

# Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V16N10

October 2018

Welcome to the V16N10 October 2018 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**  
**Awareness Watch™ Spotters**  
**Awareness Watch™ Book/Paper/Article Review**  
**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

## **Awareness Watch™ Featured Report**

This month’s featured report covers **2019 Guide to Privacy Resources on the Internet** and is a comprehensive listing of internet privacy tools and resources including search engines, directories, subject guides and index resources and sites on the Internet available for the 2019 year. The below list of sources is taken partially from my Subject Tracer™ white paper titled Privacy Resources 2019 and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.PrivacyResources.info/>

These resources and sources will help you to discover the many pathways available through the Internet to find the latest privacy research resources, sources, tools and sites. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The true way to search the Internet and social media for privacy resources, sources and tools is to use the below listed tools and resources and include the deep web. These resources will be your pathfinder to all the important and ever changing 2019 new economy resources!

# 2019 Guide to Privacy Resources on the Internet

By

Marcus P. Zillman, M.S., A.M.H.A.  
Executive Director – Virtual Private Library  
[zillman@virtualprivatelibrary.com](mailto:zillman@virtualprivatelibrary.com)

The **2019 Guide to Privacy Resources on the Internet** is a comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. The below list of sources is taken from my Subject Tracer™ Information Blog titled Privacy Resources and is constantly updated with Subject Tracer™ bots from the following URL:

<http://www.PrivacyResources.info/>  
<http://www.StealthMode.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest privacy sources and sites.

### **Leverton Platform - Turn Unstructured Documents Into Structured Data**

<https://www.leverton.ai/the-leverton-platform>

Their platform is a powerful tool to efficiently manage corporate documents and the data within. Their AI-based, Deep Learning algorithms automatically extract relevant information out of documents and, thus, enable easy access to structured data. The link to the original PDF data source is always kept, allowing for easy auditability. Simply upload your documents into our platform, have their AI algorithms extract the relevant information, review the extracted data and access a structured data repository with their Explore application. Their Integrator enables seamless data integration to various target systems, such as SAP, MRI, Amana, and many others. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **eBrevia - Intelligent Contract Analysis**

<https://ebrevia.com/>

eBrevia uses industry-leading artificial intelligence, including machine learning and natural language processing technology, developed in partnership with Columbia University to extract data from contracts, bringing unprecedented accuracy and speed to contract analysis, due diligence, and lease abstraction. eBrevia's clients come from a variety of industries including energy, education, technology, legal, heavy equipment, industrial products, building materials, commercial real estate, audit/consulting, business process outsourcing, financial services, professional services, pharmaceutical, and private equity. They include some of the world's largest corporations, law firms and audit/consulting firms. Their off the shelf products include: a) Contract Analyzer: The Contract Analyzer extracts information from current and legacy contracts to ensure that key contractual data and commitments are not missed. Gain insights into your relationships with customers, vendors, partners, and third parties. Use it to minimize your organization's risks, uncover hidden costs and opportunities, and make more informed business decisions. Populate Excel, Word, or your database with eBrevia-extracted results; b) Diligence Accelerator: The Diligence Accelerator brings unprecedented accuracy and efficiency to due diligence in mergers and acquisitions. Automatically extract key concepts like term, termination, renewal, change of control, assignment, and indemnity. Sellers populate disclosure schedules and buyers close the deal faster, with more accurate diligence results; c) Lease Abstractor: The Lease Abstractor automates the lease abstraction process to provide key data to commercial real estate firms, landlords, tenants, and lenders, by reducing the time and cost involved in manual data abstraction. Once abstracts are complete, export them to Excel, Word, Yardi, Argus, or your proprietary lease management system; and d) Bespoke: Extract industry-specific

provisions with eBrevia Bespoke, our custom contract analytics solution. Leverage your expertise to train the software or utilize eBrevia's legal experts to train it for you. Apply our machine learning technology to bring your contract review to the next level. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **ThoughtRiver - Assess Contracts Without Reading Them**

