Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

V7N9 **September 2009**

Welcome to the V7N9 September 2009 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting Social Informatics with the Subject Tracer located at the Virtual Private Library and accessible online at the following URL:

http://www.SocialInformatics.net/

The entire societal environment is obsessed lately with social communities and the effects upon personal and business relationships. This report highlights some of the available competent resources on the Internet involved with Social Informatics and gives you the resources and sites to obtain the latest happenings and a better understanding on how to cope in this new ever changing social environment for personal, professional and business relationships.

Online Social Networking

An Internet MiniGuide Annotated Link Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Online social networks are becoming a true growth point of the Internet. As individuals constantly desire to interact with each other both in business and in personal contacts, the ability for the Internet to deliver this networking capability grows stronger and stronger. There are a number of excellent resources available to anyone interested in becoming part of the online social networking community of the Internet. I have listed and briefly annotated a number of resources and sites that will start you on your knowledge discovery for online social networking on the Internet. This Internet MiniGuide on Online Social Networking is a freely available download at the below Subject Tracer™ Information Blog and is frequently updated. Also available as a free download is the white paper link compilation

100 Million Spiders : An Experiment In Social Networking
http://www.100millionspiders.com/
100 Million Spiders is a social networking experiment operating on a priniciple similar to 6 degrees of separation. It creates social networks between users (friends, acquaintances and colleagues) by collating threads.It is a closed community, if you have not been sent an invite by someone on the system you'll not be able to use the system.

Affinity Engines
http://www.AffinityEngines.com/
Affinity-based social networking. Affinity Engines is a technology company that provides a secure infrastructure for private-label online social networks. Affinity networks help individuals build and maintain personal and professional connections in a trusted and secure online community

AlwaysOn
http://alwayson-network.com/
AO is the only media brand to combine traditional news and analysis, participatory journalism (blogging), and a powerful social network (AO Zaibatsu) for a growing membership base of senior executives, technology geeks, and investors from a broad selection of industries. No other media brand has dared allow such openness and collaboration amongst its readers and event participants.

Business Parc
http://www.BusinessParc.com/
Grant Watling founded Businessparc.com Limited in March 2003 to help internet users find products and services in a new way. Instead of the user making contact with businesses to research prices and services, Businessparc will forward requests to all relevant businesses and make the contacts free of charge.

Can You Connect – Personal and Professional Social Networking
http://www.canyouconnect.com/
Want to tap the true power of your personal and professional networks? Join Can You Connect today and connect with your friends, family, coworkers, community, and thousands of like-minded people throughout the world. We offer dozens of fun, powerful, and easy to use tools to help you create, manage, and use your social networks.

Classmates Online
http://www.classmates.com/
Classmates Online, Inc., founded in 1995 and based in Renton, WA, is a leader in online community-based networking. The Company operates Classmates.com, connecting more than 38 million members with friends and acquaintances from school, work and the military.

CriagsList
http://www.CraigsList.org/
Craigslist is about 1) giving each other a break, getting the word out about everyday, real-world stuff; 2) restoring the human voice to the Internet, in a humane, non-commercial environment; 3) keeping things simple, common-sense, down-to-earth, honest, very real; 4) providing an alternative to impersonal, big-media sites; 5) being inclusive, giving a voice to the disenfranchised, democratizing ...; and 6) being a collection of communities with similar spirit, not a single monolithic entity.

del.icio.us
http://del.icio.us/
del.icio.us is a social bookmarks manager. It allows you to easily add sites you like to your personal collection of links, to categorize those sites with keywords, and to share your collection not only between your own browsers and machines, but also with others. What makes del.icio.us a social system is its ability to let you see the links that others have collected, as well as showing you who else has bookmarked a specific site. You can also view the links collected by others, and subscribe to the links of people whose lists you find interesting.

Friendster (beta)
http://www.friendster.com/
Friendster is an online community that connects people through networks of friends for dating or making new friends.

GoodContacts
http://www.GoodContacts.com/
GoodContacts is a world leader in managing contact data quality. The Professional and Enterprise product families deliver solutions that span customers ranging in size from a individual business professional to a large enterprise. Solo products verify and update contact data for professionals and businesses managing large contact lists in Outlook, Outlook Express or ACT! while Enterprise products maintain the integrity and accuracy of contact data across enterprise-wide databases, CRMs or personal contact managers.

Guide To Online Social Networks, Social Software and Business Communities
http://www.onlinebusinessnetworks.com/online-social-networks-guide/index.php
You may notice, not all of the sites covered here fall into the category "social networking sites". They have elected not to make that distinction because... a) social networking takes place in online communities whether they are explicitly known as "social networking sites" or not, and b) the boundaries are just too fuzzy.

Huminity – Social Networking
http://www.huminity.com/
They believe that people will achieve more by helping each other and that it is time the Internet evolves for people as much as it has evolved for corporates. They believe the

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

Internet's greatness is the interaction it brings between people and they hope that Huminity will take this one step further, and through combining Instant Messaging with Social Networks open a whole range of possibilities to enrich everyone's life. Huminity is built to facilitate friendships, make it easy for people to find and make friends, find jobs faster, make better deals and reach anyone in the world. Above all - to have fun!

IKNOW (Inquiring Knowledge Networks on the Web)
http://www.spcomm.uiuc.edu/Projects/TECLAB/IKNOW/
In short, IKNOW will answer the following: 1) Who knows who?, 2) Who knows what? 3) Who knows who knows who? and 4) Who knows who knows what?

Institute for Social Network Analysis of the Economy (ISNAE)
http://www.isnae.org/index.html
The purpose of ISNAE is to study social networks and use the resulting knowledge to promote economic growth and social well-being.

Its Just Coffee – A New Stir In Online Dating
http://www.itsjustcoffee.com/
At ItsJustCoffee.com your soul mate could be a sip away. So sit back, relax, and get ready to meet some intelligent, authentic, interesting people. But don't stay online too long - the local coffeehouse is where you'll really see if the spice is right. And remember, when you're ready for that first in-person encounter, keep it coffee, keep it simple.

JigSaw – The Business Contact Marketplace
http://jigsaw.com/
Jigsaw is an Online Business Contact Marketplace where business people buy, sell and trade business contact information. Jigsaw is a collaborative system. Each member provides a few pieces of the puzzle. Jigsaw assembles them for the benefit of the community. Jigsaw is a place to find the highest quality contacts in existence. All contacts have been added by Jigsaw members and include phone number and e-mail.

Journal of Digital Information A SPECIAL ISSUE on Social Aspects of Digital Information in Perspective (Volume 5, issue 4, December 2004)
http://jodi.ecs.soton.ac.uk/?vol=5&iss=4
This special issue showcases a series of studies that are guided by the methods and perspectives of Social Informatics. This line of inquiry extends a research stream of the late Rob Kling, a pioneer in social informatics studies who strived for over 30 years to make social issues central to discussions about computing and information systems.

LinkedIn
http://www.linkedin.com/
Find the people you need through the people you trust - Your trusted friends and colleagues can help put you in touch with many more people than you expect; and those people can refer you to thousands of contacts.

Powered By VirtualPrivateLibrary.com™

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

Midentity
http://www.midentity.com/
Midentity helps you stay connected with important contacts by allowing you to create your own Business and Personal Profiles which you can share with them. If you change any of your contact details, simply update your profile(s) and all the contacts you've shared them with will receive the update instantly.

Military Advantage
http://www.military.com/
Military.com is the largest online military destination, offering free resources to serve, connect, and inform the 30 million Americans with military affinity, including active duty, reservists, guard members, retirees, veterans, family members, defense workers and those considering military careers.

Messenger Taps Social Nets
http://snipurl.com/7rn8
It often ends up that the information you need is just beyond your immediate reach, but probably sits at the ready in the mind of an unidentified friend of a friend of a friend. Extending the capabilities of ubiquitous communications tools like instant messaging and email could make that information easier to come by.

NetMiner - Social Network Analyzer
http://zillman.blogspot.com/2004/12/netminer-social-network-analyzer.html
NetMiner can be used for general research and teaching in social networks. Also, it can be effectively applied to various business fields, where network-structural factors have great deal of influences on the performance: e.g. intra- and inter-organizational, financial, Web, criminal/intelligence, informetric, telecommunication, distribution, transportation networks.

Online Business Networks
http://www.onlinebusinessnetworks.com/
This site is a guide to social network software, online communities, and other tools that help you leverage the internet to build more and better business relationships.

Online Social Networking for Business: An Interview with Konstantin Guericke, Marketing VP, LinkedIn By Debbie Bardon
http://www.infotoday.com/online/nov04/bardon.shtml
Online social networking is a hot topic in Internet circles. These online communities claim to create networks of friends and business colleagues based on referrals from other friends and colleagues. They connect people based on who those people know rather than who they are.

Powered By VirtualPrivateLibrary.com™

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

Open Business Club (openBC)
http://www.openbc.com/
The Open Business Club (openBC) is the worlds first multi-lingual on-line contact exchange and business networking club for professionals.

