

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V7N5

May 2009

Welcome to the V7N5 May 2009 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **International Trade Resources**. These resources are also available at the following URL:

<http://www.InternationalTradeResources.info/>

These resources are designed to be your private virtual library for the latest and greatest international trade search engines, subject directories, tenders, message boards, business opportunities and resources that are currently available from the Internet. The Internet has truly created a global marketplace accessible from anywhere on earth and these resources will allow you to participate in the New Global Economy. If you are just thinking of creating a new business, creating a second income or improving your already existing global business, these international trade resources will be your Internet pathways to discover new knowledge and new partners in the area of international trade!

Awareness Watch™ Spotters

Planets - Preservation and Long-term Access through NETworked Services

<http://www.planets-project.eu/>

Planets, Preservation and Long-term Access through NETworked Services, is a four-year project co-funded by the European Union under the Sixth Framework Programme to address core digital preservation challenges. The primary goal for Planets is to build practical services and tools to help ensure long-term access to our digital cultural and scientific assets. Planets started on 1st June 2006. This website makes available project documentations and deliverables as Planets progresses so that these can be shared with the libraries, archives and digital preservation community. The strong Planets consortium brings together expertise across Europe from national libraries and archives, leading research universities and technology companies. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

eGovernment Interest Group (eGov IG)

http://www.w3.org/2007/eGov/IG/wiki/Main_Page

The mission of the eGovernment Interest Group (eGov IG) is to explore how to improve access to government through better use of the Web and achieve better government transparency using open Web standards at any government level (local, state, national and multi-national). The eGov IG is designed as a forum to support researchers, developers, solution providers, and users of government services that use the Web as the delivery channel, and enable broader collaboration across eGov practitioners. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

Gateways: International Journal of Community Research and Engagement

<http://epress.lib.uts.edu.au/ojs/index.php/ijcre>

Gateways provides a forum for academics, practitioners and community representatives to pursue issues and reflect on practices related to interactions between tertiary institutions and community organizations; academic interventions in community; community-based projects with links to the tertiary sector; and community initiatives. The journal publishes evaluative case studies of community engagement initiatives, analyses of the policy environment and theoretical reflections that contribute to the scholarship of engagement. It publishes both refereed and unrefereed articles. The journal addresses community engagement occurring across scholarly disciplines and at all levels of community including: capacity building initiatives in diverse communities from young people, older people, people with a disability, Indigenous communities and culturally diverse to interfaith communities; health promotion and capacity building; community cultural development (CCD); rural regeneration; housing and neighbourhood renewal; information technology (IT) and public participation; collaborative design and community safety; the environment and natural resource management; corporate social responsibility; social enterprise and social entrepreneurship; and triple bottom line accounting (measuring economic, environmental and social outcomes). The journal also aims to engage academics and policymakers more fully with the concerns of the community and community engagement. It also seeks to articulate creative tensions between theory and practice. Community engagement seeks to promote institutional change in the ways in which community, universities and government see themselves and their partnerships. There is also an imperative to promote the value of research that is driven by need as much as curiosity. Gateways will explore these vital concerns for the enhancement of Community Engagement in its many forms.

BizShark - Internet Business Search Engine

<http://www.bizshark.com/>

BizShark uncovers your competitors' marketing strategies, finances, news, and more. BizShark brings you the latest business profiles, news, financials, web analytics, social footprint, marketing strategies, and other business information by searching across 50+ Internet business databases. BizShark searches and converts raw business data into 13 standard metrics to enable quick and easy business comparison. BizShark further provides interactive charts for deeper insight and statistical trending. BizShark's proprietary CompetitorSort™ algorithm can automatically identify, sort, and rank all potential competitors by analyzing business name and web link correlations across the Internet. BizShark's 1M+ people database and on-staff people search specialists will help you find business emails and mailing addresses belonging to CEOs, presidents, directors, and other executives in over 2M businesses. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. Updated> Bots, Blogs and News Aggregators White Paper Link Compilation

<http://zillman.blogspot.com/2004/09/bots-blogs-news-aggregators-white.html>

I have updated my research white paper link compilation titled "Bots, Blogs and News Aggregators" which is now a 21 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about bots, blogs and news aggregator tools currently available on the Internet. It is freely available as a .pdf file (1.51MB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **04-01-09**.

Uniworld - Who Opeates Where Worldwide

<http://www.uniworldbp.com/>

Uniworld, the sole publisher of two unique multinational business contact directories, is the best and only authoritative source for such multinational business contact information. Covering over 190 countries, their corporate contact information is more comprehensive and more accessible than any other international business contact product; online or in print. Through their two directories, they help to unravel the maze of "who operates where" and "who owns whom" regardless of whether you're sourcing, building your business, selling, tracking competitors, or seeking international employment. With Uniworld, you'll find contact information for headquarters, branches, subsidiaries, and affiliates of the multinational firm. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

BankTracker - Investigating Reporting Workshop

<http://banktracker.investigativereportingworkshop.org/>

The unprecedented bet that many banks made on mortgages, real estate development and other real estate-related lending during the middle part of this decade has produced a payoff no one imagined just a few years ago -- a huge increase in loan defaults, a soaring number of foreclosures and a plunge in bank profits. And now, an analysis of bank financial statements by the Investigative Reporting Workshop and msnbc.com, sheds new light on just how dangerous conditions have become in many banks across the nation. The analysis is based on reports every bank is required to file each quarter with the Federal Deposit Insurance Corp., the federal agency that protects deposits and is part of the bank regulatory system. The Investigative Reporting Workshop, a project of the School of Communication at American University, intends to address this fundamental issue for democracy in two important ways: a) By conducting significant investigative journalism projects on a national and international scale; and b) By researching and experimenting with new models for creating and delivering investigative projects. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

Aging

<http://www.impactaging.com/index.html>

Aging publishes high-impact research papers of general interest and biological significance in all fields of aging research including but not limited to cellular senescence, DNA damage and repair, organismal aging, age-related diseases, genetic control of aging from yeast to mammals, regulation of longevity, evolution of aging, anti-aging strategies and drug development and especially the role of signal transduction pathways in aging and potential approaches to modulate these signaling pathways to extend lifespan. This has been added to [Elder Resources](#) Subject Tracer™ Information Blog.

Apache Hadoop Core - Easily Write and Run Applications That Process Vast Amounts of Data

<http://hadoop.apache.org/core/>

Apache Hadoop Core is a software platform that lets one easily write and run applications that process vast amounts of data. Here's what makes Hadoop especially useful: a) Scalable: Hadoop can reliably store and process petabytes; b) Economical: It distributes the data and processing across clusters of commonly available computers. These clusters can number into the thousands of nodes; c) Efficient: By distributing the data, Hadoop can process it in parallel on the nodes where the data is located. This makes it extremely rapid; and d) Reliable: Hadoop automatically maintains multiple copies of data and automatically redeploys computing tasks based on failures. Hadoop implements MapReduce, using the Hadoop Distributed File System (HDFS) (see figure below.) MapReduce divides applications into many small blocks of work. HDFS creates multiple replicas of data blocks for reliability, placing them on compute nodes around the cluster. MapReduce can then process the data where it is located. Hadoop has been demonstrated on clusters with 2000 nodes. The current design target is 10,000 node clusters. Updated> Current Awareness Discovery Tools on the Internet

<http://zillman.blogspot.com/2004/09/current-awareness-discovery-tools-on.html>

I have updated my research white paper titled "Current Awareness Discovery Tools on the Internet" which is now a 26 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about current awareness discovery tools available on the Internet. It is freely available as a .pdf file (2.65MB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 1, 2008**. Other white papers are available by clicking [here](#).

