

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V22N11

November 2024

Welcome to the V22N11 November 2024 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant especially in today’s post COVID-19 New Economy, New Normal 2025 and Generative Artificial Intelligence world!!

Awareness Watch™ Featured Report

This month’s featured report covers **Knowledge Discovery Resources 2025**. It is a listing of competent Knowledge Discovery Resources for 2025 searching pathfinders, resources and tools including the new economy generative AI and new normal internet directories, subject guides and index resources and sites for 2025. The below list is taken from my Knowledge Discovery Resources 2025 and is constantly updated with my Subject Tracer™ bots at the following URL: <http://www.KDResources.info/>. These resources and sources will help you to discover the many new and existing pathways available through the Internet to find the latest new and existing world wide web and Internet competent pathfinders and research sources, tools and sites for knowledge discovery.. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The below resources and sources will be your new and existing pathfinders to all the new and existing knowledge discovery resources!

Knowledge Discovery Resources 2025

An Internet Annotated Link Dataset Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

This Internet Annotated Link Dataset Compilation is dedicated to the latest and most competent resources for **Knowledge Discovery** available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key is to be able to find the important knowledge discovery resources and sites both in the visible and invisible World Wide Web. The following selected knowledge discovery resources and sites offer excellent knowledge and information discovery sources to help you accomplish your research goals! Also visit the very latest resources on Knowledge Discovery at the following Subject Tracer™ Information Blog.

<http://www.KDResources.info/>

ACM SIGKDD: Current Explorations Issue

<http://www.kdd.org/explorations/issue.php?issue=current>

Explorations is published twice yearly, in June/July and in December/January each year. The newsletter is distributed in hardcopy form to all members of the ACM SIGKDD. It is also sent to ACM's network of libraries. Online versions are available on the web free to the general public. Their goal is to make the SIGKDD Newsletter an informative, rapid means of publication and dynamic forum for communication with the Knowledge Discovery and Data Mining community.

BAYESIA: Bayesian Networks and Data Mining Tool

<http://www.bayesia.com/>

The Bayesian Network approach merges and supersedes existing approaches coming from Artificial Intelligence and Data Mining, both symbolic and statistical ones. Bayesian Networks are rigorously justified, provide a distributed knowledge representation, and are as understandable as a rule base. They deal particularly well with uncertainty, and they can be manually generated by consultation of an expert, or inductively built by machine learning.

Creative Commons RDF-Enhanced Search

<http://search.creativecommons.org/>

This search engine will help you find photos, music, text, books, educational material, and more that is free to share or build upon. Copyright applies fully and automatically to any work, a photograph, a song, a web page, an article, pretty much any form of expression, the moment it is created. This means that if you want to copy and re-use a creative work you find online, you usually have to ask the author's permission. This "all rights reserved" protection is good thing for many authors and artists. But what about those who want you to use their work freely without permission -- but on certain conditions? This search engine helps you quickly find those authors and the work they have marked as free to use with only "some rights reserved." If you respect the rights they have reserved (which will be clearly marked, as you'll see) then you can use the work without having to contact them and ask. In some cases, you may even find work in the public domain -- that is, free for any use with "no rights reserved."

Conceptual Graphs

<http://conceptualgraphs.org/>

Conceptual graphs (CGs) are a system of logic based on the existential graphs of Charles Sanders Peirce and the semantic networks of artificial intelligence. They express meaning in a form that is logically precise, humanly readable, and computationally tractable. With their direct mapping to language, conceptual graphs serve as an intermediate language for translating computer-oriented formalisms to and from natural languages. With their graphic representation, they serve as a readable, but formal design and specification language. CGs have been implemented in a variety of projects for information retrieval, database design, expert systems, and natural language processing.

Data Mining Resources 2022/2023

<http://www.DataMiningResources.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring data mining resources and sites on the Internet.

Data Mining : White Papers, Webcasts and Product Information

<http://www.bitpipe.com/tlist/Data-Mining.html>

Research the latest Data Mining technologies, tools and techniques. Read white papers, case studies, webcasts and product information from multiple vendors .

