Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

V5N3   **March 2007**

Welcome to the V5N3 March 2007 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Script Resources** on the Internet. These resources are constantly updated on the Script Resources Subject Tracer™ Information Blog available at the following URL:

http://www.ScriptResources.info/

Resources for scripts, codes and programming languages on the Internet continue to expand at a very rapid rate especially with the developments in the Web 2.0, MashUps, and the constant creation of new applications which of course foster new scripts!!

Script and Code Resources:

AA Free Programs: AAScripter
http://www.cyberiapc.com/aa/aascripter.htm

Actionscript.org - Macromedia Flash Resources and Tutorials
http://www.actionscripts.org/

ActiveState - - Dynamic Tools for Dynamic Languages

Awareness Watch™ Spotters

Top10 Sources
http://www.toptensources.com/
Top Ten Sources brings users the best rich media content from around the web on a wide variety of topics ranging from Immigration to Paris Hilton. By pulling together different types of media (blogs, video, podcasts, and mainstream news) with multiple points of view, Top Ten Sources gives you the complete picture of the stories and topics which are important to you. This "human-assisted search" model serves to make the world of user generated content and new media easily accessible to millions of new users. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

DealNews - News On Deals
http://www.DealNews.com/
Each day, dealnews reports the best deals available on computers, technology, gadgets, and other items you want to buy. dealnews is updated with as many as 200 new bargains, coupons, and sales in a single day. Each deal we list is by definition the lowest price available on that item from a reputable merchant. This has been added to ShoppingBots Subject Tracer™ Information Blog.

VirtualTourist - Travel Guides, Maps, Photos, Forums, Deals and More
http://www.VirtualTourist.com/
VirtualTourist is a worldwide travel community where real travelers and locals share real travel advice and experiences. As the single largest source of unbiased, user-generated travel content in the world, VirtualTourist is the premier resource for travelers seeking an insider's perspective. Real travel tips, reviews and photos from real people who have actually been there and done that; and this is what makes the travel content on VirtualTourist so useful. And since every tip on VirtualTourist is linked to a member's profile, with just a click you can learn more about each member—their age, hometown, travel interests, where they've been, hobbies, even what they look like—and then read

about more of their travel experiences. On VirtualTourist, tips and reviews are organized by destination—from Sydney to New York and everywhere in between—and then into 13 separate categories, like Hotels, Things to Do, Local Customs, Shopping, Tourist Traps and more. This makes it easy for members to contribute content and for other users to find it. This has been added to Reference Resources Subject Tracer™ Information Blog.

Social Networking Websites and Teens: An Overview
http://www.pewinternet.org/PPF/r/198/report_display.asp
A social networking site is an online place where a user can create a profile and build a personal network that connects him or her to other users. In the past five years, such sites have rocketed from a niche activity into a phenomenon that engages tens of millions of internet users. More than half (55%) of all online American youths ages 12-17 use online social networking sites, according to a new national survey of teenagers conducted by the Pew Internet & American Life Project. The survey also finds that older teens, particularly girls, are more likely to use these sites. For girls, social networking sites are primarily places to reinforce pre-existing friendships; for boys, the networks also provide opportunities for flirting and making new friends. This has been added to Social Informatics Subject Tracer™ Information Blog.

Ajax Cookbook
http://ajaxcookbook.org/
Ajax Cookbook is a web site devoted to publishing small, reusable snippets of JavaScript, HTML, and CSS that are generally useful to developers of Ajax web sites. The code on this site is licensed liberally under the Creative Commons Attribution 2.5 license so it can be reused in any commercial or non-commercial application, and none of the code depends on any JavaScript framework or third party library. Most of the Ajax "recipes" are just a few lines long, but solve a common problem. The goal is that you can copy and modify the code snippets extremely easily no matter what framework you are using (if any) or what your application looks like. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Joopz - Web Texting
http://joopz.com/
Joopz was created to make text messaging easier to use, more convenient and more accessible. Joopz allows users to send text messages from the Web to both individuals and groups, while enabling recipients to respond directly to the originating PC or Mac. Joopz web texts can be sent from any web-enabled device worldwide to any U.S. or Canadian mobile phone. Think of Joopz as your online command center for text messaging. Joopz has been well-received by all types of people – from young professionals stuck behind a PC all day - to college students working in the library all night - to parents who want to reach their kids after school. If you get easily frustrated with sending text messages from your traditional cell phone while you're at work or in

class – you're not alone! This has been added to the tools section of <u>Research Resources</u>
Subject Tracer™ Information Blog.

Tudu Lists
<u>http://app.ess.ch/tudu/</u>
Tudu Lists is an on-line application for managing todo lists. Tudu Lists is a very simple
application, which you can start using in seconds - but with some advantages over your
home-made Excel todo list: 1) Tudu Lists is web-based, and accessible from anywhere on
the planet, 2) Tudu Lists can be shared amongst people: you can share lists with your
friends, family or co-workers, 3) Tudu Lists can be accessed with an RSS feed: if one of
your shared lists is updated, your RSS aggregator will warn you, 4) Tudu Lists is
completely free! Just register and start using it. Even Tudu Lists' source code is free! If
you want your very own install of Tudu Lists, or if you are a programmer and want to see
how Tudu Lists is developed, just visit their developement Web site : <u>http://tudu.sf.net</u>.
This has been added to the tools section of <u>Research Resources</u> Subject Tracer™
Information Blog.