Search EFF's FOIA Documents

<http://www.eff.org/issues/foia/search>

EFF's Freedom Of Information Act project has gathered thousands of pages of material. These shed light on controversial government surveillance programs, lobbying practices,

and intellectual property initiatives. You can use the EFF FOIA Search Engine below to search and examine the documents' contents. The search engine is still in 'beta testing,' so results may not yet be complete or error-free. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ChangeTracker - Tracking Change In Washington

<http://www.propublica.org/feature/changetracker>

ChangeTracker, an experimental new tool that watches pages on a) whitehouse.gov, b) recovery.gov and c) financialstability.gov so you don't have to. When the White House adds or deletes anything— say a blog post, or executive order ... ChangeTracker will let you know. The latest changes are on their page or sign up to get alerts sent to you. Each change links to a page that shows the different versions side-by-side. Text highlighted in red means it was removed, green means it was added. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

International Journal of Earth Sciences (Geologische Rundschau)

<http://www.springerlink.com/content/103695/>

The journal publishes original and review papers on the processes that shape the Earth, including:

- * Dynamics of the lithosphere
- * Magmatic and metamorphic processes
- * Material cycles
- * Mineral deposits and hydrocarbons
- * Sedimentary systems
- * Surface processes
- * Marine and continental ecosystems
- * Evolution of life

The peer-reviewed journal appears from 2009 on eight times yearly in English.

monitter - Real Time Live Twitter Monitor

<http://monitter.com/>

It's a twitter monitor, it lets you "monitter" the twitter world for a set of keywords and watch what people are saying. Just type three words into the three available search boxes and within seconds you'll start seeing relevant tweets streaming live. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Updated> Business Intelligence Online Resources

<http://www.BIOOnlineResources.info/>

I have updated my Internet Annotated Link Compilation white paper titled "Business Intelligence Online Resources" now a 63 page research paper listing selected resources both new and existing for online business intelligence. Each source is described along with the URL address than can be accessed. Also now included is a comprehensive Business Intelligence link compilation! My goal is to make this the very best resource for Business Intelligence on the Internet!! It is freely available as a .pdf file (1.60MB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 1, 2009**. Other white papers are available by clicking [here](#).

Patents.com - Patent Search, Patent Community and Patent Exchange

<http://www.patents.com/>

Patents.com provides the most comprehensive worldwide source of patent data - to include 450 million searchable indexed patent pages available in 15 native languages. It is a source for patent data and analytic tools and a hosted community platform enabling users to connect to generate business opportunities, including the licensing and sale of intellectual property. Their Mission: To empower users to find the relevant patent and technology information and connect people they need to advance technology. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Deep Space Network (DSN)

<http://deepspace.jpl.nasa.gov/dsn/>

The NASA Deep Space Network - or DSN - is an international network of antennas that supports interplanetary spacecraft missions and radio and radar astronomy observations for the exploration of the solar system and the universe. The network also supports selected Earth-orbiting missions. The DSN currently consists of three deep-space communications facilities placed approximately 120 degrees apart around the world: at Goldstone, in California's Mojave Desert; near Madrid, Spain; and near Canberra, Australia. This strategic placement permits constant observation of spacecraft as the Earth rotates, and helps to make the DSN the largest and most sensitive scientific telecommunications system in the world. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog.

Journal of Economic Interaction and Coordination

<http://www.springer.com/economics/economic+theory/journal/11403>

The Journal of Economic Interaction and Coordination is the official journal of the Association of Economic Science with Heterogeneous Interacting Agents. It is dedicated to the vibrant and interdisciplinary field of agent-based approaches to economics and social sciences. The journal focuses on simulating and synthesizing emergent phenomena

and collective behavior in order to understand economic and social systems. A sample of topics addressed in the journal includes artificial markets with heterogeneous agents, multi-agents in economics, experimental economics, econophysics, financial markets with heterogeneous agents, non-linear economic dynamics, interacting particle systems in economics, markets as complex adaptive systems, theory and simulation of agent-based models, etc. Contributions come primarily from economics, physics, computer science, and related fields and are typically based on sound theoretical models and supported by experimental validation.

Annotate Documents Online

<http://a.nnotate.com/index.html>

Do you review documents and find existing methods awkward and time consuming? Do you need to gather feedback from several people? Would you like an easier way to keep track of all your documents? A.nnotate.com lets you easily give, collect and store detailed notes on documents and web pages. Try the free service now by uploading a document or enter a web address to take a snapshot. Easy to use - private documents and notes - share notes and documents online annotate PDF, MS Word, Excel Powerpoint and Web pages. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Updated> Online Social Networking

<http://zillman.blogspot.com/2004/09/online-social-networking-internet.html>

I have updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Social Networking" now a 37 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online social networks available on the Internet. It is freely available as a .pdf file (1.09MB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 4, 2008**. PriceHub - Actual Sales Prices for New and Used Cars

<http://www.pricehub.com/>

Founded by two car enthusiasts who have collectively bought and sold over 30 vehicles, PriceHub was created to fulfill the need for a comprehensive, open source of actual selling prices for vehicles. While conducting research to prepare for their vehicle purchase or sale, the PriceHub founders realized that there was no true source to see what people really paid for a car. Instead, the only available data were the so-called published or estimated prices such as the MSRP price, invoice price, Kelly Blue Book price, Edmunds.com price, or trade-in value. Their goal with PriceHub is to provide price transparency for all vehicle transactions (new and used), as well as provide a community for people to share & discuss prices. There's price transparency in almost every other marketplace, so why not have one for cars & trucks too! This has been added to [ShoppingBots and Online Shopping Resources 2009](#) Subject Tracer™ Information Blog.

Journal of Computer-Aided Molecular Design

<http://www.springerlink.com/content/102928/>

The Journal of Computer-Aided Molecular Design provides a forum for disseminating information on both the theory and the application of computer-based methods in the analysis and design of molecules. The scope of the journal encompasses papers which report new and original research and applications in the following areas:

- * theoretical chemistry;
- * computational chemistry;
- * computer and molecular graphics;
- * molecular modeling;
- * protein engineering;
- * drug design;
- * expert systems;
- * general structure-property relationships;
- * molecular dynamics;
- * chemical database development and usage.

Social Collider - Reveals Cross-Connections Between Conversations on Twitter

<http://socialcollider.net/>

The Social Collider reveals cross-connections between conversations on Twitter. With the Internet's promise of instant and absolute connectedness, two things appear to be curiously underrepresented: both temporal and lateral perspective of our data-trails. Yet, the amount of data we are constantly producing provides a whole world of contexts, many of which can reveal astonishing relationships if only looked at through time. This experiment explores these possibilities by starting with messages on the microblogging-platform Twitter. One can search for usernames or topics, which are tracked through time and visualized much like the way a particle collider draws pictures of subatomic matter. Posts that didn't resonate with anyone just connect to the next item in the stream. The ones that did, however, spin off and horizontally link to users or topics who relate to

them, either directly or in terms of their content. The Social Collider acts as a metaphorical instrument which can be used to make visible how memes get created and how they propagate. Ideally, it might catch the Zeitgeist at work. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Updated> Using the Internet As a Dynamic Resource Tool for Knowledge Discovery

<http://zillman.blogspot.com/2004/09/using-internet-as-dynamic-resource.html>

I have updated my Research white paper titled "Using the Internet As a Dynamic Resource Tool for Knowledge Discovery" now a 21 page research paper listing many resources both new and existing that will help anyone who is attempting to perform information and knowledge research and discovery on the Internet. It is freely available as a .pdf file (2.33MB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 6, 2009**. Other white papers are available by clicking [here](#).

