

# Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V15N6

June 2017

Welcome to the V15N6 June 2017 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and is issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**

**Awareness Watch™ Spotters**

**Awareness Watch™ Book/Paper/Article Review**

**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

## **Awareness Watch™ Featured Report**

This month’s featured report covers **World Wide Web Reference on the Internet 2017** and is a comprehensive listing of reference resources and sites about the World Wide Web and the Internet designed for webmasters and IT professionals. The world is rapidly changing as transparency, big data and the ability to access data from new and now accessible reference databases about the worldwide web become a true reality! These resources are constantly updated by my Subject Tracer™ Information Bots and the latest reference resources about the world wide web and the Internet are available from the following URL:

<http://www.WWWReference.info/>

This is one of the fastest growing and changing areas on the Internet and these resources will help to keep you current and up to date with WWW reference resources and data analytics as well as the latest resources for searching the entire Internet including the Deep Web. These resources will help you to discover the many pathways available to you through the Internet to find the latest WWW reference resources, sources and sites and to actively participate in the New Economy happenings and events!

## **Awareness Watch™ Spotters**

### **Updated> Academic and Scholar Search Engines and Sources**

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 78 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address that can be accessed. It is freely available as a .pdf file (518KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: May 1, 2017].

Other white papers are available by clicking [here](#).

### **Updated> Deep Web Research and Discovery Resources 2017**

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2017** and it is now a 50 page 351KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered. Currently this has been downloaded over 5,000,000+ times!

**May 1, 2017**

## Updated> Genealogy Resources 2017

<http://GenealogyResources.info/>

The white paper link dataset compilation of the [Genealogy Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) and is a freely available 19 page .pdf document (191KB) listing the latest and greatest online resources and sites for genealogy! **Completely Updated including all links validated and new links added on May 1, 2017.** Other white papers are available by clicking [here](#).

## DIRECT2Experts - Distributed Interoperable Biomedical Research Experts Collaboration Tool

<http://direct2experts.org/>

The DIRECT2Experts network, open to all biomedical institutions, is a pilot project facilitated by the Research Networking Working Group of the NIH-supported Clinical & Translational Science Award (CTSA) Consortium. Their goal is to improve biomedical research and leverage our strengths as a community by creating a network that enables easy access to expertise and related resources across institutions regardless of local platforms and tools, and in collaboration with participating institutions to ensure access to approved and verified data. What makes DIRECT2Experts different? a) Rather than searching public databases or asking individual researchers to "sign-up", DIRECT2Experts works directly with institutions to connect to their existing research networking tools.; b) DIRECT2Experts works across different software products and respects local privacy policies, enabling many institutions to participate; and c) The focus of DIRECT2Experts is to bring more institutions and investigators into the fold, allowing for an assessment of the value provided and challenges of searching a national network. This will be added to [Internet Experts](#) Subject Tracer™. This will be added to [Biological Informatics](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## VISUAL INVESTIGATIVE SCENARIOS (VIS)

<https://vis.occrp.org/>

(VIS) is a data visualization platform designed to assist investigative journalists, activists and others in mapping complex business or crime networks. Their aim is to help investigators understand and explain corruption, organized crime and other wrongdoings and to translate complex narratives into simple, universal visual language. VIS provides professionally designed, customizable, dynamic html5 visualization templates allowing you to illustrate entities, networks and complex configurations of data. Visualizations can be exported for use in online, print or broadcast media. VIS emerged from the need of investigative reporters at the Organized Crime and Corruption Reporting Project (OCCRP) and RISE Project to make their in-depth cross-border investigations understandable to a wider public. Their goal is to simplify and enhance work and, at the same time, help the public understand and access data quickly and easily. This will be added to [Journalism Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to the tools section of

[Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **Updated> Bots, Blogs and News Aggregators 2017**

<http://www.BotsBlogs.com/>

Research white paper link dataset compilation **Bots, Blogs and News Aggregators 2017** is now a 18 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf file (319kb) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) . It was updated and all links validated on **May 2, 2017**. Other white papers are available by clicking [here](#).

