations having general applicability and legal effect; executive orders and presidential proclamations; documents required to be published by an act of Congress; and other federal documents of public interest. Daily and monthly indexes and an accompanying publication, “List of CFR Sections Affected,” aid in its use. The FR also publishes the “Unified Agenda of Federal Regulatory and Deregulatory Actions” twice yearly (usually in April and October). This document provides advance notice of proposed rulemaking by listing all rules and proposed rules that more than 60 federal departments, agencies, and commissions expect to issue during the next six months. Regulations that concern the military or foreign affairs, or that deal only with agency personnel, organization, or management matters, are excluded. The agenda is available online from 1994 through the present. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Regulations.gov

<http://www.regulations.gov>

This website was launched in 2003 to enhance public participation in federal regulatory activities. Users can search Proposed Rules and Regulations from more than 176 federal departments and agencies along with notices from the Federal Register. Many proposed regulations include a link to a comment form that readers can complete and submit to the appropriate department or agency. Regulations.gov is updated each business day with proposed new regulations. Among the database’s search options are keyword or subject, department or agency name, regulations published today, comments due today, open regulations or comments by publication dates, docket ID, Regulation Identifier Number, or CFR citations. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

RegInfo.gov

<http://www.reginfo.gov/public/>

The Office of Management and Budget (OMB) and the General Services Administration (GSA) produce this website. RegInfo.gov provides a list of all rules undergoing Office of Information and Regulatory Affairs (OIRA) E.O. 12866 regulatory review. Updated daily, it also provides a list of all rules on which review has been concluded in the past 30 days, lists and statistics on regulatory reviews dating back to 1981, and letters to agencies regarding regulatory actions. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Quorum

<http://quorum.us>

Quorum is the latest resource to capitalize on the need for detailed analytics on everything related to Congress and its Members. Launched in January 2015, Quorum provides federal level tracking for bills, votes, amendments, floor statements, press releases, Dear Colleague Letters, and a full suite of social media posts as far back as the 101st Congress (1989). There is a major focus on grassroots engagement tools that enable Members, advocates, legislative professionals, companies, and citizens to influence the legislative process. Quorum also allows users to track issues and to search for and monitor legislation and dialogue across all 50 states. The product uses ESRI geospatial technology and Census data in a legislative platform to provide unique characteristics of each congressional district. Many reviewers and users have dubbed Quorum “Google for Congress.” This is a fee-based subscription service. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

GovTrack

<http://www.govtrack.us>

GovTrack is a free service that can help to determine the status of U.S. federal legislation, voting records for the Senate and the House of Representatives, information on Members of Congress, congressional district maps, and the status of legislation. State legislative information is also available. Federal legislation may be searched and browsed back to the 93rd Congress (1973-1974) and the text of legislation is available as far back as the 106th Congress (1999-2000). GovTrack also provides useful bill statistics from the 96th Congress (1979-1980) to the present such as bill counts by Congress. Information is available as bill dockets, bills by subjects, and a bill search and track feature. One of GovTrack’s core missions is to make legislative data freely available so that others can build new tools to promote civic education and engagement. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Daily Compilation of Presidential Documents

<http://www.gpo.gov/fdsys/browse/collection.action?collectionCode=CPD>

Published by the Office of the Federal Register, the Daily Compilation of Presidential Documents (and its predecessor, the Weekly Compilation of Presidential Documents) provides the dates on which the President signed or vetoed legislation. It also contains transcripts of presidential messages to Congress, executive orders, press releases, nominations submitted to the Senate, speeches, and other material released by the White House. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Scout—Federal and State Legislative Alert Service

<https://scout.sunlightfoundation.com>

Scout is a legislative and regulatory alerts service from the Sunlight Foundation, which provides updates on federal and state legislation, federal regulations, court opinions, and GAO reports. Using the Congressional Record as its source, Capitol Words, a Sunlight Foundation project, analyzes word usage in Congress. GPO provides bill text, and GovTrack, Congress.gov, and OpenCongress provide other bill information. Information from GPO is delayed by about one day. Regulatory information is provided from the Federal Register and published throughout the day. Scout's data covers 2009 to the present. Open States, a Sunlight Foundation project, publishes data on state legislative activity for all 50 states, Puerto Rico, and the District of Columbia. This data originates from the official websites of the 50 state legislatures, and it is published at various times throughout the day, depending on the state. This will be added to [New Economy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Tmetric - Time Tracking Made Easy