Updated> Academic and Scholar Search Engines and Sources Annotated White Paper

<http://www.ScholarSearchEngines.com/>

I am very pleased to announce that my Internet MiniGuide Annotated Link Compilation White Paper titled "Academic and Scholar Search Engines and Sources" has been has been just updated and is now a 53 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (1.39MB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Update April 6, 2009]

PEP-NET - European Network for eParticipation

<http://www.internet-discourse.eu/>

PEP-NET is a European network of all stakeholders active in the field of eParticipation. PEP-NET therefore already includes public bodies, solution providers and citizen organizations as well as researchers and scientists. The network is open to all organizations willing and actively trying to advance the idea and use of eParticipation in Europe. The project aims to help overcome fragmentation and promote best practice by connecting established and experienced eParticipation players and networks throughout Europe as a critical first step. The objective of this project is to achieve critical mass for the establishment of a Pan European eParticipation Network (PEP-NET). Such a network will act as a repository and disseminator of good practice and exchange of experience, and be a visible resource for all interested parties across the European Union. PEP-NET will ensure wider access to European eParticipation projects and permit more effective dialogue between eParticipation experts, researchers, practitioners, public administrations, civil society organisations and the interested public with the ultimate goal of facilitating knowledge transfer, encouraging further eParticipation trials and

establishing European leadership in this field. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

MESUR: MEtrics from Scholarly Usage of Resources

<http://www.mesur.org/MESUR.html>

The project's major objective is enriching the toolkit used for the assessment of the impact of scholarly communication items, and hence of scholars, with metrics that derive from usage data. The project has created a semantic model of the scholarly communication process, and an associated large-scale semantic store that relates a range of bibliographic, citation and usage data obtained from a variety of sources. After mapping the structure of the scholarly community on the basis of the established reference data set, MESUR will conduct an investigation into the definition and validation of a range of usage-based metrics. The defined metrics will be cross-validated, resulting in the formulation of guidelines and recommendations. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Applied Science and Engineering Technology (JASET)

<http://library.rit.edu/oajournals/index.php/jaset>

The Journal of Applied Science & Engineering Technology (JASET) is an open access, double blind, peer-reviewed journal for the dissemination of applied technical scholarship. All submitted work must have an applied technical focus and thereby, pursue results that are practical. The editorial board consists of scientists, engineers, and technologists from international backgrounds with expertise in diverse disciplines. JASET will be of interest to research, academic, government, and industrial communities. The focus on the applied sciences and engineering technologies results in publication content that ranges from research to commercial product realization.

Asian Studies WWW Virtual Library (ASWWWVL)

<http://coombs.anu.edu.au/WWWVL-AsianStudies.html>

The Asian Studies WWW Virtual Library (ASWWWVL) was established in March, 1994 by Dr T.M.Ciolek, Research School of Pacific and Asian Studies, The Australian National University. The ASWWWVL provides an authoritative, continuously updated hypertext guide and access tool to scholarly information resources on the Internet. It deals with the Asian continent as a whole, as well as with individual Asian regions, countries, and territories. The AS WWW VL is edited by volunteer "virtual librarians" who are either scholars, postgraduate students, or networked-information specialists employed by universities, libraries, and research institutes. Their task is to maintain accurate, comprehensive, current, and annotated catalogs of online resources selected on the strength of their reliability, authority and usefulness to inquiry and analysis regarding Asian societies, politics, economies, histories, and cultures. Together this team manages many tens of specialist information modules organized by topic, country and region. They offer access to over 10,000 Internet resources from around the globe, including archives, library catalogs, documents, bibliographies, electronic-journal registers and mailing lists. To help readers track new developments, country-specific virtual libraries

are linked to the daily issues of the Asian Studies WWW Monitor online journal. Their collaborative philosophy enables individual editors to focus on his or her area of specialization, to build on colleagues' expertise, and to avoid redundant web monitoring and web cataloging. Unlike general purpose Web searching tools such as Google, Yahoo, or Altavista, the ASWWWVL allows scholars to locate and access research-orientated online publications and resources. The ASWWWVL is a decentralized, distributed online resource catalog which consciously avoids hyperbole and "infotainment", aiming instead at the narrow and selected audience of academics, librarians, journalists, and graduate students. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Updated> Healthcare Bots and Subject Directories

<http://www.HealthcareBots.info/>

I have updated my Internet MiniGuide White Paper Link Compilation titled "Healthcare Bots and Subject Directories" which is now a 30 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about healthcare search engines and subject directories available on the Internet. It is freely available as a .pdf file (810KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 6, 2008**. Other white papers are available by clicking [here](#).

ArtSource - A Gathering Point for Networked Resources on Art and Architecture

<http://www.ilpi.com/artsource/welcome.html>

ArtSource is a project that started in the Spring of 1994 when the web was relatively young. As a service to art librarians, Mary Molinaro began putting together a page that listed art resources that were becoming available on the WWW via Mosaic. At the time she thought it would be a comprehensive list. As usage of the WWW exploded it soon became apparent that a comprehensive site would be highly impractical and she realized that a selective site would be much more helpful to users. Mary eventually moved on to other projects, and, through a series of editors along the way, Artsource has developed over time to be what it is today. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Duck Duck Go Search Engine

<http://www.duckduckgo.com/>

Duck Duck Go is a search engine with less garbage and better results. In addition to links, they have: a) Zero-click info, e.g. Techcrunch; b) Related topics to explore, e.g. Futurama; c) Do ambiguous keyword detection, e.g. apple, d) Label official sites, e.g. Demetri Martin; and e) Simplify links, e.g. Gabriel Weinberg. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Forum for Social Economics

<http://www.socialeconomics.org/modules.php?name=Content&pa=showpage&pid=6>

Sponsored by the Association for Social Economics, this journal applies social economic analysis to practical policy issues and the implications of alternative policy perspectives concerning the social economy. It features papers that contribute to our understanding of past or current socioeconomic issues that have contemporary relevance for economists, social scientists, policymakers, and business professionals. This journal publishes work that addresses economic issues within the context of the wider ethical, cultural, and natural environment. Papers often transcend established disciplinary boundaries. In addition, the journal explores issues relevant to the teaching of economics, with an emphasis on approaches to teaching social and heterodox economics, and publishes alternative views on emerging issues written by distinguished scholars.

The Funded - Resource for Entrepreneurs

<http://thefunded.com/>

TheFunded.com is an online community of entrepreneurs to research, rate, and review funding sources worldwide. In addition, TheFunded.com allows entrepreneurs to view and share term sheets, to assist one another finding good investors, and to discuss the many facets of operating a business. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Updated> Finding Experts By Using The Internet

<http://www.FindingExperts.info/>

<http://www.InternetExperts.info/>

This just updated reference link compilation is designed to bring together the latest URLs for you to use the Internet to find that expert you need in your profession, business, project or special interest. This miniguide is a freely available 23 page (855KB) that was updated on April 7, 2009; including a direct domain name. This is the ultimate tool for finding that expert by using the Internet!! Bookmark today, spread the word to all your friends and associates, and enjoy!!