### **UnPayWall - Read PayWalled Research Papers for Free**

<http://unpaywall.org/>

Click the green tab and skip the paywall. It's fast, free, and legal, powered by our database of millions of author-uploaded PDFs. They are Impactstory, a nonprofit working to make science more open and reusable online. We're supported by grants from the National Science Foundation and the Alfred P. Sloan Foundation. They loathe paywalls. Now more than ever, humanity needs to access our collective knowledge, not hoard it. Lots of scholars feel the same; that's why they upload their papers to free, legal servers online. They realized that the missing link is in getting these free resources to the people who want them, at the right time. By using a browser extension, they can do that, leveraging the toll-access distribution system to bring open access to the masses. They find fulltext for 84% of articles in a sample of 2016 research papers that were highly discussed in the media and online. This percentage will vary, depending on the kinds of articles you are looking at. But they generally get fulltext more than half the time. This is improving quickly as they tweak their algorithm and discovery techniques. And over the longer term, they will keep get even better as mandatory open access requirements begin to take effect in the US, UK, Europe, and elsewhere. Soon Unpaywall users will essentially have a free subscription to all new research. They think that's a game-changer for open access, and for scholarship as a whole. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **Updated> Journalism Resources 2017 White Paper Link Dataset Compilation**

<http://www.JournalismResources.info/>

The above is the associated white paper link dataset compilation of the [Journalism Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) It is a 24 page .pdf document 227KB. [Updated May 3, 2017] Other white papers are available by clicking [here](#).

## Deep Learning Tutorials

<http://deeplearning.net/tutorial/>

Deep Learning is a new area of Machine Learning research, which has been introduced with the objective of moving Machine Learning closer to one of its original goals: Artificial Intelligence. See these course notes for a brief introduction to Machine Learning for AI and an introduction to Deep Learning algorithms. Deep Learning is about learning multiple levels of representation and abstraction that help to make sense of data such as images, sound, and text. For more about deep learning algorithms. The tutorials presented here will introduce you to some of the most important deep learning algorithms and will also show you how to run them using Theano. Theano is a python library that makes writing deep learning models easy, and gives the option of training them on a GPU. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Tutorial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## mL(at)H

<https://metalabharvard.github.io>

metaLAB, or mL(at)H, is "an idea foundry, knowledge-design lab, and production studio" that is dedicated to pioneering new ways for libraries to serve communities. Based out of Harvard University's Berkman Klein Center, the metaLAB explores "the digital arts and humanities through research, experimentation, tool building, teaching, through publications in print and online, and via exhibition, performance, and social practice." Within this broad mission, the future of libraries is a special focus. metaLAB is headed by Matthew Battles, who authored the 2003 book *Library: An Unquiet History*. One of metaLAB's ongoing projects, Library Test Kitchen, is a series of workshops that encourage participants to rethink how libraries could function. Recent ideas that have come out of these workshops include a "Neo-Carell Sleeping Chair" (a portable carell that simultaneously serves as a chair, laptop stand, and napping spot) and a WiFi "Cold Spot" to help users disconnect. meanwhile, other metaLAB projects and publications center on the changing nature of preserving and presenting data and objects. For example, Yanni Alexander Loukissas's Life and Death of Data, offers an interactive history of Harvard's Arnold Arboretum Archives. Visitors may scroll through a timeline to see when the Arboretum acquired certain archival materials. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Research Resources](#) Subject Tracer™.

### **Gephi - The Open Graph Viz Platform**

<https://gephi.org/>

Gephi is the leading visualization and exploration software for all kinds of graphs and networks. Gephi is open-source and free. Runs on Windows, Mac OS X and Linux. Gephi is a tool for data analysts and scientists keen to explore and understand graphs. Like Photoshop™ but for graph data, the user interacts with the representation, manipulate the structures, shapes and colors to reveal hidden patterns. The goal is to help data analysts to make hypothesis, intuitively discover patterns, isolate structure singularities or faults during data sourcing. It is a complementary tool to traditional statistics, as visual thinking with interactive interfaces is now recognized to facilitate reasoning. This is a software for Exploratory Data Analysis, a paradigm appeared in the Visual Analytics field of research. Applications include: a) Exploratory Data Analysis: intuition-oriented analysis by networks manipulations in real time; b) Link Analysis: revealing the underlying structures of associations between objects; c) Social Network Analysis: easy creation of social data connectors to map community organizations and small-world networks; d) Biological Network analysis: representing patterns of biological data; and e) Poster creation: scientific work promotion with hi-quality printable maps. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **DataHero - Self Service Cloud Business Intelligence**

