

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V6N1

January 2008

Welcome to the V6N1 January 2008 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report will be highlighting my **Knowledge Discovery Resources 2008** Internet MiniGuide Annotated Link Compilation. These resources are constantly updated on the *Knowledge Discovery Resources* Subject Tracer™ Information Blog available at the following URL:

<http://www.KnowledgeDiscovery.info/>

These resources and sites bring you the latest information and happenings in the area of Knowledge Discovery on the Internet and allow you to expand your knowledge both in discovery as well as connected and associated Internet links.

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>

Knowledge Discovery Resources 2008

An Internet MiniGuide Annotated Link Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

This Internet MiniGuide Annotated Link Compilation is dedicated to the latest and most competent resources for knowledge discovery available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key is to be able to find the important knowledge discovery resources and sites both in the visible and invisible World Wide Web. The following selected knowledge discovery resources and sites offer excellent knowledge and information discovery sources to help you accomplish your research goals! Also visit the very latest resources on Knowledge Discovery at the following Subject Tracer™ Information Blog.

<http://www.KnowledgeDiscovery.info/>

ACM SIGKDD: Current Explorations Issue

<http://www.acm.org/sigs/sigkdd/explorations/issue.php?issue=current>

Explorations is published twice yearly, in June/July and in December/January each year. The newsletter is distributed in hardcopy form to all members of the ACM SIGKDD. It is also sent to ACM's network of libraries. Online versions are available on the web free to the general public. Their goal is to make the SIGKDD Newsletter an informative, rapid means of publication and dynamic forum for communication with the Knowledge Discovery and Data Mining community.

Advanced Knowledge Technologies

<http://www.aktors.org/>

The Advanced Knowledge Technologies (AKT) project aims to develop and extend a range of technologies providing integrated methods and services for the capture, modelling, publishing, reuse and management of knowledge. AKT is a multi-million pound, six year collaboration between internationally recognized research groups at the Universities of Aberdeen, Edinburgh, the Open University, Sheffield and South Hampton.

APECKS: a Tool to Support Living Ontologies

<http://ksi.cpsc.ucalgary.ca/KAW/KAW98/tennison/index.html>

Ontology servers are currently under-developed in terms of the support they provide for collaborative activities on their content. This paper presents the APECKS (Adaptive Presentation Environment for Collaborative Knowledge Structuring) system, an ontology server which supports collaboration by allowing individuals to create personal ontologies. These ontologies can be compared with others' to prompt discussion about the sources of their differences and similarities.

Association of KnowledgeWork (AOK)

<http://www.kwork.org/index.html>

At the Association of KnowledgeWork, people from every specialty cross professional, geographic, cultural, economic and hierarchical barriers to learn together. Not just another website, this is a virtual home for those who work with knowledge.

BAYESIA: Bayesian Networks and Data Mining Tool

<http://www.bayesia.com/GB/products/bLab/BlabPresentationDM.php>

The Bayesian Network approach merges and supersedes existing approaches coming from Artificial Intelligence and Data Mining, both symbolic and statistical ones. Bayesian Networks are rigorously justified, provide a distributed knowledge representation, and are as understandable as a rule base. They deal particularly well with uncertainty, and they can be manually generated by consultation of an expert, or inductively built by machine learning.

Bibliomining Information Center - Data Mining for Libraries

<http://www.bibliomining.com/> The basic definition is "*data mining for libraries.*" For years, bibliometrics has been used to track patterns in authorship, citation, etc. Today, there are many more tools available for discovering similar patterns in complex datasets from data mining and statistics. In addition, tools from management science such as Online Analytical Processing (OLAP) can be used to explore the data for patterns. Therefore, a more complex definition is: Bibliomining is the combination of data mining, bibliometrics, statistics, and reporting tools used to extract patterns of behavior-based artifacts from library systems

Brint.com - Business Technology - Information Economy - Knowledge Management

<http://km.brint.com/>

KMNetwork and the WWW Virtual Library of Knowledge Management combined to bring together an excellent resource for research papers and portals on knowledge management and discovery. In depth research articles and research portals from over the entire global Internet discuss the business, technologies, processes, systems, sociology, creativity, psychology and philosophy of Knowledge Management.

Awareness Watch V6N1 January 2008 Newsletter

Center for Automated Learning and Discovery (CALD)

<http://www.cs.cmu.edu/~cald/>

The Center for Automated Learning and Discovery (CALD) is an academic department within Carnegie Mellon University's School of Computer Science. They focus on research and education in all areas of statistical machine learning. To tackle these problems they develop algorithms that discover general conjectures and knowledge from specific data and experience, based on sound statistical and computational principles. They also develop theories of learning processes that characterize the fundamental nature of the computations and experience sufficient for successful learning in machines and in humans.

Creative Commons RDF-Enhanced Search

<http://search.creativecommons.org/index.jsp>

This search engine will help you find photos, music, text, books, educational material, and more that is free to share or build upon. Copyright applies fully and automatically to any work. a photograph, a song, a web page, an article, pretty much any form of expression, the moment it is created. This means that if you want to copy and re-use a creative work you find online, you usually have to ask the author's permission. This "all rights reserved" protection is good thing for many authors and artists. But what about those who want you to use their work freely without permission -- but on certain conditions? This search engine helps you quickly find those authors and the work they have marked as free to use with only "some rights reserved." If you respect the rights they have reserved (which will be clearly marked, as you'll see) then you can use the work without having to contact them and ask. In some cases, you may even find work in the public domain -- that is, free for any use with "no rights reserved."

Conceptual Graphs

<http://www.cs.uah.edu/~delugach/CG/>

Conceptual graphs (CGs) are a system of logic based on the existential graphs of Charles Sanders Peirce and the semantic networks of artificial intelligence. They express meaning in a form that is logically precise, humanly readable, and computationally tractable. With their direct mapping to language, conceptual graphs serve as an intermediate language for translating computer-oriented formalisms to and from natural languages. With their graphic representation, they serve as a readable, but formal design and specification language. CGs have been implemented in a variety of projects for information retrieval, database design, expert systems, and natural language processing.

D2K - Data To Knowledge

<http://alg.ncsa.uiuc.edu/do/tools/d2k>

D2K - Data to Knowledge is a rapid, flexible data mining and machine learning system that integrates analytical data mining methods for prediction, discovery, and deviation detection, with data and information visualization tools. It offers a visual programming environment that allows users to connect programming modules together to build data

Awareness Watch V6N1 January 2008 Newsletter

mining applications and supplies a core set of modules, application templates, and a standard API for software component development.

Data Mining and Knowledge Discovery in Databases

<http://db.cs.sfu.ca/sections/publication/kdd/kdd.html>

This is an archive of frequently accessed papers on Data Mining and Knowledge Discovery in Databases. Other links include: Spatial and Multi-Media Databases, Deductive and Object-Oriented Databases, MSc. and Ph.D. Theses Related to Data Mining and Database Systems, Conference or Workshop Presentation Slides and Other Papers on KDD.

Data Mining and Knowledge Discovery (KDD) Journal

<http://snipurl.com/dgu9>

Data Mining and Knowledge Discovery in Databases (KDD) is a rapidly growing area of research and application that builds on techniques and theories from many fields, including statistics, databases, pattern recognition and learning, data visualization, uncertainty modelling, data warehousing and OLAP, optimization, and high performance computing. KDD is concerned with issues of scalability, the multi-step knowledge discovery process for extracting useful patterns and models from raw data stores (including data cleaning and noise modelling), and issues of making discovered patterns understandable.

Data Mining Resources

<http://www.DataMiningResources.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring data mining resources and sites on the Internet.

Data Mining : White Papers, Webcasts and Product Information

http://www.bitpipe.com/data/rlist?t=itmgmt_10_40_96

Research the latest Data Mining technologies, tools and techniques. Read white papers, case studies, webcasts and product information from multiple vendors .

Deep Web Research 2008

<http://zillman.blogspot.com/2007/12/llrx-november-2007-issue-deep-web.html>

Web search guru **Marcus P. Zillman's** guide extensively documents resources that include articles, books, websites, presentations, search engines, and technology applications that facilitate the challenging task of accessing information, published in many formats, that encompass the hundreds of millions of pages comprising the "deep web."

DigiCULT Resources - Resource Discovery & Information Retrieval

<http://www.digicult.info/pages/resources.php?t=21>

An excellent resource listing of resource discovery and information retrieval resources, sources, sites and tools that will definitely aid the researcher in knowledge discovery. This DigiGULT page is updated frequently with the latest resources and tools.

Explore Open Archives

<http://opcit.eprints.org/exploearchives.shtml>

This site lists and comments on other lists of individual open archives. This list and its categorisation gives a broad overview of the structure, size and progress of full-text open access eprint archives. This list will be maintained and updated as far as is possible, and is intended to assist further quantitative research on the open access eprint phenomenon for those who want to measure the growth and quality of open access eprint archives.

