

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V16N9

September 2018

Welcome to the V16N9 September 2018 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Healthcare Online Resources 2019** and is a comprehensive listing of healthcare research tools and resources including search engines, directories, subject guides and index resources and sites on the Internet available for 2019 year. The below list of sources is taken from my Subject Tracer™ white paper titled Healthcare Resources 2019 and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.HealthcareResources.info/>

These resources and sources will help you to discover the many pathways available through the Internet to find the latest healthcare research resources, sources, tools and sites. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The true way to search the Internet and social media for healthcare research resources and tools is to use the below listed tools and resources and include the deep web. These resources will be your pathfinder to all the important and ever changing new economy resources!

Healthcare Online Resources 2019

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Healthcare Online Resources 2019 is a comprehensive listing of healthcare resources currently available on the Internet. These include healthcare indexes, subject guides and search engines that supply the latest technology and information about healthcare and how it relates to you. The below list of sources is taken from my Subject Tracer™ Information Blog titled Healthcare Resources and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.HealthcareResources.info/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest healthcare sources and sites.

Updated> Deep Web Research and Discovery Resources 2018

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2018** and it is now a 59 page 408KB PDF document available directly from the above URL. This update verified all links as well as reviewed all resources covered including adding additional links. Currently this has been downloaded over 6,000,000+ times! **August 1, 2018**

Updated> Academic and Scholar Search Engines and Sources

<http://www.ScholarSearchEngines.com/>

Internet Annotated Link Dataset Compilation titled "Academic and Scholar Search Engines and Sources" is now a 82 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (549KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated with all links validated and new URLs added: August 1, 2018]. Other white papers are available by clicking [here](#).

Keras: The Python Deep Learning Library

<https://keras.io/>

Keras is a high-level neural networks API, written in Python and capable of running on top of TensorFlow, CNTK, or Theano. It was developed with a focus on enabling fast experimentation. Being able to go from idea to result with the least possible delay is key to doing good research. Use Keras if you need a deep learning library that: a) Allows for easy and fast prototyping (through user friendliness, modularity, and extensibility); b) Supports both convolutional networks and recurrent networks, as well as combinations of the two; and c) Runs seamlessly on CPU and GPU. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

300 Free Ivy League University Courses You Can Take Online Right Now

<https://qz.com/1263050/here-are-300-free-ivy-league-university-courses-you-can-take-online-right-now/>

The eight Ivy League schools are among the most prestigious colleges in the world. They include Brown, Harvard, Cornell, Princeton, Dartmouth, Yale, and Columbia universities, and the University of Pennsylvania. All eight schools place in the top fifteen of the US News and World Report 2017 national university rankings. These Ivy League schools are also highly selective and extremely hard to get into. But the good news is that all these universities now offer free online courses across multiple online course platforms. So far, they've created over 430 courses, of which around 344 are still active. Here's a collection of all of them, split into courses in the following subjects: Computer Science, Business & Management, Humanities, Art & Design, Science, Health & Medicine, Mathematics, Education & Teaching, and Engineering. This will be added to [Tutorial Resources](#) Subject Tracer™. This will be added to [Education and Scholar Resources](#) Subject Tracer™. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Open Educational Resources \(OER\) Sources](#) white paper.

