

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V7N8

August 2009

Welcome to the V7N8 August 2009 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting my publication **Using the Internet As a Dynamic Resource Tool for Knowledge Discovery**. This publication is also available at the following URL:

<http://www.WhitePapers.us/>

Knowledge Discovery has become a very timely topic with academics, professionals and business executive/entrepreneurs seeking ways and means to discovery new and timely knowledge. This publication will list the best and most competent resources available for the academic, professional and business executive/entrepreneur.

Using the Internet as a Dynamic Resource Tool for Knowledge Discovery

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director - Virtual Private Library
<http://www.VirtualPrivateLibrary.org/>

The Internet continues its growth and expansion and more and more business related applications are finding their way to the World Wide Web portion of the Internet. The global concept is finally hitting home in the corporate environment and now users are realizing that it is just not a local or regional or even a national resource but a truly global resource! Understanding these facts and combining them with the latest knowledge for web resources (URLs) brings you the latest and greatest information available today!

Just exactly what types of dynamic resource tools for knowledge discovery are available on the Internet and how can they be effectively used? I will create a mini list of important resources for the professional/executive and then list some of the important (must have) World Wide Web sites that can accomplish the goals related to the resource.

Competitive and Business Intelligence:

Competitive and Business Intelligence is an extremely important dynamic resource tool for knowledge discovery and the below listed resources offer a number of excellent tools to effectively accomplish your goals as they pertain to competitive intelligence. Understanding the dynamics of the current awareness and happenings of your competition allows you another piece of the ongoing knowledge discovery puzzle.

Business Intelligence Center

Virtual Reps and ChatterBots:

Virtual Representatives and ChatterBots are just beginning to allow a new “era” in knowledge discovery with customers beginning to feel somewhat comfortable talking to a “computer”. The big question will be how quickly and competently will the customer be served with the questions to their requests! The key here is also keeping the knowledge base and related content current and relevant to the customers request and being sure that all databases are updated so that all divisions and departments will be

Knowledge Blogs:

The ability to freely disseminate information and knowledge is rapidly changing and one of the newest methods to transfer knowledge is through the creation of Knowledge Blogs. The word “blog” is derived from weB LOG and by closely monitoring your personally selected knowledge blog you will quickly be able to stay current as well as be involved with the latest resources in knowledge discovery.

Sales Management Tools:

Sales management tools allow for the proper coordination, prioritization and implementation of the information resources and goals that are created to accomplish knowledge discovery in your short term and long term strategic plans. An excellent URL is:

Dmoz.org - Open Directory - Business: Business Services: Customer Management
http://dmoz.org/Business/Business_Services/Customer_Management/

There are many excellent tools for the professional/executive to help monitor and maintain both the currency of information and resources through monitoring and protecting their company's intellectual property on the Internet. These tools are designed for very specific applications such as the protection and monitoring of trademarks as an example.

Awareness Watch™ Spotters

IBM - Cloud Computing

<http://www.ibm.com/ibm/cloud/>

Cloud is a flexible, resilient and cost-effective delivery platform for business or consumer IT services. Quick, simple and highly scalable - that's the essence of cloud computing. The ability to rapidly deploy cloud resources streamlines IT management, and seamlessly aligns IT services with the dynamic requirements of the business. Processes, applications and services are all provisioned "on demand," regardless of user location or device. This remarkably nimble approach to IT service delivery ensures solid support of core business functions, while encouraging innovation through easily provisioned, highly scalable computing resources. If you have an Internet connection, you can access public clouds today. These public clouds include Software as a Service ("SaaS") clouds like IBM Lotus Live or Platform as a Service ("PaaS") clouds like Amazon Web Services. Countless other public clouds are becoming available daily for a variety of uses. Private clouds offer many of the public cloud benefits, but also include somewhat more robust security and audit capabilities. Private clouds may also provide lower latency than public clouds during peak traffic periods. The IBM Smart Business Test Cloud includes the unrivaled security and flexibility of a private cloud, while preserving the core cloud benefits of cost reduction and agility. The IBM Smart Business Desktop Cloud transforms your distributed client installation into a cost-effective, secure, always-on environment. The IBM Smart Desktop Cloud architecture ensures desktop homogeneity, while the virtualization layer ensures high resource utilization. The cloud layer provides a high degree of elasticity, enabling you to quickly add or remove virtual workstations to meet changing needs. This has been added to [Grid, Distributed and Cloud Computing](#)

[Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Open CRS Network - Congressional Research Reports for the People

<http://openocrs.com/>

American taxpayers spend over \$100 million a year to fund the Congressional Research Service, a "think tank" that provides reports to members of Congress on a variety of topics relevant to current political events. Yet, these reports are not made available to the public in a way that they can be easily obtained. A project of the Center for Democracy & Technology through the cooperation of several organizations and collectors of CRS Reports, Open CRS provides citizens access to CRS Reports already in the public domain and encourages Congress to provide public access to all CRS Reports. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

Journal of Bioequivalence & Bioavailability (JBB)

<http://www.omicsonline.org/jbbhome.php>

Journal of Bioequivalence & Bioavailability (JBB) is a peer reviewed, international, interdisciplinary scholarly open access journal of its field. JBB is one and only the open access journal in bioequivalence and bioavailability with academic support from leading research institutes and industries. JBB aims to be an evidence based force for the advancement of bioequivalence and bioavailability studies. JBB has been founded to meet the demand and phenomenal growth of bioequivalence and bioavailability studies, and no journal is available under the titles of bioequivalence and bioavailability particularly under open access category. The main motto for the journal is to bring all scattered bioequivalence reports under one open access platform. Open access publication is the best solution for dissemination of significant output of human endeavors. Under open access platform, JBB is an adventurous venue to the scientists of its field and will become a treasure trove for the bioequivalence and bioavailability reports.

Spezify - Searching in Different Visual Ways

<http://www.spezify.com/>

Spezify is a search tool presenting results from a large number of websites in different visual ways. They take web search further, away from endless lists of blue text links and towards a more intuitive experience. They want you to get a good overview of a subject, find useful information and be inspired with Spezify. They mix all media types and make no difference between blogs, videos, microblogs and images. Everything communicates and helps building the bigger picture. They collect websites and are aiming to use as many relevant, free and open API:s as possible to generate extensive and diverse search results. Spezify is founded in Stockholm, Sweden by Felix af Ekenstam and Per Persson who have over 10 years experience within the creative digital industry. A beta was

released late April 2009 and the first official version went online on the 15th of June. We are constantly working on Spezify, adding API:s and enhancing the search experience for upcoming versions. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Spot.us - Community Funded Reporting

<http://spot.us/>

Spot.us is a nonprofit project of the Center for Media Change and funded by various groups like the Knight Foundation. They are an open source project, to pioneer “community funded reporting.” Through Spot.us the public can commission journalists to do investigations on important and perhaps overlooked stories. All donations are tax deductible and if a news organization buys exclusive rights to the content, your donation will be reimbursed. Otherwise, all content is made available to all through a Creative Commons license. It’s a marketplace where independent reporters, community members and news organizations can come together and collaborate. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Digital Curation Centre

<http://www.dcc.ac.uk/>

The purpose of the Digital Curation Centre is to provide a national focus for research and development into curation issues and to promote expertise and good practice, both national and international, for the management of all research outputs in digital format. Scientists, researchers and scholars across the UK generate increasingly vast amounts of digital data, with further investment in digitisation and purchase of digital content and information. The scientific record and the documentary heritage created in digital form are at risk from technology obsolescence, from the fragility of digital media, and from lack of the basics of good practice, such as adequate documentation for the data. Working with other practitioners, the Digital Curation Centre will support UK institutions who store, manage and preserve these data to help ensure their enhancement and their continuing long-term use. Digital curation is maintaining and adding value to a trusted body of digital information for current and future use; specifically, we mean the active management and appraisal of data over the life-cycle of scholarly and scientific materials. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Media Law & Ethics

<http://www.marquettejournals.org/mediaLawethics.html>

This peer-reviewed scientific journal publishes theoretical and empirical papers and essays and book reviews that advance an understanding of media law and ethics and diversity in society. Submissions may have a legal, historical, psychological, social or cultural orientation but must focus on media and law, ethics or diversity. All theoretical perspectives are welcomed. Journal of Media Law & Ethics is available free of charge as an Open Access journal on the Internet. Content available in PDF format.

