Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

V5N5 **May 2007**

Welcome to the V5N5 May 2007 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Employment Resources** on the Internet. These resources are constantly updated on the Employment Resources Subject Tracer™ Information Blog available at the following URL:

http://www.EmploymentResources.info/

These employment resources continue to expand at a very rapid rate especially with the needs of corporate employment throughout the world. These resources will allow you to keep up to date and to monitor the latest happenings in all fields associated with employment and the opportunities associated with new employment or finding that perfect employee!!

Awareness Watch™ Spotters

DeepaMehta - Software Platform for Knowledge Management
http://www.deepamehta.de/
DeepaMehta is a software platform for Knowledge Management. Knowledge is represented in a semantic network and is handled collaboratively. DeepaMehta combines interdisciplinary research with the idea of Open Source to generate a true benefit for workflow as well as for social processes. At the same time Deepa Mehta is an indian movie director. The DeepaMehta user interface is build according to research in

Cognitive Psychology and accomodates the knowledge building process of the individual. Instead of handling information through applications, windows and files with DeepaMehta the user handles all kind of information directly and individually. DeepaMehtas user interface is completely based on Mind Maps / Concept Maps. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Knowledge Discovery Subject Tracer™ Information Blog.

VYM (View Your Mind)
http://www.insilmaril.de/vym/
VYM (View Your Mind) is a tool to generate and manipulate maps which show your thoughts. Such maps can help you to improve your creativity and effectivity. You can use them for time management, to organize tasks, to get an overview over complex contexts, to sort your ideas etc. Maps can be drawn by hand on paper or a flip chart and help to structure your thoughs. While a tree like structure like shown on this page can be drawn by hand or any drawing software vym offers much more features to work with such maps. vym is not another drawing software, but a tool to store and modify information in an intuitive way. For example you can reorder parts of the map by pressing a key or add various information like a complete email by a simple mouse click. This has been added the tools section of Research Resources Subject Tracertrade; Information Blog.

CEO Refresher
http://www.refresher.com/ceob4.html
The CEO Refresher is brain food for business! Leadership - strategy - leading change - performance - insight - words and wisdom - mindfulness - interestingness - learning - and learning faster! This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Bplans.com
http://www.Bplans.com/
Bplans.com contains the largest single collection of free sample business plans online. In addition to that, it has helpful tools and know-how for managing your business. Bplans.com includes practical advice on planning, interactive tools, and a panel of experts who have answered more than 1,400 questions from people like you. Bplans.com has also won several awards as a valuable "plain talk" resource. Bplans.com is owned and operated by Palo Alto Software, Inc. as a free resource to help entrepreneurs plan better businesses. They also produce the fee based Business Plan PRO. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

CodePlex - Microsoft's Open Source Project Hosting Web Site
http://www.codeplex.com/
CodePlex is Microsoft's open source project hosting web site. You can use CodePlex to create new projects to share with the world, join others who have already started their own projects, or use the applications on this site and provide feedback. This has been added to Script Resources Subject Tracer™ Information Blog.

WorkHack - Priority Visualization By Color and Size
http://workhack.com/index.php
Ever wonder why a simple tasks list on a piece of paper or a whiteboard works better than any tasks management tool. Is it the hassle of getting the tasks into the tool, or the lack of priority visualization? Whatever the reason is, WorkHack.com attempts to solve the problem by offering a simple yet powerful tool that is easy to use and offers priority visualization by color and size. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Federal Laboratory Consortium for Technology Transfer
http://www.federallabs.org/
Network of federal laboratories formed to facilitate the Federal Technology Transfer Act of 1986. Site offers a directory of laboratories, including contact information and research areas. Also offers news, event listings, and publications. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

JMIR : Journal of Medical Internet Research
http://www.jmir.org/
Open Access peer-reviewed journal in the field of eHealth; medical informatics, Internet applications for practitioners and patients, web-based medical education, research methodology, electronic scholarly medical publishing, and other topics related to health and health care in the Internet age. This has been added to Biological Informatics Subject Tracer™ Information Blog. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Portable Freeware Collection
http://www.PortableFreeware.com/
This site is dedicated to the collection and cataloging of Windows freeware that can be extracted to any directory and run independently without prior installation. These can be carried around on a memory stick / USB flash drive, or copied/migrated from PC to PC via simple copying of files. Hence the term portable freeware. Some freeware already come in the form of a ZIP file, ready to be extracted and run from any directory. Others require an extraction procedure, which could be as simple as installing them, extracting the necessary files, and uninstalling them again. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Connexions - Sharing Knowledge and Building Communities
http://cnx.org/
Connexions is an environment for collaboratively developing, freely sharing, and rapidly publishing scholarly content on the Web. Their Content Commons contains educational materials for everyone — from children to college students to professionals — organized in small modules that are easily connected into larger courses. All content is free to use and reuse under the Creative Commons "attribution" license. Connexions is a place to

view and share educational material made of small knowledge chunks called modules that can be organized as courses, books, reports, etc. Anyone may view or contribute including: a) authors create and collaborate, b) instructors rapidly build and share custom collections, and c) learners find and explore content. Thia has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Digital Library of Information Science and Technology (DLIST)
http://dlist.sir.arizona.edu/
Established in 2002, DLIST, Digital Library of Information Science and Technology is a cross-institutional, subject-based, open access digital archive for the Information Sciences, including Archives and Records Management, Library and Information Science, Information Systems, Museum Informatics, and other critical information infrastructures. The dLIST vision is to serve as a dynamic archive in the Information Sciences, broadly understood, and positively impact and shape scholarly communication in our closely related fields. This has been added to Research Resources Subject Tracer™ Information Blog.

EducaNext - The Portal for Learning Resources
http://www.educanext.org/
EducaNext is a service supporting the creation and sharing of knowledge for Higher Education. It is open to any member of the academic or research community. EducaNext fosters collaboration among educators and researchers, allowing you a) To participate in Knowledge Communities, b) To communicate with experts in your field, c) To exchange Learning Resources, d) To work together on the production of Educational Material: Textbooks, lecture notes, case studies, simulations, etc., e) To deliver distributed Educational Activities: lectures, courses, workshops, case study discussions, etc., and f) To distribute electronic content. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

coRank - Sharing Your Interesting Resources and Findings
http://www.corank.com/
coRank is a site where you can share whatever you find interesting on the web with people who value your opinion, and where you can also find what's interesting for people whose opinion are important to you - your sources - whether they know who you are or not. In coRank, your Front Page is yours only, and likely different than any other, as it is based on how the-people-you-select react to upcoming stories and submitted websites. This has been added to Social Informatics Subject Tracer™ Information Blog.

