

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V5N11

November 2007

Welcome to the V5N11 November 2007 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report will be highlighting **Data Mining and Web Data Extraction Resources** on the Internet. These resources are constantly updated on the *Data Mining Resources* Subject Tracer™ Information Blog available at the following URL:

<http://www.DataMiningResources.info/>

These online data mining and web data extraction resources continue to expand at a very rapid rate especially with the needs for identifying, collaborating and collecting new data from throughout the world! These resources will allow you to keep up to date and to monitor the latest happenings in all fields associated with data mining and web data extraction associated with discovering new data and knowledge available over the global Internet.

Awareness Watch™ Spotters

PriceAmbush - Price Drop Alerts

<http://www.priceambush.com/>

They wanted to give you the best service that will monitor price drops without wasting your time. You know that the 46" Toshiba HDTV price as well as the Hugo Boss blue carbon jersey price will drop, each at its own specific cycle. But do you have time to actively monitor these? The PriceAmbush allows you, the consumer, to set up a price drop tracker that will actively monitor the exact product you're interested in. And by the way the service is entirely free to use. This has been added to [ShoppingBots](#) Subject Tracer™ Information Blog.

Asia Policy Point (APP)

<http://www.jiaponline.org/>

Asia Policy Point (APP) is an independent, U.S. nonprofit [501(c)(3)] research center that studies the US policy relationship with Northeast Asia. APP provides objective information to the American policy community. APP's members are scholars, analysts, policymakers, and journalists across a range of disciplines concerned with Asia. Founded in 1991, as the Japan Information Access Project, the organization changed its name in 2006 to better reflect its inter-disciplinary approach to the understanding of Japan and Asia. The goal is to promote innovative and non-ideological understanding of the political, economic, social, and security environment in Asia. Organizes meetings that bring together experts and policymakers on Japanese and Asian science, technology, security, and public policy: a) Researches critical and emerging issues affecting political relations among Japan, its neighbors, and the West. Research areas include: foreign policy, public opinion, historical reconciliation, innovation policy, economic development, and security issues, b) Publishes the weekly Asia Policy Calendar (APC), a Monday e-mail report that provides a calendar of upcoming hearings, events, and conferences as well as an original commentary and a list of the past week's significant, Asia policy-relevant reports and opinion and c) The Project is funded by its membership dues and international universities and foundations. Non-US funding is limited and restricted. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

vTap™ - Discover and View Web Videos On Your Mobile

<http://www.vtap.com/>

vTap™ - the quick and easy way of discovering and viewing web videos on your mobile. Start typing your search and see the results appear as you type. Browse and view the web video you want. I installed this on my HITEC 8525 and it works like a dream ... neat stuff This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Foundations and Trends® in Databases

<http://www.nowpublishers.com/product.aspx?product=DBS>

The growth in all aspects of research in the last decade has led to a multitude of new publications and an exponential increase in published research. Finding a way through the excellent existing literature and keeping up to date has become a major time-consuming problem. Electronic publishing has given researchers instant access to more articles than ever before. But which articles are the essentials one that should be read to understand and keep abreast with developments of any topic? To address this problem Foundations and Trends® in Databases will publish high-quality survey and tutorial monographs of the field using modern techniques to enable both instant linking to the primary research in its electronic form and affordable paper copies, finally delivering on the promise to authors of multiple channel publishing from a single source. Each issue of Foundations and Trends® in Databases will comprise a 50-100 page monograph written by research leaders in the field. Monographs that give tutorial coverage of subjects, research retrospectives as well as survey papers that offer state-of-the-art reviews fall within the scope of the journal. Foundations and Trends® in Databases covers a breadth of topics relating to the management of large volumes of data. The journal targets the full scope of issues in data management, from theoretical foundations, to languages and modeling, to algorithms, system architecture, and applications. The list of topics below illustrates some of the intended coverage, though it is by no means exhaustive:

- * Data Models and Query Languages
- * Query Processing and Optimization
- * Storage, Access Methods, and Indexing
- * Transaction Management, Concurrency Control and Recovery
- * Deductive Databases
- * Parallel and Distributed Database Systems
- * Database Design and Tuning
- * Metadata Management
- * Object Management
- * Trigger Processing and Active Databases
- * Data Mining and OLAP
- * Approximate and Interactive Query Processing
- * Data Warehousing
- * Adaptive Query Processing
- * Data Stream Management
- * Search and Query Integration
- * XML and Semi-Structured Data
- * Web Services and Middleware
- * Data Integration and Exchange
- * Private and Secure Data Management
- * Peer-to-Peer, Sensornet and Mobile Data Management
- * Scientific and Spatial Data Management
- * Data Brokering and Publish/Subscribe

- * Probabilistic Data Management

Megite - What's Happening Right Now Social News Aggregator

<http://www.megite.com/>

Megite is the social news aggregator for anyone interested in what's happening right now by intelligently uncovering the most relevant items from auto discovered news sites and weblogs. Megite Blog Tracker is the first algorithmic news tracking service created for a single blog. Megite realized that there had to be a better way to explore the conversations around blog posts - particularly for large blogs - than the typical tools such as trackbacks and pingbacks. What's more, blog readers may be short of time and unwilling to scroll through many pages of posts to discover the top story of the day. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Open University's Open Research Online

<http://oro.open.ac.uk/>

The Open University's Open Research Online is a repository of research publications and other research outputs. Open Research Online is an Open Access resource that can be searched and browsed freely by members of the public. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Research Monitor

