

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V5N10

October 2007

Welcome to the V5N10 October 2007 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Journalism Resources** on the Internet. These resources are constantly updated on the *Journalism Resources* Subject Tracer™ Information Blog available at the following URL:

<http://www.JournalismResources.info/>

These online directory resources continue to expand at a very rapid rate especially with the needs for identifying and collaborating new directories from throughout the world! These resources will allow you to keep up to date and to monitor the latest happenings in all fields associated with directories, subject trees and indexes and the opportunities associated with discovering new and related directory resources from throughout the global Internet!

Awareness Watch™ Spotters

BudgetPulse - Simple Online Money Tracking and Budget

<http://www.budgetpulse.com/>

BudgetPulse is developed by a small team of experienced professionals in interactive and fresh web 2.0 outlook. Because of its web nature, users are able to access their budgets and financial data everywhere at anytime. BudgetPulse, acts as pulse to human, reflects your cash status in text and graphics. Money management software is usually complicated while online ones are too simple and featureless. BudgetPulse is built on principles of simplicity, user friendliness and comprehensiveness. As the application is easy to use, it is especially useful for people to manage and monitor their financial condition. For security reasons, they do not and have no intention to link direct to users' banking account data. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Things That Think

<http://ttt.media.mit.edu/index.html>

Things That Think is inventing the future of digitally augmented objects and environments. They bring a unique, boundary-breaking perspective to research, uniting leaders in science, engineering, design, and art. Grounded by extensive corporate sponsor interaction, their prototypes and demonstrations aim to inspire the products and services of tomorrow. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to [Artificial Intelligence Resources](#) Subject Tracer™ Information Blog.

Annals of Applied Statistics (AOAS)

<http://projecteuclid.org/DPubS?service=UI&version=1.0&verb=Display&handle=euclid.aoas>

Annals of Applied Statistics is intended to be read by all professional statisticians, as well as by other scientists who are interested in particular areas of statistical application. They hope to publish papers that have obvious applied origins while being of interest beyond the specific application. Direct subject matter collaborations are appropriate, as are methodological developments bearing directly on important areas of application. They encourage submission of related data sets and computer algorithms. This has been added to [Statistics Resources](#) Subject Tracer™ Information Blog.

New Media Intelligence - Web Monitoring

<http://www.newmediaintelligence.com/>

New Media Intelligence performs the role of a press clipping agency but for the new world of digital media. They monitor thousands of media web sites so you don't have to. And they can help you understand the "wider web" of user generated content. NMI continuously monitors thousands of web sites, including weblogs and activist web pages. They do this using their own clever technology enhanced by experienced staff. This has

been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

SUMSearch - Unique Search Engine for Medical Evidence

<http://sumsearch.uthscsa.edu/>

SUMSearch is a unique method of searching for medical evidence by using the Internet. SUMSearch combines meta-searching and contingency searching in order to automate searching for medical evidence. Meta-searching, which is used by from general Internet search engines such as from Go2Net, Dogpile, and SavvySearch, means simultaneously searching multiple Internet sites and collating the results into one page. In addition, SUMSearch adds the idea of contingency searching. If SUMSearch finds too many 'hits' from an Internet site, SUMSearch will execute more restrictive, contingency searches. For example, if a search finds 1000 articles at PubMed, SUMSearch may do up to four additional searches until an optimal number is received. On the other hand, if SUMSearch finds few hits from an Internet site, it may add a search of another site. For example, if the Database of Abstracts of Reviews of Effectiveness (DARE) provides too few systematic reviews, SUMSearch will add a search for systematic reviews from MEDLINE. In summary, SUMSearch allows the clinician to enter a query one time, and then will: select the best Internet sites to search, format the query for each site, execute contingency searches, then return a single document to the clinician. SUMSearch removes the burden to the clinician of remembering details such as which Internet site truncates with the dollar sign and how to execute a limit for the AIM journals if too many articles are found at MEDLINE. After searching, SUMSearch organizes the list of links to documents that it returns to the clinician. The links are ordered by breadth of discussion. First, there are links to resources that provide broad discussion: relevant textbooks, followed by traditional review articles, and practice guidelines. Next there are links to resources that provide narrow discussions: systematic reviews, and original research. Thus, the clinician that is searching a topic with which they are not familiar, will find links to easy to read, broad discussions at the top of the list. A clinician that has a specific question within a topic with which they otherwise familiar, will find links to systematic reviews and original research in the second half of the results. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the source code for [eHealthcareBot](#) Search Engine.

OReFiL: Online Resource Finder for Lifesciences

<http://orefil.dbcls.jp/index.cgi>

Search for online resources introduced in peer-reviewed papers in lifescience (Bioinformatics, Biomedicine, etc.) This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the source code of [eHealthcareBot](#) Search Engine. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Aquatic Microbial Ecology (AME)

<http://www.int-res.com/journals/ame/>

Aquatic Microbial Ecology (AME) was founded by Otto Kinne, Fereidoun Rassoulzadegan and John Dolan. It is the successor to 'Marine Microbial Food Webs', which was founded by P. Bougis and F. Rassoulzadegan and published by the 'Institut Océanographique, Fondation Albert 1er Prince de Monaco', Paris, from 1985 to 1994. Aquatic Microbial Ecology covers all aspects of aquatic microbial dynamics, in particular viruses, prokaryotes and eukaryotes -- planktonic and benthic, autotrophic and heterotrophic -- in marine, limnetic and brackish habitats. As a companion journal to Marine Ecology Progress Series, it strives for the same quality criteria, quick publication and high technical standards.

