Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

V6N8   **August 2008**

Welcome to the V6N8 August 2008 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Student Research Resources**. These resources are part of the Student Research Resources Subject Tracer™ Information Blog available at the following URL:

http://www.StudentResearch.info/

These resources and sites bring you the latest information and happenings in the area of student research that are currently available on the Internet. It is designed to aid the student in performing research for their independent research projects as well as undergraduate and graduate subject research. Having the ability to access the latest research resources will keep the student at the leading edge for knowledge discovery and the ability to learn in a more efficient and effective manner!

Awareness Watch™ Spotters

WordHustler - One Click to Your Publishing Destiny
http://www.wordhustler.com/
WordHustler is a service for writers that takes the pain out of the process of publishing. They offer a database of over 3,000 writing opportunities including publishers, agents, contests and more. But they don't stop there. After you've found the perfect market you can submit your manuscript in a single click. WordHustler will print, ship, and track your manuscript so you can get back to what you are supposed to be doing: writing. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

China Data Mining Research
http://www.ChinaKDD.org/
I am extremely honored that The China Data Mining Research has highlighted my Data Mining Resources Subject Tracer™ Information Blog. The actual information dissemination on my DataMiningResources.info is available by clicking here. We are truly in a global Internet society where knowledge is exploding at an incredible rate ......

VoiceThread - Group Conversations Around Images, Docs and Videos
http://voicethread.com/
A VoiceThread is an online media album that can hold essentially any type of media (images, documents and videos) and allows people to make comments in 5 different ways - using voice (with a microphone or telephone), text, audio file, or video (with a webcam) - and share them with anyone they wish. They can even be exported to an Archival Movie for offline use on a DVD or video-enabled MP3 player. A VoiceThread allows group conversations to be collected and shared in one place, from anywhere in the world. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

SWORD (Simple Web-service Offering Repository Deposit)
http://www.ukoln.ac.uk/repositories/digirep/index/SWORD
SWORD (Simple Web-service Offering Repository Deposit) will take forward the Deposit protocol developed by a small working group as part of the JISC Digital Repositories Programme by implementing it as a lightweight web-service in four major repository software platforms: EPrints, DSpace, Fedora and IntraLibrary. The existing protocol documentation will be finalised by project partners and a prototype 'smart deposit' tool will be developed to facilitate easier and more effective population of repositories. The project intends to take an iterative approach to developing and revising the protocol, web-services and client implementation through evaluative testing and feedback mechanisms. Community acceptance and take-up will be sought through dissemination activities. The project is led by UKOLN, University of Bath, with partners at the Aberystwyth University, the University of Southampton and Intrallect Ltd. The project aims to improve the efficiency and quality of repository deposit and to diversity and expedite the options for timely population of repositories with content whilst promoting a common deposit interface and supporting the Information Environment principles of interoperability. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Verification Yearbook
http://www.vertic.org/publications/verification%20yearbook.html
VERTIC is an independent, non-profit making, non-governmental organization. Its mission is to promote effective and efficient verification as a means of ensuring confidence in the implementation of international agreements and intra-national agreements with international involvement. Verification is understood to mean the use of information to make judgements about the compliance or non-compliance of parties to an agreement. VERTIC¹s brief encompasses the negotiation of verification and compliance provisions; the implementation, monitoring and verification of agreements; the operation of compliance, enforcement and review mechanisms; and the establishment of confidence-building measures to enhance the operation of agreements. VERTIC aims to achieve its mission by means of:

* research
* training
* dissemination of information, and
* interaction with the relevant political, diplomatic, technical, scientific and non-governmental communities.

Each edition of the Verification Yearbook provides independent, authoritative and concise analysis of verification developments over the preceding year, as well as assessing future trends in monitoring, verification and compliance. The Yearbook covers developments in arms control and disarmament, the environment and peace and security, plus modalities, technologies and mechanisms. The chapters are written by VERTIC researchers and other leading practitioners, analysts and academics.

ImportGenius - International Trade and Competitive Intelligence Tools and U.S. Customs Database
http://importgenius.com/
ImportGenius provides timely, detailed shipment data for every container that nters the United States. Our user base is diverse: importers, exporters, entrepreneurs, freight forwarders, bankers, private investigators, foreign factories, and more. Features of Subscribing to Import Genius include: a) Access to data on every ocean container entering the U.S.; b) Simple, ultra-fast search interface; c) Search by competitor's name, supplier's name, product type and more; d) Affordable premium subscriptions; and e) Export to CSV allows rigorous quantitative analysis. ImportGenius empowers your business with actionable data about your overseas suppliers and domestic competitors. Based in Scottsdale, Arizona, our team combines seasoned veterans of the import-export business with a group of cutting edge software application developers. The result is one of the world's most powerful and accessible database of international trade and competitive intelligence. This has been added to Business Intelligence Rsources Subject Tracer™ Informagtion Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to International Trade Resources MiniGuide.

Newser - Know More News While Searching Less
http://www.newser.com/
Newser gives you more news in less time. They search for the best and most important stories all over the web, read them for you, and deliver concise and sharp summaries—along with links to the full text. Newser provides a way to stay on top of an ever-expanding horizon of news and opinion—politics, sports, business, trends, technology, personalities, crimes, and controversies. Newser keeps you not just better informed, but, with their signature graphic interface and smart condensed format, more enjoyably informed. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Ubroadcast - World's Online Broadcasting Community
http://www.ubroadcast.com/
ubroadcast is the "World's Online Broadcasting Community". You can listen free to online radio stations with their "Player" software to ubroadcast original channels, as well as free LIVE internet radio station broadcasts by independent broadcasters who use their "Station Manager" software. They give their online listeners the opportunity to host free a LIVE internet talk radio station or music show, and provide a fully interactive experience that you can't get on satellite, terrestrial or Internet radio. Their Patent Applied For software was built from the "ground up" specifically for LIVE online broadcasting, HD quality, and user interaction. All you need is some basic equipment and their Station Manager software(Free Download). You can broadcast recorded content 24 hours a day or "go LIVE" any time you wish. It's your online radio show - you pick the format,

music, broadcast times, subject matter, etc. They give the station to run as you wish, broadcast what you want, and even sell commercial space to generate income. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Infornation Blog.

Ethics & Global Politics
http://journals.sfu.ca/coaction/index.php/egp
Ethics & Global Politics is an Open Access, peer reviewed scholarly journal published by Co-Action Publishing with support from the Department of Political Science at Stockholm University, Sweden. Ethics & Global Politics looks to foster theoretical contributions to the study of global politics by providing a forum for presenting novel ways of understanding and conceptualizing the global political challenges the world faces today. It does not favour any theoretical perspective or political problem but emphasizes the importance of closing the gap between moral and democratic theory, on the one hand, and contemporary empirical problems on the global arena, on the other. The journal provides a forum for original research articles, reviews and research notes that integrate normative issues within philosophy and political theory with political problems related to processes and phenomena that transgress traditional distinctions between regional, national, international and global levels of politics. In particular it encourages contributions that provide novel ways of understanding and conceptualizing the political challenges the world faces today, for instance in relation to global institutional arrangements, environmental protection, policy development, poverty, technology and knowledge, future generations, and migration. Ethics & Global Politics is published under the Open Access model and is therefore free for anyone to read and download, and to copy and disseminate for educational purposes.

INXS Technologies - Complex Yet Simple Financial Applications
http://www.inxsasia.com/
INXS Technologies provides technology to build complex financial applications that set the benchmark for elegance and deliver performance to the users. Built in year 2006 UBAC Financial Platform development offers previously unthought of capabilities and cuts short development time to a matter of days, while a ground-up design of financial infrastructure would take months or years and depend upon obsolete technology and constraints carried from several generation beyond the time of internet itself. UBAC financial platform conforms to open standards where available and establishes open unrestricted standards otherwise by provided a published Open API Architecture. Using this say a brazilian startup can deliver a mobile financial application to Japanese market with 2 weeks what otherwise would have taken years.
Their core competence is to provide technology to make it all work rather than generate financial content (make-up) or advice, as they see there are exceptional sources of information all around us but lack of processes to make use of it effectively. They believe the user should be able to get in, do his work and get out as soon as possible with the least time and not spending the entire day forced to subscribe any particular school of

thought. This no-baggage carried philosophy is reflected in most of their products; be it MarketSimplified (get an answer in 30 seconds) or exception based alerts(get your attention on demand and not retain it forever) or the platform itself. This has been added to Financial Sources Subject Tracer™ Information Blog.

Digital Reseach Tools (DiRT)
http://digitalresearchtools.pbwiki.com/
This wiki collects information about tools and resources that can help scholars (particularly in the humanities and social sciences) conduct research more efficiently or creatively. Whether you need software to help you manage citations, author a multimedia work, or analyze texts, Digital Research Tools will help you find what you're looking for. They provide a directory of tools organized by research activity, as well as reviews of select tools in which they not only describe the tool's features, but also explore how it might be employed most effectively by researchers. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Words,Extended - Internet Text Information Rretrieval, Extraction and Display Bot
http://home.earthlink.net/~glenn_scheper/
Words,Extended is an Internet text information retrieval, extraction and display program featuring ergometric minimal motion right hand operation, smooth scrolling, sizable font, and easy viewing colors. Paste text from e-mail or other browsers and use Words,Extended to read it: Three arrow keys operate smooth scrolling. Down arrow, stealth, minimizes. Type in or right-click a word or phrase to search for it on the Web. Web search queries 24 engines by default, some in foreign languages. Web pages are summarized, including its best un-common keyword list. Click in the web search results to begin reading any web page text. All HTML is turned into text. Save and groom folders of topical text. All work is done in threads. All texts are in memory, up to 500 MB. Type in or Click a word(s) to search (with word stemming) in all held texts. Display Word search results as KeyWord-in-Context, Sentences or Paragraphs. Click in Word search results to begin reading text right at the found word. Drag over text to create word-wrapped citations annotated with URL and title. Unicode is used throughout, and many languages are supported. Language guessing and ranking starts with 297139 words in 32 languages. Pages, sentences and words are ranked. Read the best ranked sentences. Toggle whether or not to show low-content-ranked web navigational text. Invoke Internet Explorer with the current page's URL. Set 10 bookmarks in texts. F3 finds within in a text. Type in and fetch one URL. Fetch URLs from a text list. Follow all links from a page. Optionally fetch and save binary URLs. Load all files found in the cache. Output cross-referenced URL list. Monitor threads and memory items. Edit the list of search engines, and result page scraping rules. Fetch pages with submit forms to parse them for new engine URLs. This has been added to Bot Research Subject Tracer™ Information Blog. This will be added to Web Data Extractors White Paper Link Compilation.