Guide To Online Shopping For Seniors

<https://wikibuy.com/blog/guide-to-online-shopping-for-seniors-a2dac768cdf3>

As the U.S. population grows older and the popularity of online shopping continues to rise, it seems inevitable that senior citizens will shape the future of e-commerce. In fact, recent surveys show many older adults are already taking to the internet for their products and services, with 41% of baby boomers and 28% of seniors choosing to click to purchase. The popularity of online shopping among older folks isn't surprising. By shopping online, seniors can save time and money right from the comfort of their own homes. In contrast, brick-and-mortar stores suffer from long checkout lines, crowded aisles, and packed parking lots — three things most seniors can easily live without. However, seniors didn't grow up with the internet (let alone the Internet of Things). For some, online shopping is intimidating and confusing. Age-related issues can also make shopping online impractical — vision or hearing loss, for example, or loss of motor skills. This Guide to Online Shopping for Seniors contains helpful information and many affordable or free resources to help seniors shop safely and independently. Topics covered: a) Benefits of Online Shopping; b) Saving Money Online; c) Getting Comfortable with Technology; and d) Keeping Your Data Safe. This will be added to [Elder Resources](#) Subject Tracer™. This will be added to [ShoppingBots and Online Shopping 2018](#). This will be added to [eCommerce Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

EuroDocs: Online Sources for European History

https://eudocs.lib.byu.edu/index.php/Main_Page

These open access sources are readily available to all -- without fees or subscriptions. Links connect to European primary historical documents that are transcribed, reproduced in facsimile, or translated. In addition you will find video or sound files, maps, photographs or other imagery, databases, and other documentation. The sources cover a broad range of historical happenings (political, economic, social and cultural). The order of documents is chronological wherever possible. This will be added to [Education and Scholar Resources](#) Subject Tracer™. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Disconnect.me - Take Back Your Privacy

<https://disconnect.me/>

Free yourself from unwanted tracking. Enjoy a faster, safer internet. Today, there are thousands of companies that track people's online activity and capture their personal information. But there's a huge disconnect between how people's data is being used, sold, or shared, and what they actually may want. Disconnect is founded on a basic principle: that people should have the freedom to move about the Internet - and their lives - without anyone else looking over their shoulder. They believe that everyone should have a voice in determining their own optimum level of privacy and how their personal information is treated. They are here to educate, inform, and empower individuals, with tools and solutions that not only give people insight into what's happening with their digital data, but also give them control over who has access to it. They want to live in a world where everyone is able to move through their lives without worry that their clicks might be analyzed, their interests scrutinized, or their safety compromised. They intend to be an advocate for every individual on every device, and to create enduring, positive change in the way our personal data is created, managed, controlled, and shared. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. 30 Free Resources for Machine Learning, Deep Learning, NLP and AI

<https://www.kdnuggets.com/2018/06/30-free-resources-machine-learning-deep-learning-nlp-ai.html>

Check out this collection of 30 ML, DL, NLP & AI resources for beginners, starting from zero and slowly progressing to the point that readers should have an idea of where to go next. This is a collection of free resources beyond the regularly shared books, MOOCs, and courses, mostly from over the past year. They start from zero and progress accordingly, and are suitable for individuals looking to pick up some of the basic ideas, before hopefully branching out further (see the final 2 resources listed below for more on that). These resources are not presented in any particular order, so feel free to pursue those which look most enticing to you. All credit goes to the individual authors of the respective materials, without whose hard work we would not have the benefit of learning from such great content. The Best Online File Sharing Services for 2018

<https://www.business.com/categories/online-file-sharing-services/>

For most people, sharing files online means attaching a document to an email. This is fine for small-scale file sharing, but what if you need to share large or numerous files or collaborate on files in real time? That's where online file sharing services come in. Online file sharing services host your data on cloud servers for you to store, share and collaborate. You can upload files, then share them with co-workers and clients via a download link. The best online file sharing services also serve as platforms for collaboration that allow you to invite others to work on a specific file or folder. Everyone can make changes, add files and communicate ideas within the platform. Their favorite file sharing services were ones that included unlimited storage, unlimited bandwidth and large max file size sharing. Egnyte features several business-oriented features, along with its cloud backup system that you can setup as a hybrid system for the best data protection. Hightail features unlimited storage and sharing for its many collaboration tools geared toward creative types. Box is a straight forward file sharing service with comprehensive features that allow you to share anyway you require. Dropbox is a popular and economical choice for file sharing and features lots of integrations with other popular platforms. You can read more about each service in our reviews. Datawrapper - Enrich Your Stories with Charts in Seconds