The European Library

<http://www.theeuropeanlibrary.org/portal/index.html>

The European Library searches the content of European national libraries. The European Library is a non-commercial organisation. It provides the services of a physical library and the opportunity to benefit from a virtual environment in 20 languages. This website allows to search through the resources of 30 of the 47 national libraries involved in The European Library. Resources can be both digital or bibliographical (books, posters, maps, sound recordings, videos, etc.). Currently The European Library gives access to 150 million entries across Europe. The amount of referenced digital collections is constantly increasing. Quality and reliability are guaranteed by the 47 collaborating national libraries of Europe. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Making the Grade: Online Education in the United States, 2006

<http://www.sloan-c.org/publications/survey/index.asp>

Making the Grade: Online Education in the United States, 2006 is based on data collected for the fourth annual national report on the state of online education in U.S. higher education. Supported by the Alfred P. Sloan Foundation and conducted by the Babson Survey Research Group in partnership with the College Board, the report, based on responses from over 2,200 colleges and universities, examines the nature and extent of online learning among U.S. higher education institutions. This will be added to [Education and Distance Learning Resources](#) Internet MiniGuide.

Arts and Humanities e-Science Support Centre (AHeSSC)

<http://www.ahessc.ac.uk/ahessc-home>

The Arts and Humanities e-Science Support Centre (AHeSSC) forms a critical part of the AHRC-EPSRC-JISC initiative on e-Science in Arts and Humanities research. The Centre is hosted by King's College London and located at the Arts and Humanities Data Service (AHDS) and the AHRC ICT Methods Network. AHeSSC exists to support, co-ordinate and promote e-Science in all arts and humanities disciplines, and to liaise with the e-

Journal of Leadership and Organizational Studies

<http://jlo.sagepub.com>

The Journal of Leadership and Organizational Studies is the Official Journal of the Midwest Academy of Management. The Journal publishes articles to advance the theory, research and practice of all aspects of leadership and organizations. Research results are preferred, but theoretical contributions and new applications are also appropriate. Although leadership topics are emphasized, any area of interest in organizational behavior, human resource management, strategy, international management, or entrepreneurship is also encouraged.

Bubbl.us - Online Brainstorming Made Simple

<http://www.bubbl.us/>

Bubbl.us is a simple and free web application that lets you brainstorm online. Features include: a) Create colorful mind maps online, b) Share and work with friends, c) Embed your mind map in your blog or website, d) Email and print your mind map, e) Save your mind map as an image, and f) it's FREE! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Education Portal - Directory of Colleges, Universities, Career Schools and Online Degree Programs

<http://education-portal.com/index.html>

Your guide to undergraduate degrees, graduate degrees, career education and online degree programs, Education Portal continues to become an objective, comprehensive, and informative resource for teens and prospective university students. Their goal is to continue to find new ways of providing quality educational information and they appreciate the tireless work and support of all the contributing state and school librarians. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

New W3C Markup Validator Unveiled

<http://validator.w3.org/>

<http://validator.w3.org/whatsnew.html>

W3C's most popular service just got better, prettier, faster, and smarter. The W3C Markup Validator has a new user interface and a validation engine with improved accuracy and performance. Among new features are an automatic cleanup option using HTML Tidy, and checking of HTML fragments. Driven by W3C as an open-source software project, the markup validator is made by Web professionals for Web professionals, and aims to be a major step in any Web development quality process. Read the change log for a list of all changes and new features. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Art History Research Center (AHRC)

<http://www.harmsen.net/ahrc/>

The AHRC is the first and foremost tool for art historical research on the internet. It shares key resources and methods of online research so that art historians can find the resources relevant to their work. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

NanoBioTechnology

<http://www.springerlink.com/content/120565/>

NanoBiotechnology is an international peer-reviewed journal that publishes research papers covering all aspects of the emerging and rapidly growing research area at the intersection of nanotechnology, molecular biology and biomedical sciences.

NanoBiotechnology is intended to serve as an authoritative forum that presents in a timely manner the state-of-the-art, multidisciplinary research and technological advances in theory, instrumentation and methods as well as applications in various areas of nanotechnology related to biology and medicine. The convergence of nanotechnology and biomedical sciences opens the possibility for a wide variety of biological research topics and medical uses at the molecular and cellular level. The fundamental features of biological systems such as self-assembly, self-replication, and highly specific recognition open new routes to extend solid-state top-down fabrication nanotechnologies. The application of nanotechnology in biomedical sciences will provide information with unprecedented precision and sensitivity, which will not only provide much deeper understanding of biosystems but also lead to the development of new revolutionary modalities of biomolecular manufacturing, early diagnostics, medical treatment, and disease prevention beyond the cellular level to that of DNA and individual proteins, the building blocks of the life process. The long-term goal of NanoBiotechnology is to contribute to the information transfer and explosive growth of this important research area. This has been added to [BioTechnology Resources](#) Subject Tracer™ Information Blog.

Wikia - Social Search Engine

<http://www.wikia.com/wiki/Wikia>

Wikia is supporting the creation and development of over 3000 wiki communities in more than 70 languages. Part of the free culture movement, Wikia content is released under a free content license and operates on the Open Source MediaWiki software. Find out why you should use Wikia and start a new wiki or find an existing one by browsing the Wikia hubs. Wikia sites are supported by advertising revenue and investments. All Wikia sites are free to read and open to edit. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

CreatingMinds - Ways and Words in All Matters Creative

<http://creatingminds.org/index.htm>

CreatingMinds site's goal is to provide you with real and useful principles, tools, articles and quotes about all matters around being creative and using creativity. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

GanttProject - Gantt Chart Based Project Scheduling and Management Tool

<http://www.ganttproject.biz/>

GanttProject is a free and easy to use Gantt chart based project scheduling and management tool. Their major features include: a) Task hierarchy and dependencies, b) Gantt chart, c) Resource load chart, d) Generation of PERT chart, e) PDF and HTML reports, f) MS Project import/export, g) WebDAV based groupwork. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

National Digital Newspaper Program (NDNP)