Mozenda - Comprehensive Web Data Gathering

<http://www.mozenda.com/>

In 2007 Mozenda's founders set out to solve the problem of gathering unstructured data from the web and turning those data into useful, re-useable information. In 2008, Mozenda accomplished this goal by launching the first of its kind Software as a Service (SaaS) platform for performing comprehensive web data gathering (a.k.a web data extraction, screen scraping, web crawling, web harvesting, etc.), data management, and data publishing. Mozenda, or "more zenful data", is now a reality. The concept of "more zenful data" describes the better way in which people can acquire, utilize, and share all types of data through the Mozenda system. It is also the driving philosophy of the employees who put the user's experience first above everything else and who believe anyone should be able to quickly and easily acquire data from the web. As a SaaS company, Mozenda offers any individual or company a compelling alternative to the costly traditional hardware/software/services sales model. Its revolutionary SaaS model can reduce the total cost of ownership up to 80% over alternative solutions while adding additional features, capabilities, and conveniences. This has been added to my [Web Data Extractors](#) White Paper Link Compilation. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MUVEs and Experiential Learning: Examples

<http://innovateonline.info/?view=article&id=702&action=synopsis>

Multiuser virtual environments (MUVEs) like Second Life present unparalleled opportunities to help students connect knowledge by description to knowledge by experience; in a MUVE, students can experience phenomena rather than only reading about them. Baba Kofi Weusijana, Vanessa Svihla, Drue Gawe, and John Bransford describe their use of a maze constructed in Second Life to help students experience firsthand the phenomena described in their educational psychology course. Their use of Second Life is particularly notable in its use of MUVE-based movies and other strategies to leverage Second Life's interactive powers for exploration despite restricted access to technology. The examples they present can hopefully lead to new designs and uses of virtual environments that allow students to experience relevant phenomena and enable researchers to conduct additional experiments of virtual, experience-rich additions to traditional ways to teach and learn. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Legal, Factual and Other Internet Sites for Attorneys and Legal Professionals

<http://www.bespacific.com/mt/archives/021542.html>

This listing by Timothy L. Coggins of Internet sites for legal, factual, and other research presents a variety of sources for attorneys, law students, law librarians, and others who use the Web. Initially developed for an Advanced Legal Research course and a continuing education session for legal assistants and paralegals, the listing includes sites for primary authorities, both federal and state, as well as URLs for other types of information such as names of possible expert witnesses and biographical and background

information about individuals. This has been added to [Directory Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Orbital: the Electronic Journal of Chemistry

<http://www.orbital.ufms.br/index.php/dqi>

The Electronic Journal of Chemistry - is a new peer-reviewed online journal published by the Department of Chemistry of the Center for Science and Technology of the Universidade Federal de Mato Grosso do Sul, Brazil. Original contributions (in Portuguese, Spanish, or English) are welcome, which focus on all areas of Chemistry and their interfaces with Pharmacy, Biology, and Physics. The journal has an international editorial team of experts, ensuring high standards for the texts published.

yWriter5 - Free Novel Writing Software To Help You Write a Book

<http://www.spacejock.com/yWriter5.html>

yWriter5 is a free word processor which breaks your novel into chapters and scenes. It will not write your novel for you, suggest plot ideas or perform creative tasks of any kind. It does help you keep track of your work, leaving your mind free to create. This free novel writing program has evolved over the years into a powerful piece of software, allowing you to break your book into chapters and scenes. Tracking progress is easy with the 'status' flags you can apply to each scene: outline, draft, 1st edit, 2nd edit or done. Because losing work is the pits, this program will also create autobackups by date and time, as frequently as once a minute if desired. These can be browsed at will, making it easy to revert to an earlier version of your work. Includes a text editor, project overview, daily change log and much more. Other features include: 1) Organise your novel using a 'project'; 2) Add chapters to the project; 3) Add scenes, characters, items and locations; 4) Display the word count for every file in the project, along with a total; 5) Saves a log file every day, showing words per file and the total. (Tracks your progress); 6) Saves automatic backups at user-specified intervals; 7) Allows multiple scenes within chapters; 8) Viewpoint character, goal, conflict and outcome fields for each scene; 9) Multiple characters per scene; 10) Storyboard view, a visual layout of your work; 11) Re-order scenes within chapters; 12) Drag and drop of chapters, scenes, characters, items and locations; 13) Automatic chapter renumbering; 14) Full screen editor; 15) Automatic daily zip of the entire project; and 16) NEW: Text-to-speech built into the text editor. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Minute BlogCast by Marcus P. Zillman

<http://www.MinuteBlogCast.com/>

This is an alpha based platform and a test video for my upcoming **Minute BlogCast** daily video broadcast for highlighting my daily postings to zillman.us blog. Within two weeks we will be celebrating my 10,000 posting since the year 2000 on various subjects for searching and researching using the Internet. Bookmark and return for this upcoming freely available service.

Tech & Learning - The Resource for Education Technology Leaders

<http://www.techlearning.com/>

For almost 30 years, Tech & Learning has served the K-12 education community with practical resources and expert strategies for transforming education through integration of digital technologies. Our audience includes all job roles within the district community, with district-level technology coordinators the primary recipients. Beyond that, our magazine is often used as a professional development tool to help educators across the board get up to speed with the newest technologies and products in order to best prepare students for the global digital workforce. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

RightSignature - Sign Documents Online

<https://rightsignature.com/>

RightSignature makes it simple to get documents signed online. Create a free account in seconds, upload your document, and enter recipient information. RightSignature manages the entire process, providing you regular updates as each party views and signs your document. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

Journal of Academic and Business Ethics

<http://www.aabri.com/jabe.html>

The Journal of Academic and Business Ethics publishes original, unpublished works related to contemporary business and education ethical issues. Educational issues like plagiarism, academic integrity, academic policy and cheating are typical topics in educational ethics articles. Corporate fraud, sexual harassment, white-collar crime and legislative issues are typical topics in business ethics articles.

Transferr - Speed dial for the Web

<http://www.transferr.com/>

Transferr is speed-dial for the web. Transferr is your customised home page through which you can quickly and easily access your favorite web sites. Transferr takes pictures of your favourite sites and presents them as icons on your home page, ready for easy access. You can add a link to a web site by just typing in the address, or you can add addresses from your browser. Because Transferr is web-based, you can access your Transferr home page from any computer, or any phone browser, anywhere in the world. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Neuroanthropology

<http://neuroanthropology.net/>

Neuroanthropology is a collaborative weblog created to encourage exchanges among anthropology, philosophy, social theory, and the brain sciences. They especially hope to explore the implications of new findings in the neurosciences for our understanding of culture, human development, and behaviour. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Pop!Tech Hub - Social Network and Collaboration Platform for Vanguard-Edge Emerging Ideas

<http://hub.poptech.org/>

The Pop!Tech Hub is a social network and collaboration platform for people interested in vanguard-edge emerging ideas, trends, tools, and technologies, and their application to significant social challenges. It's open to everyone: past Pop!Tech participants, members of the online Pop!Tech community or anyone with an interest in social innovation. Here you will find people of many different disciplines and perspectives meeting, creating, tracking and evaluating projects; exchanging ideas; and working together on change initiatives of every scale. On the Hub, you can: a) Establish a personal profile, including a bio and photo, with complete and detailed privacy controls, and browse for new friends; b) Join or start a new social group, post messages and share your thoughts with other members of the group; c) Create, find, vote on, or join a collaborative project, or track it by its RSS feed; and d) Participate in a Resource marketplace, where you can offer resources to projects, or browse resources being offered by other members. This is just the beginning of the Hub's development, and they will be adding many new features in the near future. Journal of Mechanical Science and Technology

<http://www.springer.com/engineering/mechanical+eng/journal/12206>

The aim of the Journal of Mechanical Science and Technology is to provide an international forum for the publication and dissemination of original work that contributes to the understanding of the main and related disciplines of mechanical engineering, either empirical or theoretical. The Journal covers the whole spectrum of mechanical engineering, which includes, but is not limited to, Materials and Design Engineering, Production Engineering and Fusion Technology, Dynamics, Vibration and Control, Thermal Engineering and Fluids Engineering. Manuscripts may fall into several categories including full articles, solicited reviews or commentary, and unsolicited reviews or commentary related to the core of mechanical engineering. It is also proposed to maintain an international diary of forthcoming events. Prospective guest editors for publishing the special issue should contact the Editor-in-Chief of the Journal.