<https://thoughtriver.com/>

ThoughtRiver™ addresses a fundamental problem: you don't know whether you need to read a contract without reading it. Their software automates the human triaging process, interpreting key risk issues and dynamically applying corporate policies in order to generate an overall risk score for the contract. With research now suggesting up to 40% of lawyer time is wasted on low value issues, Review tells you which contracts to look at and which issues to focus on, without having to read them first. Review can be used to triage day-to-day contract workflows, large projects such as portfolio reviews, as well as regulatory investigations. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Legal Robot**

<https://www.legalrobot.com/>

Legal Robot uses machine learning techniques like deep learning to understand legal language, then compare the language with other contracts to identify boilerplate vs. custom, measure the complexity and readability of the language, and identify the responsibilities, rights, and terms of an agreement. The information is presented in a way that encourages exploration of the contract in a way that is far more interesting and understandable than legal language. This allows people to quickly interpret the components of the contract, quantify specific risks, as well as identify and resolve defects so people can be more confident in what they sign. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Catalyst - Smarter Discovery**

<https://catalystsecure.com/>

Catalyst designs, builds, hosts and supports the world's fastest and most powerful e-discovery platform. For 20 years, Catalyst has helped global corporations reduce the total cost of discovery and take control of complex, large-scale discovery and regulatory compliance. For 20 years, their goal has been to help corporations and their counsel manage their complex litigation, investigations and regulatory compliance matters cost-effectively and efficiently. Their teams apply innovative technology, experience, foresight and industry expertise to navigate discovery and legal data management challenges, while putting clients in full control. This will be added to [Business](#)

### **Brainspace - Identify and Investigate What Matters Faster**

<https://www.brainspace.com/>

Get the right answers faster with the world's leading investigative analytics platform. Their latest release empowers organizations with augmented intelligence to make smarter, faster, and more informed decisions. Brainspace revolutionizes digital investigations, allowing one person to do the job of several investigators, and find answers in hours rather than weeks. Brainspace's Cluster Wheel showcases Brainspace's dynamic learning by clustering all documents based on conceptual similarity. Users can navigate the clusters like a map, quickly identifying neighborhoods of related documents versus one document at a time. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **7 Simple Data Visualizations You Should Know in R**

<https://www.kdnuggets.com/2018/06/7-simple-data-visualizations-should-know-r.html>

This post presents a selection of 7 essential data visualizations, and how to recreate them using a mix of base R functions and a few common packages. <https://tags.hawksey.info/>

Need a Twitter Archiving Google Sheet? TAGS is a free Google Sheet template which lets you setup and run automated collection of search results from Twitter. This will be added to [Social Informatics](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Oscobo Search Engine for Privacy**

<https://www.oscobo.com/>

Oscobo is a search engine created for the sole purpose of protecting your privacy while you search the web. Oscobo was designed specifically to protect you from the prying eyes of both large corporations and anyone trying to get access to your private information. Oscobo will allow you to search the web with confidence! Oscobo doesn't store your personal information and will never ask you to provide it for any of our search services. They respect your privacy completely and help keep you safe from those who don't. All traffic routed through Oscobo's search engine is SSL encrypted. Meaning your connection between the browser and Oscobo's servers are encrypted. They have also taken their encryption a few steps further by implementing Perfect-Forward Secrecy with their SSL implementation and encrypted your search queries locally to ensure that no one will be able to intercept or decrypt your search queries. They don't use any third-party scripts or analytics on our search engine which protects you from other companies attempting to track your activity. They also don't show your search in the page title or meta information so it never shows up in your browser history. This will be added to [Searching the Internet 2018 - 2019 - The Primer](#). This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## **FRED Economic Data Data**

