Business Intelligence Online Resources 2016

An Internet Annotated Link Dataset Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

This Internet Annotated Link Dataset Compilation is dedicated to the latest and most competent resources for business intelligence available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key then is to be able to find the important business intelligence resources and sites both in the visible and invisible world wide web. Each of the following selected business intelligence resources and sites have been described along with their current URL address to help you accomplish your business intelligence research goals! My complete link compilation of business intelligence resources is available online and is constantly updated at the following URL:

<http://www.BIOnlineResources.info/>

These resources are designed to aid you in your quest for knowledge discovery for business intelligence resources on the Internet. Suggestions and additional competent resources and sites are also welcomed and will be considered for inclusion in the future.

10k Wizard SEC Filings

<http://www.10kwizard.com/>

10K Wizard developed a proprietary software to search through the myriad of information available to the public via the SEC's EDGAR (Electronic Data Gathering, Analysis and Retrieval) system. The results? Real-time access and the unique ability to perform keyword searches on up-to-the-minute SEC filings. Hailed as one of the web's best financial sites by the likes of Money Magazine, Fortune Magazine and Business Week, www.10Kwizard.com serves as the flagship site of their company and a shining example of their unique technology.

Accurint

<http://www.accurint.com/>

Accurint® is a LexisNexis® service that brings data to life. Accurint provides information products that allow organizations to quickly and easily extract valuable knowledge from huge amounts of data. These innovative products are made possible by integrating powerful technology, tens of billions of data records on individuals and businesses, and proprietary data-linking methods.

Audit Bureau of Circulation (ABC) eCirc Application

<http://abcas3.accessabc.com/ecirc/index.html>

eCirc is a quick, concise online source for ABC top-line circulation (based on the latest released FAS-FAX report) information. eCirc lets you sort and search summarized circulation data by Publication Title, State/Province, U.S. SRDS or Canadian CARD classifications.

Beige Book

<http://www.federalreserve.gov/monetarypolicy/beigebook/default.htm>

Each Federal Reserve Bank gathers anecdotal information on current economic conditions in its District through reports from Bank and Branch directors and interviews with key business contacts, economists, market experts, and other sources. The Beige Book, published eight times per year, summarizes this information by District and sector. An overall summary of the twelve district reports is prepared by a designated Federal Reserve Bank on a rotating basis.

Better Management - Business Intelligence

<http://www.sas.com/knowledge-exchange/?FilterID=10>

Business intelligence (BI) uses knowledge management, data warehouse, data mining and business analysis to identify, track and improve key processes and data, as well as identify and monitor trends in corporate, competitor and market performance.

BizMiner

<http://www.bizminer.com/>

The company pioneers online delivery of detailed industry analysis to small and large businesses and entrepreneurs through its local and national Marketing Plan Research

Awareness Watch V14N3 March 2016 Newsletter

Profiles, Financial Analysis Profiles, Area Sector Profiles, Target Market Area Scorecards Profiles, Franchise Profiles and Business Risk Index series. BizMiner's proprietary research methodology tracks and analyzes the experience of over 18 million US business facilities, condensing millions of data points into the unique measures found in our profile series.

Biznar - Innovative Business Research Search Engine

<http://biznar.com/biznar/>

Biznar is a free, publicly available business research site that uses advanced technology to return high quality results. Using state-of-the-art federated search technology from Deep Web Technologies, Biznar accelerates your research by returning the most relevant results from across the World Wide Web, including blogs, wikis, mainstream searches and deep web sources to one, easily navigable page. Each search is done in real-time, searching the sources you select as if you were entering the search term on each individual website yourself.

BizShark - Internet Business Search Engine

<http://www.bizshark.com/>

BizShark uncovers your competitors' marketing strategies, finances, news, and more. BizShark brings you the latest business profiles, news, financials, web analytics, social footprint, marketing strategies, and other business information by searching across 50+ Internet business databases. BizShark searches and converts raw business data into 13 standard metrics to enable quick and easy business comparison.

BNET - Business White Papers, Webcasts and Case Studies

<http://www.cbsnews.com/moneywatch/>

BNET offers an extensive collection of both classic and current business white papers, case studies, webcasts and other interactive content created and categorized for decision makers at the Fortune 500 and the world's most successful small and medium-sized organizations.

Bots, Blogs and News Aggregators

<http://www.BotsBlogs.com/>

A comprehensive site covering the resources for bots, blogs and news aggregators on the Internet including white papers and a video presentation. These areas are considered by some to be the future methods of information retrieval and information dissemination on the world wide web.

Brint.com Business Technology Knowledge Portal

<http://www.brint.com/>

Developing leading edge thinking and practice on contemporary business, information, technology and knowledge management issues to facilitate organizational and individual performance, success, and fulfillment.

Business Filings Databases -- Updated

<http://www.llrx.com/columns/roundup29.htm>

All 50 states make some level of corporate and business filings available online. In a few instances only limited information (such as name availability) is retrievable. The majority of the states, however, use their Web presence to disseminate a range of public business records -- and most of them offer access at no charge. This update reflects changes that have been made in the previously listed databases.

Business Information on the Internet

<http://www.rba.co.uk/sources/index.htm>

These links will take you to a selection of key business information sites on the Internet and this resource has been created by Karen Blakeman. Details of changes to the listings are announced in Karen Blakeman's blog.

BusinessIntelligence.com – The Resource For Business Intelligence

<http://www.BusinessIntelligence.com/>

This site is part of the IT Network 365 that offers articles, news, media, research, papers, extracts, events, books, and exhibition business intelligence resources

Business Intelligence Network

<http://www.b-eye-network.com/>

The Business Intelligence Network™ and Resource Library delivers industry-based content hosted by domain experts and industry leaders. The Business Intelligence Network includes horizontal technology coverage from the most respected thought leaders in Business Intelligence, Business Performance Management, Data Warehousing and Data Quality. The Business Intelligence Network serves these communities with unparalleled industry coverage and resources.