omCollab - Open Source Powerful Enterprise 2.0 Collaboration Software

<http://mike2.openmethodology.org/wiki/OmCollab>

omCollab is a powerful, Enterprise 2.0 collaboration product completely built on open source software. It provides a web portal environment to create, share and search Microsoft Office content, files, shared bookmarks, blog posts and wiki articles across the enterprise. omCollab integrates some of the most powerful open source software applications into a single collaborative environment. It enables organisations to drive innovation, collaboration and community building. The capabilities provided by omCollab include: a) A Wiki to collaboratively create and share content (based on MediaWiki which powers Wikipedia, the world's largest Wiki); b) Blogs to publish individual or group-based information (based on Wordpress, the world's most popular blogging platform); c) Social Bookmarking for storing, sharing and discovering web bookmarks. We have released this as omBookmarks, a fork of the codebase from Scuttle; d) Social Networking – "facebook light" functionality for our IM community that is integrated into the other components; e) Forums to support discussion groups and frequently asked questions (based on phpBB, the most widely used open source forums solution); f) Mashup from MIKE2.0, to build integrated solutions based on open content and internally held BearingPoint assets, thus enabling the concept of an Integrated Content Repository for Information Development; g) Search for users to discover content across federated repositories; h) Rich User Interface with advanced navigational components, an integrated skin and single sign on to provide common look and feel across the platform; and i) Open Methodology Compliance (OMC) capability to link an organisation into the MIKE2.0 open standard. There are also a number of extensions to these components, that can be found of the Special:Version page of MIKE2.0. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

OneHub - Flexible Cloud to Share Files, Manage Projects and Online Collaboration

<http://onehub.com/>

Onehub is a web application that provides everything you need to easily and securely share business information and files with partners, customers, coworkers, and suppliers. Onehub is not your typical complicated collaboration software. Instead, it's fun and easy to use and can help take your growing business to the next level. Best of all, it's on demand so you don't have to install or maintain expensive server software. Nor do you have to be an IT genius to use it – all you need is an internet connection. This has been added to tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™ Information Blog.

Journal of Public Health

<http://www.springer.com/medicine/health+informatics/journal/10389>

The Journal of Public Health is an interdisciplinary publication for the discussion and debate of international public health issues, with a focus on European affairs. It describes the social and individual factors determining the basic conditions of public health, analyzing causal interrelations, and offering a scientifically sound rationale for personal, social and political measures of intervention. Coverage includes contributions from epidemiology, health economics, environmental health, management, social sciences, ethics, and law.

PhoneGap - Cross Platform Mobile Framework

<http://phonegap.com/>

PhoneGap is an open source development tool for building fast, easy mobile apps with JavaScript. If you're a web developer who wants to build mobile applications in HTML and JavaScript while still taking advantage of the core features in the iPhone, Android and Blackberry SDKs, PhoneGap is for you. For a quick introduction to PhoneGap, watch this three-minute video. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

New Relic RPM

<http://www.newrelic.com/>

You write good code. But things can happen. How fast can you spot application performance problems-and their root causes? Don't rely on log files to solve tough performance problems. With New Relic RPM, you can monitor 24x7, detect problems in real-time, drill down to find the causes, and continuously tune for high performance. You'll find your slow queries and controllers. You'll trace transactions in fine detail. Use their dashboards or create your own. Add as many users as you like. It's only a two-minute installation. Get your app in shape by tuning and scaling. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

ScienceResearch.com - Deep Web Search Engine

<http://www.scienceresearch.com/>

ScienceResearch.com is a free, publicly available deep web search engine that uses advanced "federated search technology" to return high quality results by submitting your search query - in real-time - to other well respected search engines then collating, ranking and dropping duplicates of the results. Using state-of-the-art federated search technology from Deep Web Technologies, ScienceResearch.com accelerates your research by returning the most relevant results from over 400 authoritative science and technology collections to one, easily navigable page. Each search is done in real-time, searching the collections you select as if you were entering the search term on each separate website yourself. ScienceResearch.com removes duplicate results, and then weighs each result for relevance according to how closely it matches your search word or phrase.

ScienceResearch.com accelerates health search and features include: a) Credible research collections - Each ScienceResearch.com collection is chosen for its outstanding contributions to the world of science; b) Strong search parameters - The technology

International Data Base (IDB) of the U.S. Census Bureau

<http://www.census.gov/ipc/www/idb/index.php>

The International Data Base (IDB) offers a variety of demographic indicators for countries and areas of the world with a population of 5,000 or more. The IDB has provided access to demographic data for over 25 years to governments, academics, other organizations, and the public. It is funded by organizations that sponsor the research of the Census Bureau's International Programs Center. The IDB provides many types of demographic data, including: a) Estimates and projections of: 1) Birth, death, and growth rates, migration rates, infant mortality, and life expectancy; 2) Fertility rates; and 3) Total population and population by age and sex. The demographic estimates and projections found in the International Data Base are the result of over 30 years of analysis of census, survey, vital statistics, and other data by Census Bureau demographers. The IDB differs from some other online resources in several ways. First, the estimates and projections of vital rates, vital events, and midyear population presented are based on careful evaluation of census and survey results and, in part because of this evaluation process and associated estimation processes, represent a set of consistent estimates and projections of population, fertility, mortality, and international migration. The IDB is not simply a compilation of estimates taken from other sources. Second, estimates from original sources are accurately dated, and derived estimates of fertility and mortality available from the IDB reflect that dating. Third, the projections are generated using the Census Bureau's Rural/Urban Projection (RUP) program, which projects population, by single years of age, for each calendar year beyond a base year. This means IDB fertility and mortality estimates pertain to specific years rather than being average values for 5-year periods. It also means that the impact of natural disasters, civil conflicts, and changes in the health climate in a country can be reflected in year-specific estimates of fertility, mortality, and migration found in the IDB. Finally, the data are accessible in multiple ways to meet different user needs.

Find tabular data for countries and regions as well as demographic indicators, population pyramids and source information for countries. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Statistics Resources](#) Subject Tracer™ Information Blog.

Australasian Marketing Journal (AMJ)

<http://www.elsevier.com/locate/inca/717638>

The Australasian Marketing Journal (AMJ) is the official journal of the Australian and New Zealand Marketing Academy (ANZMAC). It is an academic journal for the dissemination of leading studies in marketing, for researchers, students, educators, scholars, and practitioners. The objective of the AMJ is to publish articles that enrich and contribute to the advancement of the discipline and the practice of marketing. Therefore, manuscripts accepted for publication will be theoretically sound, offer significant research findings and insights, and suggest meaningful implications and recommendations. Articles reporting original empirical research should include defensible methodology and findings consistent with rigorous academic standards.

GlusterFS - Non-Stop Cluster Storage

<http://www.gluster.org/>

GlusterFS is a cluster file-system capable of scaling to several peta-bytes. It aggregates various storage bricks over Infiniband RDMA or TCP/IP interconnect into one large parallel network file system. GlusterFS is based on a stackable user space design without compromising performance. Stackable user-space design: easy to install, extensible, portable, kernel independent, rapid development and advanced features such as distributed bdb backend, web embeddable, automatic replication, pluggable I/O schedulers. GlusterFS can scale to multiple Peta bytes and 100s of GB/s throughput. GlusterFS can sustain 1 GB/s per storage brick over Infiniband RDMA. Performance scales as you add more storage bricks. GlusterFS self-heals itself on the fly. There is no fsck. Storage backend is accessible directly as regular files and folders (NFS style). With replication enabled, GlusterFS can with-stand hardware failures. GlusterFS is a Free Software released under GNU GPL v3 license. This means you are allowed freely copy, distribute or improve this software. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Alice - Your Personal Shopper and Organizer

<http://www.alice.com/>

Alice provides you a better way to manage all of your household essentials online. You tell Alice what you buy—choosing from great deals on 1000's of products—and Alice goes to work. They organize all of your products, find coupons and deals for you, remind you when you might be running low, and help you order just the items you need so you can avoid that trip to the corner drugstore or the big-box store. And all this convenience comes direct to your door with free shipping included. Best of all, you won't over pay for

the power and convenience of Alice. In addition to free shipping on every order, you'll find great prices too. That's because Alice isn't your average retailer. You order from Alice just like you would a retailer, but behind the scenes they work like a marketplace, allowing manufacturers to sell directly to you. This direct to consumer model eliminates the retail middleman, saving lots of costs that can be passed directly on to you. And in addition to saving you money, the Alice marketplace allows your favorite brands to have a direct relationship with you—to reward you, personalize things for you, and work smarter for you. It is a win-win that gives you fantastic convenience AND tangible savings. This has been added to [ShoppingBots and Online Shopping 2009](#) Subject Tracer™ Information Blog.