Netscape - Social News Portal
http://www.Netscape.com/
The new Netscape.com is a social news portal programmed by you—the audience! All of the stories on Netscape are submitted and voted on by their members. They have a team of full-time "Netscape Anchors" in their newsroom that monitor the site 24 hours a day, 365 days a year. These anchors do a number of things to keep the Netscape experience

clean and compelling. First, they remove spam (we all hate spam). Secondly, they select the stories in "Netscape Anchors recommend..." box at the top of the page. Finally, they do followup journalism on many of the stories you vote to the Home Page and create original video on topics they feel you would enjoy. You can see their comments in the yellow "Netscape Anchor Commentary" box. Stories with Anchor commentary are noted with an "Anchor" on the top level of the site. In addition to the Anchors, they also have a team of part-time Navigators, who submit stories of interest to Netscape, help in the endeavor to remove all spam from Netscape, redirect stories breaking the middle-man rule (see below) to their original source, and generally serve as leaders in the social news space. They also have the Netscape Development team working full time to improve the site by adding new features and fine-tuning existing features. This has been added to Social Informatics Subject Tracer™ Information Blog.

Scholarly Exchange - Making Open Access Publishing Affordable and Sustainable
http://www.scholarlyexchange.org/
Scholarly Exchange emerged in 2002 to promote innovative, cost-efficient electronic-first approaches to scholarly publishing. Its founders were the first to: a) produce a comprehensive manuscript tracking system, and b) introduce a complete editorial-and-publishing e-platform. Scholarly Exchange is the first to: a) offer a Software-as-a-Service e-publishing model, and b) experiment with alternative revenue models for open access journals. Scholarly Exchange is a facilitator, not a publisher and their role is to assist scholarly journals while promoting free and open access to scholarly knowledge. They are developing new ways to sustain e-journals, and welcome your collaboration. This has been added to Academic Resources MiniGuide. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

InfoAviator - Your Comprehensive Directory for Searching Free Court Records
http://www.infoaviator.com/
InfoAviator.com is a comprehensive easy-to-use tool for searching the U.S.Government databases of on-line public records at a Federal, State, County, and Local level. Their comprehensive directory and search tool was created and developed in the way the internet was intended to be, and that is absolutely 100% free to users with no hidden sign-up registration or trial periods. Currently it has access only for Ohio records but plans to expand for the entire USA by July 2007. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This has been added to Finding People Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

TinyMap - Easily Create and Share Maps To Anywhere
http://www.tinymap.net/
tinymap.net allows you to create a map and save it for viewing by yourself or others later on. You can trace out a path with way-points or mark out a point of interest with a graphic icon, and add notes for any of the points. Once you are done, you save the map

just as you would like to see it when you return. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Journal of Institutional Research (South-East Asia) (JIRSEA)
http://www.seaair.info/page.asp?page=405
The major purposes of the South East Asian Association for Institutional Research are to benefit, assist and advance research leading to improved understanding, planning and operations of institutions of post-secondary education in the region. Research focused on a single institution and also research that is concerned with groups of Institutions both fall within these purposes. In keeping with the dynamic nature of institutions of post-secondary education and the rapidly changing global environment in which they operate, the Association will encourage the application of appropriate methodologies and techniques from many disciplines. It will encourage comparative research into national higher education systems in South East Asia. It will publish and exchange information with respect to institutions of post-secondary education with a view to illuminating current and developing issues of common concern and raising the standard of post-secondary educational management, planning and policy development at all levels. The Journal of Institutional Research (South-East Asia) publishes studies supporting the Association's aims.

Blastfeed - Select RSS, Sift RSS and Read RSS
http://www.BlastFeed.com/
Blastfeed is an on-line service that lets you aggregate, remix and filter RSS feeds. And Blastfeed can immediately notify you of any results of such filtering. Blastfeed will only collect items that match your criteria in each feed. The results will be amalgamated into a single file and sent to you by email, Instant Messaging or as a new RSS feed, when and where you want it. This has been added to Bots, Blogs and News Aggregators Presentation sources page. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

KeepCash - Coupons, Deals, Coupon Codes, and Shopping Deals
http://www.KeepCash.com/
They are dedicated to keeping cash in your pocket by showing you the best deals and money saving coupon codes on the web. With their weekly newsletter, you can get the best deals and online coupons delivered directly to your inbox. Bookmark them, subscribe to their RSS feeds, and always remember to check KeepCash before shopping online! This has been addded to ShoppingBots Subject Tracer™ Information Blog.

Easy Time Tracking Tool - Software That Makes Customer Billing and Time Management Easy
http://www.easytimetracking.net/
Easy Time Tracking is a powerful, yet extremely easy-to-use time management and customer billing application. It allows you to: a) track billable and non-billable hours, b) create invoices and reports, and c) manage your customers, projects and tasks. Easy Time

Tracking is an ideal solution for the individual contractors who need to know how much time they spent on certain tasks and how many hours they need to bill their clients for. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

International Journal of Internet Research Ethics (IJIRE)
http://www.uwm.edu/Dept/SOIS/cipr/ijire.html
The IJIRE is the first peer-reviewed online journal, dedicated specifically to cross-disciplinary, cross-cultural research on Internet Research Ethics. All disciplinary perspectives, from those in the arts and humanities, to the social, behavioral, and biomedical sciences, are reflected in the journal. With the emergence of Internet use as a research locale and tool throughout the 1990s, researchers from disparate disciplines, ranging from the social sciences to humanities to the sciences, have found a new fertile ground for research opportunities that differ greatly from their traditional biomedical counterparts. As such, "populations," locales, and spaces that had no corresponding physical environment became a focal point, or site of research activity. Human subjects protections questions then began to arise, across disciplines and over time: What about privacy? How is informed consent obtained? What about research on minors? What are "harms" in an online environment? Is this really human subjects work? More broadly, are the ethical obligations of researchers conducting research online somehow different from other forms of research ethics practices? As Internet Research Ethics has developed as its own field and discipline, additional questions have emerged: How do diverse methodological approaches result in distinctive ethical conflicts and, possibly, distinctive ethical resolutions? How do diverse cultural and legal traditions shape what are perceived as ethical conflicts and permissible resolutions? How do researchers collaborating across diverse ethical and legal domains recognize and resolve ethical issues in ways that recognize and incorporate often markedly different ethical understandings? Finally, as "the Internet" continues to transform and diffuse, new research ethics questions arise e.g., in the areas of blogging, social network spaces, etc. Such questions are at the heart of IRE scholarship, and such general areas as anonymity, privacy, ownership, authorial ethics, legal issues, research ethics principles (justice, beneficence, respect for persons), and consent are appropriate areas for consideration. The IJIRE will publish articles of both theoretical and practical nature to scholars from all disciplines who are pursuing‹or reviewing‹IRE work. Case studies of online research, theoretical analyses, and practitioner-oriented scholarship that promote understanding of IRE at ethics and institutional review boards, for instance, are encouraged. Methodological differences are embraced. The IJIRE is published twice annually, March 1, and October 15. Thjis has been added to Research Resources Subject Tracer™ Information Blog.