International Journal of Mobile Computing and Multimedia Communications
http://www.igi-pub.com/journals/details.asp?id=7684
International Journal of Mobile Computing and Multimedia Communications publishes original research papers, state of the art reviews, technical notes, case studies, innovative projects, and books reviews on topics leveraging all aspects of mobile and multimedia computing: from underlying technologies to applications, theory to practice, and servers to networks to devices.

OpenX - Open Source Ad Server
http://www.openx.org/
The free, open source ad server trusted by more than 30,000 web publishers in over 100 countries around the world. OpenX is a powerful ad serving solution that puts control over online advertising back in the hands of publishers. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

FormSpring - Web Form Builder
http://www.formspring.com/
You need web forms to provide a way for customers to contact you, to register for events, place orders, or to provide feedback through a survey. Until now, you've had to spend a lot of your own time and energy to build forms, or spend a lot of money hiring programmers to do it for you. FormSpring's easy form builder allows you to design useful, powerful web forms without any programming. Share data with others in your organization, export submissions to Excel, or securely integrate your form with PayPal -- all with one simple tool. They host the software so there's nothing to install, and you can fully customize forms to match the look and feel of your site. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Morph helpME - Web Applications On Demand
http://www.morphexchange.com/
A Web application that allows you to publish any type of online book in a matter of minutes. They offer FREE and for fee versions. The Morph helpME application is an always-on, on-demand application that provides you with the tools necessary to create and deliver rich content for your users. This guide assists you in learning how to create multimedia help and training solutions for your project, team, or organization using the Morph helpME application. The Morph helpME Guide assists you in navigating through the Morph helpME application and shows you how to create help pages, add resources and files, label tags, and bring your content to life. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

WMO Bulletin
http://www.wmo.ch/pages/publications/bulletin/index_en.html
The World Meteorological Organization (WMO) is a specialized agency of the United Nations. It is the UN system's authoritative voice on the state and behaviour of the Earth's

atmosphere, its interaction with the oceans, the climate it produces and the resulting distribution of water resources. The Bulletin has been the official journal of WMO since 1952. It is published quarterly (January, April, July and October) in English, French, Russian and Spanish editions. The main articles are centred round a chosen topical theme related to the work of the Organization in meteorology, climate, hydrology and water resources, oceanography, the environment and related fields, covering a wide range of topics, including research, information management, education and training, applications (energy, transport, tourism, agriculture, fisheries, etc.) and natural disaster reduction. These articles are of interest to the scientific and technical community but also to readers in a number of socio-economic sectors and the general public. Each issue of the Bulletin also contains news from the WMO Secretariat, book reviews and an article covering items from the corresponding issue of the Bulletin 50 years ago.

DigitalBucket - Highly Scalable, Reliable, Fast, Inexpensive Online Data Storage
http://www.digitalbucket.net/
digitalbucket.net provides a highly scalable, reliable, fast and inexpensive platform to store, retrieve, share and collaborate digital data online, at any time, from anywhere on the web. digitalbucket.net is the easy-to-use, reliable, and inexpensive place to store and retrieve your important data from anywhere you have an Internet connection. digitalbucket.net lets you collaboratively share information with co-workers, partners, suppliers, and customers from any Internet connection. Features include: 1) No software is required to install, 2) Drag & Drop user interface, 3) Cut, Copy, Paste, Delete, Rename and zip/unzip files or folders, 4) Password protected published folders using direct links or RSS, 5) Sharing with other digitalbucket.net users with permissions, 6) Photo Albums and Photo editing capabilities, 7) MS Word and excel online editing and PowerPoint viewing, 8) Online music and video players, and 9) Sub accounts. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to eCommerce Resources Subject Tracer™ Information Blog.

Ubuntu - Community Developed, Linux-based Operating System
http://www.ubuntu.com/
Ubuntu is a community developed, Linux-based operating system that is perfect for laptops, desktops and servers. It contains all the applications you need - a web browser, presentation, document and spreadsheet software, instant messaging and much more. The Ubuntu promise includes: 1) Ubuntu will always be free of charge, including enterprise releases and security updates, 2) Ubuntu comes with full commercial support from Canonical and hundreds of companies around the world, 3) Ubuntu includes the very best translations and accessibility infrastructure that the free software community has to offer, and 4) Ubuntu CDs contain only free software applications; we encourage you to use free and open source software, improve it and pass it on. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

PAT2PDF - Free PDF Copies of U.S. Patents - Search, Download and Print
http://www.pat2pdf.org/
A free patent Search Tool .... Download U.S. patents (in PDF) and more! This has been added to the tools section of Research Research Rsources Subject Tracer™ Information Blog.

Economic Analysis and Policy (EAP)
http://www.eap-journal.com/
Economic Analysis and Policy (EAP) publishes articles from all branches of economics. It features contributions that have policy relevance, both theoretical and applied. EAP particularly seeks to publish passionate, critical, and controversial articles. It is open for orthodox but also unorthodox approaches. EAP runs a strict open access policy. Therefore the journal offers authors a unique and invaluable forum to disseminate their views on emerging and controversial topics. The journal has four main sections. They are:

* Policy Debates and Controversies

This section will contain highly policy relevant articles that are of general interest to economists. We will strive to obtain opposing views on current topics.

* Recent Trends in Economic Research

This section will contain research articles from all fields of economics, similar to those published in other general interest economics journals, such as the American Economic Review, Quarterly Journal of Economics, the Economic Journal, or the Economic Record. These articles will not necessarily be easily accessible to non academic economists. We expect authors to provide the main insights in a non-technical introduction and in the conclusions.

* Comments and Discussions of Past and Present Contributions to Economics

This section has two aims. On the one hand it is a platform to critically discuss recent contributions to the economic literature. This section will contain contributions that revalidate econometric articles and/or discuss the importance of recent findings in economics. On the other hand, it will contain a critical appreciation of classic contributions to the economic literature. We will invite original authors as well as scholars that work in the field to review the importance of classic contributions to modern economics.

Huddle - Online Project Management, Group Collaboration and Document Sharing
http://www.huddle.net/
Huddle gives you simple, secure online workspaces containing powerful, office, project and collaboration tools that can be used for a variety of purposes. Huddle is hosted,

there's no software to download and it's free to get started. With Huddle you can instantly create a network of collaborative team workspaces, each time bringing together the right team for the right activity. You can manage projects, team and relationships or share ideas, files and information, or both. And because you are joining a network of workspaces, you can collaborate with hundreds of different people, teams and organisations globally in one place. If you ever needed a personal workspace, online office, intranet, extranet, file sharing, team collaboration or project management tool, Huddle is for you. Here's what you get with each Huddle: 1) Space: From 1Gb upwards, 2) Dashboard: Manage multiple Huddle workspaces securely in one place, 3) Users: ability to invite unlimited users into your workspaces, 4) File storage: Automated versioning, audit trails and approval workflows. Up to 2Gb per file , 5) Document creation: Use embedded web office tools to create new files online or save document from your desktop directly into Huddle, 6) Whiteboards: Or wiki, share ideas, comment, brainstorm, 7) Project calendar: Assign tasks, auto reminders and iCal integration, 8) Notifications: Via dashboard, email and RSS, 9) Branding: Customise your dashboard, homepage, emails, custom URL, 10) Control: view/read/edit permissions, audit trails, 11) Security: 128 bit SSL, control over who can see and read documents, 99.5% uptime guarantee, 12) Support: Online help system, phone, and email helpdesk, webinars, video tutorials, on-site support, 13) Accessibility: No client to download; Windows, Mac, Firefox, Safari, IE, Facebook integration, and 14) Open API: Integrate Huddle into existing applications or build tools on top of the platform. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Updated> Online Research Tools White Paper Link Compilation
http://www.OnlineResearchTools.info/
The white paper link compilation *Online Research Tools* by Marcus P. Zillman, M.S., A.M.H.A. has been updated! It is a comprehensive listing of online research tools that offer various downloadable as well as web applications to allow you to do your research and searching on the Internet far more effective and productive. It is now a freely available 82 page .pdf document (1.80MB) that can be downloaded from the above URL. Other white papers and resources on information retrieval, information extraction and deep web research by Marcus P. Zillman, M.S., A.M.H.A. are available by clicking here. The Online Research Tools White Paper Link Compilation was updated **July 5, 2008**.

NextBio - Life Science Search Engine
http://www.nextbio.com/
NextBio is a life science search engine that enables researchers and clinicians to access and understand the world's life sciences information. With NextBio, in just one click you can search through tens of thousands of study results with billions of data points spanning across different experimental platforms, organisms and data types. NextBio also searches across millions of publications to help you find new articles pertaining to your query. NextBio's search engine makes massive amounts of disparate biological, clinical and chemical data from public and proprietary sources searchable, regardless of data type and origin, and empowers scientists to quickly understand their own experimental results

within the context of other research. NextBio is designed to be used by anyone interested in basic and clinical research, drug discovery or biology. This has been added to Healthcare Resources Subject Tracer™ Information Blog. This has been added to eHealthcare Bot Meta Search Engine script and code.

Open Workbench - Open Source Project Scheduling for Windows
http://www.openworkbench.org/
Open Workbench is an open source Windows-based desktop application that provides robust project scheduling and management functionality and is free to distribute throughout the enterprise. When users need to move beyond desktop scheduling to a workgroup, division or enterprise-wide solution, they can upgrade to CA's Clarity™ system, a project and portfolio management system that offers bidirectional integration with Open Workbench. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Earth Sciences History
http://hess.metapress.com/home/main.mpx
Publisher: History of Earth Sciences Society. Earth Sciences History promotes and publishes historical work on all areas of the earth sciences including geology, geography, geophysics, oceanography, paleontology, meteorology, and climatology. The journal honors and encourages a variety of approaches to historical study: biography, history of ideas, social history, and histories of institutions, organizations, and techniques.