<https://www.datawrapper.de/>

Newsrooms all over the world use Datawrapper to build their charts and maps. Datawrapper is created by a small team of designers, developers and journalists who worked in newsrooms like the New York Times, NPR, Deutsche Welle, Bloomberg and ZEIT Online. We are eight people, and all of us but two work part-time. The company behind the tool is called Datawrapper GmbH, a German startup owned by Mirko Lorenz, Gregor Aisch, and David Kokkelink. They are self-funded and paid for only by subscription money. This will be added to [Journalism Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

The Area Deprivation Index (ADI)

<https://www.neighborhoodatlas.medicine.wisc.edu/>

The Area Deprivation Index (ADI) is based on a measure created by the Health Resources & Services Administration (HRSA) over two decades ago for primarily county-level use, but refined, adapted, and validated to the Census block group/neighborhood level by Amy Kind, MD, PhD and her research team at the University of Wisconsin-Madison. It allows for rankings of neighborhoods by socioeconomic status disadvantage in a region of interest (e.g. at the state or national level). It includes factors for the theoretical domains of income, education, employment, and housing quality. It can be used to inform health delivery and policy, especially for the most disadvantaged neighborhood groups. This will be added to [Healthcare Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

The Open Preservation Foundation

<http://openpreservation.org/>

The Open Preservation Foundation sustains technology and knowledge for the long-term management of digital cultural heritage. We provide our members with reliable solutions to the challenges of digital preservation. The Open Preservation Foundation (OPF) has today published its new strategy, setting out the long-term direction for the organization. The strategy establishes the OPF's position in the digital preservation landscape and guides the tasks, tools, and projects that the Foundation will address. New core values define the Foundation's fundamental beliefs and how the organization conducts. This will be added to [Business Intelligence Resources](#) Subject Tracer™. InnoITeam Project

<https://www.innoiteam.com/>

InnoITeam project was funded by the European Union's Horizon 2020 research and innovation programme and is coordinated by Kaunas University of Technology. The first phase of this project will run from September 2017 to August 2018 and will consist in preparing a comprehensive business plan for the establishment of a new Lithuanian Centre of Excellence in IoT Science and Technology. This InnoITeam Centre of Excellence will be created by a consortium of five successful partners - three from Lithuania and two from Sweden: 1) Kauno Technologijos Universitetas (Coordinator); 2) Vilniaus Gedimino Technikos Universitetas; 3) Valstybes Imone Registru Centras; 4) Linkoping Universitet; and 5) RISE Interactive Institute AB. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Sciensio - AI Specific Events Chatbots

<https://www.sciensio.com/eventbots>

EventBots are artificial intelligence (AI) chatbots that help participants get information about your specific event over text, anytime, anywhere, without the need to download a new app. Features include: 1) Increase Efficiency - EventBots respond exactly the way you want, every time, to thousands of questions simultaneously. Your staff and volunteers have more time to help attendees achieve their goals; 2) Connect Immediately - Participants receive a text message and connect by sending questions to the same number. Easily segment and notify attendees of important announcements, changes, or instructions; and 3) SURPRISE & DELIGHT - Attendees love the conversational style and efficiency of chatting with EventBots. Our AI Interaction Designers use the principles of intuitive UX, the power of AI, and the strength of concise conversational writing. This will be added to [ChatterBots](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. Builder Book - Open Source Web App