Poken - Your Social Network Connection

<http://www.doyoupoken.com/>

With your poken you instantly connect with new friends across online social networks when and where you meet them. The poken hand pulls out of the body, revealing a USB connector. Insert the USB connector into any computer with web access to easily upload your new contacts to the Poken web database. You choose which of your social network profiles you would like to share with people when you meet them in the real world. A small logo of each social network you choose is displayed as a link on your « Poken Card »,» which shows only your most basic information. Your contacts can view your Poken Card on doyoupokemon.com, but, if they want to see more, they only have to click the logo to see your profile on the social networking site you've chosen to share. On the Poken site you and your friends can view your contacts alphabetically, or chronologically in your "social timeline." You can also send messages, group contacts with a label, write notes for yourself about each contact, and so much more. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Future of the Internet

<http://www.mdpi.com/journal/futureinternet>

Future Internet (ISSN 1999-5903) is an open-access journal which provides an advanced forum for scientific studies related to Internet technologies and the information society. It publishes regular research papers, reviews and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers or the use of color figures. The full experimental details must be provided so that the results can be reproduced. There are, in addition, unique features of this journal: a) manuscripts regarding research proposals and research ideas will be particularly welcomed; b) electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material; and c) manuscripts concerning summaries and surveys on research cooperation and projects (that are founded by national governments or others) to give information for a broad field of users. Subject Areas include: 1) Internet-related topics, including applications; 2) information society; 3) computer science; 4) indexing and search engines and technologies; 5) semantic web, markup, RDF; 6) web services; 7) file formats,

protocols; 8) virtual and mirror worlds; 9) e-Government; 10) e-Education and e-Learning; and 11) any emerging topics. This has been added to my presentation resource page for [The Future of the Internet: Internet 2009](#)

PHPizabi - Powerful Social Networking Platform

<http://www.phpizabi.net/>

PHPizabi is one of the most powerful social networking platforms on the planet. With literally thousands of websites powered by PHPizabi including everything from simple friends sites to the most complex networking super sites out there. Easy to install, use, and raising the bar on what it is to provide a reliable, fast, social networking package to raise your business to the next level. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

World Wide School

<http://worldwideschool.org/>

The World Wide School is one of the best places on the Internet to learn just about anything. Just read, click and learn. This site is dedicated to the collection, preservation and presentation of educational material. To participate in the World Wide School all you need to do is to invest your time. For whatever reason, many people may find it difficult to broaden their education by traditional means; attending high school or college can seem like an impossible dream. That is why they are offering an education via the Web. They are still stocking The Hart Library, which comprises of classic titles including those from the collection of The Gutenberg Project. This is a complete library containing everything from fairy tales and poetry to mathematical dissertations and reference material. Please note that many of the books and other works provided on this site were written many years ago, before the invention of radio, atomic bombs, and automobiles. Some are even older, written when the world was run by Kings and Queens, and most people did not know how to read. The works reflect the times in which they were written, and many contain views about race, religion, science and other things that we find offensive or just plain wrong today. They believe that part of value of these works is the window they provide on the past -- but of course the views, opinions and beliefs they express are not necessarily those of World Wide School. By providing these books they do not mean to advocate ANY point of view, except that education and reading are good. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

WikiCity - City Wiki for Every City

<http://www.wikicity.com/>

WikiCity is a city wiki for every city. WikiCity is much like an on-line newspaper, except anyone can contribute stories, photos, opinions, and local events! Find things to do, places to visit, share local history, exchange ideas, discuss issues within your community, or post a free classified ad in the local WikiCity Marketplace. Almost every page can be edited, however, due to the rate of inflation, user accounts are now twice as free. They are also optional, but you are encouraged to create one. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has

been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

International Journal of Critical Accounting

<http://www.inderscience.com/ijca>

Edited by Prof. Aida Sy, Manhattan College, New York and Prof. Tony Tinker, Baruch College at the City University of New York, it is concerned with theoretical and empirical aspects of critical accounting and related issues and is intended for academia and the professional accounting community. Papers examine emerging trends in critical accounting and fast-changing concerns faced by corporations, government and regulators from a comprehensive range of areas.

Posterous - The Place to Post Everything Via eMail

<http://posterous.com/>

Posterous is the dead simple way to put anything online using email. They launched in July 2008 and they have been steadily growing and adding features. They love sharing thoughts, photos, audio, and files with our friends and family, but they didn't like how hard it was... so they made a better way. That's posterous. They are super excited to see what happens when blogging becomes as easy as email, and they hope you enjoy posterous as much as they do. Autopost to all the other services you use. One email to posterous can update your other blogs and social networks including twitter and facebook, making them all more useful. Casual bloggers can attach anything .. photos, video, music and docs. One stop no set-up hosting of your data, all by email. They do all the work so you don't have to! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

The Internet at 40 - Open University Podcasts

<http://podcast.open.ac.uk/oulearn/computing-and-ict/podcast-john-naughton-internet-40-special>

2009 is the 40th anniversary of the first computer network - the precursor of the internet - and the 20th anniversary of the brilliant idea that led to the creation of the world wide web. What exactly is the internet, and how does it differ from the world wide web? Who were its pioneers, and what technological surprises has it sprung? This album opens with a specially recorded interview with John Naughton, Professor of the Public Understanding of Technology at the Open University and author of 'A brief history of the future - the origins of the internet'. He explores some of the key moments in the short but spectacular history of an extraordinary phenomenon, the people who made them happen, and some of the problems that have emerged. The album also features archive interviews with Tim Berners-Lee, Vint Cerf, Donald Davies and other pioneers of the internet age, recorded in the late 1990s. The album is completed by a newly recorded interview with Rodney Harrison, lecturer in Heritage Studies at the Open University, in which he talks about his research into Second Life: Cyber-Archaeologies, Heritage and Virtual Communities. The interviews are presented by radio journalist Penny Boreham. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to [Tutorial Resources](#) Subject Tracer™ Information Blog.

International Journal of Automation and Computing (IJAC)

<http://www.ijac.net/>

<http://www.springerlink.com/content/120333/>

The International Journal of Automation and Computing (IJAC) provides a forum for research contributions in automation and computing technology. Research papers feature a strong focus on new trends, theoretical and experimental research and development, emerging technology, and industrial standards. With its extensive scope, IJAC addresses such topics as artificial intelligence, automatic control, bioinformatics, computer science, information technology, modeling and simulation, networks and communications, optimization and decision-making, pattern recognition, robotics, signal processing, and systems engineering. In addition to original research articles, IJAC publishes insightful review and tutorial papers. Special issues explore current and emerging topics of interest.

Vertex42 - Excel Templates, Calendars, Calculators and Spreadsheets

<http://www.vertex42.com/>

Economic Cooperation and Development Review

http://www.sesrtcic.org/news_detail_print.php?id=44

Economic Cooperation and Development Review is a semi-annual periodical of SESRIC which will feature interviews with eminent personalities, short articles on selected issues of economic growth, development and cooperation which are of immediate interest to the member countries, summaries of selected papers and reports prepared by the Centre itself, brief papers and news on current economic developments in individual member countries, interviews with eminent personalities in the Islamic world and elsewhere, and a section on titles and reviews of recently published books. The Review targets primarily economic policy-makers, government officials, academicians, researchers and other interested readers in the OIC and other developing countries. The contributions from academicians, researchers and professionals in universities, government offices, research institutions and regional and international organisations focus on different issues of economic development and cooperation that are of primary interest and benefit to the member countries.