<https://tmetric.com/>

Simple time tracking software for teams of any size. TMetric is a work time tracking service for IT-professionals and companies. Start in one minute, setup later. Track tasks from multiple project management systems with one click. Categorize time, create reports, and monitor your team online. Features include: a) Tracking in real time - Use timer to keep track of every minute of your billable time. Add time manually, if you need; b) Work day timeline - Your work day is visualized as a timeline. You can edit your work time using only a mouse; c) Clients and projects - Create an unlimited number of projects and clients, assign icons to them; d) Billable time and tags - Organize your time by tags. Mark projects or even separate time entries as billable; e) Flexible reports - Get an overview of your billable time, projects and teams. Use filters to drill down the details; f) Team View - Switch to team view and see what the colleagues are working on at the moment; g) Time-sheet export - Export time entries to PDF for printing or to CSV loading to Excel or a database; h) Fits any team structure - Render any management structure: flat, hierarchical, or matrix type. Setup teams and projects as it fits your needs; and i) Downloadable version - If you want to keep all data under control, order a

Shift - Switch Between Gmail, Calendar and Drive Accounts

<http://tryshift.com/>

Shift into higher gear with the email client that makes navigating between Mail, Calendar and Drive accounts fast, easy, and beautiful. All of the Gmail Features and More: 1) Full Support for Gmail & Google Inbox; 2) Multi-Account Access; 3) Beautiful, Clutter-Free Desktop Application; 4) Easily Switch Between Mail, Calendar & Drive; 5) Cross-Platform Support for Windows, Mac, and Linux; and 6) Native Desktop Notifications. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

U.S. Census Bureau: Data Visualization Gallery

<https://www.census.gov/dataviz>

The U.S. Census Bureau works diligently to "portray historical changes in the growth and redistribution of the U.S. population." More recently, they have turned to graphics and visualizations to help accomplish this feat. On this website, readers will find the Census Bureau's latest efforts to use technology to visualize the multi-faceted and ever changing characteristics of the U.S. population. There are currently over 40 visualizations in the gallery that chart changes in demographics, housing, employment, and other topical areas. For instance, readers may view the historical acquisition of new territory as charted by evolving boundary lines, or explore the relationship between college majors and occupations. Of course, the site also offers many helpful links to other components of the U.S. Census Bureau's website that are worth further exploration. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Laverna - Markdown Note Taking

<https://laverna.cc>

With all the different note-taking tools out there, Laverna may be a nice option for those readers looking for a Markdown note-taking app that offers a little extra privacy. Users create encrypted Notebooks with custom headings, check lists, and code blocks all by using Markdown. (See the 10-02-2015 edition of the *Scout Report* for an online tutorial on using Markdown). That said, Laverna helpfully includes shortcuts for all Markdown features by adapting icons similar to those used in Microsoft Word. Laverna will also appeal to users looking for simplicity: unlike some online notetaking platforms, Laverna sports an unfussy interface that allows users to focus on their notes rather than other distractions. In addition, users can sync their Laverna notes with Dropbox or Remote Storage. Laverna is not quite ready for Android devices, but is available for machines running Linux, MacOS, and Windows. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#)

Electronic Book Review

<http://electronicbookreview.com>

Founded in 1995, Electronic Book Review (ebr) is a peer-reviewed journal dedicated to "literary studies, broadly defined." Unlike other periodicals, ebr is continually updated through a series of themed threads. Each thread is edited by a content expert; current editors include scholars of cinematic arts, English, and mass communications. Thread topics include Technocapitalism (works that consider technology as a form of capital); Image + Narrative (discussions about how technology and images change the nature of narrative); and Critical Ecologies (explorations of "convergences among natural and constructed ecosystems"). Within each thread, readers will find interviews, critical essays and reviews of novels, nonfiction works, and art. Recently reviewed works include Mark Greif's intellectual history *The Age of the Crisis of Man*; Pete Townshend's autobiography *Who I Am* and German studies scholar James McFarland's book *Constellation: Friedrich Nietzsche and Walter Benjamin in the Now-Time of History*. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Power BI - Bring Your Data To Life