Orkut
http://www.orkut.com/
Orkut is an online community that connects people through a network of trusted friends. They are committed to providing an online meeting place where people can socialize, make new acquaintances and find others who share their interests.

Pal Junction – Meet With the Friends Of Your Friends
http://www.PalJunction.com/
Helping you find friends, dates, roommates, employees, employers, etc. etc. through your network of friends. Helping you build your own social network!

PeopleAggregator
http://www.PeopleAggregator.com/
An Open Source Social Network

Plaxo
http://www.plaxo.com/
Plaxo, Inc. keeps people connected by solving the common and frustrating problem of out-of-date contact information. In 2000, Sean Parker, co-founder of Napster, joined forces with two Stanford engineers, Todd Masonis and Cameron Ring, to create Plaxo, a service that securely updates and maintains the information in your address book.

Refernet for Referrals: Business Networking
http://www.refernet.net/
Refernet helps entrepreneurs find partners and referrals through online business networking. Business Networking is proven to be one of the best methods to establish credibility, build your contact list and obtain quality business referrals.

Semantic Web Draws On the Power of Friends
http://www.freepint.com/issues/270504.htm#feature
In today's environment of constant "Googling" of people's background, where someone's name or other identifying features are entered into the popular search engine for the sake of finding background information, ShareYourExperiences.com offers an unparalleled service. This online community allows people to directly connect with other individuals who have had direct positive or negative experiences with their search subjects.

Spoke - Extending Business Relationships
http://www.spoke.com/
Delivering insight, influence and access through relationships for greater business advantage.

Smarter, Simpler Social - An Introduction To Online Social Software Methodology by Lee Bryant : Version 1.0, 18 April 2003
http://www.headshift.com/moments/archive/sss2.html
An interestting lengthy read that gives a good introduction to online social networks software methodology and explains what does and does not work ....

SocialGrid
http://www.socialgrid.com/
SocialGrid was founded to provide the world with free search system to promote social networking and enable people to find their soulmate in a way that is cost-effective and universally appealing. SocialGrid is dedicated primarily to improving search quality for its members.

Social-informatics
http://www.Social-informatics.org/
The notion of social informatics relates to the interaction between society and information-communication technologies (ICT). In its broadest sense it includes (1) the social consequences of ICT at micro (e.g. social aspects of ICT applications in organisations) as well as at macro (e.g. information society studies), (2) the application of ICT in areas of social science and (3) the use ICT as a tool - within a general context of social science methodology - for studying social phenomena.

Social Networking Services Meta List
http://socialsoftware.weblogsinc.com/entry/9817137581524458/
The Social Networking Services Meta List. is broken out into nine loose categories that will be shifting soon. These social networking categories are: business; common interest; dating; face-to-face meeting facilitation; friend; MoSoSo (Mobile Social Software); pet; photo; and 'edge' cases or social networking 'plus' sites.

Software Product Marketing Quickbase for Social Networking Sites
https://www.quickbase.com/db/9f72vfgx?a=q&qid=1
Social networking sites and software database created by Cynthia Typaldos but is updated and maintained by everyone. A good resource listing many new sites and resource software.

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

The FOAF Project - Friend of a Friend
http://www.foaf-project.org/
The Friend of a Friend (FOAF) project is about creating a Web of machine-readable homepages describing people, the links between them and the things they create and do.

The Social Software Weblog
http://socialsoftware.weblogsinc.com/
The Social Software Weblog by Judith Meskill is the home of the Social Networking Services meta Lists as well as a very active Blog on all the latest and exciting happenings in online social networking.

ThinkBot
http://www.pmbrowser.info/thinkbot.htm
ThinkBot is an easy way to find other people who are thinking about the same things as you. With a simple command, you can search Thinkbot's database of users and chat instantly to someone who shares your thoughts.

Tickle Social Network
http://web.tickle.com/
Tickle is the leading interpersonal media company, providing self-discovery, matchmaking, and social networking services to more than 18 million active members in its community worldwide. Formerly known as Emode.com, Tickle was founded on the belief that personal insight and connections to others could be both scientific and fun.

Tribe
http://www.Tribe.net
This site is devoted to tapping the power of social networks. Their goal is to provide tools that help make your network most useful.

Visible Path
http://www.visiblepath.com/
Visible Path delivers unprecedented reach into companies and access to decision-makers by allowing sales teams to discreetly leverage the relationship capital of the enterprise throughout the sales cycle.

Word of Mouth Research
http://www.WordofMouthResearch.com/
WordofMouthResearch.com is a background research tool that allows users to access the valuable information source known as "word-of-mouth" on an international scale. People submit their shared experiences on people who they know. The authors of such information are either looking for knowledge or have knowledge to share.

Awareness Watch™ Spotters

Pacific Manuscripts Bureau (Pambu)
http://rspas.anu.edu.au/pambu/
The Pacific Manuscripts Bureau, Pambu, copies archives, manuscripts and rare printed material relating to the Pacific Islands. The aim of the Bureau is to help with long-term preservation of the documentary heritage of the Pacific Islands and to make it accessible. Pambu microfilms comprise the most extensive collection of non-government primary documentation on the Pacific Islands available to researchers. Pambu welcomes suggestions for copying projects, particularly when the material is in danger of loss or destruction. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources white paper.

Gladinet Cloud - Delivering Cloud Services to Your Desktop and Operating System
http://www.gladinet.com/
Gladinet Cloud Desktop mounts cloud storage as local folders* and integrates online applications with the local desktop. Using the Internet As a Dynamic Resource Tool for Knowledge Discovery
http://whitepapers.virtualprivatelibrary.net/Knowledge%20Discovery%20Resource%20Tools.pdf
Research white paper titled "*Using the Internet As a Dynamic Resource Tool for Knowledge Discovery*" is a 22 page research paper listing many resources both new and existing that will help anyone who is attempting to perform information and knowledge research and discovery on the Internet. It is freely available as a .pdf file (2.62MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated August 1, 2009. Other white papers are available by clicking here.

SpringerImages - Hard To Find Scientific Images
http://www.springerimages.com/
SpringerImages is a growing collection of scientific images that spans the scientific, technical and medical fields, including high-quality clinical images from images.MD. The continually updated collection – currently over 1.5 million images – gathers photos, graphs, histograms, figures, and tables, and is available to libraries and their patrons via a searchable online database. The SpringerImages interface enables users to search faster, more broadly and more accurately, through captions, keywords, context and more, even jumping from the image to the source article. Users can create personalized image "sets," and can easily export images for use in their own presentations or lectures. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

FastPencil - Connect, Write, Self-Publish and Promote Your Book
http://www.fastpencil.com/
Ever wanted to write a book, but been put off by the time, frustration, and expense of traditional publishing? With FastPencil, you can finally realize your dream. You don't have to spend money up front, and you can order as many or as few copies of your book as you like. Whatever you want to publish, FastPencil makes it cost-effective and easy. FastPencil's powerful, free tools were designed to suit the requirements of demanding professionals and newcomers alike. Use the built-in outlining tools to build the structure of your book. Explore multiple drafts with automatic versioning. Coordinate using a social media framework built explicitly for productive collaboration. With FastPencil you can get started on your book immediately, at no cost. Start writing or import your existing blog posts. It's that easy! FastPencil keeps everything, including collaboration notes, in one place. Because all of your writing activity takes place in FastPencil, you are always effortlessly organized, whether writing one book or a dozen. FastPencil gives you distribution flexibility that is unmatched in the publishing industry. Your books can be distributed in printed or electronic formats via Amazon.com, BarnesandNoble.com, and shortly, through the FastPencil Marketplace. You can even sell or give them away as eBook, Kindle, or PDF files. The choice is yours. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Entreprenurial Resources Subject Tracer™ Information Blog.

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

Ionics
http://www.ionics.org/
http://www.springer.com/chemistry/physical/journal/11581
Ionics is publishing original results in the fields of science and technology of ionic motion. This includes theoretical, experimental and practical work on electrolytes, electrode, ionic/electronic interfaces, corrosion, galvanic cells, e.g. for thermodynamic and kinetic studies, batteries, fuel cells, sensors and electrochromics. Fast solid ionic conductors are presently providing new opportunities in view of several advantages, in addition to conventional liquid electrolytes. In addition to regular length papers, short communications ("Letters") are being published to allow rapid information of the scientific community about important findings, without need of extensive descriptions. Depending on the progress in various areas of Ionics, also summary reports and reviews will be considered for publication.

Click2Try - Easily Find, Try, Evaluate and Use Open Source Software
http://www.click2try.com/
Now it's easy to try Open Source software--for free! Simply search their catalog, select and try. There's less risk because there are no long downloads and no installation hassles. You'll receive pre-configured, fully functional software applications installed on your own private virtual machine that you access right from your desktop. Join their Open Source Community to take advantage of all their features. All you need is an e-mail address. Everything you need for any Open Source software application featured on click2try can be found in this one convenient location. View the features and benefits of each application. Access all the pertinent information available. Tap into a wide range of resources that support the software. And when you're ready to run an application directly from your desktop, just click2try — for free. Enjoy an efficient and economical Web-based environment where you can easily find, try, evaluate and use Open Source software. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Oxford Handbooks
http://ukcatalogue.oup.com/category/academic/series/general/achandbks.do
Oxford Handbooks offer authoritative and up-to-date surveys of original research in a particular subject area. Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences. This has been added to Reference Resources Subject Tracer™ Information Blog.