Business Intelligence Resources Subject Tracer™

<http://www.BIResources.info/>

Business Intelligence Resources is a Subject Tracer™ White Paper Dataset Link Compilation created and authored by the Virtual Private Library and is constantly updated with Subject Tracer Bots (STB) monitoring the web and deep web for the latest information on business intelligence.

Business Intelligence: White Papers, Webcasts and Product Information

<http://www.bitpipe.com/tlist/Business-Intelligence.html>

A site offering white papers, webcasts and product information concerning all aspects of business intelligence.

Business Wire

<http://home.businesswire.com/portal/site/home/>

Business Wire is the leading source for full-text breaking news releases, multimedia and regulatory filings for companies and groups throughout the world.

CAROL Company Annual Reports Online

<http://www.carol.co.uk/>

CAROL is an on-line service offering direct links to the financial pages of listed companies in Europe and the USA. CAROL provides direct access to companies' balance sheets, profit & loss statements, financial highlights etc.

CEO Express

<http://www.ceoexpress.com/default.asp>

CEOExpress.com is designed to be the executive's interface to the Internet. The site's peer editor recognizes that executives have precious little time to obtain all the information they require to conduct business. At the same time, much of the information that executives need is available on the Internet. CEOExpress takes all that information, and by employing expert human editors and "mind ergonomics," pares it down to the 20% that is most critical and useful. That information is delivered to the user's desktop in a clear, easy-to-use format.

ChangeTracker - Tracking Change In Washington

<http://www.propublica.org/article/changetracker>

ChangeTracker, an experimental new tool that watches pages on a) whitehouse.gov, b) recovery.gov and c) financialstability.gov so you don't have to. When the White House adds or deletes anything— say a blog post, or executive order ... ChangeTracker will let you know. The latest changes are on their page or sign up to get alerts sent to you. Each change links to a page that shows the different versions side-by-side. Text highlighted in red means it was removed, green means it was added.

Company Information Guide - Company Research on the Web

<http://virtualchase.justia.com/research-resources/business-research>

A comprehensive guide created by the Genie Tyburski of the Virtual Chase offering resources and sites for conducting research on both public and private companies on the Internet.

Company Research Pathfinder from Rutgers University Libraries

<http://libguides.rutgers.edu/companies>

This Research Guide provides assistance in doing research in a variety of business and management topics, with descriptions of databases and hundreds of reference books in the collections of the Rutgers University Libraries. Links to more than 3,000 selected business and management-related Internet resources are included. **Competia Express** –

Competitive Intelligence Resources

<http://www.competia.com/>

They have compiled lists of sites that they have found to be of the most value in your industry. These lists are far from exhaustive, but they should give you a superb head start.

and white papers.

KnowledgeStorm

<http://www.KnowledgeStorm.com/>

KnowledgeStorm is the Internet's most highly trafficked business technology search site. KnowledgeStorm shortens and streamlines the IT buy cycle by providing software, service, reseller and hardware information on thousands of IT solutions, alongside white papers, webinars and case studies.

Market Intelligence Resources

<http://www.MarketIntelligenceResources.com/>

This 193 page Professional Internet MiniGuide brings you the latest links and sources for market intelligence. Wikipedia defines Market Intelligence as: "Market Intelligence (MI) – information relevant to a company's markets, gathered and analyzed specifically for the purpose of accurate and confident decision making in determining market opportunity, market penetration strategy, and new market development metrics." The *Market Intelligence Resources* Professional Internet MiniGuide has all its links and sources listed alphabetically and broken down into categories that address the many facets of market intelligence for today's business owner and/or entrepreneur.

Mergers and Acquisitions Business Research

<http://www.masourceexpress.com/mergers-and-acquisitions>

Mergers and Acquisitions Business Research offers the resources necessary for business intelligence required using their extensive listings of M&A research resources offering through independent sites on the Internet. The author of this annotated white paper is proud that they have used a number of his Subject Tracers as well as the Virtual Private Library in their resource collection.

Mint Portal - Business Intelligence and Business Information

<http://www.mintbusinessinfo.com/>

A taste of Mint lets you search for companies operating in a specific country and/or activity - and a basic list is free. Fill in just the fields you require for your search. Alternatively, you can enter a company name (or number) to verify its existence.

NASD BrokerCheck: Check the Background of Your Investment Professional

<http://brokercheck.finra.org/>

NASD BrokerCheck should be your first resource tool to learn about the professional background, registration/license statuses and conduct of NASD registered firms and their registered brokers. NASD BrokerCheck was designed to be simple and efficient in its delivery of information. NASD makes information on securities professionals and firms available online and, in most cases, detailed report information is returned to you by e-mail within minutes of your request.

Awareness Watch™ Spotters

Open Land Contracts

<http://www.openlandcontracts.org/>

OpenLandContracts.org is an online repository of publicly available contracts for large-scale land, agriculture, and forestry projects. The repository includes the full text of contracts; plain language summaries of each contract's key social, environmental, human rights, fiscal, and operational terms; and tools for searching and comparing contracts. Launched in October 2015, OpenLandContracts.org promotes greater transparency of land-based investments, facilitates a better understanding of the contracts that govern them, and provides useful tools for governments, communities, companies, and other stakeholders. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Updated> Biological Informatics Subject Tracer White Paper Link Dataset Compilation

<http://www.BiologicalInformatics.info/>

I have just updated my Subject Tracer™ Information Blog white paper link dataset compilation titled **Biological Informatics** which is now a 36 page paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about biological informatics that are available over the Internet. It is freely available as a .pdf file (300KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was completely updated including link validation and new links added on **February 1, 2016**. Other white papers are available by clicking [here](#).