<http://www.loc.gov/ndnp/>

The National Digital Newspaper Program (NDNP) is a partnership between the NEH and the Library of Congress to provide enhanced access to United States newspapers. . Ultimately, over a period of approximately 20 years, NDNP will create a national, digital resource of historically significant newspapers from all the states and U.S. territories published between 1836 and 1922. This searchable database will be permanently maintained at the Library of Congress (LC) and be freely accessible via the Internet. An accompanying national newspaper directory of bibliographic and holdings information on the website will direct users to newspaper titles available in all types of formats. LC will also digitize and contribute to the NDNP database a significant number of newspaper pages drawn from its own collections during the course of this partnership between NEH and the Library. The two agency partners launched a prototype of this digital resource, "Chronicling America: Historic American Newspapers," in March 2007. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Travel Industry and Deep Web: Exclusive Interview with Marcus P. Zillman

<http://blog.relations.com/2007/08/travel-industry-and-deep-web-exclusive.html>

I was interviewed for the Relations Blog discussing the Travel Industry and the Deep Web. If you are in the travel industry or related field it is a good read for what is happening in the Travel Industry as it relates to the Deep Web. This has been added to [Deep Web Research](#) Subject Tracer™ Information Blog. I also liked their artwork :-))

Yokel - All Shopping - All Local

<http://www.yokel.com/>

Yokel is a search engine that makes local shopping easier than ever before. With one of the most comprehensive Internet directories of local stores and products, Yokel enables shoppers to quickly find what they are looking for in the town or city closest to them. Try Yokeling a product. Type in a search term (such as "Maytag dishwasher", "HLR5667W", or "jogging stroller") as well as your geographic location, and Bingo, they will display a

lists of local, real-world retailers who carry the product you are looking for, sorted by proximity. This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Human Brain Cloud Massive Multiplayer Word Association Game

<http://www.humanbraincloud.com/>

Human Brain Cloud - a massively multiplayer word association "game" or experiment ... or something. The idea is that given a word, a player types in the first thing that comes to mind and the results are combined into a giant network. For instance given the word "volcano", a common word people might submit would be "lava", and this would result in a very strong connection between "volcano" and "lava". On the other hand, given the word "volcano", fewer people might associate it with something like "birthday party", resulting in a very weak connection or no connection at all. Over time and with many players, I hope the cloud will gradually grow to represent words and phrases people tend to associate with other words and phrases, assuming it doesn't get inundated with spam. The cloud started with just one word, "volcano". All other words were submitted by visitors to this site. This has been added to [Games Resources](#) Subject Tracer™ Information Blog.

Scribus - Open Source Desktop Publishing

<http://www.scribus.net/>

Scribus is an open-source program that brings award-winning professional page layout to Linux/Unix, MacOS X, OS/2 and Windows desktops with a combination of "press-ready" output and new approaches to page layout. Underneath the modern and user friendly interface, Scribus supports professional publishing features, such as CMYK color, separations, ICC color management and versatile PDF creation. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Free Online Language Courses

<http://www.word2word.com/coursead.html>

Word2Word is pleased to provide these links in the hope of all people developing a better understanding of others through the use of language. They have attempted to place as many online courses at your disposal as possible. These sites contain lessons to help learn one language from another. The courses vary in quality and the quantity of material presented. Please note that some of the courses may require your browser to have the ability to read the language being learned. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Project for Public Spaces (PPS)

<http://www.pps.org/>

Known around the world for their work on the design and management of public spaces, PPS was founded as a non-profit in 1975 to build upon the pioneering Street Life Project of writer-sociologist William H. Whyte. Since then they have developed a unique process for transforming public spaces, which they call "Placemaking." Not only has PPS worked in 2,000 communities in 47 states and 26 countries to improve parks, markets, streets,

Ethics and Education

<http://www.informaworld.com/smpp/title~content=t716100687>

Ethics and Education is a new international, peer-reviewed journal which aims to stimulate discussion and debate around the ethical dimensions of education. The journal addresses issues in both formal and informal education and upbringing, and includes within its scope relevant aspects of applied ethics, including:

- * Bioethics
- * Medical ethics
- * Management ethics
- * Sex education
- * Ethics of therapy and counselling
- * Professional ethics

Ethics and Education welcomes all traditions and forms of ethical enquiry, from a wide range of philosophical and religious perspectives. As well as appealing to those with a direct interest in ethics and education, the journal will also be of interest to philosophers, educationalists, policy-makers.

National Archives of India

<http://nationalarchives.nic.in/landing.html>

The National Archives of India is the repository of the non-current records of the Government of India and is holding them in trust for the use of administrators and scholars. It is an Attached Office of the Department of Culture under Ministry of Tourism & Culture. It was set up in March 1891 in Calcutta (Kolkata) as the Imperial Record Department and subsequent to the transfer of the National Capital from Calcutta to New Delhi in 1911 it was shifted to its present building in 1926. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

NextCoupons - Free Online Coupons and Deals

<http://www.nextcoupons.com/>

NextCoupons is a privately owned company, who's mission is to crawl the web to find its visitors the hottest online coupons and deal promotions from hundreds of retailers. They try and make saving easy, by giving users unique tools, such as their Coupmark™, which allows users to tailor deals to their own unique interests. This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

International Journal of Web Information Systems (IJWIS)

<http://www.emeraldinsight.com/info/journals/ijwis/ijwis.jsp>

The International Journal of Web Information Systems (IJWIS) seeks to present visionary concepts and stimulating ideas in web information systems at both the theory and application levels. The journal aims to be a source for Web Information Systems research and development, and to serve as an outlet for facilitating communication and networking among Web Information Systems researchers and professionals across academics, government, industry, researchers, and students. While IJWIS covers a broad range of topics, they are soliciting papers that provide a perspective on all aspects of the Web information systems: Web semantics and web dynamics, Web mining and searching, Web databases and Web data integration, Web-based commerce and e-business, Web collaboration and distributed computing, Internet computing and networks, Performance of Web applications, Web multimedia services and web-based education. Topics of particular interest are, but not limited to:

- * Metadata and ontologies
- * Web semantics architectures, applications and standards
- * Language and representation issues of web semantics
- * Migrating existing information
- * Web mining
- * Web search and information extraction
- * Web structure/linkage mining
- * Applications of web mining and searching
- * Web databases
- * Managing and storing XML data
- * Generation of XML data from legacy applications

Mind42 - Free Online Mind Map

<http://www.mind42.com/>

Keep track of all your ideas, whether alone, with colleagues and friends or working together with the whole world. mind42.com is a browser based online mind mapping application. With mind42.com installing mindmapping tools is no longer needed- for a hassle-free mindmapping experience. Just open the browser and launch the application when needed. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

BizStats - Comprehensive Business Statistics, Financial Ratios & Benchmarks

<http://www.BizStats.com/>

BizStats has developed unique benchmarking tools for the primary types of business entities - Corporations, LLC's, Partnerships & Sole Proprietorships. Owners of these various entities compensate themselves in differing manners as corporations expense their (working) owners' salaries and benefits, while LLC's, Partnerships & Sole Proprietorships typically do not. Accordingly, to allow for relevant comparisons they recommend benchmarking based on type of business entity. Their corporate benchmarks include data from some of the largest businesses in the US, whereas LLC's, Partnerships and Sole Proprietorships include data of primarily small to mid-sized businesses. Just choose an industry, enter total revenue (sales) and click compute! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This

has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog. This has been added to [Statistics Resources](#) Subject Tracer™ Information Blog.

NonProfit Technology Network

<http://www.nten.org/>

NTEN is the membership organization of nonprofit professionals who put technology to use for their causes. They enable their members to do their jobs better and help their organizations strategically use technology so that they, in turn, make the world a better, just, and equitable place. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Electronic Environmental Resources Library (eERL)

<http://www.eerl.org/>

The Electronic Environmental Resources Library (eERL), an ATEEC (Advanced Technology Environmental Education Center) project, is a multi-faceted clearing house of valuable electronic resources. eERL results from an NSDL, or National Science Digital Library grant. For this grant, ATEEC joined forces with the Davenport Public Library (DPL) and also collaborated with the Partnership for Environmental Technology Education (PETE) and MIT's Laboratory for Energy and the Environment (LFEE). DPL's librarians bring the skills to catalogue the resources recommended by PETE and LFEE and reviewed / vetted by eERL's handpicked team of environmental educators and practitioners. This electronic library collects STEM (Science, Technology, Engineering, and Math) resources tied to environmental science and technology resource information- from classroom-ready materials to regulatory information and global environmental issues. Some of the areas include: air quality, emergency preparedness and response, energy, natural resources management, safety and health, and sustainability. Vocational areas are covered also, from agriculture, automotive, and green building to manufacturing technology. eERL's team of expert community college educators and practitioners evaluate and recommend valid, up-to-date content. eERL's carefully chosen resources are incorporated into NSDL's database regularly, offering another way to access eERL and many other NSDL libraries. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Web Research Tool

<http://www.macropool.com/en/index.html>

Web Research is a Windows program that helps you save important information from the Web, store it on your computer, and then organize and reuse it in your projects. Easily manage collections of Web pages, pictures, PDF files, and any other Internet resources. Usage includes: a) Collect sources for your current projects (product search, academic writing, studies), b) Keep a proof of evidence for Web transactions (e.g. eBay, booking, online banking), c) Save offline copies of Web pages (to read them later anytime you want), d) Structure and evaluate your saved material (annotate and categorize documents, etc.), and e) Reuse save material in other projects (export, present, quote, forward, etc.). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Listamatic - One List Many Options

<http://css.maxdesign.com.au/listamatic/>

Can you take a simple list and use different Cascading Style Sheets to create radically different list options? The Listamatic shows the power of CSS when applied to one simple list. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

PublishersMarketplace - Track Deals, Sales, Reviews, Agents, Editors, News

<http://www.publishersmarketplace.com/>

PublishersMarketplace is one of the biggest and best dedicated marketplaces for publishing professionals to find critical information and unique databases, find each other, and to do business better electronically. A service of PublishersLunch, the most widely read daily dossier in publishing and known as "publishing's essential daily read," Publishers Marketplace really works in part because it is driven by the attention of nearly 30,000 publishing professionals who read Lunch every day. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

OpenDX - Open Visualization Data Explorer

<http://www.opendx.org/>

OpenDX gives you new control over your data...and new insights into their meaning. Yet OpenDX is easy to use because it lets you visualize data in ways you've never dreamed of--without getting bogged down in the technology. As its name implies, OpenDX is Open Source. The license allows you to freely create, distribute, and develop visualization solutions as you see fit. OpenDX is a uniquely powerful, full-featured software package for the visualization of scientific, engineering and analytical data: Its open system design is built on a standard interface environments. And its sophisticated data model provides users with great flexibility in creating visualizations. With OpenDX, you can create the visualizations you want to create. OpenDX has been designed to be the place where the art of science and the science of visualization come together. It's the place where they're combined into one powerful, flexible framework that lets you

"Simply Visualize." This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Margin: The Journal of Applied Economic Research

<http://mar.sagepub.com>

Margin: The Journal of Applied Economic Research, a peer-reviewed journal of original articles, is a focal point for the dissemination of empirical and theoretical knowledge in the broad area of applied economics-specifically in areas such as monetary and fiscal policies, trade and regulation, international investment, rural economics and development economics. A major emphasis is on policy analysis and application of modern quantitative techniques to development issues. The journal is intended at encouraging economic research and analysis to achieve a deeper understanding of the dynamics of the development process needed for policy making. The issues covered will have a broad scope of national and international importance.