GeneMiner

<http://www.kdiscovery.com/gm-index.htm>

GeneMiner is an intelligent data mining tool designed to capitalize on the automatic search and optimization capabilities of genetic algorithms, ploughs through raw data and churns out valuable knowledge in the form of textual rules for a wide variety of business and financial applications that need automated decision making with explanation capabilities. Genetic algorithms is a revolutionary, Artificial Intelligence technology that lets users build applications directly upon the knowledge contained in data.

Global Knowledge Partnership (GKP)

<http://www.globalknowledge.org/>

The Global Knowledge Partnership (GKP) is a worldwide network committed to harnessing the potential of information and communication technologies (ICTs)* for sustainable and equitable development. GKP's vision is a world of equal opportunities where all people can access and use knowledge and information to improve their lives. The network enables the sharing of information, experiences and resources to help reduce poverty and empower people.

GMDH - Group Method of Data Handling

<http://come.to/GMDH>

Group Method of Data Handling was applied in a great variety of areas for data mining and knowledge discovery, forecasting and systems modeling, optimization and pattern recognition. Inductive GMDH algorithms give possibility to find automatically interrelations in data, to select optimal structure of model or network and to increase the accuracy of existing algorithms. This original self-organizing approach is substantially different from deductive methods used commonly for modeling. It has inductive nature - it finds the best solution by sorting-out of possible variants.

Gurteen Knowledge Website

<http://www.gurteen.com/>

This site acts as a gateway Knowledge Management, Learning, Thinking, Creativity, Personal Mastery; Personal Knowledge Management and the effective use of Technology. The site has been created by and maintained by David Gurteen an UK-based knowledge consultant.

Google™ Directory – Knowledge Discovery

http://directory.google.com/Top/Reference/Knowledge_Management/Knowledge_Discovery/

Google's directory of Knowledge Discovery resources on the world wide web in the following categories: 1) Books, 2) Business and Companies, 3) Data Mining, 4) Information Visualization, 5) Magazines and eZines, 6) OLAP, 7) Organizations, 8) Software, and 9) Test Mining.

IBM Research - Knowledge Discovery & Data Mining (KDD)

<http://www.research.ibm.com/compsci/kdd/>

IBM Research has been at the forefront of the exciting new area of Knowledge Discovery & Data Mining (KDD) from the very beginning. Key advances in robust and scalable data mining, methods for fast pattern detection from very large databases, text and web mining, and innovative business intelligence applications have come from our research laboratories. Links to their current projects as well as KDD links are available from this site.

IKNOW (Inquiring Knowledge Networks on the Web)

<http://www.spcomm.uiuc.edu/Projects/TECLAB/IKNOW/>

IKNOW helps an organization by putting in place a mapping, visualization, and measurement system that can help organizations to study the patterns of knowledge and information flow through an organization's informal network. This, in turn, can help enhance an organization's capability to identify critical patterns of knowledge distribution and information flow, and thus, more effectively manage these knowledge assets. IKNOW provides the focus associated with mapping, measurement and visualization of knowledge networks and combines it with the power of structured collaboration. Further its ability to run on many popular Web platforms enhances its ease of use.

Insightful Miner 3

<http://www.insightful.com/products/iminer/default.asp>

Insightful Miner is a highly scalable data mining and analysis workbench that gives new analysts and skilled modelers the ability to deploy predictive intelligence throughout the enterprise. Insightful Miner 3 increases support for large data environments with new versions for Windows and Solaris servers and adds many new features that allow data analysts and data miners to easily build and deploy analytic applications that boost product performance and improve the efficiency of critical business processes.

IntelligentKM Feature - Extracting Knowledge

<http://www.intelligentkm.com/feature/010507/feat1.shtml> Information extraction (IE) technology employs advanced machine learning, or artificial intelligence (AI) techniques, to help aggregate and integrate Web content. Working in conjunction with information retrieval and organization tools, automated extraction is a powerful means of finding content on the Web. While IE is not a stand-alone application, it is a key part of any knowledge management (KM) strategy.

Intelligent Portals

<http://www.intelligent-portals.com/>

They provide targeted, in-depth information and advice, unavailable anywhere else, about the management strategies, IT architectures, and products involved. Management and technology issues pertaining to business intelligence (OLAP, data mining, and reporting), data warehousing, customer relationship management (CRM), data and application integration, knowledge management, and scalable e-business are the bread and butter of our editorial coverage. These issues directly pertain to the transformation of corporate information into strategic knowledge for business gain. Communities included: Intelligent Performance, IntelligentCRM, Intelligent Applications, and Intelligent Integration.

International Workshop on Peer-to-Peer Knowledge Management (P2PKM)

<http://www.p2pkm.org/>

The P2PKM workshop is intended to serve as an active forum for researchers and practitioners, where they will have the possibility to exchange and discuss novel ideas, research results and experiences, laying in the intersection of the P2P, Knowledge Management (KM), Semantic Web, databases, pervasive computing, agents, as well as other related fields.

ITtoolbox Knowledge Management – Knowledge Management Information and Tools

<http://knowledgemanagement.ittoolbox.com/> A comprehensive site for Knowledge Management and Discovery Resources including browse by type of content: Blogs, FAQs, Groups, Jobs, News, Peer Publishing, PR, Research and White Papers. Also available browse by Knowledge Management Topic: Business Intelligence, Business Strategy/Planning, Communication/Collaboration, Data Warehousing, Document/Content Management, e-Learning, Enterprise Portals, General Knowledge management, KM Career, Knowledge Transfer, and Packaged KM Suites.

KBL(sm): A Registry of Library Knowledge Bases

<http://www.public.iastate.edu/~CYBERSTACKS/KBL.htm>

Library-created or library-related Knowledge Bases. A Knowledge Base / Knowledgebase may be defined as a database with a focus on empirical or practical knowledge. In recent years, Knowledge bases have become common components for many businesses and services.

K-CAP2005 - Third International Conference on Knowledge Capture

<http://www.kcap05.org/>

Areas covered: Knowledge engineering and modeling methodologies, Mixed-initiative planning and decision-support tools, Acquisition of problem-solving knowledge, Programming-by-demonstration systems, Knowledge management environments, Knowledge-based markup techniques, Knowledge extraction systems, Knowledge acquisition tools, Advice taking systems, and Learning apprentice.

K-Collector

<http://www.evectors.com/itkcollector/home>

k-collector is an enterprise knowledge aggregator that leverages the power of social software, weblogs and shared topics to present new ways of finding and combining the real knowledge in your organization.

KDD-2008: The Twelfth ACM SIGKDD International Conference on Knowledge Discovery and Data Mining

<http://www.acm.org/sigs/sigkdd/kdd2008/>

During the past years, the ACM SIGKDD conference has established itself as the premier international conference on knowledge discovery and data mining with an attendance of 600-900 people. To continue with this tradition, the thirteenth ACM SIGKDD conference will provide a forum for researchers from academia, industry, and government, developers, practitioners, and the data mining user community to share their research and experience. The SIGKDD conference will feature keynote presentations, oral paper presentations, poster presentations, workshops, tutorials, and panels, as well as the KDD Cup competition. KDD-2008 will also award scholarships to selected students to help defray the cost of participating in the conference. Details will appear on the conference Web site as they become available.

KDnuggets: Data Mining, Web Mining, and Knowledge Discovery Guide

<http://www.kdnuggets.com/>

KDnuggets.com (KD stands for Knowledge Discovery) is the leading source of information on Data Mining, Web Mining, Knowledge Discovery, and Decision Support Topics, including News, Software, Solutions, Companies, Jobs, Courses, Meetings, Publications, and more. KDnuggets News has been widely recognized as the leading newsletter on Data Mining and Knowledge Discovery.

KmBlogger

<http://www.voght.com/cgi-bin/pywiki?KmBlogger>

A resource covering site, resources, communities and related information about the relationship between blogs and knowledge management and knowledge discovery.

Awareness Watch V6N1 January 2008 Newsletter

Know-Center - Austria's Competence Center for Knowledge Management

<http://www.know-center.at>

The Know-Center is Austria's Competence Center for knowledge-based Applications and Systems. The Know-Center has its core competences in the fields of information technology as enabling technologies for knowledge management and in human-oriented knowledge management.

Knowledge Discovery

<http://www.KnowledgeDiscovery.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring knowledge discovery resources and sites on the Internet.

Knowledge Harvesting

<http://www.KnowledgeHarvesting.org/>

Knowledge Harvesting is used to rapidly convert top-performer expertise into knowledge assets that enhance corporate valuation and protect the organization from knowledge degradation. The purpose of this site is to offer an extensive introduction to Knowledge Harvesting.

Knowledge Harvesting - KM Toolkit

http://www.nelh.nhs.uk/knowledge_management/km2/harvesting_toolkit.asp

A detailed explanation of knowledge harvesting by the National Electronic Library for Health including a toolkit that offers step by step implementation of knowledge harvesting and a list of resources and references.

Knowledge Management: A Guide to Resources on the Internet by Michael M. Smith

<http://snipurl.com/5i2z>

Knowledge Management (KM) is one of many important topics being addressed by companies in today's complex business environment. There are many excellent resources on the Internet addressing the many aspects of KM. The resources listed in this guide offer a wide variety of information on KM provided by academic/research organizations, information portals, consultants, and governmental and nonprofit organizations.

