Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

V16N8   **August 2018**

Welcome to the V16N8 August 2018 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report covers **2018 – 2019 Student Research Tools and Resources** and is a comprehensive listing of student research tools and resources including search engines, directories, subject guides and index resources and sites on the Internet available for the 2018 – 2019 school year. The below list of sources is taken from my Subject Tracer™ white paper titled Student Research Resources 2018 and is constantly updated with Subject Tracer™ bots at the following URL:

http://www.StudentResearch.info/

These resources and sources will help you to discover the many pathways available through the Internet to find the latest student research resources, sources, tools and sites. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The true way to search the Internet and social media for student research resources and tools is to use the below listed tools and resources and include the deep web. These resources will be your pathfinder to all the important and ever changing new economy resources!

2018 – 2019 Student Research Tools and Resources:

Awareness Watch™ Spotters

Caffe - Deep Learning Framework
http://caffe.berkeleyvision.org/
Caffe is a deep learning framework made with expression, speed, and modularity in mind. It is developed by Berkeley AI Research (BAIR) and by community contributors. Yangqing Jia created the project during his PhD at UC Berkeley. Caffe is released under the BSD 2-Clause license. Expressive architecture encourages application and innovation. Models and optimization are defined by configuration without hard-coding. Switch between CPU and GPU by setting a single flag to train on a GPU machine then deploy to commodity clusters or mobile devices. Extensible code fosters active development. In Caffe's first year, it has been forked by over 1,000 developers and had many significant changes contributed back. Thanks to these contributors the framework tracks the state-of-the-art in both code and models. Speed makes Caffe perfect for research experiments and industry deployment. Caffe can process over 60M images per day with a single NVIDIA K40 GPU*. That's 1 ms/image for inference and 4 ms/image for learning and more recent library versions and hardware are faster still. We believe that Caffe is among the fastest convnet implementations available. Community: Caffe already powers academic research projects, startup prototypes, and even large-scale industrial applications in vision, speech, and multimedia. Join our community of brewers

on the caffe-users group and Github. This will be added to Artificial Intelligence Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Updated> Academic and Scholar Search Engines and Sources
http://www.ScholarSearchEngines.com/
Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 82 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (547KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. [**Updated with all links validated and new URLs added: July 1, 2018**]. Other white papers are available by clicking here.

DL4J Deep Learning for Java - Open-Source Distributed Deep Learning Library for JVM
https://deeplearning4j.org/
Eclipse Deeplearning4j is the first commercial-grade, open-source, distributed deep-learning library written for Java and Scala. Integrated with Hadoop and Apache Spark, DL4J brings AI to business environments for use on distributed GPUs and CPUs. Skymind is its commercial support arm, bundling Deeplearning4j and other libraries such as Tensorflow and Keras in the Skymind Intelligence Layer (Community Edition), a deep learning environment that gives developers an easy, fast way to train and deploy AI models. SKIL CE is free and downloadable here. SKIL acts as a bridge between Python data science environments and the JVM. Deeplearning4j aims to be cutting-edge plug and play, more convention than configuration, which allows for fast prototyping for data scientists, machine-learning practitioners and software engineers. DL4J is customizable at scale. Released under the Apache 2.0 license, all derivatives of DL4J belong to their authors. DL4J can import neural net models from most major frameworks via Keras, including TensorFlow, Caffe and Theano, bridging the gap between the Python ecosystem and the JVM with a cross-team toolkit for data scientists, data engineers and DevOps. Keras is Deeplearning4j's Python API. Skymind is the second-largest contributor to Keras after Google, and offers commercial support for Keras. Machine learning models are served in production with Skymind's machine learning server. This will be added to Artificial Intelligence Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Updated> Student Research Resources 2018
http://www.StudentResearch.info/
The above is the associated white paper link dataset compilation for Student Research Resources 2018 Subject Tracer™ by Marcus P. Zillman, M.S., A.M.H.A. . It is a freely available 40 page .pdf (323KB)) document covering all areas for student research available over the Internet! [**Updated with all links verified and new links added on July 1, 2018**] Other white papers are available by clicking here.

Updated> Deep Web Research and Discovery Resources 2018
http://www.DeepWeb.us/
I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2018** and it is now a 58 page 402KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered including adding additional links. Currently this has been downloaded over 6,000,000+ times! **July 1, 2018**

Free Teacher Worksheets
http://www.easyteacherworksheets.com/
EasyTeacherWorksheets.com is a super helpful free resource website for teachers, parents, tutors, students, and homeschoolers. They have a HUGE library of printable worksheets for a many different class topics and grade levels. The teacher worksheets you will find on their web site are for Preschool through High School students. They focus a great deal of their material on the elementary and middle school grades. You will find a wide range of topics covered by their web site. Teachers and Homeschoolers can save tons of time using their website to help their students master certain subjects or specific skills. In their math worksheets section in addition to your standard worksheets, you will find lessons, quizzes, and full answer keys too. Their website is an educator's dream come true because they have a deep volume of exercises for all types of content areas. Thery add new worksheets on a weekly basis. If there is a topic you would like to see added in the future, please let them know and they will have their writers work on that topic. Be sure to follow their Pinterest page to be updated each and every time we add new material. Parents can really benefit by using their math worksheets and reading comprehension worksheets with their children for extra practice. They would recommend viewing their site on a weekly basis and assigning 2-3 extra assignments to your children. With just a single hour of extra practice each week, students should see very positive growth. This will be added to Student Research Resources Subject Tracer™. This will be added to Education and Academic Resources Subject Tracer™.