<https://fred.stlouisfed.org/>

Download, graph, and track 509,000 US and international time series from 87 sources. The Federal Reserve Bank of St. Louis is the center of the Eighth District of the Federal Reserve System. This District includes Arkansas, eastern Missouri, southern Illinois and Indiana, western Kentucky and Tennessee, and northern Mississippi. The Research Division of the Federal Reserve Bank of St. Louis is responsible for advising the Bank president on matters of economic policy. The Division monitors the economic and financial literature and produces research in the areas of money and banking, macroeconomics, and international and regional economics. A diverse group of Bank publications allows the Research Division to address quickly changing economic trends, explore the relevance of historical and current data for economic policy, and expand the understanding of issues relevant to the Eighth District and beyond. The Research Division also furnishes its working papers to provide insight into current Bank interests and developing theories and to stimulate discussion. This site offers a wealth of economic data and information to promote economic education and enhance economic research. The widely used database FRED is updated regularly and allows 24/7 access to regional and national financial and economic data. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## **FRASER - Discover Economic History**

<https://fraser.stlouisfed.org/>

FRASER is a digital library of U.S. economic, financial, and banking history—particularly the history of the Federal Reserve System. Providing economic information and data to the public is an important mission for the St. Louis Fed started by former St. Louis Fed Research Director Homer Jones in 1958. FRASER began as a data preservation and accessibility project of the Federal Reserve Bank of St. Louis in 2004 and now provides access to data and policy documents from the Federal Reserve System and many other institutions. Part of this mission includes seeking out a wide range of historical materials. For a detailed overview of the scope of the FRASER collection, see the Collection Development Policy or this list of highlighted content. In some cases, there are gaps in collections that we strive to fill. Our Needs List identifies the specific documents needed to complete collections already on FRASER, as well as materials we have not yet digitized but would like to. To better inform our users, our staff occasionally add digital material to FRASER from other sources such as the Internet Archive and the American Memory program of the Library of Congress in order to provide further context for materials digitized for FRASER. FRASER can be used in conjunction with other Federal Reserve resources, including FRED, ALFRED, the Federal Reserve History website, and curriculum materials developed by the Fed's economic education staff. To connect the public to our free economic history materials, our staff also add links to FRASER resources from relevant Wikipedia pages. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject

### **Guide to Privacy Resources 2019**

<http://www.StealthMode.info/>

The **Guide to Privacy Resources 2019** is a comprehensive listing of privacy resources currently available on the Internet. These include associations, indexes, search engines as well as individual websites and sources that supply the latest technology and information about privacy and how it relates to you and the Internet. The comprehensive list of sources is taken from my Subject Tracer™ Information Blog titled Privacy Resources and is constantly updated with my Subject Tracer™ bots. These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest privacy sources and sites. [This has been updated on September 1, 2018 and is 48 pages PDF 339KB]

### **IT Central Station - Unbiased Reviews from the Tech Community**

<https://www.itcentralstation.com/>

While eating hummus and kebab in the Hell's Kitchen section of New York City, Russell Rothstein and Naftali Marcus discussed what became the beginning of IT Central Station.

© 2018 Marcus P. Zillman, M.S., A.M.H.A.

Rothstein and Marcus teamed up to build a crowdsourced knowledge platform that helps technology decision makers around the world to better connect with peers and other independent experts who provide advice without vendor bias. With their diverse experience working in enterprise IT as well as in startups, the founders designed an online site that now operates like a Yelp or TripAdvisor for enterprise technology. IT Central Station has grown into a dynamic, real-time platform that offers user information that is current, objective, and relevant. It protects privacy in that users can either post anonymously to freely express their views or use their real names to promote their expertise. It enables knowledgeable experts, including real users and independent consultants, to share their expertise in a high quality community of decision makers. As a result, the community thrives as a valuable resource, ensuring that technology professionals get access to the right information and connect to the right people—for any topic, at any time. The Wall Street Journal calls us The Yelp for Enterprise Technology. Join the crowdsourcing revolution for enterprise tech at IT Central Station. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Media Forensics (MediFor)**

<https://www.darpa.mil/program/media-forensics>

Historically, the U.S. Government deployed and operated a variety of collection systems that provided imagery with assured integrity. In recent years however, consumer imaging technology (digital cameras, mobile phones, etc.) has become ubiquitous, allowing people the world over to take and share images and video instantaneously. Mirroring this rise in digital imagery is the associated ability for even relatively unskilled users to manipulate and distort the message of the visual media. While many manipulations are benign, performed for fun or for artistic value, others are for adversarial purposes, such as propaganda or misinformation campaigns. This manipulation of visual media is enabled