Knowledge Management Cluster Web

<http://www.kmcluster.com/>

KMCluster focus is knowledge management (KM). Focus is also on the key KM techniques of enterprise collaboration (EC), organizational learning (OL), communities of practice (CP), social networks (SN), intellectual capital (IC), complexity science (CS), content management (CM), measurement & metrics (MM), policy & procedures (PP), innovation & invention (II) and analytics & taxonomies (AT).

Knowledge Management Magazine – Inside Knowledge

<http://www.kmmagazine.com/>

The original knowledge management publication. The knowledge that exists within your organisation is your only sustainable source of competitive advantage. They believe this makes knowledge management a strategic imperative for you. Each issue of *Inside Knowledge* is designed to provide you with the information you require to: 1) Learn from the mistakes and success stories of others, 2) Lower business costs and increase productivity across your organization, 3) Ensure the ongoing professional development of yourself and your colleagues, and 4) Keep on top of industry developments, new techniques and tools for knowledge management and knowledge discovery.

Knowledge Management Research Center - CIO

<http://www.cio.com/research/knowledge/>

Making the most of intellectual capital. Topics in the Knowledge Management Research Center include: 1) Overview, 2) Strategy, 3) Process, 4) Measurement, 5) Technology, 6) Portal and Collaboration, 7) In the Know, 8) Case Studies, 9) Metrics, 10) CIO Radio, 11) Q&A, 12) Books, 13) Events, and 14) Newsletters. A comprehensive research center presented and updated by CIO.

Knowledge Management Resource Center

<http://www.kmresource.com/>

Knowledge Management Resource Center is a gateway to the world of Knowledge Management (KM). On this site you'll find a comprehensive collection of KM resources, each reviewed and described to help you quickly locate what you're looking for. You can explore knowledge management in their 17 departments, browse their bookstore, or search the site by keyword.

KT web – Connecting Knowledge Technology Communities

<http://www.ktweb.org/>

KTweb brings together the European projects and people working in information access and knowledge technologies - in research, academia and business - and offers information and resources in these domains at a global level.

Linguistic Tools for Knowledge Discovery

<http://www.montague.com/abstracts/discovery.htm>

The gaps between subject and functional boundaries are one of the best sources of breakthrough innovation. Yet for a variety of reasons — managerial, technical, and editorial — it's often difficult to exploit them. In this article they use an example from their own research and experience to show how linguistic tools such as thesauri, glossaries, and navigation schemes can promote knowledge discovery by exposing potential linkages between seemingly unrelated subjects.

Awareness Watch V6N1 January 2008 Newsletter

McCullough Knowledge Explorer and the MKR Language

<http://rhm.cdepot.net/>

McCullough Knowledge Explorer (MKE) is an interactive tool for organizing knowledge. It helps the user to record, change and search knowledge, and provides extensive error checking to ensure the internal consistency of the knowledge. Interaction with MKE uses the MKR language. MKR is a very-high-level knowledge representation language with simple English-like statements, questions and commands, plus UNIX-shell-like variables, methods and control structures.

Megaputer Intelligence

<http://www.megaputer.com/>

Megaputer Intelligence Inc., a Delaware corporation established in May of 1997, is a leading developer and distributor of advanced software tools for data mining, text mining, and intelligent e-commerce personalization. Their tools help reveal knowledge hidden in data. They add intelligence and insight to every step of the business decision-making process. The mission of Megaputer is to provide customers around the world with top quality software tools for transforming raw data into knowledge and facilitating better business decisions.

Open Directory – Knowledge Discovery

http://dmoz.org/Reference/Knowledge_Management/Knowledge_Discovery/ A listing of knowledge discovery resources broken into the following categories: 1) Books, 2) Business and Companies, 3) Magazine and eZines, 4) Organizations, 5) Software, 6) Data Mining, 7) Information Visualization, 8) OLAP, and 9) Text Mining.

PEPITe S.A.

<http://www.pepите.be/>

PEPITe is a company specialized in intelligent data exploration and knowledge extraction techniques. PEPITe sells Knowledge Discovery in Databases (KDD) solutions. These solutions combine software modules and services. PEPITe offers a complete range of services and products dedicated to industrial Data Mining (DM) applications.

SPSS, Data Mining, Statistical Analysis Software, Predictive Analysis, Predictive Analytics, Decision Support Systems

<http://www.netgen.com/>

SPSS predictive analytics, enterprise applications, and decisioning systems provide the most effective means for you to shape your organization's future for knowledge management and knowledge discovery. A very large selection of commercial based products from data mining to knowledge discovery.

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

STATISTICA - Data Mining, Data Analysis, Quality Control, and Web Analytics Software

<http://www.statsoft.com/>

StatSoft's flagship product line is the *STATISTICA* suite of analytics software products. *STATISTICA* provides the most comprehensive array of data analysis, data management, data visualization and data mining procedures. Its techniques include the widest selection of predictive modeling, clustering, classification and exploratory techniques in one software platform. Ideal for the knowledge discovery starter kit

T2K - Text to Knowledge

<http://alg.ncsa.uiuc.edu/do/tools/t2k>

The T2K (Text to Knowledge) tool provides text mining and analysis capabilities that have been specially designed to operate in and capitalize upon the complexity of rich natural language domains of very large stores of text and multimedia documents. T2K is a library of D2K modules that implements sophisticated algorithms for text analysis.

Telemakus - Mining and Mapping Research Findings to Promote Knowledge Discovery

<http://www.telemakus.net/>

The goal of the Telemakus System is to enhance the knowledge discovery process by developing retrieval, visual and interaction tools to mine and map research findings from the research literature. The objective of the research is to create, test and validate an infrastructure to permit the automation of the creation and maintenance of a searchable database that generates knowledge maps via query tools and concept mapping algorithms. We will also be applying natural language processing models and information analysis methods to ultimately speed up the scientific discovery process.

The Data Mine

<http://www.the-data-mine.com/>

The Data Mine was launched in April 1994, to provide information about DataMining (AKA KnowledgeDiscoveryInDatabases or KDD). There are 6 separate DataMining topic areas (known as "webs"), each with an index. You could also start with the IntroductionToDataMining. Popular pages include: OnLine Analytical Processing (OLAP) , Data Mining Journals, Data Mining Tutorials, Data Sources. Topic areas include: Data Mining Software, Data Mining Index, Data Mining General/Misc, People Working in Data Mining, and Data Mining Companies and Organizations.

The Protégé Project

<http://protege.stanford.edu/>

Protégé is an ontology editor and a knowledge-base editor. Protégé is also an open-source, Java tool that provides an extensible architecture for the creation of customized knowledge-based applications. Protégé's OWL Plug-in now provides support for editing Semantic Web ontologies.

The Knowledge Management Forum (KMForum)

<http://www.km-forum.org/>

The Knowledge Management Forum is a virtual community practice focused on furthering the fundamental theories, methods, and practices supporting the *Knowledge Professions*. The new KMForum Conference Center (KM FCC) is just one of many changes planned for the coming months as the KM Forum grows to meet the needs of the Knowledge Professions.

Visual Analytics - VisualLinks, Link Analysis, Data Mining Software

<http://www.visualanalytics.com/>

VisualLinks® is a platform-independent, graphical analysis tool used to discover patterns, trends, associations and hidden networks in any number and type of data sources. VisualLinks presents data graphically uncovering underlying relationships and patterns. VisualLinks addresses the entire analytical process – from access and integration to presentation and reporting – providing a single and complete solution to a broad range of data analysis needs.

UCI Knowledge Discovery in Databases Archive

<http://kdd.ics.uci.edu/>

This is an online repository of *large data sets* which encompasses a wide variety of data types, analysis tasks, and application areas. The primary role of this repository is to enable researchers in knowledge discovery and data mining to scale existing and future data analysis algorithms to very large and complex data sets. The archive is intended to serve as a permanent repository of publicly-accessible data sets for research in KDD and data mining.

Public Access to Court Electronic Records (PACER)

<http://www.pacer.uscourts.gov/>

Public Access to Court Electronic Records (PACER) is an electronic public access service that allows users to obtain case and docket information from Federal Appellate, District and Bankruptcy courts, and the U.S. Party/Case Index via the Internet. Links to all courts are provided from this web site. Electronic access is available by registering with the PACER Service Center, the judiciary's centralized registration, billing, and technical support center. Each court maintains its own databases with case information. Because PACER database systems are maintained within each court, each jurisdiction will have a different URL. Accessing and querying information from each service is comparable; however, the format and content of information provided may differ slightly. PACER is a service of the United States Judiciary. The PACER Service Center is run by the Administrative Office of the United States Courts. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

The 51st State: The State of Online - The Presidential Campaign 2008 — Candidates and News Sources

<http://www.infotoday.com/searcher/nov07/index.shtml>

As Laura Gordon-Murnane illustrates in this in-depth article, the Internet is no longer like a third-party candidate, but is breathing down the proverbial necks of the mainstream media, threatening to usurp broadcast and print sources as the primary way people follow the election. Five extensive tables look at the Web sites of each of the 17 presidential candidates, as well as mainstream media sites, blogs, and aggregator tools, and show just how much the Internet is impacting the 2008 election. This is a key reference tool for anyone following the election or helping voters. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Journal of Genetics and Genomics (JGG)

<http://www.jgenetgenomics.org/>

Journal of Genetics and Genomics (JGG) is one of China's leading journals in the life science. JGG covers all areas of genetics and genomics and encompasses experimental and theoretical approaches in all organisms, including microbes, plants, animals and humans. Research published in JGG should be of general interest for biologists.

