

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V8N2

February 2010

Welcome to the V8N2 February 2010 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report

Awareness Watch™ Spotters

Awareness Watch™ Book/Paper/Article Review

Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting **Knowledge Discovery Resources 2010** with the Subject Tracer located at the Virtual Private Library and accessible online at the following URL:

<http://www.KnowledgeDiscovery.info/>

These knowledge discovery resources will allow you the ability to create your own private virtual library for the latest and most current knowledge discovery resources and sites available online over the Internet. These resources will keep you on the correct and positive path for continued new knowledge discovery required to fulfill your personal, academic, business and professional quest for current awareness and new knowledge discovery.

Knowledge Discovery Resources 2010

An Internet MiniGuide Annotated Link Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

This Internet MiniGuide Annotated Link Compilation is dedicated to the latest and most competent resources for knowledge discovery available over the Internet. With the constant addition of new and pertinent information coming online every second it is very easy to go into information overload. The true key is to be able to find the important knowledge discovery resources and sites both in the visible and invisible World Wide Web. The following selected knowledge discovery resources and sites offer excellent knowledge and information discovery sources to help you accomplish your research goals! Also visit the very latest resources on Knowledge Discovery at the following Subject Tracer™ Information Blog.

<http://www.KnowledgeDiscovery.info/>

ACM SIGKDD: Current Explorations Issue

<http://www.acm.org/sigs/sigkdd/explorations/issue.php?issue=current>

Explorations is published twice yearly, in June/July and in December/January each year. The newsletter is distributed in hardcopy form to all members of the ACM SIGKDD. It is also sent to ACM's network of libraries. Online versions are available on the web free to the general public. Their goal is to make the SIGKDD Newsletter an informative, rapid means of publication and dynamic forum for communication with the Knowledge Discovery and Data Mining community.

Advanced Knowledge Technologies

<http://www.aktors.org/>

The Advanced Knowledge Technologies (AKT) project aims to develop and extend a range of technologies providing integrated methods and services for the capture, modelling, publishing, reuse and management of knowledge. AKT is a multi-million pound, six year collaboration between internationally recognized research groups at the Universities of Aberdeen, Edinburgh, the Open University, Sheffield and South Hampton.

APECKS: a Tool to Support Living Ontologies

<http://ksi.cpsc.ucalgary.ca/KAW/KAW98/tennison/index.html>

Ontology servers are currently under-developed in terms of the support they provide for collaborative activities on their content. This paper presents the APECKS (Adaptive Presentation Environment for Collaborative Knowledge Structuring) system, an ontology server which supports collaboration by allowing individuals to create personal ontologies. These ontologies can be compared with others' to prompt discussion about the sources of their differences and similarities.

Association of KnowledgeWork (AOK)

<http://www.kwork.org/index.html>

At the Association of KnowledgeWork, people from every specialty cross professional, geographic, cultural, economic and hierarchical barriers to learn together. Not just another website, this is a virtual home for those who work with knowledge.

BAYESIA: Bayesian Networks and Data Mining Tool

<http://www.bayesia.com/>

The Bayesian Network approach merges and supersedes existing approaches coming from Artificial Intelligence and Data Mining, both symbolic and statistical ones. Bayesian Networks are rigorously justified, provide a distributed knowledge representation, and are as understandable as a rule base. They deal particularly well with uncertainty, and they can be manually generated by consultation of an expert, or inductively built by machine learning.

Bibliomining Information Center - Data Mining for Libraries

<http://www.bibliomining.com/>

The basic definition is "*data mining for libraries*." For years, bibliometrics has been used to track patterns in authorship, citation, etc. Today, there are many more tools available for discovering similar patterns in complex datasets from data mining and statistics. In addition, tools from management science such as Online Analytical Processing (OLAP) can be used to explore the data for patterns. Therefore, a more complex definition is: Bibliomining is the combination of data mining, bibliometrics, statistics, and reporting tools used to extract patterns of behavior-based artifacts from library systems

Brint.com - Business Technology - Information Economy - Knowledge Management

<http://km.brint.com/>

KMNetwork and the WWW Virtual Library of Knowledge Management combined to bring together an excellent resource for research papers and portals on knowledge management and discovery. In depth research articles and research portals from over the entire global Internet discuss the business, technologies, processes, systems, sociology, creativity, psychology and philosophy of Knowledge Management.

Creative Commons RDF-Enhanced Search

<http://search.creativecommons.org/>

This search engine will help you find photos, music, text, books, educational material, and more that is free to share or build upon. Copyright applies fully and automatically to any work, a photograph, a song, a web page, an article, pretty much any form of expression, the moment it is created. This means that if you want to copy and re-use a creative work you find online, you usually have to ask the author's permission. This "all rights reserved" protection is good thing for many authors and artists. But what about those who want you to use their work freely without permission -- but on certain conditions? This search engine helps you quickly find those authors and the work they have marked as free to use with only "some rights reserved." If you respect the rights they have reserved (which will be clearly marked, as you'll see) then you can use the work without having to contact them and ask. In some cases, you may even find work in the public domain -- that is, free for any use with "no rights reserved."

Conceptual Graphs

<http://conceptualgraphs.org/>

Conceptual graphs (CGs) are a system of logic based on the existential graphs of Charles Sanders Peirce and the semantic networks of artificial intelligence. They express meaning in a form that is logically precise, humanly readable, and computationally tractable. With their direct mapping to language, conceptual graphs serve as an intermediate language for translating computer-oriented formalisms to and from natural languages. With their graphic representation, they serve as a readable, but formal design and specification language. CGs have been implemented in a variety of projects for information retrieval, database design, expert systems, and natural language processing.

D2K - Data To Knowledge

<http://alg.ncsa.uiuc.edu/do/tools/d2k>

D2K - Data to Knowledge is a rapid, flexible data mining and machine learning system that integrates analytical data mining methods for prediction, discovery, and deviation detection, with data and information visualization tools. It offers a visual programming environment that allows users to connect programming modules together to build data mining applications and supplies a core set of modules, application templates, and a standard API for software component development.

Data Mining Resources

<http://www.DataMiningResources.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring data mining resources and sites on the Internet.

Data Mining : White Papers, Webcasts and Product Information

http://www.bitpipe.com/data/rlist?t=itmgmt_10_40_96

Research the latest Data Mining technologies, tools and techniques. Read white papers, case studies, webcasts and product information from multiple vendors .

Deep Web Research 2010

<http://DeepWeb.us/>

Web search guru **Marcus P. Zillman's** guide extensively documents resources that include articles, books, websites, presentations, search engines, and technology applications that facilitate the challenging task of accessing information, published in many formats, that encompass the hundreds of millions of pages comprising the "deep web."

DigiCULT Resources - Resource Discovery & Information Retrieval

<http://www.digicult.info/pages/resources.php?t=21>

An excellent resource listing of resource discovery and information retrieval resources, sources, sites and tools that will definitely aid the researcher in knowledge discovery. This DigiGULT page is updated frequently with the latest resources and tools.

Explore Open Archives

<http://opcit.eprints.org/explorenchives.shtml>

This site lists and comments on other lists of individual open archives. This list and its categorisation gives a broad overview of the structure, size and progress of full-text open access eprint archives. This list will be maintained and updated as far as is possible, and is intended to assist further quantitative research on the open access eprint phenomenon for those who want to measure the growth and quality of open access eprint archives.

Global Knowledge Partnership (GKP)

<http://www.globalknowledge.org/>

The Global Knowledge Partnership (GKP) is a worldwide network committed to harnessing the potential of information and communication technologies (ICTs)* for sustainable and equitable development. GKP's vision is a world of equal opportunities where all people can access and use knowledge and information to improve their lives. The network enables the sharing of information, experiences and resources to help reduce poverty and empower people.

GMDH - Group Method of Data Handling

<http://come.to/GMDH>

Group Method of Data Handling was applied in a great variety of areas for data mining and knowledge discovery, forecasting and systems modeling, optimization and pattern recognition. Inductive GMDH algorithms give possibility to find automatically interrelations in data, to select optimal structure of model or network and to increase the accuracy of existing algorithms. This original self-organizing approach is substantially

different from deductive methods used commonly for modeling. It has inductive nature - it finds the best solution by sorting-out of possible variants.

Gurteen Knowledge Website

<http://www.gurteen.com/>

This site acts as a gateway Knowledge Management, Learning, Thinking, Creativity, Personal Mastery; Personal Knowledge Management and the effective use of Technology. The site has been created by and maintained by David Gurteen an UK-based knowledge consultant.

Google™ Directory – Knowledge Discovery

http://directory.google.com/Top/Reference/Knowledge_Management/Knowledge_Discovery/

Google's directory of Knowledge Discovery resources on the world wide web in the following categories: 1) Books, 2) Business and Companies, 3) Data Mining, 4) Information Visualization, 5) Magazines and eZines, 6) OLAP, 7) Organizations, 8) Software, and 9) Test Mining.

IBM Research - Knowledge Discovery & Data Mining (KDD)

<http://www.research.ibm.com/compsci/kdd/>

IBM Research has been at the forefront of the exciting new area of Knowledge Discovery & Data Mining (KDD) from the very beginning. Key advances in robust and scalable data mining, methods for fast pattern detection from very large databases, text and web mining, and innovative business intelligence applications have come from our research laboratories. Links to their current projects as well as KDD links are available from this site.

Insightful Miner 3

<http://www.insightful.com/products/iminer/default.asp>

Insightful Miner is a highly scalable data mining and analysis workbench that gives new analysts and skilled modelers the ability to deploy predictive intelligence throughout the enterprise. Insightful Miner 3 increases support for large data environments with new versions for Windows and Solaris servers and adds many new features that allow data analysts and data miners to easily build and deploy analytic applications that boost product performance and improve the efficiency of critical business processes.

International Workshop on Peer-to-Peer Knowledge Management (P2PKM)

<http://www.p2pkm.org/>

The P2PKM workshop is intended to serve as an active forum for researchers and practitioners, where they will have the possibility to exchange and discuss novel ideas, research results and experiences, laying in the intersection of the P2P, Knowledge Management (KM), Semantic Web, databases, pervasive computing, agents, as well as other related fields.