DAOstack - Toolskit for Exponential Organizations
https://daostack.io/
DAOstack powers decentralized companies, funds and markets to make fast and innovative decisions at scale. Features include: a) Blockchain governance - Decentralized governance based on Ethereum smart contracts enables faultless execution of crowd decisions; b) Programmatic cooperation - Crypto-economic incentive design at the

individual level empowers frictionless cooperation at the collective level; and c) Holographic consensus - Effective decision-making is possible with edge decisions guaranteed to be coherent with the will of the greater majority. This will be added to DAO Resources Subject Tracer™. This will be added to Artificial Intelligence Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Open Educational Resources (OER) Sources 2018
http://www.OERSources.com/
"Open educational resources (OER) are freely accessible, openly licensed text, media, and other digital assets that are useful for teaching, learning, and assessing as well as for research purposes." [Wikipedia] Costs continue to rise for students who are pursing college and post graduate degree programs. By leveraging best practice sites, services and non-traditional options to expand knowledge, skills and abilities in many disciplines, students can choose from a wide range of options to complete their respective goals. This guide, Open Educational Resources (OER) Sources 2018, is a comprehensive listing of useful open educational resources, sources and sites on the Internet that can assist you in optimizing your learning opportunities. This will be added to OERSearchEngine.com/. This will be added to Education and Academic Resources Subject Tracer™. This will be added to Student Research Resources 2018 Subject Tracer™. Updated with all links validated and new links added on July 5, 2018 [23pages, 227KB PDF]

Custom Search Engines 2018 by Marcus P. Zillman
http://www.zillman.us/marcus-services/custom-search-engines/
Custom Search Engines 2018 by Marcus P. Zillman, M.S., A.M.H.A. gives a complete listing of custom active search engines created by Marcus P. Zillman and is constantly adding new and topical search engines. This can also be accessed through Zillman's website by clicking here.

Depsy - Value Software That Powers Science
http://depsy.org/
Depsy helps build the software-intensive science of the future by promoting credit for software as a fundamental building block of science. Features include: 1) Credit when software is informally cited - Depsy text-mines papers to find fulltext mentions of software they use, revealing impacts invisible to citation indexes like Google Scholar; 2) Credit when software is reused -Citation is just part of the story—Depsy analyzes code from over half a million GitHub repositories to find how packages are reused by other software projects; and 3) Credit for all software's authors - Depsy assigns fractional credit to contributors based on designated authorship, number of commits, and repo ownership—supporting a fairer, more software-native reward system. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

MentorCruise

https://mentorcruise.com/

MentorCruise is an education platform which has the goal to connect self-driven and aspiring tech students with experienced and impressive professionals. We currently offer mentorship opportunities in the categories Engineering & Data, Design and Business. Mentors and students can currently choose between the following services: 1) Chat: The ability for students to chat with their mentor. Every mentor has to provide this service; 2) Weekly Goals & Activities: The mentor sets weekly goals and activities for the student. These can consist of small challenges and project or reading material. They are supposed to help towards reaching a bigger end goal; 3) 1-on-1 Talks: The mentor is available for 1-on-1 phone calls. How often these occur, is meant to agreed on between the student and the mentor. They can be irregular and spontaneous or weekly/monthly; 4) Hands-on Coding Support: The mentor is willing to help the student with code, by giving him hints or even pointing out or fixing smaller bugs. Important: Mentors are not freelancers! Wanting them to implement components or help with a commercial product is not tolerated. Mentors: it is okay to say no. This will be added to World Wide Web Reference Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. Reshot - Unify Creators and Elevate Creative Projects

https://www.reshot.com/

They aim to unify creators via a free exchange of the world's best visual content. They are creatives. They know that being a creative professional is more than just a 9 to 5 grind. It's a lifestyle. It's a passion. It's making something from nothing. It's a way of looking at the world around us a bit differently than others do. Reshot provides the

world's best emerging photographers with a beautiful platform for sharing a sampling of their best work for free use in creative projects. Creatives in need of visual content can freely explore and license some of the world's best imagery. The name "Reshot" is a nod to the constant evolution of the creative process. Every reshot iterates toward a better final product. Their mark signifies the coming together of the creative community paying special homage to those creatives who look through the lens. This will be added to World Wide Web Reference Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Healthdata.gov
https://www.healthdata.gov/