PogoFrog - Medical Search Engine for Physicians

<http://www.pogofrog.com/>

PogoFrog.com, a Medical Search Engine for Physicians, was launched after extensive observation of physician web searching practices. Physicians use the internet regularly to research varied healthcare subjects. Studies have shown that physicians rarely find links to credible medical information on the first few pages of a keyword search when using the popular consumer search engines. In fact, they often must search through dozens of results pages before finding the credible medical information they need. The first several

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

© 2008 Marcus P. Zillman, M.S., A.M.H.A.

pages of results returned by consumer search engines often include links to attorneys, personal blogs or alternative medicine sites. Physicians must evaluate the credibility of these sites by a quick glance of the headings. PogoFrog.com is a custom search engine that jumps over these layman-focused sites and returns only credible medical site links on the first results page and on every results page. This is done by specifically excluding consumer sites and specifically including only credible healthcare sites such as FDA.gov, peer-review journal sites, association sites and others. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the source code for [eHealthcareBot](#) Search Engine.

Center For Media Research

<http://www.centerformediaresearch.com/>

The Center For Media Research provides: a) Daily alertness to and briefings on breaking media research news that will impact planning and buying decisions, b) Research reports and studies to help develop and improve media plans, strategies, tactics, performance and placement, and c) Selected resources and links to help media planners and buyers leverage the internet to identify and reach targeted audiences efficiently and effectively.

JasperReports - Open Source Reporting Engine

<http://jasperforge.org/sf/projects/jasperreports>

JasperReports is the leading open source reporting engine. JasperReports is a powerful open source Java reporting tool that has the ability to deliver rich content onto the screen, to the printer or into PDF, HTML, XLS, CSV and XML files. It is entirely written in Java and can be used in a variety of Java enabled applications, including J2EE or Web applications, to generate dynamic content. Its main purpose is to help creating page oriented, ready to print documents in a simple and flexible manner. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Songza - Music Search Engine and Internet Jukebox

<http://www.songza.com/>

Songza is the brainchild of 23-year-old Aza Raskin — the president of Chicago-based software company Humanized, Inc., and the son of Apple Macintosh founder Jef Raskin. Over the course of a month, he and Humanized's Web/Systems Architect Scott Robbin worked weekends to bring the idea to life. The site launched on November 8, 2007 and instantly generated significant buzz around the world. Hundreds of bloggers and news writers have praised its elegant user interface, beautiful design, and all-around utility. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MarketingProfs - Marketing Resources for Marketing Professionals

<http://www.MarketProf.com/>

MarketingProfs came together in June of 2000 when a clever marketing professor, Allen Weiss, thought that the two camps of marketing professionals and marketing professors might have a lot to learn from each other. Since then, MarketingProfs has been bridging

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

© 2008 Marcus P. Zillman, M.S., A.M.H.A.

the gap between theory and business practice, publishing some of the best thinking in the industry – to the benefit of all marketing practitioners. Today, MarketingProfs provides marketing know-how through its newsletters, templates, guides, online seminars, and conferences. It also provides platforms for learning and discussion through its blog, the Daily Fix, and its forum, the Know-How Exchange. More than 304,000 marketers now rely on MarketingProfs to cut through the clutter to bring them the best content from the sharpest minds in marketing. This will be added to [Advertising, Marketing and Public Relations Internet MiniGuide](#).

Business History Books

<http://www.businesshistorybooks.com/>

For more than 15 years they have been collecting books and films on business history: industries, companies, executives, products/services, economics, scandals and business fiction. They have gathered essential books on management history: investing, financing and operating decisions. The result: the largest multimedia collection of business history and management literacy available anywhere. Entries are organized by subject, company, year and author. You'll find the good, the bad and the ugly: operating successes and failures; entrepreneurial heroes and exploitive villains; empire builders, corporate raiders, asset strippers; seized opportunities and lost advantages. Thrill of victory, agony of defeat, photographs of the main characters - all part of Business History. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Open Source Lab

<http://osuosl.org/>

The Oregon State University Open Source Lab is a global, world-class facility and data center for Open Source Software (OSS) knowledge, hosting, infrastructure, development, and collaboration. The Open Source Lab fosters the development of unique OSS products, as well as directly assists in the development, implementation, and use of targeted OSS solutions for use in education, research, government, and business. By working closely with the OSU community, other universities, governments, and private sector business, the OSU Open Source Lab is quickly becoming a critical worldwide center for services related to open source software. Their goal is to help promote collaboration through the nurturing and development of software projects across like-minded institutions. Their experience and world-class infrastructure helps seed development efforts across these communities, which enables them to move forward with investments in open source software that leverage open standards. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

BlogMailr - Publish From Your eMail Directly To Your Blog

<http://www.blogmailr.com/>

Publishing to your blog is more difficult than it needs to be. Most blogs either have really confusing publishing tools with too many options or you are forced to download and install software on your computer. BlogMailr is all about making publishing to your blog

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>

zillman@VirtualPrivateLibrary.com

© 2008 Marcus P. Zillman, M.S., A.M.H.A.

easy. There is nothing to download, nothing to install, it's free for personal use, and works with all popular blogging software. BlogMailr allows you to publish to your blog from anything that can send an email whether it's your PC, Mac, Phone, PDA ... you name it. If you can send an email you've got everything you need to use BlogMailr. This has been added to the [Bots, Blogs and News Aggregators](#) resource page.

BluePulse - Free Mobile Social Messenger

<http://www.bluepulse.com/>

bluepulse is the free mobile social messenger. Take the best of a social network, the best of an instant messenger, revolutionize both and combine them to run on anyone's mobile phone. That's a mobile social messenger, that's bluepulse. In a nutshell, bluepulse is a new way to communicate with people you know through your phone, it's free and anyone can use it. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Icon Finder Search Engine

<http://www.iconfinder.net/>

A nice little search engine that finds the icons you require. These niched search engines do the job in a very neat and efficient manner This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web](#) Reference Subject Tracer™ Information blog.

Updated> Online Research Tools White Paper Link Compilation

<http://www.OnlineResearchTools.info/>

The white paper link compilation *Online Research Tools* by [Marcus P. Zillman, M.S., A.M.H.A.](#) has been updated! It is a comprehensive listing of online research tools that offer various downloadable as well as web applications to allow you to do your research and searching on the Internet far more effective and productive. It is now a freely available 66 page .pdf document (693KB) that can be downloaded from the above URL. Other white papers and resources on information retrieval, information extraction and deep web research by Marcus P. Zillman, M.S., A.M.H.A. are available by clicking [here](#). The Online Research Tools White Paper Link Compilation was updated **12-01-07**.

Open Source Software Script Directory

<http://www.opensourcescripts.com/>

They catalog useful open source scripts. Their primary mission is to provide a resource for users to find and use open source applications that are Stable. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

Scalable Molecular Dynamics (NAMD)

<http://www.ks.uiuc.edu/Research/namd/>

NAMD, recipient of a 2002 Gordon Bell Award, is a parallel molecular dynamics code designed for high-performance simulation of large biomolecular systems. Based on Charm++ parallel objects, NAMD scales to hundreds of processors on high-end parallel

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

platforms and tens of processors on commodity clusters using gigabit ethernet. NAMD uses the popular molecular graphics program VMD for simulation setup and trajectory analysis, but is also file-compatible with AMBER, CHARMM, and X-PLOR. NAMD is distributed free of charge with source code. You can build NAMD yourself or download binaries for a wide variety of platforms. Their tutorials show you how to use NAMD and VMD for biomolecular modeling. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Search For Video

<http://www.SearchForVideo.com/>

Searchforvideo.com is a leading video search engine that indexes online video clips from over 10,000 sources. They do not host or stream online video, they index rich meta data about video clips and provide direct links to video clips around the web.

Searchforvideo.com works with over 100 brand name video content providers. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

W3C MobileOK To Help Make Web Sites Mobile Friendly

<http://validator.w3.org/mobile/alpha>

<http://www.w3.org/TR/mobileOK-basic10-tests/>

Today, W3C provides new means for people to create and find mobile friendly content. W3C invites Web authors to run the alpha release of the W3C mobileOK checker and make their content work on a broad range of mobile devices. The checker runs the tests defined in the "W3C mobileOK Basic Tests 1.0" Candidate Recommendation.

