Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

Welcome to the V5N7 July 2007 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Genealogy Resources** on the Internet. These resources are constantly updated on the Employment Resources Subject Tracer™ Information Blog available at the following URL:

http://www.GenealogyResources.info/

These genealogy resources continue to expand at a very rapid rate especially with the needs of tracing our heritage and roots from throughout the world! These resources will allow you to keep up to date and to monitor the latest happenings in all fields associated with genealogy and the opportunities associated with discovering new relatives!

Awareness Watch™ Spotters

Oort-Cloud - Write, Read, Share and Respond
http://www.oort-cloud.org/
Oort-Cloud is a place that gives you a chance to present some fundamental ideas, get feedback about them from other people, and comment on events and concepts that are, or might be, relevant to what Oort-Cloud is all about. Oort-Cloud is also a community of readers, authors, editors, and critics. What Oort-Cloud will be beyond that depends on you and the rest of the active community. This has been added to Social Informatics Subject Tracer™ Information Blog.

Open CRS Network
http://opencrs.com/
American taxpayers spend over $100 million a year to fund the Congressional Research Service, a "think tank" that provides reports to members of Congress on a variety of topics relevant to current political events. Yet, these reports are not made available to the public in a way that they can be easily obtained. A project of the Center for Democracy & Technology through the cooperation of several organizations and collectors of CRS Reports, Open CRS provides citizens access to CRS Reports already in the public domain and encourages Congress to provide public access to all CRS Reports. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

BibMe - Fully Automatic & Free Bibliography Maker
http://www.bibme.org/
BibMe! is the fully automatic bibliography maker that auto-fills. It's the quickest way to build a works cited page and it's free. It happens is three steps: 1) Search for a book, article, website, or film from our database, or enter the information yourself, 2) Add it to your bibliography, asnd 3) Download your bibliography in either the MLA, APA, or Chicago formats and include it in your paper. This has been added to Student Research Resources Subject Tracer™ Information Blog.

Solar Heat Pump Electrical Generation System - SHPEGS
http://www.shpegs.org/
This is a project to design and build a system that uses a combination of direct and indirect solar collection to generate electricity and store thermal energy in an economical, environmentally friendly, scalable, reliable, efficient and location independent manner using common construction materials. The project is being managed with a similar methodology to Open Source Software Development and the ideas and contributions are being published openly on the Internet without an attempt to secure patents. The hope is that with an open philosophy that the project shows similar Rapid Application Development and success as Linux and other Open Source Software projects and provides a system that can meet future energy requirements in a sustainable manner. This has been added to Research Resources Subject Tracer™ Information Blog.

Fedora Project - Managing and Delivering Digital Content
http://www.fedora.info/
Fedora open source software gives organizations a flexible service-oriented architecture for managing and delivering their digital content. At its core is a powerful digital object model that supports multiple views of each digital object and the relationships among digital objects. Digital objects can encapsulate locally-managed content or make reference to remote content. Dynamic views are possible by associating web services with objects. Digital objects exist within a repository architecture that supports a variety of management functions. All functions of Fedora, both at the object and repository level, are exposed as web services. These functions can be protected with fine-grained access control policies. This unique combination of features makes Fedora an attractive solution in a variety of domains. Some examples of applications that are built upon Fedora include library collections management, multimedia authoring systems, archival repositories, institutional repositories, and digital libraries for education. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

OpenAd.net - World's Biggest Creative Department
http://www.openad.net/
At OpenAd.net they deliver wonderful results to their Buyers because they provide access to the biggest creative department on the planet. Their network of Creatives is drawn from over 100 countries throughout the world and includes more than 7,800 individuals. Because of their wide range of talents and variety of backgrounds, their

Creatives are able to provide the richest and most diverse ideas you could wish for. Their Creatives are advertising specialists. Because they want to provide you with the most complete range of talented individuals possible, their network is built of both freelancers and agencies, and from everyone from students to creative directors. (Their identities are protected throughout until licences are purchased.) You can find the ideas you're looking for in their Gallery or by holding pitches. The Gallery contains hundreds of unbranded ideas for you to search through, whereas pitches allow you to specify your individual requirements, letting the ideas come directly to you. This has been added to Advertising, Marketing and Public Relations Resources Internet MiniGuide. This has been added to Internet Experts Subject Tracer™ Information Blog.

50 Matches - Social Search Engine
http://www.50matches.com/
People save their bookmarks online (in sites like del.icio.us) and post links to their favorite sites (in sites like digg and reddit). In a way, people that use these sites act as smart agents and add to these big databases the most liked sites on the web. No company could compete with the man hours people put in saving and tagging their bookmarks. No algorithm could calculate site quality better than humans. 50 matches is in this search evolution junction. They crawl only sites that were bookmarked , "dugg" or "reddit'ed" by combining human indexing with machine indexing. A real social search engine with search results - quality no one can compete with! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog. This has been added to the source code for eHealthcareBot SearchEngine. This has been added to the source code of eMarketingBot Search Engine.

Daily Blog Tips
http://www.dailyblogtips.com/
There are more than 50 million blogs worldwide. Every day 180,000 new blogs are created… that is 2 blogs every second. Quite astonishing for something that was almost inexistent a couple of years ago right? Most of those blogs, however, get abandoned after an initial period of enthusiasm. Even skilled writers get discouraged when they realize that people are not reading their stuff. Content is surely king, but great content might just get lost on the Internet if not supported by promotion, search engine optimization and the like. With that problem in mind Daniel Scocco decided to create Daily Blog Tips, a place where you will find simple yet effective tips to improve your blog. This has been added to my presentation resources page for Bots, Blogs and News Aggregators.

Line Rider
http://www.linerider.com/
Line Rider was originally created by Boštjan Cadež, a Slovenian university student, in September of 2006. It almost immediately gathered a cult following and became the seventh quickest gaining keyword in Google. Since that time, the 'toy' has generated over 16 million views. Fans quickly noticed that they could create tracks, set them to

music, and share them over YouTube.com. Currently, there are over 11,000 shared videos with many more to come. inXile Entertainment is extremely excited to work with Boštjan in order to reach the full potential that they feel the Line Rider application can live up to. Keep an eye on this site for more information from Line Rider. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

tteach! - Free Interactive Online Knowledge Sharing
http://www.tteach.com/
tteach! is essentially School 2.0. where the world educates each other and where you learn what you want to learn. tteach is a soon to launch, free interactive knowledge sharing website. Here anyone can teach, learn & share their knowledge, educational resources & original classes worldwide through a unique, well designed, interactive & user-friendly interface. At tteach! anyone can learn for free and anyone can teach (as long as long as you know your stuff!). Teachers earn a share of advertising revenue & learners create their own schools of knowledge - remember anyone can be a learner & anyone can be teacher...depending on what you already know and what you'd like to learn about! Subjects will vary from the academic through to life skills – everything is welcome as long as it is good quality teaching & there are people out there who are eager to learn about it. Their goal is straight forward ... to truly allow the world to learn for free. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