ViTrue - Web 2.0 Brand Marketing
http://www.vitrue.com/
ViTrue is a safe place for Brands. As the world's first user-created advertising platform, we allow companies to put consumer enthusiasm to work. At ViTrue, we give consumers the tools to create authentic, engaging advertising experiences that never compromise the

integrity of your brand. In short, ViTrue enables unprecedented results at a fraction of the usual cost of production. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

The Anonymous Email Website
http://www.TheAnonymousEmail.com/
TheAnonymousEmail.com was created as a new vehicle of self expression. In the spirit of the First Amendment, it aspires to extend the freedom of speech without forcing anyone to isolate and identify themselves. The creators of TheAnonymousEmail.com believe that there are some things which must be expressed, even when the speaker must remain anonymous. In the normal course of daily lives, we all have hundreds of thoughts, wishes, and frustrations that we cannot voice without concern for some personal repercussion. Many of those sentiments are useless and quickly forgotten. But some are truly important to us and linger . . . waiting for a chance at expression. TheAnonymousEmail.com is your place to express them. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Zocalo - Toolkit for Building Prediction Markets
http://zocalo.sourceforge.net/
Zocalo is a toolkit for building prediction markets, markets in securities that pay out depending on outcomes of future events. They provide estimates of the likelihood of specific outcomes that are more reliable than other sources of predictions. The Zocalo Project Lead is Chris Hibbert with thanks to CommerceNet for their support of Zocalo. This has been added to Prediction Markets Subject Tracer™ Information Blog.

Educate~
http://www.educatejournal.org/
Educate~ is The Journal of Doctoral Research in Education. Educate~, published twice a year in June and December under the auspices of the Doctoral School at the Institute of Education, University of London, aims to provide: a) opportunities for the dissemination of the work of current post-graduate researchers at any stage of their research, and recent doctoral graduates, on any aspect of education or related areas, and b) opportunities for the dissemination of "work in progress" to the academic community a resource for professionals involved in educational enquiry and research. Educate~ articles are peer reviewed by both an established academic and a current post-graduate researcher. Articles are further reviewed by the editorial board as a whole.

BibblyWiki
http://www.giffmex.org/bibblywiki.html
BibblyWiki was designed for three specific but overlapping needs that students have: 1) To create bibliographies, 2) To organize their personal libraries of books and articles, and 3) To take notes on books and articles. With BibblyWiki, you add your book data, and BibblyWiki automatically adds your book to a pre-formatted bibliography and several indexes. It doesn't get much easier than that - and best of all, it's free! This has been

added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Student Research Subject Tracer™ Information Blog.

WebWare - Cool Web Applications
http://webware.com/
There's a shift underway in how people use computers and the Internet. Every day more utility is being delivered over the Web. Full applications can now be run in a browser, accessible from any computer. Software? It's no longer required. Software is becoming Webware. There are different types of Webware: a) Productivity applications. Microsoft may own the desktop, but not the Web. Online, Google has solid productivity apps. And there are dozens of upstarts in this market too.; b) Data-driven applications. Many new online services rely on real-time data that simply could not be encapsulated into software. Examples include Google Maps, Zillow and Farecast; and c) Community services. Webware enables people to network, share their lives, and work together. Examples are MySpace, LinkedIn, YouTube, and SmartSheet. Webware.com is the site where computer users can learn about new and useful Web applications. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

activeCollab - Open Source Collaboration and Project Management Tool
http://www.activecollab.com/
activeCollab is an easy to use, web based, open source collaboration and project management tool. Set up an environment where you, your team and your clients can collaborate on active projects using a set of simple, functional tools. 100% free! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Central European Journal of Biology (CEJB)
http://springerlink.com/content/1644-3635/
Central European Journal of Biology (CEJB) is an international journal that publishes research results in all biology fields. The aim of this journal is to become the premier source of high quality research from Central and Eastern Europe. Also, we assist researchers from Central and Eastern Europe and from other regions where English is not the mother tongue, e.g. native English speaking researchers polish up the language of articles submitted to CEJB. Nevertheless, contributions from other parts of the world are by no means excluded. All authors receive very fast and comprehensive peer-review. Additionally, every published article is promoted to researchers working in the same field. The CEJB is peer-reviewed and is published quarterly in paper and electronic version. The language of the CEJB is English. CEJB will feature research articles, rapid communications, reviews, minireviews, report and guest commentaries, letters to the editor and book reviews.

ChemRefer - Search Engine for Chemical and Pharmaceutical Literature
http://www.chemrefer.com/
Search engine for fulltext open access chemical and pharmaceutical literature. Features basic and advanced search options, an integrated chemical structure drawing and search tool, downloadable toolbar, customized RSS feeds, and newsletter. Search results link directly to fulltext. This will be added to Academic and Scholar Search Engines and Sources white paper. This has been added to the source code of eHealthcareBot Search Engine. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Golexa Search Tool - Complete Page Analysis
http://www.golexa.com/
http://www.golexa.net/
Golexa is a search tool that offers complete page analysis for each result. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Business Intelligence Resources Subject Tracer™ Information Blog.

Five Weeks to a Social Library
http://www.sociallibraries.com/course/
Five Weeks to a Social Library is the first free, grassroots, completely online course devoted to teaching librarians about social software and how to use it in their libraries. It was developed to provide a free, comprehensive, and social online learning opportunity for librarians who do not otherwise have access to conferences or continuing education and who would benefit greatly from learning about social software. The course will be taught using a variety of social software tools so that the participants acquire experience using the tools while they are taking part in the class. It will make use of synchronous online communication, with one or two weekly Webcasts and many small group IM chat sessions made available to participants each week. By the end of the course, each student will develop a proposal for implementing a specific social software tool in their library. Five Weeks to a Social Library will take place between February 12 and March 17, 2007 and is limited to 40 participants (these participants have already been chosen). However, course content will be freely viewable by interested parties and all live Webcasts will be archived for later viewing. The course will cover the following topics:

Blogs
RSS
Wikis
Social Networking Software and SecondLife
Flickr
Social Bookmarking Software
Selling Social Software @ Your Library

This has been added to Social Informatics Subject Tracer™ Information Blog.