Open Software Wiki (SWIK) - Free Editable Database of Open-source Projects
<u>http://swik.net/</u>
SWiK.net is a project to help people collaboratively document open-source software.
SWiK is visited by tens of thousands of people daily, it's a place to make notes and
publish articles on software development and open source projects, tag projects to help
organize the world of open source, or just browse around and find interesting stuff. The
wiki is community run and completely open – it depends on editors like you to help build
pages with useful information about using open source software and developing
applications. This has been added to <u>World Wide Web Reference</u> Subject Tracer™
Information Blog.

OpenLaszlo - The Premier Open-source Platform for Rich Internet Applications
<u>http://www.openlaszlo.org/</u>
OpenLaszlo is an open source platform for creating zero-install web applications with the
user interface capabilities of desktop client software. OpenLaszlo programs are written in
XML and JavaScript and transparently compiled to Flash and soon DHTML. The
OpenLaszlo APIs provide animation, layout, data binding, server communication, and
declarative UI. An OpenLaszlo application can be as short as a single source file, or
factored into multiple files that define reusable classes and libraries. OpenLaszlo is write
once run everywhere. An OpenLaszlo application developed on one machine will run on
all leading Web browsers on all leading desktop operating systems. This has been added
tyo <u>World Wide Web Reference</u> Subject Tracer™ Information Blog.

Feed Button - One Button, For All XML/RSS Readers, Always Up To Date
<u>http://www.FeedButton.com/</u>
FeedButton is a method of organizing your blog's sidebar. Instead of putting all those
messy buttons on the side, FeedButton consolidates them all into one easy to use button.

This allows you to offer your readers a choice without sacrificing valuable real estate. This has been addded to Bots Blogs and News Aggregators Resources Page. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

UK PubMed Central - Free Archive of Life Science Journals
http://www.ukpmc.ac.uk/
Based on PubMed Central (PMC), the U.S. National Institutes of Health (NIH) free digital archive of biomedical and life sciences journal literature, UK PubMed Central (UKPMC) provides a stable, permanent, and free-to-access online digital archive of full-text, peer-reviewed research publications. UKPMC is part of a network of PMC International (PMCI) repositories. PMCI is a collaborative effort between the US National Library of Medicine (NLM), the publishers whose journal content makes up the PMC archive, and organizations in other countries that share NLM's interest in archiving life sciences literature. The UKPMC Funders Group, a mix of governmental and charitable research funders in the United Kingdom, are funding the set-up, maintenance and ongoing development of UKPMC. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to the source code for eHealthcareBot Search Engine.

cRANKy - The First Age-Relevant Search Engine
http://www.cranky.com/
An interesting and easy to use search engines designed for the baby boomers ..... worth a look ..... This has been added to Elder Resources Subject Tracer™ Information Blog. This has been added to Accessibility Resources Subject Tracer™ Information Blog.

DailyLit
http://www.dailylit.com/
They created DailyLit because they spent hours each day on email but could not find the time to read a book. Now the books come to us by email .... problem solved. You can learn more about how it works by reading their FAQ and their Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

A Guide to Statistical Information at WHO
http://www.who.int/whosis/en/
World Health Statistics 2006 presents the most recent statistics since 1997 of 50 health indicators for WHO's 192 Member States. This second edition of World Health Statistics includes an expanded set of statistics, with a particular focus on equity between and within countries. It also introduces a section with 10 highlights in global health statistics for the past year. This has been added to Healthcare Resources Internet MiniGuide. This has been added to the source code for eHealthcareBot Search Engine.

GiftTagging
http://www.GiftTagging.com/
Create gift lists that work with every shop on the internet. Gift tag things you want and have. Find other people with similar tastes and find great gift ideas for your friends and family. This has been added to ShoppingBots Subject Tracer™ Information Blog.

Tagzania - Tags and Places
http://www.tagzania.com/
Tagzania is about tags and places. If you register and log in, you can add places, points, to create and document your maps. When you add a point, you may tag it with keywords. That way, Tagzania is not only a place to build and keep your own maps, shared territories are created as well. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Gabbly - Chat About Any Content On the Web
http://www.gabbly.com/
Gabbly is a chat service that allows you to chat around any webpage. Its free to use on your personal page or commercial webpage. Simply type gabbly.com/ in front of a webpages URL, you will be able to chat with anyone visiting the page at the same time! For example, to chat on CNN.com, just visit gabbly.com/cnn.com in your browser. You will see the CNN website with the Gabbly Chat window floating on top. Is there anything to download or install? Nope! Theres no need to download or install anything. If you have a web browser, you can chat. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

VirtualBox - Open Source General Purpose Full Virtualizer
http://www.virtualbox.org/
InnoTek VirtualBox is a family of powerful x86 virtualization products for enterprise as well as home use. Not only is VirtualBox an extremely feature rich, high performance product for enterprise customers, it is also the only professional solution that is freely available as Open Source Software under the terms of the GNU Public License (GPL). InnoTek VirtualBox is a general-purpose full virtualizer for x86 hardware and is targeted at server, desktop and embedded use. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Footnote.com - The Place for Original Documents Online
http://www.footnote.com/
At Footnote.com you will find millions of images of original source documents, many of which have never been available online before. But at Footnote, finding an image is just the beginning. They have created powerful tools that let you interact with and enhance what you find. Annotate important information on the image, easily organize and share your findings or collaborate with people who have similar interests. If you have original source images of your own that you want to share with your colleagues, classmates, friends and family, simply upload them to Footnote and use their tools to make your

images searchable and available to others. Footnote also gives you an opportunity to share your story, ideas or research with others by creating your own "Member Pages". A Member Page is a place on the Footnote site where you can share your knowledge and research with others. You can write what you know, attach original sources that support your story and invite others to share their insights. Footnote has something for everyone, from individual history buffs to groups and societies looking for a smart way to make their collections available to millions of people. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

The World Wide Web Virtual Library - Malaysia
http://vlmy.geneva21.biz/
The World Wide Web Virtual Library - Malaysia, as its name implies, is a collection of links and other online resources related to Malaysia, for that matter, anything Malaysian. This has been added to Reference Resources Subject Tracer™ Information Blog.