Xapian Project - Open Source Search Engine Library

<http://www.xapian.org/>

Xapian is an Open Source Search Engine Library, released under the GPL. It's written in C++, with bindings to allow use from Perl, Python, PHP, Java, Tcl, C#, and Ruby (so far!) Xapian is a highly adaptable toolkit which allows developers to easily add advanced indexing and search facilities to their own applications. It supports the Probabilistic Information Retrieval model and also supports a rich set of boolean query operators. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

SWT - Open Source Widget Toolkit

<http://www.eclipse.org/swt/>

SWT is an open source widget toolkit for Java designed to provide efficient, portable access to the user-interface facilities of the operating systems on which it is implemented. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Openproj - Open Source Project Management Solution

<http://www.openproj.org/>

OpenProj is a free, open source project management solution. OpenProj is a complete replacement of Microsoft Project and other commercial project solutions. A free download of OpenProj is available here. OpenProj is ideal for desktop project management and is available on Linux, Unix, Mac or Windows. It even opens existing Microsoft or Primavera files. OpenProj shares the industry's most advanced scheduling engine with Project-ON-Demand and has Gantt Charts, Network Diagrams (PERT Charts), WBS and RBS charts, Earned Value costing and more. There is literally no time or effort involved in switching to OpenProj, and your teams can manage projects on any platform for free. Projity worked closely with leaders in the commercial and open source industries in preparation for the release of OpenProj. It is a welcome addition, not only

for project management users, but also for users in all software segments. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Legal Studies

<http://www.journals.uchicago.edu/JLS/journal/>

The Journal of Legal Studies is a journal of interdisciplinary academic research into law and legal institutions. It emphasizes social science approaches, especially those of economics, political science, and psychology, but it also publishes the work of historians, philosophers, and others who are interested in legal theory.

ThinkFree® - Free Online Alternative to Microsoft® Office

<http://www.ThinkFree.com/>

ThinkFree® is the leader in next-generation office productivity solutions for platform independent, anytime, anywhere-computing. ThinkFree usability extends beyond PCs and is perfect for Internet-connected devices, including thin client and mobile computing platforms. The award-winning ThinkFree Office is a Microsoft® Office compatible application suite comprised of word processing, spreadsheet, and presentation graphics software-all usable online and off. ThinkFree Office can automatically install and upgrade over the Web with features such as Internet-based file sharing and storage, as well as end-to-end security. Built for cross-platform functionality, ThinkFree Office is compatible with Windows, Macintosh, Unix and Linux systems. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

SmarterDeals - Price Comparison Search Engine

<http://www.SmarterDeals.com/>

SmarterDeals is a highly targeted price comparison website created with keeping the Computer and Electronics shoppers in mind. Here, Shoppers can search, compare, and save on popular Computer Hardware, Software, and Electronic products. This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Ziki - Find and Discover People On the Web

<http://www.ziki.com/>

Ziki is a free way to search for comprehensive information about a person based on published information available on the Web. An estimated 30 percent of Internet research relates to people searches. “To Google someone” has become a part of everyday language for most Americans, and with the explosion of social networks and publication platforms (blogs, photo sharing sites, video sharing sites, etc), Internet users have scattered across the Web a mine of personal information. Since this information is searched on a regular basis, there is a need to organize and present it in a structured way. This is the concept behind Ziki – which is to people search what Google is to Web site search, what Amazon is to the search of products. This has been added to [Finding People](#) Subject Tracer™ Information Blog.

information and ideas from all disciplines and at all levels. This revolutionary project is an attempt to provide a one-stop efficient forum for publishing research and creative work from all disciplines. This initiative is driven by an overriding passion to assist researchers, writers and artists to cope with the publish or perish reality in the academia. Scientific Journals International (SJI) publishes articles individually as soon as they are accepted and edited. They do not wait until all required articles are ready for an entire issue.

GeeXboX - Your HTPC (Home Theater PC)

<http://geebox.org/en/index.html>

GeeXboX is a free embedded Linux distribution which aims at turning your computer into a so called HTPC (Home Theater PC) or Media Center. Being a standalone LiveCD-based distribution, it's a ready to boot operating system than works on any Pentium-class x86 computer or PowerPC Macintosh, implying no software requirement. You can even use it on a diskless computer, the whole system being loaded in RAM. Despite his tiny ISO image size, the distribution comes with a complete and automatic hardware detection, not requiring any driver to be added. It supports playback of nearly any kind of audio/video and image files and all known codecs and containers are shipped in, allowing playing them through various physical supports, either being CD, DVD, HDD, LAN or Internet. GeeXboX also comes with a complete toolchain that allows developers adding easily extra packages and features but that might also be used to give birth to many dedicated embedded Linux systems. This has been added to [World Wide Web Reference Subject Tracer™ Information Blog](#).

OSSEC - Open Source Host-based Intrusion Detection System

<http://www.ossec.net/>

OSSEC is a scalable, multi-platform, open source Host-based Intrusion Detection System (HIDS). It has a powerful correlation and analysis engine, integrating log analysis, file integrity checking, Windows registry monitoring, centralized policy enforcement, rootkit detection, real-time alerting and active response. It runs on most operating systems, including Linux, OpenBSD, FreeBSD, MacOS, Solaris and Windows. A list with all supported platforms is available here. OSSEC is a free software and will remain so in the future; you can redistribute it and/or modify it under the terms of the GNU General Public License (version 3) as published by the FSF - Free Software Foundation. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Security Resources](#) Internet MiniGuide.

e-SPEN: European e-Journal of Clinical Nutrition and Metabolism

<http://www.elsevier.com/locate/yeclnm>

The European e Journal of Clinical Nutrition and Metabolism, to be known as the e-SPEN Journal, is a new electronic only companion publication to Clinical Nutrition, the official journal of The European Society for Clinical Nutrition and Metabolism (ESPEN). e-SPEN Journal will be available to all members of ESPEN and to all subscribers to Clinical Nutrition. Published bimonthly, the e-SPEN Journal will focus on publishing articles, which address the educational aspects of nutritional and metabolic care and the relationship between nutrition and disease in the setting of basic science and clinical practice. The journal will also publish papers, which have not met the criteria required for publication in Clinical Nutrition, but nevertheless have an important message to convey to the readers.