Amplify - What Are You Reading Right Now
http://amplify.com/
Amplify is a service for sharing clips from articles, blog posts or anything else you read on the web with your friends on Twitter and Facebook. Amplify was developed by the

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

same company that created Clipmarks.com. The Company's philosophy on information sharing is comprised of three main principles: (i) people can do a better job than algorithms of filtering the massive amount of information that's available on the web; (ii) serendipitous discovery is often more compelling than information organized by topic; and (iii) limiting the length of shared content allows people to learn about more topics than they would otherwise have time or patience for. Amplify was created to serve the needs of two audiences that are not the focus of Clipmarks.com: (i) Twitter users; and (ii) Groups. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Research Letters in Biochemistry
http://www.hindawi.com/journals/rlbc/
Research Letters in Biochemistry is devoted to very fast publication of short, high quality manuscripts in the broad field of biochemistry. Manuscripts should not exceed 4 pages in their final published form. Average time from submission to publication shall be around 60 days. Research Letters in Biochemistry is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

NameChk - Check Username Availability at Multiple Social Networking Sites
http://namechk.com/
Namechk.com was designed by David Gosse and Andy Edinborough to instantly show you if your desired or branded username was available at the majority of the top social networking websites. By typing your username into the "chk" search box, it will query all the social sites listed on their page and display whether the username is taken or available. This has been added to Social Informatics Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Academic and Scholar Search Engines and Sources
http://whitepapers.VirtualPrivateLibrary.net/Scholar.pdf
Internet MiniGuide Annotated Link Compilation white paper titled "Academic and Scholar Search Engines and Sources" is a 58 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (1.47MB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated August 4, 2009. Other white papers are available by clicking here.

My Info Quest - Txt 4 Answers - International Collaborative Text Reference
http://www.myinfoquest.info/
On the go and need an answer? Text your question to an InfoQuest librarian and have the

Powered By VirtualPrivateLibrary.com™

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

answer delivered to your phone within minutes! Features include: a) Call 309-222-7740 309-222-7740 and enter your library's code, b) Txt your question, c) A librarian will text an expert answer within 10 minutes during the hours of service, and d) Its easy and accurate! Patrons from approximately 50 libraries from all over the US will be able to text a question and a real, live librarian will respond within minutes. The service is free of charge, but standard text messaging rates do apply. Staffed by librarians from around the country, answers are sent to cell phones by librarians in 320 characters or less, or the equivalent of two 160-character text messages. It's a different way of helping people get the answers they need, wherever they are at the time, with professional assistance. The service is the first collaborative text messaging reference service of its kind. Hours of Service: Central Time Monday - Friday 8:00 A.M. - 10:00 P.M.; Saturday 9:00 A.M. - 5:00 P.M. . This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Internet Experts Subject Tracer™ Information Blog.

Collecta - Searching the Real Time Web
http://collecta.com/
Collecta is not like other search engines. Instead of finding old stuff, they look for mentions of your search term happening right now. Results they find appear in the center column, and you can select them to see a preview. It's also possible they haven't found a mention of your term yet. So you could: •Start a new search while this one is running (they will notify you when something comes in here). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Computer Science: Research and Development
http://www.springer.com/computer/journal/450?detailsPage=description
http://www.springerlink.com/content/121012/
Official publication of Fachbereiche Softwaretechnik, Datenbanken und Informationssysteme der Gesellschaft für Informatik e.V. (GI) A goal of this journal is the publication of scientific original work from the total range of research and development in computer science. Computer science - research and development is a forum of technical communication, which promotes the transfer of results from research to practice. Content in German or English.

Card.ly - Create Your Online Card
http://card.ly/
Card.ly is a site thats main purpose is to allow you to have your own mini business card profile, without needing to have any design or programming skill. They will host it for you also. Most parts of the site are free as well. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Top Ten Internet Search Tips by Melissa Barker
http://WhitePapers.VirtualPrivateLibrary.net/SearchTips.pdf
An excellent 5 page research article for both the Internet beginner as well as the seasoned Internaut titled Top Ten Internet Search Tips by Melissa S. Barker, Author of Internet Research – Illustrated 5th Edition, Course Technology, 2010. These Internet Search Tips you will want to keep next to your computer or saved in your How To Search file! This has been added to Searching the Internet resource page. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

Free Demographics Data for 2009
http://www.FreeDemographicsData.com
FreeDemographicsData.com is your source for statistics about Cities, Counties, Zip Codes and the United States. Find free, updated US Census data and comparisons. Lookup statistics about 2009 demographics, population, income, gender, housing value, household size, education and more. This has been added to Internet Demographics Subject Tracer™ Information Blog.

Translation Resources On the Web: A Guide to Accurate, Free Sites by Rebecca A. Martin and Sarah McHone-Chase
http://www.acrl.org/ala/mgrps/divs/acrl/publications/crlnews/2009/jun/translation.cfm
The following sites, listed here in English, serve as gateways to precise multilingual dictionaries and glossaries, as well as directories with access to professional tools. With the popularity of Google, do its search techniques still play a role in quality translations? They can. For example, after using preferences on Google to select a language in which to search, a translator can try out a phrase within quotation marks to get not only its context, but also a sense of its usage by observing the number of hits. In addition, the Google string searches for synonyms (the tilde), definitions (define:), and fill-in-the-blank (the asterisk) all work in foreign languages albeit with varying results. This has been added to the tools section of Research Resources Subject Trace™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

International Journal of Medical Sciences and Technology (IJMST)
http://www.ijmst.org/
International Journal of Medical Sciences and Technology (IJMST) aims to: a) Encourage contribution to Research in Medical Sciences & Technology for achieving better health and disease-free living for all; b) Encourage and motivate researchers in challenging areas of Medical Sciences viz., BioEngineering, BioEthics, BioMedical Engineering, BioTechnology, Medical Informatics, Medicine, Medical Sciences, Pharmacy, Psychology and all areas of Allied Health Sciences, Management, Technology, Law and Public Health and BioEntrepreneurship & BioMarketing, GeoSciences, Atmospheric Sciences, and Remote Sensing; BioMetrics and Forensics within the scope of Medical Sciences; c) Offer a platform for the dissemination of knowledge; and d) Improve the approaches of Medical Sciences research, education, promotion and other multidisciplinary efforts by fostering a better understanding of the

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

multidimensional nature of research, industrial and educational systems as they relate to the promotion of Health Sciences for the betterment of mankind and human life. International Journal of Medical Sciences and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

Vanish - Enhancing the Privacy of the Web with Self-Destructing Digital
http://vanish.cs.washington.edu/
Computing and communicating through the Web makes it virtually impossible to leave the past behind. College Facebook posts or pictures can resurface during a job interview; a lost or stolen laptop can expose personal photos or messages; or a legal investigation can subpoena the entire contents of a home or work computer, uncovering incriminating or just embarrassing details from the past. Vanish is a research system designed to give users control over the lifetime of personal data stored on the web or in the cloud. Specifically, all copies of Vanish encrypted data — even archived or cached copies — will become permanently unreadable at a specific time, without any action on the part of the user or any third party or centralized service. For example, using the Firefox Vanish plugin, a user can create an email, a Google Doc document, a Facebook message, or a blog comment — specifying that the document or message should "vanish" in 8 hours. Before that 8-hour timeout expires, anyone who has access to the data can read it; however after that timer expires, nobody can read that web content — not the user, not Google, not Facebook, not a hacker who breaks into the cloud service, and not even someone who obtains a warrant for that data. That data — regardless of where stored or archived prior to the timeout — simply self-destructs and becomes permanently unreadable. This has been added to Privacy Resources Subject Tracer™ Information Blog.