List of Academic Databases and Search Engines - Wikipedia
https://en.wikipedia.org/wiki/List_of_academic_databases_and_search_engines
This page contains a representative list of major databases and search engines useful in an academic setting for finding and accessing articles in academic journals, repositories, archives, or other collections of scientific and other articles. Note that "free" or "subscription" can refer both to the availability of the database or of the journal articles included. This has been indicated as precisely as possible in the lists below. This is a dynamic list and may never be able to satisfy particular standards for completeness. This has been added to Academic and Scholar Search Engines and Sources white paper. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™. This will be added to Deep Web Research and Discovery Resources Subject Tracer™.

tutit - On-Demand Virtual Tutoring
https://tutitapp.com/
Tutors – Turn your knowledge into income. Students – Get the "A" that you Deserve. Tutit connects tutors with students anytime, anywhere 24/7. Tutit is an educational app designed to connect students with tutors. This idea came to a University of Tampa student one night while looking for tutoring assistance from his dorm room. This unique app incorporates voice and digital chat capabilities, as well as interactive whiteboard functionality. Students can now connect with tutors 24/7 anywhere, anytime. Our model

is simple, available tutors will respond to a session request within 60 seconds. Each session is billed by the minute, after a five-minute minimum. This will be added to Tutorial Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Business Ethics and Corporate Social Responsibility - BRASS Business Guide
http://brass.libguides.com/businessethics
This guide covers Business Ethics and Corporate Social Responsibility. Business Ethics refers to business philosophy and conduct, particularly regarding controversial issues that may present a moral or ethical dilemma. Corporate Social Responsibility implies a corporation's commitment to play a beneficial role in the environments, economies, and the societies in which they have an impact. Other topics commonly discussed alongside Business Ethics and Corporate Social Responsibility include: a) Triple Bottom Line; b) Regulations on Corporations; c) Fair Labor Practices; d) Insider Trading; e) Corruption; f) Business Culture; g) Corporate Governance; h) Philanthropy; and i) Much much more! This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Citing Business Sources - BRASS Business Guide
http://brass.libguides.com/businessciting
The Publication Manual of the American Psychological Association (APA) is a popular citing style manual consulted by social sciences researchers. The APA manual provides citing examples for many types of information sources; however, it offers little guidance on how to cite specific types of business information, such as financial statements, company and industry profiles, and datasets. To address this, many business librarians have adapted existing APA guidelines to create sample citations for unique business sources. This LibGuide provides direct links to those examples as well as to recent guidelines released through the APA Style Blog. Examples are organized by type of source, including databases, government documents, graphics, datasets, and social media. The citing examples vary depending upon individual interpretations of style guidelines and the resources (ex: database holdings) available to specific institutions. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Economics - BRASS Business Guide
http://brass.libguides.com/economics
THE BRASS ECONOMICS GUIDE offers a selection of the best resources for finding data and information about economics and the U.S. and global economy. Sections included: a) Best Economics Books.; b) Business & Economics News; c) A Guide to Economics Blogs; d) Key Economics Databases; e) Top Economics Journals; and f) U.S. and Int'l Economic Data. This will be added to Business Intelligence Resources Subject

Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™. This will be added to 2018 New Economy Resources.

MOOC List
https://www.mooc-list.com/
MOOC List is an aggregator (directory) of Free Online Courses and Massive Open Online Courses (MOOCs) offered by different providers. MOOC List is a website where you can find Free Online Courses and MOOCs offered by the best universities around the world. This will be added to Student Research Resources Subject Tracer™. This will be added to Education and Academic Resources Subject Tracer™. This will be added to Tutorial Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Ultimate Guide to Free Online Courses
http://www.smartscholar.com/free-online-course-guide/
While the thousands of free online courses available to the public won't net you any college credits, alternative benefits exist. For example, are you thinking about applying for a different position? Gaining a unique skill from an online course could help you stand out among other applicants. Or perhaps you're looking for a way to get noticed by your superiors. Why not take some online classes that will give you expertise in a field that no one else has? No matter what your interests – programming, conflict resolution, online marketing – there's surely an online course that fits within the 40 high-quality resources in this guide. Sections include: a) General Free Online Course Resources; b) Free Online Academic Courses; c) Free Online Software Courses; d) Free Online Photography Courses; e) Free Online Self-Improvement Courses; f) Free Online Business Courses; and g) Free Online Educator Courses. This will be added to Student Research Resources Subject Tracer™. This will be added to Education and Academic Resources Subject Tracer™. This will be added to Tutorial Resources Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Nursing Education Resource Guide
http://www.smartscholar.com/nursing-education-guide/
From caring for patients in critical care settings to teaching nursing classes in colleges or healthcare institutions, a background in nursing or nursing education can lead to a variety of careers. Whether you're a current nurse seeking to become a nurse educator, a nursing student or just someone interested in nursing, you will find a lot of useful information in this guide. You'll find everything from study and teaching resources to links for professional associations, blogs, podcasts and more. Use the 40+ links in this guide to enhance your career, boost your nursing studies or simply develop a deeper understanding of what it's like to pursue or advance a career in the nursing or nursing