Awareness Watch V16N10 October 2018 Newsletter

<http://www.AwarenessWatch.com/>

[zillman@VirtualPrivateLibrary.com](mailto:zillman@VirtualPrivateLibrary.com)

eVoice: 800-858-1462

© 2018 Marcus P. Zillman, M.S., A.M.H.A.

by the wide scale availability of sophisticated image and video editing applications that permit editing in ways that are very difficult to detect either visually or with current image analysis and visual media forensics tools. The forensic tools used today lack robustness and scalability, and address only some aspects of media authentication; an end-to-end platform to perform a complete and automated forensic analysis does not exist. DARPA's MediFor program brings together world-class researchers to attempt to level the digital imagery playing field, which currently favors the manipulator, by developing technologies for the automated assessment of the integrity of an image or video and integrating these in an end-to-end media forensics platform. If successful, the MediFor platform will automatically detect manipulations, provide detailed information about how these manipulations were performed, and reason about the overall integrity of visual media to facilitate decisions regarding the use of any questionable image or video. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **The Identify Programme**

<https://www.gsma.com/identity/identity-programme>

Enabling trust and creating value through digital identity. Across many industries such as entertainment, banking, health and e-government, services and processes are becoming both more digital and more mobile. This has resulted in unprecedented efficiency and convenience for individuals and businesses alike. However, consumers are increasingly demanding to access these services securely by being shielded by robust privacy safeguards and strong data protection. Built on the successes and strategic insights delivered by the GSMA Mobile Identity programme in 2013, the GSMA Identity programme is one of the GSMA's top four priority programmes. It has developed Mobile Connect, a digital identity solution that offers a safe, seamless and convenient consumer experience, a consistent user interface and low barriers to entry across the digital identity ecosystem – thereby enabling global scale. Mobile Connect is a secure login system that enables individuals to access their online accounts with just a single click or, where appropriate, automatically. Mobile Connect can provide different levels of security, ranging from low-level website access to highly-secure bank-grade authentication. Mobile Connect promises to make passwords a thing of the past. To use the service, individuals subscribing to a participating operator simply need to click on a website's Mobile Connect button. A new standard in digital authentication, Mobile Connect will help mobile operators to manage consumers' digital identities across multiple online services, ranging from access to content and services on the web through to more secure e-government and banking services. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## **Introduction to Web Authentication: The New W3C Spec**

<https://auth0.com/blog/introduction-to-web-authentication/>

News about Web Authentication, or WebAuthn for short, reaching maturity and being enabled by default in web browsers hit the headlines recently. Web Authentication is a fairly recent W3C standard backed by major players like Google, Paypal, Mozilla, Microsoft, and Qualcomm. It aims at defining a web-browser API for the creation and use of strong authentication credentials based on public key cryptography. The driving force behind the proposal is to increase security for the authentication process by removing or complementing password-based authentication while remaining convenient for end-users. Although implementations are still in their early days, and the standard has not been finalized, the strong push from major players, and the fact that both Firefox and Chrome are enabling their implementations by default, are strong indicators that this may cause a significant impact in the authentication space. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## **Fido Alliance - Simpler Stronger Authentication**

<https://fidoalliance.org/>

FIDO is the World's Largest Ecosystem for Standards-Based, Interoperable Authentication. The specifications and certifications from the FIDO Alliance enable an interoperable ecosystem of hardware-, mobile- and biometrics-based authenticators that can be used with many apps and websites. This ecosystem enables enterprises and service providers to deploy strong authentication solutions that reduce reliance on passwords and protect against phishing, man-in-the-middle and replay attacks using stolen passwords. This will be added to [Script Resources](#) Subject Tracer™. This will be added to [World Wide Web Reference](#) Subject Tracer™. ## Open Knowledge Maps

