

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V17N11

November 2019

Welcome to the V17N11 November 2019 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s feature covers the following report: **2020 Open Educational Resources (OER) Sources and Tools**. This is a very competent and comprehensive listing of 2020 Open Educational Resources (OER) Sources and Tools including search engines, directories, subject guides, tracers and index resources and sites available on the Internet and available for the 2020 year. The below URL is taken partially from my Open Educational Resources (OER) Sources and is constantly updated with my Subject Tracer™ bots at the following URL:

<http://www.OERSources.com/>

Since these sites are constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The true and most modern way to search the Internet and social media for desirable 2020 Open Educational Resources (OER) Sources and Tools is to use the below listed tools and resources and include the deep web. These resources will be your pathfinder to all the important and ever changing New Economy Resources for staying current in your profession and special interest as well as navigating and searching the Internet for the latest new economy information resources and tools.

access data from new and now accessible databases becomes a reality! Understanding the required new economy analytics, resources and alerts will give you the necessary tools to maintain your current position, improve your position and or discover the new knowledge required to be the leader in your profession. It was Released October 1, 2018 [44 pages 917KB .pdf]

Datantify - The Biggest High-Quality Database of Global Company

<https://datantify.com/>

Supplying: a) 106 208 834 companies with active emails, phone numbers and more; b) 5 204 industries, and c) 194 countries. Features include: 1) 30-Day Money-Back Guarantee - If you are not satisfied with the quality of our product, we will refund your money within 30 days; 2) Database Updates Everyday - Their databases are updated every day, so you can be sure that you get only the most recent, verified and ready-to-use data; 3) 99% Of Customers Would Recommend Them - Their customers are satisfied with the quality of their products and they are happy to come back for more; 4) More Than 90% Of Global Companies Covered - They provide verified data that covers over 90% of worldwide companies in particular industries; 5) Search. Order. Download - Simple system that allows you to get in touch with your customers and partners within minutes; and 6) CRM-Ready Files - With their databases available in the .csv file format, it is much easier to integrate them in your CRM and get started. Datantify is a fresh, dynamically developing company from the USA. They are the largest provider of high-quality databases in the world. Their team counts more than 10 people due to well thought out automation and simplification of many processes, which allowed us to quickly develop our services (about a year from funding a company in September of 2018) using only bootstrapping. Their team is working very hard to deliver the best databases on the market. That's why they are sure of the highest quality of the data they are providing their customers with. Learn about their special secret and get to know the Datantify Alanat algorithm inside out. Their target is to be like Google for database search, browse and buy. They think it works well because they have customers from more than 180 countries. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

RIVAL - Automated Competitive Intelligence Platform

<https://rivalci.com/>

Keep an eye on your Rivals and stay ahead of them. Rival is an automated Competitive Intelligence Platform that monitors your rivals, notifying you as they make changes, allowing you to be proactive in keeping your competitive edge and refine your products. Rival helps protect what is unique in your business, and uncover what is unique in your competitors. Features for: 1) Startup - Disrupt the market by tracking the changes of market leaders; 2) Scaleup - Monitor your closest rivals, and watch the market trends in your space; and 3) Enterprise - Preserve your market leadership by using Rival to track new players. Rival adds an automated layer to your market and competitive intelligence, letting you get a focused view on what is happening in your marks, and quickly pivot and

Weekly.vc

<https://weekly.vc/>

A weekly newsletter of requests for pitches from elite angels & VCs. Investors submit requests for pitches to us and we share them anonymously in our weekly email. You reply to the requests you're interested in, and we forward your response to them. They introduce you to the investor if they want to learn more about you. What is a request for pitches? When investors are looking for startups to invest in, interview, or research, they submit requests for pitches to Weekly.vc. Why use Weekly.vc? 1) Pitch investors right when they're looking for startups like yours; 2) Direct introductions to elite investors from top funds like Sequoia & Lightspeed; 3) Requests from pitches from both venture capitalists and angel investors; 4) Higher conversion rate than cold emailing investors; 5) An affordable way to keep a pulse on venture capital activity; and 6) If investors reject your pitch, we'll share their feedback. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Toxic Comment Classifier

<https://developer.ibm.com/exchanges/models/all/max-toxic-comment-classifier/>

This model is able to detect 6 types of toxicity in a text fragment. The six detectable types are toxic, severe toxic, obscene, threat, insult, and identity hate. The underlying neural network is based on the pre-trained BERT-Base, English Uncased model and was fine tuned on the Toxic Comment Classification Dataset using the Huggingface BERT Pytorch repository. A brief definition of the six different toxicity types can be found at this site. This will be added to [Artificial Intelligence Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. How To Spot Disinformation

<https://www.cbc.ca/news/politics/chat-bot-canada-federal-election-disinformation-1.5270765>