ITtoolbox Knowledge Management – Knowledge Management Information and Tools

<http://knowledgemanagement.ittoolbox.com/> A comprehensive site for Knowledge Management and Discovery Resources including browse by type of content: Blogs, FAQs, Groups, Jobs, News, Peer Publishing, PR, Research and White Papers. Also available browse by Knowledge Management Topic: Business Intelligence, Business Strategy/Planning, Communication/Collaboration, Data Warehousing, Document/Content Management, e-Learning, Enterprise Portals, General Knowledge management, KM Career, Knowledge Transfer, and Packaged KM Suites.

KBL(sm): A Registry of Library Knowledge Bases

<http://www.public.iastate.edu/~CYBERSTACKS/KBL.htm>

Library-created or library-related Knowledge Bases. A Knowledge Base / Knowledgebase may be defined as a database with a focus on empirical or practical knowledge. In recent years, Knowledge bases have become common components for many businesses and services.

K-CAP2005 - Third International Conference on Knowledge Capture

<http://www.kcap05.org/>

Areas covered: Knowledge engineering and modeling methodologies, Mixed-initiative planning and decision-support tools, Acquisition of problem-solving knowledge, Programming-by-demonstration systems, Knowledge management environments, Knowledge-based markup techniques, Knowledge extraction systems, Knowledge acquisition tools, Advice taking systems, and Learning apprentice.

k-collector – Enterprise Knowledge Aggregator

[http://www.evectors.it/itideatools/story\\$data=ideatools&num=142&sec=5](http://www.evectors.it/itideatools/story$data=ideatools&num=142&sec=5)

k-collector is an enterprise knowledge aggregator that leverages the power of social software, weblogs and shared topics to present new ways of finding and combining the real knowledge in your organization.

KDD-2009: The 15th Annual ACM SIGKDD International Conference on Knowledge Discovery and Data Mining

<http://www.acm.org/sigs/sigkdd/kdd2009/>

The 15th annual ACM SIGKDD conference is the premier international forum for data mining researchers and practitioners from academia, industry, and government to share their ideas, research results and experiences. KDD-09 will feature keynote presentations, oral paper presentations, poster sessions, workshops, tutorials, panels, exhibits, demonstrations, and the KDD Cup competition.

KDnuggets: Data Mining, Web Mining, and Knowledge Discovery Guide

<http://www.kdnuggets.com/>

KDnuggets.com (KD stands for Knowledge Discovery) is the leading source of information on Data Mining, Web Mining, Knowledge Discovery, and Decision Support Topics,

including News, Software, Solutions, Companies, Jobs, Courses, Meetings, Publications, and more. KDnuggets News has been widely recognized as the leading newsletter on Data Mining and Knowledge Discovery.

KmBlogger

<http://kmwiki.wikispaces.com/>

A resource covering site, resources, communities and related information about the relationship between blogs and knowledge management and knowledge discovery.

Know-Center - Austria's Competence Center for Knowledge Management

<http://www.know-center.at>

The Know-Center is Austria's Competence Center for knowledge-based Applications and Systems. The Know-Center has its core competences in the fields of information technology as enabling technologies for knowledge management and in human-oriented knowledge management.

Knowledge Discovery

<http://www.KnowledgeDiscovery.info/>

A Subject Tracer™ Information Blog developed and created by Internet expert, author, keynote speaker and consultant Marcus P. Zillman, M.S., A.M.H.A. for monitoring knowledge discovery resources and sites on the Internet.

Knowledge Harvesting

<http://www.KnowledgeHarvesting.org/>

Knowledge Harvesting is used to rapidly convert top-performer expertise into knowledge assets that enhance corporate valuation and protect the organization from knowledge degradation. The purpose of this site is to offer an extensive introduction to Knowledge Harvesting.

Knowledge Management Cluster Web

<http://www.kmcluster.com/>

KMCluster focus is knowledge management (KM). Focus is also on the key KM techniques of enterprise collaboration (EC), organizational learning (OL), communities of practice (CP), social networks (SN), intellectual capital (IC), complexity science (CS), content management (CM), measurement & metrics (MM), policy & procedures (PP), innovation & invention (II) and analytics & taxonomies (AT).

Knowledge Management Magazine – Inside Knowledge

<http://www.kmmagazine.com/>

The original knowledge management publication. The knowledge that exists within your organisation is your only sustainable source of competitive advantage. They believe this makes knowledge management a strategic imperative for you. Each issue of *Inside Knowledge* is designed to provide you with the information you require to: 1) Learn from the mistakes and success stories of others, 2) Lower business costs and increase

productivity across your organization, 3) Ensure the ongoing professional development of yourself and your colleagues, and 4) Keep on top of industry developments, new techniques and tools for knowledge management and knowledge discovery.

Knowledge Management Research Center - CIO

http://www.cio.com/topic/1467/Knowledge_Management

Making the most of intellectual capital. Topics in the Knowledge Management Research Center include: 1) Overview, 2) Strategy, 3) Process, 4) Measurement, 5) Technology, 6) Portal and Collaboration, 7) In the Know, 8) Case Studies, 9) Metrics, 10) CIO Radio, 11) Q&A, 12) Books, 13) Events, and 14) Newsletters. A comprehensive research center presented and updated by CIO.

Knowledge Management Resource Center

<http://www.kmresource.com/>

Knowledge Management Resource Center is a gateway to the world of Knowledge Management (KM). On this site you'll find a comprehensive collection of KM resources, each reviewed and described to help you quickly locate what you're looking for. You can explore knowledge management in their 17 departments, browse their bookstore, or search the site by keyword.

Linguistic Tools for Knowledge Discovery

<http://www.montague.com/abstracts/discovery.htm>

The gaps between subject and functional boundaries are one of the best sources of breakthrough innovation. Yet for a variety of reasons — managerial, technical, and editorial — it's often difficult to exploit them. In this article they use an example from their own research and experience to show how linguistic tools such as thesauri, glossaries, and navigation schemes can promote knowledge discovery by exposing potential linkages between seemingly unrelated subjects.

my Knowledge Explorer (mKE) and the mKR Language

<http://mKRmKE.org/>

my Knowledge Explorer (MKE) is an interactive tool for organizing knowledge. It helps the user to record, change and search knowledge, and provides extensive error checking to ensure the internal consistency of the knowledge. Interaction with mKE uses the mKR language. mKR is a very-high-level knowledge representation language with simple English-like statements, questions and commands, plus UNIX-shell-like variables, methods and control structures.

Megaputer Intelligence

<http://www.megaputer.com/>

Megaputer Intelligence Inc., a Delaware corporation established in May of 1997, is a leading developer and distributor of advanced software tools for data mining, text mining, and intelligent e-commerce personalization. Their tools help reveal knowledge hidden in data. They add intelligence and insight to every step of the business decision-making

process. The mission of Megaputer is to provide customers around the world with top quality software tools for transforming raw data into knowledge and facilitating better business decisions.

Open Directory – Knowledge Discovery

http://dmoz.org/Reference/Knowledge_Management/Knowledge_Discovery/ A listing of knowledge discovery resources broken into the following categories: 1) Books, 2) Business and Companies, 3) Magazine and eZines, 4) Organizations, 5) Software, 6) Data Mining, 7) Information Visualization, 8) OLAP, and 9) Text Mining.

PEPITe S.A.

<http://www.pepite.be/>

PEPITe is a company specialized in intelligent data exploration and knowledge extraction techniques. PEPITe sells Knowledge Discovery in Databases (KDD) solutions. These solutions combine software modules and services. PEPITe offers a complete range of services and products dedicated to industrial Data Mining (DM) applications.

SPSS, Data Mining, Statistical Analysis Software, Predictive Analysis, Predictive Analytics, Decision Support Systems

<http://www.netgen.com/>

SPSS predictive analytics, enterprise applications, and decisioning systems provide the most effective means for you to shape your organization's future for knowledge management and knowledge discovery. A very large selection of commercial based products from data mining to knowledge discovery.

STATISTICA - Data Mining, Data Analysis, Quality Control, and Web Analytics Software

<http://www.statsoft.com/>

StatSoft's flagship product line is the *STATISTICA* suite of analytics software products. *STATISTICA* provides the most comprehensive array of data analysis, data management, data visualization and data mining procedures. Its techniques include the widest selection of predictive modeling, clustering, classification and exploratory techniques in one software platform. Ideal for the knowledge discovery starter kit

T2K - Text to Knowledge

<http://alg.ncsa.uiuc.edu/do/tools/t2k>

The T2K (Text to Knowledge) tool provides text mining and analysis capabilities that have been specially designed to operate in and capitalize upon the complexity of rich natural language domains of very large stores of text and multimedia documents. T2K is a library of D2K modules that implements sophisticated algorithms for text analysis.

Awareness Watch V8N2 February 2010 Newsletter

Telemakus - Mining and Mapping Research Findings to Promote Knowledge Discovery

<http://www.telemakus.net/>

The goal of the Telemakus System is to enhance the knowledge discovery process by developing retrieval, visual and interaction tools to mine and map research findings from the research literature. The objective of the research is to create, test and validate an infrastructure to permit the automation of the creation and maintenance of a searchable database that generates knowledge maps via query tools and concept mapping algorithms. We will also be applying natural language processing models and information analysis methods to ultimately speed up the scientific discovery process.

The Data Mine

<http://www.the-data-mine.com/>

The Data Mine was launched in April 1994, to provide information about DataMining (AKA KnowledgeDiscoveryInDatabases or KDD). There are 6 separate DataMining topic areas (known as "webs"), each with an index. You could also start with the IntroductionToDataMining. Popular pages include: OnLine Analytical Processing (OLAP) , Data Mining Journals, Data Mining Tutorials, Data Sources. Topic areas include: Data Mining Software, Data Mining Index, Data Mining General/Misc, People Working in Data Mining, and Data Mining Companies and Organizations.

The Protégé Project

<http://protege.stanford.edu/>

Protégé is an ontology editor and a knowledge-base editor. Protégé is also an open-source, Java tool that provides an extensible architecture for the creation of customized knowledge-based applications. Protégé's OWL Plug-in now provides support for editing Semantic Web ontologies.

Visual Analytics - VisualLinks, Link Analysis, Data Mining Software

<http://www.visualanalytics.com/>

VisualLinks® is a platform-independent, graphical analysis tool used to discover patterns, trends, associations and hidden networks in any number and type of data sources. VisualLinks presents data graphically uncovering underlying relationships and patterns. VisualLinks addresses the entire analytical process – from access and integration to presentation and reporting – providing a single and complete solution to a broad range of data analysis needs.