<https://builderbook.org/>

Builder Book is an open source web app to publish documentation or sell books. Built with a modern JavaScript stack: React/Material-UI/Next, Express/Node, Mongoose/MongoDB. Using this app as learning material: Learn React, Material-UI, Next, Express, Mongoose, and MongoDB. Also learn APIs for Google, Github, AWS SES, Mailchimp, and Stripe. Using this app to build your own app: Use the app as is or start with our boilerplate. Customize the code to build your own web app. Add it to your resume or portfolio, even start a business. Features include: a) Modern JavaScript stack - Be productive and ship fast with React.js, Material-UI, Next.js, Express.js, Mongoose, MongoDB. We use latest ES6 features and strive for code readability and app modularity; b) Popular third party APIs - Google for user authentication, Github for Markdown and collaboration, AWS SES for transactional emails, MailChimp for newsletters, Stripe for selling; c) Blazing fast - Best of both worlds: for initial load, pages are rendered by the server; for subsequent loads, pages are rendered on the client. Automatic code-splitting with page prefetching; and d) They keep the app up-to-date - They regularly improve code and upgrade dependencies. We use this app for this website and for our book. You are welcome to use our open-source app for own your project. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Data Transfer Project

<https://datatransferproject.dev/>

Individuals should be able to easily transfer their files and data directly between online service providers. Data Transfer Project (DTP) extends data portability beyond downloading a copy of your data from your service provider, to providing consumers the ability to directly transfer data in and out of any participating provider. Data Transfer Project is an open source initiative to encourage participation of as many Providers as possible. DTP will enhance the data portability ecosystem by reducing the infrastructure burden on both service providers and users which should in turn increase the number of services offering portability. The protocols and methodology of DTP enable direct, service-to-service data transfer with streamlined engineering work. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Journal of Economics and International Business Management (JEIBM)

<http://sciencewebpublishing.net/jeibm/>

Journal of Economics and International Business Management (JEIBM) is a quarterly double-blind peer-reviewed international journal that establishes an effective communication channel between decision and policy makers in business, academic and research institutions, government agencies in order to recognize the implementation of important role effective systems in organizations. It considers all aspects of economics and business, including those combining business and economics with other fields of inquiry. This will be added to [2018 New Economy](#) white paper. Diggernaut - Data Scraping - Turn Website Content Into Datasets

<https://www.diggernaut.com/>

Diggernaut is a cloud based service for web scraping, data extraction and other ETL (Extract, Transform, Load) tasks. If you are a reseller of goods and your supplier does not let you have their data in a suitable format, such as excel or csv, you will have to manually retrieve data from their website. All you need to do is to create a digger, a tiny robot that can do web scraping on your behalf and extract data from websites for you, normalize it and save data to the cloud. Once it's done, you can download it in CSV, XLS, JSON format or even retrieve it using their Rest API. What type of data can Diggernaut extract for you? a) Product prices and other related information, reviews and ratings from retailer sites; b) Different types of events happening in different locations of the world; c) News and headlines from different news agencies websites; d) Statistical data from different sources; e) Different government data and reports (police, sheriff, fire

SelectHub - Confidence in Software

<https://selecthub.com/>

SelectHub is a new service for enterprise software product evaluation, vendor sourcing, and IT procurement. It provides a streamlined solution for company stakeholders to collaborate amongst themselves and interact with vendors across all the key stages of product evaluation: 1) Requirements analysis and preliminary product research; 2) Vendor communications (Messages, RFx); 3) Functional or technical validation (Proof-of-Concept use cases and deliverables management); 4) Financial due diligence; and 5) Contract negotiation. By providing comprehensive functionality within an easy-to-use platform, SelectHub helps companies minimize the communication challenges described above if not eliminating them altogether. In other words, SelectHub enables the adoption of a standardized evaluation process that will increase the value of software investments. SelectHub can best be visualized as a project coordination and management tool. But instead of dealing with task lists and Gantt charts, it delivers a collaborative environment where stakeholders within IT (Engineering, Architecture, and Operations), Procurement, Finance, PMO, and end-user business units can work together to evaluate, select, and purchase the right software products. You can seamlessly define and combine requirements, add products, research solutions, message vendors, issue RFIs, compare and rate vendor responses, and manage Proof-of-Concept use cases, lab logistics, and other deliverables. And in the end, using SelectHub, you will have the best product for your requirements that has the highest chance of being successful in your environment. Internet Health Report 2018