EgoSurf - Know Your Place in the Blogosphere
http://www.egosurf.org/
You enter your name and your blogs web address. They search google and other search engines and find links to your blog. They calculate your ego ranking. They show you where your blogs appear in the search engines. They also keep track of your rankings over time, so you can see how your site moves through the blogosphere. Stroke your ego by visiting EgoSurf ..... This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

ForFarmers.com
http://www.forfarmers.com/
Description :ForFarmers.com is a marketplace for buying and selling new and used farm machinery, equipment, seeds, crops, vegetables, flowers, medicinal herb, ag products, chemicals, farm animals, real estate, livestock and a wide range of services including job opportunities. This has been added to Agriculture Resources Subject Tracer™ Information Blog.

Senduit - Free File Sharing Service
http://www.senduit.com/
Senduit's service provides users with the ability to upload a file via HTTP-Protocol and receive a custom URL address to download the file from Senduit's servers. This address can be shared by the user freely and can be used to download the file a reasonable number of times. The address expires in an amount of time designated by the user (between 30 minutes and 1 week) at which point in becomes inaccessible to the public and is removed from Senduit's servers. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Widgipedia - The Ultimate Widget and Gadget Resource
http://www.widgipedia.com/
Widgipedia is aiming to be the ultimate resource for both users and developers of widgets and gadgets. We are dedicated to offering the most comprehensive catalog of Web widgets and desktop widgets (and gadgets) across all platforms - many of which you will only find here. Developers can use Widgipedia to upload their creations, to collaborate with others, to learn or teach through tutorials, code samples, libraries and more. A widget is a small application that runs either on your desktop or in a Web page. Users typically find widgets easier to use than regular applications and developers usually find them easier to code. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

ChaCha Search - Connect and Search with a Live ChaCha Guide
http://www.chacha.com/
ChaCha stands out as different and better in a landscape cluttered with common search engines because it uses the World's most powerful technology - The human brain. ChaCha's goal is to provide a better search experience by combining results that are hand-picked by our knowledgeable human guides with the best computer-generated search results. In those cases where you can't find what you need with their instant results, ChaCha will connect you with a live human guide who will find the information for you through an instant messaging-style search session. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Open and Free Project Management Tools
http://proj.chbs.dk/
This is the place where you can follow the development and status of the project management tools under some kind of Open Source or Free Software license. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Geni - Everyone's Related
http://www.geni.com/
Geni is a unique approach to solving the problem of genealogy, which is the question of how everyone is related. Geni lets you create a family tree through our fun simple interface. When you add a relative's email address, he or she will be invited to join your tree. That relative can then add other relatives, and so on. Your tree will continue to grow as relatives invite other relatives. Each family member has a profile which can be viewed by clicking their name in the tree. This helps family members learn more about each other and stay in touch. Family members can also share information and work together to build profiles for common ancestors. Geni is a private network. Only the people in your tree can see your tree and your profile. Geni will not share your personal information with third parties. Geni was founded by former executives and early employees of

PayPal, Yahoo! Groups, Ebay, and Tribe. It is backed by venture capital firm Founders Fund. This has been added to Genealogy Resources Subject Tracer™ Information Blog.

Open Source Software in Java
http://www.java-source.net/
A nice listing of open source software in Java with various classifications of use. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Asterisk® - Open Source Telephone System
http://www.asterisk.org/
Asterisk® is the most popular and extensible open source telephone system in the world, offering flexibility, functionality and features not available in advanced, high-end (high-cost) proprietary business systems. Asterisk® is a complete IP PBX (private branch exchange) for businesses, and can be downloaded for free. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

SearchMash
http://www.searchmash.com/
SearchMash lets you search the internet in new ways. It is constantly evolving as they come up with ideas and figure out what works and what doesn't. This site by Google brings some interesting ways to obtain search information from the web, from images, and from Blogs and presents the information in a very functional format for research. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Web Design References
http://www.d.umn.edu/itss/support/Training/Online/webdesign/
An excellent resource from Information Technology Systems and Services of the University of Minnesota Duluth including the following sections: Accessibility, Associations, Books, Cascading Style Sheets, Color, Dreamweaver, Evaluation & Testing, Events, Flash, Information Architecture, JavaScript, Misc., Navigation & Labeling, PHP, Sites & Blogs, Standards, Tools, Typography, Usability, and XML. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Loomia - Personalized Recommendations for Media, Content and Retail Sites
http://www.loomia.com/
The number of things available to watch, listen to, purchase, and pay attention to is growing at an ever-expanding rate. Their goal is to provide sites with easy-to-use recommendation services that help people find things that that they like ... affordably, transparently, and without a lot of work. This has been added to World Wide Web Reference Subject Tracer™ Infrmation Blog.

MerchantHound
http://www.merchanthound.com/
Search detailed product information, specs, and reviews from professionals and other shoppers, then compare multiple offers. This has been added to ShoppingBots Subject Tracer™ Information Blog.