East-West Center

<http://www.eastwestcenter.org/>

The East-West Center is an education and research organization established by the U.S. Congress in 1960 to strengthen relations and understanding among the peoples and nations of Asia, the Pacific, and the United States. The Center contributes to a peaceful, prosperous, and just Asia Pacific community by serving as a vigorous hub for cooperative research, education, and dialogue on critical issues of common concern to the Asia Pacific region and the United States. Funding for the Center comes from the U.S. government, with additional support provided by private agencies, individuals, foundations, corporations, and the governments of the region. Over its nearly fifty years of serving as a U.S.-based institution for public diplomacy in the Asia Pacific region with international governance, staffing, students, and participants, the Center has built a worldwide network of more than 55,000 alumni and 600 partner organizations. With a 21-acre campus in Honolulu and a Washington, D.C., office focused on preparing the U.S. for an era of growing Asia Pacific prominence, the Center is helping to develop global leadership through programs that help current and future leaders understand the issues and people in this dynamic region. Corkboard - Helps You Remember What You Want

<http://www.corkboard.it/>

You see, hear or think about something you want to remember. Whatever it is, Corkboard it. And when you add products, places or events to your Corkboard, they will scan Amazon, Yelp and Upcoming to give those things extra details. Create unlimited Collections to help organize your Corkboard. e. Recipes, Web sites, Restaurants, Bars, Travel destinations, and Horror movies. Whatever you post, organize it all as you like! Share your things or keep them private. Repost to Twitter or Facebook. Send details to your phone or e-mail. See what others are in to and grab what you like. When you're on the go, so is Corkboard. Create and access your Corkboard from your phone via text message, e-mail, voice and mobile web. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Clinical and Diagnostic Research (JCDR)

<http://www.jcdr.net/>

Journal of Clinical and Diagnostic Research (JCDR) is a wide scope journal with topics embracing most fields of Medicine. The topics covered in the journal will be of relevance to physicians, researchers as well as specialists. Our target audience is Medical fraternity across the globe. We aim to use this e-journal to publish the findings of doctors working at the ground level and that of young researchers. JCDR strongly supports research that will benefit medical science and discourages the publication of articles that merely represent pre-established and repetitive facts. However, at times, the journal does allow publication of articles that may have been reported in Western literature but have not been reported from the developing and the underdeveloped world. This is with a dual aim, to promote medical publication from these countries and to recognize the fact that disease and disease behaviour may vary widely between populations. Journal of Clinical and Diagnostic Research is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

ViewLikeUs Engine - The Web Through Many Eyes

<http://viewlike.us/>

This is a brand new site that allows you to check out how your website looks in the most popular resolution formats. It's all powered by Ajax & PHP so no need to download anything! To Get started just type your URL in their box. Using ViewLike.Us is perfectly free, and always will be! So don't forget to bookmark them, as you never know when they might come in hand! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Worldwide Governance Indicators (WGI)

<http://info.worldbank.org/governance/wgi/index.asp>

The Worldwide Governance Indicators (WGI) project reports aggregate and individual governance indicators for 212 countries and territories over the period 1996–2008, for six dimensions of governance: 1) Voice and Accountability, 2) Political Stability and Absence of Violence, 3) Government Effectiveness, 4) Regulatory Quality, 5) Rule of Law, and 6) Control of Corruption. The aggregate indicators combine the views of a large number of enterprise, citizen and expert survey respondents in industrial and developing countries. The individual data sources underlying the aggregate indicators are drawn from a diverse variety of survey institutes, think tanks, non-governmental organizations, and international organizations. The six aggregate indicators and the underlying data sources can be viewed interactively on the Governance Indicators webpage of this site. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [International Trade Resources](#) Subject Tracer™ Information Blog.

THWONK - Where You Define the Rules of Online Communications

<http://www.thwonk.com/>

THWONK is an exciting web platform and community for designing the rules of online communities such as email lists. THWONK is revolutionary because it gives you full access to manipulate and change the social rules of email list communication! These are the types of eMail lists that you can design using THWONK:

Bump Lists: Subscription is limited to X subscribers. When a new subscriber joins the list, they "bump" or "unsubscribe" older subscribers already on the list. Users must "re-subscribe" to join.

Time Lists: Users must post to the list within a given amount of time, otherwise they are automatically unsubscribed.

Convergent Lists: The subject matter of messages sent by participants is analyzed with those of other "Convergent Lists" and if similar topics are being discussed, the two convergent lists then join into one list.

Divergent Lists: The subject matter of messages sent by participants is analyzed and if one or more participants continually discuss the same subject heading for longer than the prescribed amount of posts, those discussing the topic are diverted to a new, separate list.

Location Lists: This type of list will dynamically tag all email responses with the distance in miles from where it was sent to each individual participant.

Invent New Lists: With THWONK you can create, invent and build new types of lists. THWONK lets you write your own list rules!

Psychiatry and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

MixedInk - Free Collaborative Writing Tool

<http://mixedink.com/>

MixedInk allows you to connect, collaborate and be heard ... many people one voice. MixedInk takes a fresh approach to collaborative writing. It's a fun, democratic and elegant way for people to weave their best ideas together. (Plus, it's free!) MixedInk is used by students, employees, fans, activists, political & community groups, unions, citizen journalists... pretty much any group with an opinion. Together, people write op-eds & letters to the editor, text for petitions, mission statements, questions & comments for politicians & stars, news articles, blog posts, and lots more. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Qitera Market and Customer Intelligence Alerts™

<http://www.qitera.com/corp/platform/alerts>

Qitera Alerts™ is a brand new market and customer intelligence application that automatically tracks relevant news and developments within your company's market environment. Qitera Alerts™ provides your marketing and sales teams with accurate and current insights regarding your most important clients, projects, market segments and competitors. Qitera Alerts™ tracks and analyzes thousands of information sources on a global scale, automatically and in real-time including websites, news and social media. Relevant results are directly delivered to your news feed and captured contextually (saved into your topic activity streams). That way important news on customers will never get lost. You and your team are empowered to collaborate around the fresh insights and make better decisions. With Qitera Alerts™ they enable decision makers in the following domains to focus on their core business: 1) Sales Enablement / Customer Intelligence, 2) Market Intelligence, 3) Competitive Intelligence, 4) Innovation Management / Trend Scouting, 5) Communications, 6) Investor Relations, 7) Risk Management, and 8) Brand Monitoring. Benefits include: a) Reduced time for monitoring and search activities, b) Broader scope of information (global view), c) More revenues through well-informed sales people, d) Innovative products through better customer understanding, e) Agile team work and collaboration around customer updates, and f) More market awareness by real-time monitoring and global tracking. Viruses

<http://www.mdpi.com/journal/viruses/>

Viruses is an open-access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, and short notes. Their aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. There are, in addition, unique features of this journal:

- * manuscripts regarding research proposals and research ideas will be particularly welcomed

- * electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material
- * manuscripts concerning summaries and surveys on research cooperation and projects (that are founded by national governments or others) to give information for a broad field of users.

Subject Areas:

- * Virus, viruses, virion, virology, virological, viral, virologist
- * Virus classification, International Committee on Taxonomy of Viruses (ICTV), viral taxa, Baltimore classification
- * DNA viruses, RNA viruses, retrovirus (Reverse transcribing viruses), Norovirus, RNA virus, rotavirus, human immunodeficiency virus (HIV), tobacco mosaic virus, foot and mouth disease (aphthovirus), poliovirus, arterivirus, nidovirales, arterivirus, okavirus, pestivirus, hepatitis B virus, influenza viruses, oncovirus, neurotropic virus, neurovirulent, etc.
- * Virus-like agents, viroids, prions
- * Viral infections, viral hepatitis, avian influenza and SARS, common cold, influenza, chickenpox and cold sores, smallpox
- * Epidemics and pandemics, Spanish flu, ebola, AIDS
- * Vaccination, vaccines, immune system, antigen or immunogen, antibodies
- * Antiviral drugs, aciclovir, lamivudine, ribavirin, etc.

- * Virucide, virucides
- * Viral epidemiology (control of virus infections in humans)
- * Origin of viruses
- * Virus structures, genomes
- * Genetic change (genetic drift, mutation), Genetic recombination or reassortment, viral evolution
- * Life cycle of viruses

Harvard Business Publishing (HBP)

<http://harvardbusiness.org/>

Harvard Business Publishing (HBP) was founded in 1994 as a not-for-profit, wholly-owned subsidiary of Harvard University. Its mission is to improve the practice of management and its impact in a changing world. HBP does this by serving as a bridge between academia and enterprises around the globe through its publications and reach into three markets: academic, enterprise, and individual managers. HBP has approximately 250 employees, primarily based in Boston, with an office in New York City. Its business units are Harvard Business Review magazine and article reprints, Harvard Business Press books, Harvard Business Publishing Newsletters, Harvard Business Publishing Conferences, Harvard Business Publishing Higher Education, and Harvard Business Publishing eLearning. Through these publishing platforms, HBP is able to influence real-world change by maximizing the reach and impact of its essential offering—ideas. Transom.org - A Showcase and Workshop for New Public Radio