<https://datahero.com/>

DataHero is self-service cloud BI that allows any user to quickly connect to cloud services without the help of an IT team. This is data analysis reimagined from the ground up, focusing on intuitive design and experience to enable non-analysts and analysts alike. Suggested charts and drag-and-drop chart creation make it easy to uncover insights within your data and communicate them with dashboards. Features include: a) Import Data From Any Cloud Service - Connect directly to your cloud services for automatically updated insights. Keep all your cloud data in one centralized location for easy accessibility and uniformity across your organization; b) Drag-and-Drop Chart Creation - Get suggested charts based on your specific data within DataHero or create your own customized charts. Segmenting, filtering, cohort analysis and more are as simple as a few clicks of the mouse; c) Combine Your Data - Combine datasets from different services to determine how each aspect of your business affects your bottom line; and d) Insights With Dashboards - Share your most current data with automatically updated dashboards. Ensure everyone is tracking the same KPIs and speaking the same language. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Zillman, M.S., A.M.H.A.](#) It is a 23 page .pdf document 208KB. [All Links Validated and New Links added on May 5, 2017] Other white papers are available by clicking [here](#).

## **World Digital Library (WDL)**

<https://www.wdl.org/>

The World Digital Library (WDL) is a project of the U.S. Library of Congress, carried out with the support of the United Nations Educational, Cultural and Scientific Organization (UNESCO), and in cooperation with libraries, archives, museums, educational institutions, and international organizations from around the world. The WDL makes available on the Internet, free of charge and in multilingual format, significant primary materials from all countries and cultures. The principal objectives of the WDL are to: a) Promote international and intercultural understanding; b) Expand the volume and variety of cultural content on the Internet; c) Provide resources for educators, scholars, and general audiences; and d) Build capacity in partner institutions to narrow the digital divide within and between countries. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Promo Republic - Stand Out On Social Media Using Content Builder**

<http://promorepublic.com/en/>

Create stunning posts in seconds with 100 000+ handcrafted templates, ideas and visuals. Social media content created by big brands and agencies should be great and bring results. That is why they say content is king. Content created by smaller agencies and freelancers often isn't as good, because they do not have any many resources. PromoRepublic's team of content hackers is on a mission. They have created post suggestion technology that is built on algorithms and data that tells the story of future content marketing. This data has told us that content for content's sake isn't enough. Content that is contextual, that connects with social audiences, is necessary for successful social media marketing. That's why they created post suggestions that hit all the necessary touch points, and they have made it accessible to everyone. Best of all, their tool is affordable for small and mid-sized agencies, marketing freelancers and SMEs. This will help increase the quality of content produced by their users, so they can compete with larger brands and agencies. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Cyfe - All-In-One Online Business Dashboard**

<https://www.cyfe.com/>

Cyfe is an all-in-one business dashboard app that helps you easily monitor all your business data from one place. Cyfe has developed a cloud based service that solves this problem by allowing you to easily monitor and share all of your vital business data from one single location in real-time. Features include: 1) Monitor Everything - Monitor individual departments, multiple websites and anything else using dashboards; 2) Pre-built Widgets - Pull data from popular services like Google and Salesforce using pre-built widgets; 3) Custom Data Sources - Securely display data from your company's databases using custom widgets or Push API; 4) Real-time Reports - Share dashboards with management, customers and virtually anybody else; 5) Historical Data - Data from the past is archived within Cyfe, so you will never lose sight of it again; 6) Data Exports - Download or schedule email reports of your data in PNG, JPEG, PDF, and CSV formats; 7) TV Mode - Automatically rotate one or more dashboards for your big screen monitor; and 8) Customizations - Branded reports, domain name mapping, dashboard backgrounds, and more. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Viraltag - Tool for Sharing Visuals**