<http://www.priorysolutions.co.uk/researchmonitor.htm>

Research Monitor is the vendor independent, fully flexible, online research cost management solution giving firms maximum returns on their increasing investment in online research. Research Monitor works with any internet site. It monitors and allocates the cost of specific activity and downloads, or the time spent online. Companies House Direct, Lexis Nexis, Westlaw, Perfect Information, Euroinfopool and Saegis are just a few examples of research sites that can be tracked. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Biomedical Engineering: Applications, Basis and Communications (BME)

<http://www.worldscinet.com/bme/>

Biomedical Engineering: Applications, Basis and Communications is an international, interdisciplinary journal aiming at publishing up-to-date contributions on original clinical and basic research in the biomedical engineering. Biomedical Engineering: Applications, Basis and Communications explores all facets of biomedical engineering, with emphasis on both the clinical and scientific aspects of the study. It covers the fields of bioelectronics, biomaterials, biomechanics, bioinformatics, nano-biological sciences and clinical engineering. The journal fulfils this aim by publishing regular research / clinical articles, short communications, technical notes and review papers. Papers from both basic research and clinical investigations will be considered.

Visual Medical Dictionary

<http://www.curehunter.com/public/dictionary.do>

It goes beyond regular dictionaries by displaying an ontology context tree (MeSH based) and interactive network graph of related drugs, diseases and therapies. For example: a search for "obesity" will show a strong relationship with "Insulin" and "Exercise" among other drugs and therapies. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the script code for [eHealthcareBot](#) Search Engine. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Guide to Industry Research

http://www.loc.gov/rr/business/BERA/issue9/issue9_main.html

This guide is designed as a starting point for current information on industries. It is for beginning researchers or those who need a place to start research on a particular industry. Obviously, every industry cannot be included. However, links to other industry guides and resources on the Library of Congress web pages are included. There is some treatment of historical industry research — a few sources or titles — but since this guide is geared toward current information, historical information is limited. Also, it should be noted that while this guide focuses on the U.S., some of the same principles and sources can be used for a more global perspective. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

AGIS.com - Eldercare, Long Term Care, and Caregiving Information Resources

<http://www.agis.com/>

By combining unbiased eldercare guidance with convenient access to support services, AGIS.com helps caregivers and their loved ones meet the challenges of aging. Informed, connected AGIS.com users make decisions that lead to happier, healthier lives. They do not endorse, nor do they have any financial interest in, any provider listed in their search results. They do not accept payment from providers seeking to improve their placement in search results. All sponsored partners shown on their site are clearly labeled as such. This has been added to [Elder Resources](#) Subject Tracer™ Information Blog.

RegExLib - Regular Expression Library

<http://regexlib.com/>

RegExLib.com is the Internet's first Regular Expression Library. Currently they have indexed 1796 expressions from 1192 contributors around the world. They hope you'll find their site useful and come back whenever you're looking for an expression for a particular task, or have just figured out a new expression that does something useful. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Galaxy Zoo

<http://www.galaxyzoo.org/>

A project to classify galaxies using images from the Sloan Digital Sky Survey, open to any who want to participate after working through a tutorial. Articles on the methodology and science of this effort are also provided. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog.

Multiply - Share Your Life With Your Friends

<http://www.multiply.com/>

Multiply gives you an easy way to share all kinds of digital media, including photos, blogs, videos, music and more, all in one convenient place: your own personal web site. With Multiply, you can share and discuss your stuff with everyone in your "social network," and also be alerted whenever they have something new. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Entrepreneurial Internet Workshops

<http://www.EntrepreneurialInternetWorkshops.com/>

I am extremely pleased to announce the upcoming availability of my **2008 Source Series Entrepreneurial Internet Research Workshops** January, February and March 2008 in Naples, Florida and San Diego, California. These one day workshops will be fast paced, competency based and designed both for the newbie to the Internet as well as the seasoned veteran with loads of excellent entrepreneurial sources examples and bookmarks! The one day entrepreneurial workshop covers:

8:45 - 9:00 Introduction and Overview of the Entrepreneurial Internet Research Workshop.

9:00 - 10:00 Historical perspectives of the Internet to current day happenings.

10:00 - 10:15 Online live examples of above .

10:15 - 10:30 Coffee Break - CyberBreak

10:30 - 12:00 Entrepreneurial Driven Organizations: Listserv®, NewsGroups, Chat Channels, Bulletin Boards, Forums, Blogs, News Aggregators, Intelligent Agents, Bots, MashUps, and Web2.0++.

12:00 - 1:15 Lunch Break (On Your Own)

1:15 - 1:45 Online live examples continued .

1:45 - 2:30 Online examples of the workshop Entrepreneurial Research Sources.

2:30 - 2:45 Coffee Break - CyberBreak

2:45 - 3:45 Tools necessary to build Entrepreneurial Intelligence including Browser ToolKit and Searcher ToolKit to discover additional 2008 resources.

3:45 - 4:30 Current Awareness Resources and what the future holds....

4:30 - 5:00 Question and Answers

Each registrant will receive a comprehensive Healthcare Internet Research workbook along with Mr. Zillman's latest 2008 publications: [Current Awareness Monitors, Alerts and Information Traps for 2008](#) and [Market Intelligence Resources 2008](#).