Eigenfactor.org - Ranking and Mapping Scientific Knowledge
http://www.eigenfactor.org/
Eigenfactor ranks journals much as Google ranks websites. Scholarly references join journals together in a vast network of citations. Eigenfactor uses the structure of the entire network (instead of purely local citation information) to evaluate the importance of each journal. Eigenfactor contains 115,000 reference items. Eigenfactor not only ranks scholarly journals in the natural and social sciences, but also lists newsprint, PhD theses, popular magazines and more. In so doing, it more fairly values those journals bridging the gap between the social and natural sciences. Eigenfactor contains 115,000 reference items. Eigenfactor not only ranks scholarly journals in the natural and social sciences, but also lists newsprint, PhD theses, popular magazines and more. In so doing, it more fairly values those journals bridging the gap between the social and natural sciences. Eigenfactor corrects for differences in citation patterns across disciplines. Different disciplines have different standards for citation and different time scales on which citations occur. The average article in a leading cell biology journal might receive 10-30 citations within two years; the average article in leading mathematics journal would do very well to receive 2 citations over the same period. By using the whole citation network, Eigenfactor automatically accounts for these differences and allows better comparison across research areas. Eigenfactor uses 5-year citation data. In many research areas, articles are not frequently cited until several years after publication. Therefore, measures that only look at citations in the first two years after publication can be be misleading. Eigenfactor is calculated based on the citations received over a five year period. Eigenfactor provides information about journal prices. In collaboration with journalprices.com, Eigenfactor provides information about price and value for thousands of scholarly periodicals. Eigenfactor is completely free and completely searchable. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Knowledge Discovery Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources white paper.

Pipl - Deep Web People Finder
http://www.pipl.com/
Pipl's query-engine helps you find deep web pages on people that cannot be found on regular search engines. Unlike a typical search-engine, Pipl is designed to retrieve information in real-time from the deep web, their robots are set to interact with searchable databases and extract facts, contact details and other relevant information from personal profiles, member directories, scientific publications, court records and numerous other deep-web sources. Pipl is not just about finding more results; theye are using advanced language-analysis and ranking algorithms to bring you the most relevant bits of information about a person in a single, easy-to-read results page. Hobo - Open Source Extension to Ruby on Rails
http://www.hobocentral.net/
Hobo is an Open Source extension to Ruby on Rails which helps you build full blown web applications incredibly quickly and easily. Available as a Gem or Rails plugin, Hobo provides a simple, clean and elegant development framework which allows for rapid prototyping or production of the most sophisticated web applications. Main Features include: a) Rapid implementation of dynamic Ajax interfaces in your application with no extra programming, b) Switchable themes. Customise and tweak your application structure and layout to meet any design goals, and c) Powerful mark-up language, DRYML, combines rapid development with ultimate design flexibility. The end of the cookie cutter blues! This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Journal of Nonprofit & Public Sector Marketing
http://www.haworthpress.com/store/product.asp?sku=J054
The Journal of Nonprofit & Public Sector Marketing is devoted to the study of the adaptation of traditional marketing principles for use by nonprofit organizations. Marketers who have struggled to adapt inappropriate marketing strategies from the profit-motivated sector will benefit from this resource targeted specifically for their nonprofit or public sector organization. The Journal of Nonprofit & Public Sector Marketing provides a vehicle for the development of marketing thought and dissemination of marketing knowledge in the nonprofit and public sectors of the economy. These sectors have recently been estimated at 25% of the wages in the U.S. economy, yet only a very small amount of the marketing literature is devoted to them. The nonprofit and public sectors share many common denominators which separate them from the for-profit sector, including budgeting considerations, the measurement of disparate goals among various publics, and a general lack of knowledge of marketing concepts. Traditional marketers often miss these important nuances in attempting to adapt marketing strategies and concepts to these new domains. The Journal of Nonprofit & Public Sector Marketing is devoted to the study of the adaptation of marketing for use by these organizations. The journal presents peer-reviewed primary research and abstracts and indexes of current research published elsewhere. Special issues are being developed in the areas of marketing for governmental services, causes and movements, leisure services, and mental health.

WipBox - Create Improved eBay Listings
http://www.wipbox.com/
WipBox enables sellers to create better, richer listings through deeper knowledge gathering and better preparation. Users can learn which categories and for how much they should list items based on each product's basic info. WipBox shows high, low and average prices for items as well as concentration of like items in categories on eBay. When you've figured out the where and the how much, WipBox helps you create better descriptions by finding your item's manufacturer info and user reviews so buyers can feel more certain about their purchase. You can edit the listing with the integrated

WYSIWYG editor. There's even a great pre-flight checklist to make sure you've got everything ready for listing (you know...Did you gather all of the pieces? Did u shoot the photos? Have you color corrected the pictures yet?) This has been added to Auction Resources Subject Tracer™ Information Blog.

MatchLines Relationship Analysis Tool by Dr. Molly Barrow
http://www.DrMollyBarrow.com/
Dr. Molly Barrow, Relationship Expert Author, maintains an excellent blog addressing many relationship issues and is worth the read! She is also working to create a digitized web 2.0 application that will allow her Matchlines Relationship Analysis and Assessment Tool (MRAAT)to be available and could very possibly revolutionize the relationship/dating field! This is a very exciting project and all should start by reading her Matchline Theory available in her latest book by clicking here or available from Barnes & Noble, Border, Books-a-Million, and Amazon. This has been added to Social Informatics Subject Tracer™ Information Blog.

Trulia - Real Estate Search
http://www.trulia.com/
They are a real estate search engine that helps you find homes for sale and provides real estate information at the local level to help you make better decisions in the process. They show you how sales prices have been trending where it matters—in your county, city, ZIP code and neighborhood. They are data hounds but we don't expect you to be. Their crack team of engineers and analysts are focused on building tools—like their Heat Maps and real estate guides — to help you understand and interpret the real estate information. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog. This hasd been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Cambrian House - Home of CrowdSourcing
http://www.cambrianhouse.com/
Cambrian House is ushering in the era of the crowd. Named for the Cambrian period, which witnessed the most explosive episode of organic diversification in earth's history, Cambrian House is the perfect breeding ground for powerful ideas that grow and prosper with help from the crowd. Cambrian House uses the principle that, under the right conditions, crowds can be as smart or smarter than the smartest individuals, as detailed by author James Surowiecki in his book "The Wisdom of Crowds." Cambrian House endeavours to use the wisdom of crowds to find the best new business ideas and to fine tune those ideas for mass distribution. Many people have great ideas but not enough money or contacts to develop or market them. Millions of people around the world have great talents but only the option of working for an hourly wage, and many times not even using their real skills and interests. Cambrian House aims to unite those people and empower them to create and market those ideas and to share in the profits. Modestly stated, Cambrian House is bringing in a revolution in how business is done! This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This

GeSHi - Generic Syntax Highlighter
http://qbnz.com/highlighter/index.php
Welcome to the home of the Generic Syntax Highlighter - GeSHi. GeSHi started as an idea to create a generic syntax highlighter for the phpBB forum system, but has been generalised to this project. GeSHi aims to be a simple but powerful highlighting class, with the following goals: a) Support for a wide range of popular languages, b) Easy to add a new language for highlighting, and c) Highly customisable output formats. GeSHi aims to do this all as quickly as possible. Many customisable features of GeSHi facilitate speed increases, and you can easily find a balance between the amount of highlighting done and the speed in which it is done. GeSHi supports PHP5 and Windows, and has even been used to highlight code on ASP pages. Numerous blogs, wikis and forums use GeSHi, including Dokuwiki, Mambo, phpBB and WikkaWiki. This has been added to Script Resources Subject Tracer™ Information Blog.