<https://www.viraltag.com/>

Manage multiple social networks, schedule unlimited posts, recycle evergreen content, collaborate with your team, and analyze performance - all from a single dashboard. Try Viraltag and learn how you can effectively manage all your social media accounts. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

## **Open Educational Resources (OER)**

<https://www.oercommons.org/>

Open Educational Resources (OER) are teaching and learning materials that you may freely use and reuse at no cost, and without needing to ask permission. Unlike copyrighted resources, OER have been authored or created by an individual or organization that chooses to retain few, if any, ownership rights. In some cases, that means you can download a resource and share it with colleagues and students. In other cases, you may be able to download a resource, edit it in some way, and then re-post it as a remixed work. How do you know your options? OER often have a Creative Commons license or other permission to let you know how the material may be used, reused, adapted, and shared. From a single point of access in OER Commons, you can search, browse, and evaluate resources in OER Commons' growing collection of over 50,000 high-quality OER. Here are some curated collections to start exploring: a) Full university courses; b) Interactive mini-lessons and simulations; c) Adaptations of existing open work; d) Open Textbooks; and e) K-12 Lesson Plans, worksheets, and activities. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **RCMI Translational Research Network**

<http://www.rtrn.net/>

A groundbreaking consortium of biomedical, behavioral and clinical researchers working with healthcare providers and the community to address health disparities through collaboration. Research Centers in Minority Institutions (RCMI) Translational Research Network (RTRN) fosters and supports inter-institutional collaboration to maximally leverage outcomes, resources and expertise across member RCMI institutions, enhancing research capacity and accelerating the understanding and treatment of diseases, with a focus on those that disproportionately affect underserved communities. The Strategic Goals of RTRN are to: a) Enhance infrastructure to facilitate multi-site, cross-disciplinary translational research, especially research focused on addressing health disparities. b) Enhance processes to increase the efficiency of conducting multi-site clinical trials and translational research; and c) Enhance web-based research, training, and educational resources for investigators, health care providers, research participants, and the general public. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Nieman Journalism Lab**

<http://www.niemanlab.org>

Journalists and journalism students of all stripes may be interested in the Nieman Journalism Lab, "an attempt to help journalism figure out its future in an Internet age." Established in 2008 by veteran journalist Joshua Benton, the Lab is part of the Nieman Foundation for Journalism at Harvard University, which was founded in 1938 to provide fellowship to innovative journalists, of whom Benton was one such honoree. On this frequently updated website, visitors will find a number of new stories about journalism, social media, and technology, three areas that are becoming increasingly intertwined. Recent news stories include a feature about how STAT, a publication that focuses on health news, will now have a print section in the Sunday Boston Globe, and an investigation of the Argentine newspaper *La Nacion*, which has become a major proponent and actor in the open data movement. Readers interested in receiving daily email updates from the Nieman Lab will want to sign up for The Digest. This will be added to [Journalism Resources](#) Subject Tracer™. ### **Updated> Biotechnology Resources 2017 White Paper Link Dataset Compilation**

<http://www.BiotechnologyResources.info/>

The above is the associated white paper link dataset compilation of the [Biotechnology Resources 2017](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) It is now a 14 page .pdf document 167KB. [**Completely Updated including all links validated and new links added on May 22, 2017**] Other white papers are available by clicking [here](#).