TaskJuggler - Powerful Project Manager Tool
http://taskjuggler.org/
TaskJuggler is a modern and powerful project management tool. Its new approach to project planning and tracking is far superior to the commonly used Gantt chart editing tools. It has already been successfully used in many projects and scales easily to projects with hundreds of resources and thousands of tasks. TaskJuggler is Open Source project management software for serious project managers. It covers the complete spectrum of project management tasks from the first idea to the completion of the project. It assists you during project scoping, resource assignment, cost and revenue planing, risk and communication management. TaskJuggler provides an optimizing scheduler that computes your project time lines and resource assignments based on the project outline and the constrains that you have provided. The build-in resource balancer and consistency checker offload you from having to worry about irrelevant details and ring the alarm if the project gets out of hand. Its flexible "as many details as necessary"-approach allows you to still plan your project as you go, making it also ideal for new management strategies such as Extreme Programming and Agile Project Management. If you are about to build a skyscraper or just want to put together your colleague's shift plan for the next month, TaskJuggler is the right tool for you. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Onalytica - Transforming Online Buzz Into Knowledge
http://www.onalytica.com/
Onalytica is a full service, online competitive intelligence and monitoring agency. They help clients measure, monitor and manage influence and they provide detailed insights into what stakeholders are saying about brands and issues of interest. In doing so, theye ensure their clients the strong competitive advantage of having more essential knowledge; and having it earlier. They are science based in what theye do and although theye analyse modern media and may use cutting edge systems and methodologies they rely on recognised (and usually traditional) principles of good research. Although they often analyse social media like social networks, message boards and blogs theye are not limited to those. Often it makes more sense to include traditional media, the whole internet or segment an analysis on geography or language than on media type; and when that is the case that's what they do. They often work directly with the end-client but we also empower other leading agencies in the industry with our expertise, experience and technology. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

MyTicklerFile - Manage Your Reminders, Projects, Calendar and Time
http://www.myticklerfile.com/
MyTicklerFile consists of 43 "virtual folders" - one folder for each month of the year and a folder for each day of the month. MyTicklerFile allows you to manage projects, track your time and monitor your activities as you get things done! Features include: 1) Create and receive reminders on your mobile phone via text message, 2) Create recurring reminders, 3) Synch projects and time tracking with iCal, 4) Export project data to csv file (Excel), and 5) Time tracking synch with Basecamp. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

MyNoteIT - An Online Note Taking Tool for Students
http://www.mynoteit.com/
MyNoteIT offers the following features: 1) Ask the community your dire question at the message boards, 2) Access your notes on your mobile phone via mynoteIT Mobile, 3) Upload Word and OpenOffice documents, images of scanned notes and audio notes, 4) Keep track of all your upcoming assignments and get them done with your to-do list, 5) Use their sophisticated WYSIWYG editor to easily take, edit and store your notes online, 6) Instantly search your notes or the mynoteIT community notes, and learn something new, 7) Create a bookmark list of the most helpful and useful notes you find on mynoteIT, 8) Join or create class groups or school groups so you're never out of the loop, 9) View all your upcoming assignments on your calendar, 10) Add friends to your friends list to easily keep in touch with each other, 11) Easily keep track of all your grades in all your classes, 12) Store your teachers contact information to easily contact them anytime, AND 13) Go through the revision process with your friends with our note tree. This has been added to Student Research Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

DirectoryAccounting.com - Accounting Web Directory
http://www.DirectoryAccounting.com/
DirectoryAccounting.com is an Accounting web directory which collects all the companies and organizations web sites. Their editorial team makes great effort to evaluate the existence and accuracy of each company web site. Their mission to be the leading provider of quality e-business, advertising and information services for local and international markets. They know that the Internet is an overwhelming space and finding just the information you need can still be a frustrating and time-consuming process. They minimize graphics and maximize content quality. They reduce search time and increase search results. They are not a search engine. This has been added to Financial Sources Subject Tracer™ Information Blog. This has been added to Directory Resources Subject Tracer™ Information Blog.

Explode Social Search Engine
http://www.ex.plode.us/
Explode is a social search tool that provides the glue between web 2.0 applications. Search for people who share your interests, make collections of people and interact with them all while using your current service! This has been added to Finding People Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

Perseus Digital Library
http://www.perseus.tufts.edu/
Perseus is an evolving digital library, engineering interactions through time, space, and language. Their primary goal is to bring a wide range of source materials to as large an audience as possible. They anticipate that greater accessibility to the sources for the study of the humanities will strengthen the quality of questions, lead to new avenues of research, and connect more people through the connection of ideas. This has been added to Reference Resources Subject Tracer™ Information Blog.

Law.com Quest - Legal Search Engine
http://www.law.com/Quest
Law.com Quest is a comprehensive vertical search engine developed specifically for the legal Web. Law.com Quest provides powerful, Web-based search capabilities that enable attorneys, legal researchers and other industry members to quickly locate, organize and access relevant, useful results from leading legal publications, blogs and law firm Web sites, as identified by an authority in the field. This will be added to Legal Resources Internet MiniGuide. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

FAROO - P2P Web Search

http://www.faroo.com/

The collection of the whole, exponentially growing Web on a single central system is not successful on the long run. Despite constantly increasing investments in hardware the completeness and freshness of the search index will steadily decrease. With the concept of a distributed peer-to-peer search engine the same users, who provide the content of the internet assure also, that it is findable too. Thus the search results may be provided more up-to-date, more comprehensive and more cost-efficient. The searcher becomes a part of FAROO. The architecture is decentralized like the Internet itself. There stands no more central institution between the information source and the searcher. With the tremendous growth of information the relevance of search results becomes more important. This is assured by an fully automatic ranking of web page content by the users of the peer-to-peer search engine. This has ben added to the P2P section of Deep Web Research Subject Tracer™ Information Blog.

Infinite Thinking Machine (ITM)

http://www.infinitethinking.org/

The Infinite Thinking Machine (ITM) is designed to help teachers and students thrive in the 21st century. Through an active blog, an Internet TV show, and other media resources, the ITM shares a "bazillion practical ideas" for turning the infinite universe of information into knowledge. They showcase examples of innovative instructional methods, talk with leading experts, and share real stories from the classroom to improve how theywe think, learn, teach, and live. And they try to have a little fun along the way. Their shows and website are an important way to spark dialogue and help educators explore a wide range of innovative ideas. They rely on the collective wisdom of many experienced educators to select interesting ideas to share, but they cannot validate these practices beyond that. Also, please keep in mind that any mention of products, ideas, websites, and organizations does not represent an endorsement by the producers or sponsors. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Education and Distance Learning Resources Internet MiniGuide.