<https://openknowledgemaps.org/>

Map a research topic. Get an overview - Find Papers - Identify relevant concepts. Their Goal is to revolutionize discovery of scientific knowledge. We are building a visual interface that dramatically increases the visibility of research findings for science and society alike. We are a non-profit organization and we believe that a better way to explore and discover scientific knowledge will benefit us all. Advantages include: 1) Get an overview of a research topic: knowledge maps provide an instant overview of a topic by showing the main areas at a glance, and papers related to each area. This makes it possible to easily identify useful, pertinent information; 2) Separate the wheat from the chaff: we cluster similar papers together. This makes it easier to identify relevant content when you are searching for an ambiguous term, or when you would like to identify content from a single discipline in a multidisciplinary field; 3) Identify relevant concepts: one of the most difficult tasks when you are new in a research field is to learn the “language” of the field. Open Knowledge Maps makes it easier for you by labeling research areas with relevant concepts; and 4) Find open content: our knowledge maps include both closed and open access papers. However we highlight open access papers - and the majority of those papers can be read from within the interface. And if not, the fulltext is only a click away. How it works: a) An Open Knowledge Maps visualization presents you with a topical overview for your search term. It is based on the 100 most relevant documents for your search term; b) They use text similarity to create the knowledge maps. The algorithm groups those papers together that have many words in common; and c) The visualization is intended to give you a head start on your literature search. You can also use Open Knowledge Maps to stay up-to-date - just limit your search to the most recent papers in the options. This will be added to [Knowledge Discovery](#) Subject Tracer™. This will be added to [2019 Guide to Searching the Internet](#). This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

## Wikiquote - Free Quote Compendium

[https://en.wikiquote.org/wiki/Main\\_Page](https://en.wikiquote.org/wiki/Main_Page)

Wikiquote is a free online compendium of sourced quotations from notable people and creative works in every language, translations of non-English quotes, and links to Wikipedia for further information. There is a page for each month where previous "Quotes of the Day" for each date are listed, and where registered users can make suggestions or rank suggestions for upcoming dates. The Quotes of the Year page and other archives contain more extensive listings of quotes that have already been used. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **MedPix® - Free Open-Access Online Database of Medical Images**

<https://medpix.nlm.nih.gov/home>

MedPix® is a free open-access online database of medical images, teaching cases, and clinical topics, integrating images and textual metadata including over 12,000 patient case scenarios, 9,000 topics, and nearly 59,000 images. Our primary target audience includes physicians and nurses, allied health professionals, medical students, nursing students and others interested in medical knowledge. The content material is organized by disease location (organ system); pathology category; patient profiles; and, by image classification and image captions. The collection is searchable by patient symptoms and signs, diagnosis, organ system, image modality and image description, keywords, contributing authors, and many other search options. In addition to searching and browsing images and cases, the MedPix® website provides free AMA Category 1 CME credits online. Earn up to 30 minutes of CME with each completed case. We are actively seeking new case contributions - which become your digital publication on MedPix® at the National Library of Medicine. Please join us in supporting one of the world's largest Open-Access healthcare Teaching Files. This will be added to [Healthcare Resources](#) Subject Tracer™. ### **Honest Product Reviews**

<https://honestproductreviews.com/>

Honest Reviews For The Best Products .... HONEST PRODUCT REVIEWS HAS ONE FAIRLY SELF-EXPLANATORY GOAL: To create honest product reviews, free of all the fake spam on the internet. It's a simple goal to strive for, and they adhere to it by sticking to 2 simple principles. Honest Product Reviews funds it's content creation with affiliate commissions. However they don't take those commissions into account WHATSOEVER they are curating their reviews. They put their physical products through the ringer very rigorously, and they scour the internet to make sure that nobody has a bad experience with the products they recommend. To that end, they also add AS MUCH content as possible to ensure that the users have a 360 view on every product. Most product reviews on the internet are around 800 words. Their's average 8000 words.(that's pretty much a book!) Located in the heart of Silicon Valley, Honest Product Reviews is a true-blue tech company. They use machine learning algorithms to identify products on e-commerce sites that are being inflated by fake reviews. They scrape that data and make sure that NONE of those products are ever included in their recommendations. They will be revealing this technology to the public at some point, but for now, we want to make sure that it doesn't end up in the wrong hands. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Trademark Encyclopedia - Information About Trademarks**