CBC's chat bot helps you spot 'fake news' — and avoid spreading it. Chat Bot is a Facebook Messenger tool meant to help you tackle disinformation. Chat Bot is a tool for Facebook Messenger that guides you through five weeks of learning about misinformation and disinformation, from deep fakes to suspicious articles. This will be added to [Information Quality Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Digital Private Vault

<https://www.digitalprivatevault.com/>

A Vault App to Protect Private Photos, Videos & Notes. Digital Private Vault is a personal vault app designed to hide sensitive data on your phone. You can hide and lock your personal photos, videos as well as important notes to protect them from any unwanted intruders. Features include: a) Hide Photos and Videos - From private moments to important documents — store a copy of everything on your phone confidently. They have also worked on making Digital Private Vault lean yet functional. You can import important files quickly without any loss in quality, neatly organize them in albums and even set a lock to individual albums; 2) Private Notes - Tired of remembering multiple passwords? Or maybe you want to keep bank details handy — but leaving them in plain sight bothers you. We've got your back. Digital Private Vault allows you to jot down secret notes and store sensitive information in the app that only you can access; and 3) Smart Hiding (Coming Soon): Decoy Password - For curious friends prompting you to show your secrets, set up a fake pin and diverge them to a dummy photo vault; and Fake App Icon - Digital Private Vault can go incognito in the app drawer. All you need to do is change the icon in the app settings and disguise it as another app. This will be added to [Privacy Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Sizle - Turn Presentations Into Conversations

<https://sizle.io/>

Sizle supercharges presentations with stunning slide design, detailed viewer insights, feedback forms and CRM integration – all in the browser. Create visually stunning presentations in minutes. Hold the attention of your viewers with the most advanced animations, dynamic transitions, succinct data visualizations and unique motion graphics of any presentation platform. Get instant notifications when a presentation is opened, closed, completed – and more. Gain insight with trailblazing analytics and tracking, while engagement statistics lift the lid on a presentation's genuine performance. Leave a chased after your presentation, ensuring the recipient feels part of a personalised conversation with you. Have them schedule a follow-up for a time that suits them, syncing up

Learning Path: An Introduction to the Model Asset Exchange

<https://developer.ibm.com/series/create-model-asset-exchange/>

Learn how to use state-of-the-art deep learning models in your applications or services. The Model Asset Exchange on IBM Developer is a place for developers to find and use free, open source, state-of-the-art deep learning models for common application domains, such as text, image, audio, and video processing. The curated list includes deployable models that you can run as a microservice locally or in the cloud on Docker or Kubernetes, and trainable models where you can use your own data to train the models. Internet Research Steering Group (IRSG)

<https://irtf.org/irsg>

The IRTF is managed by the IRTF Chair in consultation with the Internet Research Steering Group (IRSG). The IRSG membership includes the IRTF Chair, the chairs of the various Research Groups, and other individuals (“members at large”) from the research or IETF communities. IRSG members at large are chosen by the IRTF Chair in consultation with the rest of the IRSG and on approval by the IAB. In addition to managing the Research Groups, the IRSG may from time to time hold topical workshops focusing on research areas of importance to the evolution of the Internet, or more general workshops to, for example, discuss research priorities from an Internet perspective. The IRSG also reviews and approves documents published as part of the IRTF Document Stream (RFC 5743). The current IRSG membership includes the IRTF Chair, 29 Research Group Chairs and 6 At-Large Members. This will be added to [Business Intelligence Resources](#) Subject Tracer™. Statistics in Schools: History Activities

<https://www.census.gov/programs-surveys/sis/activities/history.html>

From the U.S. Census Bureau's Statistics in Schools (SIS) program comes this collection of classroom history and social studies activities intended to "supplement the standard curriculum while providing useful learning tools related to real life data." This collection features well-developed activity plans for K-12 students, each focused on a specific topic. Activities are broadly grouped into grade-level appropriate subjects: elementary grades (e.g. "Jamestown - Factors Affecting Population Change, 1630-1700"), middle school (e.g. "Where Should I Live? Using U.S. Census Bureau Data to Make Decisions"), and high school (e.g. "19th Century Immigration - Causes & Effects"). The webpage for each activity gives a description, states the time and materials required, and provides a list of learning objectives. Some activities also take advantage of the Census Bureau's interactive digital tools, such as QuickFacts. Each lesson includes attractively designed and downloadable PDFs of teacher and student versions of the activity. This will be added to [Education Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. DIF Identity Ecosystem

<https://identity.foundation/>

Together we're building a new identity ecosystem. Join us in developing the foundational components of an open, standards-based, decentralized identity ecosystem for people, organizations, apps, and devices. DIF is an engineering-driven organization focused on developing the foundational elements necessary to establish an open ecosystem for decentralized identity and ensure interop between all participants. Their Focus includes: a) Technical Specifications - Groups in DIF develop specifications and emerging standards for protocols, components, and data formats that implementers can execute against; b) Reference Implementations - Beyond specifications, DIF members develop open source reference implementations of the technical components and protocols they create; and c) Industry Coordination - As the leading industry organization in the Decentralized Identity space, DIF seeks to align industry participants to advance their common interests. Google Data Studio