Doof.com - Play, Meet and Compete

<http://www.doof.com/>

doof.com is a game social network whereby one can play games (over 50 free skilled casual games like Words, Numbers, Sudoku, Golden Arrow and, meet people, participate in friendly competition, share and express themselves (through profiles and blogs). They have just gone live for testing purposes (working on their UI) but will be ready for a hard launch by the first of October. This has been added to [Games Resources](#) Subject Tracer™ Information Blog. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Human Genome Project Education Resources

http://www.ornl.gov/sci/techresources/Human_Genome/education/education.shtml

Exploring the world of the human genome project can be quite an undertaking for students new to the subject. Fortunately, the U.S Human Genome Project website contains a veritable cornucopia of accessible and age-appropriate educational materials for use in the classroom. First-time visitors may wish to start on the left-hand side of the page, which includes a FAQ area, a glossary, and a basic overview of genetics, appropriately titled "Genetics 101". After that, visitors may wish to look through the primary resources, which are organized into sections that include "Posters", "Presentations", "Online Educational Modules", and "Downloadable Teaching Aids". There are over several hundred resources contained within the site, and visitors can also make use of the search engine embedded on the homepage to look for specific resources. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog. [From The Scout Report, Copyright Internet Scout Project 1994-2007. <http://scout.wisc.edu/>]

CBE-Life Sciences Education (CBE-LSE)

<http://www.lifescied.org/>

CBE-Life Sciences Education (CBE-LSE), a free, online quarterly journal, is published by the American Society for Cell Biology (ASCB). The journal was launched in spring 2002 as Cell Biology Education A Journal of Life Science Education. The ASCB changed the name of the journal in spring 2006 to reflect better the breadth of its readership and the scope of its submissions. CBE-LSE publishes peer-reviewed articles on life science education at the K-12, undergraduate, and graduate levels. The journal focuses on how students are introduced to the study of life sciences, as well as approaches in cell biology, developmental biology, neuroscience, biochemistry, molecular biology, genetics, genomics, bioinformatics, and proteomics. CBE-LSE publishes research articles and descriptive articles. Research articles focus on theoretically grounded questions of science education and incorporate either quantitative or qualitative methods of analysis. Descriptive articles detail educational innovations (e.g., inquiry laboratory courses, Web-based courses, and interdisciplinary curricula). These must be ³tried and tested,² normally will include samples of course or lab materials,

Awareness Watch V5N11 November 2007 Newsletter

zillman@VirtualPrivateLibrary.com

© 2007 Marcus P. Zillman, M.S., A.M.H.A.

and must include some level of assessment to gauge efficacy of the course in terms of student learning. In planning a new course or laboratory exercise, instructors who contemplate subsequent publication of their educational innovations in CBE-LSE should give careful thought to how they will assess student learning. Articles that lack an assessment component will be returned to authors without review. In addition, research and descriptive articles are expected to display (1) pedagogical content, (2) clear description of goals and expected student outcomes, (3) transferability to other settings, (4) application to a defined audience of teachers, and (5) references to related educational literature.

eLearningPulse - Your Daily Source For All Things eLearning

<http://www.elearningpulse.com/>

eLearningPulse is an independent online community focused on serving eLearning developers, from instructional designers to software developers to project managers. This site provides free resources to the eLearning development community, including news, discussion forums, job postings, and more. They realized that there wasn't a great place to rely on for this type of information in the eLearning field, so they built it themselves. eLearningPulse is free. They display eLearning-related ads on the site to pay their hosting fees. This will be added to [Education and Distance Learning Resources](#) Internet MiniGuide.

Occultopedia: The Occult and Unexplained Encyclopedia

<http://www.occultopedia.com/occult.htm>

Occultopedia is the premier internet index of the paranormal, occult and inexplicable. In addition to being the foremost online destination for information about the supernatural, unusual phenomena and the occult, Occultopedia also features a variety of resources for the pagan community, new age buffs, unexplained phenomena enthusiasts, curious minds, and skeptics as well. Occultopedia is the genuine article, the original and the best internet index of the extraordinary and uncanny, shamelessly copied by many, but never equaled. Online since the early 90s — at first in a free web space provider, and in 1997 finally with its own domain name and hosting — Occultopedia still is the principal online resource for those looking for the unexplained, the curious and the unusual. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

American Law Sources On-line (ALSO!)

<http://www.LawSource.com/>

LawSource.com is the home of American Law Sources On-line (ALSO!) that provides a comprehensive, uniform, and useful compilation of links to freely accessible on-line sources of law for the United States and Canada. (See also a link below for Mexico.) This site contains additional links to sources of commentary and practice aids that are available without charge (or available at a reasonable charge from governmental and nonprofit providers). Open Biomedical Engineering Journal

<http://www.bentham.org/open/tobej/index.htm>

The Open Biomedical Engineering Journal is an Open Access online journal which publishes research articles, reviews, and letters in all areas of biomedical engineering. The Open Biomedical Engineering Journal, a peer reviewed journal, aims to provide the most complete and reliable source of information on the latest advancements in the field. The emphasis will be on publishing quality articles rapidly and freely available to researchers worldwide. Open Biomedical Engineering Journal is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

SeeqPod Music - Playable Search, Find, Discover, Watch, Listen and Share

<http://www.seeqpod.com/music/>

Now, more than ever, it is important to be able to find, discover, and manage the wealth of information available on the Internet. SeeqPod is a totally different breed of search and discovery technology provider, because they believe that one day, everything will be 'playable'. Hence they have embraced the term 'Playable Search'. The team at SeeqPod is passionate about technology as well as music. So first they decided to apply some pretty sophisticated technology to music and video search so that anyone, anywhere can mine the deepest crevices and corners of the Web for media that is publicly available, yet not always easy to find. Currently in Beta, SeeqPod's first consumer site empowers users by allowing them to search and discover music and video all over the Web. Their intelligent software robots work with targeted crawling systems to auto-submit content to the site. This, combined with user submissions, results in a large and rich search and discovery index. This process can be viewed in real-time via the PodCrawler. Born out of UC's Lawrence Berkeley National Laboratory (LBNL), 'Playable Search' is made possible through biomimetic search & discovery technology, a method that mimics the way the human mind might use context to make and recall associations, an approach which relies on context by finding the hidden relationships in digital content and data. SeeqPod has provided public access to its technologies through SeeqPod Media Search, Recommendation and Discovery Services (SMSRDS), a REST-based API. SMSRDS enables third-party developers to easily integrate SeeqPod technologies into social networks, ad networks, and other consumer applications, and improve their user's experience in new and novel ways. The KOffice Project - KWord