education fields. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Computer Science Education Resource Guide
http://www.smartscholar.com/computer-science-guide/
Broadly speaking, computer science is the study of the principles and use of computers. Given that everything from wristwatches to refrigerators is likely to have a computer in it these days, studying computer science is a great move. After all, computer science skills can be used across all industries, making for virtually endless career possibilities. And it doesn't hurt that technology professionals are some of the highest paid out there. This guide is here to help you on your computer science journey. Inside you'll find myriad resources to help expand your understanding of this wide-ranging field of study. Whatever your level of expertise, you'll find something of interest here – from great introductory resources, practical coding resources, study resources and lists of podcasts and blogs. Have fun exploring! This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Education and Academic Resources](#) Subject Tracer™. his will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

A College Student's Guide to Using Coupons
http://www.smartscholar.com/coupon-guide/
Textbooks, school essentials, weekly groceries — all of these expenses eat away at income, costing hundreds. Yet with careful searching and the help of coupons, these costs don't have to rise. Thanks to the incredible savings earned from coupons, shopping without spending too much at the local grocery store is easier than ever. For college students on strict budgets, coupons are an excellent option to keep more cash in the bank. You just have to know where to look for the greatest savings. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Wikidata: A Platform for Your Library's Linked Open Data
http://journal.code4lib.org/articles/13424
Seized with the desire to improve the visibility of Canadian music in the world, a ragtag band of librarians led by Stacy Allison-Cassin set out to host Wikipedia edit-a-thons in the style of Art+Feminism, but with a focus on addressing Canadian music instead. Along the way, they recognized that Wikidata offered a low-barrier, high-result method of making that data not only visible but reusable as linked open data, and consequently incorporated Wikidata into their edit-a-thons. This is their story. This will be added to World Wide Web Reference Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

SocialViz - Social Media Analytics Platform Powered by Social Network Analysis
http://socioviz.net/

SwissCows - Business Search Engine
https://swisscows.com/
Swisscows is the first intelligent answer engine because it is based on semantic information recognition and offers users intuitive help in their search for answers. Swisscows is the efficient alternative for anyone who attaches great importance to data integrity and the protection of privacy. Contrary to search engines, users at Swisscows don't leave any tracks. Swisscows even does without countless analyses of their visitors. Their topics, IP addresses and personal information, are not stored or used for any additional business. All the servers are located in Switzerland and neither the US nor other data snoopers can get their hands on this information. Intelligent Data Cloud technology helps reduce search times because answers are generated quickly and

efficiently from data pools. Therefore, no thinking is required for the search, but the answers the user needs are quickly found. Swisscows is a project of the Hulbee AG. Hulbee AG is a software technology company based in Switzerland. This will be added to World Wide Web Reference Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. Accounting Education Resource Guide
http://www.smartscholar.com/accounting-education-guide/
Whether we're talking about balancing your personal checking account or handling the the books for a small, medium or large business, accounting is a crucial function – and it has been for thousands of years. In fact, some historians credit accounting – essentially the practice of processing and recording financial information – with spurring the development of writing, counting and money. Accounting is all about holding individuals, businesses and other organizations accountable, at least in terms of their financial activities. Without accounting practices – which can include reconciling payroll, properly recording revenue and meeting tax requirements – the financial world would be rife with confusion and fraud. So it's clear that the world needs ethical, well-trained accountants. And that's why we put together this resource guide. Whether you're

studying to become an accountant, you teach accounting or you're a layperson who wants a better understanding of accounting practices and principles, the 40+ individual resources in this guide will connect you to useful information. Check out accounting study resources, teaching resources, blogs and journals and more. This will be added to Student Research Resources Subject Tracer™. Systematic Review Toolbox
http://systematicreviewtools.com/
Systematic reviews are a time consuming, logistically challenging and labour intensive undertaking. These and other challenges have led to the development of various software tools to support the systematic review process. The Systematic Review Toolbox is a community-driven, searchable, web-based catalogue of tools that support the systematic review process across multiple domains. The resource aims to help reviewers find appropriate tools based on how they provide support for the systematic review process. Users can perform a simple keyword search (i.e. Quick Search) to locate tools, a more detailed search (i.e. Advanced Search) allowing users to select various criteria to find specific types of tools and submit new tools to the database. Although the focus of the Toolbox is on identifying software tools to support systematic reviews, other tools or support mechanisms (such as checklists, guidelines and reporting standards) can also be found. The developer and editor of the Systematic Review Toolbox is Dr Chris Marshall. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

