V15N3

March 2017

Welcome to the V15N3 March 2017 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers three selected current happening titles that will have interest to all from the entrepreneur to the academic as it will definitely create disruption and change in our entire society within the next few years! The first report features **Artificial Intelligence Resources** and is a Subject Tracer™ covering all the latest sources and resources about Artificial Intelligence available on the Internet. The second report highlights **Bot and Intelligent Agent Research Resources** and is a Subject Tracer™ covering all areas involved with bots and intelligent agents currently available on the Internet. The third report covers **Prediction Markets** and is a Subject Tracer™ featuring resources, sources and sites that allow for market predictions and related analytics. The URLs for these Subject Tracers™ are:

<http://www.AIResources.info/>

<http://www.BotResearch.info/>

<http://www.PredictionMarkets.com/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest related resources, sources and sites.

Neurology, Neuroscience, and Neurosurgery Websites

<http://www.ucl.ac.uk/ion/library/lib-info/neurology>

For neuroscience professionals, educators, and students, the University of London's Queen Square Library has compiled this extensive resource list of websites related to the history, science, and practice of neurology, neuroscience, and neurosurgery. These resources are helpfully annotated and sorted into categories. For example, in the Neuro-websites category, visitors will find a diverse selection of educational websites as well as links to more specific research lists. Meanwhile, in Neuro-history, visitors will find resources related to the history of neurology as well as the history of science and medicine more broadly. Educators may be especially interested in the Neuro-images section, which highlights sources of photographs and videos that may be of use in the classroom. Many of these images may also be appreciated by members of the general public interested in learning more about neuroscience. This will be added to [Healthcare Resources](#) Subject Tracer Information Blog. Copyright © 2017 Internet Scout Research Group - <http://scout.wisc.edu>.

The College of Physicians of Philadelphia Digital Library

<http://www.cppdigitallibrary.org/>

The College of Physicians of Philadelphia Digital Library is a searchable image database and exhibition platform dedicated to celebrating and communicating the history of medicine. The Digital Library launched in December 2013 with nearly 1,000 images drawn from the Historical Medical Library collection, with strengths in the history of anatomy and botanical medicine. Highlights include images from rare incunabula previously unavailable online, unusual selections from more popular early modern anatomists, and over 300 photos from the Philadelphia General Hospital Photograph Collection. Imaging continues in the College Library, with new items being added monthly. Check back again soon for selections from our collection of Medical Trade Ephemera as well as new exhibitions. This will be added to [Healthcare Resources](#) Subject Tracer™.

Radio Garden

<http://radio.garden>

Radio Garden is an extraordinary new website that allows visitors to listen to over 8,000 live radio stations from around the world. Created by Jonathan Puckey with financial support from the Netherlands Institute of Sound and Vision, Radio Garden utilizes a number of open sourced technologies and the contributions of radio stations from around the globe. As Jonathan Puckey explains in a recent interview with NPR, the project emerged when the Netherlands Institute of Sound and Vision approached Puckey about creating a museum exhibition for a recent, multi-university European research project called Transnational Radio Encounters. Puckey and his team decided to create this website instead. By clicking the above link, visitors will automatically be taken to the Live portion of this website and will be directed to the radio station closest to their current location. From here, visitors can explore other stations around the globe via an interactive map. When visitors select cities with multiple participating stations, a list will appear on the right side of the browser, allowing visitors to choose which station to listen to. By selecting the History tab or Jingles tab, visitors can explore historic radio broadcasts and station jingles from across time and space. Finally, the Stories tab features a number of moving interviews with individuals about the role of radio in their lives. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. The Data Librarian's Handbook

<http://www.facetpublishing.co.uk/title.php?id=300471#.WHfUw1ziCUI>

An insider's guide to data librarianship packed full of practical examples and advice for any library and information professional learning to deal with data. Interest in data has been growing in recent years. Support for this peculiar class of digital information – its use, preservation and curation, and how to support researchers' production and consumption of it in ever greater volumes to create new knowledge, is needed more than ever. Many librarians and information professionals are finding their working life is pulling them toward data support or research data management but lack the skills required. The Data Librarian's Handbook, written by two data librarians with over 30 years' combined experience, unpicks the everyday role of the data librarian and offers practical guidance on how to collect, curate and crunch data for economic, social and scientific purposes. With contemporary case studies from a range of institutions and disciplines, tips for best practice, study aids and links to key resources, this book is a must-read for all new entrants to the field, library and information students and working

