

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V14N5

May 2016

Welcome to the V14N5 May 2016 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report covers **2016 Directory of Directories** and represents the latest World Wide Web resources for discovering new knowledge and understanding the latest happenings with regards to directory resources. The world is rapidly changing as transparency, big data and the ability to access data from new and now accessible directories becomes a reality! These directory resources are constantly updated by Subject Tracer™ Information Bots and the latest directory resources are available from the following URLs:

<http://www.2016DirectoryOfDirectories.com/>

<http://www.DirectoryResources.info/>

This is one of the fastest growing and changing areas for personal and business use and these directory resources will help to keep you current and up to date. These resources will also help you to discover the many pathways available to you through the Internet to find the latest online directory resources and sites in lieu of traditional search engines!!

Updated> Guide To Privacy Resources 2016

http://WhitePapers.VirtualPrivateLibrary.net/Guide_To_Privacy_Resources_2016.pdf

This freely available publication titled **Guide To Privacy Resources 2016** by [Marcus P. Zillman, M.S., A.M.H.A.](#); Executive Director of the [Virtual Private Library](#) is now a 44 page .pdf document 319KB. This guide is one of the most comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. This is a **MUST** reference guide for today's [New Economy](#) where privacy and security have become major issues!! Keep your privacy and security with this excellent freely available guide. Created on February 1, 2016 and Updated on April 1, 2016.

Updated> Deep Web Research and Discovery Resources 2016

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2016** and it is now a 50 page 353KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. Currently this has been downloaded over 3,500,000+ times!

Updated> Business Intelligence Online Resources 2016

<http://www.BIOOnlineResources.com/>

Internet Annotated Link Dataset Compilation white paper titled "**Business Intelligence Online Resources 2016**" is now a 78 page research paper listing selected resources both new and existing for online business intelligence. Each source is described along with the URL address than can be accessed. Also a comprehensive Business Intelligence Link Dataset Compilation is included! It is freely available as a .pdf file (524KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was completely updated with all links validated and new links added on **April 1, 2016**. Other white papers are available by clicking [here](#).

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 70 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (469KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: April 1, 2016]. Other white papers are available by clicking [here](#).

Open Data Inventory (ODIN)

<http://odin.opendatawatch.com/>

ODIN assesses the coverage and openness of official statistics to identify gaps, promote open data policies, improve access, and encourage dialogue between national statistical offices (NSOs) and data users. Scores allow comparisons across topics and countries. In 2015, 125 countries were assessed. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™ .

dat - Share and Sync Data Instantly

<http://dat-data.com/>

Dat is an grant funded, open source project housed in US Open Data. While dat is a general purpose tool, they focus on science. The high level goal of the dat project is to build a streaming interface between every database and file storage backend in the world. By building tools to build and share data pipelines they aim to bring to data a style of collaboration similar to what git brings to source code. The first code went into dat on August 17th 2013. The first six months were spent making a prototype (thanks to the Knight foundation Prototype Fund) and the last six months have been spent on taking dat beyond the prototype phase and into something more concrete (the Dat Alpha release). In April 2014 they were able to expand the team working on dat from 1 person to 3 persons, thanks to support from the Sloan foundation. Sloan's proposition was that they like the initial dat prototype but wanted to see scientific data use cases be treated as top priority. As a result they expanded the scope of the project from its tabular data specific

beginnings and have focused on adding features that will help us work with larger open scientific datasets. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

The OPTE Project

<http://www.opte.org/>

This project was originally created to generate a picture (or map) of the Internet. Since the Internet is basically a vast constellation of networks that somehow interconnect to provide the relatively seamless communication of data, it seemed logical one could draw lines from one point to another. The visualization is a collection of programs that collectively output an image of every relationship of every network on the Internet. The result was an award-winning representation of the Internet that now hangs in the Museum of Modern Art in NYC. The idea turned into a 10+ year labor of love under the moniker of The Opte Project. The map has been used an icon of what the Internet looks like in hundreds of books, in movies, museums, office buildings, educational discussions, and countless publications. The map has also become a teaching tool, allowing people that are visual learners to quickly understand what the Internet and networking is about. The images are released under a creative commons license, which allows anyone to use it for non-commercial purposes. For commercial use, there is a single one-time license fee which goes to support this project. There are many other answers in our FAQ section of the site. This will be added to [World Wide Web Reference](#) Subject Tracer™.