### **CDC: 500 Cities Project**

<https://www.cdc.gov/500Cities>

From the Centers for Disease Control and Prevention (CDC), in collaboration with the Robert Wood Johnson Foundation and the CDC Foundation, comes the 500 Cities Project, an interactive map that allows researchers to quickly access and analyze health data from the 500 largest cities in the United States. Visitors can browse this information, which is drawn from census and city data, in a number of ways. Researchers interested in learning more about data by region can select an individual state on the map. From there, select from three categories (Health Outcomes; Prevention; Unhealthy Behaviors) to view a variety of specific data measurements for cities in that state. Measurements include rates of high blood pressure, smoking, and health insurance coverage, to name just a few. Alternatively, visitors may also chose to simultaneously view all data in the United States for a particular measurement (e.g. prevalence of arthritis). Data is color coded, allowing visitors to compare cities at first glance, or visitors may hover their cursor over any individual city to view available data. In addition to this map feature, researchers can also request a comparison report for two cities, download a PDF copy of 28 data maps, or download all available data. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. Copyright © 2017 Internet Scout Research Group - <http://scout.wisc.edu>

### **Purdue Owl: White Papers**

<https://owl.english.purdue.edu/owl/resource/546/1>

According to the Purdue Owl, a "white paper" is "a certain type of report that is distinctive in terms of purpose, audience, and organization." The term originates from early twentieth century Great Britain, where it was used to describe to an official government document designed to outline a particular viewpoint and provide supportive evidence and information. Today, the term is used more broadly in the business and nonprofit world to describe similar publications that are intended not for commercial use, but to advocate an official position or solution. Like all forms of writing, white papers come with their own established norms, and Purdue Owl offers this website that outlines these norms and expectations. In Organization and Other Tips, visitors will find a brief, one-page summary of the major components of white papers. This section also includes a detailed PowerPoint presentation that provides information about the purpose and mechanics of white papers in greater detail. This presentation, 25 slides in length, is free to download and might easily be incorporated into a meeting or professional development session. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Journalism Resources](#) Subject Tracer™. demo site features an efficient, reconfigurable faceted browser with search capabilities offering a compelling demonstration of the value of a common metadata model for open government dataset catalogs. They believe that the vocabulary choices demonstrated by IOGDS highlights the potential for useful linked data applications to be created from open government catalogs and will encourage the adoption of such a standard worldwide. This will be added to [Open Datasets](#) Subject Tracer™. This will be added to [Deep Web Research and Discovery Resources 2017](#). This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™.

### **Updated> Accessibility Resources 2017 White Paper DataSet Link Compilation**

<http://www.AccessibilityResources.info/>

I have just updated my white paper link compilation of the **Accessibility Resources 2017** Subject Tracer™ Information Blog by Marcus P. Zillman, M.S., A.M.H.A. It is a 17 page .pdf document 185KB. [**Completely updated with all links validated and new links added on May 25, 2017**] Other white papers are available by clicking [here](#).

### **Scientific Data Repository - Real Time Visualization and Exploration Techniques**

<http://www.mlvis.com/platform.php>

This project is the first to combine the notion of a data repository with real-time visual analytics for interactive data mining and exploratory analysis on the web. State-of-the-art statistical techniques are combined with real-time data visualization giving the ability for researchers to seamlessly find, explore, understand, and discover key insights in a large number of public donated data sets. This large comprehensive collection of data is useful for making significant research findings as well as benchmark data sets for a wide variety of applications and domains and includes relational, attributed, heterogeneous, streaming, spatial, and time series data as well as non-relational machine learning data. All data sets are easily downloaded into a standard consistent format. We also have built a multi-level interactive visual analytics engine that allows users to visualize and interactively explore the data in a free-flowing manner. This will be added to [Open Datasets](#) Subject Tracer™. This will be added to [Deep Web Research and Discovery Resources 2017](#). This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This will be added to [Online Research Browsers 2017](#).

### **US Government Web Services and XML Data Sources**

<http://usgovxml.com/>

USGovXML.com is an index to publicly available web services and XML data sources that are provided by the US government. USGovXML.com indexes data sources from all 3 branches of government as well as its boards, commissions, corporations and independent agencies. This will be added to [Open Datasets](#) Subject Tracer™. This will be added to [Deep Web Research and Discovery Resources 2017](#). This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Statistics Resources and Big Data](#) Subject Tracer™. This will be added to [New Economy Resources 2017](#).

## Updated> **Biological Informatics 2017 Subject Tracer White Paper Link Dataset Compilation**

<http://www.BiologicalInformatics.info/>

I have just updated my Subject Tracer™ Information Blog white paper link dataset compilation titled **Biological Informatics 2017** which is now a 36 page paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about biological informatics that are available over the Internet. It is freely available as a .pdf file (305KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was completely updated including link validation and new links added on **May 26, 2017**. Other white papers are available by clicking [here](#).