<http://www.koffice.org/>

KWord is a frame-based word-processing and desktop publishing application. KWord is capable of creating demanding and professional looking documents. Whether you are a corporate or home user, production artist or student, KWord will prove a valuable and easy to use tool for all your word processing and layout needs. KWord is a wordprocessor based on frames. This can be used to place components in precise locations, as with many professional DTP applications. KWord can also handle huge amounts of texts and allows you to do professional markup with ease. KWord's features include: 1) uses the standard ISO 26300 OpenDocument format; 2) paragraph style sheets (borders, alignment, spacing, indentation, bullet points, tab stops, page breaks, and font type, style, color and size), together with a stylist to edit, add, remove and update styles (a number of predefined styles are provided); 3) a frame orientation, suitable for simple desktop publishing (DTP); 4) numerous preset as well as custom page sizes; 5) multiple columns per page; 6) headers and footers (including different first page headers/footers); 7) variables, such as page number, company name, user name, document summary, date and time or a custom variable; 8) tables; 9) embedding of text frames, images and clip-art (.wmf and .svg files); 10) chapter numbering; 11) auto-generation of table of contents; 12) auto-correction and spell checking; and 13) templates. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

International Review of Environmental and Resource Economics

<http://www.irere.net/>

Environmental and resource economics has become a broad topic, making connections with many other subdisciplines in economics as well as the natural and physical sciences. It has also experienced a significant growth in research such that the literature is exploding in terms of the number of topics addressed, the number of methodological approaches being applied and the sheer number of articles being written. Coupled with the high degree of specialization that characterizes modern academic research, this proliferation of topics and methodologies makes it impossible for anyone, even those who specialize in the subject, to keep up with developments in the field. The International Review of Environmental and Resource Economics is designed to fill this niche by publishing state-of-the-art review articles by top specialists in their fields who have made substantial contributions to the area that they are surveying. Authors are invited by the editors, in consultation with the editorial board, and each paper is critically reviewed.

DBAN - Securely Wipe Clean Hard Disks

<http://dban.sourceforge.net/>

Darik's Boot and Nuke ("DBAN") is a self-contained boot floppy that securely wipes the hard disks of most computers. DBAN will automatically and completely delete the contents of any hard disk that it can detect, which makes it an appropriate utility for bulk or emergency data destruction. DBAN is a means of ensuring due diligence in computer recycling, a way of preventing identity theft if you want to sell a computer, and a good way to totally clean a Microsoft Windows installation of viruses and spyware. DBAN

International Journal of Biostatistics

<http://www.bepress.com/ijb/>

The International Journal of Biostatistics is a journal devoted to the entire range of biostatistics. Topics include new biostatistical methods and models, new statistical theory, advances in biostatistics computing, and original application of statistical methods for important practical problems in the biological, medical, public health, and agricultural sciences. The International Journal of Biostatistics seeks to publish new biostatistical models and methods, new statistical theory, as well as original applications of statistical methods, for important practical problems arising from the biological, medical, public health, and agricultural sciences. It is intended that the journal cover the entire range of biostatistics, from theoretical advances to relevant and sensible translations of a practical problem into a statistical framework, including advances in biostatistical computing. Electronic publication also allows for data and software code to be appended, and opens the door for reproducible research allowing readers to easily replicate analyses described in a paper. Both original research and review articles will be warmly received, as will articles applying sound statistical methods to practical problems.

coComment - Your Window Into Conversations On the Web

<http://www.cocomments.com/>

coComment is a new service which allows you to enjoy the full potential of comment-based conversation on the web. Before coComment, comments made across different sites (such as blogs, photosharing services, news sites, and others providing the ability for readers to leave comments) did not come together into a clear conversation, but were fragmented, hard to follow, and untrackable discussions. Using coComment, you can now keep track of all the comments and discussions you are participating in or observing on the web. When someone adds something to the comment stream or discussion, you'll be notified. And, if you're a blogger, you can display the comments you make elsewhere back on your own blog. This has been added to the tools section of [Research Resources](#)

DCEZ - A Framework for Easy Distributed Computing

<http://dcez.emporia.edu/>

DCEZ is a distributed computing infrastructure modeled after the approach used by Boinc, which is the software used by the SETI@home project. It is intended to be useful to individuals, small user groups and in pedagogical settings to allow exploration of distributed computing technology with a minimum of effort. The target applications for DCEZ are small to moderate computationally intensive problems such as Monte Carlo

Awareness Watch V5N11 November 2007 Newsletter

simulations, cryptography applications, numerical approximations and computer animation. DCEZ was designed to be simple to set up and use, and to perform distributed computing with a minimum of infrastructure. Both the client and server elements of the system run in a Windows (XP, 2000 and Vista) environment. The executables are of modest size. Both executables are supplied with an installation program. The client program is a screensaver program that displays a bitmap graphic and is configured through the use of a configuration menu. The server program uses a configuration file to specify parameters and tune the server environment. This has been added to [Grid Resources](#) Subject Tracer™ Information Blog.