Asia-Pacific Education Researcher (TAPER)
http://www.philjol.info/index.php/TAPER
Asia-Pacific Education Researcher (TAPER) is an international journal of original research in education, published biannually by the Academic Publications Office, De La Salle University, Manila, Philippines. It aims principally to provide a venue for the publication of empirical and theoretical studies in education, with emphasis on the Asia-Pacific Region. The journal seeks to publish two types of articles:

* Research Articles that report original research work that leads to the understanding and/or improvement of educational processes and outcomes using research methods and analytic frameworks of the varied academic disciplines (anthropology, applied linguistics, cognitive science, economics, history, philosophy, political science, psychology, sociology, among others) and also using multidisciplinary and interdisciplinary approaches;

* Short Research Reports that describe and analyze results of small-scale research such as: a) preliminary investigations on particular educational experiences, outcomes, and processes in a specific country or region of a country that are of broad interest to educational scholars in the rest of the Asia-Pacific region; b) integrative and critical reviews of research on a specific educational topic conducted in a specific country in the Asia-Pacific region; c) studies that seek to validate educational theories, principles, constructs, and research instruments originally developed in western countries in the context of specific Asian countries or educational communities; d) studies that seek to replicate educational studies that were originally done in western countries in the context of specific Asian countries or educational communities; e) participatory action research on educational problems and experiences of specific educational programs of any country in Southeast Asia and East Asia; and f) cross-national studies that seek to compare and contrast specific educational experiences and process in at least two countries in Southeast Asia and East Asia. Asia-Pacific Education Researcher is available free of

Article of the Future - Cell Beta Prototypes
http://beta.cell.com/
Cell Press and Elsevier have launched a project called Article of the Future that is an ongoing collaboration with the scientific community to redefine how the scientific article is presented online. The project's goal is to take full advantage of online capabilities, allowing readers individualized entry points and routes through the content, while using the latest advances in visualization techniques. We have developed prototypes for two articles from Cell to demonstrate initial concepts and get feedback from the scientific community. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

European Employment Observatory Review
http://www.eu-employment-observatory.net/en/reviews/
The European Employment Observatory (EEO) contributes to the development of the European Employment Strategy through the provision of information, comparative research and evaluation on employment policies and labour market trends in the countries covered by the EEO. The EEO improves the information base for policy makers of the European Employment Strategy and other stakeholders. The European Employment Observatory Review examines the activities and instruments used to anticipate labour market and skills requirements in Europe. It provides a summary of key trends across EEO countries and analyses their implications for better EU-wide policy. EEO Reviews are published twice a year, on a specific policy issue defined by DG Employment, Equal Opportunities and Social Affairs. Content in German, English and French.

Slideroll™ - Online Slideshow Software
http://slideroll.com/index.php
Slideroll™ is online slideshow software that allows people to create smooth, video-like slide shows and publish them on the web. Slideroll™ is unique because it has all of the power of a desktop application, plus all of the connectivity benefits of being online. Slideroll™ even allows you to easily put Flash movies on your site without having to learn Flash. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Aneka: A Software Platform for .NET-based Cloud Computing
http://www.gridbus.org/reports/AnekaCloudPlatform2009.pdf
Aneka is a platform for deploying Clouds developing applications on top of it. It provides a runtime environment and a set of APIs that allow developers to build .NET applications that leverage their computation on either public or private clouds. One of the key features of Aneka is the ability of supporting multiple programming models that are ways of expressing the execution logic of applications by using specific abstractions. This is accomplished by creating a customizable and extensible service oriented runtime environment represented by a collection of software containers connected together. By leveraging on these architecture advanced services including resource reservation, persistence, storage management, security, and performance monitoring have been implemented. On top of this infrastructure different programming models can be plugged to provide support for different scenarios as demonstrated by the engineering, life science, and industry applications. This has been added to Grid, Distributed and Cloud Computing Resources Subject Tracer™ Information Blog.

Academia.edu - Who's Researching What
http://www.Academia.edu/
Academia.edu allows academics from around the world to connect with each other through their papers, CVs, and research interests. I think that Academia.edu is an effective researching tool and could greatly appeal to visitors that often check your blog. Academia.edu was founded by a team of people from Oxford, Stanford and Cambridge Universities. The aim is for the site to list every academic in the world, together with their university and department affiliation. Academia.edu enables academics to: a) See who's researching what; b) Keep track of the latest developments in their research area - the latest people, papers, talks and status updates; c) Browse the 'tree' of academics around the world, according to what university/department they are affiliated with in order to connect with other researchers; and d) Have an easy-to-maintain academic webpage to share their research and academic activity.

A sample page on Academia.edu is here: http://oxford.academia.edu/RichardPrice. Academia is a thriving website with over 50,000 academics in its user-base. Academia covers over 12,000 research interests, which facilitates communication between researchers and allows them to discover "who's researching what". This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

The Public Index - Public Interest Book Search Initiative
http://thepublicindex.org/
The Public Index is a project of the Public-Interest Book Search Initiative and the Institute for Information Law and Policy at New York Law School. They are a group of professors, students, and volunteers who believe that the Google Book Search lawsuit and settlement deserve a full, careful, and thoughtful public discussion. The Public Index is a site for people from all points of view to learn from each other about the settlement and join together to make their voices heard in the public debate. The lawsuit and its proposed settlement have generated their share of controversy. This is a site for everyone, dedicated to no particular point of view other than the advancement of dialogue and understanding. They hope that the site will help the settlement's fans and foes dispel misunderstandings and find common ground, and that those who have not made up their minds will find the facts and explanations they need to reach informed decisions for themselves. All they ask of participants is that they be respectful of each other and work in good faith to advance the dialogue. This has been added to Research Resources Subject Tracer™ Information Blog.

SocSciBot - Social Sciences Link Analysis Research
http://socscibot.wlv.ac.uk/
SocSciBot is a Web site crawler designed for link analysis research. It can be used to conduct link analysis on a single site or collection of sites, or to run a search engine on a collection of sites. It can also be used in teaching, to illustrate how link analysis and search engines work. Note that SocSciBot does not work well on web sites with non-ASCII URLs and Cyclist does not work well on web sites with non-ASCII text. SocSciBot works by (a) crawling one or more web sites and then (b) analysing them to produce standard statistics about the interlinking between the sites and network diagrams of the interlinking. It can also run a limited linguistic analysis of the text in the collection of web sites. If you need to analyse links to one or more web sites, then LexiURL Searcher is recommended instead. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Bot Research Subject Tracer™ Information Blog. This has been Social Informatics Subject Tracer™ Information Blog.

Courseopedia.com - The Search Engine for Courses
http://www.courseopedia.com/
Courseopedia.com is a central source of information on continuing education courses and other college classes enabling users to search for courses by class, school or career. The site speeds and simplifies course searches by aggregating multiple college and private educational course listings in a centralized database. It also offers a valuable new outlet for educational institutions and private instructors to publicize their offerings. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

Opencast - Higher Education Audio Video Infrastructures Projects
http://www.opencastproject.org/
Opencast is an initiative driven by higher education institutions to empower: a) institutions to make informed choices about capture, processing, and distribution infrastructure for audio/video; b) faculty to teach courses and share knowledge with their students and learners worldwide without technology getting in the way; c) students to access and shape media into a more meaningful tool for learning; and d) everyone to easily find and engage with educational video, audio, and other rich media from instructors and institutions around the world. The Opencast community is a collaboration of higher education institutions working together to explore, define, and document podcasting best practices and technologies. Through the listserv and Best Practice Guidelines wiki, the community offers guidance and information to help others choose the best approach for delivering rich media online. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Journal of Economics and Finance
http://www.springer.com/economics/journal/12197
http://www.springerlink.com/content/120857/
The Journal of Economics and Finance is the official journal of the Academy of Economics and Finance. It publishes theoretical and empirical research papers in economics and finance and related fields, such as decision sciences, marketing and accounting. Its primary focus is on empirical studies with an emphasis on the policy relevance of the findings.

ChatToText - Bringing the Internet and Texting Together
http://www.chattotext.com/
ChatToText is the world's first application that allows anyone you want to chat with you from virtually anywhere on the internet, straight to your cell phone. You can add their app to your social network page (Facebook, Bebo, and soon MySpace), or people can find you through chattotext.com directly. You'll get html code that you simply copy and paste to put ChatToText on any web property. Have your site visitors click the link to send a message to your cell phone that you can reply to. Features include: a) The ability to turn your chat window on and off; b) The ability to set a schedule of chat availability; c) The ability to save your chat history; and d) The ability to customize your chat window with your photo and more. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

International Journal of Open Problems in Complex Analysis (IJOPCA)
http://www.i-csrs.org/ijopca/index.html
International Journal of Open Problems in Complex Analysis (IJOPCA) is a peer-reviewed journal, published four times a year that publishes articles which contribute new open problems in all areas of the Complex Analysis. The aims of this journal are to provide a lively forum for the communication of original research papers and timely review articles on open problems in complex analysis. International Journal of Open Problems in Complex Analysis is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

Development Seed - Technological Solutions for Progressive Organizations
http://developmentseed.org/
They develop communication strategies and build web applications for some of the most influential organizations in the world. Serving as both a technology implementer for international development projects and as an open source research and development operation, their unique consulting practice balances deploying cutting edge technology with ensuring their tools are actually useful and efficient in the hands of the people who need them. In short, their specialty is building simple and innovative tools that make the difference in mission-critical situations. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

eReference Library Link Toolkit
http://WhitePapers.VirtualPrivateLibrary.net/eReference Library.pdf
The **eReference Library Link Toolkit** is a 60 page freely available white paper link compilation for a selected group of reference resources that are available over the Internet. These resources are designed to be your eReference Library and to give you the latest and greatest reference resources available from the Internet. The eReference Library Link Toolkit has been created by Internet guru and expert Marcus P. Zillman who is the Executive Director of the Virtual Private Library. Updates to this toolkit are powered by Subject Tracer™ Information Bots. This has been added to the tools section

of Research Resources Subject Tracer™ Information Blog. [Updated August 15, 2009 .pdf 60 pages 1.39MB]

Knowledge Discovery Resources 2009
http://WhitePapers.VirtualPrivateLibrary.net/KD Resources 2009.pdf
http://www.KnowledgeResources.info/
Internet MiniGuide Annotated Link Compilation white paper titled "Knowledge Discovery Resources 2009" is a 34 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about knowledge discovery available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (939KB) at the above link from the Virtual Private Library™ and authored by Marcus P. Zillman, M.S., A.M.H.A. It was updated **August 15, 2009**. Other white papers are available by clicking here.