Updated> Deep Web Research and Discovery Resources 2016

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2016** and it is now a 50 page 353KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. Currently this has been downloaded over 3,500,000+ times!

WIRKI: The Social Resume - Invite Your Peers To Describe Your Work

<https://wirki.com/>

You can think of Wirki as Wikipedia for your work where you choose the authors. The people you invite can create and edit your work bio and job positions. You can edit too.

Awareness Watch V14N3 March 2016 Newsletter

You and your peers can add and rate your skills. It's easy, fun, and might even tell you something new. And yes, awesomeness is a skill. Put your network to work. You can connect to anyone on Wirki. But only those you choose can edit your profile. Choose people you trust...but not just your mom. This will be added to [Employment Resources](#) Subject Tracer™. This will be added to [Social Informatics](#) Subject Tracer™.

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 70 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (467KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: February 1, 2016]. Other white papers are available by clicking [here](#).

Update> Privacy Resources White Paper Link Dataset Compilation

<http://www.PrivacyResources.info/>

The white paper link dataset compilation of [Privacy Resources](#) Subject Tracer™ by [Marcus P. Zillman, M.S., A.M.H.A.](#) is now a 42 page .pdf document 315KB. Privacy Resources and Sites on the Internet is a comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. This is a **MUST** reference for today's [New Economy](#) where privacy and security have become major issues!! Keep your privacy and security with this excellent Subject Tracer™. This white paper (.pdf) has been completely updated including all links validated and new links added as of February 1, 2016.

Open Preservation Foundation

<http://openpreservation.org/>

The Open Preservation Foundation sustains technology and knowledge for the long-term management of digital cultural heritage, in all its forms. They provide their members with reliable solutions to the challenges of digital preservation through technology stewardship, knowledge exchange, and advocacy and alliances. Founded in 2010 as the Open Planets Foundation to sustain the results of EU-funded R&D they currently steward the leading portfolio of open-source digital preservation software and enable the development of best practice through interest groups, community events, and training. Their vision is shared solutions for effective and efficient digital preservation. This will be added to [Research Resources](#) Subject Tracer™ Information Blog.

Top 50 Most Valuable Latin American Brands

<http://www.millwardbrown.com/brandz>

BrandZ is an annual study of the views and opinions of people who use and buy brands.

Awareness Watch V14N3 March 2016 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

eVoice: 800-858-1462

© 2016 Marcus P. Zillman, M.S., A.M.H.A.

The BrandZ study, conducted by Millward Brown for WPP, provides a unique piece of intelligence. Over the past 10 years Millward Brown has spoken to 3 million people about more than 100,000 brands. We combine the BrandZ data with financial data to compile a number of annual brand rankings. May 26, 2015 marked the 10th year anniversary of the BrandZ Top 100 Most Valuable Global Brands Ranking, published annually in the Financial Times. This year, Millward Brown and WPP rang the closing bell at NASDAQ on July 23, and hosted an event at the Thomson Reuters Building in Times Square to share insights from the last 10 years and to discuss the future of brands with several of the world's leading marketers. Additional regional rankings published throughout the year include the BrandZ Top 50 Most Valuable Indian Brands (just released), the Top 50 Latin American Brands available September 23. The China Top 100 Brands ranking and report will be published in February, 2016. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Annotating All Knowledge

<https://hypothes.is/annotating-all-knowledge/>

A new open layer is being created over all knowledge. A coalition of some of the world's key scholarly publishers, platforms, libraries, and technology organizations are coming together to create an open, interoperable annotation layer over their content. Their goal is that within three years, annotation can be deployed across much of scholarship. Today, coalition members are in different phases of engagement. Some have already implemented annotation natively and are working to increase adoption and develop new uses, others are at the very beginning of the process. Objectives for the first year, in 2016, are to begin socializing the progress that's been made, to identify opportunities and discuss potential challenges, lay out a common roadmap, and for most to begin the process of design and experimentation necessary to implement annotation in their own context." This has been added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Knowledge Discovery](#) Resources Subject Tracer™.

EDGAR - Search Tools

<http://www.sec.gov/edgar/searchedgar/webusers.htm>

Free access to more than 20 million filings. Since 1934, the SEC has required disclosure in forms and documents. In 1984, EDGAR began collecting electronic documents to help investors get information. The SEC's new system requires data disclosure — the next step to improve how investors find and use information. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

CVonline - Digital Platform To Share Your CV

<https://cvonline.me/en/home>

How The Internet Is Making The Whole World Richer

<http://www.makeuseof.com/tag/internet-making-whole-world-richer>

The latest research shows that when prospects search for your company on the Internet, the top 10 listings are likely to include the following:

- a) 3 listings from consumer posts to blogs, message boards, and opinion sites,
- b) 2 listings from experts,
- c) 2 listings from your own corporate site,
- d) 1 listing from an online publication, and
- e) 2 listings from other sources.

