Artificial Intelligence in the Networked Public Sphere: An Analysis of the AI Discourse on Twitter by *Jonas Kaiser and Caitlyn Green*

<https://firstmonday.org/ojs/index.php/fm/article/view/14436/12411>

Abstract

“Artificial intelligence” (AI) is both widely adopted and frequently debated, yet public understanding of AI remains limited. Given AI’s societal implications — such as potential unemployment impacts and the spread of disinformation — understanding public discourse around AI is crucial, as it can shape political decision-making. To explore this, we collected all tweets mentioning AI on Twitter (now X) for January 2023 (N=4,732,859). Our analysis reveals that users rarely differentiate between types of AI systems, such as generative AI versus artificial general intelligence, instead focusing on specific interests like image or text generation. Sentiment analysis indicates a somewhat positive tone in AI discussions, though some communities (*e.g.*, AI art) exhibit marked polarization, while mainstream media has a minimal presence in the Twitter-based AI discourse.

2026 Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