WorldCat - Search the World's Largest Network of Library Content and Services

<http://www.worldcatlibraries.org/>

WorldCat is the world's largest network of library content and services. Over 1 billion items in more than 10,000 libraries worldwide. WorldCat libraries are dedicated to providing access to their resources on the Web, where most people start their search for information. WorldCat.org lets you search the collections of libraries in your community and thousands more around the world. WorldCat grows every day thanks to the efforts of librarians and other information professionals. You can search for popular books, music CDs and videos—all of the physical items you're used to getting from libraries. You can also discover many new kinds of digital content, such as downloadable audiobooks. You may also find article citations with links to their full text; authoritative research materials, such as documents and photos of local or historic significance; and digital versions of rare items that aren't available to the public. Because WorldCat libraries serve diverse communities in dozens of countries, resources are available in many languages. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Whozat?, The People Search Engine

<http://www.whozat.com/>

Whozat? is a one-stop-shop aggregator that allows users to find other people in social networks, blogs, photo and video sites and on the WWW. A blind evaluation of the relevance of people search results for Whozat?, Google, Yahoo, Ask, and three other people search engines threw the following preliminary but statistically significant results for a list of ordinary people compiled by a third party: Whozat? beat every other search engine, yielding the most relevant results, as evaluated by the searcher, almost three times as often as all generic search engines and more than five times as often as any other people [search engine](#). Whozat? achieves this through a combination of broader reach and

Awareness Watch V5N10 October 2007 Newsletter

<http://www.AwarenessWatch.com/>

proprietary algorithms. Whozat? also boasts a people-centric UI, machine vision to find photos of the people you look for, automatic tag extraction to describe a person at a glance, and It'zat and Not zat feedback buttons that allow searchers to tell Whozat? whether a person, URL or tag is relevant or not to their search, immediately customizing results accordingly. These interactive features make searches with Whozat? a conversation rather than a one-way street. Whozat? even allows searchers to specify the age ('zat old?), location (where 'zat?) and/or sex of the person sought, and finds related people, too. Unlike sites which mostly contain information provided by users, Whozat? is a true search engine, finding information and photos of people without any prior instruction needed. This has been added to [Finding People](#) Subject Tracer™ Information Blog.

FreshNotes - Why Search? Discover

<http://www.freshnotes.com/>

FreshNotes' easy to implement page recommendations can enhance your website navigation by leveraging the following technologies:

A) Entity Recognition

FreshNotes' systems electronically read your website's content and create a list of the people, locations, organizations, and other entities found on your site. In this entity recognition, we note the number and positions of mentions in each piece of content to gauge the level of importance of each entity to the specific webpage.

B) Relationship Mapping

Once entities are recognized, FreshNotes maps entities to each other based on all of the content from your website. For example, if the entity 'Paul Wolfowitz' is found numerous times uniquely in proximity to the entities 'Donald Rumsfeld', 'World Bank' and 'Defense Department', our system will infer that there is a relationship between these entities. With additional content, the evidence of these relationships is strengthened. FreshNotes' entity relationship mapping is core to our consistent delivery of relevant content recommendations.

C) Realtime Document Integration & Delivery

Every time you add an additional document to your website, FreshNotes recognizes the new entities on that document, updates our relationship mapping, and delivers the most current content recommendations to your site in realtime. As you keep your website current, we will keep the recommendations current.

D) User Feedback Incorporation

Our initial recommendations are modified based on the click patterns of your site visitors. We learn the characteristics of articles that are most popular on your site and specific pages.

Social Wallpapering - Desktop Backgrounds

<http://www.socwall.com/>

Social Wallpapering is a public effort to classify, rank, and distribute high-resolution images for use as desktop backgrounds. Supported resolutions include 1280x960, 1280x1024, 1600x1200, and all other background variations with a minimum width and height of 1280x720 pixels. Socwall employs several technologies to function, such as cascading style sheets (CSS), asynchronous javascript and XML (AJAX) requests, an open source relational database management system (MySQL), and a server-side cross-platform HTML embedded scripting language (PHP). The idea for Socwall originated in March 2006 by Kirk Ouimet, who is the founder and maintainer of the web site. The design of Socwall was inspired by the great potential of community-based interactive websites, which are commonly referred to as Web 2.0 websites. The author of this site was particularly influenced by Kevin Rose's excellent digg.com. Social Wallpapering is an attempt to create the greatest high-resolution wallpaper resource on the planet. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

NutrientNet - Reducing Watershed Nutrient Runoff

<http://www.nutrientnet.org/>

The World Resources Institute has worked closely with partners in three watersheds in the upper Midwest to complete economic analyses of alternative water quality policies. The results showed trading to be an economically preferable approach. For the full results, please see Fertile Ground: Nutrient Trading's Potential to Cost-Effectively Improve Water Quality. However, WRI's experience in carrying out the analyses indicated that a variety of implementation issues need to be resolved before trading will become broadly acceptable. These issues include: transaction costs, the credibility of nonpoint source load reductions, and public oversight. Transaction costs can preclude trading if they are too high. It is therefore essential to keep them low by providing easy means for market participants to find each other and to identify what they have to sell or need to buy. For there to be credibility in the reduction credits generated by agriculture and other nonpoint sources, standard estimation methods must be used. Essentially, the public and the buyers need to be assured that all credits are estimated in the same way.

Awareness Watch V5N10 October 2007 Newsletter

zillman@VirtualPrivateLibrary.com

© 2007 Marcus P. Zillman, M.S., A.M.H.A.