This confirms the need for immediate [business intelligence](#) to constantly monitor and evaluate the prospects ongoing searching results for your company, brand, and product. [Marcus P. Zillman, M.S., A.M.H.A.](#), Executive Director of the [Virtual Private Library™](#), Internet [expert](#), [author](#), [speaker](#), [consultant](#) and creator/founder of [BotSpot.com](#) will be speaking on **Understanding the Hidden Web and How It Relates To You: eCommerce Security, Cloud Computing, Deep Web, HTML5 and IPV6** with emphasis on the growing areas of bots, intelligent agents, blogs (weblogs), news aggregators, business intelligence, artificial intelligence, Deep Web, RSS, Twitter, FaceBook MashUps, Grids/Clouds, Social Networks, Web 3.0+, and The Internet-of-Things (IOT). The Internet's future is both theoretical and practical and will relate to all that gather in cyberspace to continue education and to keep current! We truly live in

exciting times Will Mash-Ups and the Web 3.0 replace the current Internet as we know it? These and other questions will be discussed during this presentation by one of the Internet's pioneers and bot and artificial intelligence experts, Marcus P. Zillman. His latest links and resources are available by clicking [here](#).

Updated> Searching the Internet 2016 - A Primer UPDATED

<http://www.SearchingTheInternet.info/>

The annotated white paper titled "Searching the Internet 2016 - A Primer" by [Marcus P. Zillman, M.S., A.M.H.A.](#) has been updated and is a primer for those new to searching the Internet or those using only one search source. It is freely available as a 19 page .pdf document (396KB) from the above link from the [Virtual Private Library™](#). Other white papers are available by clicking [here](#). [Updated with all links validated and new links added on: February 3, 2016]

Omnity Insight Engine - Everything Connected

<https://www.omnity.io/>

In a rising sea of ever growing and increasingly fragmented knowledge, Omnity enables searchers to efficiently find related documents, even if those do not directly cite or link to one another. This accelerates the discovery of otherwise hidden, high-value patterns of interconnection within and between fields of knowledge as diverse as science, medicine, engineering, law and finance. Omnity is based on fundamental advances in associative semantic search technology, through which they create landscapes of meaning-based relationships arising from the semantic signatures of entire documents. In this manner, the knowledge contained within whole documents can be deeply inter-connected, solely through shared ideas. This will be added to the Semantic Web Research section of [Deep Web Research and Discovery Resources 2016](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Knowledge Discovery](#) Subject Tracer™.

Everykey - The Master Key To Your Phone, Laptop, Website, Accounts and More

<https://everykey.com/>

When Everykey is close to your phone, laptop, tablet, house door, car door, or another access-controlled device, it unlocks that device. When you walk away, that device locks back down. Everykey can also log you into your website accounts. If you lose your Everykey, you can remotely freeze it, so no one else can use it. Everykey has a variety of safety features that work together to keep your information safe. Everykey utilizes AES 128-bit encryption and has remote freezing capabilities which prevent others from using your Everykey in the event that it is lost or stolen. Each time Everykey broadcasts an

University of Cambridge Research - The Future of Intelligence

<http://www.cam.ac.uk/research/news/the-future-of-intelligence-cambridge-university-launches-new-centre-to-study-ai-and-the-future-of>

The University of Cambridge is launching a new research centre, thanks to a £10 million grant from the Leverhulme Trust, to explore the opportunities and challenges to humanity from the development of artificial intelligence. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™.

50 Education Technology Tools Every Teacher Should Know About Educational Technology

<http://globaldigitalcitizen.org/50-education-technology-tools-every-teacher-should-know-about>

Educators might like to bookmark this list of 50 education technology tools from the Global Digital Citizen Foundation. Here they will find tools for leveraging social media, tools for spicing up lessons, tools for lesson planning and student projects, and tools that help teachers "stay connected, organized, and increase the ease of building multimedia lessons and learning tools." Each resource is accompanied by a short blurb that suggests possible uses. Some, like Twitter, Skype, and Pinterest, are widespread tools that can be adapted to classroom settings. Others, like Grockit, Schoology, and OpenStudy are designed specifically for the needs of today's dynamic educational environments. This will be added to [Education and Academic Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015. <https://www.scout.wisc.edu>

Guide To Privacy Resources 2016

http://WhitePapers.VirtualPrivateLibrary.net/Guide_To_Privacy_Resources_2016.pdf

This freely available publication titled **Guide To Privacy Resources 2016** by [Marcus P. Zillman, M.S., A.M.H.A.](#); Executive Director of the [Virtual Private Library](#) is now a 42 page .pdf document 312KB. This guide is one of the most comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. This is a **MUST** reference guide for today's [New Economy](#) where privacy and security have become major issues!! Keep your privacy and security with this excellent freely available guide. Created on February 1, 2016. Direct URL: <http://www.StealthMode.info/>

College Board: Community College Resources and Publications

<https://professionals.collegeboard.com/higher-ed/community-colleges/resources>

The College Board has gathered together an impressive array of resources related to the benefits and challenges of community college education. Here readers will find

Information for Students and Parents, such as an article that explains Why Community College or a two-page PDF document that discusses Six Benefits of Community College. A section also highlights some Online College Planning Tools, including the impressive (and free) resource, College Search, which allows users to filter the 3,853 college options based on Test Scores & Selectivity, Type of School, Location, Campus & Housing, and other important considerations. In addition, the Links for Professionals section provides valuable resources for counselors, educators, and administrators who are passionate about supporting students on their journey into and through community college. Finally, the Publications section boasts more than two dozen downloadable PDFs that highlight critical issues affecting community colleges today, from increasing access to helping advisers assess their students strengths and weaknesses. This will be added to [Student Research Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2016. <https://www.scout.wisc.edu>

The National Human Genome Research Institute: Fact Sheets

<http://www.genome.gov/10000202>

The National Human Genome Research Institute (NHGRI) at the National Institute of Health (NIH) was established in 1989 for the express purpose of contributing to the International Human Genome Project - the multi-nation, decade-long project that successfully mapped the human genome. With such a rich pedigree it is no surprise that the NHGRI boasts a wonderfully informative website. Take, for instance, the Fact Sheets on Science, Research, Ethics and the Institute, featured here. Readers will find well over a dozen fact sheets, covering topics such as Comparative Genomics, Cloning, DNA Sequencing, and Genetic Mapping. For readers who are looking for clearly written, compendious treatments of all things related to genetics research, the NHGRI site will not disappoint. This will be added to [Biological Informatics](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2016. <https://www.scout.wisc.edu>

Updated> Online Research Browsers 2016

<http://www.zillman.us/white-papers/online-research-browsers/>

Internet MiniGuide Annotated Link Dataset Compilation white paper titled "Online Research Browsers 2016" a 17 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online research browsers available on the Internet. These research browsers allow you to visualize information to find new relationships and associations to create knowledge discovery and obtain new and highly relevant research data. It is freely available as a .pdf file (177KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated with all links validated on **February 8, 2016**. Other white papers are available by clicking [here](#).