Smoot - Web-based Ajax Diagram and GIS Tool
http://smoot.sourceforge.net/
Smoot is a Web-based tool for creating diagrams of icons and links between them. Features include Google Maps and Google Earth integration, configurable tool palettes, and automated palette generation from a Google Local query. Smoot is a project of the Children's Hospital Informatics Program. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

International Arctic Research Center [IARC]
http://www.iarc.uaf.edu/
The International Arctic Research Center [IARC] serves as a focal point of integrating/synthesizing arctic research efforts in terms of climate change and communicates the results to the global climate research community. Their core research group interacts with a larger number of scientists from many parts of the world, enabling climate change research to truly be an international effort. This has been added to Research Resources Subject Tracer™ Information Blog.

MiKTeX - Typesetting Beautiful Documents
http://www.miktex.org/
MiKTeX is an up-to-date TeX implementation for the Windows operating system. TeX is a typesetting system written by Donald E. Knuth, who says that it is "intended for the creation of beautiful books - and especially for books that contain a lot of mathematics". MiKTeX offers a complete set of utilities, macro packages and fonts.
MiKTeX (pronounced mick-tech) is an up-to-date implementation of TeX and related programs for Windows (all current variants) on x86 systems. MiKTeXs main features include: a) easy to install, b) complete: 1300 packages (fonts, macros, ...) are included, c) living: packages are updated regularily, d) easy package management: missing packages

can be installed automatically; a wizard helps you to keep your MiKTeX system up-to-date, e) fast previewing: the TeX output viewer Yap allows for an optimized edit-compile-view cycle (if the TeX authoring system in use supports source specials), and f) MiKTeX is open source. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Neptune - Get Stuff Done
http://www.neptunehq.com/
Neptune is a web-based tool to help you get stuff done. It is based on the principles in David Allen's Getting Things Done. Neptune is simple, fast, and stays out of your way with these features: a) Easy to "collect" information on the site, or email new tasks to Neptune at any time to keep them out of your head, b) Receive an email report every morning with your next actions and reminders, c) Online document system to allow you to create reference materials, or upload any file and store it with a project. Works on any modern browser, so wherever you are in the world, you will always have access to your projects. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Trusted Opinion
http://www.trustedopinion.com/
At Trusted Opinion, they understand that your friends' recommendations are more reliable and meaningful to you than those of a stranger. That's why they count your friends' opinions highest, followed by their friends' opinions, and so on down the chain. The closer circle to you, the more their opinion counts. Now you can discover what movies, restaurants and nightclubs YOUR friends rave about! Right now Trusted Opinion is perfect for getting movie recommendations, and they are adding other categories soon. Just think ... the best restaurants, music events, and much more. From your friends' favorite movies to the hottest nightclubs around. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Google Guide
http://www.googleguide.com/
The Google Guide By Nancy Blachman and Jerry Peek offers tips on effective searching with Google. Includes guides to features, search operators, understanding results, and the various tools available. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Free Medical Books
http://www.freebooks4doctors.com/
Over the next few years, many important medical textbooks will be available online, free and in full-text. The unrestricted access to scientific knowledge will have a major impact on medical practice. FreeBooks4Doctors! is dedicated to the promotion of free access to medical books over the Internet. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Medical Mnemonics - World's Database of Medical Mnemonics
http://www.medicalmnemonics.com/
A free, non-profit, online searchable database of medical mnemonics to help remember the important details. Mnemonics have existed almost as long as the medical knowledge itself. Many of these mnemonics float down from professors, demonstrators or other students. This site serves to expand the circles of sharing/exchange to a larger group worldwide. Also, by maintaining in a common source, it ensures that the knowledge will not die, but continue to be available to later learners. Nearly all current or former students have a few brilliant mnemonics that no one else has considered. This distribution network was created and is maintained for students who have derived or learned some valuable mantras, and wish to share their mnemonics with others. Careers in health often draw a greater than average number of altruistic individuals, and a dedicated searchable database allows their shared mnemonics to be distributed effectively. There is no cost for the students to acquire knowledge from others who have passed through the similar subjects, and no cost to share the knowledge. Also, updated information does not require waiting for a new edition to be released; the latest content is readily available. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

CostHelper
http://www.CostHelper.com/
CostHelper.com aims to be the premier shopping and cost information community on the Internet. Each topic contains an article researched and written by their editorial staff. Their writers and editors are committed to providing high quality, accurate and objective information. While the site is supported in part by advertising, they clearly demarcate the independent editorial content from links sponsored by advertisers. But their articles are just the start. They invite members of CostHelper.com to share their own knowledge and experiences with others, to create the broadest, most detailed community resource possible. Their vision is to create a place where you can find cost information on whatever you are looking for, wherever you may be looking, so you can easily plan your budget, find a great price that others are paying, and get started on buying what you're looking for. They hope to become your destination whenever you are budgeting or thinking about a new, complicated purchase. This has been added to ShoppingBots Subject Tracer™ Information Blog.

phpBB - Creating Communities Worldwide
http://www.phpbb.com/
Since its inception, phpBB has been among the leading bulletin board solutions and quickly rose to be the world's leading Open Source forum software. phpBB has always comprised of a key feature set, including powerful permission systems, private messaging, search functions, a customisable template and language system, as well as support for multiple databases. The latest major release, phpBB3 "Olympus", along with many phpBB firsts, such as custom bbCodes and profile requirements, support for subforums and attachments. phpBB was first created in June 2000 by James Atkinson, known in the phpBB community as theFinn. In December 2000, v1.0.0 was released,

with subsequent releases in the 1.x line continuing until November 2001 when v1.4.4 was made public. This would be the final release in the 1.x series. Meanwhile, progress was being made on v2.0.0, which was later released in April 2002. In the 5 years that have followed, phpBB2 has gained a huge following worldwide and has played an important role in defining the success of Open Source software. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

World Resources Institute (WRI)
http://www.wri.org/
The World Resources Institute (WRI) is an environmental think tank that goes beyond research to find practical ways to protect the earth and improve people's lives. Their mission is to move human society to live in ways that protect Earth's environment and its capacity to provide for the needs and aspirations of current and future generations. Because people are inspired by ideas, empowered by knowledge, and moved to change by greater understanding, WRI provides—and helps other institutions provide—objective information and practical proposals for policy and institutional change that will foster environmentally sound, socially equitable development. WRI organizes its work around four key goals: a) People & Ecosystems: Reverse rapid degradation of ecosystems and assure their capacity to provide humans with needed goods and services, b) Access: Guarantee public access to information and decisions regarding natural resources and the environment, c) climate Protection: Protect the global climate system from further harm due to emissions of greenhouse gases and help humanity and the natural world adapt to unavoidable climate change, and d) Markets & Enterprise: Harness markets and enterprise to expand economic opportunity and protect the environment. This has been added to Research Resources Subject Tracer™ Information Blog.