URateStuff - Consumer Based Product Reviews

http://www.uratestuff.com/

URateStuff is a worldwide community-driven Product Review site that benefits Consumers, Sellers and Manufacturers. Unlike other product review sites, URateStuff is a democracy in that it allows its users to choose which reviews to promote and which to bury. The user can submit their own review of any product they can think of and have their review evaluated by URateStuff's growing userbase. The most popular reviews stay in the sites database longer where it has a chance to reach the right audience. The creative team behind URateStuff believe that consumer opinions are what shape industry trends. They created the site because they believe that quality and innovation are more important than the manufactured buzz created by companies with huge marketing budgets. URateStuff allow their users to share in the company's profits through Google Ad Sense,

a system that gives incentive to the many individuals and amateur bloggers who enjoy writing about the latest trends in everything from technology to fashion. The site benefits consumers, sellers, and manufacturers in a system the team likes to call The Circle of Progress. Not only do consumers benefit from the review system but sellers and manufacturers can find out how their product is testing across a wide demographic. This system is an improvement of the traditional route of making a huge financial investment to see how a product is doing in the market economy. Sellers also benefit from customer testimonials posted on the site which gives them more credibility. Furthermore, the sites interface compatibility with popular social bookmarking sites such as Digg and the addition of buttons that can be posted onto any blog or social networking site makes the content extremely viral and a perfect fit for a new generation of Web 2.0. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Center on Media and Child Health Research
http://www.cmch.tv/research/
Center on Media and Child Health researchers build upon the established body of research on media and health to investigate associations between media use and children's physical and mental health outcomes. Center on Media and Child Health researchers have published in a variety of academic disciplines including public health, psychology, medicine, and anthropology. This has been added to Research Resources Subject Tracer™ Information Blog.

PopFly by Microsoft
http://www.popfly.ms/
The Non-Professional tools team builds software to enable new, hobbyist, and other non-professional programmers - as well as complete non-programmers - to build and share their work. Their team's vision is to democratize development by making it approachable to an entire class of people that want to "create" without necessarily having to write code. They believe that if you can send an email, you should be able to build and personalize your own website, mashup, social networking site, or blog. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Softpedia - Free Downloads Encyclopedia
http://www.softpedia.com/
Softpedia is a library of over 35,000 free and free-to-try software programs for Windows and Unix/Linux,games and drivers. They review and categorize these products in order to allow the visitor/user to find the exact product they and their system needs. They strive to deliver only the best products to the visitor/user together with self-made evaluation and review notes. They add more than 100 items on their sites every day. All their services are FREE of charge for the visitors/users. There is a membership system, but it does not require a payed subscription, although it offers a series of advantages for the registered

user. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

PageBreeze Free HTML Editor
http://www.pagebreeze.com/
PageBreeze Free HTML Editor is an award-winning HTML Editor which has both visual (WYSIWYG) and HTML tag/source modes. PageBreeze Free HTML Editor's design emphasizes simplicity and ease-of-use. You'll find that you'll be creating great looking websites almost instantly--with virtually no learning curve! PageBreeze Free HTML Editor is a completely free download for personal use and will never expire. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Prelinger Library - Online Collection of Public Domain Materials in Key Subject Areas
http://www.archive.org/details/prelinger_library
The Prelinger Library is a private research library open to the public, located in downtown San Francisco. Its collections encompass some 50,000 books, periodical volumes and printed ephemera. They are currently curating an online collection of public domain materials in key subject areas. This has been added to Reference Resources Subject Tracer™ Information Blog.

BioTools
http://www.bioscience.org/urllists/bioltool.htm
A very comprehensive listing of biotools including sections for 1) Analysis Tools, 2) Databases, 3) Information, 4) Resources, and 5) Search. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Biological Informatics Subject Tracer™ Information Blog.

National Library for Health (NLH)
http://www.library.nhs.uk/Default.aspx
The National Library for Health (NLH) aims to be the best health library and information service in the world. It will: 1) Deliver a modern, equitable library service to all NHS staff, 2) Extend NHS library services to patients and the public for the first time, 3) Be built around user needs, 4) Integrate library services with NPfIT and other services, 5) Simplify access arrangements for students and staff working partly in the HE/FE sector, and 6) Reach NHS staff who do not regularly use NHS library services. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to the source code of eHealthcareBot Search Engine.

Molecular Genetics, Microbiology and Virology
http://www.springerlink.com/content/120674/
This journal deals with theoretical and applied topics in molecular genetics of pro- and eukaryotes, molecular microbiology and molecular virology. Special attention is paid to studies of the genetic apparatus of microorganisms, the search for genetic forms of metabolism, genetic mapping of pathogenic causative agents, investigations of the structure and functions of extrachromosomal factors of heredity and migratory genetic elements, and to theoretical studies on the mechanisms of genetic regulation. The journal publishes articles on the molecular and genetic elements of eukaryotic cells, the functioning of chromosomes and chromatin, the nature of genetic changes in malignant degeneration, and on a number of hereditary diseases. Also covered are the molecular bases of virology, including viral and cellular genomes integration and viral persistence. Research data is provided on genetic engineering, including synthesis and isolation of genes from natural foci, creation of plasmoid- and virus-based vectors, and obtaining of recombinant DNA molecules for establishing gene banks of microorganisms, animals and humans. Articles on the biotechnological production of hormones, components of antiviral vaccines, and diagnostic and therapeutic preparations are included in the journal's scope of coverage. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Kusasa - Analytical Education
http://www.kusasa.org/index.html
Kusasa, a Zulu word for tomorrow, is the name of a new, dynamic learning system for the 21st century. Kusasa will provide learners with free software to model the objects, organisms or processes they are studying in any learning area. Kusasa projects will challenge learners to use computers not for "drill and kill" instruction, but as tools to help them explore, discover and learn. This has been added to Research Resources Subject Tracer™ Information Blog.

Midas Oracle - Prediction Markets Discussions
http://www.midasoracle.org/
Midas Oracle is about: 1) Prediction markets (and event derivatives); 2) Market-generated predictions (and their interpretations, if any) on any socially valuable topic or issue; 3) Predictions on the financial markets, the world's economy, and everything else; 4) Market mechanisms; 5) Forecasting techniques and tools; 6) The wisdom of crowds (according to James Surowiecki); 7) Collective intelligence; The state and dynamic of the prediction market industry; 8) Business administration (Internet marketing and information technology, in particular); 9) Science, technology, innovation and entrepreneurship; 10) Politics, ethics and regulations; and 11) Art. This has been added to Prediction Markets Subject Tracer™ Information Blog.

10 Minute Mail
http://10minutemail.com/10MinuteMail/index.html
By clicking on their link you will be given a temporary e-mail address. Any e-mails sent to that address will show up automatically on the web page. You can read them, click on links, and even reply to them. The e-mail address will expire after 10 minutes. Why would you use this? Maybe you want to sign up for a site which requires that you provide an e-mail address to send a validation e-mail to. And maybe you don't want to give up your real e-mail address and end up on a bunch of spam lists. This is nice and disposable. And it's free. Enjoy! This has been added to Privacy Resources Subject Tracer™ Information Blog.

UKeiG - UK eInformation Group
http://www.ukeig.org.uk/
UKeiG is a respected and well-established forum for all information professionals, users and developers of electronic information resources in all formats. They offer a wide range of resources as well as details of their seminars and workshops. Members can access our e-journal eLucidate and their popular series of Factsheets. This has been added to Research Resources Subject Tracer™ Information Blog.

The Cochrane Library - Evidence for Healthcare Decesion Making
http://www3.interscience.wiley.com/cgi-bin/mrwhome/106568753/HOME
The Cochrane Library contains high-quality, independent evidence to inform healthcare decision-making. It includes reliable evidence from Cochrane and other systematic reviews, clinical trials, and more. Cochrane reviews bring you the combined results of the world's best medical research studies, and are recognised as the gold standard in evidence-based health care. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to the code source for eHealthcareBot Search Engine.