<http://www.trademarkencyclopedia.com/>

Trademark Encyclopedia is the source of trademark information on the Web. Carefully categorized, easy to find, with detailed descriptions all the most useful information about trademarks in one place. Trademark is a legally protected, unique product element

Awareness Watch V16N10 October 2018 Newsletter

This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **ProtonVPN**

<https://www.protonvpn.com>

ProtonVPN is a virtual private network service produced by the company that runs the ProtonMail high-security email service. ProtonVPN is similarly designed to be a high-security VPN suitable for journalists and political activists. The service exclusively uses ciphers designed for Perfect Forward Secrecy, which means that a compromised encryption key cannot be used to decrypt past sessions. ProtonVPN's parent company is based in Switzerland, a country with famously strict privacy laws. Switzerland is not a member of either the five eyes or the fourteen eyes global surveillance networks. ProtonVPN also includes a kill switch feature that will disable internet service entirely when the VPN connection unexpectedly drops. Many other VPN systems react to a connection drop as if it were a deliberate shutdown of the VPN and begin sending traffic over the regular internet. ProtonVPN's free tier allows access from a single device from up to 3 countries. Paid plans offer more devices and higher speeds. Client software is available for Windows, macOS, and Linux computers as well as Android and iOS mobile devices. This will be added to [World Wide Web Reference](#) Subject Tracer™. ### **Common Crawl**

<http://commoncrawl.org/>

The Common Crawl Foundation is a California 501(c)(3) registered non-profit founded by Gil Elbaz with the goal of democratizing access to web information by producing and maintaining an open repository of web crawl data that is universally accessible and analyzable. Their vision is of a truly open web that allows open access to information and enables greater innovation in research, business and education. They level the playing field by making wholesale extraction, transformation and analysis of web data cheap and easy. The Common Crawl corpus contains petabytes of data collected over the last 7 years. It contains raw web page data, extracted metadata and text extractions. The Common Crawl dataset lives on Amazon S3 as part of the Amazon Public Datasets program. From Public Data Sets, you can download the files entirely free using HTTP or S3. As the Common Crawl Foundation has evolved over the years, so has the format and metadata that accompany the crawls themselves. They build and maintain an open repository of web crawl data that can be accessed and analyzed by anyone. Here is years of free web page data to help you change the world! ### **Developing Evidence-Based Arguments from Texts**

<https://www.readwritethink.org/professional-development/strategy-guides/developing-evidence-based-arguments-31034.html>

Educators in many disciplines may be interested in Developing Evidence-Based Arguments from Texts, a strategy guide from ReadWriteThink. Constructing a logical and well-supported argument is one of the fundamental skills needed to write a successful paper and it is something that many students struggle with when learning how to write. This strategy guide is intended for use with students in grades 6-12, but instructors and teaching assistants at the undergraduate level may also find helpful teaching tips here. It includes multiple suggestions for explaining the difference between argument and

persuasion, as well as downloadable handouts, links to sample essays for illustration, and links to related ReadWriteThink resources. This strategy guide was published by the National Council of Teachers of English and authored by Scott Filkins, a high school English and math teacher in Champaign, Illinois. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Student Research Resources](#) Subject Tracer™. ### **Scrivener - Research Within Reach**