UCI Knowledge Discovery in Databases Archive

<http://kdd.ics.uci.edu/>

This is an online repository of *large data sets* which encompasses a wide variety of data types, analysis tasks, and application areas. The primary role of this repository is to enable researchers in knowledge discovery and data mining to scale existing and future data analysis algorithms to very large and complex data sets. The archive is intended to

eBrary Discovery - eBooks and Other Materials In a Wide Range of Topics

<http://shop.ebrary.com/home.action>

This site is for individuals who do not have access to ebrary through their institutions. With more than 20,000 full-text e-books in multiple academic and general interest subject areas, it offers a subset of the authoritative content available through libraries, corporations, government, and other ebrary customers. ebrary Discover also includes sheet music and maps! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

Environmental Working Groups's (EWG) Drinking Water Quality Analysis and Tap Water Database

<http://www.ewg.org/tap-water/home>

Since 2004, testing by water utilities has found 316 pollutants in the tap water Americans drink, according to an Environmental Working Group (EWG) drinking water quality analysis of almost 20 million records obtained from state water officials. More than half of the chemicals detected are not subject to health or safety regulations and can legally be present in any amount. The federal government does have health guidelines for others, but 49 of these contaminants have been found in one place or another at levels above those guidelines, polluting the tap water for 53.6 million Americans. The government has not set a single new drinking water standard since 2001. Water utilities spend 19 times more on water treatment chemicals every year than the federal government invests in protecting lakes and rivers from pollution in the first place. Based on these data, EWG believes the federal government has a responsibility to do a national assessment of drinking water quality. It should establish new safety standards, set priorities for pollution prevention projects, and tell consumers about the full range of pollutants in their water. Because it has not, EWG launched a 3-year project to create the largest drinking water quality database in existence. This user-friendly, interactive resource covers 48,000 communities in 45 states and the District of Columbia.

Biocell

<http://www.cricyt.edu.ar/biocell/>

Previously titled Electron Microscopy and Cell Biology. Biocell publishes original articles in the areas biological structure and functions, cell and molecular biology, histochemistry, cytochemistry, immunocytochemistry and electron microscopy. Biocell welcomes articles reporting research on Cell and Molecular Biology, and on the suborganismal and organismal aspects of Vertebrate Reproduction and Development, Invertebrate Biology and Plant Biology. Brief reports are also accepted for publication under special circumstances. Biocell is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

MetroMonitor - Interactive Barometer of the Health of America's 100 Largest Metropolitan Economies

<http://www.brookings.edu/metro/MetroMonitor.aspx>

The MetroMonitor is a quarterly, interactive barometer of the health of America's 100 largest metropolitan economies. It examines trends in metropolitan-level employment, output, and housing conditions to look "beneath the hood" of national economic statistics to portray the diverse metropolitan trajectories of recession and recovery across the country. The aim of the MetroMonitor is to enhance understanding of the particular places and industries that drive national economic trends, and to promote public and private sector responses to the downturn that take into account metro areas' unique starting points for eventual recovery. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Ag Atlas Maps

http://www.agcensus.usda.gov/Publications/2007/Online_Highlights/Ag_Atlas_Maps/

Geographic information system (GIS) and desktop publishing technologies were used in the production of maps for this atlas. NASS developed an automated map production system to generate digital map files based on statistical data from the 2007 and 2002 Censuses of Agriculture. The system utilized agricultural statistical data files, geographic area boundary files, land use/cover boundary files, map parameter data files, and customized GIS and statistical software to produce thematic choropleth and dot-density maps. The customized software performed statistical calculations to class the data into categories and to allocate the number of dots for a geographic area. The software also executed other cartographic functions including, assigning symbology to represent the

data; randomly placing dots; creating and positioning map titles, legends and notes; and outputting individual maps to digital image files. Colors for the maps were selected with the assistance of ColorBrewer, an online tool for selecting map color schemes. The color schemes were developed by Dr. Cynthia A. Brewer at Pennsylvania State University. The U.S. Census Bureau provided a generalized county boundary file, urbanized areas boundary file, land use/cover boundary file (originator - USGS), and county-level land area/perimeter data file. NASS modified the county boundary file to show the county-level geographic areas for which agriculture census statistics are reported. The statistical data and geographic areas were identified by Federal Information Processing Standards (FIPS) codes that allowed for a 1-to-1 correspondence between the data and the geographic area. NASS updated the land use/cover boundary file with generalized urbanized areas. The continental U.S. and Hawaii were mapped at a scale of 1:21,000,000 and Alaska used a map scale of 1:63,000,000. The maps were projected using Albers Equal Area Conic projection. This has been added to [Agriculture Resources](#) Subject Tracer™ Information Blog.

International Journal of Economic Sciences and Applied Research

<http://www.ijesar.org>

The International Journal of Economic Sciences and Applied Research is a blind peer-reviewed, scholarly journal devoted to publishing high-quality papers and sharing original economics research worldwide. It intends to serve as an outlet for theoretical and empirical research in all areas of economics. These include, but are not limited to the following:

- * Economic Theory and Politics
- * Micro- and Macro-economics
- * International economics
- * European economics
- * Regional economics
- * Public economics
- * Financial economics
- * Business Management
- * Business Informatics
- * Accounting and
- * Mathematical methods for economics.

Papers in other sub-disciplines of economics (e.g., labour, public, money, industrial organization, health, environment and history) are also welcome if they contain international or cross-national dimensions in their scope and/or implications. The Journal especially encourages the submission of articles, which are empirical in nature, or deal with issues of open economy macroeconomics and international finance. Theoretical work submitted to the Journal should be original in its motivation or modelling structure. Empirical analysis should be based on a theoretical framework, and should be capable of

replication. It is expected that all materials required for replication (including computer programs and data sets) should be available upon request to the authors.

Readtwit - Links From Your Twitter Feed in Clean RSS Format

<http://www.readtwit.com/>

Readtwit filters your twitter feed to links only, resolves link destinations and publishes the content as an RSS feed. You can then use any feed reading software / service to read twitter posted content along with the rest of your feeds. Duplicate links in the same time-frame are grouped together. No more retweets overwhelming your link browsing activity. It's not revolutionary, just added value. Readtwit won't change your life. It's just added value for those of us who use twitter as a source of interesting content in addition to social conversation ... and it's free. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Bots, Blogs and News Aggregators](#) Presentation Resources. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Boomerater - The Destination for Boomers

<http://www.boomerater.com/>

Boomerater is THE destination for Boomers to exchange ideas, advice and first-hand experience with other Boomers - everything from top shopping finds and recommended vacation destinations to financial and relocation advice. By accessing our database of content contributed by other Boomeraters, our members gain valuable, practical information they know they can trust. Whether facing a challenging life decision or embracing a new creative lifestyle, Boomerater can make the journey easier and more rewarding. Boomers hold a significant and growing power base in our economical and political environment. 78 million strong with buying clout of an estimated \$4 trillion annually, Boomers wield enormous power. As a result, Boomers are being barraged with advertising campaigns and advice from self-proclaimed "experts" who profess to know what Boomers want. This leads to messaging that is often off-target, confusing and sometimes laughable. To truly know what Boomers want, you need to ask them - not tell them. And that's what Boomerater is all about. This site is for Boomers, by Boomers, tapping first-hand knowledge from others with similar interests and concerns. Boomerater-written reviews and ratings, forums and other features offer Boomers the opportunity to learn from each other about topics that matter most to them. It's the perfect first stop in making all of life's decisions. This has been added to [Elder Resources](#) Subject Tracer™ Information Blog.

Cyclos - Open Source Complementary Currency Software

<http://project.cyclos.org/index.php>

Cyclos is open source online banking software for complementary currency systems like LETS, Barter networks, Time banks and exchange systems that are introduced in order to stimulate the circulation and the availability of credit in regions or countries with under-use of capacities. The Cyclos team is also looking for opportunities to allow micro finance institutions easy linkage with their administration to use Cyclos as their

transactional (on-line banking) system. Cyclos is being produced by two teams of programmers, one in Brazil and one in Uruguay, being part of the respective national social trade organisation: STRO Uruguay and Instrodi. Cyclos is published under the GPL (open source) license meaning that it can be downloaded for free and used at no cost. Cyclos is developed in Java and runs on a variety of platforms like Linux, Windows, Macintosh and Solaris. From the start the objective has been to create professional software that is easy to use and maintain, secure, and highly customizable. Cyclos offers a professional and complete on-line banking system where users can administer their accounts, view their transactions, and make (secure) payments via web access or mobile phone. Cyclos comes with various additional modules like a business directory, e-commerce platform, referrals and transaction qualifications, messaging and notification system, call/support center logging, and an integrated management information system. This has been added to [eCommerce Resources](#) Subject Tracer™ Information Blog.

Journal of Marketing Management (JMM)

<http://www.tandf.co.uk/journals/rjmm>

The Journal of Marketing Management (JMM) is the official Journal of the Academy of Marketing and is a double-blind peer-reviewed periodical with an international reputation for publishing influential and original contributions. JMM is concerned with all aspects of the management of marketing and is intended to provide a forum for the exchange of the latest research ideas and best practice in the field of marketing as a whole. JMM seeks to meet the needs of a wide but sophisticated audience comprising senior marketing executives and their advisors, senior line managers, teachers and researchers in marketing and undergraduate and postgraduate students of the subject. From 2010, Volume 26, the Journal of Marketing Management is published in seven double issues a year. Three of these issues are Special Issues, dedicated to a key topic in the industry, and one is traditionally devoted to a selection of the best papers from the annual Academy of Marketing Conference. Other issues, containing contributions from theoreticians and practitioners, cover a wide area including: a) State of the art papers on particular topics e.g. portfolio planning, sales management, pricing; b) Management of the marketing mix the practical issues of managing product, price, place and promotion efficiently and effectively; c) Customer behaviour how and why both corporate and ultimate customers behave in the way they do; d) Marketing intelligence the establishment and maintenance of marketing information systems and everything associated with them; e) Case studies how an organisation has tackled an important marketing problem; and f) Meta marketing how marketing ideas and techniques are applied to the less- or non-traditional areas of services, public and non-profit organizations.