Obtain The Real URL Tool
http://realurl.org/
Obtain the real URL from the short URL version tool. This tool will resolve the real URL address from the shorten version. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Online Banner Generator - Web2 Banner Maker
http://onlinebannergenerator.com/
Our Web2 Banner Generator enables you to create banners for your web site within seconds. Simply enter your text, add images and clipart on-fly and drag and drop your graphics where you want to see them. Once done, click "Create Banner" and our banner generator will let you download your newly created banner. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Focus on UKOLN
http://www.ukoln.ac.uk/focus/
UKOLN is a research organisation that aims to inform practice and influence policy in the areas of: digital libraries, information systems, bibliographic management, and web technologies. It provides network information services, including the Ariadne magazine, and runs workshops and conferences. UKOLN is a newsletter which provides news, opinion and information on the wide range of activities undertaken by UKOLN.

eyeOS - Cloud Computing Operating System - Web Desktop - Web OS - Web Office
http://www.eyeos.org/
eyeOS is an open source web desktop following the cloud computing concept. It is mainly written in PHP, XML, and Javascript. It acts as a platform for web applications written using the eyeos Toolkit. It includes a Desktop environment with 67 applications and system utilities. It is accessible by portable devices via its mobile front edu. eyeos lets you upload your files and work with them no matter where you are. It contains

establish itself as an authority in these areas and contribute to the dissemination of ideas and promotion of free thinking in the developing world. Trade, Law and Development offers a forum for the free exchange of ideas and generation of constructive debate on legal and policy issues surrounding international trade, environment and development. Towards these ends the Journal publishes original works from a diverse and distinguished pool of authors, comprising, inter alia, scholars, practitioners, and students. Trade, Law and Development is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

HootSuite - The Professional Twitter Client
http://hootsuite.com/
HootSuite makes it easy to manage multiple users over various Twitter accounts. Impress your friends, your boss, or just yourself with our link statistics and visualizations. Find out what people are saying about your brand right now. Organize your Twitter streams into tabs and columns. Personalize the layout just the way you want it. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

eGreenBot - Search Engine for Green Resources
http://www.eGreenBot.com/
eGreenBot.com is your search engine for green resources and a Google powered metasearch engine created by the Virtual Private Library™. It is designed to bring together the latest metasearch engines for the environment and green resources on an ongoing basis from the Internet. Currently eGreenBot searches simultaneously over 93 selected environmental and green resources search engines and directories from the Internet with many of them listed in the resource section.

Intelligent Information Systems Research Laboratory
http://iis.ist.psu.edu/
The Internet, the Web and its successors combined with the rapidly increasing digitization of information and Moore's law has generated a revolution in information access and creation which reaches an ever-increasing portion of humanity. The Web now encompasses more content than all the text in the Library of Congress. The goal of the Intelligent Information Systems Research Laboratory is to explore and support all levels of research that will improve and enhance our ability to generate, manage, search, and mine information and knowledge. Current research covers Internet database design and analysis, mobile Web computing, Web mining and navigation, Web agents, novel and intelligent Web tools, multimedia retrieval, Web and internet models, Web usage, automatic content analysis and digital libraries, Web search, niche search engines, semantic web, scientific databases, data mining, and information retrieval. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Bot Research Subject Tracer™ Information Blog.

Project WAVE - Welcoming Argument Visualasation to Europe
http://www.wave-project.eu/
Project WAVE aims to improve the inclusiveness and transparency of EU decision making at the national and European level by using highly integrated, state-of-the-art Argument Visualisation techniques to make the impact of complex EU environmental legislation on climate change more accessible and easy to understand for citizens, special interest groups and decision makers alike. WAVE will deploy Debategraph, an innovative argument visualisation platform, in a multi-lingual, cross border context. WAVE will target cross-border discussions on drafted and implemented legislation. These discussions will be facilitated on Debategraph so as to understand the impact of the proposed and implemented legislation. WAVE will feed back its results to MEPs and MPs that have affiliated with the project in order to ultimately join up with and inform at least three governments-the national governments of the three trial sites - UK, France and Lithuania. Uniquely, Debategraph will not only enable citizens and decision makers with differing points of view to more easily comprehend complex environmental debates; it will also empower them - through the use of a collaborative wiki - to work together in developing integrated feedback on legislation. Moreover, rather than merely visualising the results of individual debates, the WAVE project will depict the relationships between competing argument strands - a factor which is crucial to developing a full understanding of complex, inter - related issues, but which has only now become possible through the use of latest generation web technology. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Green Resources Subject Tracer™ Information Blog.

International Journal of Nanomedicine
http://www.dovepress.com/international-journal-of-nanomedicine-journal
International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. Reflecting the growing activity in this emerging specialty, the aim of this journal is to highlight research and development leading to potential clinical applications in the prevention and treatment of disease. International Journal of Nanomedicine is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

4Store - An Efficient, Scalable and Stable RDF Database
http://4store.org/
4store was designed by Steve Harris and developed at Garlik to underpin their Semantic Web applications. It has been providing the base platform for around 3 years. At times holding and running queries over databases of 15GT, supporting a Web application used by thousands of people. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to the Semantic Web Research Section of Deep Web Research Subject Tracer™ Information Blog.

Webspiration™ - Visual Thinking and Learning Collaboration
http://mywebspiration.com/
Webspiration™ is the new online visual thinking tool that helps you capture ideas, organize information, diagram processes and create clear, concise written documents whether working individually or collaboratively. Use Webspiration's diagramming environment to create bubble diagrams, flow charts, concept maps, process flows and other visual representations that stimulate and reflect your thinking. With Webspiration, you focus on developing and connecting ideas, not the drawing. With Webspiration's powerful outlining capabilities, you can take notes, organize work and expand ideas fluidly to develop your writing into plans, study guides, papers, reports, and other more comprehensive documents. Webspiration makes it easy to collaborate and share documents by simply sending an invite. Everyone works on the same document, contributing, posting comments, and viewing changes. Webspiration is ideal for team projects, study groups, reviewing and commenting on documents and co-authoring materials. Store and access documents online without discs, drives or email. Work at home, a friend's house, the library, your office, or the local coffee shop. Webspiration and your documents are available anywhere you have access to the internet. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

September 2009 Zillman Column - Educational Resources for Twitter, SMS and Text Messaging
http://columns.virtualprivatelibrary.net/Txt_Twitter_Res_Sept09_Column.pdf
http://www.zillmancolumns.com/
http://www.140Characters.me/
The September 2009 Zillman Column is now available and is titled **Educational Resources for Twitter, SMS and Text Messaging**. This September 2009 column is a comprehensive list of resources and sites that give you the latest and most important information concerning twitter, sms and text messaging available over the Internet including related and associated resources and sites. These resources will keep you current to the latest happenings and events as well as the latest applications as they become available to better utilize all the vast data that is currently available for Twitter, SMS and Text Messaging. The goal of 140Characters.me is to become the leading educational portal for text messaging, sms and Twitter on the global Internet. Download this excellent freely available 19 page .pdf (1.03MB) column today! Click here for associated press release.

PinDax - Online Message Board
http://www.pindax.com/
Why choose a boring message board for your website? PinDax offers a fun real-time alternative to the traditional message board. Sign up for free, you will be up and running in minutes. Features include: 1) Post text, images, files, polls and tasks in real-time; 2) Use the Widget and API to integrate into your site; 3) Get notification when there are replies; 4) Create groups and profiles; 5) Control access to your board; 6) Search your posts; 7) Send posts via E-Mail; 8) Chat with other members; and 9) Add categories and

feeds to your board. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

BL Online : Bibliographie Linguistique
http://www.ilx.nl/blonline/
The BLonline database provides bibliographical references to scholarly publications on all branches of linguistics and all the languages of the world, irrespective of language or place of publication. The database contains all entries of the printed volumes of Bibliographie Linguistique/Linguistic Bibliography for the years 1993-1998 and an increasing number of more recent references. 2000 periodicals journal articles, books, dissertations, bibliographies and proceedings worldwide related to all aspects of linguistics and all languages of the world. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

Journal of Forest Research
http://www.springer.com/life+sci/forestry/journal/10310
The Journal of Forest Research publishes original articles, reviews, and short communications covering all aspects of forest research, both basic and applied, with the aim of encouraging international communication between scientists in different fields who share a common interest in forest science. Membership in the Japanese Forest Society is not a prerequisite for publication in the journal. Content available by subscription. Free content available online. Abstracts available online. Articles available in HTML and PDF format.