Deep Web Research and Discovery Resources 2024

<http://DeepWeb.us/>

Web deep search guru **Marcus P. Zillman's** guide extensively documents resources that include articles, books, websites, presentations, search engines, and technology applications that facilitate the challenging task of accessing information, published in

many formats, that encompass the hundreds of millions of pages comprising the "deep web."

GMDH - Group Method of Data Handling

<http://www.gmdh.net/>

Group Method of Data Handling was applied in a great variety of areas for data mining and knowledge discovery, forecasting and systems modeling, optimization and pattern recognition. Inductive GMDH algorithms give possibility to find automatically interrelations in data, to select optimal structure of model or network and to increase the accuracy of existing algorithms. This original self-organizing approach is substantially different from deductive methods used commonly for modeling. It has inductive nature - it finds the best solution by sorting-out of possible variants.

IBM Research - Knowledge Discovery & Data Mining (KDD)

http://researcher.watson.ibm.com/researcher/view_pic.php?id=144

IBM Research has been at the forefront of the exciting new area of Knowledge Discovery & Data Mining (KDD) from the very beginning. Key advances in robust and scalable data mining, methods for fast pattern detection from very large databases, text and web mining, and innovative business intelligence applications have come from our research laboratories. Links to their current projects as well as KDD links are available from this site.

<http://www.kdd.org/kdd2018/>

KDD-2017: The 23rd ACM SIGKDD International Conference on Knowledge Discovery and Data Mining in Halifax, Nova Scotia, Canada; August 13-17, 2017
<http://www.kdd.org/kdd2017/>

KDD2016 – The 22nd Annual ACM SIGKDD Conference on Knowledge Discovery and Data Mining, August 13 – 17, 2016 San Francisco, California
<http://www.kdd.org/kdd2016/>

KDD 2016 is a premier interdisciplinary conference that brings together researchers and practitioners from data science, data mining, knowledge discovery, large scale data analysis and big data.

KDnuggets: Data Mining, Web Mining, and Knowledge Discovery Guide
<http://www.kdnuggets.com/>

KDnuggets.com is the leading source of information on Data Mining, Web Mining, Knowledge Discovery, and Decision Support Topics, including News, Software, Solutions, Companies, Jobs, Courses, Meetings, Publications, and more. KDnuggets News has been widely recognized as the leading newsletter on Data Mining and Knowledge Discovery.

Knowledge Discovery 2025
<http://www.KnowledgeDiscovery.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring knowledge discovery resources and sites on the Internet.

Megaputer Intelligence – Data Mining and Text Mining Software
<http://www.megaputer.com/>

Megaputer Intelligence Inc., a Delaware corporation established in May of 1997, is a leading developer and distributor of advanced software tools for data mining, text mining, and intelligent e-commerce personalization. Their tools help reveal knowledge hidden in data. They add intelligence and insight to every step of the business decision-making process. The mission of Megaputer is to provide customers around the world with top quality software tools for transforming raw data into knowledge and facilitating better business decisions.

NELL - Never-Ending Language Learning - Read the Web
<http://rtw.ml.cmu.edu/rtw/>

Can computers learn to read? They think so. "**Read the Web**" is a research project that attempts to create a computer system that learns over time to read the web. Since January

Awareness Watch V22N11 November 2024 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

eVoice: 239-206-3450

© 2024 Marcus P. Zillman, M.S., A.M.H.A.

2010, their computer system called NELL (Never-Ending Language Learner) has been running continuously, attempting to perform two tasks each day: •First, it attempts to "read," or extract facts from text found in hundreds of millions of web pages (e.g., playsInstrument(George_Harrison, guitar)). •Second, it attempts to improve its reading competence, so that tomorrow it can extract more facts from the web, more accurately. So far, NELL has accumulated over 50 million candidate beliefs by reading the web, and it is considering these at different levels of confidence. NELL has high confidence in 2,115,119 of these beliefs — these are displayed on this website. It is not perfect, but NELL is learning.