MetaDB: A Metadatabase for the Biological Sciences
http://www.neurotransmitter.net/metadb/metadb.php
The MetaDB metadatabase is a sorted, searchable collection of biological databases. Most entries in the metadatabase include a relevant peer-reviewed abstract or excerpt along with a link to the abstract or full text article. Database descriptions surrounded by quotation marks were borrowed from the database websites. Descriptions that include neither quotation marks nor an abstract were written by MetaDB's director, Shawn Thomas. Many of the category names included in MetaDB were borrowed from the NAR Molecular Biology Database Collection, which is maintained by Michael Y. Galperin of the National Center for Biotechnology Information (NCBI). This has been added to Biological Informatics Subject Tracer™ Information Blog.

Neurotransmitter - Biomedical Information in Neuroscience, Pharmacology and Psychology
http://www.neurotransmitter.net/
Neurotransmitter.net exists to improve online access to biomedical information in fields such as neuroscience, pharmacology, and psychology. This page offers more up-to-date and comprehensive descriptions of how opioid drugs affect receptors in the brain than any other resource online or in print. The page also includes links to prescribing information, additional sources of information, and dazzling views of chemical structures. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to Biological Informatics Subject Tracer™ Information Blog.

LeadDiscovery - Dedicated to Drug Discovery
http://www.leaddiscovery.co.uk/
LeadDiscovery was founded in 1998 by life scientists for life scientists. Based on a solid background of experience from within pharmaceutical R&D their aim is to help companies develop their pipelines through the identification of breaking research and the in depth and expert evaluation of selected therapeutic areas. At the same time they provide a showcase for organizations wishing to increase the exposure of their research to the drug development community. They support the drug discovery and development community through two key service: DailyUpdates & PharmaReports. This has been added to Biological Informatics Subject Tracer™ Infomation Blog.

Good-Tutorials
http://www.good-tutorials.com/
A nice tutorial resource offering many different tutorials on a number of different topics and software resources. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

BioRuby
http://bioruby.org/
BioRuby project aims to implement an integrated environment for Bioinformatics with Ruby language. The BioRuby library follows the KISS principle in order to maximize its usability and efficiency for biologists as a daily tool. The project was started in Japan and supported by University of Tokyo (Human Genome Center), Kyoto University (Bioinformatics Center) and the Open Bio Foundation. This has been added to Biological Informatics Subject Tracer™ Information Blog.

KEGG: Kyoto Encyclopedia of Genes and Genomes
http://www.genome.ad.jp/kegg/
A grand challenge in the post-genomic era is a complete computer representation of the cell, the organism, and the biosphere, which will enable computational prediction of higher-level complexity of cellular processes and organism behaviors from genomic and molecular information. Towards this end we have been developing a bioinformatics resource named KEGG as part of the research projects of the Kanehisa Laboratories in the Bioinformatics Center of Kyoto University and the Human Genome Center of the University of Tokyo. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Data Mashups
http://datamashups.com/
Data Mashups is an online service for small enterprises that enables personalized portals and custom, integrated business applications that mashup data, web services, web widgets and other web applications. Enterprises can use the service to rapidly provide mashup applications and a personalized portals to their customers and employees. These applications may be imported, customized, or developed using the online mashup builder (AppliBuilder), and then used on your Mashup portal, or any of your other internal or external web sites. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Openfiler
http://www.openfiler.com/
Openfiler is a powerful, intuitive browser-based network storage software distribution. Openfiler delivers file-based Network Attached Storage and block-based Storage Area Networking in a single framework. Openfiler uses the rPath Linux metadistribution. It is distributed as a stand-alone Linux distribution. The entire software stack interfaces with third-party software that is all open source. File-based networking protocols supported by

Openfiler include: NFS, SMB/CIFS, TTP/WebDAV and FTP. Network directories supported by Openfiler include NIS, LDAP (with support for SMB/CIFS encrypted passwords), Active Directory (in native and mixed modes) and Hesiod. Authentication protocols include Kerberos 5. Openfiler includes support for volume-based partitioning, iSCSI (target and initiator), scheduled snapshots, resource quota, and a single unified interface for share management which makes allocating shares for various network file-system protocols a breeze. This has been added to World Wide Web Resources Subject Tracer&trade' Information Blog.

Techmeme - Tech Web Page A1
http://www.techmeme.com/
At this moment, the next big story in technology may reside on a blog you've never heard of or a news site you don't have time to scan. So Gabe Rivera built a software agent to surface these links in real time and the result is Techmeme, the site you're visiting now. Coverage is driven by a mix of industry insiders, passionate independents, and established journalists. So Techmeme gets the story no matter where it appears, and often days before it hits major sites. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

ERIC - The World's Largest Largest Digital Library of Education Literature
http://www.eric.ed.gov/
Education Resources Information Center (ERIC) provides free access to more than 1.2 million bibliographic records of journal articles and other education-related materials and, if available, includes links to full text. ERIC is sponsored by the U.S. Department of Education, Institute of Education Sciences (IES). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