Squad - Web Based Collaborative Code Editor

<https://squadedit.com/>

Squad is a web-based collaborative code editor. They make it simple to open, edit and share code in real time. Squad is a lean, mean text editing machine. Its simplicity is perfect for novice users and a joy to use for power users. It has everything you need to edit text or source code (syntax highlighting, line numbering, etc.) and none of the bloat

found in most text editors. Squad is web based. That means you can access it from anywhere and your settings are always with you. No need to install a clunky desktop application— perfect for a quick code fix at Mom's house! Squad is a like developer's swiss army knife. Even if you use a desktop text editor, it's the quick and easy way to share code with coworkers or make a quick fixes from anywhere. And at discounted rates, there's no reason not to add it to your teams arsenal. Squad allows you to collaborate in real time with others. If you are new to coding, it's the perfect way to ask a friend to lend a hand. If you're an experienced developer Squad is great for code reviews, on the job training, and pair programing. This has been added to [Script Resources](#) Subject Tracer™ Information Blog.

HelpVids - High Quality Free Software Tutorial Videos

<http://www.helpvids.com/>

Even with the huge number of video sites available on the Internet today (how-to and otherwise), there are very few high quality, free software tutorial videos.

It is their mission to fill this gap in the market, providing high quality videos using the latest technologies offered by our hosting company. This has been added to [Tutorial Resources](#) Subject Tracer™ Information Blog.

Blogged - Blog Social Network and Blog Directory

<http://www.blogged.com/>

At Blogged, their vision is to provide a destination where people can talk about news with their friends and family. Not only do they provide the breaking news from various media sources, but they also try to create conversation by integrating social discussions from your trusted network. Traditionally, the way people interact with news is very static and one-dimensional -- you get the facts of what happened in the world with very little commentary or color. But in this new Web 2.0 age, they believe that news should be interactive and discussed between yourself and the people you choose to engage. They hope to make "reading the news" an engaging, social activity. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Journal of Urban and Environmental Engineering (JUEE)

<http://www.journal-uee.org/>

Journal of Urban and Environmental Engineering (JUEE) provides a forum for original papers and for the exchange of information and views on significant developments in urban and environmental engineering worldwide. The scope of the journal includes:

(a) Water Resources and Waste Management: This topic includes (i) waste and sanitation; (ii) environmental issues; (iii) the hydrological cycle on the Earth; (iv) surface water, groundwater, snow and ice, in all their physical, chemical and biological processes, their interrelationships, and their relationships to geographical factors, atmospheric processes and climate, and Earth processes including erosion and sedimentation; (v) hydrological extremes and their impacts; (vi) measurement,

mathematical representation and computational aspects of hydrological processes; (vii) hydrological aspects of the use and management of water resources and their change under the influence of human activity; (viii) water resources systems, including the planning, engineering, management and economic aspects of applied hydrology.

(b) Constructions and Environment: Buildings and infrastructure constructions (bridges/footbridges, pipelines etc) are part of every urban area. In recent years there is a growing interest in seeking rationality of construction systems, in balance with environmental adequacy and harmony in an urban area. This involves, among others, adequacy of structural systems (shapes, functionality, rational design etc), use of alternative materials for construction (recycled, environmentally friendly materials etc) and solutions seeking energy efficiency.

(c) Urban Design: This topic covers the arrangement, appearance and functionality of towns and cities, and in particular the shaping and uses of urban public space (e.g. streets, plazas, parks and public infrastructure), including also urban planning, landscape architecture, or architecture issues (e.g. thermic and acoustic comfort).

(d) Transportation Engineering: This topic covers area such as Traffic & Transport Management, Rail Transport, Air Transport, International Transport, Logistics/Physical Distribution/Supply Chain Management, Management Information Systems & Computer Applications, Motor Transport, Regulation/Law, Transport Policy, and Water Transport.

The Editors welcome original papers, scientific notes and discussions, in English, in those and related topics.

Abracadaban.com - Web 2.0 meets Digital Advertising

<http://www.abracadaban.com/en>

Abracadaban.com is an online marketplace where professional, semi-professional or amateur designers can post and sell customizable banners to clients needing digital media products. In doing so, it establishes itself as an alternative to high-priced, dominant ad agencies. As a community, Abracadaban aims to democratize the advertising process and provide an alternative (and consistent) source of revenue for every designer. More designers will now get to play in the e-commerce marketplace while, with an access to a larger pool of designers, clients will see their design costs lowered. This has been added to [Advertising, Marketing and Public Relations Resources](#) Subject Tracer™ Information blog.

TweetCall - Twitter By Voice

<http://www.TweetCall.com/>

Tweet from anywhere, using any phone! Once you've logged into our website for the first time, you can just dial 1-877-TWEETCALL 1-877-TWEETCALL (893-3822), speak your tweet, and an accurate text transcription is posted to your Twitter account within minutes. Example Uses include: a) Tweet from anywhere on the go; b) No need to pay

text message fees to Tweet; c) Citizen journalism: both transcription and audio files are posted to your Twitter; d) Give relatives Twitter accounts, even if they're not tech-savvy; and e) Group blasts: Share your TweetCall PIN and Twitter account with multiple people. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

PRESSfish - Marketing Management Portal

<http://www.pressfish.com/>

The quick answer is that PRESSfish is an efficient online marketing powerhouse that supplies all the tools you need within one simple interface. PRESSfish offers outsourced email campaigns, video and SMS texting solutions to businesses and resellers, allowing them to create, send, and track email newsletters, surveys, autoresponders, and a whole lot more with ease. This has been added to [Advertising, Marketing and Public Relations Resources](#) Subject Tracer™ Information Blog.

Journal of Information, Law & Technology (JILT)

<http://go.warwick.ac.uk/jilt>

Journal of Information, Law & Technology (JILT) is an established but innovative electronic law journal covering a range of topics relating to IT law and applications. It contains a diversity of materials including peer reviewed and non-refereed articles, commentaries, work in progress articles, book and IT reviews, and conference reports and papers, as well as information papers, news and UK and global conferences. The journal seeks academic articles with international perspectives on IT law and IT applications in legal education and practice. We are also pleased to receive commentaries, case studies, work in progress research papers, special reports, conference reports, book reviews, software reviews and demos. In particular, articles are welcomed in the following subject areas: e-commerce, e-business and e-learning, encryption, liabilities for defective software, data protection, electronic intellectual property rights, privacy, copyright, practical and legal barriers to electronic access to legal information, computer crime, dispute resolution, internet regulation, and analysis of recent legislation. Journal of Information, Law & Technology is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML, RTF and PDF format.

Lead Zeppelin - Taking Sales to Another Level

<http://www.leadzep.com/>

Integrate Your Website with Web-to-Lead Forms. Your inbox is no place to manage your important leads and prospects. Configure the fields you need and drop a simple script into your website and you're good to go. Collaborate Remotely ... Share your deal-closing notes and files with your team, assign tasks and leads to people. Track your leads' status or use Deals for bids. Quickly Find Notes and Status on Leads. Easily find the information you need when a prospect calls. This has been added to the tools section of

Flaphone™ - Free Calls, Chat, Messaging Web-Based SoftPhone

<http://www.flaphone.com/>

Flaphone™ is a free web-based softphone which allows you to make calls from the Internet page. You don't need to download, install or configure anything. Flaphone™ users can call each other, to SIP phones and to any phone numbers, using SIP providers. Flash Player Version 9.0+ is required. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

FreePollKit.com - Create Polls and Surveys

<http://freepollkit.com/>

FreePollKit.com offers a free poll service that makes it easy to place polls on your Web site asking your users about their opinions. Many highly regarded web sites display surveys about current topics and events. The polls are easily inserted into your web page by pasting a HTML snippet, the polls are stylish, but you are free to customize their appearance to a certain extent. The questionnaire is also protected from multiple votes assuring you that the poll results really reflect the opinions of your users. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Nutrition Research and Practice (NRP)

<http://e-nrp.org/>

Nutrition Research and Practice (NRP) aims to stimulate research and practice across broad areas of human nutrition. The Journal publishes peer-reviewed original manuscripts on nutrition biochemistry and metabolism, community nutrition, nutrition and disease management, nutritional epidemiology, nutrition education and institutional foodservice in the following categories: Original Research, Research Notes, Communications, and Reviews. Nutrition Research and Practice is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

AgeAnalyzer - Determine Blog's Author Age

<http://www.ageanalyzer.com/>

They created AgeAnalyzer out of curiosity and fun. It uses the uClassify API to determine an author's age. Behind the scene, a text classifier hosted over at uClassify.com has been trained on 7000 blogs from six age categories. They hope you like it! For more details on the inner workings of the AgeAnalyzer, please read their [blog post](#) over at the uClassify blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MetaGovernment Project

http://metagovernment.org/wiki/Main_Page

The mission of the Metagovernment project is to support the development and use of Internet tools which enable the members of any community to fully participate in the governance of that community. They are a global group of people working on various projects which further this goal. They expect governance software to be firstly adopted in small communities and to spread outward with the potential to gradually replace many institutions of representative democracy with collaborative governance. They conceive a world where every person, without exception, is able to substantively participate in any governance structure in which they have an interest. They envision governance which is not only more open, free, and democratic; but also which is more effective and less fallible than pre-Internet forms of governance. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Web Privacy Check

<http://ipinfo.info/html/privacy-check.php>

This tool checks what security related information is exposed by your web browser to any website that you visit. By accessing this page via an anonymizing proxy or any other internet privacy solution you can judge how effectively your identity is hidden. Items marked with an asterisk *) will most likely be recorded by web servers. In addition to these values, the exact access time, login-name (if you have authenticated) and cookies are also routinely logged. This has been added to [Privacy Resources](#) Subject Tracer™ Information Blog.

Journal of Nanotechnology

<http://www.hindawi.com/journals/jnt/>

Journal of Nanotechnology is a peer-reviewed, open access journal that publishes original research articles as well as review articles in all areas of nanotechnology. Abstracts available online. Articles available in PDF format.