enseable City Lab

<http://senseable.mit.edu/>

The real-time city is real! As layers of networks and digital information blanket urban space, new approaches to the study of the built environment are emerging. The way we describe and understand cities is being radically transformed—as are the tools we use to design them. The mission of the Senseable City Laboratory—a research initiative at the Massachusetts Institute of Technology—is to anticipate these changes and study them from a critical point of view. Not bound by the methodologies of a single field, the Lab is characterized by an omni-disciplinary approach: it speaks the language of designers, planners, engineers, physicists, biologists and social scientists. Senseable is as fluent with industry partners as it is with metropolitan governments, individual citizens and disadvantaged communities. Through design and science, the Lab develops and deploys tools to learn about cities—so that cities can learn about them. This will be added to [Research Resources](#) Subject Tracer™. Smithsonian Institution: Sidedoor

<https://www.si.edu/sidedoor>

In October 2016, the Smithsonian Institution launched Sidedoor, a podcast dedicated to "science, art, history, humanity and where they unexpectedly overlap." Hosted and produced by Smithsonian staff members Tony Cohn and Megan Detrie, this podcast explores a wide range of issues in the form of twenty-minute episodes. In the inaugural episode, Cohn and Detrie examine how technology is shaping human interactions and identity via interviews with both researchers and contemporary teenagers. In another episode, dedicated to squabbles throughout history, Cohn and Detrie interview Smithsonian paleontologist Hans Sues on what dinosaur skulls can tell us about physical confrontations between these early creatures. On this website, visitors can listen to podcasts in full and check out related resources from the Smithsonian's collections and other sources. Interested listeners can also subscribe on iTunes. CurryGuide Metasearch Engine

<http://web.curryguide.com/>

CurryGuide.com web portal was initially launched in 1997 as a showcase metasearch engine for products and solutions marketed by our development division at CurryGuide Services. Services included a feature rich metasearch engine with (optional) searching by country; first to be implemented in a metasearch engine. Other new introductions included 'VSE' (virtual search engine); a concept later to be embraced and followed by many others. Our 'BestSeller BookShop' has been a popular tool for many webmasters. Current version of curryguide.com is a fresh re-launch with most of the services modified and enhanced. It includes lots of new features, additional services and powered by our latest HMS metasearch technology. Further expansions are underway and new services and content channels are to added in coming days. Our UK portal will be re-launched by the end of the year and new country portals for Germany, Belgium, and Denmark are being planned. Dynamics 365 - Intelligent Business Applications

<https://www.microsoft.com/en-in/dynamics365/>

With intelligent business applications across CRM and ERP, Microsoft Dynamics 365 gives you choice. Start with just what you need to run your business—and delight your customers. And then add apps as your needs change. Built on an extensible platform with shared data and digital intelligence, Dynamics 365 helps your team make the most of every minute. Features include: a) Purpose-built - Get individual apps that work brilliantly on their own or together—so you can tailor a solution to your needs. And with Business and Enterprise editions, you're covered from a few employees to thousands; b) Productive - Help your employees work more efficiently. Dynamics 365 pulls together your business process apps and familiar Microsoft Office 365 tools. Employees can do CRM tasks in Outlook and ERP tasks in Excel; c) Intelligent - Improve your decisions with data. With Microsoft Power BI, Cortana Intelligence, and Azure Machine Learning built in, Dynamics 365 helps you and your employees turn big data into actionable plans; and d) Adaptable - Give your teams easy-to-use applications that provide a single view of your data—and a single platform for business growth. They all work with Microsoft PowerApps and Microsoft Flow. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

WikiDoc - Medical Knowledge and Collaboration

<http://www.wikidoc.org/>

WikiDoc was created to freely share medical knowledge and to foster collaboration among healthcare providers. Launched by Dr. C. Michael Gibson of Harvard Medical School in late 2005, WikiDoc is the first and largest wiki dedicated to medicine on the Internet. WikiDoc is kept up to date by over 5,000 collaborators around the world. The content has now been updated nearly half a million times. There is no pharmaceutical or device industry support for the site. WikiDoc is intended to be a free shared resource for housestaff (in preparation for morning report), medical students (in preparation for morning rounds) and fellows (in preparation for conferences). Nurses and attending physicians may find WikiDoc valuable in improving and maintaining their fund of general medical knowledge. This will be added to [Healthcare Resources](#) Subject Tracer™.