Pefin - The World's First AI Financial Advisor

<https://www.pefin.com/>

Artificial Intelligence that guides smart financial decisions at 1/20th the cost of a human advisor. Smart technology that knows your priorities, learns from you, and guides you to the best decisions. From taxes to daycare costs in your neighborhood, we take care of every detail that matters. At your service 24/7. No meetings. No sales pitches. Unbiased and on your side. Smart technology monitors the markets, your balances, tax rules, and more - 24/7 - making sure you are always on track. Understand how much to invest and what investments are right for you. They build a portfolio that's perfectly aligned to your life today and your upcoming priorities. Neural networks stay on top of everything - the markets, federal and state tax code, inflation, property taxes in your area, mortgage and insurance rates, even daycare costs in your area - on average we monitor over 2 million data points for you. Machine learning algorithms figure out the best financial decisions for you - How early can you retire? Which home can you afford? And, what investment portfolio is ideal for you? Decisions are transparent and never biased. Pefin adapts and learns from you and recalibrates your financial plans looking at what you said you would do and what is actually going on. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Financial Sources for the Family Office 2016](#)

Updated> Web Data Extractors 2016

<http://www.WebDataExtractors.com/>

The Research white paper link compilation titled "Web Data Extractors 2016" is now a 19 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about web data extraction on the Internet. It is freely available as a .pdf file (185KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated with all links validated and new links added on **April 5, 2016**. Other white papers are available by clicking [here](#).

Deep Web - Discover Resources That Help You Mine the Deep or Invisible Web Instead of Just Searching the Surface

<http://libguides.msubillings.edu/c.php?g=242182&p=1610131>

The Deep or Invisible Web is drastically larger than the surface web and includes information that is not easily found using search engines like Google, which just search small sections that are quickly available. This is because the information is not stored on websites; it is found in databases. It is hard to know just how much larger the deep web is because the internet is always changing. There are some special free search engines that can be used to find some of this content. Cast your net into the Deep Web to find more

specific drugs. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [Internet Alerts](#) Subject Tracer™.

Department of Defense Dictionary of Military and Associated Terms

http://www.fas.org/irp/doddir/dod/jp1_02.pdf

Via Steven Aftergood – FAS: “The term “climate change” was included for the first time in the latest revision of the Department of Defense Dictionary of Military and Associated Terms (Joint Publication 1-02), published last week. Climate change is officially defined by DoD as “Variations in average weather conditions that persist over multiple decades or longer that encompass increases and decreases in temperature, shifts in precipitation, and changing risk of certain types of severe weather events.” The new entry in the DoD Dictionary reflects a growing awareness of the actual and potential impacts of climate change on military operations.” Thanks to Sabrina at [BeSpecific](#) for this find. This will be added to [Military Resources](#) Subject Tracer™.

Cryptomator - Free Client-Side Encryption for Your Cloud Files

<https://cryptomator.org/>

Create vaults in your Dropbox, Google Drive or wherever you like. Assign a passphrase and you're ready to go. Store your sensitive data on the virtual drive provided by Cryptomator. Wasn't that easy? Cryptomator encrypts everything you put into the drive on-the-fly. Your cloud is now secure. Cryptomator provides transparent, client-side encryption for your cloud. Protect your documents from unauthorized access.