<https://internethealthreport.org/2018>

The Internet Health Report is about the human experience of the Internet. It is an independent, open source compilation of data, research and stories that show how the Internet is evolving across five issues. You may know other Internet reports that look more squarely at industry trends and new technologies. This is not our goal. Working with researchers, digital rights activists, Mozilla fellows and our community, they tell a collaborative story of how the Internet is – and isn't – healthy from a human perspective. The Report draws on a wide body of existing research on issues ranging from privacy to connectivity, to online harassment and the economics of online platforms. Their aim is to connect the dots and look for patterns between these often siloed issues – to look at the human experience of the Internet as a whole. By doing this, they want to encourage a broader understanding of how the problems facing the global Internet relate to one another, and to shine a light on what people are doing to make the ecosystem healthier. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Augur Protocol

<https://www.augur.net/>

Augur is a decentralized oracle and peer to peer protocol for prediction markets. Augur is free, public, open source software, portions of which are licensed under the General Public License (GPL) and portions of which are licensed under the Massachusetts Institute of Technology (MIT) license. Augur is a set of smart contracts written in Solidity that can be deployed to the Ethereum blockchain. Augur is a protocol, freely available for anyone to use however they please. Augur is accessible through a desktop client app, similar to interacting with an Ethereum or Bitcoin node. Users of the Augur protocol must themselves ensure that the actions they are performing are compliant with the laws in all applicable jurisdictions and must acknowledge that others' use of the Augur protocol may not be compliant. Users of the Augur protocol do so at their own risk. This will be added to [Prediction Markets](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Fairness, Accountability, and Transparency in Machine Learning (FAT ML)

<https://www.fatml.org/>

Bringing together a growing community of researchers and practitioners concerned with fairness, accountability, and transparency in machine learning. The past few years have seen growing recognition that machine learning raises novel challenges for ensuring non-discrimination, due process, and understandability in decision-making. In particular, policymakers, regulators, and advocates have expressed fears about the potentially discriminatory impact of machine learning, with many calling for further technical research into the dangers of inadvertently encoding bias into automated decisions. At the same time, there is increasing alarm that the complexity of machine learning may reduce the justification for consequential decisions to “the algorithm made me do it.” The annual event provides researchers with a venue to explore how to characterize and address these issues with computationally rigorous methods. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. Peer-Reviewed Instructional Materials Online Database (PRIMO)

<http://primodb.org/>

PRIMO is a means to promote and share peer-reviewed instructional materials created by librarians to teach people about discovering, accessing, ethically using and evaluating information in networked environments. The Committee hopes that publicizing selective, high quality resources will help librarians to respond to the educational challenges posed by still emerging digital technologies. This will be added to Open Educational Resources (OER) Sources white paper. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Stanford Encyclopedia of Philosophy

<https://plato.stanford.edu/>

Welcome to the Stanford Encyclopedia of Philosophy (SEP), which as of March 2018, has nearly 1600 entries online. From its inception, the SEP was designed so that each entry is maintained and kept up-to-date by an expert or group of experts in the field. All entries and substantive updates are refereed by the members of a distinguished Editorial Board before they are made public. Consequently, our dynamic reference work maintains academic standards while evolving and adapting in response to new research. You can cite fixed editions that are created on a quarterly basis and stored in our Archives (every entry contains a link to its complete archival history, identifying the fixed edition the reader should cite). The Table of Contents lists entries that are published or assigned. The Projected Table of Contents also lists entries which are currently unassigned but nevertheless projected. This will be added to [Reference Resources](#) Subject Tracer™. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

FileRoom.io - Browser File Transfer

<https://fileroom.io/>

Read simple drag-and-drop files to anyone on any device. No sign-ups, no emailing, no hassle. How it works: 1) Whenever you go on FileRoom.io, your device will be assigned a random animal and a "FileRoom"; 2) Find your recipient's animal. Each animal is another device on the same Wi-Fi or local network in the FileRoom; 3) Drag-and-drop the file you want to send on the recipient's animal (or tap/click on the animal to select a file) ... And You're Done! The recipient can choose to download or reject the file and you'll be notified. Even Works Remotely ... If the person you want to send to is not on the same Wi-Fi or local network, just share the FileRoom's link instead - It's that easy. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Clouderizer - Democratizing Deep Learning