Unit Conversion Online - Unique Tool for All Converting
http://www.convertworld.com/
How many pounds is a kilo? How many feet is 18 meters? How many British pounds are my 10 dollars worth today? Convert world is the unique tool for all your converting! You are never more than one click away from a totally free of charge converting between currencies, weight, volume, mass, time, distance and more. Convert world is available in different languages and is updated daily with the latest exchange rates. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Wordle - Word Clouds
http://wordle.net/
Wordle is a tool for generating "word clouds" from text that you provide. The clouds give greater prominence to words that appear more frequently in the source text. You can tweak your clouds with different fonts, layouts, and color schemes. The images you create with Wordle are yours to use however you like. You can print them out, or save them to the Wordle gallery to share with your friends. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Serena Business Mashups
http://www.serena.com/mashups/index.html
Looking to beat the backlog of your simple application needs? Want to innovate and bring greater efficiency to your organization? Serena Business Mashups let you beat the backlog for Sales, HR, Finance, IT, Support, or applications like Salesforce.com. They let you bring together people, data, and processes leveraging the power of SOA, web services, and you. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Embassy: Canada's Foreign Policy Newsweekly
http://www.embassymag.ca/
Embassy Newspaper is the Wednesday edition of The Hill Times, the best-read political newspaper in Canada. Embassy Newspaper, like her sister paper The Hill Times, covers the inside world of Canadian federal politics but Embassy Newspaper delves more deeply into Canadian foreign policy, how foreign policy and international issues affect domestic politics, and the key players who conduct business for Canada on the international stage. Embassy's news and analysis focus on heavily important issues such as trade, defense, international policy and development, public safety, the environment, immigration, diplomacy, and sovereignty. It also covers breaking international news and Canada's role on the international scene. Embassy's opinion pages are filled with challenging ideas and analyses from leading Canadian thinkers and writers.

Bungee Connect - Highly Interactive Applications Platform-as-a-Service (PaaS)
http://www.bungeeconnect.com/
Bungee Labs is creator of the Bungee Connect™ web application development and hosting platform-as-a-service (PaaS), a single environment for building and delivering a new class of interactive rich web applications. Bungee Connect eliminates significant complexity, time and cost across the entire application lifecycle. Businesses use Bungee Connect to build highly interactive web applications, then instantly deploy them on a high-performance multi-tenant grid infrastructure or on a Bungee Application Server™ running on an organization's self-managed infrastructure. Bungee Connect's immediate access, integration and presentation of public and private web services empower developers to create deeply interoperable, data-driven applications with rich interactivity — achieving highly specific and productive user experiences without the typically complex programming of web service integration, Ajax interaction, web application state management, and deployment provisioning. Bungee Connect significantly improves the full lifecycle of web applications through: a) a broadly available development environment (Bungee Builder™), b) an enterprise-level distributed delivery infrastructure (Bungee Grid™), and c) an active developer community (Bungee Connect Developer Network™). Bungee Labs is based in the Salt Lake City area and is capitalized by venture financing from North Bridge Venture Partners, Venrock Associates and Epic Ventures. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subect Tracer™ Information Blog.

Cels@Home - Cancer Research
http://cels-at-home-dev.dyndns.org/cels/
Cels@Home is a research project that uses Internet-connected computers to do research in cell adhesion. One of the many applications of this is in cancer research, as the point at which cancerous cells quit staying in place, and instead break free to move throughout the body, is a critical event that makes the disease much harder to treat. You can participate by downloading and running a free program on your computer. This has been added to Grid Resources Subject Tracer™ Information Blog.

Trade Show Handbook
http://www.TradeShowHandbook.com/
TradeShowHandbook.com is the world's most comprehensive online resource guide for the trade show, exhibition and event industry. On their site you'll find detailed information, guides, tutorials and directories for trade shows, exhibitions, public events and conferences. TradeShowHandbook.com is also designed to help facilitate the exchange between buyers and sellers to achieve a successful experience for trade show participants. However, all the listing in TradeShowHandbook.com are completely free. TradeShowHandbook.com is a free non-commercial website with sole purpose of helping support the trade show industry by educating and informing trade show participants. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

Molecular Brain
http://www.molecularbrain.com/
Molecular Brain is an open access, peer-reviewed online journal that encompasses all aspects of studies on the nervous system at the molecular, cellular, and systems level providing a forum for scientists to communicate their findings. Molecular brain research is a rapidly expanding research field in which integrative approaches at the genetic, molecular, cellular and synaptic levels yield key information about the physiological and pathological brain. These studies involve the use of modern techniques such as approaches of molecular biology, genomics, proteomics, modern electrophysiology and neurobiology.

NZResearch - Kiwi Research Information Service
http://nzresearch.org.nz/
This website is a gateway to the open-access research documents produced at universities, polytechnics, and other research institutions throughout New Zealand. They have harvested research document metadata from around New Zealand and collected it in one place. You can use this website to search for research, look up specific subjects or authors, browse the research in various ways, and keep abreast of emerging research activity. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources white paper.

Medical-Dictionaries.org - Free Medical Dictionary Medical Terms
http://medical-dictionaries.org/
In Medicine, words have very specific meanings and are carefully used. Medical-Dictionaries.org is a lookup guide to the essential language of Medicine. Medical-Dictionaries.org is easy-to-use and comprehensive - the ideal quick reference guide for health care professionals and laypersons alike. It provides clear and instructive definitions, abbreviations, phrases and acronyms. With over 40,000 entries in its database, Medical-Dictionaries.org covers a vast array of medical terminology. Among many others, you may search for medical terms related to: a) AIDS/HIV, b) Alternative Medicine, c) Cancer, d) Diabetes, e) Eye Disease and f) Medical Abbreviations. Medical-Dictionaries.org is designed to assist in the understanding of medical terminology. It is not intended to replace the services of a physician. The medical terminology on Medical-Dictionaries.org is provided for informational purposes only and is not a substitute for professional medical advice. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Assisted Senior Living Facilities Directory and Reviews
http://www.assistedseniorliving.net/
The National Center for Assisted Living has estimated that there are almost 40,000 assisted living facilities across the US with a total population of around 1 million residents. Many families are forced to select an Assisted Living Facility or Nursing Home under significant pressure and with very little experience on the selection process. In many cases, seniors move to an assisted living facility or nursing home after a traumatic event like a stroke, aneurysms or fall. Whether moving directly from a hospital or from another special care facility after successful treatment, assisted living can be a short-term or long-term housing arrangement. Selecting an Assisted living facility is critical to the stability and health of a senior and is challenging because the expense is not cover by Medicare. This site is design to help both seniors and families of senior. In many cases senior need the support of their families to help them with their housing and finances. This site includes information about assisted living facilities including reviews and feedback by residents. Since many assisted living communities require a significant deposit ($5000 or more) to move in, it is important to know everything possible about the business. Since most people prefer a assisted living facility or nursing home near their current residence, they developed an advanced search (Find All Facitilites) to get a list of surrounding facilities sorted by the distance from your home address or zip code. This has been added to Elder Resources Subject Tracer™ Information Blog.

International Digital Media and Arts Association Journal
http://www.idmaa.org/journal/
The purpose of the iDMAa is to promote the development, application, and understanding of digital media and arts. The purpose of the iDMAa Journal is to promote those efforts, providing a forum where scholars and practitioners can converse about the many issues, challenges, and new developments that are shaping our increasingly digital world. Articles and other works on digital media and arts are welcome at any time.

Dipity - Interactive Timelines
http://www.dipity.com/
Dipity is the easiest way to make and share interactive timelines about the people and things you care about. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Quirks - Worldwide Market Research Resources
http://www.quirks.com/
Worldwide Market Research Resource ... If you conduct, coordinate, use or purchase market research or marketing research services then Quirks.com is the Web site you need. Here you'll find:

7100+ Market Research Companies
2000+ Market Research Articles
600+ Market Research Job Openings
1300+ Definitions of Market Research Terms
100+ Market Research Industry Events
15+ Market Research Degree Programs
1000+ Focus Group Facilities
1100+ Focus Group Moderators
800+ Telephone Interviewing Facilities
350+ Market Research Softare Titles
400+ Market Research Panels
350+ Mystery Shopping Companies
Many More Marketing Research Resources

This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. Outsell - Intelligence and Advice for Publishers and Information Providers
http://www.outsellinc.com/
Outsell is the only research and advisory firm focused on the publishing, information, and education industries. Their international team provides independent, fact-based analysis and actionable advice about competitors, markets, operational benchmarks, and best practices, so their clients thrive and grow in today's fast-changing digital and global environment. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Advances in Optical Technologies
http://www.hindawi.com/journals/aot/
Advances in Optical Technologies aims to serve the applied optics community with an open access journal that is freely available to all interested readers. There is no journal

serving this community with online communication of important ideas and accomplishments in such a way. Optics is growing as a field, but no mechanism exists for communicating the applied aspects of the field in a way that is universally accessible. Anyone can read any article in Advances in Optical Technologies at any time. The use of color figures will be freely available for all authors, which is especially important as many applications involve images and graphs which are easier to understand in color. Furthermore, authors will be able to attach short movies to their submissions which is vital to better illustrate their ideas.

FastCommerce - Everything You Need to Run Your Online Business Free or Fee
http://www.fastcommerce.com/
Fastcommerce.com provides business management software to small businesses, delivered on demand as a service via the web on a free or paid monthly subscription basis. They provide small businesses with a complete fully integrated package that run their entire operations, from inventory control, sales, marketing, support, online catalog, e-commerce, backend order processing and built-in UPS and Fedex shipping tools. The only requirement to use their software is an internet connection. Unlike a traditional software company, our small business customers do not need to buy and maintain expensive software and hardware. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

VideoJug - Comprehensive Library of Free Factual How To and Ask the Expert Videos
http://www.VideoJug.com/
Since launching in September 2006, VideoJug has grown into the world's most comprehensive library of free factual video content online. Their professionally-produced, high definition videos cover every conceivable topic and the site is considered the definitive online encyclopedia of life. The video content on the site takes a variety of formats that include informative "How To" and "Ask The Expert" films that guide you, step-by-step, through everything and anything in life. The "How To" format delivers easy-to-follow, bite-size tutorials on a wide range of topics from cleaning tips and sport, to relationship advice and recipes. They search the globe to find leading experts in their respective fields, for the "Ask the Expert" format - be they celebrities, professors, high-flying professionals, coaches, teachers, or consultants - who provide answers to common questions and concerns. This has been added to Tutorial Resources Subject Tracer™ Information Blog. This has been added to Internet Experts Subject Tracer™ Information Blog.

SimplyBill - Simple Powerful Invoice Management
http://www.simplybill.com/
Simplybill brings simple invoice management to all. Instead of wrestling with overly complex accounting software or trying to mash-up a spreadsheet into some sort of design, begin sending attractive invoices in minutes. Simplybill is a web-based application. They

have simplified things, ignoring features that nobody uses and making the rest ridiculously easy-to-use. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Scientific and Technical Information Processing
http://springerlink.com/content/120693/
This journal is a publication of VINITI, the All-Russian Institute for Scientific and Technical Information, which is known throughout the world as a supplier of a wide variety of informational services. Articles in the journal cover organizational and procedural aspects of scientific information analysis and processing. Some subjects covered are:

* Scientific and technical data networks
* Specialized technical information services
* Special information market analysis
* Databases and databanks
* Information infrastructure development
* New sources of industrial information
* Hypertext technology for scientific research
* Library classifications and acquisition policies
* Data security and legal aspects of data resources
* Activities of central and technical libraries

Many articles concern organizational systems for institutes, industrial information systems, information flow, library user needs and comparison of Russian and foreign methods.