Health InterNetwork Access to Research Initiative (HINARI)
http://www.who.int/hinari/en/
The HINARI program, set up by WHO together with major publishers, enables developing countries to gain access to one of the world's largest collections of biomedical and health literature. Over 3750 journal titles are now available to health institutions in 113 countries, benefiting many thousands of health workers and researchers, and in turn, contributing to improved world health. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Focus (Center for Research Libraries)
http://www.crl.edu/focus/toc.asp
Center for Research Libraries is a consortium of North American universities, colleges, and independent research libraries. The consortium acquires and preserves traditional and digital resources for research and teaching and makes them available to member institutions through interlibrary loan and electronic delivery. The Center's mission is to

support advanced research and teaching in the humanities, sciences and social sciences by ensuring the survival and availability of the knowledge resources vital to these disciplines. The Center accomplishes this mission through cooperative action with its members and partners. Focus is CRL's newsletter.

Access to Global Online Research in Agriculture - AGORA
http://www.aginternetwork.org/en/
The AGORA program, set up by the Food and Agriculture Organization of the UN (FAO) together with major publishers, enables developing countries to gain access to an outstanding digital library collection in the fields of food, agriculture, environmental science and related social sciences. AGORA provides a collection of 958 journals to institutions in 107 countries. AGORA is designed to enhance the scholarship of the many thousands of students, faculty and researchers in agriculture and life sciences in the developing world. This has been added to Agriculture Resources Subject Tracer™ Information Blog.

Updated> Online Research Tools White Paper Link Compilation
http://www.OnlineResearchTools.info/
The white paper link compilation *Online Research Tools* by Marcus P. Zillman, M.S., A.M.H.A. has been updated! It is a comprehensive listing of online research tools that offer various downloadable as well as web applications to allow you to do your research and searching on the Internet far more effective and productive. It is a freely available 54 page .pdf document (1.05 MB) that can be downloaded from the above URL. Other white papers and resources on information retrieval, information extraction and deep web research by Marcus P. Zillman, M.S., A.M.H.A. are available by clicking here. Online Research Tools White Paper Link Compilation was updated **06-11-07**.

PC Instant People Check
http://www.instantpeoplecheck.com/
Excellent online resource for individuals and businesses! Check future tenants, employees and individuals. With up to 300 million criminal records from one of the best databases available, their nationwide background check search capabilities include county, state, national and federal records. Thjis has been added as a fee based resource to Finding People Subject Tracer™ Information Blog.

ShoeString Genealogy
http://www.shoestringgenealogy.com/ssg1.htm
ShoeString Genealogy provides Family Historians with information about how to research their ancestors both in the Internet and in libraries and other repositories. Besides how, it indicates where—locations for information and the relative value of each. ShoeString Genealogy focuses on lowering the costs of research and raising the quality of information obtained. Although not all resources are free, many are. There are abundant and excellent resources that are quite inexpensive, too. This has been added to Genealogy Rsources Subject Tracer™ Information blog.

overdogg - Online Community Centered Around User-Sponsored Competitions
http://overdogg.com/
overdogg is an online community centered around user-sponsored competitions. overdogg pioneers the online buyer's market by developing a Web-based community in which buyers and providers meet in an efficient and entertaining competition-style format to fill personal and business needs. Whether it's a homeowner needing a tree removed from their yard, the mother needing ideas and planners for her daughter's wedding, a 13-year-old boy searching for a lost puppy, a police investigator trying to solve a crime, an entrepreneur posting a reward for the market data he needs, or a bachelor needing a date for his upcoming class reunion, anyone can stage an ad-hoc competition to enlist their millions of users across the web to help them obtain what it is they desire. overdogg is part of the Semantic Web (capital - S) movement, which encourages people to create, publish and share metadata and use open standards. They use it to enhance match making between buyer needs and service provider offers. overdogg is masterminded by Semantic Web visonaries Kingsley Idehen (blog) and Sherman Monroe (blog), and is jointly developed by their respective interests: OpenLink Software and Monrai Technologies. This has been added to Auction Resources Subject Tracer™ Information Blog. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Updated> Academic and Scholar Search Engines and Sources UPDATED
http://zillman.blogspot.com/2004/12/academic-and-scholar-search-engines.html
I have updated my Internet MiniGuide Annotated Link Compilation White Paper titled "Academic and Scholar Search Engines and Sources" which is a 42 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (1.06MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. [Update Posted 06-12-07]

Mailinator - Instant and Temporary Spam Free eMail Address
http://www.mailinator.com/
Want to know how to create an account at Mailinator™ ? Just send email to it. You don't sign-up. You don't have to tell Mailinator you're coming. Think of something@mailinator.com (where something is really "anything at all") whenever you need it. Give it out. Type it into webforms. Post it on billboards. After all that - THEN go there and check that mailbox. Mailinator does not assign you an email address and you don't even need to go there before you use it. You choose - you can use any email you want (@mailinator.com of course) anytime you want. Give it out first, come here and check it second. It's that easy. Current list of alternate domains for Mailinator (sending email to these domains gets to Mailinator too): 1) mailinator2.com, 2) sogetthis.com, 3) mailin8r.com, 4) mailinator.net, and 5) klassmaster.com. Mailinator™ is a service of Outscheme, Inc., an internet company. Like much internet software it was created out of the frustration over spam. Where Mailinator is truly YASS (yet another spam solution) it approaches the problem a bit differently. First of all, it focuses on only one niche of the

spam problem. However, what it does, it does well. Mailinator solves the problem of handing your email out to just anyone. You've always got a new spam-free email address ready-and-waiting. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Clicmobile - Tools for Connected Communities
http://www.clicmobile.com/
Clicmobile makes and provides tools to build and run connected communities. One of our unique selling points is to provide a mobile extension and location information to communities. Their software allows communities and on-line social networks to extend their services from the PC to the mobile phone. The star of our product portfolio is a Mobile Social Software Platform called Areyouhere. This has been added the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

iqZone - Mobile Service for Creating and Receiving Classified Advertisements
http://www.iqzone.com/
The world's first mobile service for creating and receiving classified ads. Take a photo or video clip of any product, service, or stuff around your house, text a description and upload to iqzone. It's just that simple. iqzone allows anyone with a camera phone to take a photo or video clip of anything to post a classified ad in less than 60 seconds. Sellers can broadcast their mobile ad to a universe of free online classifieds, paid sites and print publications. Buyers can connect with sellers in real-time by setting mobile alerts for items or services they are interested in. They can also search for items using their mobile phone or the web. Established in 2006, iqzone, inc. is a privately held company founded by an experienced team, with a long history of collaboration on consumer solutions development for mobile communications and e-commerce. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Searching the Internet - A Primer `UPDATED`
http://zillman.blogspot.com/2004/09/searching-internet-white-paper.html
I have updated my annotated white paper titled "Searching the Internet" by Marcus P. Zillman, M.S., A.M.H.A. and it is a primer for those new to searching the Internet or those using only one search source. It is freely available as a 14 page .pdf document (819KB) from the above link from the Virtual Private Library™. Update Posted on 06-13-07. Other white papers are available by clicking here.