<http://www.Transom.org/>

A small hinged window above a door, allowing light and ventilation into hallways of older buildings. At magazine and newspaper offices, unsolicited manuscripts were submitted "over the transom." Transom.org is an experiment in channeling new work and voices to public radio through the Internet, for discussing that work, and encouraging more. Learn about how Transom works and how you can submit your work for consideration. Atlantic Public Media administers Transom.org. APM is a non-profit organization based in Woods Hole, Massachusetts which has as its mission "to serve public broadcasting through training and mentorship, and through support for creative and experimental approaches to program production and distribution." APM is also the founding group for WCAI & WNAN, a new public radio service for Cape Cod, Martha's Vineyard, and Nantucket under the management of WGBH-Boston. The idea for Transom.org came from journalist and devoted public radio listener, Bill McKibben, arising from his wish to hear more interesting and diverse stories on the air. Bill's idea was championed by Jay Allison, Executive Director of APM, who liked it for the way it brings together the worlds of public radio and online community. Jay has been involved with both since the early days -- with NPR since the 1970s and as a host on the WELL and of AIR online conferencing since the 80s. This project has received lead funding from the Florence and John Schumann Foundation. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Historic Aerials - Aerial Photography From the Past to the Present

<http://www.historicaerials.com/>

HistoricAerials.com by NETR Online, a division of Nationwide Environmental Title Research, LLC, provides free online access to historic and current aerial photographs. You can view aerial photography taken from the 1930s through today. Our multi-year comparison tools will enable the viewer to quickly recognize historical changes in a specific parcel of land or the surrounding area of a property. Historic Aerial photography has many different uses. Because it provides data and a perspective that is otherwise elusive, there are applications in academic research, resolving legal disputes, tracking genealogy, planning real estate development, and much more. Government agencies, construction contractors, financial investors, legal professionals, and environmental businesses use aerial photography quite extensively when performing:

- » Environmental due diligence and site assessments
- » Allocation of environmental liability
- » Reclamation obligations
- » Historical site documentation
- » Vegetation growth tracking
- » River and runoff trends

Historic Aerial Photos have been amassed by several government organizations such as

Awareness Watch V7N8 August 2009 Newsletter

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

the United States Geologic Survey (USGS), the Department of Natural Resources (DNR), the United States Department of Agriculture (USDA), as well as numerous private organizations. Historic Aerials.com has revolutionized the storage and ease of access to these types of photographs with the use of Geographic Information Systems (GIS). GIS is a way to store data geo-spatially; that is, to reference data such as parcel boundaries, rivers & streams, contours, even sewer lines to a point on the earth, and represent these in a dynamic three-dimensional model. Formerly, these photographs were stored in large books and archived at federal, state, and county offices as well as warehoused at private companies. Many times particular groups did not include the entire city or county, and often these were flown at different altitudes and at irregular intervals. This lack of continuity is fertile ground for the spatial database structure of GIS. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

International Journal of Biometric and Bioinformatics (IJBB)

<http://cscjournals.org/description.php?Jcode=IJBB>

Bioinformatics is a scientific discipline that combines biology, computer science, mathematics, and statistics into a broad-based field that will have profound impacts on all fields of biology. On the other hand, Biometrics, emphasizes the role of statistics and mathematics in the biosciences. Its objectives are to promote and extend the use of statistical and mathematical methods in the principal disciplines of biosciences. The International Journal of Biometric and Bioinformatics (IJBB) brings together both of these aspects of biology and creates a platform for exploration and progress of these, relatively new disciplines by facilitating the exchange of information in the fields of computational molecular biology and post-genome bioinformatics and the role of statistics and mathematics in the biological sciences. Bioinformatics and Biometrics are expected to have a substantial impact on the scientific, engineering and economic development of the world. Together they are a comprehensive application of mathematics, statistics, science and computer science with an aim to understand living systems. We invite specialists, researchers and scientists from the fields of biology, computer science, mathematics, statistics, physics and such related sciences to share their understanding and contributions towards scientific applications that set scientific or policy objectives, motivate method development and demonstrate the operation of new methods in the fields of Biometrics and Bioinformatics. International Journal of Biometric and Bioinformatics is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

Enterprise Leadership – Empowering the Business Impact of IT for Global Organizations

<http://www.enterpriseleadership.org>

Enterpriseleadership.org is a thought-leadership forum to help Global Fortune 1000 C-level executives improve their business impact of information technology in delivering

products and services to customers and other constituencies; enhancing improved business processes, and enabling of individual productivity and group productivity. The audience also includes IT executives from government agencies, healthcare organizations, large not-for-profits, and academic institutions. European Journal of Cross-Cultural Competence and Management

<http://www.inderscience.com/ejccm>

Edited by Frank Brueck, Vienna University of Economics and Business Administration, Austria, it is the official scholarly publication of the International Association of Cross-Cultural Management and Competence (IACCM). The journal aims to widen and deepen the discussion about issues regarding the influence of cultural differences and diversity on the management of organisations of all kinds. Of particular relevance is the question of how culture affects both managers and decision-makers in situations involving the cross-cultural transfer of knowledge, values and experiences.

Jaspersoft - Open Source Business Intelligence

<http://www.jaspersoft.com/>

A comprehensive Business Intelligence suite of products for reporting, data analysis (OLAP), and data integration (ETL). The Jaspersoft Business Intelligence Suite Includes: JasperReports, iReport, JasperServer, JasperAnalysis, and JasperETL. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

DEMO - The Launchpad for Emerging Technology

<http://demo.com/>

Conference Format: The feel you get when you enter the ballroom at DEMO is unlike any other conference. Each company is given just six minutes on the DEMO stage to truly demonstrate how their product will change the world. No PowerPoint or flashy corporate presentations allowed. Just the founders and the technologies many are staking their careers on... it doesn't get any more straightforward and fast paced than that.

Demonstrator Pavilion: While the DEMO stage is the place to see each technology unveiled, the Demonstrator Pavilion is where the real action is. It's a perfect environment to network, research, form meaningful and strategic relationships, and—yes—even close some deals. Here, investors and potential partners can get a close up look at the latest trend-setting technologies. It's not just a place for more face time but for more eyes-on-the-product time. Unlike at tradeshow, no demonstrator can dominate the conference with marketing collateral, signage, whiz-bang graphics, and alluring giveaways. The professionally managed and ergonomic Demonstrator Pavilion is a level playing field. And there is no bad spot on the floor. Everyone has the same visibility keeping the attention laser focused on the products, not on the size of the booth, funding, or corporate backing.

Awareness Watch V7N8 August 2009 Newsletter

International Journal of Granular Computing, Rough Sets and Intelligent Systems

<http://www.inderscience.com/ijgrsis>

Edited by Prof. Xiaohua (Tony) Hu, Drexel University, USA and Prof. T.Y. Lin, San Jose State University, USA, it aims to publish the latest research and development results and experiences in the areas of granular computing, rough sets, fuzzy sets, soft computing and intelligent systems, including applications in areas such as bioinformatics, e-business, security, machine learning, data mining, high-performance computing and wireless mobile computing.

dhtmlxGrid - Ajax-enabled DHTML Grid with Rich Javascript API

<http://www.dhtmlx.com/docs/products/dhtmlxGrid/>

dhtmlxGrid is an Ajax-enabled JavaScript grid control with cutting-edge functionality, powerful data binding, and excellent performance with large datasets. The gridview component is easy-to-use and provides great flexibility due to its rich client-side API. dhtmlxGrid supports different datasources, including XML, JSON, CSV, JS array, and HTML table. Since v1.6 grid data can be loaded from custom XML format. dhtmlxGrid

allows easy implementation of nice looking (managed through css or predefined skins) DHTML tables with rich in-cell editing, fixed multiline headers/footers, resizable, sortable, and draggable columns, built-in filtering, searching, and grouping capabilities. Numerous event handlers let you add necessary interactivity to grid-based interfaces. Smart Rendering technology and built-in paging support allow this data grid to work effectively with huge datasets. Even better performance is reached due to non-linear buffering used in paging functionality (since v1.6). This has been added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™ Information Blog.