The Alternative Medicine Homepage
http://www.pitt.edu/~cbw/altm.html
The Alternative Medicine Homepage is a jumpstation for sources of information on unconventional, unorthodox, unproven, or alternative, complementary, innovative, integrative therapies. It is a start point or reference to complementary and alternative medicine (CAM) information. This homepage is created and maintained by a medical librarian, Charles B. Wessel, M.L.S., Health Sciences Library System, University of Pittsburgh. The resources chosen on this homepage are included with the following criteria in mind: a) Is the authorized body for the CAM system, b) Provide quality information in an objective manner, c) Resource for locating quality CAM literature, and d) Site to help individuals make informed decisions when selecting CAM modalities or therapies. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Teacher Resource Exchange (TRE)
http://tre.ngfl.gov.uk/
The Teacher Resource Exchange (TRE) is a moderated database of resources and activities created by teachers. All resources on the TRE are checked by subject specialists to ensure they are of the highest possible quality. Resources are free to use and you can also add your own resources to share with other teachers – to find out more just look at their getting started section. This will be added to Education and Distance Learning Resources Internet MiniGuide. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

WishRadar
http://www.wishradar.com/
WishRadar manages your wishlist for you, even better than Amazon and Half.com do. They monitor all the items on your wishlist, sort and filter them any way you like, and notify you whenever anything on your wishlist matches the price you want to pay at either Amazon or Half.com. You set your price. WishRadar finds your deals. This has been added to ShoppingBots Subject Tracer™ Information Blog.

Ripple Monetary System
http://ripple.sourceforge.net/
Ripple is a monetary system based on trust that already exists between people in real-world social networks. By cutting out the institutional middlemen, Ripple is both more community-oriented and more efficient as a means of exchange. National monetary systems rely on trust in large financial institutions. A bank account balance, stored as electronic bits in a computer, represents a promise by the bank to pay the account holder. That promise is only meaningful if the bank is trustworthy. Banks, in turn, leverage those deposits to issue new money by making loans to trustworthy individuals as determined by an often labour-intensive screening process. Ripple cuts the banks right out of the picture by allowing anyone to act as a bank and grant credit within the Ripple system to anyone they know. The system keeps track of the source of all IOUs, so that debts that are not repaid are automatically borne by the issuer. This has been added to Financial Sources Subject Tracer™ Information Blog.

Collarity - Searching with Social Collaboration
http://www.collarity.com/
Collarity begins a real time, two-way dialog to guide and optimize your search. As you begin typing, we provide relevant keyword suggestions and URLs via the Collarity Compass. The Compass contents instantaneously refresh with every change to the searchbox. To add one of the suggested Compass keywords, just point-and-click -- and it's automatically appended to your query. Simple filtering is also available on the Compass. As you use the Slider, it refreshes real-time among three groups: Global, which includes all Collarity users; Community, which shows "like-minded" community users; and Personal, which is based on your previous search experience (And Personal is available only if you sign up, and are logged in). People learn from other people. Other

social classification systems depend on tagging, rating, and bookmarking. Yet these systems can introduce new biases and inefficiencies of their own. Because there's an active minority defining what's good for the majority, a large number of user segments remain unrepresented. With Collarity, every user is an information consumer and provider. Every user contributes to the benefit of every other user, and the collective intelligence of the whole is harnessed to improve the success of the individual. This happens naturally, and patterns are statistically created based on what's searched. This has been added to Social Informatics Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Best Free Reference Sites 1999-2006
http://snipurl.com/18flt
This is an index of the web sites included in the 1999-2006 annual lists issued by the Mars Best of Free Reference Web Sites Committee of the Machine-Assisted Reference Section (MARS) of the Reference and User Services Association (RUSA) of ALA to recognize outstanding reference sites on the World Wide Web. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

Cytogenetic and Genome Research
http://www.karger.com/CGR
During the last decades, Cytogenetic and Genome Research has been the leading forum for original reports and reviews in human and animal cytogenetics, including molecular, clinical and comparative cytogenetics. In recent years, most of its papers have centered on genome research, including gene cloning and sequencing, gene mapping, gene regulation and expression, cancer genetics, comparative genetics, gene linkage and related areas. The journal also publishes key papers on chromosome aberrations in somatic, meiotic and malignant cells. Its scope has expanded to include studies on invertebrate and plant cytogenetics and genomics. Also featured are the vast majority of the reports of the International Workshops on Human Chromosome Mapping, the reports of international human and animal chromosome nomenclature committees, and proceedings of the American and European cytogenetic conferences and other events. In addition to regular issues, the journal has been publishing since 2002 a series of topical issues on a broad variety of themes from cytogenetic and genome research. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Ersys - Comprehensive Destination Information
http://www.ersys.com/
Ersys is designed to provide the most complete set of information for the: a) Executive, b) Casual traveler, c) Relocation specialist, d) Site analysis technician, e) Site selection professional, f)Commercial space developer, g) Corporate researcher, and h) Real estate broker. Using maps, charts, reports, and relevant links, Ersys covers over 2600 US cities with detailed information on demographics, environmental factors, economic indicators, housing stats, media (newspaper, television, and radio), schools, transportation, local

contacts, and much more! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog., This has been added to Reference Resources Subject Tracer™ Information Blog.