PressWatch Health News
http://www.presswatch.com/health/
This monitoring service provides daily summaries of health stories appearing in UK national newspapers. Provided on the internet these news items are archived from November 2001 and linked to newspaper homepages but not to the cited news items. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

DiscoveR8 - Life Sciences News, Discoveries, Hypotheses and Procedures
http://www.discover8.com/
DiscoveR8 is a user-driven website dedicated to the dissemination and intelligent discussion of life science news, discoveries, hypotheses, and procedures. Their users are their sources, editors, and peer reviewers. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Electronic Journal of Health Informatics (eJHI)
http://ejhi.net/ojs/index.php/ejhi
The electronic Journal of Health Informatics (eJHI) is an international journal committed to scholarly excellence and dedicated to the advancement of Health Informatics and information technology in healthcare. It is a journal for all health professions and informaticians of all levels. eJHI aims to publish original, high quality papers related to Health Informatics and health informatics technology in a timely fashion. It aims to provide health care workers with a readily accessible, electronic vehicle for sharing information about research, knowledge, experiences, perceptions and wisdom with colleagues involved in all facets of health informatics and health information technology. eJHI is a truly open access journal - it provides open access both for authors (i.e. no publication fee or page charges) and for readers (i.e. free access to all papers). This has been added to the Health Informatics section of Biological Informatics Subject Tracer™ Information Blog.

Cogito - Connecting Youth Thinkers Around the World
http://www.cogito.org/
On Cogito, you can read news and features on topics ranging from global warming and biostatistics to cold fusion and bioethics, and beyond. You can explore the intersection of science and the arts, from computer animation to science fiction. You can find great resources including book reviews, "Best of the Web" guides, and listings and reviews of summer and distance-education programs, internships, and academic competitions. And if you are a member, you can participate in online interviews with experts in various fields and in discussion forums with other members like you. Membership also grants you access to the Cogito virtual library where you can find a wide variety of research materials and a librarian dedicated to helping you. Inspired and funded by the John Templeton Foundation, Cogito is being developed through a collaborative effort by the Johns Hopkins University Center for Talented Youth and eight partners—all highly renowned organizations that serve gifted youth. Other organizations that serve exceptional students, including the sponsors of major math and science competitions and educators that work with students in countries outside of the United States, will be invited to join Cogito as affiliates and to nominate students for membership. This has been added to Student Research Resources Subject Tracer™ Information Blog.

Updated> Knowledge Discovery Resources 2007 `UPDATED`
http://zillman.blogspot.com/2005/03/knowledge-discovery-resources-2006.html
I have updated my Internet MiniGuide Annotated Link Compilation white paper titled "Knowledge Discovery Resources 2007" and is now a 36 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about knowledge discovery available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (871KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-15-07**. Other white papers are available by clicking here.

Open Access Repositories in New Zealand (OARiNZ)
http://www.oarinz.ac.nz/
The CPIT-led Open Access Repositories in New Zealand (OARiNZ) project, funded under the Government's eLearning Collaborative Development Fund (eCDF) will design and build the infrastructure necessary to connect all of New Zealand's digital research repositories that meet standards for interoperability and access. The project targets the three key recommendations from the National Library of New Zealand's Institutional Repositories for the Research Sector report (Rankin, 2005). Drawing on a team of people with a wide range of perspectives and expertise, the project also aims to develop capability and confidence by providing Tertiary Education Institutes with a range of repository implementation options from which to select. Principles underpinning the project include openness of systems/standards, flexibility, sustainability and inclusiveness. This has been added to Research Resources Subject Tracer™ Information Blog. This will be added to Academic Resources Internet MiniGuide.

Planets Project
http://www.planets-project.eu/
The Planets Project brings together European National Libraries and Archives, leading research institutions, and technology companies to address the challenge of preserving access to digital cultural and scientific knowledge. The four year project is funded by the European Commission Information Science and Technolgies Framework Programe 6 Call 5 (FP6 Call 5). This has been added to Research Resources Subject Tracer™ Information Blog.

World Public Library - World's Largest Digital Archive of PDF eBooks and Documents
http://www.worldlibrary.net/
Housed in World Public Library Multi-Terabyte server network is the world's largest digital archive of PDF eBooks and eDocuments. Their collection hosts more than 400,000+ PDF eBooks and eDocuments. As a member you will have complete access to the entire collection. Their collection is constantly growing. THeir projection is to reach 500,000 by fall of 2007. This has been added to tools section of Research Resources

Subjerct Tracer™ Information Blog. This has been added to <u>Reference Resources</u> Subject Tracer™ Information Blog.

Finding Experts By Using the InternetUPDATED
<u>http://zillman.blogspot.com/2004/09/internet-experts-resources-white-paper.html</u>
I have just updated my white paper link compilation on Finding Experts By Using the Internet. This is a 16 page .pdf file (448KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs.

eHow - How To Do Just About Everything
<u>http://www.ehow.com/</u>
What would you like to do? Tie a tie? Kiss on a date? Lose weight? Negotiate a raise? Win Every Time in Monopoly? The eHowTM database of over 35,000 articles can help you. It's the world's most popular place to find clear instructions on how to do just about everything. Every month, over 6 million people visit our site. We have over 35,000 articles that are professionally written with clear and concise directions on how to do things. We also have a rapidly growing library of articles created by eHow's members. We love sharing our knowledge with the world and have created a platform for you to share your knowledge with others. We invite you to become an eHow member, where you'll be able to comment on articles and interact with other members through a robust set of social networking tools. You can even write your own How To articles with our easy-to-use publishing tools that let you express your knowledge through text, images, and video. eHow's community is changing the way people share and learn information. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

Lumosity - Brain Fitness and Memory Improvement
<u>http://www.lumosity.com/</u>
Lumosity is the brain fitness program designed by neuroscientists that is scientifically demonstrated to improve your memory, attention and processing speed. Did you know that the human brain starts slowing down as early as age 30? The good news is that you can speed it up, and improve even your most basic cognitive abilities at any age. Keep your brain performing at its best with Lumosity, the brain fitness program developed by some of the leading neuroscientists in the world. Lumosity beta users have experienced: a) Clearer and quicker thinking, b) Better memory for names, numbers, directions, etc., c) Increased alertness and awareness, d) Elevated mood, and e) Better concentration at work or while driving. This has been added to the tools section of <u>Research Resources</u> Subject Tracer™ Information Blog.

Huddle - Collaboration That Works
http://www.huddle.net/default.asp
Huddle is a network of secure online spaces that combine powerful document, project &
team tools with the simplicity of a social networking site. Huddle is ideal for brands,
advertising, marketing, PR, design, legal & accountancy companies as well as freelancers
& consultants. The huddle concept was developed out of a recognition that despite rapid
advances in technology, individuals and companies are still suffering from a wide range
of problems when working together successfully. huddle combines the simplicity and
'organic' nature of social networks with the power of enterprise-level knowledge,
document and project management tools in a single hosted web-based application;
delivering a unique collaboration and team-working network for small teams and large
companies alike. Huddle is built and managed by Ninian Solutions Ltd, a software
development company based in London, UK. Ninian Solutions Ltd create online
applications using the Microsoft .Net platform. This has been added to the tools section
of Research Resources Subject Tracer™ Information Blog.