Timetoast - Make Timelines and Share On the Web

<http://www.timetoast.com/>

Few visual objects convey the vivacity and context of historical events like a good timeline. Creating a visually appealing one, however, can take hours on PowerPoint or

Awareness Watch V14N3 March 2016 Newsletter

Updated> Grid, Distributed and Cloud Computing Resources Primer 2016

<http://www.zillman.us/white-papers/grid-distributed-and-cloud-computing-resources-primer/>

I am very pleased to announce that I have just updated my **Grid, Distributed and Cloud Computing Resources Primer**. This primer is now 30 pages and a .pdf document (245KB) and freely available from the above URL. This primer gives an excellent overview of Cloud Computing along with a comprehensive listing of cloud, grid and distributed computing resources! It will be permanently archived in my [White Papers](#) site. **[Updated with all links validated and new links added on February 11, 2016]**

Environmental and Energy Resources Library (EERL)

<http://www.eerl.org/>

The electronic Environmental and Energy Resources Library (EERL) is a project of the Advanced Technology Environmental and Energy Center (ATEEC) at Eastern Iowa Community Colleges. The library is a multi-faceted clearinghouse of valuable electronic resources. EERL is supported in part by a National Science Foundation (NSF) grant. Active since 1999, ATEEC has been a collaboration of Eastern Iowa Community Colleges (EICC), the Davenport Public Library (DPL), the Partnership for Environmental Technology Education (PETE), and MIT's Laboratory for Energy and the Environment (LFEE). EICC, DPL, and private librarians bring the skills to properly catalogue the resources recommended by the collaborators and reviewed/vetted by EERL's handpicked team of environmental and energy educators and practitioners. This electronic library collects STEM (Science, Technology, Engineering, and Math) resources tied to environmental and energy technology resource information—from classroom-ready materials to regulatory information and global environmental and energy issues. Some of the areas include: air quality, emergency preparedness and response, energy, natural resources management, safety and health, and sustainability. Vocational areas are covered also, from agriculture, automotive, and green building to manufacturing technology. EERL's team of expert community college educators and practitioners evaluate and recommend valid, up-to-date content. EERL's carefully chosen resources are incorporated into the National Science Digital Library (NSDL) database regularly, offering another way to access EERL and many other NSDL libraries. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Green Files](#) Subject Tracer™.

Science Node

<https://sciencenode.org/>

The Science Node is a free online publication, jointly funded by organizations in the US and Europe. Their team writes for experts and non-experts alike, exploring the real-world

Bio-Link National Center

<http://bio-link.org/home/content/bio-link-national-center>

Bio-Link is the Next Generation National Advanced Technological Education (ATE) Center of Excellence for Biotechnology and Life Sciences. Bio-Link originated in late 1998 with a grant from the National Science Foundation as a National ATE Center for Biotechnology. The ATE program was created to improve and expand educational programs that prepare skilled technicians to work in the high-tech fields that drive the U.S. economy. Bio-Link enhances biotechnology education programs by providing cutting edge professional development for instructors, by improving curriculum, by making use of technologies and by creating a system for sharing of information. The Bio-Link National Center is at City College of San Francisco with office space at the University of California San Francisco. Regional Bio-Link Centers across the country were once active and located in Seattle, WA; Shoreline, WA; Fairfield, CA; San Diego, CA; San Francisco, CA; Austin, TX; Madison, WI; Graham, NC; and Portsmouth, NH. The concept of Regional Centers was dissolved when the new grant was funded in 2009 to give way to a broader program designed to include more individuals in leadership roles called "Leader Links". The Regional Centers main focus and goals was to connect with local industry and educational institutions including community colleges, baccalaureate

institutions, and high schools. In addition, each Regional Center spearheaded a different element of the program. Bio-Link continues to support a cadre of well-trained instructors and is increasing the number and quality of biotechnology programs for students. Bio-Link brings a wide range of underrepresented students to biotechnology who have the knowledge and skills essential to the field as well as the ability to continue with more advanced education in math, science and engineering. This will be added to [BioTechnology Resources](#) Subject Tracer™.

March 2016 Zillman Column - Internet Demographics Resources 2016

http://columns.virtualprivatelibrary.net/Internet_Demographics_Res_Mar16_Column.pdf
<http://www.zillmancolumns.com/>

The March 2016 Zillman Column features **Internet Demographics Resources 2016** by Marcus P. Zillman, M.S., A.M.H.A.; Executive Director of the Virtual Private Library. This column is an extremely comprehensive listing of selected competency based internet demographics resources, directories, tutorial subject guides and index resources and sites available on the Internet. Download this excellent freely available 15 page 180KB pdf column today. This is another MUST have column to discover internet demographics resources in today's ever changing [New Economy](#) world!!