DeepWater - Social Bookmarking Site for Theology

<http://deepwater.crossmap.com/>

Crossmap.com is the world's largest Christian portal site and recently launched a site called DeepWater - a social bookmarking site for theology. They are trying to build a community to make theology accessible to many people so that they can understand the Word of God more deeply and apply in the world. This has been added to [Theology Resources](#) Subject Tracer™ Information Blog.

International Journal of Agent-Oriented Software Engineering (IJAOSE)

<http://www.inderscience.com/ijaose>

The International Journal of Agent-Oriented Software Engineering (IJAOSE) fosters discussion on all software engineering aspects of the use of agent technology for the development of IT systems. The objectives of IJAOSE are to establish a communication vehicle for researchers and practitioners to promote, publicise and exchange ideas relating to the interface between research and commercial adoption of agent technology within the software development community. A further objective is to bring together the two relevant communities of agent technologists and (traditional) software engineers. Although software engineering necessarily encompasses research and application, an individual paper in IJAOSE may address one or both of these aspects. If a proposal is

purely theoretical, some application areas need to be indicated although empirical proof will not necessarily be required for publication in the journal. This has been added to [Bot Research](#) Subject Tracer™ Information Blog.

Microbial Genome Sequencing Program

<http://www.nsf.gov/pubs/2008/nsf08511/nsf08511.htm>

As a collaborative, interagency effort, the National Science Foundation (NSF), and the Cooperative State Research, Education, and Extension Service (CSREES) of the U.S. Department of Agriculture invite research proposals (i) to support high-throughput sequencing of the genomes of microorganisms (including viruses, bacteria, archaea, fungi, oomycetes, protists and agriculturally important nematodes) and (ii) to develop and implement strategies, tools and technologies to make currently available genome sequences more valuable to the user community. The availability of genome sequences provides the foundation for understanding how microorganisms function and live, and how they interact with their environments and with other organisms. The sequences are expected to be available to and used by a community of investigators to address issues of scientific and societal importance including: a) novel aspects of microbial biochemistry, physiology, metabolism, development and cellular biology; b) the diversity and the roles microorganisms play in complex ecosystems and in global geochemical cycles; c) the impact that microorganisms have on the productivity and sustainability of agriculture and natural resources (e.g., forestry, soil and water), and on the safety and quality of the nation's food supply; and d) the organization and evolution of microbial genomes, and the mechanisms of transmission, exchange and reshuffling of genetic information. A Microbial Genomics Workshop is held annually; all current awardees in this interagency program are expected to attend. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

LLRX November 2007 Issue - Deep Web Research 2008 Featured Article

<http://www.llrx.com/features/deepweb2008.htm>

The November 2007 Issue of **LLRX** has a feature article written by Marcus P. Zillman titled **Deep Web Research 2008**. According to Marcus P. Zillman, the "Deep Web" encompasses in the vicinity of 900 billion pages of information in various files and formats. Search engines currently locate approximately 20 billion pages, so this guide is a valuable tool for those who research a broad range of issues and seek wider access to a wide spectrum of reliable data, reports and information, regardless of format. Marcus P. Zillman's bibliographic guide highlights resources that focus on the history of deep web research, as well as dozens of topical sources that will contribute to your efforts to locating search through a range of repositories of valuable data, reports and scholarly literature. [Published LLRX November 24, 2007]. Other white papers and subject tracers by Marcus P. Zillman are available by clicking [here](#).

R&D Chemicals - Chemical Compounds Database

<http://www.rdchemicals.com/>

The R&D Chemicals is a database of chemical compounds accessible over Internet. Its search engine allows you to find a chemical by its molecular formula, IUPAC name, Smiles, common name, CAS number, structure or substructure. This has been added to the tool section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

PDRhealth™ - Consumer's Web Portal for Physicians' Desk Reference (PDR®)

<http://pdrhealth.com/>

PDRhealth™ is the consumer Web portal of the Physicians' Desk Reference (PDR®), which has provided trusted and authoritative drug and clinical information to physicians for over 60 years. The PDRhealth site offers consumer-friendly explanations of disease states and conditions as well as the safe and effective use of prescription and non-prescription drugs as well as herbal medicines. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the script code for [eHealthcareBot](#) Search Engine.

Task Coach

<http://www.taskcoach.org/>

Task Coach is a simple open source todo manager to manage personal tasks and todo lists. It grew out of frustration that well-known task managers, such as those provided with Outlook or Lotus Notes, do not provide facilities for composite tasks. Often, tasks and other things todo consist of several activities. Task Coach is designed to deal with composite tasks. Task Coach is developed by Frank Niessink and Jerome Laheurte, with help of different people providing translations. Currently, Task Coach is at version 0.66.2. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

GovernmentDocs.org - Community Government Document Review System

<http://www.GovernmentDocs.org/>

GovernmentDocs.org was created to advance the values of open and accountable government. This site gives the public an unprecedented level of access to government documents by allowing users to browse, search, and review hundreds of thousands of pages acquired through the Freedom of Information Act (FOIA) and other public disclosure, or "sunshine," laws. With the GovernmentDocs.org system, citizen reviewers can engage in the government accountability process like never before. Registered users can review and comment on documents, adding their insights and expertise to the work of the national nonprofit organizations which are partnering on this project. SearchMedica - Medical Search Engine

<http://www.searchmedica.co.uk/>

SearchMedica is a dedicated medical search engine for healthcare professionals which allows you to search the area of the worldwide web that is of direct relevance to you in your work. You can search the whole web too if you want to but we've prepared extensive lists of selected sites in consultation with working healthcare professionals that will help eliminate unwanted and irrelevant results from your searches delivering what you're looking for more quickly. The first version of SearchMedica was launched in August 2006 using expertise from Pulse, the GPs' best-read weekly paper, with major input from working GPs. They have now expanded SearchMedica to cater for the needs of nurses, pharmacists and medical students. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This has been added to the script code for [eHealthcareBot](#) Search Engine.

Journal of African Business

<http://www.haworthpress.com/store/product.asp?sku=J156>

Journal of African Business is the official journal of the International Academy of African Business and Development, the largest network of professionals committed to advancement of business development in African nations. This in-depth resource provides valuable insights into successful business techniques and strategies for the African business arena. The latest theoretical perspectives, cutting-edge research, and practical solutions to the problems of business managers, policymakers in government, and academicians, are comprehensively discussed. Targeted toward policymakers in government and international agencies, academics, consultants, and executives, the Journal of African Business features articles discussing the latest issues, theories, and techniques dealing with marketing, finance, accounting, technology, information processing, management, and economics. Each issue provides comprehensive up-to-date information and strategies from respected international experts. The journal focuses on all aspects that compare business issues of doing business with and within African nations, including one-country studies on African countries/regions and business practices. Incisive book reviews and dissertation abstracts related to African business are also presented. Topics covered in the Journal of African Business include:

- * assessing political risk and strategies for dealing with it
- * structural, economic, and political reforms
- * successful business (i.e., marketing, management, and accounting) strategies
- * exporting to and importing from Africa
- * impact of culture on business transactions
- * buyer-seller interactions
- * organizational, consumer, and privatization issues
- * legislation impacting business in Africa
- * competitor assessment
- * competitive market structures
- * business-government dealings

BuzzTracker News Headlines

<http://www.buzztracker.com/>

BuzzTracker is proud to be launching their new design which they hope makes the site more readable and user friendly. As you may notice they also have a new bee, which after much debate, is friendlier though he may have put on a few pounds. Their goal has been to launch a news site that leverages the power of the “head of the long tail” of the blogosphere to automatically generate news pages for a multitude of topics, both broad and narrow. They are currently tracking more than 1,000 different topics and 90,000 blogs. In the next month, they will be launching a create-a-topic feature to allow you to create and manage pages that are of the most interest to you. They will also be launching many new features in the coming months. They recently sold BuzzTracker to Yahoo! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Unitils - Open Source Library for Unit Testing

<http://unitils.sourceforge.net/summary.html>

Unitils is an open source library aimed at making unit testing easy and maintainable. Unitils builds further on existing libraries like DBUnit and EasyMock and integrates with JUnit and TestNG. Unitils provides general assertion utilities, support for database testing, support for testing with mock objects and offers integration with Spring and Hibernate. It has been designed to offer these services to unit tests in a very configurable and loosely coupled way. As a result, services can be added and extended very easily. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

OpenWinForms - Open Source Windows Forms and Controls

<http://www.openwinforms.com/>

OpenWinForms is a open source website for windows forms and controls. Here you can find windows controls and libraries for free. This is a non-commercial open source web site. This site mainly focuses on Microsoft technologies e.g. Microsoft .net, VB.net, C#.net etc. You may use these for any commercial or non-commercial purpose for free, however you cannot sell them directly or by modifying. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

Frontiers of Medicine in China: Selected Publications from Chinese Universities

<http://www.springerlink.com/content/1673-7458/>

The journal highlights the advances in clinical medicine in China. With over one fifth of the world population and a vast soil, China has the most diverse patient group and an extensive range of diseases. Chinese doctors have accumulated abundant experience in

the diagnosis and treatment of these conditions. By introducing the the-state-of-the-art diagnostic and therapeutic means, they have made great advances over the past decades and they have a lot to share with their foreign counterparts. *Frontiers of Medicine in China - Selected Publications from Chinese Universities* provides the information on the results of the recent work of Chinese doctors and researchers that people in medical communities will take interest in.