GigaOM.com - Technology News, Analysis and Opinions
http://gigaom.com/

GigaOM.com is an online news and weblog published by GigaOmniMedia, Inc., a San Franciso-based company. They deliver technology news, analysis and opinions on topics ranging from broadband to online games and Web 2.0 to a monthly global audience of 500,000 consumers and professionals interested in the world of hi-tech. Their readers include industry leaders, venture capitalists, investment professionals and entrepreneurs around the world. Their unique combination of in-depth reporting, editorial articles, community opinion polls, and internet market metrics highlight the most interesting startups, products, and people in technology. GigaOM.com is ranked in the top 100 IT news sites by Hitwise, an Internet tracking service. The site is among the top 50 blogs as ranked by Technorati, and part of C/Net 100 Most Influential Blogs. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

CUFTS - Open Source (GPL) OpenURL Link Resolver
http://cufts.lib.sfu.ca/

CUFTS is an open source (GPL) OpenURL link resolver designed for use by library consortia. It supports multiple sites from one server, online management tools, usage statistics, and supports a knowledgebase of over 350 resources with 422,000 title records. Sites can individually activate resources they have access to, as well as subserts of titles for packages to which they only have partial subscriptions. CUFTS2 includes a journal listing system which can incorporate print record data to provide users with an integrated, comprehensive list of journals they have access to. Integrating the link resolver and journals lists means that subscription information only has to be maintained in one place. Also included is basic resource level ERM information for subscription information, license details, etc. These features are currently being tested in our production version and a code release will be available soon. Developed at the Simon Fraser University Library for the Council of Prairie and Pacific University Libraries (COPPUL), the main CUFTS server is currently handling fulltext link resolving for over 30 members and associates. CUFTS is written entirely in Perl, uses PostgreSQL as a database, and Apache for a webserver. Resources are written as simple plugin modules so adding new resources and types of linking is easy. CrossRef support for DOI linking through DOI.org is included, as well as some example resources for linking to web searches and library catalogues (for holdings searches). While the focus is on on-line journals, the system can be expanded to also support ebooks and other document types. This will be added to Academic Resources Internet MiniGuide. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources white paper.

Searchles - Social Search Platform
http://www.searchles.com/
Searchles is a highly scaleable "social search" platform that showcases expertise, enables collaboration with peers and instantly captures it in searchable knowledge indexes. The platform is a hybrid, combining aspects of "social bookmarking" and "social networking" technology with analytical "social search" capability. You decide who influences your discovery efforts, when and how through networks of trust you create - no other bookmarking or social search site lets you do that! Network search allows you to discover content with personalized filtering features that include tags, keywords or a combination of both, as well as the ability to apply these same filters to search all postings, groups, friends, or friends' friends based on your own criteria. By analyzing the associations and patterns between trusted people, sources, tags and content, Searchles is able to deliver more precise, relevant results while suggesting content and people related to your interests. This has been added to Social Informatics Subject Tracer™ Information Blog.

Social Capital Gateway
http://www.socialcapitalgateway.org/
Social capital is generally referred to as the set of trust, institutions, social norms, social networks, and organizations that shape the interactions of actors within a society and are an asset for the individual and collective production of well-being. At the macro level, social capital can affect the economic performance and the processes of economic growth and development. These webpages contain useful resources for researchers, teachers, students, and practitioners interested in social interactions and social capital, in their role in the well-being of communities, and in their relationship with human, social and economic development. This has been added to Social Informatics Subject Tracer™ Information Blog.

Quintura - The Way People Search
http://www.quintura.com/
Visualization becomes the center of user experience replacing antiquated listings and Boolean strings. While viewing the Quintura Cloud, you can visually navigate and easily refine in order to find relevant information faster and more efficiently! This has been added to the tols section of Research Resources Subject Tracer™ Information Blog.

Radiant - Open ource Content Management System
http://www.radiantcms.com/
Radiant is a no-fluff, open source content management system designed for small teams. Radiant features include: a) An elegant user interface; b) Flexible templating with layouts, snippets, page parts, and a custom tagging language; c) Special page-oriented plugins called behaviors; and d) A simple user management/rights system. This has been added to the tols section of Research Rsources Subject Tracer™ Information Blog.

SynergyMX.com - Freeware and Open Source Software
http://www.synergymx.com/
SynergyMX.com is an online blog devoted to technology and its use. SynergyMX.com is focused on adoption of Freeware or Open Source Software AKA FOSS - (check out the list of applications), helping people get started on the internet, reviewing hardware and software, simplifying computer security – you can even test your Microsoft Windows security knowledge! They also develop a few web applications (such as SynergyBugs or SynergyMovies) plus do some general web consulting. Feel free to poke around their website using the icons at the top of the page to navigate, or if you are a little more ambitious, you can search with the search box at the very top. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Medem - Connecting Physicians and Patients
http://www.medem.com/
Based in San Francisco and incorporated in 1999, Medem was founded by the AMA and several national medical specialty societies to develop and provide secure, online communications services for use by physicians and other healthcare providers, including hospitals, health systems, etc., with their patients. Together with a broad constituent of industry partners, medical societies, patient advocacy groups and government agencies, Medem is uniquely positioned to transform the healthcare delivery experience for physicians and their patients. Tens of thousands of physician practices, along with numerous health systems, hospitals, payers and employers, have implemented iHealth Services to improve consumer engagement, advance disease management, increase efficiency and decrease costs. iHealth Services provides the connectivity between community and regional stakeholders in healthcare which will fulfill the vision of interoperable health records for all Americans by 2014. This has been added tp the source code of eHealthcareBot Search Engine.

Biology News Net

Centre for Urban and Regional Ecology (CURE)
http://www.sed.manchester.ac.uk/research/cure/
The Centre for Urban and Regional Ecology (CURE) was established within the Department of Planning and Landscape, University of Manchester, in 1999. Research at the Centre focuses on the organisation and activity of complex communities, both natural and human. The multidisciplinary team is committed to providing and promoting high quality research in relation to the new academic agendas of regionalism, sustainability and the re-building of environmental capital. This has been added to Research Resourtces Subject Tracer™ Information Blog.