<https://www.literatureandlatte.com/scrivener/overview>

Scrivener is the go-to app for writers of all kinds, used every day by best-selling novelists, screenwriters, non-fiction writers, students, academics, lawyers, journalists, translators and more. Scrivener won't tell you how to write—it simply provides everything you need to start writing and keep writing. Tailor-made for long writing projects, Scrivener banishes page fright by allowing you to compose your text in any order, in sections as large or small as you like. Got a great idea but don't know where it fits? Write when inspiration strikes and find its place later. Grow your manuscript organically, idea by idea. Whether you plan or plunge, Scrivener works your way: hammer out every last detail before typing a word, or carve out a draft and restructure later. Or mix your methods and do a bit of both. In Scrivener, everything you write is integrated into an easy-to-use project outline. So working with an overview of your manuscript is only ever a click away, and turning Chapter Four into Chapter One is as simple as drag and drop. Need to refer to research? In Scrivener, your background material is always at hand, and you can open it right next to your work. Write a description based on a photograph. Transcribe an interview. Take notes about a PDF file or web page. Or check for consistency by referencing an earlier chapter alongside the one in progress. Once you're ready to share your work with the world, compile everything into a single document for printing, self-publishing, or exporting to popular formats such as Word, PDF, Final Draft or plain text. You can even share using different formatting, so that you can write in your favorite font and still satisfy those submission guidelines. This will be added to [Journalism Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™ This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Inoreader - Content Reader for Power Users**

<https://www.inoreader.com/>

Discover, share and read the best on the web: Inoreader is not just another RSS reader - it's a vibrant community of content curators. Your next favorite piece of content is just around the corner and you're sure to find it with Discovery mode, user-generated subscription bundles or broadcasting channels. Save time with automation: You can now beat information overload once and for all - and spend more time enjoying quality

content. With Rules, you can automatically tag and organize articles as they come in. Search and read unlimited subscriptions for FREE: All the news and content you desire are right at your fingertips. Inoreader gives you unlimited subscriptions for free, and our powerful search is also free by default - as it very well should be! Never miss an article with a full RSS archive: Forget about limited time archives - all your content is safe with us for viewing later, so you can access that long forgotten blog post you liked so much whenever you feel like it. Get access to all the features you'll need straight away: You can try out Inoreader's arsenal of power user features straight after signing up. If you require more freedom, you can always upgrade to one of our flexible plans. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **TeamViewer**

<https://www.teamviewer.us/>

The Free All-In-One Software for Remote Desktop Access, Remote Support and Online Meetings. Access Your Remote Computers, Mobile & IOT Devices or Fire-walled Servers from Anywhere at Any Time. Support Your Employees & Clients (or Friends) All Over the World With Zero Travel Costs. Remote Access Breakthrough! Now You Can Share your LIVE iPhone & iPad screens with your Support Team from Anywhere. Launched in 2005, TeamViewer™ focuses on cloud-based technologies to enable online support and collaboration in real time across the globe. Remote support, remote access, and online collaboration are not mere buzzwords. They represent helping people, better-integrating technology into our daily lives, and creating new ideas. They believe that wonderful things happen when people get together, and technology should make this possible for them from anywhere in the world. It should act as a catalyst to promote and amplify people's ideas and their ability to solve issues and overcome challenges. People have collectively used the technology from TeamViewer in billions of instances where distance and time would have otherwise prevented them from accomplishing their goals. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **RSS Ground - Automate Your Content Discovery and Sharing**

<https://www.rssground.com/>

Manage your blogs & social networks more effectively. The core of our service is a FEED. Some people call them RSS feeds, RDF feeds, web feeds, atom feeds, channels, xml feeds, news feeds and other weird names we are yet to find out. They call them content feeds. Feed is actually a very smart little file that updates its content as soon as its source updates. Think of it as a "container" for your content. Features include: 1) Unlimited content sources - Access any public feed, generate private feeds, work with datafeeds and personal feeds. Manage your content like a PRO; 2) Automated content

### **ValoreBooks - The Cheapest Textbooks**

<https://www.valorebooks.com/>

At ValoreBooks, we understand how expensive college can be. That's why we give students the option to buy or rent cheap textbooks from over 18,000 verified sellers and rental providers who compete to provide the absolute lowest prices. The average student saves about \$500 per year when buying or renting all of their required books from our marketplace. ValoreBooks also lets you sell text books directly to us at the highest buy back prices online. ValoreBooks is and always will be dedicated to making your college experience better. This will be added to [ShoppingBots Online Shopping 2018](#) Subject Tracer™.