BIOS

<http://www.tri-beta.org/bios.html>

BIOS, the quarterly journal of Beta Beta Beta Biological Society, has been published continuously since 1930. It has a three-fold purpose: to publish matters that pertain to the affairs of the Society, to publish articles by members, and to publish articles that will be of general interest to biologists. Many distinguished biologists have contributed manuscripts for publication in BIOS, written especially with the undergraduate reader in mind. Subjects covered include articles on current research, developments in biology, biology as a profession, as well as graduate and professional training for biologists. Special emphasis is placed on the publication of undergraduate research papers.

dotProject - Project Management Application

<http://www.dotproject.net/>

dotProject is a volunteer supported Project Management application. There is no "company" behind this project, it is managed, maintained, developed and supported by a volunteer group and by the users themselves. For more about the product, what it does, etc please follow the links to the doc site at the top of site. The software is free to anyone who would like to download it. Day to day support is provided free by volunteers. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Joone - Java Object Oriented Neural Engine

<http://www.jooneworld.com/>

Joone is a FREE Neural Network framework to create, train and test artificial neural networks. The aim is to create a powerful environment both for enthusiastic and professional users, based on the newest Java technologies. Joone is composed by a central engine that is the fulcrum of all applications that are developed with Joone. Joone's neural networks can be built on a local machine, be trained on a distributed environment and run on whatever device. Everyone can write new modules to implement new algorithms or new architectures starting from the simple components distributed with the core engine. The main idea is to create the basis to promote a zillion of AI applications that revolve around the core framework. This has been added to [Artificial Intelligence Resources](#) Subject Tracer™ Information Blog.

SoonR - Remote Control Your Computer with Your Mobile Phone

<http://www.soonr.com/>

Your mobile phone acts as a remote control for your computer. There is nothing to install on your phone because SoonR uses the features that are already built into your phone. You simply login into the SoonR website at www.soonr.com. SoonR can send you an SMS with the link to make it even easier. In order to access your computer from your phone, you need to download a program (SoonR Desktop Agent) that runs on your computer, and define which folders you want to access from your phone. This program allows you to leverage applications installed on your computer such as Outlook, Mac Mail, Skype, or Desktop Search. That's not all it does! It will optimize all the data that is sent to your phone, leveraging the superior power of your computer's CPU. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Interlibrary Loan, Document Delivery & Electronic Reserve

<http://www.haworthpress.com/store/product.asp?sku=J474>

In addition to practice and research-based articles on interlibrary loan, the journal focuses on the broad spectrum of all library and information center functions that rely heavily on interlibrary loan, document delivery, and electronic reserve, including:

- * the use of interlibrary loan statistics for book and periodical acquisitions, weeding, and collection management in general
- * cutting-edge technologies and services used for interlibrary loan, such as Ariel, private document delivery services, and central data banks of any kind
- * fundamental copyright and permission issues concerning document delivery
- * quality assurance, efficiency studies, and practical program descriptions in the document delivery and electronic reserve arenas
- * special problems of international interlibrary loan, including problems of Third World country libraries; international currency and payment problems and innovative solutions
- * interlibrary loan of specialized library materials such as music collections, media collections, art collections, foreign language collections, and legal materials
- * special problems of interlibrary loan and government documents
- * new opportunities in interlibrary loan and the enhancement of interlibrary loan as a specialization and career growth position in library organizations

Agile Messenger - All In One Mobile Phone IM Client

<http://www.agilemobile.com/>

Agile Messenger is the worlds most feature rich and user friendly all-in-one MSN®, AIM®, Yahoo!®, ICQ® & GoogleTalk® instant messaging client for your mobile phone! Send instant text, photo, voice and video messages to anyone on your MSN®, AIM®, Yahoo!®, ICQ® & GoogleTalk® contact list directly from your mobile phone or PDA! Save money on SMS: Agile Messenger sends all messages through your data-plan, there is no per message charge! PlanHQ - Online Business Planning Tool

<http://www.planhq.com/>

PlanHQ is an online business planning tool that takes your plan away from being a static document and turns it into a dynamic and up-to-date overview of where you've been, where you are and where you're going. With PlanHQ, your business plan changes as your business changes, not just once or twice a year. Your whole team is actively involved in creating your plan and can align and prioritize all their work against goals. This means that everyone is always working to plan and ensures you achieve your goals. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog. This has been added to the tool section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

BioScience

http://www.aibs.org/bioscience/current_issue.html

Since 1964, BioScience has presented readers with timely and authoritative overviews of current research in biology, accompanied by essays and discussion sections on education, public policy, history, and the conceptual underpinnings of the biological sciences. A peer-reviewed, heavily cited, monthly journal with content written and edited for accessibility to researchers, educators, and students alike, BioScience is provided to all AIBS members in print and online as a part of regular AIBS dues. BioScience includes articles about research findings and techniques, advances in biology education, professionally written feature articles about the latest frontiers in biology, discussions of professional issues, book reviews, news about AIBS, a policy column (Washington Watch), and an education column (Eye on Education). Roundtables, forums, and viewpoint articles offer the perspectives of opinion leaders and invite further commentary. Occasional special sections in BioScience provide an in-depth look at important topics. Recent special sections have addressed ecological boundaries, protected areas, acid rain, science and public policy, the US Long Term Ecological Research network, and agricultural bioterrorism.

Nexodyne Stock Exchange (NSXE)- Stock Market Simulator

<http://exchange.nexodyne.com/>

The Nexodyne Stock Exchange (NSXE) is an advanced market simulation intended both for financial professionals and beginners who wish to understand how a real stock market works. Unlike some other simulations, the NXSE aims to recreate as many details of the real market as possible. The exchange uses modern Asynchronous JavaScript and JSON (AJAJ) so the user is kept up to date with the latest market information. This means no page reloading, and minimal delay between the market state and the information on-screen. The NXSE is under continual development, and new features are added regularly to ensure the most interesting and realistic experience. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog.