Lastly, there has to be a relatively simple way to record trades so that the relevant government agencies and the general public know what is taking place. A trading website such as NutrientNet can help to solve some of these problems by providing a simple way for buyers and sellers to connect, by making it relatively easy for both point sources and nonpoint sources to estimate their remediation costs using standard, consistent methods, and by making the record of trade readily accessible. Specifically, NutrientNet is designed to serve the following functions: a) provide potential market participants and other stakeholders with background information on nutrient trading; b) provide farmers, municipal treatment works, and industrial plants with tools for estimating releases of nutrients to surface waters from their operations, exploring reduction options, and estimating the costs of achieving reductions; c) help market participants identify potential trading partners; d) track the volume and type of trades within a watershed; share lessons learned about trading across the watersheds where it is being tried or considered; and e) provide information on water quality problems and trading as a possible means to address them. This has been added to [Prediction Markets](#) Subject Tracer™ Information Blog.

Journal of Knowledge Management Practice

<http://www.tlinc.com/jkmp.htm>

The Journal of Knowledge Management Practice (formerly the Journal of Systemic Knowledge Management under a different publisher) is devoted to collecting serious research about knowledge management and its practical applications. Authors are invited to read the notes for contributors, and are encouraged to contribute. They will promise a fast and fair critical review of all papers submitted. The Journal of Knowledge Management Practice is published in electronic format only. The philosophy of the journal is systemic, and will include submitted/invited papers related to all aspects of knowledge management. Elements such as physical assets, learning, database technology, intellectual capital, investment strategy, mindsets, and a host of others subject to systemic interactions, are increasingly treated as separate and unrelated topics. The journal will seek to foster cross-fertilization and a more general understanding of how all these elements and subsystems can be identified, and managed, to fit together and interact to best fulfil organizational objectives. It is hoped to promote a practical view of knowledge management which will motivate practitioners to engage across topic boundaries.

Knowledge Management (KM) is defined as those processes, tools and infrastructures by which an organization continuously improves, maintains and exploits all those elements of its knowledge base which the organization believes are relevant to achieving its goals; KM includes the processes, tools and infrastructure by which these goals are modified as the organization's knowledge base changes. The organization's knowledge base is defined to include the data, information, intuition, knowledge (know how), understanding (know why), and wisdom, residing throughout the organization. The Journal of Knowledge Management Practice aims to collect, and disseminate to a multi-disciplinary audience, writings which will contribute to an holistic understanding of organisational knowledge management. Currently papers and presentations are scattered over a wide range of publications, none of which focus on knowledge management as a system which can only be understood and optimised when its elements have been identified, and their interactions understood and harmonized. Their intention is, above all, to be informative and useful to those working in organizations. As such, we would encourage those preparing submissions to think carefully about applications in practice. They are keen to encourage a wide range of submissions and contributions, including research findings, case studies, critical essays, trend analyses, anecdotal experiences, product and service reviews and commentaries, book and other publication reviews, and other areas of interest.

File Extensions - The Source for File Extensions Information

<http://www.file-extensions.org/>

File extensions are usually three or four letter codes on the end of file names that tell operating system (MS-DOS, Windows 95/98/ME/2000, Windows XP, Windows Vista, Unix, Linux, MAC OS etc.) what kind of file they are dealing with (which application can automatically open the file or which program can edit the file etc.) They have researched and collected a very large list of the file extensions with detailed explanations of each file type and the way they are used today. They have also tried to include a few of the common software programs that use or is associated with each of these file extension types. If you come across a file in your computer with an unknown file extension, you can look up the information about desired file extension and its file associations using the File-extensions.org website. Information and Security: An International Journal

<http://infosec.procon.bg/>

Information & Security: An International Journal covers scientific, technical and policy issues related to national and international security in the Information age, C4ISR technologies and systems, information operations, command and control warfare, and information assurance. The I&S objective is to bridge the IT and the security communities, presenting state of the art, new findings, ideas and needs of the one community to the other, as well as to present latest research, conducted on the bridge between the two communities. The journal is published in English four times per year. The electronic version is accessible free of charge. Each issue covers a specific topic and is edited by a member of the Editorial Board or by a Guest Editor.

Real Estate Dictionary of Real Estate Terms

<http://www.realestatewords.com/>

Are you confused and overwhelmed by the extensive lexicon of real estate terms and words? Every person working in real estate or planning to buy or sell real estate can benefit by using our free real estate dictionary. This dictionary of real estate terms is one of the most extensive in the industry and is used by many real estate agents, real estate brokers, mortgage brokers, and instructors in major real estate schools across the country. While great care and research was undertaken to provide accurate explanations and definitions for the thousands of real estate terms and words in our real estate terms dictionary, one real estate vocabulary dictionary cannot be 100% accurate in all jurisdictions. The definitions are for general purposes only and should not be used for legal purposes. They disclaim any responsibility for any liability, loss or risk that may be claimed or incurred as a consequence of using this information. They hope you benefit from using their concise online real estate dictionary. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

LIFE - Life Cycle Information for E-Literature

<http://www.life.ac.uk/>

LIFE is a collaboration between University College London (UCL) and the British Library. The LIFE Project has developed a methodology to model the digital lifecycle and calculate the costs of preserving digital information for the next 5, 10 or 100 years. For the first time, organisations can apply this process and plan effectively for the preservation of their digital collections. Currently the LIFE Project is in its second phase ("LIFE2"), an 18 month project running from March 2007 to August 2008. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

LucidDB - Open Source RDBMS for Business Intelligence

<http://www.luciddb.org/>

LucidDB is the first and only open-source RDBMS purpose-built entirely for data warehousing and business intelligence. Most database systems (both proprietary and open-source) start life with a focus on transaction processing capabilities, then get analytical capabilities bolted on as an afterthought (if at all). By contrast, every component of LucidDB was designed with the requirements of flexible, high-performance data integration and sophisticated query processing in mind. Moreover, comprehensiveness within the focused scope of its architecture means simplicity for the user: no DBA required. Rather than throwing hardware at data warehousing problems by relying on expensive clusters or specialized "appliances", the scalability offered by LucidDB's unique architecture allows you to achieve great performance using only a single off-the-shelf Linux or Windows server. Besides keeping costs down, this also minimizes maintenance and administration hassles. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Journal of the Learning Sciences