Privacy Resources White Paper Link Compilation UPDATED
http://zillman.blogspot.com/2004/09/privacy-resources-white-paper-link.html
I have updated my white paper link compilation titled **Privacy Resources**. It is a now a
22 page comprehensive listing of privacy resources and sources available on the Internet.
The content for my white paper comes from the Privacy Resources Subject Tracer™
Information Blog which is constantly updated. The white paper is freely available from
the above URL and is a 22 page 680KB .pdf. It was updated 06-16-07.

Online Social Networking UPDATED
http://zillman.blogspot.com/2004/09/online-social-networking-internet.html
I have updated my Internet MiniGuide Annotated Link Compilation white paper titled
"Online Social Networking" now a 32 page research paper listing many resources both
new and existing that will help anyone who is attempting to find information and
knowledge research about online social networks available on the Internet. It is freely
available as a .pdf file (.99MB) at the above link from the Virtual Private Library™ and
authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-17-07**. Other white
papers are available by clicking here.

CYCLADES - Open Collaborative Virtual Archive Environment
http://www.ercim.org/cyclades/
CYCLADES is developing an open collaborative virtual archive service environment
supporting both single scholars as well as scholarly communities in carrying out their
work. In particular, it will provide functionality to access large, heterogeneous,
multidisciplinary archives distributed over the Web and to support remote collaboration
among the members of communities of interest. This has been added to the tools section
of Research Resources Subject Tracer™ Information Blog.

PriceInspector
http://www.priceinspector.co.uk/
PriceInspector is a comparison web site that has been designed to aid consumers in the UK. Their technology uses the internet to give you a detailed comparison of products and retailers in order for you to solve your problems in finding the best price on all kinds of different products. PriceInspector does not actually sell any products, they collect information and present the case to you. The site displays products and prices from the traditional high street, and also from other competitive and online retailers that you may not have heard about. Additionally, if you are looking for a store that does not have any products to compare, they have a store directory for you to browse. This has been added to ShoppingBots Subject Tracer™ Information Blog.

Journal of Experimental Zoology Part B: Molecular and Developmental Evolution
http://www3.interscience.wiley.com/cgi-bin/jhome/102521318
Journal of Experimental Zoology Part B: Molecular and Developmental Evolution (MDE) welcomes papers that contribute to a causal understanding of the evolution of development and how development influences patterns of molecular and phenotypic evolution. Papers that take diverse disciplinary approaches, including developmental, molecular, genetic, evolutionary, systematic, ecological, and paleontological, will be published. MDE seeks research articles without page restriction or charges, review articles, invited commentaries, and book reviews. The Editor-in-Chief has discretion over the use of a number of free color plates. Only color illustrations that highlight the text and convey essential scientific information will be considered for reproduction free of charge, subject to the recommendations of the reviewers and Associate Editors.

Nozbe - Getting Things Done
http://www.nozbe.com/
Clear your head, put your stuff into Nozbe and focus on what's next. Add your tasks and notes to Nozbe quicker than you would do it on paper. You can add one or many tasks at a time (or import tasks from excel or other programs). Organize your tasks and notes into projects, move items between projects and get your stuff structured and ready for processing! Focus on your next action. Don't think about 10 things at a time. Just "star" any task as your next action and process your next actions from all your projects in one list. Start processing your tasks and stay organized and focused. Use contexts (Home, Office, Phone, Internet...)to process your tasks even faster. When you're in a mood (or context) do all the related tasks now! Keep all the related data together. Attach files to projects with one simple click to keep all your project-related info together. Everything will be at a glance! Nozbe for Paper (tm) - a unique way of printing your projects, contexts and next actions lists into three ultra-portable formats: Wallet, Pocket and A4 sheet. You will be more productive every day....Day by day. Don't do everything yourself just Work in teams. Collaborate...It's so easy in Nozbe. Just share your projects with others and work on stuff together. Built using the latest Web 2.0 technologies to save you time - drag and drop to reorder, and really quick to edit and add actions. Michael Sliwinski - founder of Nozbe will guide you through the whole process and answer any

questions you might have....personally. This has been added to the tools section of Research Resources SubjectTracer™ Information Blog.

BookMooch - Exchange and Trade Books
http://www.bookmooch.com/
BookMooch is a community for exchanging used books. BookMooch lets you give away books you no longer need in exchange for books you really want. Give & receive: Every time you give someone a book, you earn a point and can get any book you want from anyone else at BookMooch. Once you've read a book, you can keep it forever or put it back into BookMooch for someone else, as you wish. There is no cost to join or use this web site: your only cost is mailing your books to others. Points for entering books: you receive a tenth-of-a-point for every book you type into our system, and one point each time you give a book away. In order to keep receiving books, you need to give away at least one book for every five you receive. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

BioResources
http://ncsu.edu/bioresources/
BioResources is a Peer-Reviewed Online Journal Devoted to the Science and Engineering of Biomass from Lignocellulosic Sources for New End Uses and New Capabilities. Science and engineering of biomass from lignocellulosic sources for new end uses and new capabilities; examples include advances in wood science, new uses of crop residues, biofuels, biocomposites, papermaking, and chemical production that is based on plant material that contains substantial amounts of cellulose or lignin. The journal scope does not include consideration of articles mainly dealing with waste remediation, food, pharmaceuticals (except as derived form Lignocellulosic sources), and soils. This has been added to BioTechnology Resources Subject Tracer™ Information Blog.

MAKE - Technology On Your Time (MakeZine)
http://www.makezine.com/
MAKE brings the do-it-yourself mindset to all the technology in your life. MAKE is loaded with exciting projects that help you make the most of your technology at home and away from home. This is a magazine that celebrates your right to tweak, hack, and bend any technology to your own will. Published as a quarterly since February 2005, MAKE is a hybrid magazine/book (known as a mook in Japan). MAKE comes from O'Reilly, the Publisher of Record for geeks and tech enthusiasts everywhere. It follows in line with the Hacks books and Hardware Hacking Projects for Geeks, but it takes a highly visual and personal approach. Their premiere issue showed you how to get involved in kite aerial photography — taking pictures with a camera suspended from a kite — and how to build an inexpensive rig to hold your camera. They have also shown you how to make a video camera stabilizer, a do-it-yourself alternative to an expensive Steadicam® and how to create a five-in-one cable adapter for connecting to networks. Some projects

are strictly for fun, others are very practical, and still others are absolutely astounding. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

YaCy - Distributed P2P Based Web Indexing and Anonmymous Search Engine
http://www.yacy.net/yacy/
YaCy is a peer-to-peer application for web search. This is your web search engine for freedom of information: search requests are anonymous, independend and uncensored. No central server and no storage of user behaviour. YaCy can be used as your own private search engine or set up a search portal. Use YaCy to provide a search function for your own web pages. Host web pages with the built-in http-server. YaCy is GPL licensed free software. This has been added to Privacy Resources Subject Tracer™ Information Blog. This has been added to the P2P section of Deep Web Research Subject Tracer™ Information Blog.

WayPath - Blog Discovery Engine
http://www.waypath.com/
WayPath is a Blog Discovery Engine that lets you find new blogs you want to read. Use Waypath to hear the voices that matter to you among the millions in the blogosphere. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Knowledge Discovery Subject Tracer™ Information Blog. This has been added to Bots, Blogs and News Aggregators Resources Page.