System for the Unified Management, Assessment and Review of Information (SUMARI)
https://www.jbisumari.org/
The System for the Unified Management, Assessment and Review of Information (SUMARI) is the Joanna Briggs Institute's premier software for the systematic review of literature. It is designed to assist researchers and practitioners in fields such as health, social sciences and humanities to conduct systematic reviews. SUMARI supports 10 review types, including reviews of effectiveness, qualitative research, economic evaluations, prevalence/incidence, aetiology/risk, mixed methods, umbrella/overviews, text/opinion, diagnostic test accuracy and scoping reviews. It facilitates the entire review process, from protocol development, team management, study selection, critical appraisal, data extraction, data synthesis and writing your systematic review report. Essentially, it is a word processor, reference management program, statistical and qualitative data analysis program all in one easy to use web application. Center for Open Science - OSF
https://cos.io/our-products/osf/
Manage your research in one easy, integrated platform. Collaborate, plan, create, preregister, even publish a preprint. OSF provides free and open source project management support for researchers across the entire research lifecycle. As a collaboration tool, OSF helps researchers work on projects privately with a limited number of collaborators and make parts of their projects public, or make all the project publicly accessible for broader dissemination. As a workflow system, OSF enables connections to the many services researchers already use to streamline their process and increase efficiency. As a flexible repository, it can store and archive research data, protocols, and materials. Features: a) Structured projects: Access files, data, code, and protocols in one centralized location and easily build custom organization for your project - No more trawling emails to find files or scrambling to recover from lost data; b) Controlled access: Control which parts of a project are public or private, making it easy to collaborate and share with the community or just your team; c) Enhanced workflow: Automate version control, get persistent identifiers for projects and materials, preregister your research, and connect your favorite third party services directly to OSF; d) Extensible Research. Automatically create a preprint, meeting abstract, or add to your institutional repository. Manage multi-institutional projects; and e) Dependable Repository: OSF's Preservation Fund ensures that any data stored in the repository would be maintained and protected for 50 years. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. Buzzsumo Question Analyzer
http://buzzsumo.com/solutions/question-analyzer/
Find the most popular questions asked across hundreds of thousands of forums, Amazon, Reddit, Quora and Q&A sites for any keyword. Perfect for researching customer questions, generating content ideas and monitoring questions about topics and brands. Features include: a) Create content that answers the most asked questions - Enter a topic

44

or brand name and instantly see the questions that real people are asking. Results are automatically filtered to clearly display the most frequently asked questions first. Write answers with confidence, knowing they will resonate with your audience; b) Social listening - Find questions in the forums and subreddits your audience uses the most. Questions are sorted by popularity, so you will quickly identify highly relevant topics for targeted audience segments. Going directly to these sources let's you gain greater understanding of your audience's most pressing needs; c) Brand monitoring - Understand how people are talking about your brand. Increase your customers' confidence by responding to their questions outside of your own channels and by dispelling misinformation or providing context when needed. Monitor competitors' brands to identify key product differentiators; d) E-commerce - Provide descriptions that answer common product-related questions. Seeing actual questions about your own product helps to identify gaps in your descriptions before they lead to lost sales; and f) Product Development - Product developers and designers can use the Question Analyzer to conduct research product questions quickly and at scale. Questions reveal what customers like, dislike, the products they are comparing and the concerns they have. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Academic Family Tree
https://academictree.org/
The Academic Family Tree is a nonprofit, user content-driven web database that aims to accurately document and publicly share the academic genealogy of current and historical researchers across all fields of academia. As a modern web application, The Academic Family Tree leverages the knowledge of thousands of individual users into a single, self-correcting database. Access to Tree sites is free, and users are able to contribute content directly. The current project is an outgrowth of Neurotree.org, an effort begun in January 2005 to document training relationships within the field of neuroscience and display them in an intuitive "family tree" format. Soon after Neurotree was established, they realized that mentorship in neuroscience draws substantially from other fields, and that the linkages between fields could be of as much interest as within-field data. They also received requests from researchers in other fields to help establish their own academic genealogies. In order to gather data for a unified academic genealogy, they developed a system that allows multiple genealogies--each one focused on a different academic field--to interface onto the same central database. Today, the database contains about 693,500 people and 611,900 connections between them, and it grows at a rate of about 640 people per week in a large, overlapping canopy of trees. Central to our success and continued growth is the collaborative nature of the project. Users share the benefits of an accurate and complete database, and this motivates them to help maintain it. We value this principle and believe that it must be followed for the project to continue to thrive. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Hoaxy - Visualize the Spread of Claims and Fact Checking
https://hoaxy.iuni.iu.edu/
Hoaxy visualizes the spread of articles online. Articles can be found on Twitter, or in a corpus of claims and related fact checking. The Hoaxy corpus tracks the social sharing of links to stories published by two types of websites: (1) Low-credibility sources that often publish inaccurate, unverified, or satirical claims according to lists compiled and published by reputable news and fact-checking organizations. (2) Independent fact-checking organizations, such as snopes.com, politifact.com, and factcheck.org, that routinely fact check unverified claims. We do not decide what is true or false. Low-credibility sources often publish false news, hoaxes, rumors, conspiracy theories, and satire, but may also publish accurate reports. Therefore not all claims you can visualize on Hoaxy are false, nor can we track all false stories. We aren't even saying that the fact checkers are 100% correct all the time. You can use the Hoaxy tool to observe how unverified stories and the fact checking of those stories spread on public social media. We welcome users to click on links to fact-checking sites to see what they've found in their research, but it's up to you to evaluate the evidence about a claim and its rebuttals. This will be added to Internet Hoaxes Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Botometer
https://botometer.iuni.iu.edu/
Botometer (formerly BotOrNot) checks the activity of a Twitter account and gives it a score based on how likely the account is to be a bot. Higher scores are more bot-like. Botometer is a joint project of the Indiana University Network Science Institute (IUNI) and the Center for Complex Networks and Systems Research (CNetS). This will be added to Bot Research Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