Techmeme - Latest Tech Happenings

<http://www.techmeme.com/>

In 2017, knowing what's changing in technology is required to understand the cultural currents and business events reshaping the world. If you've been watching the tech industry evolve, it won't surprise you that social networks enable political revolutions, brand new companies can acquire millions of customers in months, or the world's most valuable company built that wealth on products that didn't exist five years ago. Techmeme is the foremost source for tracking these changes. By presenting a summary of the day's essential reports and analysis on a single page, Techmeme has become the technology news site of record for people both within and beyond the industry. Listen - Play Music and Personalized Messages To Your Clients

<http://www.listen.com/>

LISTEN is a fun and easy way to entertain your callers and lets you express your creative side through music. With LISTEN, you get to be the DJ and play songs for your friends and family, allowing you to share your favorite music ringback tone with the people who call you the most. Features: a) **PERSONALIZE YOUR CALLS WITH MUSIC RINGBACK TONES** - With LISTEN, you can assign specific ringback tones to play to certain people at certain times. Play a special song to your Mom on her birthday or enable the Auto-Holiday menu to playback seasonal ringback tones during the holidays. You can also select your favorite default ringback tone to play to all your callers; b) **CAN'T GET TO THE PHONE? NO PROBLEM, WE'VE GOT YOU COVERED** - With Status, you can select pre-programmed voice messages to play to your callers when you're busy in a meeting, driving or at the movies and can't take a call. Status also includes many automated features, including Auto SMS Reply capabilities, Calendar Syncing and Location detection which when enabled, will allow you to automatically reply to calls and text messages with a status message based on your geographic location. You can also create a custom status message with our voice recorder for added personalization; and c) **DRIVE MODE** - Calls and incoming text messages are the worst distractions when you're behind the wheel, but with LISTEN Drive Mode, you'll be able to safely communicate to friends and family when you're driving. Simply enable Drive Mode and it will automatically detect when you're driving and plays a message back to callers informing them that you're busy on the road. You can also choose to send an AUTO SMS Reply that will automatically respond to calls and text messages when you're driving. It's like having a roadside assistant! Scraps - Collect Your Thoughts and Transform Them Into Ideas

<http://scraps.cc/>

Features include: a) **Organize Your Thoughts** - Scraps is a beautiful app for iPhone that helps you collect your thoughts and transform them into ideas. It introduces scrapbox, a place that stores small bits of text or photos you would otherwise dismiss. A single thought might be out of context, but a group of thoughts might make a lot of sense together. You can favorite and archive scraps, or you can organize them into collections and begin forming ideas; b) **When in Rome...** Much like it matters for a beautiful photo, so it can be

important for an idea to know where it popped into your head. This is why every scrap you make can have a location attached. An integrated scrapmap makes it easy to find where scraps were created and to identify places that inspire you most; c) iCloud - You should be able to browse your thoughts everywhere, no matter where they were created. Scraps is designed to work with iCloud. It pushes all your thoughts into the cloud and makes them accessible on every iOS device you own; and d) A Piece of Mind - Some ideas are too fragile to be shared with anybody. Scraps allows you to set a password lock for the entire app, so nobody else can read your thoughts without your permission. The New World of Data: Four Provocations on the Internet of Things

by *Steven Weber, Richmond Y. Wong*

<http://firstmonday.org/ojs/index.php/fm/article/view/6936>

Abstract:

The development and deployment of Internet of Things (IoT) is rapidly emerging as the next major step in the ongoing evolution of the digital society and economy. To gain better insight and foresight into key characteristics that will differentiate this more intensely connected future from the present, we shift the focus of attention in this paper from the Internet of ‘things’ *per se*, to the data that the Internet of Things will generate. We put forward four provocations about IoT data that pose what we argue will be the most critical questions about business models, privacy, economic geography, and security. The next phase of Internet development will raise new challenges — in particular, around risk, governance, and responsibility — that we articulate here as a forward-looking research and action agenda aimed at maximizing the upside potential of IoT over the next decade.