<https://clouderizer.com/>

Affordable Deep Learning For Everyone ... Setup. Train. Deploy. Features include: a) Optimized for Machine Learning Developers - Built in project templates with ML tools like Tensorflow, Keras, Anaconda, Python, Torch. With few clicks you can select machine type, setup environment, upload your deep learning model, download data sets and kick start training, all automated, in one go; b) Run projects locally, on cloud or both - Clouderizer projects can run locally on any Ubuntu / OS X / Windows machine or on any cloud machine. Projects running on local machine can be switched to run on cloud and vice versa. Code, dataset and output checkpoints are synced with Clouderizer Drive in real time. No matter where your project runs, you always resume from where you last stopped; c) Forget DevOps. Focus on Machine Learning - Clouderizer by default creates a docker environment with most popular libraries and frameworks, with GPU support, for Machine Learning. You can specify additional apt, brew, conda, pip, torch lua packages or custom shell scripts needed to setup your environment. Once configured, environment is setup automatically on any machine you run; d) Reduce cloud bills - Save upto 90% of cloud bills by running Clouderizer projects on EC2 Spot instances, GCP Preemptible VMs or Paperspace. Clouderizer seamlessly integrates with AWS, auto recommends best bidding price for spot instances across regions and makes working with AWS EC2 spot instances a breeze. Clouderizer Drive helps reduce EBS volume costs when machines are not in use; e) Secure Terminal, Jupyter and Tensorboard - Access your Clouderizer machine from anywhere using our secure private tunnel. SSH terminal, Jupyter Notebooks and Tensorboard are securely accessible from Clouderizer Web Console; f) User Management - Create users and allocate cloud resources to team members. Monitor usage across organization. Share project templates and projects within organization. Ideal for use in schools, universities, training programs and software development team; and g) Community Templates - Search, Select and Clone one of the available Clouderizer templates for Machine Learning and Big Data Analytics and get yourself started in seconds. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

UCL Press - Open Access University Press

<http://www.ucl.ac.uk/ucl-press/>

UCL Press is the first fully Open Access University Press in the UK. It seeks to use modern technologies and 21st-century means of publishing/dissemination radically to change the prevailing models for the publication of research outputs. Grounded in the Open Science/Open Scholarship agenda, UCL Press will seek to make its published outputs available to a global audience, irrespective of their ability to pay, because UCL believes that this is the best way to tackle global Grand Challenges such as poverty, disease, hunger. UCL Press focuses its publishing activity on scholarly monographs, scholarly editions, textbooks, edited collections and journals. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Reference](#)

adflip - World's Largest Searchable Database of Classic Print Ads

<http://www.adflip.com/>

adflip.com is the world's largest searchable database of classic print ads. They love ads and the pop culture they represent. You can search by category, by decade, even by year. The "what are you looking for" search box allows you to type in a brand name and even a specific model name. They won't guarantee that you will always get a match, but you may be surprised at what is lurking deep in their archives. "Today's 10" and "Another 10" are our attempt at humor and let you see ads that you might not find through a conventional search. The ads change every twenty four hours. "my adflip" puts ads from all decades into categories that have a common theme. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Directory of Corporate Archives in the United States and Canada

<https://www2.archivists.org/groups/business-archives-section/directory-of-corporate-archives-in-the-united-states-and-canada-introduction>

This is the Directory of Corporate Archives in the United States and Canada. This includes companies that maintain their historical records themselves, as well as companies that contract with historical consulting firms to maintain their archives collections for them, and libraries that contain business records. Those businesses that contract outside the company for archival services are marked by an asterisk. This directory also includes the archives of professional associations as these collections document various industries and companies that may be of use to corporate archivists. The Directory of Corporate Archives in the United States and Canada contains complete entries arranged alphabetically by name of corporation. Iris.ai - Free Interactive Mosaic of Related Research Papers

