V22N6

June 2024

Welcome to the V22N6 June 2024 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant especially in today’s post COVID-19 New Economy, New Normal 2024 and Generative Artificial Intelligence world!!

Awareness Watch™ Featured Report

This month’s featured report covers **Comprehensive Catalog of Artificial Intelligence (AI) Prompts** and is a listing of competent Internet artificial intelligence (AI) prompts pathfinders resources and tools including the new economy generative ai and new normal internet directories, subject guides and index resources and sites on the Internet available for the 2024 year. The below list is taken partially from Prompt Catalog for Artificial Intelligence (AI) 2024 and is constantly updated with my Subject Tracer™ bots at the following URLs:

<http://www.PromptCatalog.ai/>

These resources and sources will help you to discover the many new pathways available through the Internet to find the latest new and existing world wide web and Internet competent AI prompts pathfinders and research sources, tools and sites. As this site is constantly updated it would be to your benefit to bookmark and return to the above URL frequently. The below resources and sources will be your AI prompt pathfinder to all the new and existing competent AI prompt research tools and resources on the Internet.

Comprehensive Catalog of Artificial Intelligence (AI) Prompts:

Prompt engineering is the process of designing effective prompts to elicit desired responses from AI language models[1][2][3]. Key strategies for writing good prompts include:

- Defining the objective - clearly articulating the purpose and desired outcome of the prompt[1][3]
- Understanding the model's capabilities - tailoring prompts to the strengths and limitations of the specific AI system[1][3]
- Using specific, contextual details rather than generic prompts[1]
- Employing techniques like "act as if..." to guide the AI to respond in a particular way[1]
- Structuring prompts to direct the AI through logical steps for comprehensive answers[2]

Several resources provide catalogs and indexes of example prompts to enhance prompt engineering skills, such as a prompt pattern catalog for ChatGPT[4] and guides on prompting for text-to-image models[3]. Additionally, AI-powered literature review tools can assist in summarizing research papers and generating prompts[5].

[4] <https://www.dre.vanderbilt.edu/~schmidt/PDF/prompt-patterns.pdf>
[5] <https://tamu.libguides.com/c.php?g=1289555>

Here are some examples of effective prompts used in generative AI:

1. "Write a 500-word blog post on the benefits of organic food, presenting a balanced perspective with both pros and cons."[4]

2. "Explain the key strategies for writing good prompts to get the best results from generative AI models, such as defining the objective, understanding the model's capabilities, and using specific contextual details." [1][2][3]
3. "Create a social media campaign for an ecommerce website that sells graphic T-shirts for fans of movies and comics like Star Wars, Harry Potter, and the Marvel Cinematic Universe." [5]
4. "Summarize the key points of this research paper on prompt engineering in a concise 3-paragraph format." [2][4]
5. "Write a short story from the perspective of Albert Einstein about the importance of curiosity and lifelong learning in the field of science." [5]
6. "Provide a step-by-step plan for a middle manager to introduce their team to using generative AI tools to improve productivity, including sample prompts they can use." [5]
7. "List the top 5 tips for crafting effective prompts to get high-quality outputs from ChatGPT, with examples of each." [1][2][3][4][5]

The key is to provide specific details, context, and instructions to guide the generative AI model towards the desired output. Iterating on prompts and asking follow-up questions can also help refine the results.

Awarenesswatch™ Paper Review

Introduction for the Special Issue of “Ideologies of AI and the Consolidation of Power”: Naming Power by Jenna Burrell and Jacob Metcalf

<https://firstmonday.org/ojs/index.php/fm/article/view/13643>

Abstract

This introductory essay for the special issue of *First Monday*, “Ideologies of AI and the consolidation of power,” considers how power operates in AI and machine learning research and publication. Drawing on themes from the seven contributions to this special issue, we argue that what can and cannot be said inside of mainstream computer science publications appears to be constrained by the power, wealth, and ideology of a small cohort of industrialists. The result is that shaping discourse about the AI industry is itself a form of power that cannot be named inside of computer science. We argue that naming and grappling with this power, and the troubled history of core commitments behind the pursuit of general artificial intelligence, is necessary for the integrity of the field and the well-being of the people whose lives are impacted by AI.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