Google Sites

<https://www.google.com/sites/overview.html>

There seems to be no end to the innovative free products Google launches. Google Sites, a wiki- and Web page-creation service is no exception. Besides being able to connect with and leverage all of Google's other products (Gmail, Maps, Calendar, Drive, Hangouts, etc.) right on the site, Google's intranet creation and management tool allows users to create a page with customizable and simple templates. While a Google account is necessary to use the service, it is easy to use. Multiple users can upload files and attachments, embed rich content (docs, videos, slideshows, etc.), work and share together, and, of course, use the Google search engine. For small businesses that are looking for a simple, collaborative, intranet service, or educators who are looking for an easy way to build and host a virtual classroom, Google Sites is a nice option. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Downdetector

<http://downdetector.com/>

We like to see Downdetector as the weatherman for the digital world: they detect when technology fails. Just like the weather, service interruptions and outages can't be predicted, and just like a weatherman, they can tell you what is going on. More concretely, Downdetector offers a realtime overview of status information and outages for all kinds of services. They aim to track any service that its users consider vital to their everyday lives, including (but not limited to) internet providers, mobile providers, airlines, public transport and online services. Downdetector is an independently owned

Awareness Watch V14N3 March 2016 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2016 Marcus P. Zillman, M.S., A.M.H.A.

and operated by Serinus42 BV. Downtdetector spawned from the notion that existing solutions did a poor job at informing the public. People who are affected by an on outage typically turn to their provider or the media for updates, but in fact they know best if there are any issues. Following that guiding principle, we have set up and expanded our service since April 2012. We will continue to drive future changes and improvements, as well as expand to other countries (please check the bottom of this page for a list of regions that we currently serve). This will be added to [Internet Alerts](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Update> World Wide Web Reference 2016 White Paper Link Dataset Compilation <http://www.WWWReference.info/>

This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [StartUp Resources for the Entrepreneur](#) white paper.

Qubes OS - A Reasonably Secure Operating System

<https://www.qubes-os.org/>

Qubes is a security-oriented operating system (OS). The OS is the software which runs all the other programs on a computer. Some examples of popular OSes are Microsoft Windows, Mac OS X, Android, and iOS. Qubes is free and open-source software (FOSS). This means that everyone is free to use, copy, and change the software in any way. It also means that the source code is openly available so others can contribute to and audit it. Qubes takes an approach called security by compartmentalization, which allows you to compartmentalize the various parts of your digital life into securely isolated virtual machines (VMs). A VM is basically a simulated computer with its own OS which runs as software on your physical computer. You can think of a VM as a computer within a computer. This approach allows you to keep the different things you do on your computer securely separated from each other in isolated VMs so that one VM getting compromised won't affect the others. For example, you might have one VM for visiting untrusted websites and a different VM for doing online banking. This way, if your untrusted browsing VM gets compromised by a malware-laden website, your online banking activities won't be at risk. Similarly, if you're concerned about malicious email attachments, Qubes can make it so that every attachment gets opened in its own single-use, "disposable" VM. In this way, Qubes allows you to do everything on the same physical computer without having to worry about a single successful cyberattack taking down your entire digital life. Free Online Dictionary at Your Service

<http://www.dictionarylink.com/>

As technology changes at an ever-increasing pace, the expressions we use indeed, the very structure of our language changes rapidly with it. Luckily there are many tools to help us with our writing and conversation. One of the wonders of our age is that readers and writers can find a spell check tool or thesaurus online, a free online dictionary, and even the oxford dictionary itself all with a Google search and a few simple keystrokes. These services are useful regardless of one's motives: serious literary writers (or services who provide online essay help like academichelp.net or Writing-Expert) prefer to utilize the services of the oxford thesaurus to find synonyms for their expressions of choice while scientific writers choose the oxford dictionary to ensure accurate usage of technical terms. The free online dictionary services that provide adult readers and writers with such valuable information are useful for kids as well. One simple search for an online children's dictionary makes it clear that children aren't being left out of the proper-spelling picture. Given the corrupting influence of internet shorthand on the grammatical skills of our children, it's no wonder that there's an online dictionary for kids around every corner. Indeed, the typical children's dictionary, with easy-to-understand definitions and carefully selected popular words, receives more monthly hits than the oxford thesaurus itself. This will be added to [Reference Resources](#) Subject Tracer™.

IssueLab

<http://www.issuelab.org/>

For educators who don't have access to giant university databases, paywalls can sometimes feel like a major impediment to the information and knowledge they'd like to share with their students. IssueLab can help overcome that difficulty. A service of the Foundation Center, the Lab "works to more effectively gather, index, and share the collective intelligence of the social sector." Here educators will find over 18,000 and (counting) resources related to the world's most pressing social quandaries. Readers may scout the site using the Explore function, which will sort resources by Authors, Issue Areas, and Geography, as well as by Special Collections related to topics such as Affordable Care Act, Arts Education, Gun Violence, Immigration Strategies, and many others. Readers may also conduct a keyword or advanced search if looking for more targeted material. In sum, this compendium of case studies, evaluations, white papers, and issue briefs is sure to inspire teachers of social studies, the humanities, earth science, and other subject areas. This will be added to the tools section of [Research Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2015.

