Coda – Cloud-Based Document Editor

<https://coda.io/>

Coda is a cloud-based document editor founded by Shishir Mehrotra and Alex DeNeui. Offices are located in Seattle, San Francisco, and Mountain View. The first software version 1.0 was launched in May 2019. Previously, for more than four years it had been in a closed beta version. The software provides word-processing, spreadsheet, and database functions. It’s a canvas that blends spreadsheets, presentations, apps, and documents together. The software can integrate with third-party services like Slack and Gmail. In 2017 Coda raised \$60 million. Greylock Partners, Khosla Ventures, and General Catalyst participated in the financing, with LinkedIn co-founder Reid Hoffman and General Catalyst’s Hemant Taneja joining the board of directors. MyGovWatch – RFPs For Free

<https://www.mygovwatch.com/>

MyGovWatch will do for you what no other government lead site does today. Start with their *Basic Edition* plan to get leads for free, because they believe there should be ZERO barriers to entry for anyone to know about government contract leads. Create an account, and purchase data and services later—or not. They aggregate leads from thousands of Federal, state & local government agencies and send you a daily email. Unlike other notification services, they offer a TOTALLY FREE *Basic Edition*, and your account is a personal one that follows you throughout your career. That way, opportunities you want to track follow you wherever you go. MyGovWatch.com has been in production as a niche provider of comprehensive government intelligence in select industries since 2007. The current site enables users in those industries to access the same data, while allowing users in any industry to tap into the same proven process in an on-demand fashion. Blockchain In Education: Opportunities, Applications and Challenges by

Mara=Florina Steiu

<https://firstmonday.org/ojs/index.php/fm/article/view/10654>

Abstract:

This paper discusses the opportunities and challenges of applying blockchain technologies in the education sector. The key blockchain-in-education applications discussed are the digitalization and decentralization of educational certifications and the enhancement and motivation for lifelong learning. Some of the key challenges explored are data protection laws such as the General Data Protection Regulation and the California Consumer Protection Act, which pose impediments for application developers and scalability challenges that arise because of slow-speed blockchain transactions and the Scaling Trilemma. Additionally, market adoption and innovation challenges highlight that blockchain-in-education is a relatively immature innovation that governance bodies within educational institutions often disregard or perceive cautiously.