Microsoft Public Sector Idea Bank - Gov 2.0 Ready

<http://publicsectorondemand.com/>

Microsoft Public Sector Idea Bank is a portal that showcases the Public Sector On-Demand Solutions their Partners have successfully built, using and customizing Microsoft Dynamics CRM. Not only will you be able to learn about and purchase these solutions, you will have the chance to: a) Interact with other Public Sector Professionals; b) Discover and learn about new solutions; c) Share your own ideas with the community; and d) Promote ideas you think should be developed. It's all about Public Sector Professionals, it's a relevant forum that puts a laser focus on the industry, and it's a place where you can collaborate and see your ideas come into fruition! This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

TheFind - Search Over 320 Million Products

<http://www.thefind.com/>

TheFind's mission is to help every shopper find exactly what they want to buy quickly and easily, and to help every merchant, large and small, to reach those shoppers. Even with the enormous growth of Web search and search advertising, the proliferation of comparison shopping sites, and the expansion of online marketplaces, consumers have lacked an easy way to access the entire universe of merchants, products and shopping information available online. Using TheFind's patented technology and shopping search experience, consumers can now search every product from every store and online merchant. Currently more than 320 million products from over 500,000 stores and online merchants can be found at www.thefind.com. TheFind.com also makes shopping more efficient— enabling shoppers to locate nearby stores, sales, or online coupons— within a single user experience. With TheFind, shoppers can quickly and easily find: a) The complete selection of soft goods (clothing, shoes, furniture) and hard goods (electronics, appliances, toys) for sale online; b) The lowest price for a product, determined from all the merchants carrying that item; c) Sales, coupons and discounts being offered by retailers, right while one is shopping; d) Local stores offering the type of merchandise or the exact product one is looking for; and e) The impossible-to-find item, or that unique and rare find. TheFind offers a variety of benefits to shoppers— for some it's finding the lowest price or the best deal; for others it's the right solution, the perfect gift or a hidden gem. Shoppers can save all their favorite products and searches at TheFind.com for convenience and future reference. They also can save their favorite brands and stores to make a more specific, personalized shopping search just for them. This has been added to [ShoppingBots and Online Shopping 2009](#) Subject Tracer™ Information Blog.

Frontiers in Neurorobotics

<http://www.frontiersin.org/neurorobotics/>

Frontiers in Neurorobotics is an electronic journal publishing leading edge research in the science and technology of embodied autonomous neural systems. Neural systems include brain-inspired algorithms (e.g., connectionist networks), computational models of biological neural networks (e.g., artificial spiking neural nets, large-scale simulations of neural microcircuits) and actual biological systems (e.g., in vivo and in vitro neural nets). The focus of the journal is the embodiment of such neural systems in artificial software and hardware devices, machines, robots or any other form of physical actuation. This also includes prosthetic devices, brain machine interfaces, wearable systems, micro-machines, furniture, home appliances as well as systems for managing micro and macro infrastructures. Frontiers in Neurorobotics also aims to publish radically new tools and methods to study plasticity and development of autonomous self-learning systems that are capable of acquiring knowledge in an open-ended manner. Models complemented with experimental studies revealing self-organizing principles of embodied neural systems are welcomed. Their journal also publishes on the micro and macro engineering and mechatronics of robotic devices driven by neural systems as well as studies on the impact that such systems will have on our daily lives.

TextFlow - Collaboration Made Easy

<http://www.textflow.com/>

TextFlow is the only collaborative tool that allows concurrent work. (Several users, each working on their own version of the document.) All other systems deal with concurrent versions by trying to avoid them, either by check-in/check-out schemes or by making users work on the same version simultaneously. Concurrent work results in substantial gains in every development of text where more than one person is involved. It saves significant time, takes away the need for coordination efforts and results in a higher quality end product. This is because concurrent work gives much better support to the way people really work - parallel, iterative and less than perfectly structured. TextFlow Personal offers the same functionality as TextFlow Professional. However, TextFlow Personal is strictly for personal and non-commercial use. All documents shared using the TextFlow Personal Edition are labelled with a "not for commercial use" watermark. Currently TextFlow focuses on the early phase of text development, where the text itself is the focus. In the future they will include image handling in TextFlow. This version of TextFlow does not handle tables. Later versions of TextFlow will. TextFlow relies on a server to do document analysis, so you must be online to compare multiple documents or import Word documents. However, if you only wish to work with an active session, you can work offline. TextFlow works both in your browser and as installed software on your desktop. With the installed version you need not log in to use it, and you can drag and drop word files directly into TextFlow. They currently support .DOC, .DOCX and .RTF. TextFlow has its own format for storing work in progress, .TFX, and you can of course export back to .DOC when you are finished. The installed version of TextFlow is based on the Adobe AIR platform and thus runs on any operating system supported by AIR. Currently Adobe supports Windows 2000, Windows XP, Windows Vista, Mac OSX 10.4 (or later), and Linux. They have tested TextFlow on Windows and OSX, but not Linux. The web based version of TextFlow runs on any browser that supports Flash 9 or above. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Updated> Online Research Browsers

<http://zillman.blogspot.com/2004/10/online-research-browsers-internet.html>

I have updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Research Browsers" a 18 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online research browsers available on the Internet. These research browsers allow you to visualize information to find new relationships and associations to create knowledge discovery and obtain new and highly relevant research data. It is freely available as a .pdf file (627KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **April 4, 2009**. Knowledgespeak - STM Publishing News from Scope eKnowledge Center

<http://www.knowledgespeak.com/Index.asp>

Knowledgespeak is the world's first online news service to report all the relevant developments within the STM publishing industry, on a daily basis. This is a free service that also offers additional resources including a blog area, calendar of events, articles, white papers and a directory of STM publishers. The service is provided by Scope e-Knowledge Center, a leading information and research company that helps clients build intellectual property. Scope offers world-class database, research and analysis services to organizations in the US, UK and Europe. In operation for over 18 years, Scope has built a strong international clientele. Headquartered in Chennai, India, we also have a marketing network which spans New York, London, Chicago, Orlando and Brussels. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog.

Air, Soil and Water Research

<http://www.la-press.com/air-soil-and-water-research-journal-j99>

Air, Soil & Water Research is an open access, peer reviewed international journal covering all areas of research into soil, air and water. The journal looks at each aspect individually, as well as how they interact, with each other and different components of the environment. This includes properties (including physical, chemical, biochemical and biological), analysis, microbiology, chemicals and pollution, consequences for plants and crops, soil hydrology, changes and consequences of change, social issues, and more. The journal has a multi-disciplinary approach and includes research, results, theory, models,

Updated> eReference Library Link Toolkit

<http://www.eReferenceLibrary.com/>

The **eReference Library Link Toolkit** has just been updated and now is a 57 page freely available white paper link compilation for a selected group of reference resources that are available over the Internet for the creation of your own personal or corporate eReference Library. This Toolkit has been created by Internet guru and expert [Marcus P. Zillman](#) who is the Executive Director of the [Virtual Private Library](#). Updates to this toolkit are powered by [Subject Tracer™](#) Information Bots. [Updated April 10, 2009 .pdf 57 pages 1.301MB]

Scitable - A Collaborative Learning Space for Life Sciences

<http://www.nature.com/scitable>

Scitable is an open online teaching/learning portal combining high quality educational articles authored by editors at NPG with technology-based community features to fuel a global exchange of scientific insights, teaching practices, and study resources. Scitable currently contains articles in the field of genetics, and is intended for college undergraduate faculty and students. Future plans involve extension of Scitable to other fields within the life sciences, as well as to other audiences. As a free science library and personal learning tool brought to you by Nature Publishing Group, Scitable currently concentrates on genetics, the study of evolution, variation, and the rich complexity of living organisms. As you cultivate your understanding of modern genetics on Scitable, you will explore not only what we know about genetics and the ways it impacts our society, but also the data and evidence that supports our knowledge. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Student Research Resources](#) Subject Tracer™ Information Blog. NGLS Roundup Series

http://www.un-ngls.org/site/article.php3?id_article=8

The United Nations Non-Governmental Liaison Service (UN-NGLS) promotes dynamic partnerships between the United Nations and non-governmental organisations. By providing information, advice, expertise and consulting and support service, NGLS is part of the United Nations effort to strengthen dialogue and win support for economic and social development. Core activities of UN-NGLS include: information and communication outreach to the international community and to global civil society; supporting the UN system in developing productive relationships and partnerships with NGOs and civil society; and supporting the work of NGOs/civil society that seek to constructively engage with the UN system. The NGLS Roundup Series monitors and reports in-depth on UN events, activities and issues including follow-up to the UN world conferences in the respective Commissions of ECOSOC.