<https://datastudio.withgoogle.com/>

Your data is beautiful. Use it. Unlock the power of your data with interactive dashboards and automated reports that inspire smarter business decisions. Features include: 1) Unite your data in one place - Easily import and visualize your data from spreadsheets, Google Analytics, Google Ads, BigQuery, and many other dashboards or databases. See up-to-date reports for multiple projects and data sources in one easy interface. Integrated with over 150 cloud, SQL, e-commerce, and digital advertising platforms, 2) Explore the data - Transform your advertising performance and other data into easy-to-understand reports and dashboards that fit your business intelligence needs. Monitor your progress for the business metrics you care about, including ad spend, site traffic, search rankings, and more; 3) Tell impactful stories - Create and share data visualizations that automatically turn numbers into insights through engaging charts and graphs. Easily understand your ROI from your business initiatives and digital advertising spend; and 4) Empower your teams - Share marketing and business data with your teams in real time so that everyone can find the answers they need. Boost productivity across teams by helping them access the business data they need to work better cross-functionally. When everyone on the team understands what's impacting the big picture, in real time, and works together to drive better data-driven results — that's teamwork. PageProbe - Automatic Page Monitor

<https://nodetics.com/pageprobe/>

PageProbe WebExtension can monitor any web pages you can access on the Internet or in your company intranet. By simply right-clicking the content you see on a page, you can quickly create a tracker with optional conditions and actions and then view the status of those trackers in a simple monitoring view. By clicking the extension icon you can see a nice overview of all your trackers and the data retrieved. Trackers can be easily organized into groups. They believe that people are evaluating the things they monitor based on certain conditions and when those conditions are met, they will take action. For example, the price of the television that you want will drop below certain price. They believe that when this kind of tracking of many things happens manually every day, it is a huge waste of time and you can easily miss good discounts, buying or selling opportunities and as a result can also lose money. Therefore most of content monitoring should be easily automated so that an application will monitor the things you have defined, evaluates the results based on the conditions you have defined and then notifies you when those conditions are met so that you can take action. Features include: 1) Unlimited number of trackers that can monitor any accessible page on the Internet or intranet; 2) Fully local solution - does not require an account; 3) Trackers can be organized into a tree based hierarchy of groups; 4) Converters allow you to easily transform strings to numbers and perform simple arithmetic on them; 5) Advanced conditions for trackers: contains text, doesn't contain text, contains all words, doesn't contain words, contains any words, contains any words that start with, matches regexp, is, is not, begins with text, ends with text, smaller than, smaller than or equal, greater than, greater than or equal, is going up, is going down, has changed; 6) Case sensitive and case-insensitive matching; 7) Advanced actions: show desktop notification, play audio (local or URL), set color/CSS for monitor column/row, HTTP POST, IFTTT, data history logging, event log entry; 8) Data history logging will allow you to see with a simple chart how the value of some item has

The Name Finder Toolbox

<https://www.namerobot.com/toolbox>

Name generators are like books in the library. Word pure - random results back. This might be enough for the name of the leisure group. But if you are seriously looking for a name, e.g. for a company or an important project, you want to find the best possible name. The NameRobot Toolbox offers over 150 name generators and practical tools to work on the perfect name. Quickly find your favorite generators that will find names according to your ideas. Whether you're looking for a fantasy name, want to creatively change a word, or want to find a melodious blend of words. Try it out! This will be added to [Business Intelligence Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™.

Awarenesswatch™ Paper Review

The Crowd in Crowdsourcing: Crowdsourcing as a Pragmatic Research Method by
Lina Eklund, Isabell Stamm, Wanda Katja Liebermann

Abstract

Crowdsourcing, as a digital process employed to obtain information, ideas, and solicit contributions of work, creativity, etc., from large online crowds stems from business, yet is increasingly used in research. Engaging with previous literature and a symposium on academic crowdsourcing this study explores the underlying assumptions about crowdsourcing as a potential academic research method and how these affect the knowledge produced. Results identify crowdsourcing research as research *about* and *with* the crowd, explore how tasks can be *productive*, *reconfiguring*, and *evaluating*, and how these are linked to *intrinsic* and *extrinsic* rewards, we also identify three types of platforms: *commercial platforms*, *research-specific platforms*, and *project specific platforms*. Finally, the study suggests that crowdsourcing is a digital method that could be considered a *pragmatic* method; the challenge of a sound crowdsourcing project is to think about the researcher's relationship to the crowd, the tasks, and the platform used.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