Vyatta - Open-Source Networking

<http://www.vyatta.com/>

Vyatta has changed the networking world by developing the first commercially supported, open-source router, firewall, VPN solution to provide an alternative to over-priced, inflexible products from proprietary vendors. Vyatta delivers the features, performance, and reliability of an enterprise-class secure router with the added benefits of flexible deployment options--x86 hardware, blade servers, virtualization-- freedom to integrate applications, and the economic advantages of commodity hardware and components. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Eventful - World's Largest Collection of Events

<http://www.eventful.com/>

Founded in 2004, Eventful is the leading events website which enables its community of users to discover, promote, share and create events. Eventful's community of users select from nearly 4 million events taking place in local markets throughout the world, from concerts and sports to singles events and political rallies. People use Eventful to track and share events with their friends and community in many ways: a) import iTunes and last.fm performer lists and keep track of which favorites are coming to town, b) easily export events via feeds, calendar widgets, third-party calendar services, email alerts and much more , c) keep track of what's happening at favorite venues and see where favorite performers are appearing , d) weekly email event guides are completely customized based on a user's interests, with recommended events in their city. e) add events to your personal watch list and see what events your friends and groups are watching (and going to), and f) add events to Eventful for free and promote events to the entire community. Eventful's unique Demand service empowers users to influence where their favorite performers, candidates and other celebrities appear by creating viral grass-roots campaigns to "Demand" them in their town. Tens of thousands of musicians, comedians and political candidates use Eventful Demand to engage with millions of their fans and supporters to find out where they are in Demand. Performers are able to use Eventful Demand to make informed decisions about where to appear and can communicate with their Demanders via highly targeted email tools. Along with MySpace, YouTube and iTunes, Eventful is an essential part of the online marketing toolkit for performers, politicians and others. Eventful.com is built upon a unique, open platform that enables partners and web applications to leverage Eventful's data, features and functionality via the Eventful API. 600-2000 words, and intended to contain deeper analysis than is found on the Op-Ed page of the Wall Street Journal or New York Times, but to be of comparable general interest. Regular columnists with voices from across the political spectrum write several Columns each year.

Disposable Web Page

<http://disposablewebpage.com/>

Disposable Web Page is now here! You can create a disposable web page with as little effort as a few key strokes and start right away at filling up the page with the content you want. Disposable web page offers you the convenience and freedom of getting information out there on the internet with as little hassle as can be. Each disposable webpage has a count down clock. You can set this clock to count down anywhere from 90 days to 0 days from the time the page is created. When the remaining time reaches 00:00:00:00, the page is automatically set for disposal and will exist for 2 more weeks before it gets incinerated. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

BioNanomatrix, Inc (BNM)

<http://www.bionanomatrix.com/>

BioNanomatrix, Inc (BNM) is a bionanotech designer and maker of nanostructured chips, devices and systems for fast, comprehensive, and low-cost analysis of native state genomic, epigenomic and proteomic information with sensitivity at the single cell / single molecule level. Currently, BNM develops nanodevices and systems for cancer diagnostics, complex disease therapeutics and personalized medicine on its NANOANALYZER™ platform. Biomedicine is making progress in its understanding of the mechanisms of biology and disease through the gradual transition from an era of genome sequencing and functional annotation towards an era of genome information utilization. However, many pre-genome technologies are encountering problems in answering post genome questions, often ruining valuable information during sample preparation or by averaging heterogeneous samples. This has created demand for smaller, faster, cheaper, more accurate and more direct tools to address today's challenges from pathogen detection, drug screening to system biology, personalized and preventive medicine. Borne of a six-million dollar Department of Defense project funded by DARPA (Defense Advanced Research Project Agency) at Princeton University, BioNanomatrix is currently one of seven platform startups of Princeton University as it builds upon an already strong portfolio of patents and other intellectual property. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Complete Genomics (CGI)

<http://completegenomics.com/>

Complete Genomics (CGI) is a high-performance DNA sequencing company whose mission is to dramatically reduce the cost of DNA sequencing for research, drug development, and diagnostic applications. SPIN-Farming - Maximizing the Utilization of the Resource

<http://www.spinfarming.com>

SPIN Farming is an organic-based sub-acre farming method that applies small business management practices to farming. Its revenue targeting formulas make it possible to produce \$50,000+ gross sales from a half-acre. It removes the two barriers to entry for new farmers - they don't need much land or startup capital to do SPIN Farming. It is a method uniquely suited to entrepreneurs, and it provides a new career path for first generation farmers. It also provides a means for conventional farmers to downsize their operations without sacrificing – and in many cases increasing - their income. And because it requires minimal infrastructure SPIN integrates agriculture into the built environment in an economically viable manner. This has been added to [Agriculture Resources](#) Subject Tracer™ Information Blog. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Spotplex - What People Read Most Today

<http://www.Spotplex.com/>

Spotplex is the only online content aggregation service that dynamically provides an instant, impartial ranking of popular Web content. With Spotplex, Internet users are not required to change their behavior to generate content rankings. By eliminating tagging and voting, Spotplex more accurately reflects what people read most today. Based on an algorithm-based measuring system that analyzes readers' behavior in real time, Spotplex's popular content rankings come from actual impressions, or "reads". This impartial process gives every blogger a better opportunity to be heard. Spotplex also uses a relative popularity measure by which article reads are measured relative to a site's overall traffic, rather than by volume alone. This evens the playing field so all blogs can compete equally in the Spotplex rankings, regardless of readership size or subject matter. For

WikiDashboard - Providing Social Transparency to Wikipedia

<http://wikidashboard.parc.com/>

This is the first research prototype of a social dynamic analysis tool for Wikipedia called WikiDashboard. The idea is that if we provide social transparency and enable attribution of work to individual workers in Wikipedia, then this will eventually result in increased credibility and trust in the page content, and therefore higher levels of trust in Wikipedia. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

What Works Clearinghouse (WWC)