Event Photo Exchange
http://www.eventphotoexchange.com/
Digital cameras are everywhere these days. The one thing we all share as individuals is events (parties, reunions, sporting events, conventions, campouts, etc.) - and these events usually have a number (perhaps even thousands) of individuals snapping photographs at every opportunity. The Event Photo Exchange Depot provides a simple and low-cost mechanism for the sharing of all such photos on an event-specific basis. When registered with EventPhotoExchange.com an event is assigned a unique event code. Event attendees, participants, and photographers all then use this eventcode to access, view, share, and upload images related to that event. No additional registreation is necessary. The Photo Exchange Depot for that event remains online for a specific period of time following the event to allow for all interested exchanges, selections, & downloads to take place. The service is simple, straightforward, and task-specific. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has

been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

RRDtool - Logging and Graphing
http://oss.oetiker.ch/rrdtool/
RRDtool is the OpenSource industry standard, high performance data logging and graphing system for time series data. Use it to write your custom monitoring shell scripts or create whole applications using its Perl, Python, Ruby, TCL or PHP bindings. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Thoughtograph - Freedom to Think, Share and Evolve
http://www.thoughtograph.co.uk/
Thoughtograph is software that is designed to help you: a) organise and structure your thoughts visually, b) plan and structure your ideas and projects, and c) help you memorise and recall key information by speeding up and accelerating your study. Thoughtograph is simple, effective and rewarding to use. A Thot is a Thoughtograph file, it is a visual representation of your thoughts taking shape. For those familiar with mind mapping, spider diagrams and concept mapping the interface will feel familiar and intuitive. For those new to laying out their thoughts visually it will liberate you from trying to replicate your thoughts and study notes in the constraints of a linear format. Study Thots: Allow your creativity, ideas and thought processes to flow. Planning Thots: Freedom to play, share and evolve ideas and processes. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

International Journal on Semantic Web and Information Systems (IJSWIS)
http://www.ijswis.org/
The International Journal on Semantic Web and Information Systems is an open forum aiming to cultivate the Semantic Web vision within the Information Systems research community. In the common practice of anticipating Semantic Web as a technology driven phenomenon, a scientific insight is provided, which reveals the practical implications and the research challenges of SW in the context of Information Systems. It goes beyond the traditional research agenda of Information Systems and critical themes are analyzed through a Semantic Web perspective in horizontal and vertical pillars. The main idea is to communicate high quality research findings in the leading edge aspects of Semantic Web and Information Systems convergence. This statement distinguishes our journal and differentiates our publishing strategy from other publications: Traditionally Semantic Web is treated as a technological phenomenon with the main emphasis on technologies, languages and tools without similar attention given to theoretical constructions or linkages to multidisciplinary references: Our focus is on the Information Systems Discipline and we are working towards the delivery of the main implications that the Semantic Web brings to Information Systems and the information/Knowledge Society. The main themes covered in the journal include:

* Semantic Web Issues, challenges and Implications in each of the IS research streams

* Real world applications towards the development of the Knowledge society
* New Semantic Web enabled Tools for the citizen/ learner/ organization/business
* New Semantic Web enabled Business Models
* New Semantic Web enabled Information systems
* Integration with other disciplines
* Intelligent Systems
* Standards
* Semantic enabled business intelligence
* Enterprise Application Integration
* Metadata-driven (bottom-up) versus ontology-driven (top-down) SW development
* From e-Government to e-Democracy

This has been added to the semantic web research section of Deep Web Research Subject Tracer™ Information Blog.

BzzAgent - Leading World of Mouth (WOM) Media Network
http://www.bzzagent.com/
BzzAgent enables marketers to reap the benefits of word-of-mouth (WOM) marketing in an organized and measurable way. A BzzAgent word-of-mouth marketing campaign provides targeted reach and measurable returns. We help bring the right brands together with the right consumers to enhance traditional media buys. Traditional media channels create awareness. WOM advocacy adds credibility. The results are powerful when traditional and new media work together: trial, purchase, adoption and commitment. 40% of WOM conversations include a reference to another form of media — breathing life into traditional media buys and increasing the effectiveness of your overall marketing campaign. When you add BzzAgent word-of-mouth marketing to your mix, you'll see that Awareness (impressions) + Credibility (word of mouth) = Results (trial, purchase, etc.). This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Beeswax - Information Management System
http://waxandwane.org/beeswax/beeswax.html
Beeswax is an information management system inspired by Lotus Agenda. It aims to recreate Agenda's flexibility and efficiency in a clutter-free, text-based (ncursesw) user interface with vi key bindings. Beeswax views & reports will have specifications for sections, columns, filtering, and sorting. Release v0.2.0 is a somewhat stable base of functionality on which the remaining features will be built. Since columns and custom views are not yet included, it is essentially Beeswax with just a single hierarchical view of all items. The concept is that you have a database of information stored as individual items. Each item is a bit of information shown on the screen with a small bullet character at the beginning. In addition, each item can have a note attached to it to hold more extensive information. Notes are stored within the Beeswax database, but are edited by Beeswax launching your favorite text editor. When an item has a note attached, there is a

small musical note displayed at the beginning of the item. The Beeswax database has no predefined structure; instead, the structure is built up in a flexible manner as you work with the data. Each item of information can be assigned to zero or more categories. Categories are nothing more than items that have other items assigned to them. In Agenda, there was a separate distinction between items and categories, but in Beeswax they have generalized it even further and removed this distinction. If an item has other items assigned to it, then it is considered a category. On the other hand, if an item is assigned to more than one category, then it itself can not be used as a category. The relationships between items of information are highly flexible. An item can be easily assigned to several different categories and the view immediately displays the new relationships. An item can just as easily be detached from categories. As you move items through Beeswax, their relationship to each other remains highly flexible. The best way to understand all this is to get into Beeswax and start using it! This has been added to World Wide Web Reference Subject Tracer&tracer™ Information Blog.

Graphite - Highly Scalable Real-Time Graphing System
http://graphite.wikidot.com/
Graphite is a highly scalable real-time graphing system. As a user, you write an application that collects numeric time-series data that you are interested in graphing, and send it to Graphite's processing backend, carbon, which stores the data in Graphite's specialized database. The data can then be visualized through graphite's web interfaces. Graphite is actually a bit of a niche application. Specifically, it is designed to handle numeric time-series data. For example, Graphite would be good at graphing stock prices because they are numbers that change over time. However Graphite is a complex system, and if you only have a few hundred distinct things you want to graph (stocks prices in the S&P 500) then Graphite is probably overkill. But if you need to graph a lot of different things (like dozens of performance metrics from thousands of servers) and you don't necessarily know the names of those things in advance (who wants to maintain such huge configuration?) then Graphite is for you. This has been aded to Statistics Resources Subject Tracer™ Information Blog.

International Journal of Business and Management
http://ijbm.net/default.aspx
International Journal of Business and Management, published six times a year. The former name was Asia-pacific Review of Business, established in 1998. The name was changed to International Journal of Business and Management in 2006, expanding an international view. Both theoretical and empirical contributions in all fields of economics and quantitative-oriented business (including, but not limited to, finance, insurance, operations research, quantitative management, and accounting), self-contained constructive comments, and even pedagogical notes of high quality are welcomed, while policy debates of general nature are not suitable. Book reviews of high quality (edited but not refereed) will be published occasionally.

Apture - Easily Turn Flat pages of Text Into a Compelling Multimedia Experience
http://www.apture.com/
Apture provides the first rich communication platform that allows people to intuitively experience the web. With just one line of code, publishers and bloggers can quickly and easily turn flat pages of text into a compelling multimedia experience. Apture gives content creators the power to find and incorporate relevant multimedia items directly into their pages. Readers can then access these items without ever leaving the page, providing them with a deeper and more meaningful web experience. The web is the richest communication medium ever conceived. It is the only medium that enables users to combine all forms of media — text, audio, video, images...you name it — with true interactivity. Today, however, the web is still mainly used to display flat pages connected by links to more flat pages. Why does the web have to be flat? Apture began by questioning the core principles of what the web could be, and focused on building toward ideals, while looking beyond the limits imposed by previous technologies. Apture is paving the way toward a new era of the web, filled with incredible opportunities for communication and commerce that will have a significant impact on how we understand the world around us. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

FictionDB
http://www.fictiondb.com/
FictionDB now offers free access to their genre fiction reference databases including book lists (50,000 authors and 200,000 titles), synopses, cover illustrations, reviews, awards and series lists. This has been added to Reference Resource Subject Tracer™ Information Blog.

Videos from the U.S. Government : USA.gov
http://www.usa.gov/Topics/Video.shtml
USA.gov links to videos, video clips, movies, simulations, and public service announcements produced by United States federal government agencies, departments, and commissions. Most of these videos are available for use in the public domain; check the disclaimers on each website to determine if the image is in the public domain. New Biotechnology
http://www.elsevier.com/wps/product/cws_home/713354
New Biotechnology is the official journal of the European Federation of Biotechnology (EFB) and will be published bimonthly. It will cover both the science of biotechnology and its surrounding political, business and financial milieu. The journal will publish peer-reviewed basic research papers, authoritative reviews, feature articles and opinions in all areas of biotechnology. It will reflect the full diversity of current biotechnology science, particularly those advances in research and practice that open opportunities for exploitation of knowledge, commercially or otherwise, together with news, discussion

and comment on broader issues of general interest and concern. The outlook will be international. The scope of the journal will include the research, industrial and commercial aspects of biotechnology, in areas such as: Healthcare and Pharmaceuticals; Food and Agriculture; Biofuels; Genetic Engineering and Molecular Biology; Genomics and Synthetic Biology; Nanotechnology; Environment and Biodiversity; Biocatalysis; Bioremediation; Process engineering. The journal will take a scientific approach to non-scientific issues, and will also comment on matters of safety, regulation, international relations, public perceptions, ethical and societal aspects, education, and research funding. This has been added to Biotechnology Resources Subject Tracer™ Information Blog.