Awareness Watch Weekly Talk Show
http://www.BlogTalkRadio.com/AwarenessWatch
I have just started a weekly radio talk show titled **Awareness Watch** Weekly Talk Show. Each week I will be discussing the latest happenings and events on the Internet as well as highlighting one of my Subject Tracer™ Information Blogs. I will also be highlighting my monthly Awareness Watch Newsletter resources as well as my monthly Zillman Columns. You may call in to ask your questions and the number will be posted on my Saturday Blog. Each show will be thirty minutes and live weekly starting at 2pm EDST on Sunday and then archived for easy review and access. Tomorrow's call in number is: (718)508-9839. Listen, Call and Enjoy!!

phpDocumentor - The Complete Documentation Solution for PHP
http://phpdoc.org/
phpDocumentor, sometimes referred to as phpdoc or phpdocu, is the current standard auto-documentation tool for the php language. Similar to Javadoc, and written in php, phpDocumentor can be used from the command line or a web interface to create professional documentation from php source code. phpDocumentor has support for

linking between documentation, incorporating user level documents like tutorials and creation of highlighted source code with cross referencing to php general documentation. A complete list of features is available. phpDocumentor uses an extensive templating system to change your source code comments into human readable, and hence useful, formats. This system allows the creation of easy to read documentation in 15 different pre-designed HTML versions, PDF format, Windows Helpfile CHM format, and in Docbook XML. You can also create your own templates to match the look and feel of your project. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

itLinkz - Connecting People Creating Markets
http://www.itlinkz.com/
The itLinkz approach is simple: People are passionate about their interests. So they have created a space for like-minded individuals to connect online. Their Linkup model offers a wide variety of professional, community, and hobbyist groups their own niche-targeted social networking sites where members can: a) Create personal profiles, b) Connect with like-minded people all over the world, c) Share their interests, experiences, opinions, photos and more, d) Make new friends. Stay in touch with old friends, e) Get valuable insights from experts, f) Establish useful professional relationships, and g) Share their professional insights and expertise. This has been added to Social Informatics Subject Tracer™ Information Blog.

UNDP Annual Report
http://www.undp.org/annualreports/
UNDP is the UN's global development network, an organization advocating for change and connecting countries to knowledge, experience and resources to help people build a better life. They are on the ground in 166 countries, working with them on their own solutions to global and national development challenges. As they develop local capacity, they draw on the people of UNDP and their wide range of partners. World leaders have pledged to achieve the Millennium Development Goals, including the overarching goal of cutting poverty in half by 2015. UNDP's network links and coordinates global and national efforts to reach these Goals. Their focus is helping countries build and share solutions to the challenges of: a) Democratic Governance, b) Poverty Reduction, c) Crisis Prevention and Recovery, d) Energy and Environment, and e) HIV/AIDS. UNDP helps developing countries attract and use aid effectively. In all their activities, they encourage the protection of human rights and the empowerment of women.

Dojo - Open Source DHTML Toolkit
http://www.dojotoolkit.org/
Dojo is an Open Source DHTML toolkit written in JavaScript. It builds on several contributed code bases (nWidgets, Burstlib, f(m)), which is why they refer to it sometimes as a "unified" toolkit. Dojo aims to solve some long-standing historical problems with DHTML which prevented mass adoption of dynamic web application

development. Dojo allows you to easily build dynamic capabilities into web pages and any other environment that supports JavaScript sanely. You can use the components that Dojo provides to make your web sites more usable, responsive, and functional. With Dojo you can build degradable user interfaces more easily, prototype interactive widgets quickly, and animate transitions. You can use the lower-level APIs and compatibility layers from Dojo to write portable JavaScript and simplify complex scripts. Dojo's event system, I/O APIs, and generic language enhancement form the basis of a powerful programming environment. You can use the Dojo build tools to write command-line unit-tests for your JavaScript code. The Dojo build process helps you optimize your JavaScript for deployment by grouping sets of files together and reuse those groups through "profiles". Dojo does all of these things by layering capabilities onto a very small core which provides the package system and little else. When you write scripts with Dojo, you can include as little or as much of the available APIs as you need to suit your needs. Dojo provides multiple points of entry, interpreter independence, forward looking APIs, and focuses on reducing barriers to adoption. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

hakia - Search for Meaning
http://www.hakia.com/
hakia is building the Web's new "meaning-based" search engine with the sole purpose of improving search relevancy and interactivity, pushing the current boundaries of Web search. The benefits to the end user are search efficiency, richness of information, and time savings. The basic promise is to bring search results by meaning match - similar to the human brain's cognitive skills - rather than by the mere occurrence (or popularity) of search terms. hakia's new technology is a radical departure from the conventional indexing approach, because indexing has severe limitations to handle full-scale semantic search. hakia's capabilities will appeal to all Web searchers - especially those engaged in research on knowledge intensive subjects, such as medicine, law, finance, science, and literature. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to the semantic web research section of Deep Web Research. This has been added to eHealthcareBot.

TrueCrypt - Free Open-Source On-The-Fly Disk Encryption
http://www.truecrypt.org/
Free open-source disk encryption software for Windows Vista/XP/2000 and Linux Main Features include: a) Creates a virtual encrypted disk within a file and mounts it as a real disk, b) Encrypts an entire hard disk partition or a storage device such as USB flash drive, c) Encryption is automatic, real-time (on-the-fly) and transparent, d) Provides two levels of plausible deniability, in case an adversary forces you to reveal the password: 1) Hidden volume (steganography), and 2) No TrueCrypt volume can be identified (volumes cannot be distinguished from random data), and e) Encryption algorithms: AES-256, Serpent, and Twofish. Mode of operation: LRW. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Philoi - Person-to-Person Bookmark Sharing Community
http://www.philoi.com/
Philoi is the first person-to-person online bookmark sharing community! Stay connected with your friends and the Web at the same time! Features include: a) Sharing your favorite sites with friends, b) Managing your bookmarks more efficiently, c) Creating your own online personal directory of favorite sites, d) Finding out what sites your friends are sharing, e) Meeting people with similar interests, and f) Discovering what's Hot on the Web. This has been added to Social Informatics Subject Tracer™ Information Blog.

eLearning Papers
http://www.elearningpapers.eu/
eLearning Papers adds a new dimension to the exchange of information on e-learning in Europe and stimulates research. As such, the articles provide views regarding the current situation and e-learning trends in different communities: schools, universities, companies, civil society and institutions. eLearning Papers provides all those interested with an opportunity to have their texts published throughout Europe. Through these articles, the journal promotes the use of ICT for lifelong learning in Europe. The scope of the eLearning Papers reflects the four interest areas of elearningeuropa.info: schools, higher education, training and work and learning and society. All e-learning related themes are accepted as topics. The following topics are given as an example: a) Technologies, b) Pedagogy, c) Process Quality and evaluation, d) eInclusion, and f) Learning environments. This has been added to Research Resources Subject Tracer™ Information Blog. This will be added to Education and Distance Learning Resources Internet MiniGuide.