GetData.io - Get Valuable Data from the Web in 3 Steps
https://getdata.io/
Features include: a) Make Better Investment Decisions - 1) Collect huge volumes of stock pricing data daily; 2) Collect data on real estate properties; 3) Collect financial data on companies; and 4) Collect new article titles and contents. Perform regression analysis to do financial modeling; b) Forecast Product Demand - 1) Collect competitor product prices; 2) Collect competitor product features. Perform regression analysis to best position your products against the competition; and c) Monitor Your Brand - 1) Collect online news articles; 2) Collect chats on Reddit; 3) Collect chats on other forums; and 4) Collect product review and ratings. Perform sentiment analysis to know how the market feel about your company and the competition. Community Features include: a) Clickable GUI - Click on any webpage to get data; b) Crawl unlimited pages - Get data from any URL; and c) Accessible APIs - Get data in JSON and CSV formats. Startup Features

include: 1) Private Data Sources - Keep your data private; 2) Flexible Scheduling - Run your crawlers and as frequently as every 15 minutes; 3) Decidated Crawler - No more queuing. Start crawling immediately; and 4) WebHooks - Ping your App after each new crawl is completed. This will be added to Web Data Extractors white paper. August 2018 Zillman Column - 2019 Guide to Searching the Internet
http://columns.virtualprivatelibrary.net/2019_Guide_Searching_Internet_Aug18_column.pdf
http://www.zillmancolumns.com/
The August 2018 Zillman Column features **2019 Guide to Searching the Internet** by Marcus P. Zillman, M.S., A.M.H.A.; Executive Director of the Virtual Private Library. This is a comprehensive listing of search resources currently available on the Internet. These include indexes, search engines, and directories as well as individual websites and sources that supply the latest technology and information about searching and how it relates to you and the Internet. The list of sources is taken from my Subject Tracer™ Information Blog titled Searching the Internet - The Primer and is constantly updated with Subject Tracer™ bots from the following URL: http://www.SearchingTheInternet.info/. These resources will help you to discover the many pathways available to you through the Internet to find the latest search sources and sites. This is another MUST have column to discover the latest competent search resources to give you the information you need in today's ever changing and fast paced 2018 New Economy business and academic world!!

Trova - Search Engine for Annotation Content Archived at The Language Archive
https://tla.mpi.nl/tools/tla-tools/trova/
Trova is a search engine for annotation content archived at The Language Archive. Searchable formats include ELAN EAF, Childes CHAT, Toolbox, PDF, SubRip, Praat TextGrid and others. Results can be viewed as concordance or frequency view and exported as CSV. Tool-tips show additional hit information and hits can be displayed in Annex. You can also jump to the corresponding archive tree location for each hit. To use Trova, select 'annotation content search' in the node context menu (right clicking on a node in the tree) when browsing the archive tree, or do a metadata search and proceed

from the search results to a content search in the found sessions and resources. You can also select multiple nodes (corpora) in the archive tree, then right-click to get a context menu to search in multiple corpora at the same time. This will be added to Searching the Internet 2018 - The Primer. This will be added to Journalism Resources Subject Tracer™. This will be added to Knowledge Discovery Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