Cryptomator is free and open source software, so you can rest assured there are no backdoors. With Cryptomator you don't have to deal with accounts, key management, cloud access grants or cipher configurations. Just choose a password and you're ready to go. You don't even need to specify what cloud you use. Cryptomator encrypts files and doesn't care where you store them. This makes it a lightweight application, which we believe is a huge benefit for reliability. Complexity would kill security. Cryptomator is a so-called transparent encryption utility. This means that you don't have to learn new workflows. Just work with your files as you're used to. Cryptomator encrypts file contents and names using AES. Your passphrase is protected against bruteforcing attempts using script. Directory structures and file sizes get obfuscated. The only thing which cannot be encrypted without breaking your cloud synchronization is the modification date of your files. Cryptomator is a free and open source software licensed under the MIT / X Consortium License. This allows anyone to check their code. It is impossible to introduce backdoors for third parties. Also they cannot hide vulnerabilities. And the best thing is: There is no need to trust them, as you can control them! Vendor lock-ins are impossible. Even if they decided to stop development: The source code is already cloned by hundreds of other developers. As you don't need an account, you will never stand in front of locked doors. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

ZBIT Bioinformatics Toolbox: A Web-Platform for Systems Biology and Expression Data Analysis

<http://journals.plos.org/plosone/article?id=10.1371%2Fjournal.pone.0149263>

Bioinformatics analysis has become an integral part of research in biology. However, installation and use of scientific software can be difficult and often requires technical expert knowledge. Reasons are dependencies on certain operating systems or required third-party libraries, missing graphical user interfaces and documentation, or nonstandard input and output formats. In order to make bioinformatics software easily accessible to researchers, we here present a web-based platform. The Center for Bioinformatics Tuebingen (ZBIT) Bioinformatics Toolbox provides web-based access to a collection of bioinformatics tools developed for systems biology, protein sequence annotation, and expression data analysis. Currently, the collection encompasses software for conversion and processing of community standards SBML and BioPAX, transcription factor analysis, and analysis of microarray data from transcriptomics and proteomics studies. All tools are hosted on a customized Galaxy instance and run on a dedicated computation cluster. Users only need a web browser and an active internet connection in order to

benefit from this service. The web platform is designed to facilitate the usage of the bioinformatics tools for researchers without advanced technical background. Users can combine tools for complex analyses or use predefined, customizable workflows. All results are stored persistently and reproducibly. For each tool, we provide documentation, tutorials, and example data to maximize usability. The ZBIT Bioinformatics Toolbox is freely available at <https://webservices.cs.uni-tuebingen.de/>. This will be added to [Biological Informatics](#) Subject Tracer™.

Doing Business 2016 - Measuring Regulatory Quality and Efficiency

<http://www.doingbusiness.org/reports/global-reports/doing-business-2016>

Doing Business 2016: Measuring Regulatory Quality and Efficiency, a World Bank Group flagship publication, is the 13th in a series of annual reports measuring the regulations that enhance business activity and those that constrain it. Doing Business presents quantitative indicators on business regulations and the protection of property rights that can be compared across 189 economies—from Afghanistan to Zimbabwe—and over time. Doing Business measures regulations affecting 11 areas of the life of a business. Ten of these areas are included in this year's ranking on the ease of doing business: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. Doing Business also measures labor market regulation, which is not included in this year's ranking. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Brain.fm - Improve Focus, Relaxation and Sleep With Audio Brainwave Training

<http://www.Brain.fm/>

Brain.fm is the next generation of Transparent Corp. Transparent was founded originally by Adam Hewett & Cynthia Trang in 2003, where we made niche audio brainwave software for psychologists, researchers and hobbyists. Used daily in research labs, therapists offices, and tens of thousands of homes in over 180 countries. Transparent software has been instrumental in peer-reviewed clinical studies, and we hold a patent on a unique method for embedding brainwave stimulation into audio. In 2014, Junaid joined the Transparent team to lead the company's next incarnation - Brain.fm. Brain.fm combines the best from the past, incorporates new innovation including intensive EEG analysis by leading neuroscientists - making auditory brain stimulation accessible to anyone. Their mission is to solve ADD, Anxiety & Insomnia via audio brainwave training. Brain.fm is the first big step. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [REST](#) Database. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