Android - First Complete Open and Free Mobile Platform

<http://code.google.com/android/>

The Open Handset Alliance, a group of more than 30 technology and mobile companies, is developing Android: the first complete, open, and free mobile platform. To help developers get started developing new applications, we're offering an early look at the Android Software Development Kit. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

Factbites - Results Make Sense

<http://www.Factbites.com/>

Factbites is a new approach to search. Under the slogan "where results make sense", Factbites provides searchers with full sentences about their search topic, rather than the sentence fragments most search engines offer. Rather than focusing on link-based technology like Google, Factbites delves into the tone and subject matter of the given topic. The engine "reads" the content of each page and determines how meaningful the text is. It seeks out authoritative and informative content, preferring encyclopedia-style fact-based descriptions to the chatty, spammy and inconsequential. The end result is a clean summary you can almost read from beginning to end. Not only is this an effective filter against spam and clutter, it's also a time saver, because it gives users a clear picture of what each destination site is about. For encyclopedia-style content, the site makes some large claims. The website challenges users to compare Factbites results to Google results at Factbites vs. Google. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

World Wide Internet TV (wwiTV)

<http://www.wwiTV.com/>

World Wide Internet TV website (wwiTV) is an independent guide to streaming media available on the web. They do not provide streaming content themselves. This site is designed to enable users of personal computers and other consumer electronic devices to easily find and access media content over the Internet. Currently 2695 global online TV stations are listed. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

WordIQ - Reference and Definitions of Words

<http://www.WordIQ.com/>

WordIQ.com is a comprehensive and searchable reference tool on the web. They offer search results from a diverse array of dictionary, encyclopedia, thesaurus, and other

Knowledge Discovery Resources 2008 - An Internet MiniGuide Annotated Link Compilation

<http://www.KDRResources.info/>

Marcus P. Zillman's extensive guide to knowledge discovery technologies, programs, resources and sites includes links to groups, organizations and applications specific to knowledge discovery, harvesting and management, data and text mining, as well as vendors/suppliers of related services. This 34 page .pdf is freely available from the above URL. It is also available from my [Knowledge Discovery](#) Subject Tracer™ Information Blog.

Rent Mine Online

<http://www.rentmineonline.com/>

Rent Mine Online is a trust based online market place that connects asset owners and renters and facilitates rental transactions between them. The company aims to help communities unlock the potential of idle assets, ultimately leading to greater economic efficiency and better use of the world's limited resources. This has been added to [Auction Resources](#) Subject Tracer™ Information Blog.

ThemBid - Stop Searching and Make Them Bid

<http://www.thembid.com/>

ThemBid is a free online marketplace that guides the most qualified businesses to your doorstep for general services like home repairs. With ThemBid, finding a plumber or other service provider is no longer a chore. Instead of searching aimlessly through local business listings, ThemBid lets you place a simple online job request, then sit back and relax as businesses bid for your work. Comments, ratings and reviews help you make the most informed and value-based decision, and you can add your own review once your job is complete. Businesses can make unlimited bids for free, and benefit from targeted advertising and inbound customer leads. By upgrading to a premium account, service providers receive greater visibility with a more detailed company profile and the ability to receive payments online using PayPal or Google Checkout. This has been added to [eCommerce Resources](#) Subject Tracer™ Information Blog. This has been added to [Auction Resources](#) Subject Tracer™ Information Blog.

International Journal of Mathematics Sciences (IJMS)

<http://www.waset.org/ijms/>

Publisher: World Academy of Science, Engineering and Technology
International Journal of Mathematics Sciences (IJMS) is a scholarly open access, peer-reviewed, interdisciplinary, quarterly and fully refereed journal focusing on theories, methods and applications in Mathematics Sciences. IJMS covers all areas of Mathematics Sciences, publishing refereed research articles, survey articles, and technical notes.

Kiva - Loans to Small Businesses in Developing Countries

<http://www.kiva.org/>

Kiva lets you connect with and loan money to unique small businesses in the developing world. By choosing a business on Kiva.org, you can "sponsor a business" and help the world's working poor make great strides towards economic independence. Throughout the course of the loan (usually 6-12 months), you can receive email journal updates from the business you've sponsored. As loans are repaid, you get your loan money back. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Open Text Book

<http://www.opentextbook.org/>

Journal of Consumer Health on the Internet

<http://www.haworthpress.com/store/product.asp?sku=J381>

The Journal of Consumer Health on the Internet is the only professional peer-reviewed journal devoted to locating consumer health information via the Internet. Librarians and health information providers describe programs and services aimed at helping patients and the general public find the health information they need. Topics addressed by the journal include:

- * evaluation and selection of Web-based consumer health resources
- * descriptions of consumer health information programs relying on Web-based resources
- * training consumers to find health information on the Web
- * criteria for evaluating quality consumer health sites
- * alternative and complementary health sites

Visual Dictionary Online

<http://visual.merriam-webster.com/>

The Visual Dictionary is designed to help you find the right word at a glance. Filled with stunning illustrations labeled with accurate terminology in up to six languages, it is the ideal language-learning and vocabulary dictionary for use at school, at home or at work. When you know what something looks like but not what it's called, or when you know the word but can't picture the object, The Visual Dictionary has the answer. In a quick look, you can match the word to the image. The Visual Dictionary is more than a reliable resource of meticulously labeled images—it innovates by combining dictionary-scale definitions with exceptional illustrations, making it the most complete dictionary. The Visual Dictionary is an indispensable visual reference that goes beyond object identification to answer questions about function, significance and purpose. Ideal for teachers, parents, writers, translators and students of all skill levels, it helps the user understand a phenomenon and quickly grasp the meaning of a term, the characteristics of an object or simply learn something new. Offers: a) 20,000 terms with contextual definitions, b) developed by terminology experts, c) 6,000 full-color images of a wide variety of objects from all aspects of life, and d) one essential reference. Eurohealth

http://www.euro.who.int/observatory/Publications/20020524_26

A joint publication of the Observatory and LSE Health and Social Care, Eurohealth provides one of the primary platforms for policy-makers, academics and politicians to express their views on European health policy. Eurohealth includes reports on the latest developments in health care reforms throughout Europe from experts working in the field. It also provides a look at important health policy developments around the world. In addition, Eurohealth provides readers with up-to-date information on the work of European and international organisations and institutions, with a particular emphasis on the European Union. Eurohealth is supported by an International Editorial Board which comprises a distinguished list of academics and policy-makers from leading health policy research centres, national Ministries of Health and international organisations, such as the World Health Organization (WHO) and the European Parliament. Eurohealth is also able to draw on the expertise of the European Health Policy Research Network (EHPRN), which brings together eminent academics and research centres from across Europe.

Universal Digital Library (UDL) - Million Book Collection

<http://www.ulib.org/>

The mission is to create a Universal Library which will foster creativity and free access to all human knowledge. As a first step in realizing this mission, it is proposed to create the Universal Library with a free-to-read, searchable collection of one million books, available to everyone over the Internet. Within 10 years, it is our expectation that the collection will grow to 10 Million books. The result will be a unique resource accessible to anyone in the world 24x7, without regard to nationality or socioeconomic background. One of the goals of the Universal Library is to provide support for full text indexing and searching based on OCR (optical character recognition) technologies where available. The availability of online search allows users to locate relevant information quickly and reliably thus enhancing student's success in their research endeavors. This 24x7 resource would also provide an excellent test bed for language processing research in areas such as machine translation, summarization, intelligent indexing, and information retrieval. It is our expectation that the Universal Library will be mirrored at several locations worldwide so as to protect the integrity and availability of the data. Several models for sustainability are being explored. Usability studies would also be conducted to ensure that the materials are easy to locate, navigate, and use. Appropriate metadata for navigation and management would also be created. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. International Journal of Business and Globalisation (IJBG)

<http://www.inderscience.com/ijbg>

International Journal of Business and Globalisation (IJBG) proposes and fosters discussion on various aspects of business and globalisation, including the physical environment and poverty. The objectives of International Journal of Business and Globalisation (IJBG) are to establish an effective channel of communication between policy makers, government agencies, academic and research institutions and persons concerned with the complex role of business and globalisation. The international dimension is emphasised in order to overcome cultural and national barriers and to meet the needs of accelerating technological and ecological change and changes in the global economy. IJBG publishes original empirical research, conceptual papers, and book reviews.