SVET - Web Based Project Management System

<http://www.svetsoft.com/>

SVET is web based project management system, that helps you to organize your work. Basically it's an online notebook which you can use to store the information for your projects. It enables you to track your working time and communicate with your team and clients. You can also make detailed reports of what you've done for a specific period of time. As SVET is an online system you don't need to install anything on your computer. Just get your account and log-in. FormSpring.me - Create Free Anonymous Question Boxes for Your Social Networks

<http://www.FormSpring.me>

formspring.me is a Free, simple, service created by FormSpring that allows you to create anonymous question boxes for all of your social networks. Quickly create your own customized box and receive answers and comments. With a simple easy-to-use dashboard, you can publish your responses to Tumblr, Twitter, Facebook, or your blog. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Top Stock Tweets - Free Real-Time Stock Market Browser for Twitter

<http://www.topstocktweets.com/>

This free, real-time stock market browser for Twitter has two goals: Speed of delivery, and Quality of results. Speed: You need tradeable market intelligence fast. Their servers scan every tweet in real-time for stock symbols starting with a \$ sign or messages ending in \$\$\$. The instant they find a matching tweet, they update all of their data and charts, and redisplay every page being viewed in a web browser. You never have to reload our pages to see what's new. Just leave the page open in your browser, and it will always be up-to-date. Pages are refreshed even if you have other browser tabs visible. Some traders like to open multiple pages in different tabs or windows, and let them all stay current. Quality: You only want tweets from the top traders. They rank every Twitter user who sends tweets with \$ signs, and only display results from the best sources of information. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog.

Mental Illness

<http://www.pagepress.org/journals/index.php/mi>

Mental Illness is an online-only, international, Open Access peer-reviewed journal which publish scientific papers concerning the latest advances in the diagnosis and treatment of mental illness. All psychiatry-related manuscripts are welcome: Mental Illness publish original articles, reviews, brief reports and case reports. Abstracts available online. Articles available in HTML and PDF format. Current Issue: Vol 1, No 1 (2009)

Squareleaf - Simple and Intuitive Virtual Whiteboard

<http://www.squareleaf.net/>

Squareleaf is a simple and intuitive virtual whiteboard, complete with all the sticky notes you'll ever need. Unlike the real thing, their notes don't fall off all of the time. Squareleaf doesn't force you to keep boring old tabular lists. Arrange your notes how you see fit, quickly and easily. Remember important things, keep to-do lists, organise projects, track work and everything else that you need to do that we've never thought of ... and its free. Coming soon will be a Pro version with even more cool features and stuff. Not too many though, just enough and no more. LocalLabs

<http://e-democracy.org/labs>

Join LocalLabs for open exchange among those developing technology to promote government transparency and accountability, enhance public participation, and build community engagement at the local level (on up). From software developers and web designers to those involved in open source, open standards and "Gov 2.0," this is an international "local up" network for those proudly geek and passionately local. It is designed to complement efforts like Data.Gov, Sunlight Labs, and other more nationally focused efforts. Co-sponsored by E-Democracy.org, TOPP - The Open Planning Project, and YOUR GROUP HERE. If your organization would like to be listed among the co-sponsors of this network, contact: team@e-democracy.org. I have just joined this excellent list

Powerset - Search Wikipedia Articles

<http://powerset.com/>

Powerset's goal is to change the way people interact with technology by enabling computers to understand our language. While this is a difficult challenge, they believe that now is the right time to begin the journey. Powerset is first applying its natural language processing to search, aiming to improve the way they find information by unlocking the meaning encoded in ordinary human language. Powerset's first product is a search and discovery experience for Wikipedia, launched in May 2008. Powerset's technology improves the entire search process. In the search box, you can express yourself in keywords, phrases, or simple questions. On the search results page, Powerset gives more accurate results, often answering questions directly, and aggregates information from across multiple articles. Finally, Powerset's technology follows you into enhanced Wikipedia articles, giving you a better way to quickly digest and navigate content. Based in San Francisco, Powerset was founded in 2005 and was funded by Foundation Capital, Founders Fund, Paperboy Ventures, and angel investors. On August 1, 2008, Powerset was acquired by Microsoft. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Search the Latest Health Bills

<http://www.searchthebill.com/>

You may now search the combination of the Senate health bill as amended and passed on December 24, together with the House of Representatives bill passed in November. Alternatively, you may download the combined bills and the search program free for your Windows PC. This is offered as a free public service, and as one small step toward rebuilding confidence in Congress. Decision makers, reporters, commentators, and the

general public are invited to search online or to download. You need not register. No information is collected about you. Congratulations to Douglas Lowry for creating this search entity and allowing free access to it!!

Fooyin Journal of Health Sciences (FJHS)

<http://www.fjhs-online.com/>

The Fooyin Journal of Health Sciences (FJHS) is the official peer-reviewed publication of Fooyin University. The FJHS is an interdisciplinary journal that is focused on providing prompt publication of results from original research on fundamental and molecular aspects of health. The fields of interest include:

- * health care
- * environmental science
- * medical science
- * molecular medicine
- * individualized medicine
- * biotechnology
- * toxicology
- * natural food
- * human behavior
- * pharmacy
- * microbiology

In addition to original articles, the journal also welcomes papers in the form of invited review articles and short communications.

iTrake - Automated International Search Service for News and Current Events from the World of Finance

<http://www.itrake.com/>

iTrake is an online automated search service for news and current events from the world of finance, that delivers meaning and relevance beyond traditional search and aggregation engines. More than a news aggregator, iTrake is a discussion board where intellectuals meet, an online press where people can contribute and an online knowledge pool for an organization. iTrake is an innitaitive with one purpose: to build a perfectly different, perfectly efficient way to read, write, and interact with the world of finance and at the same time empower its users. Their technology not only recognizes people, companies, topics, places and keywords but understands how they relate to each other in the news flow, and puts them in context for the user. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog.

Green Home Improvement - The Community for Greening the Home

<http://www.greenhomeimprovement.com/>

Where eco-conscious homeowners and green-certified contractors meet, share and green our world. Features include: a) View and post green materials and products; b) Ask questions and get answers from the pros; c) Learn about green certifications; and d) Find green ideas for any part of your home. This has been added to [Green Files](#) Subject Tracer™ Information Blog.

Good Tutorials

<http://www.good-tutorials.com/>

Good-Tutorials is the largest source of tutorials on the web today. It has been featured on the BBC, SkyNews, TechTV (now G4), in the British magazine iCreate, PC World, and has been linked to by thousands of sites, blogs and forums. Since its start in 2002, it has been designed, coded, and loved by Zach Holman. This has been added to [Tutorial Resources](#) Subject Tracer™ Information Blog.

ICAME Journal

<http://icame.uib.no/journal.html>

ICAME is an international organization of linguists and information scientists working with English machine-readable texts. The aim of the organization is to collect and distribute information on English language material available for computer processing and on linguistic research completed or in progress on the material, to compile an archive of English text corpora in machine-readable form, and to make material available to research institutions. ICAME Journal is published once a year (in the spring) with articles, conference reports, reviews and notices related to corpus linguistics. Content freely accessible in PDF format.

Glasnost Contact Management - Contact, Project and Image Management

<http://www.glasnost21.com/>

Glasnost combines Contact Management, Project Management and Image Management. Glasnost Contact Management is great for sales teams, or just keeping track of all the people you work with. It helps you deal with companies, contacts, tasks, documents and comments. It also allows you to create and distribute quality email newsletters. With Glasnost's online project management module operations teams have an intuitive, flexible and productive platform for getting things done. Online document management and project collaboration becomes simple. Task management and task reporting is effortless. Glasnost's Image management allows you to create and share any number of galleries, link them to other resources (projects, companies), tag and search them, as well as create lightboxes and slideshows. Glasnost stands for openness, transparency and deep productive collaboration. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Imagining the Internet

<http://www.elon.edu/predictions/>

The Imagining the Internet Center's mission is to explore and provide insights into emerging network innovations, global development, dynamics, diffusion and governance. Its research holds a mirror to humanity's use of communications technologies, informs policy development, exposes potential futures and provides a historic record. It works to illuminate issues in order to serve the greater good, making its work public, free and open. The center is a network of faculty, students, staff, alumni, advisers and friends working to identify, explore and engage with the challenges and opportunities of evolving communications forms and issues. They investigate the tangible and potential pros and cons of new-media channels through active research. Among the spectrum of issues addressed are power, politics, privacy, property, augmented and virtual reality, control and the rapid changes spurred by accelerating technology. The Imagining the Internet Center sponsors work that brings people together to share their visions for the future of communications and the future of the world. This has been added to the [World Wide Web Reference](#) Subject Tracer™ Information Blog.

CAS Source Index (CASSI) Search Tool

<http://cassi.cas.org/>

The CAS Source Index (CASSI) Search Tool is an online resource intended to support researchers and librarians who need accurate bibliographic information. This free resource can be used to quickly and easily look up or confirm publication titles and abbreviations, as well as CODEN, ISBN, or ISSN codes. The CASSI database contains a listing of publications indexed by Chemical Abstracts Service (CAS) since 1907. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Entertainment Computing

<http://www.elsevier.com/locate/inca/717010>

Entertainment Computing publishes original, peer-reviewed research articles and serves as a forum for stimulating and disseminating innovative research ideas, emerging technologies, empirical investigations, state-of-the-art methods and tools in all aspects of digital entertainment, new media, entertainment computing, gaming, robotics, toys and applications among researchers, engineers, social scientists, artists and practitioners. Theoretical, technical, empirical, survey articles and case studies are all appropriate to the journal. Specific areas of interest include:

- * Computer, video, console and internet games
- * Digital new media for entertainment
- * Entertainment robots
- * Entertainment technology, applications, application program interfaces, and entertainment system architectures
- * Human factors of entertainment technology
- * Impact of entertainment technology on users and society

- * Integration of interaction and multimedia capabilities in entertainment systems
- * Interactive television and broadcasting
- * Methodologies, paradigms, tools, and software/hardware architectures for supporting entertainment applications
- * New genres of entertainment technology
- * Simulation/gaming methodologies used in education, training, and research

In the area of empirical and experimental studies we are looking for contributions which are very well documented, innovative, and tested or evaluated in a particular entertainment domain.

Popfossa for Medical Professional Development & E-Learning

<http://www.popfossa.com/>

Popfossa is the premier professional development and online learning portal designed to connect the global health care community. Professional meetings, conferences and events have been the mainstay of learning and networking for health care professionals for centuries. They are exploring ways of using enabling technology to improve the quality of learning resources on the web. They want to make e-learning easy and possible for everyone. Popfossa not only makes finding relevant meetings easier but also aims to facilitate e-learning and professional development across disciplines and cultures. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog.