GovTrack - Tracking the U.S. Congress
http://www.govtrack.us/
GovTrack provides tools for tracking legislation, votes and members of the US Congress. For each member of Congress, information provided includes committee membership, voting history, congressional terms and bill sponsorship. They have information on all bills and votes going back over a decade, and you can subscribe to RSS feeds to keep up with the latest activity in Congress. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Slantly - Opinion and Discussion
http://www.slantly.com/
Slantly is a new kind of platform for sharing your opinions. Whether you are someone who likes to actively contribute your ideas to conversations or someone who enjoys more passively reading them, Slantly provides the features to start, contribute, read and otherwise engage in debates. Slantly not only tells you what topics are popular, but also how people feel about the topic. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

reCAPTCHA - Privacy While Digitizing Books One Word At a Time
http://recaptcha.net/index.html
A CAPTCHA is a program that can tell whether its user is a human or a computer. You've probably seen them — colorful images with distorted text at the bottom of Web registration forms. CAPTCHAs are used by many websites to prevent abuse from "bots," or automated programs usually written to generate spam. No computer program can read distorted text as well as humans can, so bots cannot navigate sites protected by CAPTCHAs. About 60 million CAPTCHAs are solved by humans around the world every day. In each case, roughly ten seconds of human time are being spent. Individually, that's not a lot of time, but in aggregate these little puzzles consume more than 150,000 hours of work each day. What if we could make positive use of this human effort? reCAPTCHA does exactly that by channeling the effort spent solving CAPTCHAs online into "reading" books. To archive human knowledge and to make information more

accessible to the world, multiple projects are currently digitizing physical books that were written before the computer age. The book pages are being photographically scanned, and then, to make them searchable, transformed into text using Optical Character Recognition (OCR). The transformation into text is useful because scanning a book produces images, which are difficult to store on small devices, expensive to download, and cannot be searched. The problem is that OCR is not perfect. reCAPTCHA improves the process of digitizing books by sending words that cannot be read by computers to the Web in the form of CAPTCHAs for humans to decipher. More specifically, each word that cannot be read correctly by OCR is placed on an image and used as a CAPTCHA. This is possible because most OCR programs alert you when a word cannot be read correctly. But if a computer can't read such a CAPTCHA, how does the system know the correct answer to the puzzle? Here's how: Each new word that cannot be read correctly by OCR is given to a user in conjunction with another word for which the answer is already known. The user is then asked to read both words. If they solve the one for which the answer is known, the system assumes their answer is correct for the new one. The system then gives the new image to a number of other people to determine, with higher confidence, whether the original answer was correct. Currently, they are helping to digitize books from the Internet Archive. This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Privacy Resources Subject Tracer™ Information Blog.

China Media Research
http://www.chinamediaresearch.net/
China Media Research is dedicated to the dissemination of updated knowledge of all aspects of Chinese media research and related topics. The main purpose of China Media Research is to serve as a bridge between Chinese and world media studies, therewith to promote global harmony. The journal is intended to bring the results of Chinese media research to the attention of the world, as well as to facilitate, in reciprocal fashion, the acquaintance of scholars within China with media research done outside of China. Therefore, not only papers directly related to all the fields of Chinese media research are desirable, but also thoughtful, pioneering media research papers from any sectors of the world, the acquaintance with which would be useful for media scholars within China, are also welcome. Submissions can be a variety of types; in addition to regular papers, book reviews, investigative reports, opinions/debates, interviews, news items, letters, etc. are all suitable.

Tagcow™ - Make Your Photos Searchable
http://www.tagcow.com/
They say Tagcow.com™ is simply the best image and photo tagging service in the World! They offer both descriptive tagging and people tagging for all your images. Descriptive tagging identifies objects within your images and turns them into searchable meta data. For even more fun use their people tagging feature to identify the people in your photos. Find that silly photo of your friend Tom sleeping at his desk easier than you can find directions to your next job interview using Google Maps. Tagcow.comtm is also

laying the groundwork for a simple image management system for the everyday shutterbug. Their Flickr integration allows you to synch your Tagcow.com account with your Flickr account - this is just the tip of the iceberg of what's to come. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

NowNow - Receive Answers to your Questions via Mobile eMail
http://www.nownow.com/
NowNow is a service that mobile users can use to find answers to any question via mobile email. When you post a question to NowNow via email (ask@nownow.com), our NowNow workers will surf the web to find the answer for you. NowNow workers are users who are being paid to search the web on your behalf. NowNow bypasses the need for mobile users to go to the web to find answers to questions as NowNow will send you an email with up to 3 answers to each question you ask. We have not finalized our pricing for each question, however, we expect each question will cost less than $0.25. During this beta-test period all questions asked will be FREE. This has been added to Internet Experts Subject Tracer™ Information Blog.

Amazon Mechanical Turk
http://www.mturk.com/mturk/
Amazon Mechanical Turk provides a web services API for computers to integrate "artificial artificial intelligence" directly into their processing by making requests of humans. Developers use the Amazon Mechanical Turk web service to submit tasks to the Amazon Mechanical Turk web site, approve completed tasks, and incorporate the answers into their software applications. To the application, the transaction looks very much like any remote procedure call: the application sends the request, and the service returns the results. Behind the scenes, a network of humans fuels this artificial artificial intelligence by coming to the web site, searching for and completing tasks, and receiving payment for their work. For software developers, the Amazon Mechanical Turk web service solves the problem of building applications that until now have not worked well because they lack human intelligence. Humans are much more effective than computers at solving some types of problems, like finding specific objects in pictures, evaluating beauty, or translating text. The Amazon Mechanical Turk web service gives developers a programmable interface to a network of humans to solve these kinds of problems and incorporate this human intelligence into their applications. For businesses and entrepreneurs who want tasks completed, the Amazon Mechanical Turk web service solves the problem of getting work done in a cost-effective manner by people who have the skill to do the work. The service provides access to a vast network of human intelligence with the efficiencies and cost-effectiveness of computers. Oftentimes, the cost of establishing a network of skilled people to do the work outweighs the value of completing it. By turning the fixed costs into variable costs that scale with business needs, the Amazon Mechanical Turk web service eliminates this barrier and allows work to be completed that before was not economical. For people who want to earn money in their spare time, the Amazon Mechanical Turk web site solves the problem of finding

work that they can do wherever and whenever they want. This has been added to Internet Experts Subject Tracer™ Information Blog. This has been added to Script Resources Subject Tracer™ Information Blog. This has been added to Employment Resources Subject Tracer™ Information Blog.

Promotion & Education
http://ped.sagepub.com/
Promotion & Education, is the official publication of the International Union for Health Promotion and Education (IUHPE). It is a multilingual journal, which publishes authoritative peer-reviewed articles and practical information for a world-wide audience of professionals interested in health promotion and health education.
The journal aims to:

* publish academic content and commentaries of practical importance;

* provide an international and interdisciplinary forum for the dissemination and exchange of health promotion, health education and public health theory, research findings, practice and reviews;

* publish articles which ensure wide geographical coverage and are of general interest to an international readership;

* provide fair, supportive, efficient and high quality peer review and editorial handling of all submissions.

CrossCheck - Verify Originality of Submitted Manuscripts
http://www.crossref.org/crosscheck.html
CrossCheck powered by iThenticate" is a new initiative from CrossRef to help the scholarly publishers verify the originality of submitted manuscripts. The need of a plagiarism tool was identified as a top priority by CrossRef members in 2006 and as a result CrossRef researched the best plagiarism tools on the market to provide a solution for the CrossRef members. CrossCheck is really two products, a database of scholarly publications and a web-based tool to check an authored work against that database. The web-based tool can be used in the editorial process to identify matching text but it can not, on its own, identify plagiarism. A human has to look at the matching text and use their best judgment to identify if plagiarism has occurred or not. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

PolicyArchive - Digital Archive of Global, Non-partisan Public Policy Research
https://www.policyarchive.org/
PolicyArchive is an innovative, new digital archive of global, non-partisan public policy research. It makes use of the power, efficiency, and economy of modern Internet technology to collect and disseminate summaries and full texts, videos, reports, briefs, and multimedia material of think tank, university, government, and foundation-funded

policy research. It offers a subject index, an internal search engine, useful abstracts, email notifications of newly added research, and will soon expand to offer information on researchers and funders, and even user-generated publication reviews. Over time, it will grow to include policy content from international and corporate organizations. PolicyArchive is a comprehensive digital library of public policy research containing over 12,000 documents. This has been added to Research Resources Subject Tracer™ Information Blog.

World Trade Indicators 2008
http://snipurl.com/2tgl8
World Trade Indicators (WTI), an interactive tool designed to benchmark a country's trade policy and institutions and help policy makers, advisors, and analysts' identify the main border and behind-the border constraints to trade integration. The WTI 2008 database is organized in five thematic categories, namely Trade Policy, External Environment, Institutional Environment, Trade Facilitation and Trade Outcome. Each category contains a main indicator and other reference indicators. Countries' trade performance can be examined individually as well as in relation to other countries or country groupings, including by membership of trade agreements. To capture the key insights from both the indicators and country-level trade-related analytical work, Country Briefs and Trade at-a-Glance (TAAG) tables are also are provided. An overview report summarizes global patterns in trade policy and trade outcomes revealed by the database focusing mainly on regional and income level variations. The User Guide provides descriptions for the 299 indicators in the database, including data sources. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This will be added to International Trade Resources Internet MiniGuide.

International Journal of Computational Biology and Drug Design
http://www.inderscience.com/ijcbdd
IJCBDD is an official journal of the International Society of Intelligent Biological Medicine and provides a common platform for the cross-fertiliztion of ideas, and to help shape knowledge and scientific achievements by bridging these two very important and complementary disciplines into an interactive and attractive forum. With the advances of high throughput genome sequencing and digital imaging technologies, biocomputing, drug design and medical research have unfolded a series of new, predictive sciences that share the appendage –omics, such as genomics, proteomics, lipidomics, metabolomics, cytomics and pharmaconomics. These have promoted new emerging computational, statistical and biomedical approaches to drug design and drug development as well as unleashing the potential of significantly more accurate and more effective personalised diagnosis, therapeutics, and patient care. Emerging high-performance computing, statistical learning and artificial intelligence approaches will help in discovering the disease variations and developing new approaches to drug development, disease prevention, treatment and personalised healthcare. Computational biology and drug design are complementary disciplines that hold great promise for the advancement of

cutting-edge research and development in biomedical and pharmaceutical sciences. Research and advances in these two areas influence broad ranges of scientific and engineering fields.