<http://tools.mozilla.com/>

<https://labs.mozilla.com/2009/07/open-web-tools-directory/>

There are an immense number of tools that have been created to help web developers. Unfortunately, you might never know this; there's no central index of these tools. It turns out that keeping up with all the development in this space is really difficult—even for folks like us who have been tracking it every day for years. As they have explored different tools they could create here as part of the Developer Tools Lab, they have come to the opinion that in addition to creating new tools, one of the best things they could do is help developers understand the broad universe of tools that already exist and expose some of the fantastic and amazing work that's being done. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Kazeon eDiscovery Software

<http://www.kazeon.com/>

Kazeon's award winning eDiscovery software offers a unique solution for eDiscovery and litigation support for the demanding and complex needs of corporations, legal service providers, law firms and consultants. It is the first enterprise-grade platform to offer a full breadth of capabilities for Early Case Assessments, Legal Hold Management, Analysis & Review, and Collection & Culling. Its integrated workflow within a single application at the lowest cost makes Kazeon's software the most appealing in the industry. With Kazeon, corporations, legal service providers and law firms can significantly reduce Electronic Discovery costs, risk, time & workload by 90% hence creating a new standard for eDiscovery. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Health Reports

<http://www.statcan.ca/english/freepub/82-003-XIE/index-en.htm>

Health Reports published by the Health Information and Research Division. (HIRD) of Statistics Canada is a peer-reviewed journal of population health and health services research. It is designed for a broad audience that includes health professionals, researchers, policymakers, and through media coverage, the general public. The journal publishes articles of wide interest that contain original and timely analyses of national or

provincial/territorial surveys or administrative databases. New articles are published electronically each month and appear in print form, quarterly. All articles published in Health Reports are indexed in Index Medicus and its online counterpart, MEDLINE. Health Reports is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

Screenjelly - Free Screen and Voice Recorder for Twitter, Facebook or eMail

<http://www.screenjelly.com/>

Screenjelly is a free service that records your screen activity along with your voice and lets you share it as a video with your friends via Twitter, Facebook or email. It's the quickest way to show what's on your screen and get instant feedback. Screenjelly does not require any software download or install. It is 100% browser-based and relies on Java to record your screen activity. That's why there's no faster, easier way to share what's happening on your screen right now. Just press the red button and start recording within seconds. It's that simple. Like jelly, knowledge is meant to be spread. But emailing can be a time-consuming and ineffective way to share visual information—like when you're trying to teach your grandma how to configure her printer software, for example. Instead of writing out a lengthy tutorial, Screenjelly lets you SHOW granny how it's done. Simply press the red button and record the process on your own computer. You can even add a voice explanation. Screenjelly will save your screen recording (and voice) as a flash video, allowing you to quickly and easily share your knowledge. But Screenjelly can do much, much more. The easy-to-use service also lets you tap into the Twitter community for instant feedback and tips. And it enables everyone—designers, coders or everyday consumers—to quickly share visual information with the world. This is the power of spreading with Screenjelly. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

International Economic Statistics (IES) Database

<http://liber8.stlouisfed.org/iesd/>

The International Economic Statistics Database simplifies the search for worldwide economic indicators. The database provides links to individual indicators (such as GDP and CPI) for each country, as well as a detailed description of the data. Descriptions are searchable by title, country, subject, and keyword. The links are checked regularly to maintain accuracy. Indicators are continually added. This has been added to [International Trade Resources](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Statistics Resources](#) Subject Tracer™ Information Blog.

Human Genre Project

<http://www.humangenreproject.com/index.php>

The Human Genre Project is a collection of new writing in very short forms — short stories, flash fictions, reflections, poems — inspired by genes and genomics. Starting with just a few pieces at its launch in July 2009, the collection will grow and develop over time. Please check back regularly to see what has been added. The project was conceived by Ken MacLeod, writer in residence at the Genomics Forum, who also edits the collection, and was inspired by Michael Swanwick's Periodic Table of Science Fiction. The Human Genre Project is an initiative of the ESRC Genomics Policy and Research Forum, part of the ESRC Genomics Network, funded by the Economic and Social Research Council (ESRC) and based at The University of Edinburgh. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

International Journal of Information Security

<http://www.springer.com/computer/security+and+cryptology/journal/10207>

The International Journal of Information Security is an English language periodical on research in information security which offers prompt publication of important technical work, whether theoretical, applicable, or related to implementation. Coverage includes system security: intrusion detection, secure end systems, secure operating systems, database security, security infrastructures, security evaluation; network security: Internet security, firewalls, mobile security, security agents, protocols, anti-virus and anti-hacker measures; content protection: watermarking, software protection, tamper resistant software; applications: electronic commerce, government, health, telecommunications, mobility; and foundations: privacy, access control, authentication, identification, cryptography, steganography and formal methods in information security.

PRESTO®: An Enterprise-Ready Mashup Solution

<http://www.jackbe.com/products/>

The Presto Platform empowers application developers and users to create, customize and share enterprise mashups for faster decisions and better business results. Presto provides a dynamic integration approach to building enterprise mashup applications faster, leveraging internal and external data, while meeting the toughest enterprise security and governance requirements. Presto provides enterprise mashups delivered to the user in 3 clicks versus 3 months. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Mobile Libraries Blog by Gerry McKiernan

<http://mobile-libraries.blogspot.com/>

Mobile Libraries is a blog by Gerry McKiernan and is devoted to documenting any and all topics relating to services provided by libraries to patrons within mobile environments. Library mobile services are defined as any and all library services that are provided via mobile technologies. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

World eBook Fair

<http://www.worldbookfair.org/>

Project Gutenberg has been joined by The World Public Library and Digital Pulp Publishing, Internet Archive, along with Jim Baen [R.I.P.], in the creation of The World eBook Fair which hopes to bring you, and everyone else, a downloadable collection of 1/2 million eBooks in October, in honor of, what else, International Book Fair Month. Most of these eBooks are to be given away free of charge, but as requested by readers of The First World eBook Fair, more modern, and thus commercial, eBooks are to be a feature of The Second World eBook Fair. [After October 15]. Just two years ago The First World eBook Fairs came on the scene with about 1/3 million books and doubled to 2/3 million in 2008, and over a a million and a quarter presented last year. Now over two million. Created by contributions from 100+ eLibraries around the world, the largest collections are:

100,000 from Project Gutenberg
500,000 from The World Public Library
1,385,000 from The Internet Archive
250,000 from eBooks About Everything
17,000 from IMSLP's Music eLibrary
2,252,000 Grand Total

Since they are adding over a thousand books each business day, they should have little trouble in reaching their goal of 2 1/2 million by July 4-- once again doubling the total of the eBooks they are presenting to the general public. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Biology and Medicine

<http://www.biolmedonline.com/>

Biology and Medicine is a peer-reviewed journal publishing original, relevant and high quality research papers and reviews in most of the modern disciplines and subdisciplines of biology and medicine. The journal recognizes the multidisciplinary nature of biology and medicine, and includes research articles and reviews from most of the specialties involved in biology and medicine research, with a focus on, but not restricted to, cellular and molecular biology, disease research, developmental biology, clinical trials, toxicology and pharmacology, genetics, epidemiology, bioethics, biochemistry, biotechnology, microbiology and agriculture. Biology and Medicine is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

CoTweet - How Business Does Twitter

<http://cotweet.com/>

You've got a great brand. You know the social media landscape. And your crack team of Twitterers is connecting with more customers and prospects than ever before. Love is in the air — and you want to keep it there. CoTweet is how business does Twitter. CoTweet allows multiple people to communicate through corporate Twitter accounts and stay in sync while doing so. No dropped balls, no stepping on each other's toes. With CoTweet, you can: a) Engage people throughout your company — Share the job of being on duty. Tap the collective wisdom of people across functional areas like marketing, PR and customer service. Assign tasks and track follow-ups; b) Focus on the conversations that matter — Know when you need to jump in. Track your exchanges through simple case management. Schedule updates to make company announcements; and c) Keep your brand human — Automatically include signatures in your updates to identify who's talking and keep conversations personal. Think of it as social CRM — with an emphasis on the "social". This has been added to [Social Informatics](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

The Mobile Library

http://handybibliothek.qioo.de/books_en.php

The Mobile Library is where you can download english mobile books. In most cases you need only the JAR-file. Save files in separate folder because each mobile book has the same file name. After installation an individual name is given. Alternatively you can download the JAD-file over the air. In most cases this is the most convenient way to install a mobile book. You can do so by entering the following URL in the WAP-Browser of your cellphone (please note: you will be charged for the GPRS/UMTS-traffic caused by the file download): <http://www.handybibliothek.de/index.wml>. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Click Confidential: A Privacy Primer for the Social Web

http://liberty.pacificresearch.org/docLib/20090706_Click_Confidential.pdf

"The Pacific Research Institute (PRI) announced the release of a new report on Internet privacy and security. **Click Confidential: A Privacy Primer for the Social Web**, authored by Daniel Ballon, Ph.D., PRI senior fellow in technology studies, outlines the detrimental affects of government regulated privacy policy on emerging online businesses. He also provides effective strategies for empowering consumers while promoting choice and competition." This file is a 46 page .pdf 8.24MB. International Journal of Intelligent Control and Systems (IJICS)