Sunlight Labs - Developers and Designers Opening America's Government

<http://www.sunlightlabs.com/>

Sunlight Labs is part of the Sunlight Foundation a non-profit, non partisan Washington, DC based organization focused on digitization of government data and making tools and websites to make it easily accessible. Sunlight Labs is an open source community of thousands dedicated to using technology to transform government. They focus on transparency- the idea that government can be more effective, more honest, and more accountable when it makes data about its process, operations, and influences available to the public. Their work revolves around opening up government data of all forms. Paid staff of Sunlight Labs are employees of the Sunlight Foundation a 501c(3) non-partisan non-profit organization. The Sunlight Foundation is: a) A think-tank that develops and encourages new policies inside the government to be more transparent and accountable; b) A campaign to engage citizens to change government's transparency policies; c) An investigative organization that uses the data and applications to demonstrate why we need those policies; d) A grant giving institution that gives grants to organizations using technology to further our mission and create community; and e) An open source technology community that revolves around the Sunlight Foundation's core mission. AnybodyOutThere - Search Online People To Talk With

<http://www.anybodyoutthere.com/>

AnybodyOutThere is a new communication platform that offers an instant and relevant response to your thoughts and questions by connecting you with the right people. They have developed a unique and secret algorithm that analyzes the text of your post using Natural Language Processing techniques. The algorithm works in such a way that it doesn't require anything except your thought, idea or question. It was designed specifically to find cluster connections between text lines of less than 110 characters. This enables them to suggest relevant people for you to talk with based on your AnybodyOutThere post. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Biodemography and Social Biology

<http://www.tandf.co.uk/journals/HSBI>

Biodemography and Social Biology is the official journal of The Society for the Study of Social Biology, devoted to furthering the discussion, advancement, and dissemination of knowledge about biological and sociocultural forces affecting the structure and composition of human populations. This interdisciplinary publication features contributions from scholars in the fields of sociology, demography, psychology, anthropology, biology, genetics, criminal justice, and others. Original manuscripts that further knowledge in the area of social biology are welcome, along with brief reports, review articles, and book reviews.

ipl2 - Reference Information You Can Trust

<http://www.ipl2.org/>

ipl2 is a public service organization and a learning/teaching environment. To date, thousands of students and volunteer library and information science professionals have been involved in answering reference questions for our Ask an ipl2 Librarian service and in designing, building, creating and maintaining the ipl2's collections. It is through the efforts of these students and volunteers that the ipl2 continues to thrive to this day. In January 2010, the website "ipl2: information you can trust" was launched, merging the collections of resources from the Internet Public Library (IPL) and the Librarians' Internet Index (LII) websites. The site is hosted by Drexel University's College of Information Science & Technology, and a consortium of colleges and universities with programs in information science are involved in developing and maintaining the ipl2. Cacoo - Create Diagrams Online with Real Time Collaboration

<http://cacoo.com/>

Cacoo is a user friendly online drawing tool that allows you to create a variety of diagrams such as site maps, wire frames, UML and network charts. All you need is a browser to easily create attractive diagrams for documents like Blogs, Wikis online. If you wish to edit/change the diagram you don't need to upload it. It can be a joint simultaneous operation. Numerous users can work on and complete the same diagram simultaneously. Cacoo supports real time collaboration. Multiple users can simultaneously edit and complete a single diagram. Cacoo can be used free of charge. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MOVIECLIPS -Free Movie Clips and Movie Scenes

<http://movieclips.com/>

With over 12,000 movie clips, you can search, find, view, discuss and share scenes from your favorite movies. The team at MOVIECLIPS has worked tirelessly to collect clips and make them completely searchable by actor, title, genre, occasion, action, mood, character, theme, setting, prop, and even dialogue. This makes it simple to find a scene fast. They are hopeful that you'll use this powerful search to discover new movies. For that reason, they have included links with each clip to easily buy or rent the feature-length movie. MOVIECLIPS beta is here now! They are legal and free to every user. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Critical Policy Studies

<http://www.tandf.co.uk/journals/rcps>

Critical Policy Studies brings contemporary theoretical and methodological discussions, both normative and empirical, to bear on the understanding and analysis of public policy, at local, national and global levels. The journal offers a unique forum for researchers, policy-makers and practitioners to challenge established accounts of policy-analytic methods, to explore alternative approaches to policy-making, and to promote democratic governance. To this end, the journal concentrates on the relation of political and policy theory to specific practices of governance, in particular as they pertain to democratic governance, participatory practices, social justice and general public welfare. This necessitates an emphasis on the interplay between qualitative and quantitative modes of inquiry. The journal thus moves beyond narrow empirical approaches to pay special attention to interpretive, argumentative, discursive approaches to policy-making. Although Critical Policy Studies is a rigorous academic journal, it also pays special attention to the practical aspects of policy-making and analysis that confront real-world practitioners. In addition, the journal includes essays on current debates and opinions in the field, review articles that reflect on published research, and book reviews.

Decing - Decisions Through Secret and Private Votes

<http://www.decing.com/>

Decing is a simple and 100% free online service for arranging a Secret and Private vote. The system is designed for small teams which should make a decision without disclosing individual participants' selections. Their service does not require registration. When creating a new vote you have to specify a subject the text that describes the purpose of voting, option names and the names of participants. Additionally you can set the weights for the participants, provide that options will be the participants - in this case participants cannot vote for themselves, in addition there is a possibility not just to choose one option but participants can distribute a fixed amount of Gems between options. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Privacy Resources](#) Subject Tracer™ Information Blog.

Sprixi - Free Images To Choose and Use

<http://www.sprixi.com/>

Sprixi helps you find an image the following ways: a) for a school assignment, b) for a work presentation, c) for a blog post, d) for an instant message, and e) for a tweet. They arrange images into topics and order images by usefulness. Sprixi learns and improves every time someone uses it. Sprixi gathers images from quality sites around the web and brings them together. Currently they get images Flickr and OpenClipArt, as well as our own images. Images on Sprixi generally have liberal licences such as Creative Commons or are in the public domain. You don't have to buy anything. You can choose from multiple sizes with one click. They make it simple to download or link to the image. Sprixi can even generate HTML code for your blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Information Technology for Development

<http://www.tandf.co.uk/journals/TITD>

Information Technology for Development, with an established record for publishing quality research and influencing practice for over 20 years, is the first journal to have explicitly addressed global information technology issues and opportunities. It publishes social and technical research on the effects of Information Technology (IT) on economic, social and human development. In addition to being a valuable publication in the field of information systems, Information Technology for Development is also cited in fields such as public administration, economics, and international development and business, and has a particularly large readership in international agencies connected to the Commonwealth Secretariat, United Nations, and World Bank. Information Technology for Development endeavors to advance research and practice in the development of scalable Information Technology (IT) infrastructures in global development, and considers IT, policy and commerce infrastructures, and the effects of online communities and research methods for measuring the effects of IT. The journal appeals to engineers, scientists, strategists, practitioners in the field, academics, international leaders, and policy-makers who recognize the importance of IT as an economic driver and make decisions with respect to investments in technical, legal and human infrastructures. The objective of Information Technology for Development is to provide a forum for policy-makers, practitioners, and academics to discuss strategies and best practices for working in developing countries, tools and techniques for ascertaining the effects of IT infrastructures in government, civil societies and the private sector, and theories and frameworks that explain the effects of IT on development. The journal helps address how to achieve significant, measurable improvements in addressing the Millennium Development Goals through Information and Communication Technology (ICT): Strategies for sourcing goods in the less developed countries and marketing services to the more developed countries; Best practices for working in the different countries; Theories and frameworks that explain the effects of IT on development; and Tools and techniques for ascertaining the effects of IT infrastructures in government, civil society and the private sector. Information Technology for Development accepts both qualitative and quantitative research on subjects such as:

Development Issues:

IT ethics and development

International legal frameworks

IT and the global community

Effect of mobile infrastructures on development

IT and the emergence of the knowledge society

International ICT dialogues and discourses: Implications for developed and transition economies

Consultation and collaboration across the digital differences

Adoption and diffusion of IT, and rate of uptake

Security of network infrastructures, public key infrastructure

Scalable infrastructures for development
Sustainable development in developing and transition economies
Attaining Millennium Development Goals through ICT
Official development assistance

IT Policy:

eGovernment

IT infrastructure for public administration and reform [legal framework, human resource development (HRD) frameworks]

eGovernance for good government (eGovernment, eDemocracy and eBusiness)

International commerce and development

Public policy for the IT industry

Innovations in capacity building for ICT development (education in IT, skills for ICT development)

Debt financing strategies and developments

IT strategies for development (national and sectoral)

ICT and political development in transitional economies

ICT standards and dependency

Cyber-security

IT Business:

Procurement: public procurement information systems

Metropolitan growth and Global Information Systems (GIS)

Sourcing strategies: netsourcing

Outsourcing web enabled strategies

Small and Medium Enterprise (SME) access to public procurement systems

Open sourcing, online communities

eCommerce Security

Uptake of ICTs on micro-enterprises and their effect on the economy

Health Informatics:

Innovations in bioinformatics

Information for action in healthcare

Health information systems

Rural health infrastructures

SendGrid - Making Email Delivery Easy

<http://sendgrid.com/>

SendGrid transparently handles DKIM, SPF, ISP rate limits, content inspection, bounces, and spam reports to help users achieve higher deliverability. SendGrid integrates in minutes by just changing three SMTP settings. We even assign our users their own IP addresses. This has been added to the tools section of [Research Resources](#) Subject

Giveaway of the Day Project - Free Licensed Software

<http://www.giveawayoftheday.com/>

Giveaway of the Day Project is a new initiative in the software distribution world! Every day they offer for FREE licensed software you'd have to buy otherwise! Their new initiative is finally open to its visitors and ready to present hot software titles and best software authors from all over the world. For game giveaways check out Game Giveaway of the Day. Giveaway of the day is a win-win solution for both publishers and clients. The idea behind this initiative is that many sites and publishers offer trial downloads; but only thjey offer giveaway downloads. What does that mean? Basically, every day theye nominate one software title that will be a Giveaway title of that day. The software will be available for download for 24 hours (or more, if agreed by software publisher) and that software will be absolutely free. That means – not a trial, not a limited version – but a registered and legal version of the software will be free for our visitors (under specific Terms and Conditions, which limit the softwarew usage to non-commercial only, and may also limit software updates and technical suport). The software product will be presented in its full functionality, without any limitations save for those mentioned in Terms and Conditions. The download link will remain on our web-site for the agreed

period of time, together with the review of the software product and the information about other products from the software publisher presenting the giveaway title. Both reviews and the information on the product line will remain active even when the Giveaway period is over. This has been added to the tools section of [Research Resources](#) Subject TRacer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Journal of Trust Research