We Compare Books - Book Price Comparison Engine for Student Books
http://www.wecomparebooks.com/
This is a book price comparison engine that is dedicated to helping students find the best prices on books. We Compare Books is a free service that assists you in finding the best deal on the student text books you need. They are an independent and impartial web site, not owned by any bookstore. The search results that are presented to you are therefore totally objective. The goal of We Compare Books is to find the best possible price for the books you want. Once you tell them what book you are looking for they hunt for the cheapest price and display the results. They search multiple online bookstores and are always increasing our search capability constantly to better serve you. They are here to help you find the best offer for the book you want without needing to visit each and every booksite. They do all of the work for you, finding the book you want at the best possible price. Once you enter a search criteria, be it the title, author, ISBN, subject of a book or keywords pertaining to it, the We Compare Books search engine looks up various online bookstores to find books that match your criterias. The results are then displayed and you can compare prices for every book, ensuring you do not pay any more than you have to. This has been added to ShoppingBots Subject Tracer™ Information Blog. August 2008 Zillman Column - Financial Sources Available Over the Internet
http://columns.virtualprivatelibrary.net/Financial_Sources_Aug08_Column.pdf
http://www.zillmancolumns.com/
http://www.FinancialSources.info/
The August 2008 Zillman Column is now available and is titled **Financial Sources Available Over the Internet**. This August 2008 column is a comprehensive list of financial resources, sources and sites available over the Internet and the World Wide Web including associated and related online resources. These resources and sources will help you to discover the many pathways available to you through the Internet for obtaining and locating these financial sources in todays very exciting and at times hectic financial markets both here and globally! Categories that URLs are supplied include: 1) Corporate Conference Calls Sources, b) Financial Sources, c) Financial Sources Search Engines, and d) Venture Capital Sources. This is a MUST information keeper to be placed next to your computer!! Download this excellent freely available 27 page .pdf (909KB) column today and start your cyber journey into the latest and greatest financial sources available over the Internet!

Arduino - Open Source Electronic Prototyping Plastform
http://www.arduino.cc/
Arduino is an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software. It's intended for artists, designers, hobbyists, and anyone interested in creating interactive objects or environments. Arduino can sense the environment by receiving input from a variety of sensors and can affect its surroundings by controlling lights, motors, and other actuators. The microcontroller on the board is programmed using the Arduino programming language (based on Wiring) and the Arduino development environment (based on Processing). Arduino projects can be stand-alone or they can communicate with software on running on a computer (e.g. Flash, Processing, MaxMSP). The boards can be assembled by hand or purchased preassembled; the software can be downloaded for free. The hardware reference designs (CAD files) are available under an open-source license, you are free to adapt them to your needs. This has been added to tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Open Source Food
http://www.opensourcefood.com/
Amazing Recipes. Delicious Food. Beautiful Photography. Created and rated by you and fellow food-lovers from all over the world. Open Source Food is your gastronomic hub where every visit will bring inspiration and a rumbling belly... This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

The Botulinum Journal
http://www.inderscience.com/ijtbj
The Botulinum Journal provides an international source of information encompassing varied fields, including microbiology, biochemistry, biophysics, biotechnology, proteomics, genomics, pharmacology, toxicology, drug development related to different forms and types of botulinum neurotoxins, and also Clostridium botulinum. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Electronic Cultural Atlas Initiative
http://www.ecai.org/
Based at the University of California, Berkeley, the Electronic Cultural Atlas Initiative (ECAI) is a "global consortium of people who share the vision of creating a distributed virtual library of cultural information with a time and place interface." While visitors can elect to read about the technical aspects of working on such ambitious efforts, many will want to look at the "Cultural Atlas Portal" to get a start on things. Visitors will find that the Portal contains an interactive map of the world which can be used to look for materials from Australia to North America. These cultural atlases include projects like "The Salem Witch Trials Documentary Archive and Transcription Project" and "Mapping St. Petersburg". After looking over a few of these projects, visitors may wish to click on the "Community" area. Here they can learn how to contribute their own projects to ECAI

or how to work with partner institutions to create a new piece of work, visitors can also find out about ongoing projects around the globe. This has been added to Reference Resources Subject Tracer™ Information Blog. [From The Scout Report, Copyright Internet Scout 1994-2008. http://scout.wisc.edu/]

bideasi - Buyer Initiated Auctions
http://www.bideasi.com/
bideasi was founded in 2006. Their fundamental principle is that a buyer should initiate an auction rather than a seller. The buyer will benefit from free listings and a chance to get a good deal. Sellers benefit by being guaranteed that a market exists for their products or services, and sellers are only obliged to pay fees when they successfully sell their item. bideasi ensures that sellers shall also receive a fair price for their products or services. The bideasi experience is greatly improved by providing what should be a NON fraudulent auction site. Fraudulent transactions are all but eradicated using bideasi's Escrow service. This has been added to Auction Resources Subject Tracer™ Information Blog.

Skout™ Project - Resources for Designers
http://skout.co.za/
A very comprehensive resource listing for designers by designers and maintained by Mokokoma Mokhonoana. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

International Journal of Management and Network Economics
http://www.inderscience.com/ijmne
International Journal of Management and Network Economics is devoted to the study of network industries (e.g. telecommunications, energy, air transport) and reflects the need for new and adapted management and economic theories, models and frameworks in the current dynamic, complex and evolving business environment. Advanced managerial, financial and economic findings and research related to the development of interconnected networks attempt to modify the modern debate regarding network industries. Their importance relies on expectations of growth of several and differing private and public sectors, especially in the light of market liberalisation and increasing attention to quality management, customer satisfaction, technological innovation and value creation. Accordingly, financial markets, customers, public authorities and companies are looking for advances in network management and economics that can provide long-term benefits for both private and public stakeholders. New and adapted theories, models and frameworks are necessary to understand such a dynamic, complex and evolving scenario.

Web Resizer - Free Online Crop and Resize Photos for Web and eMail
http://webresizer.com/
This free online image Web Resizer helps you optimize photos for web or email. Easy to use with excellent results! Features include: 1) reduce image size, 2) crop photos, 3)

sharpen, 4) resize - change width and height, 5) rotate, 6) adjust contrast, brightness, saturation, 7) convert photo to black and white, 8) add a border, 9) no registration required, and 10) free! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Updated> Academic and Scholar Search Engines and Sources
http://www.ScholarSearchEngines.com/
I have updated my Internet MiniGuide Annotated Link Compilation White Paper titled "Academic and Scholar Search Engines and Sources" which is now a 47 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (1.30MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. [Update Posted July 22, 2008]

ReportBuyer - Market Research
http://www.ReportBuyer.com/
Reportbuyer.com has over 43,000 reports in various industry sectors including automotive, banking, business services, computing, food/drink, media, pharmaceuticals, retail and telecoms. In addition, they have launched a new multi-industry B2B conference listing page on our website. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

eLearning Papers
http://www.elearningpapers.eu/
eLearning Papers adds a new dimension to the exchange of information on e-learning in Europe and stimulates research. As such, the articles provide views regarding the current situation and e-learning trends in different communities: schools, universities, companies, civil society and institutions. eLearning Papers provides all those interested with an opportunity to have their texts published throughout Europe. Through these articles, the journal promotes the use of ICT for lifelong learning in Europe. The scope of the eLearning Papers reflects the four interest areas of elearningeuropa.info: schools, higher education, training and work and learning and society. All e-learning related themes are accepted as topics. The following topics are given as an example: 1) Technologies, 2) Pedagogy, 3) Process, 4) Quality and evaluation, 5) eInclusion, and 6) Learning environments. This has been added to Reference Resources Subject Tracer™ Information Blog. This will be added to Education and Distance Learning Resources Internet MiniGuide.

Journal of Applied Biomedicine
http://www.zsf.jcu.cz/jab
The Journal of Applied Biomedicine, a quarterly journal, receives research papers from Europe and overseas. It promotes the translation of basic biomedical research into clinical investigation, the conversion clinical evidence into practice, and the publication of new ideas for conquering human health problems across disciplines.

CiteSeerX - Scientific Literature Digital Library and Search Engine
http://citeseerx.ist.psu.edu/
CiteSeerX is a scientific literature digital library and search engine that focuses primarily on the literature in computer and information science. CiteSeerX aims to improve the dissemination of scientific literature and to provide improvements in functionality, usability, availability, cost, comprehensiveness, efficiency, and timeliness in the access of scientific and scholarly knowledge. Rather than creating just another digital library, CiteSeerX attempts to provide resources such as algorithms, data, metadata, services, techniques, and software that can be used to promote other digital libraries. CiteSeerX has developed new methods and algorithms to index PostScript and PDF research articles on the Web. CiteseerX provides the following features: a) Autonomous Citation Indexing (ACI)... CiteSeer uses ACI to automatically create a citation index that can be used for literature search and evaluation. Compared to traditional citation indices, ACI provides improvements in cost, availability, comprehensiveness, efficiency, and timeliness; b) Citation statistics ... CiteSeer computes citation statistics and related documents for all articles cited in the database, not just the indexed articles; c) Reference linking ... As with many online publishers, CiteSeer allows browsing the database using citation links. However, CiteSeer performs this automatically; d) Citation context ... CiteSeer can show the context of citations to a given paper, allowing a researcher to quickly and easily see what other researchers have to say about an article of interest; e) Awareness and tracking ... CiteSeer provides automatic notification of new citations to given papers, and new papers matching a user profile; f) Related documents ... CiteSeer locates related documents using citation and word based measures and displays an active and continuously updated bibliography for each document; g) Full-text indexing ... CiteSeer indexes the full-text of the entire articles and citations. Full boolean, phrase and proximity search is supported; h) Query-sensitive summaries ... CiteSeer provides the context of how query terms are used in articles instead of a generic summary, improving the efficiency of search; i) Up-to-date ... CiteSeer is regularly updated based on user submissions and regular crawls; j) Powerful search ... CiteSeer uses fielded search to all complex queries over content, and allows the use of author initials to provide more flexible name search; k) Harvesting of articles ... CiteSeer automatically harvests research papers from the Web; l) Metadata of articles ... CiteSeer automatically extracts and provides metadata from all indexed articles; m) Personal Content Portal featuring Personal collections, RSS-like notifications, social bookmarking, social network facilities and Personalized search settings wit Institutional data tracking possible and a Transparent document submission system. This will be added to Academic and Scholar Search

Engines and Sources White Paper. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Verving - Resources Specifically for Boomers
http://www.verving.com/
Verving is the first website created specifically for Boomers that gathers, organizes and reviews great content on the internet. It's designed to appeal to Boomers on the move, by giving them only the information and resources they want without having to wade through pages of search engine results. Verving is aimed directly at the largest and most affluent group online: an estimated 44 million Boomers, with an annual spending power of more than $1 trillion. But don't call a Boomer a Boomer. They don't like labels. Just give them the information and resources they want to fuel their passion for life. That's what Verving was designed to do. This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

PrestaShop™ - Open Source Professional e-Commerce Shopping Cart Software
http://www.prestashop.com/
PrestaShop™ is professional e-Commerce shopping cart software that you can download and use for free. The big advantage of open-source software: you're never 'locked' to expensive commercial software. Their dedicated team and growing user community join forces to fix bugs and add new functionality at a rate proprietary software companies can rarely claim. Shop owners appreciate PrestaShop's easy-to-use Back Office tool for adding and fine-tuning their storefronts (Front Office). With new & sophisticated Back-Office functionality added regularly, shop owners don't need to rely on others to make their Front Office look and act the way they want it to. Developers appreciate the clean structure of PrestaShop code that they can easily adapt to their clients' needs for quick turn-around. Thanks to its use of CSS and transplantable module blocks, the PrestaShop e-Commerce Solution can be customized for small or medium-sized businesses working within tight deadlines. Join the Open Source revolution! This has been added to eCommerce Resources Subject Tracer™ Information Blog.