AGTK (Annotation Graph Toolkit)
https://tla.mpi.nl/tools2/tooltype/annotation/agtk-annotation-graph-toolkit/
A suite of software components for building tools for annotating linguistic signals, time-series data which documents any kind of linguistic behavior (e.g. audio, video). The internal data structures are based on annotation graphs. Annotation Graphs are a formal framework for representing linguistic annotations of time series data. Annotation graphs abstract away from file formats, coding schemes and user interfaces, providing a logical layer for annotation systems. TLA-Team: The idea of the Annotation Graph Toolkit is based on the famous paper "Annotation Graphs" from Bird & Liberman which was the basis for tools such as ELAN. The AGTK does not seem to be actively maintained anymore. This will be added to Searching the Internet 2018 - The Primer. This will be added to Journalism Resources Subject Tracer™. This will be added to Knowledge Discovery Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Pundit - Create Structured Data Annotating Web Pages
https://tla.mpi.nl/tools2/tooltype/annotation/pundit/
Pundit enables users to create structured data annotating web pages. Collect annotations in notebooks and share with others to create collaborative structured knowledge. Annotations span from simple comments to semantic links to the Web of Data (as Freebase.com and Dbpedia.org), to fine granular cross-references and citations. Pundit can include custom controlled vocabularies ... This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

eMail Finder & Verifier
https://www.prospectking.io/
Prospect King is a tool for finding and managing prospects. You can find and verify email addresses, either one by one or in bulk with a CSV file. You can also use Prospect King for B2b lead generation by with our LinkedIn X-Ray search tool. You can use Prospect King for free whilst we are in Beta. Features include: a) eMail Verifier - Verify B2B email addresses with ease, all email verifications are done in real-time. You can also upload a CSV to verify email addresses in bulk; b) eMail Finder - Find B2B email addresses for your prospecting. You can also find emails in bulk using any CSV file.

Simply upload any list of prospects, including C-suite, CEOs, Management, Directors etc and tey will find their email addresses; c) Prospect Finder - Find B2B prospects for any company world-wide using only the freshest of data. Turbo-charge your B2B lead generation, build high quality prospect lists with our prospect finder; and d) List Deduplicator - Deduplicate your prospect lists with ease, simply select the lists you want to run your file against, then upload the file. This will be added to World Wide Web Reference Subject Tracer™. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™. This will be added to Finding People Resources and Sites Subject Tracer™.

ChatterBot - Convert More Customers Automatically
https://chtb.io/
Chatterbot is free to use now, no credit card required. Chatterbot onboards customers, handles a bunch of tasks and invites you to chat when necessary. Create your first bot in less than 5 minutes. Features included: 1) Implement competences - For either simple or complex purposes using an intuitive builder; 2) Onboard & qualify - Ask users questions, segment them, provide them with helpful content; 3) Use Slack - To reply to chats together & manage your bot; 4) Start chats - Whenever you want. Catch issues, auto assign conversations; and 5) Be interactive - Send GIFs and videos that are worth 1000 words per day. Using Chatterbot to create and improve the bot, you can use Slack for the rest. This will be added to ChatterBots Subject Tracer™. This will be added to World Wide Web Reference Subject Tracer™. New America
https://www.newamerica.org/
Founded in 1999, New America is a think tank and civic enterprise committed to renewing American politics, prosperity, and purpose in the Digital Age. We generate big ideas, bridge the gap between technology and policy, and curate broad public conversation. They are dedicated to renewing America by continuing the quest to realize our nation's highest ideals, honestly confronting the challenges caused by rapid technological and social change, and seizing the opportunities those changes create. ince 1999, New America has nurtured a new generation of policy experts and public intellectuals. Today they are a community of innovative problem-solvers, combining our core expertise in researching, reporting and analysis with new areas of coding, data science, and human-centered design to experiment and innovate nationally and globally. They prize their intellectual and ideological independence and their diversity, seeking to

do our best work and to reflect the America we are becoming. This will be added to [Journalism Resources](#) Subject Tracer™. The Last Word on Nothing
www.lastwordonnothing.com
The Last Word on Nothing is a group blog authored by some of the world's top science writers. The blog's name originates from a Victor Hugo quote: "Science says the first word on everything and the last word on nothing." In the spirit of this quote, the team behind The Last Word on Nothing seeks to explore scientific topics with "curiosity and humility." In one recent blog post, Craig Childs explores the budding field of archaeoacoustics, which examines sound in archaeological contexts. In another blog post, Emma Marris describes her experience eating an "impossible burger" (a veggie burger made with wheat and yeast that is genetically engineered to taste more like beef) and discusses the work and legacy of agricultural scientist Norman Borlaug, who developed disease-resistant wheat. The Last Word on Nothing is updated almost daily, and visitors can browse previous posts by author or by subject. This will be added to [Business Intelligence Resources](#) Subject Tracer™. Comet - Supercharge Machine Learning
https://www.comet.ml/
Comet lets you track code, experiments, and results on ML projects. It's fast, simple, and free for open source projects. Comet works with existing ML libraries and has built-in team collaboration. Comet gives you peace of mind that your experiments, models, and results are saved & secure. Even if team members leave. Comet allows managers and team leads to gain visibility towards team members' experiments, results and progress. Comet allows you to share projects with other data scientists. Collaborators can comment or contribute with new experiments. Features include: 1) Get started in 30 seconds - Throw a single line into your training code and start tracking. Works on any machine with any kind of model; 2) Compare Experiments - Comet lets you compare different experiments and see the differences in code, hyper-params, and many other data points; 3) Collaborate - Share projects (multiple experiments on the same task) with colleagues. Managers gain visibility and insights into their team performance; 4) Documentation - Each project and each experiment has a Notes section that allows you to add documentation; and 5) Git Integration - Comet works with Github and other git providers. Once you finalize your experimentation you can automatically generate a pull request with the best model to your Github repository. Comet lets you track code, experiments, and results on ML projects. It's fast, simple, and free for open source projects. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Bot Research](#) Subject Tracer™. Lumen - Cease and Desist Letters Concerning Online Content
https://www.lumendatabase.org/
Lumen is a project of the Berkman Klein Center for Internet & Society at Harvard University. Lumen is an independent 3rd party research project studying cease and desist letters concerning online content. They collect and analyze requests to remove material from the web. Their goals are to educate the public, to facilitate research about the different kinds of complaints and requests for removal--both legitimate and questionable--that are being sent to Internet publishers and service providers, and to provide as much transparency as possible about the "ecology" of such notices, in terms of who is sending them and why, and to what effect. Their database contains millions of notices, some of them with valid legal basis, some of them without, and some on the murky border. Their posting of a notice does not indicate a judgment among these possibilities, nor are we authenticating the provenance of notices or making any judgment on the validity of the claims they raise. Lumen is a unique collaboration among law school clinics and the Electronic Frontier Foundation. Conceived and developed at the Berkman Center for Internet & Society (now the Berkman Klein Center) by then-Berkman Fellow Wendy Seltzer, Lumen was nurtured with help from law clinics at Harvard, Berkeley, Stanford,