<http://www.tandf.co.uk/journals/RJTR>

Trust is imperative to constructive social interaction and cooperation at and across many levels. Positioned as a high-impact source journal providing novel ideas for other journals, the mission of JTR as a high-quality academic journal is: a) to inquire into the nature, forms, bases and roles of trust as well as the mechanism and stage of trust-building and trust repair at and across personal, group, organizational, community, national and international levels so as to stimulate informed debate toward an accumulative and integrative knowledge via both relevant and rigorous theory-building and theory-testing; and b) to influence individuals, groups, organizations, communities and nations seeking and implementing sound, practical solutions to improve their trust-related management by providing the most relevant and rigorous theories and perspectives. JTR is particularly interested in those studies that are inter-disciplinary, cross-cultural, cross-level, multi-method, context-rich, process-oriented, and practice-relevant in perspectives, so as to effectively investigate the holistic content and dynamic process of organizational and social trust, without the perils of reductionist assumptions. JTR identifies the above as the emerging trends with great potential to contribute to our rich and deep understanding about the complex issue of trust. As an inter-disciplinary and cross-cultural journal dedicated to advancing a cross-level, context-rich, process-oriented, and practice-relevant journal, JTR provides a focal point for an open debate and dialogue between diverse researchers, thus enhancing the understanding of trust in general and trust-related management in particular, especially in its organizational and social context in the broadest sense. Through both theoretical development and empirical investigation, JTR seeks to open the "black-box" of trust in various contexts. JTR aims to publish relevant and rigorous research contributing to knowledge in six major domains that are interdisciplinary and cross-cultural (including indigenous): 1) General research on trust to build an integrative framework with a common language across disciplines and across cultures; 2) General research on trust at and across the levels of individual, group, organization, community, and nations; 3) Specific research on trust management within and between organizations and societies; 4) Specific research on interpersonal trust within and between organizations and societies; 5) Specific research on institutional trust within and between organizations and societies; and 6) Specific research on inter-organizational and social trust within and across nations. JTR specializes in dedicated research on trust in general and organizational trust in particular, thereby serving the needs primarily of scholars and secondarily practitioners. The unique features of JTR as a focal point for an inter-disciplinary, cross-cultural, cross-level, context-rich, process-

oriented, and practice-relevant research Journal will appeal to the broadest readership, especially those who believe in such values as the key indicators of high quality research.

OggChat - Live Chat and Help Software

<http://oggchat.com/>

OggChat is unique among business live chat solutions. It incorporates a customizable chat window for your website but routes all chats directly to your operators' Gmail accounts. No additional client software is needed and you can chat right from Gmail or Google Talk. OggChat Lite is always free. This has been added to [eCommerce Resources](#) Subject Tracer™ Information Blog.

yUML - Create and Share Simple UML Diagrams in Your Blogs, Wikis, Forums, Bug-Trackers, and eMails

<http://yuml.me/>

yUML is an online tool for creating and publishing simple UML diagrams. It's makes it really easy for you to: a) Embed UML diagrams in blogs, emails and wikis; b) Post UML diagrams in forums and blog comments; c) Use directly within your web based bug tracking tool; and d) Copy and paste UML diagrams into MS Word documents and Powerpoint presentations. yUML saves you time. It's designed to for those that like to create small UML diagrams and sketches. Without yUML, creating a UML diagram might involve loading up a UML tool, creating a diagram, giving it a name, fiddling with layout, exporting it to bitmap, and then uploading it online somewhere. yUML doesn't make you do any of that. yUML is designed for light, back-of-napkin style UML usage. This won't suite every project. Desktop tools tend to offer more control over layout, more diagram types, fuller support for the UML specification etc. UML is a particular way of drawing diagrams. It stands for Unified Modelling Language. UML is often used by business analysts and software developers. Schools often teach it as part of IT and software courses. If you read a lot of software text books or articles, you'll probably have seen quite a lot of UML. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Cyclur - Customizable RSS Widget

<http://www.cyclur.com/>

Cyclur is a widget that allows you (user) to customize and display RSS feeds on your site within minutes. It can be used on your site to display information from any RSS feed, uniting multiple news feeds into a simple widget. and International Studies (CSIS), and addresses topics such as: a) The U.S. role in the world; b) Emerging great powers: Europe, China, Russia, India, and Japan; c) Regional issues and flashpoints, particularly in the Middle East and Asia; d) Weapons of mass destruction proliferation and missile defenses; and e) Global perspectives to reduce terrorism. Contributors are drawn from outside as well as inside the United States and reflect diverse political, regional, and professional perspectives. Policymakers in the executive and legislative branches and members of the academic, corporate, diplomatic, and media communities value TWQ as a source of incisive and independent thinking about global political and security challenges and policies.

CurryGuide - New Generation MetaSearch Engine and Web Portal

<http://web.curryguide.com/>

CurryGuide.com web portal was initially launched in 1997 as a showcase metasearch engine for products and solutions marketed by their development division at CurryGuide Services. Services included a feature rich metasearch engine with (optional) searching by country; first to be implemented in a metasearch engine. Other new introductions included 'VSE' (virtual search engine); a concept later to be embraced and followed by many others. Their 'BestSeller BookShop' has been a popular tool for many webmasters. Current version of curryguide.com is a fresh re-launch with most of the services modified and enhanced. It includes lots of new features, additional services and powered by our latest HMS metasearch technology. Further expansions are underway and new services and content channels are to added in coming days. Our UK portal will be re-launched by the end of the year and new country portals for Germany, Belgium, and Denmark are being planned. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Directtextbook.com - Shop for Textbooks

<http://www.directtextbook.com/>

Directtextbook.com is a textbook price comparison service that searches over 200 online bookstores, and shows students the lowest price for their book from each one. The prices include new, used, rental, and ebook textbooks. Students can also use their "buyback search" to help search for all the stores currently buying back their used textbooks, and get the most money when they sell them. This has been added to [Student Research Resources](#) Subject Tracer™ Information Blog. This has been added to [ShoppingBots and Online Shopping 2010](#) Subject Tracer™ Information Blog.

Parademo - A Parallel Democracy

<http://www.parademo.org/>

Parademo - a parallel democracy, is an academic project to investigate if computer technology can help to improve the voting process of our democracies. Currently one can vote around once in the four years, on one party. What if we could vote for more than one party? What if we can 'retract' our vote before the 4 years if we are not happy with the party. What if we also like to vote on some specific persons and topics, or even solutions? What if we know some colleagues or friends who are more knowledgeable on a certain

issue, perhaps we can delegate part of our vote on that topic to them? In Parademo, they focus on a simple solution: votes can be cut into smaller pieces by a voter, which can be placed not only on several parties, but also persons, issues and solutions. Although the ownership of the vote stays at the voter, the voter can decide to delegate some allowed part of the vote to another voter of which (s)he thinks has more expertise on that certain topic. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Open Applied Physics Journal

<http://www.bentham.org/open/toapj/>

The Open Applied Physics Journal is an Open Access online journal which publishes research articles, reviews and letters in all areas of applied physics. The journal will cover both experimental and theoretical applications of physics to all branches of science. The Open Applied Physics Journal is a peer-reviewed journal which aims to provide the most complete and reliable source of information on current developments in applied physics. The emphasis will be on publishing quality papers rapidly and freely available to researchers worldwide. Abstracts available online. Articles available in PDF format.

Feeling.com - Tell Your Friends and the World How You Are Doing

<http://www.Feeling.com/>

Journal of Experimental Neuroscience

http://www.la-press.com/journal.php?journal_id=131

Journal of Experimental Neuroscience is a peer-reviewed, open access journal that publishes original papers on nervous system structure and function, from molecular to behavioral levels of inquiry. The five general areas of focus for the Journal of Experimental Neuroscience are:

1. Molecular, Cellular and Developmental;
2. Systems and Computational;
3. Cognitive and Behavioral;
4. Plasticity and Repair;
5. Diseases and Disorders.

All articles will be considered for publication; however, preferential consideration will be given to reports of significant interest to the broad neuroscience community. Mini- and full-length reviews are typically invited by the Editor-in-Chief, however, unsolicited work will be considered. Abstracts available online.

Zaplee - VOIP Call Center Solution

<http://www.zaplee.com/>

Zaplee runs on Skype and provides an enterprise call center for small to medium sized businesses. Zaplee was founded in 2005 with the simple mission of enabling small to medium sized businesses implement call centers without the need for expensive software, services, and infrastructure. Their unique product leverages some of the most advanced technologies to provide a SIMPLE platform to achieve this mission. While the product is still in beta-release, this goal has already been realized by several companies, case studies have been provided in the Customers section. International Journal of Computer Networks & Communications (IJCNC)

<http://airccse.org/journal/ijcnc.html>

The International journal of Computer Networks & Communications (IJCNC) is a quarterly open access journal that publishes articles which contribute new results in all areas of Computer Networks & Communications. The journal focuses on all technical and practical aspects of Computer Networks & data Communications. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on advanced networking concepts and establishing new collaborations in these areas. Authors are solicited to contribute to this journal by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the Computer Networks & Communications. Topics of interest include, but are not limited to, the following:

- * Network Protocols & Wireless Networks
- * Network Architectures
- * High speed networks
- * Routing, switching and addressing techniques
- * Next Generation Internet
- * Next Generation Web Architectures
- * Network Operations & management
- * Adhoc and sensor networks
- * Internet and Web applications
- * Ubiquitous networks
- * Mobile networks & Wireless LAN
- * Wireless Multimedia systems
- * Wireless communications
- * Heterogeneous wireless networks
- * Measurement & Performance Analysis
- * Peer to peer and overlay networks
- * QoS and Resource Management
- * Network Based applications
- * Network Security
- * Self-Organizing Networks and Networked Systems
- * Optical Networking

- * Mobile & Broadband Wireless Internet
- * Recent trends & Developments in Computer Networks

Open Access Peer Reviewed Medical Journals

<http://www.la-press.com/>

Open access journals on clinical medicine, bioinformatics, biology, chemistry, pharmacology, gene signalling, systems biology, informatics, virology, substance abuse, computational biology, and translational science. This has been added to [Healthcare Resources](#) Subject Tracer™ Information Blog.