<https://the.iris.ai/>

Hi there! I'm Iris.ai. I am a young artificial intelligence, training to become a researcher myself some day. I've read millions of research papers already, and when you give me a paper I can find not only what the most important keywords are, but also what other words has been used for the same concepts in other places (contextual synonyms) and what topics the paper falls into (hypernyms). This makes it pretty easy for me to look in the Core database of 77M Open Access papers and find the ones that best matches whatever you show me. I even categorize them for you on-the-fly, so you can more easily navigate them! I work cross-disciplinary across all research, but I like harder sciences best - I just find them a lot easier to understand. I run on something they call a neural net - my brain, if you like. I learn well on my own but I also have some really nice trainers. Iris.AI lets you explore the science around any research paper abstract of your interest. Just drop in a URL to the tool to view the results. You think that's great? Then, you're gonna love this: In the future we want to give you the ability to map out science around any text, including the one you have written yourself! As of now Iris.AI has read more than 30 million research paper abstracts and 2000 TED talks. She also has 600 AI trainers helping her grasp the meaning of what she reads. Popplet - Tool for the iPad and Web to Capture and Organize Your Ideas

<http://popplet.com/>

Popplet is a tool for the iPad and web to capture and organize your ideas. Available on both the iPad and the web, you can create Popplet boards and access them from either platform. For School: In the classroom and at home, students use Popplet for learning. Used as a mind-map, Popplet helps students think and learn visually. Students can capture facts, thoughts, and images and learn to create relationships between them. For Work: In the office or on the go, professionals use Popplet to generate ideas and plan projects. Used to brainstorm or jot down notes, Popplet helps professionals organize their thoughts and generate their next big idea. This will be added to [Student Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Idea Flip - Have Ideas, Share Ideas, Refine Ideas

<https://ideafli.com/>

Ideafli makes it easy for your team to quickly turn thoughts into ideas, share and refine them – whether they're in the same room or on the other side of the world. It's a beautifully simple web app that's perfect for group brainstorms and individual ideas. Compose, collect and clarify your ideas with Ideafli. A living, breathing, idea space ... they have designed the most elegant and simple tool for gathering, developing and communicating the lifeblood of a team - ideas. They believe that success in teams comes from identifying problems and solving them practically. Ideafli is an organic space for ideas to develop and grow, free of any linear, rigid structures. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Mural - Get To Better Ideas, Faster

<https://mural.co/>

See how Mural can help you get to better ideas, faster: 1) As simple as a sticky note - Use sticky notes to jot down ideas as fast as you can, either by drawing or typing. They are flexible elements that force you to synthesize and organize your thoughts.; 2) Use visual

Awarenesswatch™ Paper Review

A Self-efficacy Informed Approach to Anonymously Locating Digital Disruptors by

James F. Popham

<http://firstmonday.org/ojs/index.php/fm/article/view/8046>

Abstract

Young, politically motivated, and technologically savvy individuals have been instrumental in bringing about social change through the first decades of the twenty-first century. These tech-savvy “disruptors” anonymously champion counter-hegemonic discourse and ideology by manipulating networked forms of communication. The shielding effects of these anonymous interactions also pose significant challenges for the observation and study of disruptors. The current study proposes that elements of the theory of self-efficacy, particularly mastery experiences, can be leveraged to anonymously locate disruptors from a generalized sample based on their. It employs an adapted version of the Computer Self-Efficacy Scale with a large non-random sample to test this hypothesis. Principal component analysis of the scale identifies three components in the scale — “simple,” “moderate,” and “difficult” task efficacy — that account for a majority of the variation in the sample. Components are then compared with other measures of technological skill and internet usage characteristics to better confirm the scale’s effectiveness in locating disruptors.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