Beryl Project
http://www.beryl-project.org/
Beryl is an OpenGL accelerated desktop that seeks to provide a free, open source desktop experience to the community that reflects the wishes of the users. Above all else, the project seeks to listen to and respond to the requests of the user base. Beryl is a combined window manager and composite manager written in C using OpenGL to provide acceleration. It is designed to be highly flexible, extensible, and portable, all the while keeping in mind that the users know how they want their desktops to act better than we do. With Beryl the rather esoteric concept of the computer desktop is brought down to a more human level, allowing for a more native and intuitive understanding of your workspace. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

SplashCast - Channel Yourself Across the Internet
http://www.splashcastmedia.com/
SplashCast enables anyone to create streaming media 'channels' that combine video, music, photos, narration, text and RSS feeds. These user-generated channels can be played and easily syndicated on any web site, blog, or social network page. When channel owners modify their channel, their content is automatically updated across all the web pages 'tuned' to that channel. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

fring - Mobile-VoIP Application for Cellular Handsets
http://www.fring.com/
fring™ uses your mobile internet connection to make peer-to-peer VoIP calls, send instant messages and talk with VoIP applications such as Skype and Google Talk, at no extra cost. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

PDF-Mags - Your One Stop Source for Free PDF Magazines from Throughout the World
http://www.pdf-mags.com/
pdf-mags.com is your infobase for PDF magazines made all over the world. It is constantly adding new and freely available PFD magazines. This has been added to Research Resources Subject Tracer™ Information Blog.

JASYPT - JAva Simplified EncrYPTion
http://www.jasypt.org/
Jasypt is a java library which allows the developer to add basic encryption capabilities to his/her projects with minimum effort, and without the need of having deep knowledge on how cryptography works. This has been added to Privacy Resources Subject Tracer™ Information Blog.

LMMS - Easy Music-Production for Everyone
http://lmms.sourceforge.net/
LMMS aims to be a free alternative to popular (but commercial and closed- source) programs like FruityLoops, Cubase and Logic giving you the ability of producing music with your computer by creating cool loops, synthesizing and mixing sounds, arranging samples, having more fun with your MIDI-keyboard and much more... LMMS combines the features of a tracker-/sequencer-program (pattern-/channel-/ sample-/song-/effect-management) and those of powerful synthesizers and samplers in a modern, user-friendly and easy to use graphical user-interface. Using LMMS you can produce electronic music with your computer, so you don't have to buy expensive hardware for having great sounds and making cool music. Of course no software can replace real hardware-synths, but you'll have still much fun with LMMS and especially users being new to music-production at all will learn things in a really easy way! LMMS provides software-synths and other plugins, cool presets for them and also some essential samples. For getting started with LMMS you can take a look at the demo-projects. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

eMarketing Bot - Your Search Engine for Marketing Resources
http://www.eMarketingBot.com/
Searches selected marketing resources and sources taken from various Subject Tracer Information Blogs and resources from the Virtual Private Library. Currently over 30 marketing meta search engines and resources are accessed. It is designed to bring together the latest metasearch engines for marketing on an ongoing basis from the Internet.

Keyword Discovery
http://www.keyworddiscovery.com/
Keyword Discovery collects keyword data from many different search engines world wide and compiles a range of search related statistics. Simply type a seed keyword in the field and have KeywordDiscovery generate the top 100 keywords for you. Over 80% of all online transactions begin with a keyword search. To compete, you need to target all the relevant keywords. KeywordDiscovery can tell you the search phrases people use to find products and services, as well as the search terms that drive traffic to your competitors. You can take advantage of this information to: a) Optimize the content of your web pages and your meta tags, b) Maximize your pay per click campaigns, and c) Take traffic away from your competitors. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Media Convert - Free and Online - Convert and Split Sound, Ringtones, Images, Docs - MP3 WMV 3GP and more ...
http://media-convert.com/
Media-Convert is 100% free. No software is needed, and you don't have to register. You only need your favorite Internet browser. Your files are ready 7/7 days 24/24 hours. 100% free, online file conversion with no installation, no virus and spywares. You may

convert a file located on your computer, a file located on a webserver, and you are able to make a screenshot of any website (convert it into an image). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

MUTE: Simple Anonymous File Sharing
http://mute-net.sourceforge.net/
MUTE File Sharing is a peer-to-peer network that provides easy search-and-download functionality while also protecting your privacy. MUTE protects your privacy by avoiding direct connections with your sharing partners in the network. Most other file sharing programs use direct connections to download or upload, making your identity available. MUTE File Sharing compiles as a fast, native application for many platforms (no Java, no Python, etc.). This has been added to Privacy Resources Subject Tracer™ Information Blog.

Diarised - Online Tool for Meeting Scheduling
http://www.diarised.com/
Diarised is free and you can schedule as many meetings as you like, and suggest unlimited dates for your meetings. The clutter-free interfaces make organising meetings with Diarised straightforward. Diarised will figure out who can attend and on which dates and notify you with a list of the best times and dates, leaving you more time to get stuff done! There's no signup required, you can start using Diarised immediately. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Web 2.0 Search Engine Of Links, Online Applications & Web 2.0 Sites
http://www.web20searchengine.com/
Simply search for a keyword of what your wish to make or work with to see the tools & related Web 2.0 links available (example search links: mashups, blogging, viral videos, clipart, designing, social tagging, AJAX apps, file storage/sharing, RSS feeds, anti-spam tools, CSS layout generators, image editors, DHTML codes, webmaster tools, calendars, data organizing, calculators, file conversions, Atom, sync, blog (URL) submits, web APIs, tutorials, etc). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Knowledge Discovery Resources 2007 - An Internet MiniGuide Annotated Link Compilation
http://www.llrx.com/features/knowledgediscovery.htm
Marcus P. Zillman's extensive guide to knowledge discovery technologies, programs, resources and sites includes links to groups, organizations and applications specific to know-how discovery, harvesting and management, data and text mining, as well as vendors/suppliers of related services.