<http://www.ijics.org/>

The International Journal of Intelligent Control and Systems (IJICS) publishes articles describing recent fundamental contributions and innovative applications in the field of intelligent control and systems. Its objective is to disseminate important and leading-edge information in this new field in a timely fashion. IJICS covers theoretical contributions aimed at winning further understanding of intelligent technologies and knowledge-based systems, including, but not restricted to, robotics and automation, manufacturing, intelligent machines, design methodologies, specification and analysis, integration and coordination. Other topics include modeling and simulation, system architectures, learning and reasoning, logic programming, self-organization, multisensor fusion, and intelligent control based on machine learning, behavior programming, fuzzy logic, neural networks, genetic algorithms, pattern recognition, and evolutionary computation. The journal considers practical aspects with contributions on advances in hardware and software development environments for intelligent technologies and knowledge-based systems, including, but not restricted to, smart chips, intelligent devices and instruments, real-time architectures, rapid prototyping, intelligent human-machine interface, computer simulation software packages, and CAD/ CAM tools. IJICS welcomes application examples in various areas, including, but not restricted to, industrial automation, aircraft/ spacecraft, manufacturing and process controls, intelligent transportation systems, smart consumer products, modeling and analysis of natural and social systems, financial forecasting and control, and management information systems. It reports on meetings, including, but not restricted to, conferences, symposia, workshops, and seminars. It also reviews recent literature of software development in intelligent technologies and knowledge-based systems. International Journal of Intelligent Control and Systems is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

My Free Email Search

<http://www.MyFreeEmailSearch.com/>

MyFreeEmailSearch.com combines several leading email search portals into one, easy-to-use interface. Using technical innovations on the Internet that weren't available even a couple years ago, MyFreeEmailSearch.com aggregates a huge variety of email search sources into one, easy-to-use and friendly user interface. MyFreeEmailSearch.com is a dead simple solution to help others look for someone's email address across multiple sites...all in one convenient place! Kuali Foundation

<http://www.google.com/>

The Kuali Foundation is a non-profit organization responsible for sustaining and evolving administrative software that meets the needs of all Carnegie Class institutions. Its members are colleges, universities, commercial firms and interested organizations that share a common vision of open, modular, and distributed systems for their software requirements. The goal of Kuali is to bring the proven functionality of legacy applications to the ease and universality of online services. The Foundation coordinates the efforts of partners, and manages and protects the Foundation's intellectual property. The Kuali Foundation manages a growing portfolio of enterprise software applications for colleges and universities, such as Kuali Financial System (KFS), Kuali Coeus (KC), and Kuali Student (KS). A lightweight Foundation staff coordinates the activities of Foundation members for critical software development and coordination activities such as source code control, release engineering, packaging, documentation, project management, software testing and quality assurance, conference planning, and educating and assisting members of the Kuali Partners program. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Information Overload Awareness Day - Inaugural Event

<http://www.informationoverloadday.com/>

A day of high-level interaction, knowledge sharing, and learning about the problem of Information Overload - all without leaving your office on August 12, 2009 Via the WEB at 11 a.m.EDT/3 p.m.GMT/8 a.m.PDT. The purpose of Information Overload Awareness Day is to call attention to the problem of Information Overload, how it impacts both individuals and organizations, and what can be done to lessen its impact. Information Overload describes an excess of information that results in the loss of ability to make decisions, process information, and prioritize tasks. Organizations of all shapes and sizes have already been significantly impacted by information overload, a problem that costs the U.S. economy \$900 billion per year in lower productivity and throttled innovation according to research from Basex. This has been added to my resources page for my [Manage Information Overload](#) presentation.

International Journal of Granular Computing, Rough Sets and Intelligent Systems

<http://www.inderscience.com/ijgrsis>

Edited by Prof. Xiaohua (Tony) Hu, Drexel University, USA and Prof. T.Y. Lin, San Jose State University, USA, it aims to publish the latest research and development results and experiences in the areas of granular computing, rough sets, fuzzy sets, soft computing and intelligent systems, including applications in areas such as bioinformatics, e-business, security, machine learning, data mining, high-performance computing and wireless mobile computing.

The Feed - What Government is Tweeting Now

<http://www.nextgov.com/thefeed/>

Nextgov has compiled a few dozen official federal twitter feeds in one place. So you can catch up on what any tweeting federal agency is doing in just a few quick clicks. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

WatchDox - Control, Track and Protect Your Documents

<http://www.WatchDox.com/>

WatchDox is a service that enables the sharing of important or sensitive documents in an easy and secure way. WatchDox allows the sender to control, restrict and track viewing, printing and forwarding of documents sent to global partners, colleagues and customers. Deploying and using the service is very quick and does not required any software installation on the sender's or recipient's side. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Entepreneurial Resources](#) Subject Tracer™ Information Blog. This has been added to [Privacy Resources](#) Subject Trace™ Information Blog.

Allconnect - Compare, Purchase and Connect All Your Home Services At One Time

<http://www.allconnect.com/>

Allconnect is the leading provider for connecting consumers with home services and utilities. Since 1998, they have helped millions of people set up services like power, home phone, cable and satellite television, high speed Internet and home security, all at no cost. It takes just one click or call to find the greatest selection and guaranteed best price on the services that matter most for your home. Compare prices on electric companies, gas companies, local phone service, cable or satellite TV, high speed Internet bundles and more. This has been added to [ShoppingBots and Online Shopping 2009](#) Subject Tracer™ Information Blog.

Journal of International Research Publications: Economy & Business

<http://www.economy-business.eu/index.htm>

The Journal of International Research Publications: Economy & Business is issued by Science & Education Foundation, Bulgaria. The main goal of the publisher is to extend the opportunities and to shorten the terms: a) for publishing of scientific results, given by Bulgarian and foreign scientists and specialists; and b) for reporting of the published articles. Journal of International Research Publications: Economy & Business is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in .swf format.

Sage - Open Source Mathematics Software

<http://www.sagemath.org/>

Sage is a free open-source mathematics software system licensed under the GPL. It combines the power of many existing open-source packages into a common Python-based interface. There mission is creating a viable free open source alternative to Magma,

Maple, Mathematica and Matlab. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

e-Asia Project

<http://e-asia.uoregon.edu/>

The e-Asia project is funded by the University of Oregon Library through the generosity of Nissho Iwai. By building a collection of digitized e-books and a database of full text web resources, e-Asia strives to contribute to the research and scholarship of East Asia. While the e-Asia project is based largely on resources held at the University of Oregon Library, its purpose is neither to duplicate nor displace printed traditional materials. Rather, by providing searchable full text, the digitalization efforts of e-Asia represent a new tool aimed at facilitating the information-gathering process. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

GeniusRocket - Crowdsourced Creative Design

<http://www.geniusrocket.com/>

At GeniusRocket, they have assembled a vibrant creative community of 11,531 talented and motivated creative professionals. Their community of "geniuses" can generate virtually any type of creative execution a client needs - whether a video, flash ad, graphic design or copywriting. And their creators don't just bid for work - they deliver clients actual creative executions specifically customized to meet a client's request. Not just one execution - but numerous submissions from a diverse set of creators, ensuring that clients get the benefit of real choice among truly fresh and unique alternatives. And since they have cut out the overhead of traditional agencies, they provide clients the most affordable source for these creative outputs, and creators a great new channel for real, paying assignments. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog. This has been added to [Advertising, Marketing and Public Relations](#) Subject Tracer™ Information blog.

Global Health Governance

<http://www.ghgj.org/>

Global Health Governance is an open access, peer-reviewed, online journal that provides a platform for academics and practitioners to explore global health issues and their implications for governance and security at national and international levels. The journal provides interdisciplinary analyses and a vigorous exchange of perspectives that are essential to the understanding of the nature of global health challenges and the strategies aimed at their solution. The Journal is particularly interested in addressing the political, economic, social, military and strategic aspects of global health issues. The purview of Global Health Governance includes:

- * Biological weapons and bioterrorism;
- * New and re-emerging diseases and their global impacts;
- * Demographic and epidemiological transitions and their implications on peace and

Awareness Watch™ Paper Review

The Social Aspects of Agent Design by *Yun Wan*

<http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2338>

Abstract:

Web-based software agents have been the primary source of ecommerce innovation and development in the past decade. Yet, the fact that the empirical design and evolution of these agents are not only determined by technology but also by their social aspects is probably not much appreciated. No agent lives in a historical vacuum. Instead, Web-based software agents operate in a social environment. It is through this environment that they interact with their users, compete with peers, bring profit to agent maintainers, and undergo regulation by public policies. In other words, Web-based software agents are also social agents.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