JNeurosci: The Journal of Neuroscience

<http://www.jneurosci.org/>

As the official journal of the Society of Neuroscience, *JNeurosci: The Journal of Neuroscience* holds a special place of honor in the brain science community. Published weekly, the periodical manages to uphold an impressive standard of quality, exhibiting an impact factor of 6.344 (meaning the average article is cited about 6 times), and an impressively short turnaround between author submission and editorial feedback, making for increased relevance of published research. Recent articles have included examinations of the synaptic alterations, investigations into the minutia of the dorsal hippocampus, and an exposition on Goal-Directed Decision Making with Spiking Neurons. Readers who are

PhDTree - Academic Genealogy Wiki

<http://phdtree.org/>

PhDTree is a Wiki project to document the academic family tree of PhDs worldwide, both past and present. The goal is to build the most comprehensive academic genealogy Wiki for every discipline. Science and human civilization can not move forward without the hard work of PhDs. They believe every PhD should have a permanent Wiki page to record his/her contribution to the advancement of science and technology. By PhD, in its broadest sense, they mean doctorates, researchers, scholars, and scientists in general. These include undergrad research assistants, master students, doctorate candidates, postdoc fellows, lecturers, professors, staff scientists, industry R&D professionals, and independent researchers. Other research and professional doctorates such as M.D., J.D., Ed.D., Psy.D., Pharm.D. are also included. phdtree.org is a crowd-sourced wiki website: anyone can create new profiles or edit existing profiles. Read the FAQ first if you have any questions about using the Wiki. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

elevtr.io - Where Ideas Find Their Users

<http://elevtr.io/>

Their mission is to create a laboratory for validating ideas. The technology audience is enormous, their job is to find users who would love your idea. They believe the most successful ideas are validated through user testing and finding "power users" for your idea. Elevtr io attracts the best new products. It's a place for tech-loving enthusiasts to geek out about the latest technology projects, and tech creations. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

bioRxiv - The Preprint Server for Biology

<http://biorxiv.org/>

bioRxiv (pronounced "bio-archive") is a free online archive and distribution service for unpublished preprints in the life sciences. It is operated by Cold Spring Harbor Laboratory, a not-for-profit research and educational institution. By posting preprints on bioRxiv, authors are able to make their findings immediately available to the scientific community and receive feedback on draft manuscripts before they are submitted to journals. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Biological Informatics](#) Subject Tracer™.

Segment - Simplify Your Analytics

<https://segment.com/>

Collect customer data with one API and send it to hundreds of tools for analytics, marketing, and data warehousing. Track events in your web and mobile apps using their libraries. They will normalize the data and send it to integrations and warehouses. Use a single API to collect data from mobile apps, websites, and servers. Access the data and tools you need without being blocked by technical implementations or complexities. This will be added to [eCommerce Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

Libraries.org - Directory of Libraries Throughout the World

<http://www.Libraries.org/>

libraries.org targets the general public as a general directory of libraries. Many libraries place it on their own websites as a way for their users to find other libraries. In its simplest form, libraries.org functions as a library directory, but the advanced search page allows it to function as a tool for viewing trends and migration patterns related to the implementation of library automation systems. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added [Entrepreneurial Resources](#) Subject Tracer™.

Sickweather - Sickness Forecasting and Mapping

<http://www.sickweather.com/>

Everyday thousands of people around the globe update social media sites like Facebook and Twitter when they (or someone close to them) get sick. Just as Doppler radar scans the skies for indicators of bad weather, Sickweather scans social networks for indicators of illness, allowing you to check for the chance of sickness as easily as you can check for the chance of rain. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

BoardView - Adapt Your Marketing Strategy

<https://boardview.io/>

Prioritize your goals. Focus on what matters. Show how you grow. Key Benefits include: a) Show Growth - Visualize how marketing activities contribute to company growth; 2) Be Agile - Adjust your strategic focus and see the impact on underlying goals; and 3) Stay Aligned - Make sure every single individual contributes to team success. How does it work: 1) Build a Value Map - Drag 'n drop your objectives in the Boardview Tree. Turn your marketing strategy into your own interactive infographic. Visualize how marketing activities contribute to company growth; 2) Be SMART about goals - Create 100% S.M.A.R.T. goals with the Boardview Card wizard. Add your goal details step-by-step and define your success. Make your team more focused and productive than ever; and 3) Prioritize goals based on value - Let the Boardview Score automatically calculate priorities based on impact and effort. The higher the score, the bigger the value. It's simple. Pick your next steps and navigate straight to marketing nirvana. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