Bibus Bibliographic Database
http://bibus-biblio.sourceforge.net/wiki/index.php/Main_Page
Bibus is a bibliographic and reference management software. As with other such tools, Bibus allows one to search, edit, and sort bibliographic records. In addition, Bibus contains features that makes it unique among open source and even commercial bibliographic databases: a) Hierarchical organization of the references with user defined keys, b) Designed for multiuser environments 1)You can share the database between an "unlimited" number of users, 2) Each user will have its own classification, and 3) You can define read-only and read-write users, c) Live queries; that is searches that update as the database changes, d) On-line PubMed queries, e) On-line eTBLAST queries, f) Insertion of references and formatting of bibliographies into two widely used Word Processors (OpenOffice.org and Microsoft Word), g) Foreign language support through Unicode and gettext. As of version 1.2, Bibus is available in English, French, Portuguese, German, Spanish and Chinese, h) Bibus works on most modern platforms: 1) Gnu/linux with OpenOffice.org, 2) Windows98/2000/XP with OpenOffice.org and Microsoft Word, and 3) On other platforms (MacOS X, ...) Bibus works with Microsoft Word but styles cannot be created at this point (this should change soon for MacOS X). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Hastings Center Report
http://www.thehastingscenter.org/publications/hcr/hcr.asp
The Hastings Center is an independent, nonpartisan, and nonprofit bioethics research institute founded in 1969 to explore fundamental and emerging questions in health care, biotechnology, and the environment. The Hastings Center Report welcomes manuscript submissions that address ethical concerns in medicine and the life sciences. Prospective contributions should be clearly written and of interest to a broad readership. Contributions may take many forms:

* articles that explore philosophical and ethical issues in medicine, healthcare, technology, medical research, the use of human subjects in research, and the environment;
* reports or reviews of empirical studies that implicate relevant philosophical and ethical questions;
* short, provocative essays; case studies (which may be accompanied by commentary on the case);
* personal narratives about receiving or providing health care;
* and brief commentary on relevant events in the news.

TauMed - Virtual Health Community
http://www.TauMed.com/
TauMed is a virtual health community where you can share information on a variety of topics. They encourage you to educate yourself and share your knowledge with the fastest growing Health Community on the Web. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to the source code for eHealthcareBot Search Engine.

Software for Starving Students
http://softwarefor.org/
Software for Starving Students is a free collection of programs organized for students (but available to anyone). They have gathered a list of best-in-class programs onto one CD (one disc for OS X, one for Windows), including a fully-featured office suite, a cutting-edge web browser, multi-media packages, academic tools, utilities and more. This has been added to Student Research Resources Subject Tracer™ Information Blog.

Podget - A Simple Podcast Aggregator
http://podget.sourceforge.net/
Podcasting is a distribution method for audio and video files through RSS feeds, allowing the user to subscribe and receive new releases automatically. Podget is a simple podcast aggregator optimized for running as a scheduled background job (i.e. cron), with support for folders and categories, importing servers from OPML lists & iTunes PCAST files, automatic playlist creation and cleanup. This has been added to the tools section of Research Rersources Subject Tracer™ Information Blog. This has been added to my Bots, Blogs, News Aggregators presentation sources.

RoomWare Project
http://roomwareproject.org/
The RoomWare Project is aimed at providing developers, artists and other interested parties with a plug and play server installation that they can use to jump-start the development of room based mobile installations. The Roomwareproject team's (current) definition: RoomWare is a software application running in a defined physical space. People in a RoomWare enabled space can use the services running on a local server through their mobile phone (Bluetooth), laptop (Wifi) or other means (RFID). Possible services range from live interaction with the music or video screens to introducing parts of an online profile into a local space. For a more in detail look at what this is go to RoomWareDefinitions on their wiki. This has been added to the Social Informatics Subject Tracer™ Information Blog.

CAMERA (Community Cyberinfrastructure for Advanced Microbial Ecology Research and Analysis)
http://camera.calit2.net/
Version 1.0 of the CAMERA (Community Cyberinfrastructure for Advanced Microbial Ecology Research and Analysis) website is now available to the public following a two-month Beta testing period. CAMERA is a user-driven site dedicated to providing the scientific community with metagenomics data and analysis tools. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Genome Tools
http://cmr.tigr.org/tigr-scripts/CMR/shared/Menu.cgi?menu=genome
An excellent comprehensive listing of sources and sites for various genome tools. This has been added to Biological Informatics Subject Tracer™ Information Blog.

xFruits - Compose Your Information System
http://www.xfruits.com/
xFruits is a Web 2.0 service. You do not need any specific learning to deal with it. It is a free online service offering to every user the possibility of: a) Enriching your home, b) Enlarging your blog's functionalities, and c) Creating, generally, your information system from the RSS feed. XFruits makes possible the Mashup RSS creation in a very simple way thanks to the Composer. You can assemble the bricks together so as to build your own feed-based service. "xFruiter" service's users are referenced. xFruits has been thought of as from its origin to be upgradeable and modular, and thus, to allow a developer's community to take part in the project. Their ambition is to create dozens of new bricks! XFruits is already available in English, French and Spanish version, a Japanese version will be available soon. This service is still in Beta, they count on the xFruiters's ideas and suggestions to help the service to advance. One of the Home's component is intended for collecting your ideas. The most successful ideas will be integrated into xFruits. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Computational and Systems Biology at MIT (CSBi)
http://csbi.mit.edu/website
The MIT Computational and Systems Biology Initiative (CSBi) is a campus-wide education and research program that links biologists, computer scientists and engineers in a multi-disciplinary approach to the systematic analysis of complex biological phenomena. CSBi places equal emphasis on computational and experimental methods and on molecular and systems views of biological function. Multi-investigator research in CSBi is supported through a sophisticated research infrastructure, the CSBi Technology Platform. CSBi includes about eighty faculty members from over ten academic units across MIT's Schools of Science and Engineering, the Sloan School of Management, and the Whitehead Institute for Biomedical Research. This has been added to Biological Informatics Subject Tracer™ Information Blog.