Social Science Data Search
http://sunsite3.berkeley.edu/wikis/datalab/index.php?n=Main.GoogleSearch
This Google Custom Search Engine (CSE) targets 800+ academic, government agency, non-profit, and other web sites that provide high quality, downloadable statistical information and data sets. Emphasis is on data pertaining to the social sciences, health, developing countries, energy, natural resources, and the environment. This has been added to Statistics Resources Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources white paper.

BankFox - Compare Banks Based on Rates, Fees, Health, Online Tools, and More
http://www.bankfox.com/
BankFox is a new website that helps people compare bank products like savings accounts, checking accounts, and CDs. There are many sites for comparing bank products but most of them are focused on rates. While they think rates are important, they also believe that there's a lot more you need to know to choose a bank – like information on fees, online tools, bank health, branch location, customer service, special requirements,

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

and more, all of which are included on our site. By publishing all of this additional data, they strive to be the most comprehensive website for choosing bank products. They have built proprietary technology and processes for gathering information themselves and also get additional data from third-party sources which are publicly available or with which they have partnerships. This has been added to Financial Sources Subject Tracer™ Information Blog.

Wikiwix - The Ultimate Wikipedia Articles Search Engine
http://www.wikiwix.com/
A comprehensive search engine for searching Wikipedia articles with related links of Wikisource, Wikionary, Wikiquote, Wikibooks, Wikispecies, Wikiversity, Wikinews, Commons and WWW. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Statistical Analysis and Data Mining
http://www3.interscience.wiley.com/journal/112701062/home
Statistical Analysis and Data Mining addresses the broad area of data analysis, including data mining algorithms, statistical approaches, and practical applications. Topics include problems involving massive and complex datasets, solutions utilizing innovative data mining algorithms and/or novel statistical approaches, and the objective evaluation of analyses and solutions. Of special interest are articles that describe analytical techniques, and discuss their application to real problems, in such a way that they are accessible and beneficial to domain experts across science, engineering, and commerce. The focus of the journal is on papers which satisfy one or more of the following criteria:

* Solve data analysis problems associated with massive, complex datasets
* Are application and solution oriented with a focus on solving real problems
* Describe innovative data mining algorithms or novel statistical approaches
* Compare and contrast techniques to solve a problem, along with an objective evaluation of the analyses and the solutions

The goals of this interdisciplinary journal are to encourage collaborations across disciplines, communication of novel data mining and statistical techniques to both novices and experts involved in the analysis of data from practical problems, and a principled evaluation of analyses and solutions. The 21st Century has become a Century of Data, with most domains striving for useful general models for their mountains of data. Data mining and statistical analysis are amongst the most effective bodies of methodology and technology capable of producing useful general models from massive, complex datasets. Statistical Analysis and Data Mining will be a useful resource to those solving practical problems, at the same time enabling them to benefit from ideas developed in other domains. It will be an international journal, with an interdisciplinary focus, covering areas which are becoming increasingly important, and likely to remain so in the foreseeable future. This has been added to Data Mining Resources Subject

Depicter - Online Diagram and Vector Graphics Editor
http://www.depicter.com/
Depicter is a web-based vector graphics editor. Store your drawings online, or export them to SVG, PNG or JPEG. You can use Depicter to draw simple diagrams, create t-shirt designs for CafePress, record a sketch of the Rube Goldberg machine you invent while traveling -- or just doodle for fun. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

File Information Tool Set (FITS)
http://code.google.com/p/fits/
The File Information Tool Set (FITS) identifies, validates, and extracts technical metadata for various file formats. It wraps several third-party open source tools, normalizes and consolidates their output, and reports any errors. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Bot Research Subject Tracer™ Information Blog. This will be added to Web Data Extractors white paper link compilation.

Herdict Web - Documenting Web Site Accessibility
http://www.herdict.org/web/
Have you ever come across a web site that you could not access and wondered, "Am I the only one?" Herdict Web aggregates reports of inaccessible sites, allowing users to compare data to see if inaccessibility is a shared problem. By crowdsourcing data from around the world, they can document accessibility for any web site, anywhere. Herdict is a project of the Berkman Center for Internet & Society at Harvard University. Herdict is a portmanteau of 'herd' and 'verdict' and seeks to show the verdict of the users (the herd). Herdict Web seeks to gain insight into what users around the world are experiencing in terms of web accessibility; or in other words, determine the herdict. The brainchild of Professor Jonathan Zittrain, Herdict Web is a natural progression from the OpenNet Initiative. Whereas OpenNet views Internet filtering through an academic lens, Herdict uses crowdsourcing to learn about and present a real time view of the experiences of users around the globe. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Accessibility ResourcesSubject Tracer™ Information Blog.

Luxury Intelligence, an International Journal (LIIJ)
http://www.inderscience.com/browse/index.php?journalCODE=liij
LIIJ aims to establish itself as the leading authoritative international journal on luxury brand and sector strategy and intelligence through related research and development. It draws together novel empirical analysis and the latest thinking from leading figures at the world's foremost companies, consultancies and academic institutions. LIIJ publishes original, forward-looking papers which austerely consider: a) how the world's leading

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

luxury companies are managing their brands and specialist knowledge in particular; b) specialist knowledge management in the luxury sector; c) the latest thinking, techniques and initiatives used by luxury agencies and consultants; d) current case studies which explore leading luxury organisations' practical experiences, the problems faced and the lessons learned; e) models and theories effectively used in luxury brand management practice; f) web technologies (web X.0) and their applications in and implications for the luxury sector and knowledge domain; and g) applied research from leading business schools, research institutes and universities. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

DiscoverEd - Discover the Universe of Open Educational Resources
http://discovered.creativecommons.org/search/
DiscoverEd is an experimental project from ccLearn which attempts to provide scalable search and discovery for educational resources on the web. Metadata, including the license and subject information available, are exposed in the result set. They are particularly interested in open educational resources (OER) and are collaborating with other OER projects to improve search and discovery capabilities for OER, using DiscoverEd and other available tools. DiscoverEd is a prototype intended to explore how structured data may be used to enhance the search experience; there are a number of known issues. Read their white paper that describes the rationale for and design of DiscoverEd, as well as our thoughts regarding possible future enhancements that could make the tool, or other search tools like it, even more compelling. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added to Academic and Scholar Search Engines and Sources White paper.

Disaboom.com - Conecting Millions Touched with Disability
http://www.disaboom.com/
Disaboom.com was founded by Dr. J. Glen House, a physician specializing in physical medicine and rehabilitation who is also a quadriplegic. His first hand knowledge of the challenges faced by individuals with disabilities and those whose lives they touch has driven the Disaboom.com mission: to create the first comprehensive, evolving source of information, insight, and personal engagement for the disability community. For people with disabilities, Disaboom's lifestyle articles, blogs, forums, and health information provide shared knowledge about SCI, cerebral palsy, fibromyalgia, multiple sclerosis, and other disabilities. Whether you're an amputee, caregiver, disabled veteran, or interested in exploring adaptive sports, accessible travel, or any other disability-related topic, all are welcome! This has been added to Accessibility ResourcesSubject Tracer™ Information Blog.

International Journal of Functional Informatics and Personalised Medicine (IJFIPM)
http://www.inderscience.com/browse/index.php?journalID=295
High-throughput sequencing and molecular imaging technologies marked the beginning of a new era for modern translational medicine and personalised healthcare. The impact of having the human sequence and personalised digital images in hand has also created tremendous demands on the development of powerful supercomputing, statistical learning and artificial intelligence approaches to handle the massive bioinformatics and personalised healthcare data which will obviously have a profound effect on how biomedical research will be conducted toward the improvement of human health and prolonging human life in the future. IJFIPM, in partnership with the International Society of Intelligent Biological Medicine, touches tomorrow's bioinformatics and personalised medicine through today's efforts in promoting the research, education and awareness of this upcoming inter/multidisciplinary field. The development of methodologies in functional informatics and personalised medicine utilises supercomputing, statistics learning, and artificial intelligence in handling the information and data from biomedical data sets, gene and protein sequence information, patient's genotype, disease phonotype, level of gene expression, lipidomics, and all available biological and clinical information to discover the biological mechanisms of living organisms, stratify disease, design new medication, plann a therapy, or initiate a preventative measure that is particularly suited to that human or patient at the time of administration. Functional informatics and personalised medicine are interactive disciplines that hold great promise for the advancement of cutting-edge research and development in biomedical and pharmaceutical sciences. Research and advances in these two areas influence board ranges of medical and engineering fields. IJFIPM provides a common platform for the cross-fertilisation of ideas, and aims to help shape scientific knowledge and medical achievements by bridging these two very important and complementary disciplines into an interactive and attractive forum.