How To Encrypt and Protect Your eMail by Paul Bischoff

<https://www.comparitech.com/blog/vpn-privacy/how-to-encrypt-email/>

Email was one of the earliest forms of communication on the internet, and if you're reading this you almost undoubtedly have at least one email address. So you want to start encrypting your email? Well, let's start by saying that proper email encryption is not the most convenient tool to set up and use, even with the many apps and browser extensions out there to help you do it. You don't need a degree in cryptography or anything, but it will take a dash of tech savvy. Secondly, you don't need to encrypt every email you send. In fact, you shouldn't encrypt every email you send, because most people probably won't know how to decrypt it. Email encryption provides a secure means of sending messages containing sensitive material as well as a means for others to send you sensitive material. Journalists use it to correspond confidentially with sources. Businesses use it to relay trade secrets and classified documents. Lawyers use it to keep sensitive client and case information safe. You get the idea. In his opinion, email encryption is something you should have readily available when the need arises, but it's not necessary for everyday communication. We'll discuss how to encrypt email but let's first go over some simple best practices you can use to make email safer. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. Information Blog.

EveryCloud - Spam Filtering and Email Archiving

<http://www.everycloudtech.com/>

2,367 Organisations in 13 countries find EveryCloud the best performing email filtering service. EveryCloud's cloud based spam filtering service blocks 99.99% of spam, viruses and even newsletters if required. Set spam reports to give users control and view 90 days logs of all inbound and outbound email. Filter for specific content or use compliance rules to manage email flow. Their automatic spooling and delivery ensures you'll never lose emails whilst you view statistics any time. Add email footers to get your message

Floppi - Visual Wat For Creative Teams To Get Stuff Done

<https://www.floppi.com/>

Are you tired of shared folders and discussing files via messy email threads? Help us shape the best collaboration tool for makers and breakers. Uploading files notifies the entire team and lets everyone view previous versions, enabling team members to comment on files in context. This allows your work to shine and illustrate how you got there. Get a one glance status of what's done, what's left to do and what needs to be changed. Stay focused on even the largest project. Features include: 1) Get approvals faster - Let clients mark files as approved and reduce the amount of revisions. Clients love a tidy process; 2) Invite anyone - Add team members, clients, freelancers or other agencies to your projects. Keeping people in the loop makes it easier to maintain a consistent style; 3) Create to-do list's for your files - List everything you need to make, or things you need from someone else. Get more stuff done; and 4) Travel back in time - Version control helps you find previous versions, statuses and comments. Move quicker ahead by looking back. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

HI ToolBox

<http://toolbox.hyperisland.com/>

This is a resource for anyone who wants to do things more creatively and collaboratively in their team or organization. It's a collection of methods and activities, based on Hyper Island's methodology, that you can start using today. Hyper Island is a creative business school with consulting services which enables individuals and organizations to see, understand and act upon the opportunities created by digital and technological evolution. Hyper Island supports you to change your tomorrow by sharing competence and creating confidence through collaboration, creativity and innovation. Kong and Berkeley among others internationally. This has been added to the tools section of [Research Resources](#) Subject Tracer™.

TensorFlow - Open Source Machine Learning

<https://www.tensorflow.org/>

TensorFlow™ is an open source software library for numerical computation using data flow graphs. Nodes in the graph represent mathematical operations, while the graph edges represent the multidimensional data arrays (tensors) communicated between them. The flexible architecture allows you to deploy computation to one or more CPUs or GPUs in a desktop, server, or mobile device with a single API. TensorFlow was originally developed by researchers and engineers working on the Google Brain Team within Google's Machine Intelligence research organization for the purposes of conducting machine learning and deep neural networks research, but the system is general enough to be applicable in a wide variety of other domains as well. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Data USA - The Most Comprehensive Visualization of U.S. Public Data