Open Courseware Consortium
http://www.ocwconsortium.org/
An OpenCourseWare is a free and open digital publication of high quality educational materials, organized as courses. The OpenCourseWare Consortium is a collaboration of more than 100 higher education institutions and associated organizations from around the world creating a broad and deep body of open educational content using a shared model. The mission of the OpenCourseWare Consortium is to advance education and empower people worldwide through opencourseware. This will be added to Academic Resources Internet MiniGuide. This has been added to Research Resources Subject Tracer™' Information Blog.

PortfolioBase
http://www.portfoliobase.com/
Showcasing the best Portfolios from all around the world. From A to Z. From photography to illustration. From space to the wild wild west. From purple and orange to black and white. And even turqoise. From 1999 to 2006. From Alaska to New Zealand. It's all about portfolios. This has been added to Research Resources Subject Tracer™ Information Blog.

Add This! Social Bookmark and Feed Button
http://www.addthis.com/
The AddThis Buttons simplifie the process of collecting and distributing content online. The Add This patent-pending Generic Content Collection System technology provides a unified method for interfacing with content collection services and aggregators. The Add This Button can be used in two ways: on websites and blogs or in the browser. Benefits of AddThis Button include: a) Easy Bookmarking - Makes it very easy for your visitors to bookmark your website or blog, and subscribe to your feeds (support most bookmarking and feed reader services); b) Social Traffic - Helps your visitors promote your website or blog to the social bookmarking services, which will bring back more traffic to your website or blog; c) Less Clutter - Saves real-estate and reduces confusion on your website. You just put one button; they worry about all the other buttons for you; d) Statistics - Provides valuable statistics showing what content your visitors bookmark the most on your website or blog, over various time periods; and e) Free - All this is completely free, and will remain free. This has been added to Bots Blogs and News Aggregators presentation resources page. This has been added to Social Informatics Subject Tracer™ Information Blog.

Shopify - A Shop In Minutes
http://shopify.com/
Shopify lets you build shops with as much style and flair as you see fit. When you signup for Shopify, you can choose from one of their growing number of custom-made designs or get really creative and create your own designs. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Smith Project - The Free Cold Fusion Engine
http://www.smithproject.org/
Smith is a freeware, cross-platform ColdFusion engine, written entirely in Java. Running on the top of Java Runtime Environment and Java Servlet Container, it can be virtually deployed on any operating system and work with any web server. Smith represents lightweight, yet reliable alternative to the existing ColdFusion servers. It supports most important CF features (see Features) and already drives several large ColdFusion applications. Deeply integrated in J2EE, Smith works as part of ordinary Java Web application and can easily be used together with servlets and JSPs. The server behaviour is easily configurable through the simple Web interface where database connections, debugging options, server mappings and more can be set. Smith is freeware software, which means that it comes with permission for anyone to use, copy, and distribute it. It is also being seriously considered to open-source it. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

poserFish.com: Bet On Anything - Peer To Peer Betting
http://www.poserfish.com/
poserFish.com is the world's first true peer-to-peer betting network. There is no "house". The members decide the bet's odds and terms and bet directly against each other. The best way to learn how to use poserFish.com is the Getting Started section. After understanding The Rules and the Key Terms, register and join the fun. jQuery: The Write Less, Do More JavaScript Library
http://jquery.com/
jQuery is a new type of JavaScript library. jQuery is a fast, concise, JavaScript Library that simplifies how you traverse HTML documents, handle events, perform animations, and add Ajax interactions to your web pages. jQuery is designed to change the way that you write JavaScript. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Tragedy of the FOSS commons? Investigating the Institutional Designs of Free/libre and Open Source Software Projects by Charles M. Schweik and Robert English
http://www.firstmonday.org/issues/issue12_2/schweik/index.html

Abstract:
Free/Libre and Open Source Software projects (FOSS) are a form of Internet-based commons. Since 1968, when Garrett Hardin published his famous article "Tragedy of the Commons" in the journal *Science*, there has been significant interest in understanding how to manage commons appropriately, particularly in environmental fields. An important distinction between natural resource commons and FOSS commons is that the "tragedy" to be avoided in natural resources is over-harvesting and the potential destruction of the resource. In FOSS commons the "tragedy" to be avoided is project abandonment and a "dead" project. Institutions – defined as informal norms, more formalized rules, and governance structures – are mechanisms that have been shown to help overcome tragedies in some environmental commons situations. The goal of this paper is to more formally describe the concept of FOSS institutions and to conduct a preliminary examination of FOSS projects in order to shed light into institutions, their composition and importance to the projects. We report findings from an initial set of interviews of FOSS developers and find that in commons settings that need to encourage contribution rather than control over-appropriation, the institutional designs appear to be extremely lean and as unobtrusive as possible. To the FOSS programmers we interviewed, institutional structure adds transaction costs and hinders collective action. This is markedly different from traditional environmental commons settings.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest sources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