<http://www.tandf.co.uk/journals/titles/1050-8406.asp>

The Journal of the Learning Sciences (JLS) provides a multidisciplinary forum for the presentation of research on learning and education. It seeks to foster new ways of thinking about learning that will allow our understanding of cognition and social cognition to have impact in education. JLS publishes research articles that advance our understanding of learning in real-world situations and of promoting learning in such venues, including articles that report on the roles technology can play in promoting deep

London Knowledge Lab

<http://www.lkl.ac.uk/cms/index.php>

The London Knowledge Lab is a unique collaboration between two of the UK's most prominent centres of world-class research – the Institute of Education and Birkbeck. The Lab brings together computer and social scientists from a very broad range of fields, including: a) education, b) sociology, c) culture and media, d) semiotics, e) data mining, f) information management, g) personalisation and h) ubiquitous technologies. This means that issues can be tackled from many different perspectives, and this is reflected in their mission: 1) to Understand the place of digital technologies and media in our cultural, social and educational relationships with knowledge – finding, acquiring, creating, and sharing it; 2) Design, build and evaluate systems, processes and interfaces that enhance learning, both formal and informal, throughout life; and 3) Examine critically the assumptions about knowledge and learning that underlie the increasingly wide range of applications of digital technologies. The ways in which we learn, and what we need to know, are changing. Their research aims to explore and invent the roles of technology in this process, and to understand how technology relates to broader social, economic and cultural factors. Asia Policy Point (APP)

<http://www.jiaponline.org/>

Asia Policy Point (APP) is an independent, U.S. nonprofit [501(c)(3)] research center that studies the US policy relationship with Northeast Asia. APP provides objective information to the American policy community. APP's members are scholars, analysts, policymakers, and journalists across a range of disciplines concerned with Asia. Founded in 1991, as the Japan Information Access Project, the organization changed its name in 2006 to better reflect its inter-disciplinary approach to the understanding of Japan and Asia. The goal is to promote innovative and non-ideological understanding of the political, economic, social, and security environment in Asia. Organizes meetings that bring together experts and policymakers on Japanese and Asian science, technology, security, and public policy: a) Researches critical and emerging issues affecting political relations among Japan, its neighbors, and the West. Research areas include: foreign policy, public opinion, historical reconciliation, innovation policy, economic development, and security issues, b) Publishes the weekly Asia Policy Calendar (APC), a

Foundations and Trends® in Databases

<http://www.nowpublishers.com/product.aspx?product=DBS>

The growth in all aspects of research in the last decade has led to a multitude of new publications and an exponential increase in published research. Finding a way through the excellent existing literature and keeping up to date has become a major time-consuming problem. Electronic publishing has given researchers instant access to more articles than ever before. But which articles are the essentials one that should be read to understand and keep abreast with developments of any topic? To address this problem Foundations and Trends® in Databases will publish high-quality survey and tutorial monographs of the field using modern techniques to enable both instant linking to the primary research in its electronic form and affordable paper copies, finally delivering on the promise to authors of multiple channel publishing from a single source. Each issue of Foundations and Trends® in Databases will comprise a 50-100 page monograph written by research leaders in the field. Monographs that give tutorial coverage of subjects, research retrospectives as well as survey papers that offer state-of-the-art reviews fall within the scope of the journal. Foundations and Trends® in Databases covers a breadth of topics relating to the management of large volumes of data. The journal targets the full scope of issues in data management, from theoretical foundations, to languages and modeling, to algorithms, system architecture, and applications. The list of topics below illustrates some of the intended coverage, though it is by no means exhaustive:

- * Data Models and Query Languages
- * Query Processing and Optimization
- * Storage, Access Methods, and Indexing
- * Transaction Management, Concurrency Control and Recovery
- * Deductive Databases
- * Parallel and Distributed Database Systems
- * Database Design and Tuning
- * Metadata Management

- * Object Management
- * Trigger Processing and Active Databases
- * Data Mining and OLAP
- * Approximate and Interactive Query Processing
- * Data Warehousing
- * Adaptive Query Processing
- * Data Stream Management
- * Search and Query Integration
- * XML and Semi-Structured Data
- * Web Services and Middleware
- * Data Integration and Exchange
- * Private and Secure Data Management
- * Peer-to-Peer, SensorNet and Mobile Data Management
- * Scientific and Spatial Data Management
- * Data Brokering and Publish/Subscribe
- * Data Cleaning and Information Extraction
- * Probabilistic Data Management

Megite - What's Happening Right Now Social News Aggregator

<http://www.megite.com/>

Megite is the social news aggregator for anyone interested in what's happening right now by intelligently uncovering the most relevant items from auto discovered news sites and weblogs. Megite Blog Tracker is the first algorithmic news tracking service created for a single blog. Megite realized that there had to be a better way to explore the conversations around blog posts - particularly for large blogs - than the typical tools such as trackbacks and pingbacks. What's more, blog readers may be short of time and unwilling to scroll through many pages of posts to discover the top story of the day. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Mining the Blogosphere: Age, Gender and the Varieties of Self-Expression by

Shlomo Argamon, Moshe Koppel, James W. Pennebaker, and Jonathan Schler

http://firstmonday.org/issues/issue12_9/argamon/index.html

Abstract:

The growth of the blogosphere offers an unprecedented opportunity to study language and how people use it on a large scale. We present an analysis of over 140 million words of English text drawn from the blogosphere, exploring if and how age and gender affect writing style and topic. Our primary result is that a number of stylistic and content-based

indicators are significantly affected by both age and gender, and that the main difference between older and younger bloggers, and between male and female bloggers, lies in the extent to which their discourse is outer– or inner–directed. In fact, the linguistic factors that increase in use with age are just those used more by males of any age, and conversely, those that decrease in use with age are those used more by females of any age.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