<http://ies.ed.gov/ncee/wwc/>

The What Works Clearinghouse (WWC) collects, screens, and identifies studies of effectiveness of educational interventions (programs, products, practices, and policies). The WWC regularly updates the WWC Technical Standards and their application to take account of new considerations brought forth by experts and users. Such changes may result in re-appraisals of studies and/or interventions previously reviewed and rated. The current WWC Standards offer guidance for those planning or carrying out studies, not only in the design considerations but the analysis and reporting stages as well. The WWC Standards, however, may not pertain to every situation, context, or purpose of a study and will evolve. This will be added to [Education and Distance Learning Resources](#) Internet MiniGuide. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Asian Journal of Cell Biology

<http://www.academicjournals.net/2/c4p.php?id=2&theme=2&jid=ajcb>

Asian Journal of Cell Biology publishes papers on all aspects of cellular structure and function. Areas of interest include, but are not restricted to, nuclear organization and structure, protein and membrane trafficking, signal transduction, cytoskeleton and molecular motors, cell cycle and division, cell growth, survival and death, cellular adhesion and motility, and intercellular communication. The Editors also encourage the submission of manuscripts that define the interfaces between cell biology and other fields, especially those elucidating the cell biological basis of problems in immunology, neurobiology, microbial pathology, developmental biology, and disease. As the methodology of cell biology has come to encompass everything from structural biology to molecular biology, biochemistry to immunocytochemistry, genetics to live cell imaging, submissions are welcome regardless of experimental approach.

ResearchSEA - Asia Research News Portal

<http://www.researchsea.com/>

ResearchSEA is Asia's first research news portal, a one-stop centre where journalists and members of the public can gain access to news and local experts from the research world in Asia. Promoting public understanding of research encourages long term innovation and growth. The media is key to promoting public understanding. Almost everyone in the world reads newspapers, magazines, websites, watch TV or listen to the radio. The media

is the ultimate gateway to the international community and a powerful medium for forging local and international links. ResearchSEA brings research news and top experts direct from universities, think tanks, journals and specialist organisations to journalists around the world. Journalists in over 78 countries use ResearchSEA to find information about the latest research and experts for their newspapers, magazines, radio and television programs. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

OpenClinica - Clinical Research Studies Software

<http://www.openclinica.org/>

OpenClinica is free, open source software for clinical research informatics and a web-based software platform for managing multi-site clinical research studies. It facilitates protocol configuration, design of Case Report Forms (CRFs), electronic data capture, retrieval, and management. OpenClinica supports HIPAA guidelines, and is designed as a standards-based extensible, modular and open source platform. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

SocialRank - The Voice of Community Has Spoken

<http://www.socialrank.com/>

SocialRank monitors thousands of blogs in popular categories and identifies the hottest stories, bloggers and posts of the day. They do this democratically by measuring what stories users link to, talk about and pay attention to. The result? You now know the hottest stories and blogs in your favorite fields. Browse, learn, enjoy, and most of all participate. It's really quite addictive ;-). This has been added to my [Bots, Blogs and News Aggregators](#) presentation resources page. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Applicable Analysis and Discrete Mathematics (AADM)

<http://pefmath.etf.bg.ac.yu/>

Applicable Analysis and Discrete Mathematics (AADM) is a general mathematical journal. Not excluding other fields, it is concentrated around areas such as classical mathematical analysis, functional analysis, differential and difference equations, special functions, combinatorics and graph theory, mathematical applications in probability and statistics, numerical analysis and computer science. The articles should be written in English language only.

Framingham SNP Health Association Resource (SHARe)

<http://www.ncbi.nlm.nih.gov/projects/gap/cgi-bin/study.cgi?id=phs000007>

Startup of Framingham Heart Study. Cardiovascular disease (CVD) is the leading cause of death and serious illness in the United States. In 1948, the Framingham Heart Study (FHS) -- under the direction of the National Heart Institute (now known as the National Heart, Lung, and Blood Institute, NHLBI) -- embarked on a novel and ambitious project in health research. At the time, little was known about the general causes of heart disease and stroke, but the death rates for CVD had been increasing steadily since the beginning

Awareness Watch V5N11 November 2007 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

© 2007 Marcus P. Zillman, M.S., A.M.H.A.

of the century and had become an American epidemic. The objective of the FHS was to identify the common factors or characteristics that contribute to CVD by following its development over a long period of time in a large group of participants who had not yet developed overt symptoms of CVD or suffered a heart attack or stroke.

Framingham Heart Study SHARe Genome-Wide Association Study. In 2007, the FHS entered a new phase with the conduct of genotyping for the FHS SHARe (SNP Health Association Resource) project, for which genotyping is conducted using approximately 550,000 SNPs (Affymetrix 500K mapping array plus Affymetrix 50K supplemental array) in over 9,300 subjects from the three generations of subjects (including over 900 families). The SHARe database is housed at NCBI's dbGaP and will contain all 550,000 SNPs as well as SNP and microsatellite genotyping conducted previously in the FHS. The phenotype database will contain a vast array of phenotype information available in all three generations. These will include the quantitative measures of the major risk factors such as systolic blood pressure, total and HDL cholesterol, fasting glucose, and cigarette use, as well as anthropomorphic measures such as body mass index, biomarkers such as fibrinogen and CRP, and electrocardiography measures such as the QT interval. Many of these measures have been collected repeatedly in the original and Offspring cohorts. Also included in the SHARe database will be an array of recently collected biomarkers, subclinical disease imaging measures, clinical CVD outcomes as well as an array of ancillary studies. The unflagging commitment of the research participants in the NHLBI FHS has made more than a half century of research success possible. For decades, the FHS has made its data and DNA widely available to qualified investigators throughout the world through the Limited Access Datasets and the FHS DNA Committee, and the SHARe database will continue that tradition by allowing access to qualified investigators who agree to the requirements of data access. With the SHARe database, we continue with an ambitious research agenda and look forward to new discoveries in the decades to come. Wise Guide - Library of Congress Portal