### **Cryptotickerr - Crypto News You Need to Know**

<https://cryptotickerr.com/>

Each day they save you time by curating the most important stories from all crypto news sources. Each story is condensed into a fact-loaded, less than 400 character news bite. They send you only one email per day, making sure you get the news without getting overwhelmed. cryptotickerr was created by a couple of crypto enthusiasts who got overwhelmed by crypto price talk, spam stories & wasted hours sifting through tons of resources for latest news. They've built Software businesses and understand technology & business fundamentals without much care about price and market craziness. ### **Retrieval Practice - Transform Teaching with the Science of Learning**

<https://www.retrievalpractice.org/>

“Retrieval practice” is a learning strategy where we focus on getting information out. Through the act of retrieval, or calling information to mind, our memory for that information is strengthened and forgetting is less likely to occur. Retrieval practice is a powerful tool for improving learning without more technology, money, or class time. On this website (and in our free Retrieval Practice Guide), we discuss how to use retrieval

58

Awareness Watch V16N10 October 2018 Newsletter

practice to improve learning. Established by nearly 100 years of research, retrieval practice is a simple and powerful technique to transform teaching and learning. In order to improve learning, we must approach it through a new lens – let's focus not on getting information "in," but on getting information "out." This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Online News Archive**

<https://onlinenewsarchive.com/>

Access a massively comprehensive database of crawled online news articles to supercharge your research and analytics. The Online News Archive lets you explore news content as a massive; machine-readable database, dating back from 2014 and constantly expanding. The archive is built on the Webhose.io news data feed, which powers the world's leading media monitoring, market research and financial analysis companies. With nearly a decade of expertise in discovering, crawling and parsing online sources, we provide industry-leading coverage across multiple content domains. The Online News Archive is a subsidiary of Webhose.io, which is the brainchild of Ran Geva and Guy Mor, two entrepreneurs with extensive experience in technology, data mining, and product development who set up to build a simple solution for a complicated problem for anyone who wants to consume data from the web. Use the Online News Archive for: 1) Financial Analysis - Track company and stock performance over time, detect trends and predict the markets; 2) Data Science - Use NLP, machine learning and sentiment analysis to unveil hidden insights in online media; and 3) Market Research - See what the news is saying about major players in your industry, over time. This will be added to [Financial Sources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

### **Habit.fm - Tune In to Your Habits**

<https://habit.fm/>

Habit.fm helps you track the big and little things and become an inspired, organized person. Being able to visualize your habits gives you a strong sense of satisfaction to prove to yourself that you are taking daily steps toward what you want most in life. Features include: a) Flexible habit timings - Schedule habits to occur every day or on specific days. Track habits you need to perform multiple times in a single day; b) Track partial completion of habits - Some days you can't get it all done, and that's OK. Just record what you have managed to get through. It doesn't have to be all or nothing; c) Add notes to habits - Didn't manage to check something off? It's great to have some insights into why, so you can see the patterns over time; d) Companion web app - Drop your phone in the toilet? Don't worry, you can still use the web interface while your phone is out of commission; e) Always synced across all devices - There is nothing worse than losing years worth of data and insights into yourself that you have lovingly collected every single day. Never lose your data again; and f) Extensive roadmap - You spoke, we

### **Awarenesswatch™ Paper Review**

**Facial Recognition, Emotion and Race in Animated Social Media** by *Luke Stark*

<http://firstmonday.org/ojs/index.php/fm/article/view/9406>

#### **Abstract**

Facial recognition systems are increasingly common components of commercial smart phones such as the iPhone X and the Samsung Galaxy S9. These technologies are also increasingly being put to use in consumer-facing social media video-sharing applications, such as Apple's animoji and memoji, Facebook Messenger's masks and filters and Samsung's AR Emoji. These animations serve as technical phenomena translating moments of affective and emotional expression into mediated socially legible forms. Through an analysis of these objects and the broader literature on digital animation, this paper critiques the ways these facial recognition systems classify and categorize racial identities in human faces. The paper considers the potential both for racializing logics as part of these systems of classification, and how data regarding emotional expression gathered through these systems might interact with identity-based forms of classification.

### **Subject Tracer™ Information Blogs**

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