Open Web Application Security Project (OWASP)

http://www.owasp.org/index.php/Main_Page

The Open Web Application Security Project (OWASP) is an open community dedicated to enabling organizations to develop, purchase, and maintain applications that can be trusted. All of the OWASP tools, documents, forums, and chapters are free and open to anyone interested in improving application security. They advocate approaching application security as a people, process, and technology problem because the most effective approaches to application security include improvements in all of these areas. OWASP is a new kind of organization. Their freedom from commercial pressures allows them to provide unbiased, practical, cost-effective information about application security. OWASP is not affiliated with any technology company, although they support the informed use of commercial security technology. Similar to many open-source software projects, OWASP produces many types of materials in a collaborative, open way. The OWASP Foundation is a not-for-profit entity that ensures the project's long-term success. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Journal of Topology and Analysis (JTA)

<http://www.worldscinet.com/jta/>

Journal of Topology and Analysis (JTA) publishes major results on topology and analysis with emphasis devoted to the interaction between the two subjects. In particular, it will include geometric analysis, geometric topology, geometric group theory, K-theory and index theory, the connections between these fields and their applications. The unique feature is the emphasis on the interaction between topology and analysis. In the last decades, major advances in topology were obtained by analysis methods (such as the Poincare conjecture). On the other hand, ideas from topology has had an enormous impact on analysis (the celebrated Atiyah-Singer index theorem and its vast generalization in the context of noncommutative geometry is just one such an example).

Wikirank - What's Popular on Wikipedia

<http://wikirank.com/en>

Wikirank shows you what people are reading on Wikipedia. It's based on the actual usage data from the Wikipedia servers, which the Wikimedia foundation makes available as a public service. They take that data, process it, and give it back to you in a format that's easy to use and share. Wikirank reveals emerging trends, and lets you embed relevant charts in blog posts and on social media sites. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

webReader - Speech Enable Your Website or Blog

<http://webreader.readspeaker.com/>

webReader is a ReadSpeaker service that you can add to your web page and let the visitors listen to it. It is a button that when clicked will read the entire page or a pre-defined part of the content that you determine. The button is simple to add. Just use one of their ready-made plugins or add the small piece of HTML code (a script and a link) that you get from them. Before you sign up, please make sure that you can implement HTML code and a JavaScript, or if you can't, that web have a plugin or widget for your system. When you order it you select what language and voice (male or female) you want to use. For an updated list on all available languages go to their supported languages page. The visitors to your web site or blog can then access for free the audio version of your content and they don't need to download any software or plug-in to do so. Institute for Agriculture and Trade Policy (IATP)

<http://www.iatp.org/>

IATP works with organizations around the world to analyze how global trade agreements impact domestic farm and food policies. Alongside a global coalition, IATP advocates for fair trade policies that promote strong health standards, labor and human rights, the environment and, most fundamentally, democratic institutions. They are developing alternative economic models that include clean sources of energy such as wind power and biofuel that would spur rural development. They are working with landowners to form cooperatives that promote sustainable forest management. They are advocating for green businesses and farms that reduce toxic runoff into the Great Lakes and Mississippi River. They are working to stop the overuse of antibiotics in agriculture and aquaculture, while limiting the release of mercury and other toxic pollutants that fall onto farmland and enter the food supply. IATP is also monitoring the impact of genetically engineered crops on the environment, human health and farmer income. This has been added to [Agriculture Resources](#) Subject Tracer™ Information Blog.

Journal of Multidisciplinary Healthcare (JMDH)

http://www.doveoa.com/journals.php?pa=home&journal_id=7

The Journal of Multidisciplinary Healthcare (JMDH) aims to represent and publish research in healthcare areas delivered by practitioners of different disciplines. This includes studies and reviews conducted by multidisciplinary teams as well as research which evaluates or reports the results or conduct of such teams or healthcare processes in general. The journal covers a very wide range of areas and we welcome submission from practitioners at all levels and from all over the world. Good healthcare is not bounded by person, place or time and the journal aims to reflect this. The JMDH is published as an open-access journal to allow this wide range of practical, patient relevant research to be immediately available to practitioners who can access and use it immediately upon publication. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog.

AutoMate - Scripting Without Code

<http://www.networkautomation.com/>

Never write another batch file or custom script again. That's the promise of AutoMate. AutoMate enables sophisticated automation development without the need for writing and managing code. This greatly reduces development costs and timelines, and makes ongoing maintenance and management of automated tasks a breeze. The key to this functionality is AutoMate's visual task design system which allows IT Professionals to build tasks via drag-and-drop without writing scripts, batch files or custom programs. AutoMate provides over 200 plain-English, drag-and-drop tools called actions which enable sophisticated task development without writing a line of code. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

BatchBook - Small Business Customer Relationship Manager

<http://www.batchblue.com/>

BatchBook is an easy-to-use customer relationship manager (CRM) designed for small business owners. BatchBlue was created with one goal in mind: to create useful, user-friendly software for small businesses. The software is especially designed for businesses that have: a) a limited budget or IT staff; b) to track contact information about their customers and any points of contact that the business has with a customer (phone calls, e-mails, purchases, returns, reservations, etc.); c) a need to collect industry and business specific information about their customers that can't be handled by basic e-mail management software; and d) the desire for an easy-to-use system with excellent customer support. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Trace™ Information Blog.

PARSE.Insight - Permanent Access to the Records of Science in Europe

<http://www.parse-insight.eu/>

PARSE.Insight is a two-year project co-funded by the European Union under the Seventh Framework Programme. It is concerned with the preservation of digital information in science, from primary data through analysis to the final publications resulting from the research. The problem is how to safeguard this valuable digital material over time, to ensure that it is accessible, usable and understandable in future. The rapid pace of change in information technology threatens media, file formats and software with obsolescence, and changing concepts and terminology also mean that, even if data can be read, it might not be correctly interpreted by future generations. Many initiatives are already under way in this area, and the aim of the PARSE.Insight project is to develop a roadmap and recommendations for developing the e-infrastructure in order to maintain the long-term accessibility and usability of scientific digital information in Europe. The project will conduct surveys and in-depth case studies of different scientific disciplines and stakeholders and will base its results on these findings, as well as knowledge of ongoing developments. This has been added to [Research Resources](#) Subject Tracer™ Information

Journal of Evolution Equations (JEE)

<http://www.springerlink.com/content/104879/>

The Journal of Evolution Equations (JEE) publishes high-quality, peer-reviewed papers on equations dealing with time dependent systems and ranging from abstract theory to concrete applications. Research articles should contain new and important results. Survey articles on recent developments are also considered as important contributions to the field. Particular topics covered by the journal are:

- * Linear and Nonlinear Semigroups
- * Parabolic and Hyperbolic Partial Differential Equations
- * Reaction Diffusion Equations
- * Deterministic and Stochastic Control Systems
- * Transport and Population Equations
- * Volterra Equations
- * Delay Equations
- * Stochastic Processes and Dirichlet Forms
- * Maximal Regularity and Functional Calculi
- * Asymptotics and Qualitative Theory of Linear and Nonlinear Evolution Equations
- * Evolution Equations in Mathematical Physics
- * Elliptic Operators

Jobnob - Detailed Information About Salaries Offered by Thousands of Different Companies in the US