<https://powerbi.microsoft.com/en-us/>

Power BI is a suite of business analytics tools to analyze data and share insights. Power BI dashboards provide a 360-degree view for business users with their most important metrics in one place, updated in real time, and available on all of their devices. With one click, users can explore the data behind their dashboard using intuitive tools that make finding answers easy. Creating a dashboard is simple thanks to over 50 connections to popular business applications, complete with pre-built dashboards crafted by experts that help you get up and running quickly. And you can access your data and reports from anywhere with the Power BI Mobile apps, which update automatically with any changes to your data. If you are a data analyst delivering reporting and analytics to your organization, Power BI lets you be productive and creative with what you build. Power BI Desktop is a feature-rich data mashup and report authoring tool. Combine data from disparate databases, files, and web services with visual tools that help you understand and fix data quality and formatting issues automatically. With over 20 built-in visuals and a vibrant community of custom visualizations, create stunning reports that communicate your message effectively. With the Power BI service, publish reports securely to your organization and setup automatic data refresh so everyone has the latest information. Power BI can unify all of your organization's data, whether in the cloud or on-premises. Using the Power BI gateways, you can connect SQL Server databases, Analysis Services models, and many other data sources to your same dashboards in Power BI. If you already have reporting portals or applications, embed Power BI reports and dashboards for a unified experience. This will be added to the tools section of

Open Refine - Free Open Source Powerful Tool for Working With Messy Data

<http://openrefine.org/>

OpenRefine (formerly Google Refine) is a powerful tool for working with messy data: cleaning it; transforming it from one format into another; and extending it with web services and external data. Please note that since October 2nd, 2012, Google is not actively supporting this project, which has now been rebranded to OpenRefine. Project development, documentation and promotion is now fully supported by volunteers. Find out more about the history of OpenRefine and how you can help the community. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Measurement and Analysis for Protocols Research Group MAPRG

<https://irtf.org/maprg>

Our Internet has grown into something that differs from what was envisioned. Its protocols sometimes operate in an environment other than that for which they were designed. For instance, some network elements treat some protocols differently than others and those protocols themselves are sometimes reused and abused in ways initially unforeseen. The Measurement and Analysis for Protocols Research Group (MAP) Research Group (RG) explores such phenomena by measurement with the aim to inform protocol engineering and practice. Many protocol engineering efforts in a standards development context, as well as best practices for the operation of IETF-defined protocols, can benefit from insight provided by Internet measurements of various kinds. Likewise, Internet measurement research efforts can stand to gain from contacts with the IETF. The Measurement and Analysis for Protocols Research Group Research Group (MAPRG) aims to provide a forum for interchange between these two communities, supporting: a) exchange of measurement-derived insight; b) discussion of techniques and best practices for measurement relevant to protocol engineering and network operations; c) collaborations to share data supporting these measurements; and d) a “landing pad” for the Internet measurement community to introduce its efforts to the IETF. This will be added to [World Wide Web Reference](#) Subject Tracer™.

PowerTrack API 2.0

<http://support.gnip.com/apis/powertrack2.0/>

PowerTrack provides customers with the ability to filter the full Twitter firehose, and only receive the data that they or their customers are interested in. This is accomplished by applying Gnip’s PowerTrack filtering language to match Tweets based on a wide variety of attributes, including user attributes, geo-location, language, and many others. Using PowerTrack rules to filter a data source ensures that customers receive all of the data, and only the data they need for your app. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Social Informatics](#) Subject Tracer™.

init.ai - Powers the Future of Conversation

<https://www.init.ai/>

init.ai empowers companies to create conversation-based applications using artificial intelligence, natural language processing, and messaging. Their developer platform can be used to create standalone, platform-agnostic apps that require no downloads. It can also be used to add artificial intelligence and chat into customer apps. They offer a comprehensive solution that handles messaging, machine learning, and business logic, including integration with third-party APIs. Init.ai is venture-backed and based in NYC and San Francisco. This will be added to [ChatterBots](#) Subject Tracer™. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™.

Awarenesswatch™ Paper Review

Economies of the Internet by *Kylie Jarrett, D. E. Wittkower*

<http://firstmonday.org/ojs/index.php/fm/article/view/6939>

Abstract:

The papers in this issue of First Monday were originally presented as a series of panels at the Association of Internet Researchers 2015 conference in Phoenix, Arizona. This short introduction explains the impetus behind the organization of these panels — which was to document diversity in approaches to the study of Internet economies — and briefly introduces each paper by locating them in the nexus between political economy and cultural studies.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