University of San Francisco, University of Maine, George Washington School of Law, and Santa Clara University School of Law. Lumen is supported by gifts from Google. All individual and corporate donors to the Berkman Klein Center agree to contribute their funds as gifts rather than grants, for which there are no promised products, results, or deliverables. Internet Archive WaybackMachine
http://archive.org/web/
Explore more than 332 billion web pages saved over time. The Internet Archive, a 501(c)(3) non-profit, is building a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, they provide free access to researchers, historians, scholars, the print disabled, and the general public. Their mission is to provide Universal Access to All Knowledge. They began in 1996 by archiving the Internet itself, a medium that was just beginning to grow in use. Like newspapers, the content published on the web was ephemeral - but unlike newspapers, no one was saving it. Today they have 20+ years of web history accessible through the Wayback Machine and they work with 450+ library and other partners through their Archive-It program to identify importheir archive contains: a) 279 billion web pages; b) 11 million books and texts; c) 4 million audio recordings; d) (including 160,000 live concerts); e) 3 million videos (including 1 million Television News programs); f) 1 million images; and g) 100,000 software programs. anywhere.link - Effortless Video Calling
https://aw.link/
No waiting time, no downloads and no registrations. No one has to register to join. Just send people the room link to join directly in the browser. When you're unable to answer the call by yourself, rollover the calls received to a team of specialists which will help your customer through anything they might need. With Anywhere.link you're not only able to easily make video calls with anyone but you're also able to install our widget on your own website, allowing your customers to connect with you directly. Imagine a place with no boundaries where you can communicate with anyone, everywhere with one click. This will be added to Business Intelligence Resources Subject Tracer™. This will be added to Entrepreneurial Resources Subject Tracer™. This will be added to the tools section of Research Resources Subject Tracer™.

Awarenesswatch™ Paper Review

Understanding Cyberloafing by Students Through the Lens of an Extended Theory of Planned Behavior by *Patrick Chin-Hooi Soh, Kian Yeik Koay, Vivien K.G. Lim*
http://firstmonday.org/ojs/index.php/fm/article/view/7837

Abstract:
In today's digital world, it is common for students to bring their Internet-connected devices to classes. However, using these devices for non-class-related purposes during lessons can be distracting and detrimental to students' academic performance as well as frustrating for instructors. Defined as the use of organizational resources for work-related purpose (in this case, studies-related purpose; Lim, 2002), cyberloafing has a negative impact on the learning environment as it causes distraction and affects students' attention and ability to focus. In this study, we examined students' cyberloafing behavior through the lens of the theory of planned behavior (TPB). We also examined two new constructs, namely class engagement and habit. In addition, this study tested the role of two specific subjective norms, *i.e.*, descriptive and prescriptive norms, in predicting students' intention to cyberloaf. Data from 238 university students were analyzed with Consistent Partial Least Squares (PLSc) analysis using SMART PLS. Results showed that both habit and intention were significantly related to cyberloafing behavior. Attitude, prescriptive norms and perceived behavioral control were significant in predicting students' intention to cyberloaf. However, descriptive norms were not significantly related to intention. Finally, class engagement played an important role in determining students' attitude towards cyberloafing, descriptive norms and perceived behavioral control. In general, results of this study provided support that the extended theory of planned behavior is useful in explaining students' cyberloafing behavior. Implications of the findings for theory and practice are discussed.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