<http://www.jobnob.com/>

Jobnob is where anyone can look for free at over 400,000 individual salaries at individual companies by position. Unlike other sites, the salaries at Jobnob are employer-reported and give specific data on specific jobs. For the first time people have unprecedented FREE access to specific salary information- see how much people are actually making at specific companies in specific jobs without having to sign up or pay any fees. Answer questions like “Am I getting paid fairly at my current company?” “Could I be getting paid more at a competitor?” “How much should I negotiate my salary for at a new job?” Jobnob also has millions of job postings, making Jobnob one of the best sites on the Internet to look for a job. They have millions more salaries on the way and many other features they are launching over the next few months. Sustainability

<http://www.mdpi.com/journal/sustainability/>

Sustainability is an international and cross-disciplinary scholarly journal of environmental, cultural, economic and social sustainability of human beings, which provides an advanced forum for studies related to sustainability and sustainable development. It publishes reviews, regular research papers, communications and short notes, and there is no restriction on the length of the papers. Their aim is to encourage scientists to publish their experimental and theoretical research relating to natural sciences, social sciences and humanities in as much detail as possible in order to promote scientific predictions and impact assessments of global change and development. Full experimental and methodical details must be provided so that the results can be reproduced. There are, in addition, unique features of this journal:

- * manuscripts regarding research proposals and research ideas will be particularly welcomed
- * electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material
- * manuscripts concerning summaries and surveys on research cooperation and projects (that are founded by national governments or others) provide information for a broad field of users.

EveryTrail - GPS Travel Community Where You Share Your GPS Tracks and GeoTag Your Photos

<http://www.everytrail.com/>

EveryTrail is a global web2.0 platform for geotagged user generated travel content that is changing the way millions of people share their travel experiences and plan their trips. EveryTrail users create valuable content, for themselves, their family and friends, and for the broader community, by uploading GPS data and photos in order to create visual interactive trip reports of their travel experiences. With EveryTrail, sharing your trip experiences has become a lot more fun: using a GPS device you can easily plot the exact path you traveled on an interactive map, with your photos positioned on the map at the exact location you took them. With EveryTrail, this is easy, because our system automates the process of mapping ("geotagging") your photos. All you have to do is upload your GPS tracks from your GPS device and your photos from your regular digital camera. EveryTrail can be used for a wide variety of different trips, anywhere in the world. The applications of EveryTrail are very broad: people are using it to share road trips, sight seeing tours, sailing trips, hiking, cycling, flying, hang gliding, geocaching, skiing, kayaking trips, and many more. EveryTrail already has trips from over 80 countries in all corners of the world. EveryTrail can also help you plan your next trip. Did you ever look for information to help you plan your next trip? Did you ever wonder what a place really looked like through the eyes of other travelers? In the words of the New York Times: "With EveryTrail you can see the terrain before booking a trip". As more and more trips around the world are being posted, EveryTrail becomes an increasingly useful resource to plan trips and find out what places really look like. Q-Sensei - Searching Millions of Scholarly Articles

<http://www.qsensei.com/>

Q-Sensei introduces a new way of making information accessible. Their goal is to provide advanced search tools for the vast amount of information available on the Internet, in books, research articles, blogs, news, or wikis. They currently provide access to the first several million scholarly articles. Q-Sensei's approach applies innovative search technologies to various heterogeneous data pools; their users can easily browse through a data source as well as discover cross-references between individual records. The data on the Q-Sensei web site is compiled from the Internet and from our content partners. They process the data and extract information to be displayed within a scheme of Kinds and Attributes. The results can be easily and intuitively accessed with Q-Sensei's patented Search and Presentation engine. Their technology supports multi-dimensional searches, gives further search suggestions, and provides clear and concise overviews of the current stage of the search. They are convinced that a truly great and effective search engine needs to combine ideas from various areas. The search technology is the foundation the search experience builds on. Linking and connecting data from different types of databases put search results in a larger context. Also, user participation is invited and enhances the data in a way that computers are still unable to provide. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Academic and Scholar Search Engines](#) and Sources White Paper.

International Year of Astronomy 2009

<http://astronomy2009.us/>

In the year 2009, the world will celebrate the International Year of Astronomy as it commemorates the 400th anniversary of Galileo's use of a telescope to study the skies, and Kepler's publication of *Astronomia Nova*. 2009 is also the anniversary of many other historic events in science, including Huygen's 1659 publication of *Systema Saturnium*. This will be modern astronomy's quadricentennial, and the 2009 Year of Astronomy will be an international celebration of numerous astronomical and scientific milestones. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog.

Journal of Electronic Resources in Medical Libraries

<http://www.informaworld.com/smpp/title~db=all~content=t792303999~tab=summary>

The Journal of Electronic Resources in Medical Libraries is a peer-reviewed professional journal devoted to the access, evaluation, and management of electronic resources in the medical library environment. This journal will be an essential resource for academic medical school libraries, hospital libraries, and other health sciences libraries. The material in the Journal of Electronic Resources in Medical Libraries will complement articles published in *Medical Reference Services Quarterly* (also edited by M. Sandra Wood), which highlights the reference and bibliographic instruction aspects of electronic resources. Topics addressed by this new journal include: a) collection development and selection of electronic resources; b) electronic document delivery in medicine and health

care; c) enhancing electronic resource user services; d) print versus electronic or combination formats; e) site licensing-what librarians need to know; f) delegating work that involves electronic/digital acquisitions; g) cataloging-e-books, e-journals, and other electronic formats; h) the merger of serial and book formats in the electronic library; i) coping with electronic misinformation, fraudulence, and shams on the Internet; j) "e-core" lists in medicine, allied health, nursing, pharmaceutical science, mental health, and other health care fields; k) the library's role in medical informatics; l) access issues and solutions for electronic journals; m) the impact of electronic resources and the Internet on user services; n) electronic reserves ; o) the role of medical libraries with PDAs; p) archiving issues for electronic formats; q) cost analyses of digital resources; and r) database/journal publisher relations and medical libraries.

Tweetizen - Discover Tweets That Matter To You

<http://www.tweetizen.com/>

Tweetizen is a simple web-based tool designed to help you filter the daily influx of tweets, and easily find the ones that are relevant to you. Use Tweetizen to create twitter groups, and you'll be able to stay on top of what's happening in all your areas of interest. Imagine having instant access to breaking news and the latest tweets on news, politics, technology, gossip, fashion etc. all in one place, rather than having to create multiple twitter accounts just to be able to find what you want. Their filtering mechanisms will go through the millions of tweets and come up with the pertinent ones by taking tags and keywords into consideration. You can share your group with others and invite your friends to be an active part of each group you create. This includes not only family and friends but also colleagues and associates, as it befits the situation and the uses you put Twitter to. Tweetizen also gives you the option to embed your groups on your own websites and blogs - taking twitter to a whole new level! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

NotePub - Save, Share and Organize Your Notes

<http://notepub.com/>

Use NotePub to save, share, and organize your notes. It's a snap. NotePub is free, and no questions will be asked, not even your email. With NotePub you can: a) Take notes; b) Publish your blog, wiki, or forum; c) Make a photo album; d) Save text, links, and pictures from other websites; e) Share ideas, collaborate, chat; f) Keep a ToDo list with links to detailed descriptions of each task; g) Encrypt your private data before it is sent to NotePub; h) See how a note has changed over time and go back to a previous version; and i) Upload and organize your files using tags instead of folders. This has been added to the tools section of [Research Resources](#) Subject Trace™ Information Blog.