Operationalize Data Science

<https://www.tibco.com/products/data-science>

Data science is a team sport. [Data scientists](#), [citizen data scientists](#), data engineers, business users, and developers need flexible and extensible tools that promote collaboration, automation, and reuse of analytic workflows. But algorithms are only one piece of the [advanced analytic puzzle](#). To deliver predictive insights, companies need to increase focus on the deployment, management, and monitoring of analytic models. Smart businesses rely on platforms that support the end-to-end analytics lifecycle while providing enterprise security and governance. TIBCO® Data Science software helps organizations innovate and solve complex problems faster to ensure predictive findings quickly turn into optimal outcomes.

PEPITe S.A.

<http://www.pepite.be/>

PEPITe is a company specialized in intelligent data exploration and knowledge extraction techniques. PEPITe sells Knowledge Discovery in Databases (KDD) solutions. These solutions combine software modules and services. PEPITe offers a complete range of services and products dedicated to industrial Data Mining (DM) applications.

The Data Mine

<http://www.the-data-mine.com/>

The Data Mine was launched in April 1994, to provide information about DataMining (AKA KnowledgeDiscoveryInDatabases or KDD). There are 6 separate DataMining topic areas (known as "webs"), each with an index. You could also start with the IntroductionToDataMining. Popular pages include: OnLine Analytical Processing (OLAP) , Data Mining Journals, Data Mining Tutorials, Data Sources. Topic areas include: Data Mining Software, Data Mining Index, Data Mining General/Misc, People Working in Data Mining, and Data Mining Companies and Organizations.

The Protégé Project

<http://protege.stanford.edu/>

Protégé is an ontology editor and a knowledge-base editor. Protégé is also an open-source, Java tool that provides an extensible architecture for the creation of customized

knowledge-based applications. Protégé's OWL Plug-in now provides support for editing Semantic Web ontologies.

Wikipedia – Knowledge Discovery and Knowledge Extraction

http://en.wikipedia.org/wiki/Knowledge_discovery#Knowledge_discovery

Knowledge discovery describes the process of automatically searching large volumes of data for patterns that can be considered knowledge *about* the data. It is often described as *deriving* knowledge from the input data. Knowledge discovery developed out of the Data mining domain, and is closely related to it both in terms of methodology and terminology. The most well-known branch of data mining is knowledge discovery, also known as Knowledge Discovery in Databases (KDD). Just as many other forms of knowledge discovery it creates abstractions of the input data. The *knowledge* obtained through the process may become additional *data* that can be used for further usage and discovery.

UCI Knowledge Discovery in Databases Archive

<http://kdd.ics.uci.edu/>

This is an online repository of *large data sets* which encompasses a wide variety of data types, analysis tasks, and application areas. The primary role of this repository is to enable researchers in knowledge discovery and data mining to scale existing and future data analysis algorithms to very large and complex data sets. The archive is intended to serve as a permanent repository of publicly-accessible data sets for research in KDD and data mining. Note: This web page is no longer maintained as of July, 2009.

YAGO - Semantic Knowledge Base

<http://www.mpi-inf.mpg.de/yago-naga/yago/>

YAGO2s is a huge semantic knowledge base, derived from Wikipedia WordNet and GeoNames. Currently, YAGO2s has knowledge of more than 10 million entities (like persons, organizations, cities, etc.) and contains more than 120 million facts about these entities. YAGO is special in several ways: 1) The accuracy of YAGO has been manually evaluated, proving a confirmed accuracy of 95%. Every relation is annotated with its confidence value; 2) YAGO combines the clean taxonomy of WordNet with the richness of the Wikipedia category system, assigning the entities to more than 350,000 classes; 3) YAGO is an ontology that is anchored in time and space.