RADAR - Open Searchable Archive of Brookes Research

<http://radar.brookes.ac.uk/radar/>

RADAR provides both an open searchable archive of Brookes research, and a flexible way to manage and share teaching materials. It forms part of the university's strategy to support research-informed teaching. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

Roman Legal Tradition: A Journal of Ancient Medieval and Modern Civil Law

<http://www.romanlegaltradition.org/>

The journal aims to promote the study of the civilian tradition in English. The editors welcome contributions on any aspect of the civilian tradition in ancient, medieval, and modern law. Roman Legal Tradition is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

One Billion Minds - Innovative Solutions to Challenging Problems in Business, Technology and Social Innovation

<http://www.onebillionminds.com/>

One Billion Minds is a powerful open innovation platform connecting Students and Alumni from top universities to Corporations and Non Profits looking to discover innovative solutions to challenging problems in Business, Technology and Social Innovation. The best minds and ideas don't necessarily reside within the organization. Corporations and Non Profits increasingly look outside organizational boundaries to identify ideas and people that can create bridges for them to their future. The One Billion Minds mission is to engage a billion young people to change the world by solving real problems posed by Corporations and Non Profits. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Viewsflow - Multiple Perspectives, Analysis and Insights Into Global Business

<http://www.viewsflow.com/>

Launched in fall 2009, Viewsflow adds a new twist to traditional business media portals. Their goal is to bring you multiple perspectives, analysis and insights into the world of global business. Viewsflow allows you to: a) Track opinions and analysis of the world's leading influencers, from well-known global publications and little-known bloggers alike; b) Get access to insights in real time, without the limits of single-publication editorial framework; c) Filter stories by broad themes matching your interests; d) Leverage the power of social media to share your insights; and e) Enhance your professional network through identifying with members with similar preferences. Coupling their proprietary technology with the power of human editors, they deliver something distinct from the majority of business news platforms out there: 1) They are not a stock picking site, nor a general news site. We are designed to help you stay on top of the flow of business information impacting the world; 2) They focus on views, opinion and analysis rather than just news. They try to uncover not only the what, but the how, why, and what next; and 3) They invest actively in content sourcing; and also welcome and encourage user contribution. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

Wibiya Platform

<http://wibiya.com/>

Wibiya enables blogs to integrate the most exciting services, applications and widgets of their choice into their blog through customized web-based toolbars. Their platform offers a one-stop solution for integrating, managing and tracking third-party applications. Currently they offer a fixed set of tools such as creating a blog community via facebook connect, enabling twitter alerts on your blog and enabling post navigation but there is a lot to wait for as they will be adding more and more application through time. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to [Bots Blogs and News Aggregators Resources](#) page. This has been added to [Social Informatics](#) Subject Tracer™ Information Blog.

Mycoscience

<http://www.springer.com/life+sci/microbiology/journal/10267>

Mycoscience is the official English journal of the Mycological Society of Japan and is issued bimonthly. Mycoscience publishes original research articles (full papers, short communications, and notes) and reviews on various aspects of fungi including yeasts and other organisms traditionally studied by mycologists. The research covered ranges from purely scientific interests such as systematics (taxonomy by traditional methods and systematics by molecular methods), evolution, phylogeny, morphology, ecology, physiology, biochemistry, genetics, and molecular biology, to such agricultural, medical, and industrial applications as pathology (human, animal, and plant), pharmaceuticals, food processing, and other biotechnologies. Coverage extends to new and improved applications of well-established mycological techniques and methods.

Sency - Real Time Search

<http://www.sency.com/>

User generated content continues to become more prevalent across the web as more and more users post information online. Such information has spawned "real time search" as a powerful way to navigate the web. Real time search produces real time thoughts. While traditional search engines scour the web for relevant websites, real time search engines return the most recent conversations, comments, and links from internet users. There will continue to be a place for web based search engines such as Google and Yahoo, however real time search engines can offer something unique. Granted, if you want to buy sneakers online, Google will bring up several relevant websites which sell sneakers; however, if there is a hurricane in Miami, real time search can give you a window into what people in Miami are experiencing right now. Another example is a sporting event, if the Yankees lose a big game, a real time search engine will allow you to hear what the fans are saying about the Yankees at this given moment. For these reasons, real time search is here to stay as it offers a different type of user experience when compared to the major search engines. Sency was created to help you easily navigate the real time web. At any time, they allow you to see what is going on right now with any person, place, or subject matter. To use Sency, simply enter in whatever you want into the search box and click search, and you'll get real time results powered by real people. Also, at the bottom of the Sency home page, they have highlighted topics which may be of interest to you. You can look at what is going on right now, which shows you the hot topics of this given moment. You can also see the most popular topics of late. In addition, they also show you today's most popular links for any respective search query. A major goal of Sency is to continue to refine their results to bring you the most relevant information for a particular search query. They have implemented a spam filter to prevent irrelevant links from showing up in their engine. You can check out their search tips to learn more about the types of searches you can execute on their site. Websites that want to place real time results on their pages can do so through their feed for websites. The feed allows any website to display real time information for any subject matter. Web publishers can add this automatically updating information to their site via the free feed. They also offer a popular links feed for websites and blogs which display today's most popular links for a respective search term. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

WordsCloseTogether.com - Meaningful Precision Search for Text Data

<http://www.wordsclosetogether.com/>

WordsCloseTogether.com is releasing in stages a text search engine, together with all the software needed so that anyone who wishes may prepare / index / share / publish any quantity of text content, so that any target audience may easily find meaningful results. This technology is offered as an alternative to the well known search engines, in the belief that some users might prefer Words Close Together relevance ranking. Their method takes into account a simple fact about language. Ideas are expressed in words. When the words you search for are widely scattered -- maybe paragraphs apart -- they are not related to the idea you are after. It is worse than useless for a search engine to offer

results in which the desired words are far apart; you are left to dig through irrelevant results to get at what you are after. Their technology filters out the words-far-apart results. Words Close Together presents only the results in which the words you ask for are close together, and it ranks the results so that the closer the words are together, the nearer a result is to the top of the list. This form of relevance ranking makes it very likely that the results at the top are meaningful and that they relate directly to the idea you have in mind. Over 14,000 examples of the first stage have been released so that people may experience this alternative search both on personal computers and over the Internet. In late 2008, many programs used to extract and format text were released publicly to the Open Source community. This means that Information Technology specialists around the world have full access to the preparation source code. This creates business opportunities for IT specialists, while exposing them to the power of research-quality search. A fundamental value underlying this project is respect for people -- a belief that it is okay to give the user control of the search experience, to be transparent about relevance ranking (the basis for the order in which results are presented), and to treat users as something more than eyeballs for ads. Words Close Together resolves a technical problem that for decades has troubled the computer industry's attempts to deal with whether words are near one another in text. The standard method has been to open up every search result that contains the desired words, then check how close the words are within that result. The standard method multiplied the search effort by a factor of tens of thousands or more. This problem has been creatively solved; such waste of user's time is no longer necessary. Proximity-based meaningful results can be delivered with extraordinary speed. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [Data Mining Resources](#) Subject Tracer™ Information Blog. This has been added to [Bot Research](#) Subject Tracer™ Information Blog.

ForiSearch - Foreign Image Search

<http://www.forisearch.com/>

Expand your world with images from foreign websites the following way: a) Type words in your own language; b) Choose a foreign language; and c) Discover images that were described in the foreign language. You can even explore further by clicking the next language. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Transactions of the Japanese Society for Artificial Intelligence

<http://www.ai-gakkai.or.jp/jsai/english.html>

From 2001, JSAI separated the publication of technical papers into its "Transactions of the JSAI". These transactions are available for online access (papers are placed on the web once they are accepted), and also released as hardcopy once per year. Some of the papers in the Transactions are written in English, so they will be of interest to English speakers. Transactions of the Japanese Society for Artificial Intelligence is available free

of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

HiddenLevers - Scenario Analysis and Portfolio Planning for Investors

<http://www.hiddenlevers.com/>

What happens to your portfolio if interest rates rise to 10%? What about if oil prices spike up to \$150 per barrel? Do you know what impact health care reform could have on your portfolio? HiddenLevers can help you answer these questions and much more!

HiddenLevers ties together how different economic factors (levers) affect investments, empowering investors to plan for different economic scenarios. You can use HiddenLevers to test your portfolio against different scenarios, to find stocks which will perform well in a particular scenario, or to research investments and learn what factors might affect them. This has been added to [Financial Sources](#) Subject Tracer™ Information Blog.

Geo.me Solutions - Visual Intelligence

<http://www.geo.me/>

In late 2009 the UK Government launched an Open Data initiative, headed by Sir Tim Berners-Lee, along with a call for innovations challenging the developer community to make this data more accessible. In response, Geo.me Solutions is showcasing a number of concept demonstrations using map-based visualisations. The data set represented in the map below was released by the UK Met Office in December 2009. It consists of a network of individual land stations designated by the World Meteorological Organization for use in climate monitoring. The data show monthly average temperature values for over 1,500 land stations. Use the search forms or click markers on the map to find and view data for each land station, including its location, nearby stations, current weather and a plot of monthly average temperatures stretching back more than 300 years in some cases. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

SynchTube - Watch Videos With Friends/Associates In Real Time

<http://www.synchtube.com/>

Ever want to share a video with your friend, family or associate, but wish you were there with them to watch so you could enjoy/participate the moment together? synchtube solves this problem by allowing you to share a video in real-time. Simply paste a YouTube link and create a room. You can share this room with others, and watch videos in real-time... This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

IMG4Me - Text To Image Free Service

<http://www.img4me.com/>

Do not surprise if you are getting a lot of results when searching your personal e-mail address with Google. IMG4Me is an online tool to protect your private information from collected by crawlers by converting your text into image. It's important to protect your private information online. Securing your e-mail address to convert it into image can prevent spammers from sending junks into your inbox. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

Watch™ Paper Review

A Persistence Paradox By Fang Wu, Bernardo Huberman

<http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2776>

Abstract:

It is widely believed that persistence in most endeavors is essential to their success. By its very nature, persistence enhances both the quality of an outcome and its probability of success because people are willing to endure failures before achieving a desired goal. To test this hypothesis on a massive scale, we studied the production histories and success dynamics of 10 million videos uploaded to a popular video Web site. Our results reveal that while the average quality of submissions does increase with the number of uploads, the more frequently an individual uploads content the less likely it is that it will reach a popularity threshold. These paradoxical findings, which hold both at the aggregate and individual levels, throw light on the act of production in the attention economy.