Essential Nursing References List

<http://www.nln.org/nlnjournal/nursingreferences.htm>

The 23rd edition of the Interagency Council on Information Resources for Nursing (ICIRN) Essential Nursing References list is presented as a resource for collection development and for use in locating nursing information. The list includes print, multimedia, and electronic sources to support nursing practice, education, administration, and research activities. The most recent editions or websites available are included. Updated price, publisher, and supplier information can be obtained by consulting standard sources such as Medical and Health Care Books, Serials in Print, Encyclopedia of Associations, and individual websites. As the Internet has become a key reference tool, a new section, "Meta-Sites for Nursing Information," points to gateways for exploration. Other new sections are "Evidence-Based Practice Resources," "Complementary and Alternative Medicine," and "Current Awareness." <http://www.academicjournals.org/JMPR/index.htm>

The Journal of Medicinal Plant Research (JMPR) provides rapid publication (monthly) of articles in all areas of research in Medicinal Plants. The Journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers will be published approximately one month after acceptance. All articles published in JMPR will be peer-reviewed.

cb2Bib - Rapid Extraction for Unformatted and Unstandardized Bibliographic References

<http://www.molspaces.com/cb2bib/>

The cb2Bib is a tool for rapidly extracting unformatted, or unstandardized bibliographic references from email alerts, journal Web pages, and PDF files. The cb2Bib reads the clipboard text contents and process it against a set of predefined patterns. If this automatic detection is successful, cb2Bib formats the clipboard data according to the structured BibTeX reference standard. Otherwise, if no predefined format pattern is found or if detection proves to be difficult, manual data extraction is greatly simplified by cb2Bib. In most cases, such manual data extraction will provide with a new, personalized pattern to be included within the predefined pattern set for future automatic extractions. Once the bibliographic reference is correctly extracted, it is added to a specified BibTeX database file. Optionally, article PDF files, if available, are renamed to its citeID and moved to a desired directory as a personal article library. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Pyro - Python Robotics

<http://pyrorobotics.org/>

Pyro stands for Python Robotics. The goal of the project is to provide a programming environment for easily exploring advanced topics in artificial intelligence and robotics without having to worry about the low-level details of the underlying hardware. That is not to say that Pyro is just a toy. In fact, Pyro is used for real robotics research as well as

courseware. Pyro is written in Python. Python is an interpreted language, which means that you can experiment interactively with your robot programs. In addition to being an environment, Pyro is also a collection of object classes in Python. Because Pyro abstracts all of the underlying hardware details, it can be used for experimenting with several different types of mobile robots and robot simulators. Until now, it has been necessary to learn very different and specific control languages for different mobile robots, particularly those manufactured by different companies. Now, a single language can be used to program many different robots, allowing code to be shared across platforms as well as allowing students to experiment with different robots while learning a single language and environment. This has been added to [Artificial Intelligence Resources](#) Subject Tracer™ Information Blog.

Blurb - Self Publish with Free BookSmart Software

<http://www.blurb.com/>

Blurb is a company and a community that believes passionately in the joy of books – reading them, making them, sharing them, and selling them. Holding a finished book with your name on the cover is a truly amazing feeling; it's one of those experiences everyone should have. As software people, designers, and publishing professionals at the top of their game, they realized something both incredible and obvious: there's no good reason why it should take tons of time, technical skills, big bucks, or friends in high places to publish a book. Or a zillion books, for that matter. So they put their minds together, and developed a creative publishing service simple and smart enough to make anyone an author – every blogger, cook, photographer, parent, traveler, poet, pet owner, marketer, everyone. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

European Journal of General Medicine (EJGM)

<http://www.bioline.org.br/gm>

The European Journal of General Medicine (EJGM) is the official quarterly publication of the Medical Investigations Society. EJGM is a multidisciplinary peer-reviewed medical journal publishing articles in the field of general medicine. EJGM encourages submissions from all authors throughout the world. The following articles will be considered for publication: editorials, original articles, reviewers, brief communications, case reports, and letters to the editor. Content in English.

getAbstract Business Book Summaries - Thousands of Business Book Summaries Online

<http://www.getAbstract.com/>

getAbstract is the world's largest provider of business book summaries. They make you the best-read, most expert player on the business scene today. getAbstract's library consists of 4,000 business book summaries. getAbstract produces 500 new business book summaries every year. getAbstract offers business book summaries from 300 different publishers. Journal of Business-to-Business Marketing

<http://aux.zicklin.baruch.cuny.edu/jbbm/>

<http://www.haworthpress.com/store/product.asp?sku=J033>

The Journal of Business-to-Business Marketing® encourages diversity in approaches to business marketing theory development, research methods, and managerial problem solving. An editorial board comprised of outstanding, internationally recognized scholars and practitioners ensures that the journal maintains impeccable standards of relevance and rigorous scholarship. The Journal of Business-to-Business Marketing® features:

- * basic and applied research that reflects current business marketing theory, methodology, and practice
- * articles from leading researchers covering topics of mutual interest for the business and academic communities
- * a summary for business marketing practitioners and a structured abstract accompanying each article
- * commentaries from the business world, provided by leading business thinkers
- * a book review section, which reviews books of pertinent and direct interest to academics and professionals in business-to-business marketing

Some of the main topical areas covered by the journal are business buyer relationship management, business buying behavior, industrial segmentation, business marketing strategy, ethical business marketing practices, legal issues / government regulation, and traditional business marketing mix areas including but not limited to: industrial products / business services, developing innovations, business brands, packaging, pricing (negotiations, bidding), industrial distribution logistics and supply chain management, promotion (personal selling and sales management, trade shows, direct marketing

methods, sales promotions, and industrial advertising), and the impact of Internet practices upon all areas of business marketing. The domain of business-to-business marketing encompasses all phenomena involving transactions, exchanges, and relationships in any dyad involving organizations, institutions, and resellers. It is a broad concept encompassing the marketing of business services and industrial products as well as reseller phenomena with domestic and/or global perspectives. The journal publishes articles that address any topic within this broad definition. Academics and industry professionals are invited to submit manuscripts to the journal that can contribute to the science and practice of business marketing.

Baker's Student Encyclopedia of Music

<http://www.enotes.com/music-encyclopedia/>

Dictionary and encyclopedia of musical terms, music theory, and biographical information on composers and musicians. More than 4,400 entries. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

BioText Search Engine

<http://biosearch.berkeley.edu/>

Developed as part of the BioText project at the University of California, Berkeley, the BioText Search Engine is a freely available Web-based application that provides biologists with new ways to access the scientific literature. The interface has been carefully designed according to usability principles and techniques. The system uses Lucene for the underlying indexing, and users can use all the Lucene operators in their search queries. The search engine is a work in progress and more functionality is being added over time. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

<http://www.LaunchPad.net/>

Launchpad is a free software hosting and development website. They make it easy to collaborate across multiple projects in the free software world. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Conferences in Research and Practice in Information Technology

<http://crpit.com/>

The Australian Computer Society recognises that academic conferences provide an excellent opportunity for new ideas to be discussed and developed by researchers in Information Technology. The ACS, through this series, thus supports the publication of conference series aimed at providing a cost-effective (ie. not-for-profit) service to IT researchers. The Conference in Research and Practice in Information Technology (CRPIT) series (a parallel series to the Journal of Research and Practice in Information Technology) aims to facilitate the dissemination of proceedings from peer-reviewed conferences in all areas of IT. Volumes in the series comprise all or selected papers from acceptable conferences. For a conference/workshop to be acceptable for publication in

the CRPIT series, it will normally:

- * Have a programme committee with international membership, comprised of recognised active researchers in the field,
- * Referee all submitted papers in full (although additional abstracts and posters can be included - they will be listed as such),
- * Be advertised and open to researchers internationally,
- * Have in place suitable quality control mechanisms that ensure that the quality of the papers included in the volume is acceptable. For conferences this will normally include an acceptance rate of at most 50%.

Conferences can consist of either all or selected papers and can be produced either in time to act as proceedings for the conference or as a post-conference volume.

JScience - Java™ Tools and Libraries for the Advancement of Sciences

<http://jscience.org/>

The vision of JScience is a) To provide the most comprehensive Java™ library for the scientific community; b) To create synergy between all sciences (e.g. math, physics, sociology, biology, astronomy, economics, etc.) by integrating them into a single architecture; and c) To provide the best on-line services (webstart) for scientific calculations and visualizations. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

BOUML for their definition as any other program. The code generators and reverses are ones of the pre-defined plug-outs included in the BOUML distribution. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

Clonezilla - Open Source Clone System

<http://clonezilla.sourceforge.net/>

You're probably familiar with the popular proprietary commercial package Norton Ghost®, and its OpenSource counterpart, Partition Image. The problem with these software packages is that it takes a lot of time to massively clone systems to many computers. You've probably also heard of Symantec's solution to this problem, Symantec Ghost Corporate Edition® with multicasting. Well, now there is an OpenSource clone system (OCS) solution called Clonezilla with unicasting and multicasting! With DRBL and network boot enabled client computers, the only thing you have to prepare is a Clonezilla server. You do not even have to prepare a bootable CD or floppy with Partition Image for every client computer. Clonezilla, based on DRBL, Partition Image, ntfscclone, and udpcast, allows you can massively clone many (40 plus!) computers simultaneously. Clonezilla saves and restores only used blocks in the harddisk. This increases the clone efficiency. At the NCHC's Classroom C, Clonezilla was used to clone 41 computers simultaneously. It took about 50 minutes to clone a 5.6 GBytes system image to all 41 computers via unicasting and only about 10 minutes via multicasting! This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Transformation Groups

<http://springerlink.com/content/109372/>

Transformation Groups will only accept research articles containing new results, complete proofs and an abstract. Topics include: Lie groups and Lie algebras; Lie transformation groups and holomorphic transformation groups; Algebraic groups; Invariant theory; Geometry and topology of homogeneous spaces; Discrete subgroups of Lie groups; Quantum groups and enveloping algebras; Group aspects of conformal field theory; Kac-Moody groups and algebras; Lie supergroups and superalgebras.