<http://www.datausa.io/>

Their team, comprised of economists, data scientists, designers, researchers and business executives, worked for over a year with input from policymakers, government officials and everyday citizens to develop Data USA, the most comprehensive website and visualization engine of public US Government data. Data USA tells millions of stories about America. Through advanced data analytics and visualization, it tells stories about: places in America—towns, cities and states; occupations, from teachers to welders to web developers; industries--where they are thriving, where they are declining and their interconnectedness to each other; and education and skills, from where is the best place to live if you're a computer science major to the key skills needed to be an accountant. Data USA puts public US Government data in your hands. Instead of searching through multiple data sources that are often incomplete and difficult to access, you can simply point to Data USA to answer your questions. Data USA provides an open, easy-to-use platform that turns data into knowledge. It allows millions of people to conduct their own analyses and create their own stories about America – its people, places, industries, skill sets and educational institutions. Ultimately, accelerating society's ability to learn and better understand itself. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

Screaming Frog SEO Spider Tool

<https://www.screamingfrog.co.uk/seo-spider/>

The Screaming Frog SEO Spider allows you to quickly crawl, analyse and audit a site from an onsite SEO perspective. It's particularly good for analysing medium to large sites, where manually checking every page would be extremely labour intensive (or

impossible!) and where you can easily miss a redirect, meta refresh or duplicate page issue. You can view, analyse and filter the crawl data as it's gathered and updated continuously in the program's user interface. The SEO Spider allows you to export key onsite SEO elements (URL, page title, meta description, headings etc) to Excel so it can easily be used as a base for SEO recommendations. Their video provides a demonstration of what the SEO tool can do. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Rival IQ - Digital Marketing Analytics With a Competitive Edge

<https://www.rivaliq.com/>

Analyze your performance, gain critical insights and beat the competition across social media, SEO keywords and website content - with one easy tool! Break through the noise with fast, impactful analytics and reports about how your digital marketing compares to the competition. Features include: a) Nail Your Strategy With Social Post Analysis - They will analyze thousands of posts to give you instant insights - by hashtag, keyword, and more; b) Know How You Stack Up Against The Competition - Track one or many markets, learn from your competition and improve your digital initiatives; and c) Analyze Multiple Digital Marketing Channels - Measure, learn and act for marketing on six social networks, SEO keywords and website content. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

SpyFu - Download Your Competitors' Most Profitable Keywords and Ads for Paid and Organic Search

<http://www.spyfu.com/>

SpyFu exposes the search marketing secret formula of your most successful competitors. Search for any domain and see every place they've shown up on Google: every keyword they've bought on Adwords, every organic rank, and every ad variation in the last 9 years. Learn how to connect with these domains, too. Find online and traditional leads methods -- social media, email, phone, and address -- you can't find anywhere else. Features include: a) Increase your website traffic - Their smart recommendations drive clicks to your SEO or Adwords campaigns; b) Track your keyword rankings - Monitor your paid and SEO rankings on Google, Bing and Yahoo; and c) Make Better Connections - Reliable contact info helps you build partnerships or generate sales leads. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Map Room

<http://www.maproomblog.com/>

The Map Room is a weblog about maps, curated and composed by map connoisseur Jonathan Crowe. Readers will find frequently updated posts on everything from the use of maps in fantasy novels to election maps to multilingual maps of India. Entries are short

The Age of Aerospace

<http://theageofaerospace.com/discovery>

The Age of Aerospace, which was created in a joint effort between The Discovery Channel and the Boeing Company, presents readers with five forty-minute documentary episodes about the development of flying technology. The first episode ("What Can't We Do?") begins with the escapades of Bill Boeing, Donald Douglas, and other innovators, who created the airplane industry. "Miracle Planes," the second episode in the series, tells the story of how advances in air technology led to the Allied victory in World War II. Next, the third episode chronicles the beginnings of the jet age, while episode four takes readers into the space with the story of Project Apollo. The final episode presents the Boeing 787, "The Dreamliner," which acts as a symbol for the sorts of innovation currently underway in the world of jets. This will be added to [Reference Resources](#) Subject Tracer™. From The Scout Report, Copyright Internet Scout 1994-2016. <https://www.scout.wisc.edu>