Academic and Scholar Search Engines and Sources 2024 – October 2024 Edition

<http://www.ScholarSearchEngines.com/>

[Click to access Scholar.pdf](#)

Internet Annotated Link Dataset Compilation titled “Academic and Scholar Search Engines and Sources 2024” is now an 90-page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a PDF file (896KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Completely recreated with all links validated and new URLs added: October 1, 2024. Other white papers are available by clicking [here](#).

Deep Web Research and Discovery Resources 2024 – October 2024 Edition

<http://www.DeepWeb.us/>

I have just updated my white paper link dataset compilation and now titled **Deep Web Research and Discovery Resources 2024** and it is now a 113-page PDF document (1.39MB) freely available directly from the above URL. This update verified all links as well as reviewed all resources covered including adding additional links. Currently, this has been downloaded over 12,000,000+ times! [Updated on **October 3, 2024**]

Open Educational Resources (OER) Sources 2024 – October 2024 Edition

<http://www.OERSources.com/>

[Click to access OERSources.pdf](#)

“Open Educational Resources (OER) Sources 2024 are freely accessible, openly licensed text, media, and other digital assets that are useful for teaching, learning, and assessing as well as for research purposes” [Wikipedia]. Costs continue to rise for students who are pursuing college and post-graduate degree programs. By leveraging best practice sites,

services, and non-traditional options to expand knowledge, skills, and abilities in many disciplines, students can choose from a wide range of options to complete their respective goals. This freely available guide, Open Educational Resources (OER) Sources 2024, is a comprehensive listing of useful open educational resources, sources, and sites on the Internet that can assist you in optimizing your learning opportunities. This will be added to OERSearchEngine.com. This will be added to [Education and Academic Resources](#) Subject Tracer™. This will be added to [Student Research Resources](#) Subject Tracer™. Completely updated including all links validated on **October 5, 2024**. [77 pages; 1.04 MB PDF]

New Normal Startup Resources 2024 – October 2024 Edition

<http://www.NewNormalStartupResources.com/>

http://whitepapers.VirtualPrivateLibrary.net/New_Normal_Startup_Resources.pdf

The white paper link dataset compilation of the **New Normal Startup Resources 2024** Subject Tracer™ Information Resource by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been updated on **October 8, 2024** and is now a freely available 56-page PDF document (850KB) listing the latest and greatest online resources and sites for new normal startup resources! Other white papers are available by clicking [here](#). This is a MUST publication for every business in today's post COVID-19 world and more!

Updated> Generative AI Resources 2024

Mastodon is a term that will keep popping up with more frequency during the AI boom. Mastodon can help your Internet communications across any vertical or industry!. A must read to survive the future! Updated constantly ... ReCreated: **October 29, 2024**; 15 pages; 444KB PDF.

Internet-of-Things (IOT) Resources 2025

<http://www.Internet-of-Things.ws/>

A resources listing of the Internet-of-Things (IoT) 2025. It is estimated within the next years that almost everything will be connected to the Internet (trillion upon trillion) and these are the resources and sites that will make this all possible. Visit this resource to see the real future of the Internet and the Internet-of-Things!! [16 pages; 482KB PDF]

Recreated **October 31, 2024**. Visit all of Zillman's freely available 2024 publications by clicking [here](#).

Awarenesswatch™ Paper Review

Governance by Information Infrastructures: Origins and Evolution of the Concept

by Robin Williams, Antti Silvast, and Francesca Musiani

<https://firstmonday.org/ojs/index.php/fm/article/view/13794/11699>

Abstract

The term “infrastructure” has evolved to span a wide range of disciplines, reflecting its diverse applications and conceptualizations. This paper argues that *information infrastructures* (II) represent a distinct and increasingly significant socio-material form, crucial for understanding governance by infrastructure. We examine the origins and evolution of II, emphasizing the socio-material differences between II and other technological forms such as systems and online platforms. We highlight particularities of II innovation and implementation process and consider their implications for the politics of technology and governance by infrastructures. Our analysis is grounded on examination of several II in our increasingly digitised information societies, spanning the Internet, social security, platforms, financial infrastructures, energy systems and infrastructures, and health information systems.