KallOut - Search Outside the Box

<http://www.kallout.com/>

KallOut's mission is to deliver the most compelling search experiences for their customers around the world. To accomplish this, KallOut invented the world's first "selection-based search" system. By seamlessly integrating with the most popular applications, KallOut is able to deliver results in the context of any e-mail, document, presentation, spreadsheet or web page. In addition, KallOut offers BestGuess™ menu suggestions that are based on both detailed analysis of the text selected and the "wisdom of crowds" as expressed by other users' choices. Unlike other "browser-based search" systems that are trapped inside the browser, KallOut displays content from the most popular sites on the web inside floating information palettes. These KallOuts offer fast access to Google Maps, Wikipedia Articles, YouTube Videos, Flickr Photos, Amazon Products, Yahoo News and many more great search results from the best sites on the web. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Combinatorica

<http://www.springerlink.com/content/0209-9683>

Combinatorica is an international journal of the János Bolyai Mathematical Society. It publishes research papers on a variety of areas of combinatorics and the theory of computing, with particular emphasis on general techniques and unifying principles. Coverage in Combinatorica includes:

- * combinatorial structures (graphs, hypergraphs, matroids, designs, permutation groups)
- * combinatorial optimization
- * combinatorial aspects of geometry and number theory
- * algorithms in combinatorics and related fields
- * computational complexity theory
- * randomization and explicit construction in combinatorics and algorithms.

Prezi - The Zooming Presentation Editor

<http://prezi.com/>

Prezi allows anyone who can sketch an idea on a napkin to create and perform stunning non-linear presentations with relations, zooming into details, and adjusting to the time left without the need to skip slides. Create a map of your ideas, images, videos, then show overview, zoom to details, amaze, convince, take the day. And it is very simple to use. The ideology of Prezi is based upon our natural knowledge of how to coordinate ourselves in space; traditionally all information we have had to process and store used to be linked to physical space. That is where our minds have developed good skills in

orienting ourselves. Despite all this, digital information today is mostly presented to us as a moniker of printed matter. Of course printing has served us well to store (and shape) information for the the last six centuries, however, with the wide appearance of computing we saw the same old pattern: old forms got translated to new media without exploring its full potential. Most of the computer systems which present us with information today use the old paradigm of prints and slides: arranging information on a framed 2d static space. They could argue that these (at least their forms) are merely the side effect of Gutenberg's galaxy. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Meeting24.tv - Web Video Conference System

<http://www.meeting24.tv/login>

meeting24.tv is a web conference system for up to 24 users for 24/7. (They have a pro account option menu.) Only a meeting host user needs to create a user account. Other members can join the meeting by web browser without registration or login. It's so easy. (If you use your browser in English, all texts convert in English automatically and you can use it at international conference.) This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ScienceDaily - Your Source for the Latest Research News

<http://www.Sciencedaily.com/>

ScienceDaily is one of the Internet's most popular science news web sites. Since starting in 1995, the award-winning site has earned the loyalty of students, researchers, healthcare professionals, government agencies, educators and the general public around the world. Now with more than 3 million monthly visitors, ScienceDaily generates nearly 15 million page views a month and is steadily growing in its global audience. No other web site offers readers the depth and breadth of breaking news about the latest scientific discoveries that ScienceDaily does in such a user-friendly format – all freely accessible with no subscription fees. With over 65,000 research articles, 15,000 images, 2,500 encyclopedia entries, 1,500 book reviews, and hundreds of educational videos, there is something for everyone on ScienceDaily. Updated several times a day with breaking news and feature articles, seven days a week, the site covers discoveries in all fields of the physical, biological, earth and applied sciences. Stories are integrated with photographs and illustrations, links to journals and academic studies, related research and topics, encyclopedia articles, and videos, to provide a wealth of relevant information on almost every science topic imaginable – from astrophysics to zoology. And thanks to a custom search function, readers can do their own research using the site's extensive archive of stories, topics, articles, videos, images and books. ScienceDaily is best known for showcasing the top science news stories from the world's leading universities and research organizations. These stories are selected from among dozens of press releases and other materials submitted to ScienceDaily every day, and then edited to ensure high quality and relevance. Universities have come to rely on ScienceDaily to spread news about their scientists' findings to a wider audience. And through ScienceDaily's email

newsletters and RSS newsfeeds (offered freely to both commercial and non-commercial web sites as well as individuals), news about these important discoveries is further amplified. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Journal of Micro-Nano Mechatronics

<http://www.springer.com/engineering/electronics/journal/12213>

Micro and Nano Mechatronics is the synergistic integration of micro and nano electromechanical systems and electronic technologies, with high added value. Strong research efforts are being focussed on development of organic combinations of multiple miniaturized actuators and sensors to perform complex motions and operations. Micro/nano technologies, as very important technologies for future robotics and automation, are becoming crucial to realizing high performance systems. The Journal of Micro-Nano Mechatronics, a quarterly journal, is devoted to the theory and applications of micro and nanotechnologies. The journal promotes both theoretical and practical engineering research based on the analysis and synthesis from the micro level to the nano level. The journal includes survey papers, technical papers, short papers and news items in the field of Micro and Nano Mechatronics.

myHours - Online Time Tracking Solution

<http://www.myhours.com/>

myHours.com is a time management, timesheet, time tracking solution. It enables you to track your work time, projects you work on and tasks you perform. It is web based and can be used from any location at any time. Use your cell phone to track time with myHours Mobile. myHours Mobile offers access to basic time tracking through mobile devices like mobile phone, PDAs etc. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Papers of the War Department

<http://wardepartmentpapers.org/>

Fire destroyed the office of the War Department and all its files in 1800, and for decades historians believed that the collection, and the window it provided into the workings of the early federal government, was lost forever. Thanks to a decade-long effort to retrieve copies of the files scattered in archives across the country, the collection has been reconstituted and is offered here as a fully-searchable digital database. This has been added to [Genealogy Resources](#) Subject Tracer™ Information Blog.

Proceedings of the Royal Society B

<http://rspb.royalsocietypublishing.org/>

Proceedings B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the widest sense, and behavioural and evolutionary biology. Proceedings B has also published significant numbers of papers in epidemiology, human biology, neuroscience, palaeontology and biomechanics. Authors are encouraged to submit articles not only in these fields, but in all branches of biology. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of biologists.

Grand Rounds

<http://www.grandrounds-e-med.com/>

Grand Rounds is a database of clinical reports of interesting and original findings that present:

- * New clinical features of diseases
- * New surgical complications
- * Unusual presentations
- * Complex cases, which present misleading data
- * Unusual pathological data
- * Unusual images

Historically, significant case reports have possessed the following attributes:

- * Descriptions of new diseases
- * Recognition of the existence and aetiology of new side effects
- * The study of disease mechanisms
- * New therapy and prognosis in a particular condition
- * Education
- * Quality assurance

The purpose of a good case report is to make a point, and our referees will be taking this (as well as the above features) into consideration before making a recommendation to publish or not. Papers which are a reiteration of previously recognised data and which do not have a clear point will be rejected. Grand Rounds is interested in receiving reports from all clinical specialties and specialties allied to medicine. There is a bulletin board for discussion of the published reports. Particularly interesting debates will be appended to the report in question. The bulletin board can be used to discuss the presentation of the case reports in Grand Rounds to ensure that they both educate and inform. Where possible the evidence-based data on the clinical or surgical case will be linked to the report. Thus, people browsing the database can compare and contrast the report to the established evidence.

Virtual Reference Bibliography

<http://vrbib.rutgers.edu/>

This bibliography is designed to be used by virtual reference (VR) practitioners, researchers, students, and others. The Rutgers' team has verified all of the bibliographic citations so we are striving for a reliable resource for those interested in the print and electronic literature on VR services (aka Digital Reference or Electronic Reference). Entries include citations to journal articles, websites, and other works on all aspects of VR (live chat, e-mail, IM, and other electronic reference modes). Links to full-text articles are provided if available on the open web. This search interface enables you to search by author, title, or keyword. Authors of VR related works are invited to submit new entries and to offer corrections for any mistakes. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Astronomy Education Review

<http://aer.aip.org/aer/>

The Astronomy Education Review was founded in 2001 by Sidney Wolff and Andy Fraknoi, to serve the astronomy education community in a variety of new ways as described in the journal's mission statement. In 2009, the American Astronomical Society assumed responsibility for the publication of AER. The AAS is assisted by the generous support of the Astronomical Society of the Pacific. Their goal is to make it easy to find, read about, and use new ideas and resources for teaching and outreach in astronomy and space sciences. On the home page they will list the most recent articles so that you can see immediately what's new. AER is hosted on the American Institute of Physics' Scitation platform. AER is freely available and accessible to all. Printer-friendly reformatting of articles and search tools are provided. There is also a mechanism for receiving RSS feeds and email table of contents alerts. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog.