JotForm - Web Based WYSIWG Form Builder

<http://www.jotform.com/>

JotForm is the first web based WYSIWYG form builder. Its intuitive drag and drop user interface makes form building a breeze. Using JotForm, you can create forms, integrate them to your site and collect submissions from your visitors. JotForm is developed mainly for webmasters, but anybody with an Internet connection can use it. JotForm is WYSIWYG, so you can still make web forms without any web design or HTML experience. Since JotForm is hosted on their servers, there are no requirements. JotForm supports all standard web form field types. In addition, it allows you to use new and intuitive fields in your form such as Date Time Picker, Star Ratings, or CAPTCHA checks. Using JotForm, you can create any kind of web form. Here is a short list of examples: a) Contact Form, b) Blog Contact/Survey, c) Event Calendar, d) Document Uploader. e) Satisfaction Survey, f) Time Sheet, g) Job Application Form, h) RSVP for a

Journal of E-working (JOE)

<http://www.merlien.org/oj/index.php/JOE/index/>

The Journal of E-working (JOE) is an online, multi-disciplinary and peer-reviewed publication on E-working. It aims to enhance and accelerate communication among researchers and practitioners concerning the impacts of new working environments on individuals, businesses and society. The Journal of E-working enables rapid publication, worldwide visibility and accessibility through indexing your research work in more than 15 international digital repositories and library catalogs. All theoretical, empirical and practical manuscripts will be considered for publication. Research articles accepted for publication in the journal must meet the highest standards of scholarly peer-review. Topics of interest to the journal include, but are not limited to the following:

- * Defining e-working through re-conceptualisation of telecommuting and teleworking
- * Enhancing distributed work through e-collaboration
- * Teleworking from the perspective of human resource management
- * Exploring the impacts of teleworking on social inclusion
- * Enhancing distributed work through workplace design and architectures
- * Managing the virtual workforce through efficient and effective communication
- * Managing strategic and practical issues of e-work implementation
- * Exploring the impacts of e-working on environment, energy & transportation
- * Discussing labour conditions and regulations for teleworkers
- * Enhancing e-working through information and communication technologies

Journal of E-working is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

MooTools - Compact, Modular, Object-Oriented JavaScript Framework

<http://mootools.net/>

MooTools is a compact, modular, Object-Oriented JavaScript framework designed for the intermediate to advanced JavaScript developer. It allows you to write powerful, flexible, and cross-browser code with its elegant, well documented, and coherent API. MooTools code respects strict standards and doesn't throw any warnings. It's well commented and has meaningful variable names: a joy to browse and a snap to understand. This has been added to [Script Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Ocean Biogeographic Information System (OBIS)

<http://www.iobis.org/>

13.7 million records of 80000 species from 238 databases OBIS was established by the Census of Marine Life program (www.coml.org). It is an evolving strategic alliance of people and organizations sharing a vision to make marine biogeographic data, from all over the world, freely available over the World Wide Web. It is not a project or program, and is not limited to data from CoML-related projects. Any organization, consortium, project or individual may contribute to OBIS. OBIS provides, on an 'open access' basis through the World Wide Web: a) taxonomically and geographically resolved data on marine life and the ocean environment; b) interoperability with similar databases; and c) software tools for data exploration and analysis. OBIS was one of the earliest Associate Members of the Global Biodiversity Information Facility (www.gbif.org) which publishes data on all species. OBIS is a very active participant in GBIF activities, and one of the largest publishers of data to GBIF, reflecting its role as a specialist network for marine species. GBIF recommends that marine data are first published through OBIS, because OBIS can add special value (e.g. depth) and will manage the subsequent publication of data through GBIF. This also avoids duplication of data being separately published to GBIF and OBIS. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Internet Search Environment Number (ISEN)

<http://www.isen.org/>

The Internet Search Environment Number (ISEN) is for researchers who find it difficult to locate and search relevant, evaluated online databases. The ISEN is the foundation of a portal that comprehensively catalogs the Internet's databases. Unlike Yahoo or Google and other portals that keyword index a portion of constantly changing web sites, ISEN focuses on the niche of cataloging databases. ISEN facilitates access and adds value by creating more effective and efficient Internet search experiences. ISEN is the foundation of a marketplace for information owners and vendors who desire more exposure of their information product to a broader range of Internet researchers. ISEN provides an auditing tool for organizations and individuals to find refined and structured resources that have been obscured by the rapid and overwhelming growth of web pages. ISEN provides a new proposed library standard for organizing databases that is historically overdue. The

Awareness Watch V6N1 January 2008 Newsletter

<http://www.AwarenessWatch.com/>
zillman@VirtualPrivateLibrary.com

Internet Search Environment (ISE) is the primary concept behind the Internet Search Environment Number or ISEN. An ISE is a container of structured information that has its own search algorithm. Each database, search engine, knowledge base, digital library, institutional repository, OPAC & P2P environment and other types of search environments that currently exist or may exist in the future would be assigned an ISEN and be cataloged using taxonomic and folksonomic tags or metadata. The ISE is the number of these search environments that exist. This has been added to [Deep Web Research](#) Subject Tracer™ Information Blog.

Journal of Community Practice

<http://www.haworthpress.com/store/product.asp?sku=J125>

The Journal of Community Practice is an interdisciplinary journal grounded in social work. It is designed to provide a forum for community practice, including community organizing, planning, social administration, organizational development, community development, and social change. The journal contributes to the advancement of knowledge related to numerous disciplines, including social work and the social sciences, urban planning, social and economic development, community organizing, policy analysis, urban and rural sociology, community health, public administration, and nonprofit management. As a forum for authors and a resource for readers, this journal makes an invaluable contribution to the community its conceptualization, applications, and practice. The Journal of Community Practice articulates contemporary issues, providing direction on how to think about social problems, developing approaches to dealing with them, and outlining ways to implement these concepts in classrooms and practice settings. Academics and practitioners engaged in community practice contribute articles that will enhance your abilities to design new programs and policy for your area. As the only journal focusing on community practice, it covers research, theory, practice, and curriculum strategies for the full range of work with communities and organizations. This unique interdisciplinary journal utilizes a range of research methods, including:

- * case studies
- * curriculum development
- * historical studies
- * participatory research
- * program evaluation
- * qualitative and quantitative methods
- * theory and model development

International Journal of Biotechnology (IJBT)

<http://www.inderscience.com/ijbt>

The International Journal of Biotechnology (IJBT) provides an international forum and refereed authoritative source of information in the field of Biotechnology and Biotechnics, with emphasis on management and economics, as well as the political and social issues. It aims to disseminate knowledge, provide a learned reference in the field, and establish channels of communication between academic and research experts, policy makers and executives in industry, commerce and investment institutions. The objectives of the IJBT are to develop, promote and coordinate the science and practice of biotechnology. It also aims to help professionals working in the field, engineering and business educators and policy-makers to contribute, to disseminate information and to learn from each other's work. The international dimension is emphasised in order to overcome cultural and national barriers and to meet the needs of accelerating technological change and changes in the global economy. IJBT publishes original and review papers, technical reports, case studies, conference reports, management reports, book reviews, and notes, commentaries, and news. Contribution may be by submission or invitation, and suggestions for special issues and publications are welcome.

SCImago Journal & Country Rank - Assess and Analyze Scientific Domains

<http://www.scimagojr.com/>

The SCImago Journal & Country Rank is a portal that includes the journals and country scientific indicators developed from the information contained in the Scopus® database (Elsevier B.V.). These indicators could be used to assess and analyze scientific domains. This platform takes its name from the SCImago Journal Rank (SJR) indicator, developed by SCImago from the widely known algorithm Google PageRank™. This indicator shows the visibility of the journals contained in the Scopus® database from 1996. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Transliteracy: Crossing Divides by Sue Thomas, Chris Joseph, Jess Laccetti, Bruce Mason, Simon Mills, Simon Perril, Kate Pullinger

<http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2060>

Abstract

Transliteracy might provide a unifying perspective on what it means to be literate in the twenty-first century. It is not a new behavior but has only been identified as a working concept since the internet generated new ways of thinking about human communication. This article defines transliteracy as “the ability to read, write and interact across a range of platforms, tools and media from signing and orality through handwriting, print, TV, radio and film, to digital social networks” and opens the debate with examples from history, orality, philosophy, literature, and ethnography. We invite responses, expansion, and development.

Subject Tracer™ Information Blogs