ChemXSeer - Intelligent Search in the Chemistry Domain
http://chemxseer.ist.psu.edu/
ChemXSeer is an integrated digital library and database allowing for intelligent search of documents in the chemistry domain and data obtained from chemical kinetics. Currently, we have designed and implemented the following: 1) Chemical Entity Search : The tool identifies chemical formulae and chemical names, disambiguates the terms from other general terms, and tags them. Novel similarity scores, ranking functions and search methods are used to enable searching for chemical entities; 2) TableSeer : This tool automatically identifies tables in digital documents and extracts the contents in the cells of the tables. The contents are stored in a queryable table in a database. TableSeer extracts table metadata, and uses a novel ranking function to search for tables relevant to user queries; and 3) Databases : Their data repository contains experimental data obtained from various sources. Their tools can process, store and link data in multiple formats, e.g., Excel, XML, Gaussian, and Charmm. A metadata ad-on can help annotate the data and link multiple datasets.

The metadata is then used to link the data to published articles allow the end-user to search for relevant data. Built using a novel architecture, our digital library will also utilize novel focused crawling and query expansion and rewriting techniques to utilize the limited resources available at hand and to enhance the quality of the search respectively. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This will be added toAcademic and Scholar Search Engines and Sources White Paper.

Keeping Research Data Safe 2
http://www.beagrie.com/jisc.php
This web page has been set-up to support dissemination of information on the "Keeping Research Data Safe 2" project. The project aims to extend previous work on digital preservation costs for research data. It will identify long-lived datasets for the purpose of cost analysis and build on the work of the first "Keeping Research Data Safe" study

Powered By VirtualPrivateLibrary.com™

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

completed in 2008. The first Keeping Research Data Safe study funded by JISC made a major contribution to the study of preservation costs by developing a cost model and indentifying cost variables for preserving research data in UK universities. That work has had considerable impact and received international interest. Over 3,400 copies of the report were downloaded from the JISC website during 2008 alone making it JISC's most popular publication in 2008. The Keeping Research Data Safe 2 project commenced on 31 March 2009 and will complete in December 2009. The project will identify and analyse sources of long-lived data and develop longitudinal data on associated preservation costs and benefits. We believe these outcomes will be critical to developing preservation costing tools and cost benefit analyses for justifying and sustaining major investments in repositories and data curation. This has been added to Research ResourcesSubject Tracer™ Information Blog.

International Journal of Nano and Biomaterials (IJNBM)
http://www.inderscience.com/browse/index.php?journalID=230
The agricultural, industrial, and information technology revolutions resulted in quantum and dramatic changes in the way in which we live throughout the world. In recent years, the frontiers of research in engineering, science and technology have been driven by developments in nanomaterials which encompass a diverse range of disciplines. The common theme is the ability to exhibit unique new properties arising from quantum effects. The number of research themes involving biological and nanostructured materials is growing rapidly and it is widely anticipated that nanotechnology will produce products, devices, components, and smart multifunctional intelligent systems. Advanced materials inspired by biological systems and processes are likely to change almost everything from vaccines to artificial tissues and organs to quantum computers. IJNBM provides a vehicle to help academics, researchers, industrial companies, trade associations, and policy makers in the fields of medicine, biology, manufacturing technology, materials science, engineering, biotechnology, nanotechnology, nanoelectronics and business to disseminate information and learn from each others' work. Topics covered by IJNBM include but are not limited to:

Nanostructured materials
Nanocomposite structures
Biological materials
Artificial organs and tissues
Tissue engineering
Bioengineering materials
Surgical tools
Medical devices
Nanomaterials
Carbon-based materials
Electronic materials
Functional materials
Microscopy and materials characterisation techniques

Young Entrepreneur Forums - Small Business and Entrepreneur Site
http://www.youngentrepreneur.com/
YoungEntrepreneur.com is an award-winning small business website for entrepreneurs and small businesses and is comprised of entrepreneurs and aspiring entrepreneurs who are truly passionate about economic development and enjoy promoting the formation and success of innovative and growth-oriented companies. Several topics discussed and some of the many features include networking with a like-minded business professionals including venture capitalists, private investors, industry experts, business service providers, inventors, other up and coming and successful entrepreneurs. YoungEntrepreneur.com members understand that the future economic vitality of the World must come from the emergence of new businesses through entrepreneurship. Entrepreneurs add new jobs, create new opportunities for prosperity, and also help support the World's creativity and cultural richness. Their goal is to help you start, manage or grow your successful business venture. In order for this to occur, there must be an entrepreneurial culture, a pool of resources to draw from, and successful models to follow. It is their hope that YoungEntrepreneur.com can provide the critical mass necessary to help create this mindset and continue to grow our software, solutions and support for our members. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Yebol - Knowledge Based Smart Searching
http://yebol.com/
Yebol utilizes a combination of patented algorithms paired with human knowledge to build a Web directory for each query and each user. Instead of the common "listing" of Web search queries, Yebol automatically clusters and categorizes search terms, Web sites, pages and contents. Yebol allows for a multi-dimensional search result instead of the normal one-dimensional search seen by most web search engines today. This provides a more accurate summary of top sites and categories; a wider array of related search terms; a longer and richer expansion for query results; and a deeper base of links and keywords in search result pages. Unlike current search platforms, Yebol provides hundreds of easily identified and accessibly categorized results in one easily navigable page. Their results not only provide users with a rich search experience, but also help them quickly scan the results to find targeted information. In essence, they generate a unique "homepage look" for each search query. Yebol provides a productive experience for both main types of search – general investigation of a topic and specific target search. For users who want to research and explore a topic, Yebol provides rich information from several dimensions. For users who want a specific type of targeted results, they can quickly focus on their category and navigate to the target. Yebol was founded by Hongfeng Yin, Ph.D., who has more than 20 years research and development experience on artificial intelligence, pattern recognition, data mining and search. Most recently, Yin

worked for more than four years at Yahoo! Data Mining Research team, where he built the core behavioral targeting technologies, products and more than a thousand models, which generate multi-hundred millions revenue. Using the Amazon cloud computing services, they have built a knowledge base for about 10 million concepts over 1 billion web pages. Their technologies are scalable to build a knowledge base of 100 million concepts over 10 billion web pages in the next phase. This has been added to the tools section ofResearch Resources Subject Tracer™ Information Blog.

VMLogix LabManager - Cloud Edition
http://www.vmlogix.com/VMLogix-LabManager-Cloud-Edition-Solution/
VMLogix LabManager-Cloud edition is the next-generation virtual lab management software that offers customers the flexibility of an elastic, pay-as-you-go virtual lab management solution. The virtual lab management capabilities offered by VMLogix LabManager-Cloud Edition on the Amazon cloud are: a) Manage multiple-AMIs grouped in a single environment/configuration, b) Enable end user self service through a web portal, c) Govern the self service - through policies on users and teams (quotas and leases), d) User management to configure lab users and teams, e) Persona management to control access to lab management functionality, f) Powerful automation capabilities for the deployment and re-deployment of environments including software stacks in AMIs, g) Allow users to share lab artifacts – through view/edit/delete permissions, h) Gather audit trails of lab use, and i) Access to a central library of software media for lab users. Computational Statistics: Wiley Interdisciplinary Reviews (WIREs)
http://www.wiley.com/WileyCDA/Section/id-390445.html
Wiley Interdisciplinary Reviews (WIREs) publications focus on high-profile research areas at the interfaces of the traditional disciplines.

* Content for each WIRE is selected, invited, and reviewed by an internationally renowned Editorial Board, ensuring that the highest scientific and presentational standards are maintained.
* Coverage is carefully crafted to provide an encyclopedic coverage of the field.
* New and updated reviews are added every month, ensuring that the most current information in the field is always available.
* Reviews are highly structured and consistently formatted, maximizing the accessibility and utility of the content to the user.

Article types are designed to cater to a variety of end users:

* Overviews provide a broad and non-technical treatment of important topics suitable for advanced students and for researchers without a strong background in the field.

Powered By VirtualPrivateLibrary.com™

© 2009 Marcus P. Zillman, M.S., A.M.H.A.

* Advanced Reviews examine key areas of research in a citation-rich format suitable for researchers and advanced students.
* Focus Articles present specific real-world issues, examples and implementations.
* Opinions provide a forum for thought-leaders to offer a more individual perspective.
* Editorial Commentaries provide an opportunity for WIREs Editors to offer their own syntheses of broad areas of research in a less formal and more flexible style.

WIREs Computational Statistics is a major new scientific publication that will support the information needs of researchers in this field and help to shape its future development.

Its goals are to:

(1) present the current state of the art of Computational Statistics through an ongoing series of commissioned reviews written by leading researchers;
(2) capture the crucial interdisciplinary flavor of this field by including articles that address key topics from the differing perspectives of statistics and computing, and include potential application areas in technology, biology, physics, geography, and sociology;
(3) capture the rapid development of Computational Statistics through a systematic program of content updates; and
(4) encourage new participation in this field by presenting its achievements and challenges in an accessible way to a broad audience.