TheFind.com - Shopping Search Reinvented
http://www.TheFind.com/
TheFind.com debuted in October 2006 as a discovery shopping search engine that delivers a comprehensive, relevant and visually compelling shopping experience optimized for lifestyle products. Unlike traditional comparison shopping sites, TheFind.com provides the largest product selection emphasizing leading styles, brands and stores and the ability to browse and search for similar items. TheFind.com crawls the entire Web, using its "Product Ranking Engine" technology to rank more than 170 million products from more than 500,000 stores. The result is that any search will return custom-catalog results where consumers can search-to-browse and intelligently navigate the web's massive product offerings. This has been added to ShoppingBots Subject Tracer™ Information Blog.

News To Watch - Discover, Visualize and Embed the News
http://www.newstowatch.com/
Newstowatch.com is a breaking news discovery service that automatically reads thousands of breaking news stories a minute and intelligently extracts and displays meaningful stories and concepts from around the world. Beyond simply discovering important breaking news, Newstowatch.com also introduces a visualization and syndication component that presents intelligent news clouds and color rich graphs that can be embedded on any web page. Every Newstowatch.com breaking news component

can be copied and pasted to any third party website, blog or social network including MySpace, MyYahoo, iGoogle and other popular web communities. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Knowledge Discovery Subject Tracer&tradel Information Blog.

Updated> Bots, Blogs and News Aggregators White Paper Link Compilation `UPDATED`
http://zillman.blogspot.com/2004/09/bots-blogs-news-aggregators-white.html
I have updated my research white paper link compilation titled "Bots, Blogs and News Aggregators" which is now a 23 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf file (1.98MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-21-07**.

StockPickr - Free Stock Recommendation Site
http://www.stockpickr.com/
StockPickr is a free stock recommendation site that allows you to receive automated stock recommendations from thousands of portfolios, both professional and amateur, with a similar make-up to yours. Just enter your favorite stocks and within seconds you will receive new recommendations based on matching your portfolio with the thousands of hedge funds, mutual funds and other peer portfolios that have a similar composition. It also allows you to network, research and discover new great ideas in the financial market arena every day! This has been added to Financial Sources Subject Tracer™ Information Blog.

Cooperative Association for Internet Data Analysis (CAIDA)
http://www.caida.org/
CAIDA, the Cooperative Association for Internet Data Analysis, provides tools and analyses promoting the engineering and maintenance of a robust, scalable global Internet infrastructure. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Mvelopes Personal - Online Home Budgeting System
http://www.mvelopes.com/
Mvelopes Personal is an award-winning online home budgeting system that helps you look to the future and manage your spending accordingly. With Mvelopes you can quickly and easily create an online home budget, track all your spending, and always know exactly how much you have left to spend. Financial freedom doesn't come from having a large income, instead it comes from managing the money that you earn. Whether you are doing money management for your personal or family budget Mvelopes will help you achieve financial freedom. This has been added to Financial Sources Subject Tracer™ Information Blog.

DataMiningGrid Consortium
http://www.datamininggrid.org/
The Data Mining Tools and Services for Grid Computing Environments
(DataMiningGrid) Consortium is developing tools and services for deploying data mining
applications on the grid. Future and emerging complex problem-solving environments are
characterised by increasing amounts of digital data and rising demands for coordinated
resource sharing across geographically dispersed sites. Next generation grid technologies
are promising to provide the necessary infrastructure facilitating seamless sharing of
computing resources. Currently there exists no coherent framework for developing and
deploying data mining applications on the grid. The DataMiningGrid project addresses
this gap by developing generic and sector-independent data-mining tools and services for
the grid. To demonstrate the developed technology, the project implemented a range of
demonstrator applications in e-science and e-business. This has been added to Grid
Resources Subject Tracer™ Information Blog. This has been added to Data Mining
Resources Subject Tracer™ Information Blog.

GridMiner - Intelligent Grid Solutions
http://www.gridminer.org/
Computational Grids, federations of geographically distributed heterogeneous hardware,
software, databases, and other resources, are emerging in academia, between international
research labs and within commercial organizations. Built on the Internet and the World
Wide Web, the Grid is considered as a new class of infrastructure for 21st century science
and business. The proposed project aims to extend the state-of-art Grid technology to a
completely new and societally important category of applications. It will develop and
thoroughly evaluate the novel concepts of knowledge discovery in databases and other
large data sets attached to the Grid. The project focuses its effort on data mining and On-
Line Analytical Processing (OLAP), two complementary technologies, which, if applied
in conjunction, can provide a highly efficient and powerful data analysis and knowledge
discovery solution on the Grid. These two technologies will be investigated and
experimentally implemented within a novel infrastructure called GridMiner, which will
be built on top of services developed by other Grid projects. Parallel and distributed
query evaluation and optimization techniques, like OLAP aggregation and query results
caching, will be extended and adapted to this environment to guarantee high performance
and good scalability even for very large data sets as they commonly occur in large-scale
scientific and commercial applications. This has been added to Grid Resources Subject
Tracer™ Information Blog.

SocialEngine - Social Network Creation Platform
http://www.socialengine.net/
SocialEngine is a PHP-based social network platform that lets you create a social
network on your website. Right out of the box, your social network will offer nearly all of
the features found on today's wildly popular social networks. Unlike other social network
apps, you are given absolute control over the appearance and structure of your social
network. This has been added to Social Informatics Subject Tracer™ Information Blog.

Web Data Extractors `UPDATED`
http://zillman.blogspot.com/2004/09/web-data-extractors.html
I have updated my research white paper link compilation titled "Web Data Extractors" a 13 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about web data extraction on the Internet. It is freely available as a .pdf file (530KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-25-07**. Other white papers are available by clicking here.

Local Harvest Resources
http://www.localharvest.org/
The best organic food is what's grown closest to you. Use their website to find farmers' markets, family farms, and other sources of sustainably grown food in your area, where you can buy produce, grass-fed meats, and many other goodies. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Tree of Life Web Project (ToL)
http://tolweb.org/
The Tree of Life Web Project (ToL) is a collaborative effort of biologists from around the world. On more than 5000 World Wide Web pages, the project provides information about the diversity of organisms on Earth, their evolutionary history (phylogeny), and characteristics. Each page contains information about a particular group of organisms (e.g., echinoderms, tyrannosaurs, phlox flowers, cephalopods, club fungi, or the salamanderfish of Western Australia). ToL pages are linked one to another hierarchically, in the form of the evolutionary tree of life. Starting with the root of all Life on Earth and moving out along diverging branches to individual species, the structure of the ToL project thus illustrates the genetic connections between all living things. This has been added to Biological Informatics Subject Tracer™ Information Blog.

**July 2007 Zillman Column - Healthcare Resources On the Internet**
http://columns.VirtualPrivateLibrary.net/Healthcare_Resources_July07_Column.pdf
http://www.zillmancolumns.com
The July 2007 Zillman Column is now available and is titled **Healthcare Resources On the Internet**. This July 2007 column is a comprehensive list of healthcare resources on the Internet including associated and related online sources. Discover the resources and tools including search engines, bots, indices and subject guides to obtain the latest healthcare information available on the Internet. Download this excellent 23 page free .pdf (573KB) column today.