<http://www.loc.gov/wiseguide/>

This Wise Guide portal was designed to introduce you to the many fascinating, educational and useful resources available from the nation's library and one of the most popular Web sites of the federal government. The "Wise Guide" will be refreshed monthly, much like a magazine, offering links to the best of the Library's online materials. Each of these "articles" is based on items contained in a collection, database, reading room or other area of the Library's online offerings. You will see that we are "more than a library," and our holdings range from prints, photographs, films, audio recordings, maps, manuscripts, music and digital materials to (of course) books. We are also a place that sponsors concerts, lectures, dance performances, film screenings, and poetry readings. We hope the Guide's monthly "articles" will encourage you to explore the millions of items we make available at www.loc.gov. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

International Journal of Integrative Biology (IJIB)

<http://www.classicus.com/IJIB/>

The International Journal of Integrative Biology is a journal for biology beyond borders and is set to bridge scientific disciplines and demonstrate the effectiveness of cross-disciplinary sciences. The journal aims to bring together manuscripts from biological, medicinal, physical, chemical, computational, and engineering sciences that address key problems in biology and biomedicine. The journal welcomes articles from all areas of biological and biomedical sciences (both experimental and theoretical). It specifically encourages articles that transcend traditional disciplinary boundaries.

ZIPskinny - Demographic Information on ZIPs and Neighboring Zips

<http://www.zipskinny.com/>

This site was created as a Web development "hobby" project using Census 2000 data obtained from the Census website. The site provides an interesting "first glance" at a ZIP Code area, but it should only be seen as that -- a first glance. It is not a substitute for the more thorough research you should do prior to making decisions about relocating to or conducting business in a particular location. This has been added to [Internet Demographics](#) Subject Tracer™ Information Blog.

Umbria - Mining the Blogosphere and Public Forums

<http://www.umbrialistens.com/>

Umbria is a marketing intelligence company that mines the blogosphere and other public forums, including social media and message boards, for insights into companies, products, people, and issues. This has been added to [Business Intelligence](#) Resources Subject Tracer™ Information Blog.

Rodovid - Free Multilingual Family Tree Portal

<http://www.rodovid.org/>

Rodovid has been designed and developed for people interested in their own family history and for those with an interest in the histories of royal families and famous people. The name Rodovid comes from the Ukrainian word Rodovid, which means lineage, genealogy. Rodovid uses state-of-the-art family tree building technology to organize genealogical information on living and deceased relatives and the relationships among them into a cohesive family tree. Rodovid is open to everyone. Visitors are welcome to contribute information and publish it on this website at any time. This has been added to [Genealogy Resources](#) Subject Tracer™ Information Blog.

eJOV: Journal of Organizational Virtualness

<http://www.ejov.org/>

eJOV (Journal of Organizational Virtualness) is an academic journal for theoretical and empirical research related to virtual organizations and networks. While the aim of the academic journal will remain theoretical advances, eJOV executive will focus on well reflected practically applicable solutions. Suggested topics for original submissions include (but are not limited to) the following areas:

Networks and ICT/IOS:

- * Organisational impact of emerging technologies,
- * Emerging technologies to support networks,
- * Design, Implementation, and Evaluation of IOS,
- * Network Information & Knowledge Management,
- * Inter-organizational (process) integration,

Network arrangements and typology:

- * Network concepts, e.g. virtual enterprise, value web, strategic alliance etc.,
- * Network properties,
- * Competition and collaboration in networks,
- * Networks and the theory of the firm,
- * Comparative analysis of network arrangements or networks and markets

Network management, i.e. strategy, planning, organizing, control:

- * Network business models, e.g. for mobile services,
- * Network governance,
- * Network purpose, e.g. R&D, innovation, supply-chains, logistics, procurement, marketing,
- * Networks in different industries,
- * Network life cycle and development stages, e.g. antecedents and contingencies, formation, growths, transformation, stabilization and dissolution of networks,
- * Trust, power, identity, codes of conduct in networks,

zillman@VirtualPrivateLibrary.com

© 2007 Marcus P. Zillman, M.S., A.M.H.A.

- * Social and intellectual capital in networks,
- * Networking competencies, networkability,
- * Network performance and outcomes,

Network economy

Socio-economic and political aspects

- * Regulatory environment: networks and competition/ anti-trust policy

Allth.at - Your Personal Search Agent

<http://www.Allth.at/>

Allth.at is the search that never stops. We will keep looking for your item on the sites you select and report new search results back to you. You can also choose to have new results emailed to you or, you can subscribe to the RSS feed and have your new search results delivered right to your RSS reader. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Harvey Project - Open Course Collaboratories Human Physiology Course Materials

<http://opencourse.org/Collaboratories/harveyproject>

An international collaboration of educators, researchers, physicians, students, programmers, instructional designers and graphic artists working together to build interactive, dynamic human physiology course materials on the Web. Founded in 1998, the Harvey Project has over a hundred participants in nearly twenty countries. It has received funding from the US National Science Foundation . The Harvey Project has developed over forty learning objects, mostly Java. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Can the Internet Cope With Stress? by Andreas Martin Lisewski

http://firstmonday.org/issues/issue12_9/lisewski/index.html

Abstract:

When will the Internet *wake up* and become aware of itself? In this note the problem is approached by asking an alternative question: Can the Internet cope with stress? By extrapolating the psychological difference between coping and defense mechanisms, a distributed software experiment is outlined which could reject the hypothesis that the Internet is not a conscious entity.