FFFFOUND! - Find, Bookmark and Share Your Favorite Images
http://ffffound.com/
FFFFOUND! is a web service that not only allows the users to post and share their favorite images found on the web, but also dynamically recommends each user's tastes and interests for an inspirational image-bookmarking experience!! Muckety - Exploring the Paths of Power and Influence
http://news.muckety.com/
Muckety is published by Muckety LLC, a company founded in 2006 by a team with years of experience in journalism, technology and online publishing. The name Muckety derives, of course, from muckety mucks. Some follow the money. They follow the muckety, producing a daily news and information site based on online databases (which we enlarge daily), extensive research and old-fashioned journalism. They strive for accurate, timely, objective journalism. Although you may sometimes see ads with a political point of view (served automatically through ad services such as Google AdSense), they aim to be nonpartisan in our maps, news stories and databased information. Journal of Applied Computer Science & Mathematics (JACSM)
http://jacs.usv.ro/
Within the framework of improving the scientific performances, at national and international level, and of stimulating the development of university uresearch ability, the periodical Journal of Applied Computer Science & Mathematics (JACSM), which is a bi-annual publication of "Stefan cel Mare" University of Suceava, proposes an up-to-date scientific approach within Romanian research, by implementing and disseminating new interdisciplinary views in informatics and mathematics fields. By means of integrating the specialty studies of both highly reputed and trainee researches, this publication aims at seizing and describing the latest information in the field of applied mathematics and computer science, applicable to many investigation domains. By continuously drawing on current pragmatic demands, the journal is inline with with the extending coordinates of inter-university and institutional co-operation, with a view to achieve better academic representation at national and European institutional level. Journal of Applied Computer Science & Mathematics comes out as a natural instrument of consolidating the research activities, which will contribute to the promotion of scientific quality from the national and international milieu, to the establishment of partnership with universities from their country and abroad, as well as to the quality enhancement of social life, by developing the performances in educational system and by putting to good use the present scientific resources, aiming to achieve excellent scientific results.

Science Books Online
http://www.sciencebooksonline.info/
Science Books Online is a directory of free science e-books, textbooks, lecture notes, monographs, and other science related documents. All texts are available for free reading online or for downloading in various formats, authorized by their respective authors or publishers. This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

arcalife.com - Where Family Memories Live On

http://www.arcalife.com/
arcalife.com is an online community that allows members to securely store and share life experiences, events, stories, family tree, family history, and genealogy research. arcalife not only provides unique services to capture and showcase your family's history, but also provide a user-friendly, feature-rich environment for social networking, scrapbooking, and information sharing to enhance day-to-day connectivity. This has been added to Genealogy Resources Subject Tracer™ Information Blog.

ProsePoint - Free Open Source Newspaper and Magazine Content Management System
http://www.prosepoint.org/
ProsePoint is a software package that lets you quickly and easily publish your own newspaper or magazine online. You can upload stories, edit stories online, and organise stories into editions, all through the user-friendly and convenient web interface. You do not need to know any programming or html. ProsePoint aims to have as many commonly used features as possible available and ready to go out of the box. For a new publication, this means no customising or searching around for extra modules. If you find a theme you like, you don't even need a web designer. Just install ProsePoint and you're ready to publish! Best of all, ProsePoint is free and open source. Features include: 1) Newspaper and magazine centric data architecture - Stories can be aggregated into editions, and editions are versions of a publication series; 2) Wysiwyg editing - Seamless integration with the TinyMCE rich text editor. •Native management of images - Images are treated as content items, and can be manipulated, resized etc.; 3) Native management of media files (ie audio, video); 4) Social network friendly links - Readers can add or bookmark your stories to social networking sites; 5) Search engine friendly - Intuitive and clean looking web addresses that increase search engine traffic; 6) Highly extendable - Use hundreds of freely available open source Drupal 6 modules for extra functionality; and 7) Free and open source - Licensed under the GPL 2 and other open source licenses. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

Transactions on Data Privacy (TDP)
http://www.tdp.cat/
Publisher: IIIA-CSIC (Artificial Intelligence Research Institute of the Spanish Higher Research Council), the UNESCO Chair in Data Privacy and the Catalan Association of Artificial Intelligence (an ECCAI member). The aim of the Transactions on Data Privacy (TDP) is to provide an international forum for researchers on all topics related to data privacy technologies. The journal will publish original and high quality papers. TDP welcomes archival research papers, comprehensive reviews, authoritative tutorials, short notes and comprehensive book reviews. All papers will be peer-reviewed. The journal will accept submissions from multiple disciplines related to the various aspects of data privacy (e.g. data mining, statistics, cryptography, database technology, data communication, etc.). Regarding the application papers, contributions to solving privacy problems in the main application areas (e.g. official statistics, electronic commerce and Internet, healthcare, telecommunications, etc.) are welcome. Papers can be theoretical or applied. Content in English. Transactions on Data Privacy is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. This has been added to Privacy Resources Subject Tracer™ Information Blog.

ZinePal.com - Create Your Own Printable Magazines and eBooks
http://www.zinepal.com/
Use zinepal.com to create your own magazines and eBooks. You can select content from blogs, Atom/RSS feeds and other websites. zinepal.com reformats the content into a printable PDF and an eBook for use with the Amazon Kindle and other eBook readers. Now you can take your content wherever you go. Read your zine during your commute, in the park or your favorite coffee shop. You can also e-mail it to your friends or just let them subscribe to your zine feed on zinepal.com. Don't have the time to create your own zine? Then use zinepal.com to find zines already created by other users. You can search using keywords, such as your home town, interests, politics, etc. If you like the zines created by a user, then subscribe via e-mail or RSS feed to receive new zines as soon as they are published. Flash Card Machine - Create, Study and Share Online Flash Cards
http://www.flashcardmachine.com/
Flash Card Machine is a web application that enables users to create interactive web-based study flash cards and share them with others. Students can create flash cards to help them study for their next exam. Students can make them publicly available and their classmates can study from the same set. Teachers can create flash cards for their students. Teachers can build customized pages for each of their classes to better organize their cards. 13.4 million flash cards and growing! The Flash Card Machine is updated regularly with new and exciting features to help you study. This has been added to Student Research Resources Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Reviews in Aquaculture
http://www.wiley.com/bw/journal.asp?ref=1753-5123
The primary aim of Reviews in Aquaculture is to provide a forum of reviews on developments in aquaculture techniques, policies and planning. The journal will publish fully peer-reviewed review articles, invited or otherwise, on major aspects pertaining to aquaculture, including:

* global, regional and/or national production and market trends
* aquaculture practices and technological developments
* aquaculture- environment interactions
* indigenous and alien species in aquaculture
* the biology and culture of aquaculturally important and emerging species
* utilization of primary and secondary resources in aquaculture
* developments in artificial propagation of individual species and/or groups
* developments in feeds and feeding
* genetics and aquaculture
* health management in aquaculture
* policy developments pertaining to aquaculture
* aquaculture product quality and traceability
* socio-economics of aquaculture and impacts

ThoughtAudio.com -
http://www.thoughtaudio.com/
As the world moves toward more complex interactions, one of the most fundamental aspects of humanity is to enjoy its thoughts and its great works. Their journey has always been one of making classic literature available to anyone willing to listen, and now in this next phase, to expand our scope to include more thinkers, writers and essayists. Although thinking may not seem as relevant today, with advancing technology providing alternative vehicles of entertainment, they are committed to bringing a small part of intellectual enjoyment to the globe. We Compare Books - Book Price Comparison Engine for Student Books
http://www.wecomparebooks.com/
This is a book price comparison engine that is dedicated to helping students find the best prices on books. We Compare Books is a free service that assists you in finding the best deal on the student text books you need. They are an independent and impartial web site, not owned by any bookstore. The search results that are presented to you are therefore totally objective. The goal of We Compare Books is to find the best possible price for the books you want. Once you tell them what book you are looking for they hunt for the cheapest price and display the results. They search multiple online bookstores and are always increasing our search capability constantly to better serve you. They are here to help you find the best offer for the book you want without needing to visit each and every booksite. They do all of the work for you, finding the book you want at the best possible price. Once you enter a search criteria, be it the title, author, ISBN, subject of a book or keywords pertaining to it, the We Compare Books search engine looks up various online bookstores to find books that match your criterias. The results are then displayed and you can compare prices for every book, ensuring you do not pay any more than you have to. This has been added to ShoppingBots Subject Tracer™ Information Blog. This has been added to Student Research Resources Subject Tracer™ Information Blog.**Awareness**

Watch™ Paper Review

Reinventing Academic Publishing Online. Part I: Rigor, Relevance and Practice by *Brian Whitworth and Rob Friedman*
http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2609

Abstract:
While current computing practice abounds with innovations like online auctions, blogs, wikis, social networks and online social games, few if any genuinely new theories have taken root in the corresponding "top" academic journals. Those creating computing progress increasingly see these journals as unreadable, outdated and irrelevant. Part I of this paper chronicles the inevitable limits of what can only be called a feudal academic knowledge exchange system, with trends like exclusivity, slowness, narrowness, conservatism, self–involvement and inaccessibility. Part II (which will appear next month) of this paper suggests the sort of socio–technical design needed to bring about a transformation in scholarly publishing.