CrowdFund Beat - News and Information for Crowdfunding People

<http://crowdfundbeat.com/>

CrowdFund Beat Media International is an online source of news, information, events and resources for crowdfunding. We e-publish latest news and expert view related to the crowdfunding industry in the USA, Canada, UK, Italy, Germany, France, Holland and coming soon in Spain, Australia, Japan and China on a daily basis. With support of a group of crowdfunding professionals and experts, We are including an editorial column to our journal, in order to present a better perceptiveness on this new industry to our readers. At crowdbeat.com we think of our effort as an educational and informative service to the crowdfunding community, and appreciate your suggestions to make our work more helpful and efficient. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Crowd Funding Resources 2016](#) white paper.

aText - Accelerate Your Typing

<https://www.trankynam.com/atext/>

aText accelerates your typing by replacing abbreviations with frequently used phrases you define. E.g. make an abbreviation “myname” to insert your name “First Middle Last” in any application. With aText you can easily avoid typing the same thing over and over. Features include: a) Insert images and formatted text; b) Capitalize new sentences. Correct double capitals; c) Insert the current date and time in any format. Insert day in the future or the past, for example: next Sunday, previous Monday; d) Embed clipboard content in snippet, embed another snippet, use editable fields in snippet, send any key (such as Esc, Tab, Enter, arrow keys, etc); e) Reposition the cursor in the expanded snippet; f) Invoke AppleScripts and Shell Scripts; g) Built-in snippets for misspelling correcting, HTML and JavaScript coding; h) Import data from TextExpander, TypeIt4Me, SpellCatcherX, Automaton, CSV file; i) Works in Windows virtual machine by Parallels (in single window mode), VMWare Fusion, VirtualBox. Works in Windows via TeamViewer and Remote Desktop Connection clients; and j) Sync via iCloud/Dropbox/Google Drive/SkyDrive. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ATOM - A Hackable Text Editor for the 21st Century

<https://atom.io/>

Atom is a text editor that's modern, approachable, yet hackable to the core—a tool you can customize to do anything but also use productively without ever touching a config file. Full-featured, right out of the box including a) Cross-platform editing - Atom works across operating systems. You can use it on OS X, Windows, or Linux; b) Built-in package manager - Search for and install new packages or start creating your own—all from within Atom; c) Smart autocompletion - Atom helps you write code faster with a smart, flexible autocomplete; d) File system browser - Easily browse and open a single

file, a whole project, or multiple projects in one window; e) Multiple panes - Split your Atom interface into multiple panes to compare and edit code across files; and f) Find and replace - Find, preview, and replace text as you type in a file or across all your projects. You choose from thousands of open source packages that add new features and functionality to Atom—or build a package from scratch and publish it for everyone else to use. Atom comes pre-installed with four UI and eight syntax themes in both dark and light colors. If you can't find what you're looking for, you can also install themes created by the Atom community or create your own. It's easy to customize and style Atom. You can tweak the look and feel of your UI with CSS/Less and add major features with HTML and JavaScript. Check out the video on setting up Atom. Atom is a desktop application built with HTML, JavaScript, CSS, and Node.js integration. It runs on Electron, a framework for building cross platform apps using web technologies. Atom is open source. If you'd like to be part of the Atom community or help improve your favorite text editor, find us on GitHub, Discuss and Slack. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

CloudApp - Fast Way To Share and Collaborate

<https://www.getcloudapp.com/>

Easily share anything, anywhere .. CloudApp is more than just screenshots & quick recording. Share images, videos, music, documents, code snippets, markdown files directly from Photoshop, Sketch and dozens of other apps! This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Fossil Calibration Database

<http://fossilcalibrations.org/>

The Fossil Calibration Database is an open-access resource that curates vetted fossil calibration points. In order to be included in the database, a calibration must pass peer review and meet best practices for phylogenetic and stratigraphic justification. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Smithsonian: Seriously Amazing

<http://seriouslyamazing.si.edu/>

Seriously Amazing, the Smithsonian's erudite and engaging Q&A website, will provide trivia-minded readers with hours of entertainment. Are you curious about how to entertain an otter? Do you ever wonder how many cables it takes to hang a 5-ton airplane? Would you like to know what ancient work inspired Shakespeare's famous star crossed lovers? Click on any of these questions to explore an online Smithsonian exhibit or article. The site can be scouted by the categories of Art, Culture, History, Science, Most Popular, and Most Recent. In all, the site is an entertaining entry into the Smithsonian's vast online holdings. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

FlowingData

<http://flowingdata.com/>

For readers who love data - and the visual representation of data - this site from statistician Nathan Yau will provide hours of brainy entertainment. Readers may like to scout the site by Categories, such as Visualization (Seeing data), Statistics (Analyzing data), and Maps (Seeing geographic data), among others. They may also explore Recent data representations, which, at the time of this writing, included a lottery simulator, an analysis of the character appearances in the classic romantic comedy *Love Actually*, and a visual representation of all 1,942 currently known exoplanets. There are also excellent Tutorials, such as How to Make an Interactive Bar Chart with a Slider; however, these require a monthly membership with FlowingData, for a \$5 per month fee. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2016. <https://www.scout.wisc.edu>

ZipRecruiter

<http://ziprecruiter.com/>

A web based platform that aggregates applications from various job boards as well as well as provides tools and resources for the business owner to track/screen applicants. This will be added to [Employment Resources](#) Subject Tracer™.

Upwork - Find Freelancers To Tackle Any Job, Any Size, Any Time

<https://www.upwork.com/>

Get amazing results working with the best programmers, designers, writers and other top online pros. Hire freelancers with confidence, always knowing their work experience and feedback from other clients. Start your job in hours, not weeks. Get a shortlist of skilled freelancers instantly, tapping into our hiring know-how and matching technology. Interview favorites online and hire with the click of a button. Collaborate in a secure online workplace using the latest communication tools. Work stress-free with time tracking, reports and Upwork Payment Protection that assures you only pay for work you approve. This will be added to [Employment Resources](#) Subject Tracer™. CRM, accounting, and development tools let everyone see up-to-date status and work more efficiently. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

KEEL (Knowledge Extraction based on Evolutionary Learning)

<http://www.keel.es/>

KEEL (Knowledge Extraction based on Evolutionary Learning) is an open source (GPLv3) Java software tool that can be used for a large number of different knowledge data discovery tasks. KEEL provides a simple GUI based on data flow to design experiments with different datasets and computational intelligence algorithms (paying special attention to evolutionary algorithms) in order to assess the behavior of the algorithms. It contains a wide variety of classical knowledge extraction algorithms, preprocessing techniques (training set selection, feature selection, discretization, imputation methods for missing values, among others), computational intelligence based learning algorithms, hybrid models, statistical methodologies for contrasting experiments and so forth. It allows to perform a complete analysis of new computational intelligence proposals in comparison to existing ones. Moreover, KEEL has been designed with a two-fold goal: research and educational. This will be added to [Knowledge Discovery](#) Subject Tracer™. This will be added to [Data mining Resources](#) Subject Tracer™.