Buzzsumo - Find the Key Influencers To Promote Your Content

<http://buzzsumo.com/>

Analyze what content performs best for any topic or competitor. BuzzSumo gives you insight into what content is working, and the influencers amplifying it. Features include: a) Powerful Content Insights - Discover the most shared content across all social networks and run detailed analysis reports; b) Influencer Amplification - Find influencers in any topic area, review the content they share and amplify; c) Content Alerts - Be the first to see content mentioning your keyword; or when an author or competitor publishes new content; and d) Competitor Analysis - Track your competitor's content performance and do detailed comparisons. Consciousness Engineering

<http://www.mindvalley.com/>

Consciousness Engineering is a framework and program built by personal growth pioneer and computer engineer Vishen Lakhiani. What Vishen has done with this program is gather many of the world's greatest teachers in different fields and teach in a way where you get to rapidly adopt their beliefs, behaviours, and habits. Having personally built a 100 million-dollar company, Vishen is able to be in a position where he can pick up the phone and simply call bestselling authors, teachers, coaches, and even billionaires to ask them to share their knowledge... To find out what makes them different from others, and what their 'secrets' to success are. He created Consciousness Engineering to share this knowledge with you, from literally the most successful, accomplished people in the world. This lets you collect success traits, and integrate them into your life with breathtaking ease. This saves you from poring through books, endless blog posts, and YouTube videos... With Consciousness Engineering you can trust that we curate the most high impact training in the world. This means your most precious resource — your time — is invested in the most high-impact education possible. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

FedStats - Your Window Into U.S. Federal Statistics

<http://fedstats.sites.usa.gov/>

FedStats, which has been available to the public since 1997, provides access to the full range of official statistical information produced by the Federal Government without having to know in advance which Federal agency produces which particular statistic. With convenient searching and linking capabilities to more than 100 agencies that provide data and trend information on such topics as economic and population trends, crime, education, health care, aviation safety, energy use, farm production and more,

FedStats is your one location for access to the full breadth of Federal statistical information. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

WildML - AI, Deep Learning and NLP

<http://www.wildml.com/>

Denny Britz studied Computer Science at Stanford University and UC Berkeley. He started WildML to share his excitement about Deep Learning. He is still learning, but found that writing posts and tutorials is the perhaps best way to deepen his own understanding. Topics he is currently excited about are NLP and Reinforcement Learning, so these will account for most of the posts on here. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™.

List of Tor Hidden Services from the Wikipedia

https://en.wikipedia.org/wiki/List_of_Tor_hidden_services

This is an alphabetized list of notable .onion hidden services accessible through the Tor anonymity network. Most are considered dark web services. Defunct services are marked. This will be added to [Deep Web Research and Discovery 2016](#).

Awarenesswatch™ Paper Review

Automating Power: Social Bot Interference In Global Politics by *Samuel C. Woolley*

<http://firstmonday.org/ojs/index.php/fm/article/view/6161>

Abstract:

Over the last several years political actors worldwide have begun harnessing the digital power of social bots — software programs designed to mimic human social media users on platforms like Facebook, Twitter, and Reddit. Increasingly, politicians, militaries, and government-contracted firms use these automated actors in online attempts to manipulate public opinion and disrupt organizational communication. Politicized social bots — here ‘political bots’ — are used to massively boost politicians’ follower levels on social media sites in attempts to generate false impressions of popularity. They are programmed to actively and automatically flood news streams with spam during political crises, elections, and conflicts in order to interrupt the efforts of activists and political dissidents who publicize and organize online. They are used by regimes to send out sophisticated computational propaganda. This paper conducts a content analysis of available media articles on political bots in order to build an event dataset of global political bot deployment that codes for usage, capability, and history. This information is then analyzed, generating a global outline of this phenomenon. This outline seeks to explain the variety of political bot-oriented strategies and presents details crucial to building understandings of these automated software actors in the humanities, social and computer sciences.