NASA-Sponsored Classroom of the Future

<http://www.cet.edu/?cat=cotf>

The NASA-sponsored Classroom of the Future serves as the space agency's principal research and development center for educational technologies. The Classroom of the Future™ opened on the campus of Wheeling Jesuit University in 1990 with one employee whose job involved delivering NASA educational materials and programs to local classrooms. Today the Classroom of the Future provides NASA with the educational research and expertise necessary for creating and delivering state-of-the-art education to the NASA audience, be they young or old. NASA relies on the Classroom of the Future in a variety of roles. They lead the review of new educational products before they can become available through the NASA website. They coordinate the education programming on NASA Television. They investigate how the Second Life virtual world can help students better learn NASA science. They benchmark the field of educational technology to show what works and what doesn't. The role of the Classroom of the Future is ever changing to meet the needs of NASA as it seeks to pioneer the future in space exploration, scientific discovery, and aeronautics research. The Classroom of the Future currently is working on four projects: 1) NASA Television, 2) NASA product review, 3) The EdTech Collaborative, and 4) MoonWorld. IN Harmony Sheet Music Cataloging Tool

<http://inharmonycat.sourceforge.net/>

The IN Harmony Sheet Music Cataloging Tool is an open source tool developed by the Indiana University Digital Library Program with funding from the Institute of Museum and Library Services as part of the IN Harmony: Sheet Music From Indiana project. This tool has been designed to assist libraries, archives, museums, and individual collectors describe their sheet music collections in a robust and standards-based way. This is a production system of the Indiana University Digital Library Program and was used to catalog more than 10,000 pieces of sheet music for the IN Harmony project. The tool collects descriptive metadata about sheet music and exports it in the MODS, simple Dublin Core, and OAI-PMH Static Repository formats. It is available under a BSD license from the IN Harmony Cataloging Tool SourceForge Project in three formats: a) Windows installer, b) MacOS installer, and c) Source code. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Visibility Exchange

<http://www.visibilityexchange.com/>

Visibility Exchange allows companies to leverage their audience by exchanging visibility in their newsletters for comparable exposure. Their tag line pretty much says it all – “Your audience for my audience – DEAL!” Visibility Exchange is all about leveraging your existing resources in order to gain exposure without the need to tap into your marketing budget. In this case, the resource you are leveraging is your subscriber database. Are they suggesting that you give others access to your database? -

ABSOLUTELY NOT. All they are talking about here is simply allowing someone to advertising in your newsletter or to your database of subscribers, in exchange for them allowing you to do the same. The idea is to locate non-competitive members within a group who cater to your desired demographic, and structure a relationship that would allow each party to gain exposure to the others audience without money changing hands. This has been added to [eCommerce Resources](#) Subject Tracer™ Information Blog.

Journal of Nutrition, Health and Aging (JNHA)

<http://www.serdi-fr.com/jnha/>

The Journal of Nutrition Health and Aging is the Journal of the European Union Geriatric Medicine Society. There is increasing scientific and clinical interest in the interactions of nutrition and health as part of the aging process. This interest is due to the important role that nutrition plays throughout the life span. This role affects the growth and development of the body during childhood, affects the risk of acute and chronic diseases, the maintenance of physiological processes and the biological process of aging. A major aim of The Journal of Nutrition, Health & Aging is to contribute to the improvement of knowledge regarding the relationships between nutrition and the aging process from birth to old age.

World Digital Library

<http://www.worlddigitallibrary.org/>

The World Digital Library will make available on the Internet, free of charge and in multilingual format, significant primary materials from cultures around the world, including manuscripts, maps, rare books, musical scores, recordings, films, prints, photographs, architectural drawings, and other significant cultural materials. The objectives of the World Digital Library are to promote international and inter-cultural understanding and awareness, provide resources to educators, expand non-English and non-Western content on the Internet, and to contribute to scholarly research. Librarian of Congress James H. Billington proposed the establishment of a World Digital Library (WDL) in a speech to the U.S. National Commission for UNESCO in June 2005. The Library of Congress is currently engaged in a planning process to determine how this vision can be realized. Participants in the planning process include national libraries and other libraries and cultural institutions from around the world that have expressed interest in joining the project, as well as UNESCO and IFLA. The planning process is being underwritten by a gift from Google, Inc. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Privnote - Send Notes That Will Self Destruct After Being Read

<https://privnote.com/>

Have you ever wanted to send confidential information within your work environment, to family or friends, but were afraid to do so over the internet, because some malicious hacker could be spying on you? Privnote is a free web based service that allows you to send top secret notes over the internet. It's fast, easy, and requires no password or user registration at all. Just write your note, and you'll get a link. Then you copy and paste that

link into an email (or instant message) that you send to the person who you want to read the note. When that person clicks the link for the first time, they will see the note in their browser and the note will automatically self-destruct; which means no one (even that very same person) can read the note again. The link won't work anymore. You can optionally choose to be notified when your note is read by leaving your email and a reference for the note. This has been added to [Privacy Resources](#) Subject Tracer™ Information Blog.

MorgueFile - Public Image Achive for Creatives By Creatives

<http://www.morguefile.com/>

A place to keep post production materials for use of reference, an inactive job file. This morgue file contains free high resolution digital stock photography for either corporate or public use. The term "morgue file" is popular in the newspaper business to describe the file that holds past issues flats. Although the term has been used by illustrators, comic book artist, designers and teachers as well. The purpose of this site is to provide free image reference material for use in all creative pursuits. This is the world wide web's morguefile. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. Awareness Watch™ Paper Review

Beyond Google and Evil: How Policy Makers, Journalists and Consumers Should Talk Differently About Google and Privacy by *Chris Jay Hoofnagle*

<http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2326>

Abstract:

Google has come to symbolize the tensions between the benefits of innovative, information-dependent new services and the desire of individuals to control the contexts in which personal information is used. This essay reviews hundreds of newspaper articles where Google speaks about privacy in an effort to characterize the company's handling of these tensions, to provide context explaining the meaning of the company's privacy rhetoric, and to advance the privacy dialogue among policy makers, journalists, and consumers. The dialogue surrounding these tensions is unfocused because many policy makers, journalists, and consumers concentrate the debate on whether the company violates its "you can make money without doing evil" corporate motto. This first observation flows to a second: Google's conception of "evil" is tied to the revolution the company brought about in advertising practices, practices that many think are mainstream now. Google is thus missing opportunities to remind the public that its advertising policies have several strong pro-consumer aspects, many of which are lost when "evil talk" is employed. Third, vague privacy rhetoric signals a weak commitment to technical or legal safeguards. Journalists are well suited to remedy this by exercising greater inquiry and skepticism in contexts where Google's privacy representations are non-substantive. Finally, Google heavily relies upon appeals to competition, arguing that those who adopt the company's services engage in meaningful tradeoffs. Quietly shifting practices, lock in, and lengthy data retention periods, however, mean that these tradeoffs must be continually reevaluated. Google should give voice to its competition and tradeoff rhetoric by creating data portability and deletion rights for consumers.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