ChemSpider
http://www.chemspider.com/
ChemSpider makes available a database of chemical structures and related properties as well as providing access to a series of property prediction algorithms. It has been built with the intention of aggregating and indexing chemical structures and their associated information into a single searchable repository and making it available to everybody, at no charge. ChemSpider intends to become a community for chemists to share data and knowledge associated with chemical structures and reactions and providing an open forum for discussion and sharing. Over 10 Million (10,671,437) Compounds Indexed and Growing... This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

MetaGlossary - Meaningful Results
http://www.metaglossary.com/
Meta" means beyond, more comprehensive, or more highly organized, and with respect to other dictionaries and glossaries, MetaGlossary is all these things. MetaGlossary harvests definitions from the entire web, the world's largest, constantly-updated repository of information. Hence, it surpasses traditional dictionaries, which grow more out of date with each passing day. MetaGlossary is as dynamic as the web, offering the most current information out there on the most contemporary topics. However, unlike other search engines, MetaGlossary is able to precisely extract the meanings of terms and phrases from the often frustratingly unmanageable mass of information on the web. It provides you with concise, direct explanations for terms and phrases, not just endless links to sift through in search of a comprehensive definition. What's more, MetaGlossary organizes these meanings based on topic and usage, so you'll find the one you're looking for quickly and easily. Since MetaGlossary spans the expanse of the web, even your most field-specific requests for terms, phrases, acronyms, technical jargon, and slang, will be successfully met. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

The Open Software Wiki - SWiK
http://www.swik.net/
SWiK.net is a project to help people collaboratively document open-source software. SWiK is visited by tens of thousands of people daily, it's a place to make notes and publish articles on software development and open source projects, tag projects to help organize the world of open source, or just browse around and find interesting new open source software and other neat stuff. This wiki is community run and completely open – it depends on editors like you to help build pages with useful information about using open source software and developing applications. The wiki engine is written from scratch by SourceLabs. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Nexo - Free and Easy Online Groups
http://www.nexo.com/
Nexo was created to simplify your life by providing an online service that lets you coordinate communications and collaborations with all your different groups of friends, colleagues, neighbors, teammates and community. Nexo provides a website, email communications, real-time updates and social networking all in one. Nexo makes it easy to keep everyone up-to-date and makes it fun and easy to participate. Nexo founders use Nexo for all the public, private and semi-private parts of their life. Family. Sports teams. Reunions and trips. Parties. Projects. School and community groups. Even a personal start page. All in one place, accessible from anywhere. Secure. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

MindMeister - Thinking Together
http://www.mindmeister.com/
MindMeister is a collaborative online mind mapping tool - you can capture your thoughts and share them instantly with friends and colleagues. MindMeister supports all the standard features of a classic mind mapping tool - only online, and with as many simultaneous users as you like! MindMeister brings the concept of mind mapping to the web, using its facilities for real-time collaboration to allow truly global brainstorming sessions. Users can create, manage and share mind maps online and access them anytime, from anywhere. In brainstorming mode, fellow MindMeisters from around the world (or just in different rooms) can simultaneously work on the same mind map - and see each other's changes as they happen. Using integrated Skype calls, they can throw around new ideas and put them down on "paper" at the same time. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

ManyWorlds - Knowledge Network for Entrepreneurial Thought Leaders
http://www.ManyWorlds.com/
ManyWorlds.com enables business executives to lead, renew and grow their organizations by providing high quality and relevant knowledge and thought leadership. At ManyWorlds.com they recognize that executives are faced with a barrage of information each day about how to lead and grow their businesses. They need a 'meta-opinion' of critical thinking that can separate the 'signal' from the 'noise' of business thinking. Thus the team of dedicated expert editors at ManyWorlds.com mine dozens of top publications and web sites on a regular basis. From these, they select the highest quality material and review it, while ranking and rating it for quality and relevance. They also connect it into the knowledge network of other resources already in ManyWorlds.com to provide context and additional related reading about concepts in the material. ManyWorlds.com is updated with fresh, relevant material each business day. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Join2Grow - The Network for European Entrepreneurs
http://www.join2grow.biz/
Join2Grow.biz is an on-line networking community for European entrepreneurs. The site provides a platform where entrepreneurs can interact and exchange ideas with others who share similar life-goals, ambitions, and dreams. It is also a place of opportunity, where entrepreneurs can discover and make contact with potential partners and collaborators throughout Europe. The starting point of Join2Grow.biz is the Enterprise and Entrepreneur Survey – a comprehensive study of the needs, expectations, and motivations of today's European entrepreneurs. Initiated by Fortis Merchant & Private banking, and conducted in partnership with TNS Sofres and McKinsey, it is the first survey to focus specifically on entrepreneurs in order to develop a complete and accurate picture of who they are and what drives them. Visitors are invited to participate in an ongoing discussion, about the results of the survey and other topics of interest, by posting comments and questions for further discussion. The site provides a forum where entrepreneurs can reach out to the entire on-line community of European entrepreneurs,

or connect on a one-to-one basis with their peers. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog. Join2Grow.biz is a place where the professional and personal lives of entrepreneurs intersect.

WIKISKY - Consolidating Astronomical, Astrophysical and Other Space Objects
http://www.wikisky.org/
WIKISKY is a non-commercial project. The main purpose of WIKISKY is to consolidate astronomical, astrophysical and other information about different space objects and astrophysical facts. They hope to achieve this purpose using the principle of visualization. When a person reads an article about a star, the star is only the abstraction for that reader. The person cannot emotionally feel the reality of the star without actually seeing it. They strive to create an extremely detailed sky map to help everybody to better understand the information gathering about any space object and various phenomena connected with those space objects. This has been added to Astronomy Resources Subject Tracer™ Information Blog.

Peepel - Extending the Multiple Window Desktop Model to the Web
http://www.peepel.com/
Peepel is a unique way of looking at online applications, providing an Online Office with spreadsheet and word processor files in multiple PeepelWindows in one browser window. Innovative and enterprising new company in Australia focused on Ajax development for online office and mapping applications. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Gumiyo - Online Classified Advertisements Using Mobile Phones
http://www.gumiyo.com/
Gumiyo is the first end-to-end mobile commerce platform that allows users to easily publish and search classified ads entirely from mobile phones and immediately connects live buyers and live sellers. Using any mobile phone with a built-in camera and a basic data plan, you can create ads in 3 easy steps: 1) Capture images or video of an item, 2) Attach them to a multimedia message with a short description, and 3) Send it to post@gumiyo.com. Gumiyo will process and optimize the submission, create an online ad for you, and then send you a a reply link asking you to review and edit your ad before it is published. When you're ready to publish, they will broadcast your ad to other leading Web sites including Google, Froogle, Oodle and many others. In fact, a single Gumiyo ad can generate up to 100-150 additional web pages and citations across the Internet! Gumiyo requires no installation and is compatible with most mobile devices. Currently the service is free! This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Election Bloggers: Methods for Determining Political Influence by Greg Elmer, Peter Malachy Ryan, Zach Devereaux, Ganaele Langlois, Joanna Redden, and Fenwick McKelvey
http://www.firstmonday.org/issues/issue12_4/elmer/index.html

Abstract:
This paper discusses early findings and methodological pitfalls of a study of a hyper–mediated election campaign in Canada. Web logs — or "blogs" — serve as the primary object of study. The paper focuses on possible sources of large scale data (aggregated blogger posts) and methods of determining the political influence of bloggers. A series of methodologies are proposed to resolve the over–reliance upon information aggregators and blog search engines provided by Google and Technorati.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest sources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