DataMelt - Computation and Visualization Environment

<http://jwork.org/dmelt/>

DataMelt is a free mathematics software for scientists, engineers and students. It can be used for numeric computation, statistics, symbolic calculations, data analysis and data visualization. DataMelt, or DMelt, is a software for numeric computation, statistics, analysis of large data volumes ("big data") and scientific visualization. The program can be used in many areas, such as natural sciences, engineering, modeling and analysis of financial markets. DMelt is a computational platform. It can be used with different programming languages on different operating systems. Unlike other statistical programs, it is not limited by a single programming language. DMelt can be used with several scripting languages, such as Python/Jython, BeanShell, Groovy, Ruby, as well as with Java. Most comprehensive software. It includes more than 30,000 Java classes for computation and visualization. In addition, more than 4000 classes come with Java API, plus 500 Python modules. Not to mention modules of Groovy and Ruby. All libraries are accessed using dynamic scripting. DMelt creates high-quality vector-graphics images (SVG, EPS, PDF etc.) that can be included in LaTeX and other text-processing systems. DataMelt can be used with several scripting languages for the JAVA platform: Jython (Python programming language), Groovy, JRuby (Ruby programming language) and BeanShell. All scripting languages use common DMelt JAVA API. Data analyses and statistical computations can be done in JAVA. Finally, symbolic calculations can be done using Matlab/Octave high-level interpreted language integrated with JAVA. DataMelt runs on Windows, Linux, Mac and Android operating systems. The Android application is called AWork. Thus the software represents the ultimate analysis framework which can be used on any hardware, such as desktops, laptops, netbooks, production servers and android tablets. DataMelt is a portable application. No installation is needed: simply

download and unzip the package, and you are ready to run it. One can run it from a hard drive, from a USB flash drive or from any media. DataMelt exists as an open-source portable application, and as JAVA libraries under a commercial friendly license. This will be added to [Data Mining Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

Weka 3: Data Mining Software in Java

<http://www.cs.waikato.ac.nz/~ml/weka/>

Weka is a collection of machine learning algorithms for data mining tasks. The algorithms can either be applied directly to a dataset or called from your own Java code. Weka contains tools for data pre-processing, classification, regression, clustering, association rules, and visualization. It is also well-suited for developing new machine learning schemes. Found only on the islands of New Zealand, the Weka is a flightless bird with an inquisitive nature. The name is pronounced like this, and the bird sounds like this. Weka is open source software issued under the GNU General Public License. Yes, it is possible to apply Weka to big data! Data Mining with Weka is a 5 week MOOC, which was held first in late 2013. Check out the MOOC site for video lectures and details on how to enrol into this course and a new, advanced Weka course. This will be added to [Data Mining Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

SPMF - Open Source Data Mining Library

<http://www.philippe-fournier-viger.com/spmf/>

SPMF is an open-source data mining library written in Java, specialized in pattern mining. It is distributed under the GPL v3 license. It offers implementations of 112 data mining algorithms for: a) association rule mining; b) itemset mining; c) sequential pattern mining; d) sequential rule mining; e) sequence prediction; f) high-utility pattern mining; and g) clustering and classification. The source code of each algorithm can be integrated in other Java software. Moreover, SPMF can be used as a standalone program with a simple user interface or from the command line. The current version is v0.98 and was released the 14th January 2016. This will be added to [Data Mining Resources](#) Subject Tracer™.

OpenWSN - Open Source Implementations of Protocol Stacks Based Upon IOT

<https://openwsn.atlassian.net/wiki/>

The Internet of Things enables great applications, such as energy-aware homes or real-time asset tracking. With these networks gaining maturity, standardization bodies have started to work on standardizing how these networks of tiny devices communicate. The goal of the OpenWSN project is to provide open-source implementations of a complete protocol stack based on Internet of Things standards, on a variety of software and hardware platforms. This implementation can then help academia and industry verify the applicability of these standards to the Internet of Things, for those networks to become truly ubiquitous. Their OpenWSN effort at UC Berkeley is one of many open source

Awarenesswatch™ Paper Review

A Worldwide Survey of Encryption Products by Bruce Schneier, Kathleen Seidel and Saranya Vijayakumar

http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2731160

Abstract:

Data security is a worldwide problem, and there is a wide world of encryption solutions available to help solve this problem. Most of these products are developed and sold by for-profit entities, although some are created as free open-source projects. They are

Awareness Watch V14N3 March 2016 Newsletter

<http://www.AwarenessWatch.com/>

available, either for sale or free download, all over the world.

In 1999, a group of researchers from George Washington University attempted to survey the worldwide market for encryption products [HB 99]. The impetus for their survey was the ongoing export controls. By collecting debate about US encryption information about 805 hardware and software encryption products from 35 countries outside the US, the researchers showed that restricting the export of encryption products did nothing to reduce their availability around the world, while at the same time putting US companies at a competitive disadvantage in the information security market. Seventeen years later, we have tried to replicate this survey.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