Opportunity Alert for Digital Media Partnership Opportunities
http://www.opportunityalert.ca/
Opportunity Alert is a matchmaking service for digital media companies seeking partnership opportunities. Opportunity Alert provides a forum where companies can present their projects, search for the best business partners, and begin a discussion with

companies from around the world. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been add to Business Intelligence Resources Subject Tracer™ Information Blog.

GeoTools
http://geotools.codehaus.org/
GeoTools is an open source (LGPL) Java code library which provides standards compliant methods for the manipulation of geospatial data, for example to implement Geographic Information Systems (GIS). The GeoTools library implements Open Geospatial Consortium (OGC) specifications as they are developed, in close collaboration with the GeoAPI and GeoWidgets projects. The capabilities of Geotools are presented in the feature list. Geotools is used by a number of projects including Web Feature Servers, Web Map Servers, and desktop applications, as is described on this page. Some screenshots of Geotools in action are also available. Programmers wishing to use GeoTools in their own applications can get more information from the Use page and the User Guide. Developers wishing to extend the GeoTools library can get started on the Develop page and the Developer Guide. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

International Journal of Intelligent Information and Database Systems (IJIIDS)
http://www.inderscience.com/browse/index.php?journalCODE=ijiids
Intelligent information systems and intelligent database systems are a very dynamically developing field in computer sciences. IJIIDS provides a medium for exchanging scientific research and technological achievements accomplished by the international community. It focuses on research in applications of advanced intelligent technologies for data storing and processing in a wide-ranging context. The issues addressed by IJIIDS involve solutions of real-life problems, in which it is necessary to apply intelligent technologies for achieving effective results. The emphasis of the reported work is on new and original research and technological developments rather than reports on the application of existing technology to different sets of data. IJIIDS is a double-blind refereed and authoritative reference dealing with working and potential intelligent database systems theories and applications as well as emerging issues of interest to professionals and academics.

The Codehaus - Opensource Project Repository
http://codehaus.org/
The Codehaus is an open-source project repository with a strong emphasis on Java, focussed on quality components that meet real world needs. They believe in open source as a pragmatic approach to software development, and all their projects are business-friendly in terms of licensing. This has been added to Script Resources Subject Tracer™ Information Blog.

Business Intelligence Online Resources `UPDATED`
http://zillman.blogspot.com/2005/04/business-intelligence-online-resources.html
I have updated my Internet Annotated Link Compilation white paper titled "Business Intelligence Online Resources" .... a 24 page research paper listing selected resources both new and existing for online business intelligence. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (758KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-25-07**. Other white papers are available by clicking here.

Current Awareness Discovery Tools on the Internet `UPDATED`
http://zillman.blogspot.com/2004/09/current-awareness-discovery-tools-on.html
I have updated my research white paper titled "Current Awareness Discovery Tools on the Internet" which is a 22 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about current awareness discovery tools available on the Internet. It is freely available as a .pdf file (1.30MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-26-07**. Other white papers are available by clicking here.

**LibGuides - Web 2.0 Library Knowledge Sharing System**
http://www.springshare.com/libguides/
LibGuides is a web 2.0 library knowledge sharing system. Think of it as social networks meets wikis meets bookmarks meets blogs. And it cooks your breakfast too! LibGuides helps librarians share knowledge and information, while highlighting and promoting the library resources and services to the community. LibGuides is a system for publishing information and creating social networks centered around the library resources. Librarians create Guides (we use the word loosely - it can be any content, on any topic, for any purpose) and then publish them online. The Guides contain documents, links, podcasts, rss feeds, videos, etc. Users can participate in interactive polls and rate the links and resources. The system supports tagging of content. The homepage displays the tag cloud listing the most popular tags, and the most recent content published. LibGuides delivers relevant information to patrons, while encouraging them to browse the library resources via tags and subject keywords. LibGuides helps you share knowledge and build relationships with your customers. And it makes you look good in the process. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Knowledge Discovery Subject Tracer™ Information Blog.

LibMarks - Social Bookmarking and Tagging Application for Libraries
http://www.springshare.com/libmarks/
LibMarks is a social bookmarking and tagging application designed for libraries. The system promotes user access to library resources by enabling them to tag and bookmark items from the library catalog, online databases, and the internet. Users can save all their bookmarks online, share lists and links with others, research topics of interest, and

discover new and interesting resources available at the library and beyond. LibMarks brings the power of collaborative search and social bookmarking to your library, enabling your users to benefit from the "collective wisdom" of the entire community. LibMarks is a fully-featured bookmarks manager similar to a site like del.icio.us® , but customized for your institution. Users can group bookmarks for a specific project or a task (lists), and publicly share their lists with others or keep them private for personal use. Bookmarks can be tagged with keywords, described with notes, and rated using the star-rating system (1 to 5 stars). LibMarks includes features like tag clouds, the most popular and most recent links added, and the most active users. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

HFSP Journal - Frontiers of Interdisciplinary Research in the Life Sciences
http://hfspj.aip.org/
The HFSP Journal aims to publish high quality, innovative interdisciplinary basic research at the frontier of biology over a wide range of organizational levels (from the molecular level to population biology) using principles strategies or technologies from the more quantitative disciplines (e.g. physics, chemistry, mathematics, engineering, or informatics). This has been added to Biological Informatics Subject Tracer™ Information Blog.

iThenticate - Protect, Manage and Verify Content
http://www.ithenticate.com/
iThenticate is a proven tool that gives publishers, corporations, law firms, and others the power to check the originality of documents and manuscripts instantly. It also allows these entities to find out if any of their current intellectual property is being misappropriated somewhere on the internet. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Healthcare Bots and Subject Directories UPDATED
http://zillman.blogspot.com/2005/05/healthcare-bots-and-subject.html
I have updated my Internet MiniGuide White Paper Link Compilation titled "Healthcare Bots and Subject Directories" which is now a 23 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about healthcare search engines and subject directories available on the Internet. It is freely available as a .pdf file (577KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-26-07**. Other white papers are available by clicking here.

Online Research Browsers UPDATED
http://zillman.blogspot.com/2004/10/online-research-browsers-internet.html
I have updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Research Browsers" a 17 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge

research about online research browsers available on the Internet. These research browsers allow you to visualize information to find new relationships and associations to create knowledge discovery and obtain new and highly relevant research data. It is freely available as a .pdf file (266KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **06-26-07**. Other white papers are available by clicking here.

Awareness Watch™ Paper Review

Ethical and economic issues surrounding freely available images found on the Web
by Eric Lease Morgan
http://firstmonday.org/issues/issue11_7/morgan/index.html

Abstract:
By reverse engineering Google queries and by tracing back the referrer values found in Apache log files, the use of images made available from infomotions.com is examined. Ethical and economic questions questions are then asked. While all the images from the site are "freely" available under the GNU Public License, they are not always used in the intended manner. This raises interesting questions regarding the time spent making the images available, the expense of the hardware and network connections, and whether or not the application of the images is put to good and moral purposes. This essay addresses these questions in an attempt to come to an understanding regarding the place of data, information, and knowledge in an "open" environment.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest sources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