## **AlternativeTo - Crowdsourced Software Recommendations**

<http://alternativeto.net/>

AlternativeTo is a new approach to finding good software. Tell us what application you want to replace and we give you great alternatives, based on user recommendations. There are 58,289 apps in their database that our users has liked 562,185 times. You guys have had 298,318 opinions about our alternatives. Today alone we have 517 new opinions, 217 new likes and about 18 cups of coffee. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

## **7-Zip - File Archiver With a High Compression Ratio**

<http://7-zip.org/>

7-Zip is open source software. Most of the source code is under the GNU LGPL license. The unRAR code is under a mixed license: GNU LGPL + unRAR restrictions. You can use 7-Zip on any computer, including a computer in a commercial organization. You don't need to register or pay for 7-Zip. The main feature of 7-Zip is high compression ratio in 7z format with LZMA and LZMA2 compression. 7-Zip works in Windows 10 / 8 / 7 / Vista / XP / 2012 / 2008 / 2003 / 2000 / NT. There is a port of the command line version to Linux/Unix. Supported formats: Packing / unpacking: 7z, XZ, BZIP2, GZIP, TAR, ZIP and WIM. Unpacking only: AR, ARJ, CAB, CHM, CPIO, CramFS, DMG, EXT, FAT, GPT, HFS, IHEX, ISO, LZH, LZMA, MBR, MSI, NSIS, NTFS, QCOW2, RAR, RPM, SquashFS, UDF, EFI, VDI, VHD, VMDK, WIM, XAR and Z. For ZIP and GZIP formats, 7-Zip provides a compression ratio that is 2-10 % better than the ratio provided by PKZip and WinZip. trong AES-256 encryption in 7z and ZIP formats. Self-extracting capability for 7z format. ntegration with Windows Shell. Powerful File Manager. Powerful command line version. Plugin for FAR Manager.Localizations for 87 languages. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

### **Updated> International Trade Resources 2017**

<http://www.InternationalTradeResources.info/>

The above is the associated white paper link compilation of the [International Trade Resources 2017](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) It is now a 28 page .pdf document 231KB. **[Updated completely with all link validation and new links added on May 27, 2017]** Other white papers are available by clicking [here](#).

### **FocusWriter - Simple, Distraction-Free Writing Environment**

<https://gottcode.org/focuswriter/>

FocusWriter is a simple, distraction-free writing environment. It utilizes a hide-away interface that you access by moving your mouse to the edges of the screen, allowing the program to have a familiar look and feel to it while still getting out of the way so that you can immerse yourself in your work. It's available for Linux, Windows, and Mac OS X, and has been translated into many different languages. Features: a) TXT, basic RTF, and basic ODT file support; b) Timers and alarms; c) Daily goals; d) Fully customizable themes; e) Typewriter sound effects (optional); f) Auto-save (optional); g) Live statistics (optional); h) Spell-checking (optional); i) Multi-document support; j) Sessions; k) Portable mode (optional); and l) Translated into over 20 languages. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

### **WPS Office Premium - Complete Office Suite Across All Devices**

<https://www.wps.com/>

Palo Alto-based WPS Office Software is a leading office productivity suite for PC and mobile devices. With more than 1.2 billion installs, WPS Office is a high performing, yet considerably more affordable solution that is recognized as a preferred alternative to Microsoft® Office and is fully compatible and comparable to Microsoft PowerPoint, Excel and Word. The WPS Office suite is available for Windows and Linux-based PCs as well as Android and iOS. WPS Office Software is a subsidiary of Kingsoft Corporation, China's leading Internet services and software company. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™.

### **Updated> Social Informatics 2017 White Paper Link Dataset Compilation**

<http://www.SocialInformatics.net/>

The white paper link dataset compilation of the [Social Informatics](#) Subject Tracer™ Information Resource by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been completely updated, reviewed and link validated and is now a freely available 37 page .pdf document 274KB) listing the latest and greatest online resources and sites for social informatics! **Updated with all links validated and new links added on May 29, 2017.** Other white papers are available by clicking [here](#).

