V19N7

July 2021

Welcome to the V19N7 July 2021 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant especially in today’s COVID-19 New Economy and New Normal world!!

Awareness Watch™ Featured Report

This month’s featured report covers **2021 Education and Academic Resources** and is a comprehensive listing of world wide web and Internet education and academic resources and tools including new economy and new normal search engines, directories, subject guides and index resources and sites on the Internet available for the 2021 year. The below list is taken partially from my white paper titled **Education and Academic Resources 2021** and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.EducationResources.info/>

These resources and sources will help you to discover the many new pathways available through the Internet to find the latest new and existing world wide web and Internet competent education and academic resources, sources, tools and sites. As this site is constantly updated it would be to your benefit to bookmark and return to the above URLs frequently. The below resources and sources including the deep web will be your pathfinder to all the new education and academic resources, tools and alerts!!

OpenSciEd

<http://www.opensci.ed.org>

OpenSciEd will be music to the ears of any open educational resources enthusiast. The project “seeks to ensure any science teacher anywhere can access and download freely available, high-quality, locally adaptable full-course materials.” Developed with and for classroom educators, OpenSciEd has a variety of units covering chemistry, physics, health, and more. Though the current focus is on middle school curriculum, the project plans to expand to provide resources for K-12 educators over time. New content is released periodically, and readers can find the Unit Release Schedule under the Instructional Materials tab. To learn more about the development process itself, visitors will want to navigate to the OpenSciEd Approach tab. In addition to the wealth of instructional resources available, readers will also have access to professional development tools. Users must create a free account to access many of the materials throughout the site. Registrants will join the ranks of more than 21,000 educators currently enjoying the resource. This will be added to [World Wide Web Reference](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™. This will be added to the tools section of [Research Resources](#) Subject Tracer™. This will be added to [Business Intelligence Resources](#) Subject Tracer™. Awarenesswatch™ Paper Review

Four Years of Fake News: A Quantitative Analysis of the Scientific Literature by

Nicola Righetti

<https://firstmonday.org/ojs/index.php/fm/article/view/11645>

Abstract:

Since 2016, “fake news” has been the main buzzword for online misinformation and disinformation. This term has been widely used and discussed by scholars, leading to hundreds of publications in a few years. This report provides a quantitative analysis of the scientific literature on this topic by using frequency analysis of metadata and automated lexical analysis of 2,368 scientific documents retrieved from Scopus, a large scientific database, mentioning “fake news” in the title or abstract. Findings show that until 2016 the number of documents mentioning the term was less than 10 per year, suddenly rising from 2017 and steadily increasing in the following years. Among the most prolific countries are the U.S. and European countries such as the U.K., but also many non-Western countries such as India and China. Computer science and social sciences are the disciplinary fields with the largest number of documents published. Three main thematic areas emerged: computational methodologies for fake news detection, the social and individual dimension of fake news, and fake news in the public and political sphere. There are 10 documents with more than 200 citations, and two papers with a record number of citations.