International Journal of Cyber Criminology (IJCC)
http://www.cybercrimejournal.co.nr/
International Journal of Cyber Criminology (IJCC) is a peer reviewed online (open access) interdisciplinary journal published biannually and devoted to the study of cyber crime, cyber criminal behavior, cyber victims, cyber laws and cyber investigations. IJCC will focus on all aspects of cyber/computer crime: Forms of Cyber Crime, Impact of Cyber crimes in the real world, Policing Cyber space, Cyber-terrorism, International Perspectives of Cyber Crime, developing cyber safety policy, intrusion investigations, information security, Cyber Victims, Cyber Psychopathology, Geographical aspects of Cybercrime, Cyber offender behavior, cyber crime law, Cyber Pornography, Physical Computer Security, Privacy & Anonymity on the Net, Internet Fraud & Identity Theft, Mobile Phone Safety, Online Gambling, Copyright and Intellectual property Law, and

Detection of Distributed Denial of Service Attacks. As the discipline of Cyber Criminology approaches the future, facing the dire need to document the literature in this rapidly changing area has become more important than ever before. The IJCC will be a nodal centre to develop and disseminate the knowledge of cyber crimes to the academic and lay world. The journal publishes theoretical, methodological, and applied papers, as well as book reviews.

Privnote - Send Private Notes Over the Internet
https://privnote.com/
Privnote is a web tool that you can use to send private notes over the Internet. What makes Privnote different from sending a regular email or instant message? You get a link to the note, and once that link is clicked the note is destroyed so it can only be seen once. If someone intercepts the link and sees the note before the person who's intended to read it, that person will know that the note has been eavesdropped, and can tell you about it. If you want to be notified when your note gets read you can do it by checking the notify box located below then note. Neither email nor instant messaging provides a reliable way to know if, let alone when, your messages are read. If you send a note and suddenly regret having done so, you can click the link yourself which will destroy the note and prevent the receiver from reading it. Sending links in emails is as easy as writing the note in the email itself, so why not add a little extra privacy at zero cost? Besides, everybody knows how to click on a link so you won't have to explain anything new in your email. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Anonymous Voting System
http://sourceforge.net/projects/anonymousvoting/
With this system, a person can ask a yes/no-question to group of people while their answer is kept completely anonymous. The project is based on the dining cryptographers protocol. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Free and Open Source Educational Software
http://os.cqu.edu.au/oswinsdvd/doc/README.html
OSWINS DVD is a collection of Free and Open Source software for educational use that run on Windows. The OSWINS DVD is a collection of educational software from mathematics to music, from science to graphics, from programming to educational games, office tools, business software, networking tools and security software. The aim of this website is to make finding the software easier by categorising them by Key Learning Areas used in Education in Australia. In addition, under each category, links to useful websites that provide information or free resources are listed. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

International Journal of Web Services Research (IJWSR)
http://www.igi-global.com/journals/details.asp?id=4138
Web services are network-based application components with services-oriented architecture using standard interface description languages and uniform communication protocols. Due to the importance of the field, standardization organizations such as WS-I, W3C, OASIS and Liberty Alliance are actively developing standards for Web services. The International Journal of Web Services Research (JWSR) is a refereed, international publication featuring only the latest research findings and industry solutions dealing with all aspects of Web services technology. The overall scope of this journal will cover the advancements in the state of the art, standards, and practice of Web services, as well as to identify the emerging research topics and define the future of Services computing, including Web services on Grid computing, Web services on multimedia, Web services on communication, etc. The JWSR provides an open, formal publication for high quality articles developed by theoreticians, educators, developers, researchers and practitioners for professionals to stay abreast of challenges in Web services technology. The International Journal of Web Services Research includes topics related to the advancements in the state of the art, standards, and practice of Web
Services, as well as to cover the emerging research topics which are going to define the future of Web Services computing, including Web Services on Grid Computing, Web Services on Multimedia, Web services on Communication, etc. Specifically, topics of interest include, but are not limited to:

* Web Services architecture
* Web Services security
* Frameworks for building Web Service applications
* Composite Web Service creation and enabling infrastructures
* Web Services discovery
* Resource management for Web Services
* Solution Management for Web Services
* Dynamic invocation mechanisms for Web Services
* Quality of service for Web Services
* Web Services modeling
* Web Services performance
* UDDI enhancements
* SOAP enhancements
* Case Studies for Web Services
* E-Commerce applications using Web Services
* Grid based Web Services applications (e.g. OGSA)
* Business process integration and management using Web Services
* Multimedia applications using Web Services
* Mathematic foundations for service oriented computing

TekTag - Share and Discover Technical Content from Anywhere on the Web
http://www.tektag.com/
TekTag is a place for people to discover and share technical content from anywhere on the web. Before they started TekTag, they talked to lots of people, developers, IT staff, users, consultants, and some common themes emerged: how hard it is to find good technical content; what a pain it is to separate the good info from the noise; how forums can be mean-spirited and messy; and how remembering where you found something is often harder than finding it in the first place. Their mission at TekTag is to solve these problems. They started with an empty MySQL database and added tools to let people save the good stuff they find. They layered in tags and powerful search to help make finding things easier. To that they added a dollop of social features and some convenient ways to summarize and syndicate content. But the real killer feature of TekTag is you. Everything on TekTag is submitted by the community. And they depend on their users to help shape and grow TekTag. Earth System Creator
http://www.earthsystemcurator.org/
The Curator team has been working hard on developing formal descriptions of digital resources used in climate modeling. Some of the resources they are trying to describe include modeling components, the software frameworks used to write components, and output datasets. They want formal descriptions so that climate modelers worldwide can easily share information about the models they are writing, and so that tools can be written to process the descriptions. So, the Earth System Curator is both a set of formal descriptions along with tools that can process them. his has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Many Eyes - Power of Human Visual Intelligence to Find Patterns
http://services.alphaworks.ibm.com/manyeyes/home
Many Eyes is a bet on the power of human visual intelligence to find patterns. Their goal is to "democratize" visualization and to enable a new social kind of data analysis. Jump right to their visualizations now, take a tour, or read on for a leisurely explanation of the project. Everyone in CUE's Visual Communication Lab are passionate about the potential of data visualization to spark insight. It is that magical moment we live for: an unwieldy, unyielding data set is transformed into an image on the screen, and suddenly the user can perceive an unexpected pattern. As visualization designers they have witnessed and experienced many of those wondrous sparks. But in recent years, they have become acutely aware that the visualizations and the sparks they generate, take on new value in a social setting. Visualization is a catalyst for discussion and collective insight about data.

Human Affairs
http://www.versita.com/science/humanities/humaff/
Human Affairs is a postdisciplinary international journal for humanities and social sciences published in English by the Slovak Academy of Sciences, Slovakia. It aims to bring together contributions from all traditional and non-traditional fields of humanities and social sciences which relate to crucial contemporary human affairs. The underlying editorial strategy is to advance human self-understanding and communication via publishing innovative theoretical, interpretative, critical and historical contributions transcending traditional disciplinary and cultural frontiers. By publishing original and theoretical articles, empirical studies and their interpretations, reviews and notes of domestic authors, Human Affairs serves the mission of fostering multicultural and international conversation concerning the whole range of human and social issues.

Pressmart - Electronic Newspapers and More
http://www.pressmart.net/
Pressmart, is industry's most advanced solution for publishing electronic edition of Journals, newspapers, and magazine or any other publication on multiple distribution channels like Web, Mobile, RSS, Podcast, Blogs, Search Engines, Article Directories and Social Networking Sites, with integrated revenue and cost-saving capabilities. Pressmart is cited as the fastest growing online publishing service in 34 countries, in over 22 languages. Some of the leading publishing titles such as Birmingham Post, CNBC Europe, IKEA, Bangkok Post, the Sun, Hindustan Times, Deccan Chronicle, Indian Express, Lokmat and premier newspaper associations such as World Association of Newspapers (WAN) representing 63,000 publications spread over 200 countries have partnered with Pressmart for repurposing content on new media delivery channels. Energy Information Administration (EIA)- Statistical Agency of the U.S. Department of Energy
http://www.eia.doe.gov/
The Energy Information Administration (EIA), created by Congress in 1977, is a statistical agency of the U.S. Department of Energy. Their mission is to provide policy-neutral data, forecasts, and analyses to promote sound policy making, efficient markets, and public understanding regarding energy and its interaction with the economy and the environment. This has been added to Statistics Resources Subject Tracer™ Information Blog.

The Privax Network - A Web Anonymity Network
http://www.privax.us/
Privax is a web anonymity network, aimed at providing people the freedom to surf anonymously online. Privax offers free web proxy services (The Privax Network), which allow anyone in the world to surf anonymously and surf under their IP address. This has been aded to Privacy Resources Subject Tracer™ Information Blog.

Air Quality, Atmosphere and Health
http://metapress.com/content/120982/
Air Quality, Atmosphere, and Health is a multidisciplinary journal that focuses on atmospheric consequences of human activities and their implications for human and ecological health. The journal publishes original research articles and integrative reviews relevant to this theme. Among the topics addressed are acid precipitation; aerosol and particulate matter; air quality monitoring; air quality management; atmospheric chemistry; atmospheric modeling and prediction; air pollution climatology; air pollution measurement; atmospheric environment; atmospheric impact assessment; atmospheric science; clean air technology; climate change and air quality; environmental sciences; exposure assessment; forest-fire emissions; greenhouse gases; health effects; indoor air quality; regional/global change; risk assessment and satellite measurements.