## **Algorithms, Automation and News**

<http://www.algorithmic.news/>

Algorithms and automation increasingly are connected to many aspects of news production, distribution, and consumption. We invite original, unpublished papers to address such issues at an international conference to be held at the Center for Advanced Studies, LMU Munich, May 22-23, 2018 — shortly before the ICA annual convention in Prague, not far from Munich. Thanks to the generous support of our sponsors, there will be no conference fee, and free hotel accommodation will be provided for presenters, in addition to opportunities for need-based travel stipends. Select papers from the conference will be published in a special issue of Digital Journalism as well as a proposed edited volume. On this site, you will find the complete CfP, the timeline of events, and details regarding speakers and organizers. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Research Resources](#) Subject Tracer™. This will be added to [Journalism Resources](#) Subject Tracer™.

## **Fermat's Library**

<http://fermatslibrary.com>

Pierre de Fermat was a French lawyer and mathematician who may be thanked for major developments in geometry and calculus. He also wrote his last theorem in the margins of a paper. In the spirit of all the rich things scribbled in margins (paper and digital), Fermat's Library is a space where "professional scientists, academics and citizen scientists" can annotate one another's academic papers, mathematical equations, and more. Since 2015, the team behind Fermat's Library has provided a free open space for such collaborative annotation. To add comments to any paper, users simply select the paper and click on the portion of the text where they would like to comment, and type a note. As of this write-up, visitors can explore Alan Turing's "Intelligent Machinery, A Heretical Theory," Paul Krugman's "A Theory of Intelligent Trade," and the United States Government's Immigration Act of 1924. Readers are also encouraged to suggest their own papers for annotation by the community. This will be added to [Reference Resources](#) Subject Tracer™. for students and scholars of art history and social studies alike. The organization is based at the University for the Creative Arts (UCA) in Farnham, England, and can be explored in two different ways. The VADS image catalogue lets users browse numerous thematic Collections that span a wide range of time and place. Some collections of note include Designing Britain: Design Archives, University of Brighton, Imperial War Museum: Posters of Conflict, and Netherlands Decorated Books Collection: London College of Communication. Alternatively, visitors can browse The Learning Index (found under Resources) for educational materials that center on visual materials from the collection. For example, one such Learning Index collection, Calligraphy: An Education in Letter Form, features detailed information about the history of the art of calligraphy as well as external book and web resources. This will be added to [Reference Resources](#) Subject Tracer™. Copyright © 2017 Internet Scout Research Group - <http://scout.wisc.edu>.

### **Updated> Auction Resources 2017 White Paper Link Dataset Compilation**

<http://www.AuctionResources.info/>

The above is the associated white paper link dataset compilation of the **Auction Resources** Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) It is a 16 page .pdf document 192KB. [Completely updated including all link validation and new links added on May 31, 2017] Other white papers are available by clicking [here](#).

## **Awarenesswatch™ Paper Review**

### **Emanations of the Informational State: Cyber Operations and the Difficulties**

by *Sandra Braman*

<http://firstmonday.org/ojs/index.php/fm/article/view/7414>

#### **Abstract:**

The *Tallinn Manual* of 2013 and its second edition, the *Tallinn Manual 2.0* of 2017, are NATO-funded analyses of how existing international laws of war apply to cybersecurity and cyberwarfare. The difficulties faced by the groups of legal experts who produced these works often involve fundamental aspects of what it is to be a state altogether, challenging the survival of the state as a dominant political form altogether. These developments, in turn, provide significant challenges to the survival of the Westphalian system within which states have been defined for almost 500 years. This article thinks through the Tallinn manuals from the lens of what debates over the appropriate legal treatment of cyber operations under international law tells us about how the state is being experienced and understood in the second decade of the twenty-first century. Comparative analysis of the first and second editions of the Manual shows that just what the informational state is, what it can do, and what it should be allowed to do is becoming less clear, not more, over time.