Serebra Connect - Buy and Sell Business Services on the Web
https://www.serebraconnect.com/
Serebra Connect is the quickest, easiest way to buy and sell business services on the Web. Created by leading e-learning provider Serebra Learning Corporation, Serebra Connect makes online outsourcing efficient, painless and risk-free – for Buyers and Sellers. Buyers on Serebra Connect are individuals, small business owners and anyone else who wants to outsource a specific task or project to skilled freelancers – saving themselves time and money in the process. Serebra Connect lets Buyers post unlimited tasks for free and choose the best person for their task from a global pool of skilled freelancers. Serebra Connect Sellers are skilled people around the world who want to earn some extra money by completing outsourced tasks. The Serebra Connect marketplace lets Sellers connect with Buyers and earn income from their skills. Unlike other online outsourcing platforms, Sellers pay no membership or bidding fees, and are allowed to bid on as many tasks as they want for free. In addition, through the Serebra Connect Pro program, Serebra Connect actively encourages Sellers to improve their training by providing access to convenient, affordable training. Alfresco - Open Source Content and Document Management
http://www.alfresco.com/
Alfresco is the leading open source alternative for enterprise content management. The open source model allows Alfresco to use best-of-breed open source technologies and contributions from the open source community to get higher quality software produced

more quickly at much lower cost. Our goal is to not only provide an open source offering but to surpass commercial offerings in terms of features, functionality and benefits to the user community. Alfresco is built by a team of leading members from Documentum® and Interwoven® with 15 years experience in Enterprise Content Management (ECM), including the co-founder of Documentum. Features include: a) Enterprise Content Management (ECM), b) Document Management, c) Collaboration, d) Records Management, e) Knowledge Management, f) Web Content Management, and g) Imaging. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Proxify® - Anonymous Proxy Protects Your Online Privacy Without Installing Software
http://proxify.com/
Proxify® is a web-based anonymous proxy service which allows anyone to surf the Web privately and securely. Unlike other proxies, there is no software to install or complicated instructions to follow. Just enter a URL (website address) in the form above. Through Proxify, you can use websites but they cannot uniquely identify or track you. Proxify hides your IP address and our encrypted connection prevents monitoring of your network traffic. Once using Proxify, you can surf normally and forget that it is there, protecting you. While access is free, subscribers receive a much higher level of service including access to special features. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Deezer - 2.5 Million Free Songs and Music On Demand Without Download
http://www.deezer.com/
Deezer is first of all the story of a music re-inventing website, set up by its two young founders Daniel Marhely and Jonathan Benassaya. Having launched a first music playing website called Blogmusik, voluntarily closed due to a music market in turmoil, they decided to implement their business model by negotiating with the major music rights owners. For the first time, in a move that made perfect sense, they signed an agreement with French royalty collecting agencies SACEM and SESAM on 22 August 2007. On the same date, the first French unlimited access, free and legal music playing website was

launched. Deezer.com was born. The concept is simple: To offer, free of charge and legally, all kinds of music, from rock to hip-hop, jazz, electro and world music While at the same time, artists and rights owners receive a share of advertising revenue. Deezer has been highly successful due to its innovative offering and philosophy, which was widely hailed by the press. Less than two months after its launch, Deezer announced the acquisition of the catalogues of leading major and independent record companies: Sony BMG, Because Music, Believe On 14 May 2008, the website announced the signing of an international agreement with the giant Universal Music. The adventure continues, as the number of Deezer users increases with every passing day. In order to develop the offering more rapidly and implement its development strategy, the website decided to launch its own community network and expand its universe. ChucK - Strongly-timed, Concurrent, and On-the-fly Audio Programming Language
http://chuck.cs.princeton.edu/
ChucK is a new (and developing) audio programming language for real-time synthesis, composition, performance, and now, analysis - fully supported on MacOS X, Windows, and Linux. ChucK presents a new time-based, concurrent programming model that's highly precise and expressive (they call this strongly-timed), as well as dynamic control rates, and the ability to add and modify code on-the-fly. In addition, ChucK supports MIDI, OSC, HID device, and multi-channel audio. It's fun and easy to learn, and offers composers, researchers, and performers a powerful programming tool for building and experimenting with complex audio synthesis/analysis programs, and real-time interactive control. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Open Architecture Network - Improving Global Living Standards Through Collaborative Design
http://www.openarchitecturenetwork.org/
The Open Architecture Network is an online, open source community dedicated to improving living conditions through innovative and sustainable design. Here designers of all persuasions can: a) Share their ideas, designs and plans, b) View and review designs posted by others, c) Collaborate with each other, people in other professions and community leaders to address specific design challenges, d) Manage design projects from concept to implementation, e) Communicate easily amongst team members, f) Protect their intellectual property rights using the Creative Commons "some rights reserved" licensing system and be shielded from unwarranted liability, and g) Build a more sustainable future. This has been added to Reference Resources Subject Tracer™ Information Blog.

IBSU Scientific Journal
http://www.ibsu.edu.ge/journal/index.php/ibsu
The Journal is a scholarly refereed multi-disciplinary scientific journal committed to publish scientific papers in legal and social sciences, economics, history, linguistics and literature, engineering, mathematics. The Journal strives to be inclusive in scope, addressing topics and issues of significance to scholars and practitioners concerned with diverse aspects of related area. The Journal publishes research employing a variety of methods and approaches, including (but not limited to) survey research, experimental designs, case studies, ethnographic observations and interviews, grounded theory, phenomenology, historical investigations, and narrative inquiry as well as articles that address theoretical and philosophical issues pertinent to relevant research area. The Journal aims to stimulate a problem-oriented, critical approach to research and practice, with an increasing emphasis on inter-disciplinary and international perspectives. The audience includes researchers, students, practitioners of many orientations including teachers, faculty members, trainers, facilitators, resource persons, organizational developers, community organizers, and policy designers. The readership of the Journal is international in scope, with a representation in university libraries.

Clocking IT - TimeTracking 2.0
http://www.clockingit.com/
Clocking IT is a hosted application for tracking all your tasks, issues, projects and time spent, with a focus on software development and handling large amounts of tasks. Plan your projects, see your schedule, know if you're slipping behind and why. Time Tracking and extensive reports help you show your clients exactly what you've done and for how long. Available in english, french, spanish, basque, italian, german, dutch, polish, hebrew, brazilian portuguese, swedish, danish, norwegian, finnish. Features include: 1) no restrictions or limits, 2) one-click time tracking, 3) clean and out of the way interface, 4) interactive gantt chart & scheduling, 5) flexible reporting, 6) multiple ways to communicate, 7) tracks and indexes all changes, 8) notifications via email, rss & ical, 9) ajax, comet & drag and drop, and 10) tanslated to 14 languages. Tech FAQ - Technical Answers In Layman's Language
http://www.tech-faq.com/
At the Tech FAQ, the technical answers you have been looking for are answered in detail, yet in a way the average person can understand. The problem with many technical websites that seek to explain technical questions is they are frequently over the comprehension level of those individuals searching for the information in the first place. We pride ourselves on answering all of your toughest technology questions, yet in a way that you can comprehend. If you want to know what VoIP is or how to rid your computer of spyware, not to mention learning how to network your home office you will find all the answers at the Tech FAQ. Every day new questions and answers are added to the Tech FAQ to provide you with answers to all of your technical questions in one convenient location. All too often you have several technical questions and spend hours on the web trying to find answers to each one that are comprehensive, yet comprehendible. No matter whether you are incredibly knowledgeable of technology or if you know almost nothing at all about technology, there will always be something to learn at the Tech FAQ! This has been added to Tutorial Resources Subject Tracer™ Information Blog.

Academy of Management Perspectives (AMP)
http://journals.aomonline.org/amp/
The Academy of Management Perspectives is a journal of The Academy of Management Founded in 1936, The Academy is the leading international organization of academics and practitioners that works to foster the advancement of research, learning, teaching, and practice in the management field. It has over 15,000 members in more than 90 countries. The mission of the Academy of Management Perspectives (AMP) is to provide accessible articles about important issues concerning management and business. AMP articles are aimed at the non-specialist academic reader, not practicing managers, and rely on evidence as opposed to theory or opinion for their arguments. All articles are fundamentally based on research evidence, which can be quantitative or qualitative, but not on opinion. Articles focus on the phenomenon of business and management rather than theory; they do not necessarily have to advance the existing academic literature. Articles might include reviews of what we already know about particular topics, with an orientation specifically toward practical implications. Descriptive articles and those without a theoretical foundation, typically excluded from academic journals, might also be relevant if they advance our understanding of business and management practice. Articles in AMP translate research findings for a non-expert audience and present new evidence that describes the world of management and business. AMP is open to the wide range of topics represented within the Academy of Management, although special attention will be given to manuscripts with broad appeal to the "thought leader" audience. As a result, manuscripts that focus on issues that are of interest mainly to practicing

managers will be a low priority. A useful guide in choosing a project for AMP is to ask oneself, could this manuscript be assigned to a class of business or management students?

BeeMask - Private Calling
http://www.beemask.com/
At BeeMask, they are driven by a desire to make the Internet a better (and safer) place. They want you to meet people online. Then, if you think you might like them, they want you to talk to them over the phone. But, they want you to do it safely. With BeeMask, you can talk over the phone without giving away your phone number. Your privacy is protected. Here's how it works; meet someone online, agree to talk with BeeMask. Decide on a Beeword, enter it in on the same time, and your phones will be connected. Then, talk all you want over the phone – none of your information is exchanged, and neither one of you can call the other again without both of you agreeing (and typing in the same Beeword again on the same time). You like them? Great. You can talk again. Don't like them? That's fine too. Don't call back. It's safe, easy, and fun. Best of all, it's free. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has ben added to Privacy Resources Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Internet Use for Political Mobilization: Voices of Participants by *Noriko Hara*
http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2123

Abstract

The Internet has been used extensively for U.S. presidential election campaigns since the year 2000. In 2004, Internet campaigning grew to be more interactive than in previous years. The question of whether or not the Internet is making a difference in political outcomes has become noteworthy, and research efforts have examined political campaigns via websites, characteristics of the politically active population, and roles of the media. Among various campaign forces, activities organized by the online grassroots activist group MoveOn.org have become prominent. This article reports the voices of people who participated in political activities coordinated by MoveOn during the 2004 presidential election campaigns. The data were collected primarily through interviews. The findings contrast similarities and differences between participants in different levels of participation. Whereas most past studies focused on the macro level, this study is focused on the micro level. The article calls for further development of a theoretical framework for collective action facilitated via online and taking place offline.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
