

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V9N4

April 2011

Welcome to the V9N4 April 2011 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Deep Web Research**. This is a comprehensive miniguide of reference resources covering deep web research currently available on the Internet. The below list of sources is taken from my Subject Tracer™ Information Blog titled Deep Web Research and is constantly updated with Subject Tracer™ bots at the following URL:

<http://www.DeepWeb.us/>

These resources and sources will help you to discover the many pathways available to you through the Internet to find the latest reference deep web resources and sites.

Deep Web Research

Bots, Blogs and News Aggregators (<http://www.BotsBlogs.com/>) is a keynote presentation that I have been delivering over the last several years, and much of my information comes from the extensive research that I have completed over the years into the “invisible” or what I like to call the “deep” web. The Deep Web covers somewhere in the vicinity of 1 trillion plus pages of information located through the world wide web in various files and formats that the current search engines on the Internet either cannot find or have difficulty accessing. The current search engines find hundreds of billions of pages at the present time of this writing.

In the last several years, some of the more comprehensive search engines have written algorithms to search the deeper portions of the world wide web by attempting to find files such as .pdf, .doc, .xls, ppt, .ps. and others. These files are predominately used by businesses to communicate their information within their organization or to disseminate information to the external world from their organization. Searching for this information using deeper search techniques and the latest algorithms allows researchers to obtain a vast amount of corporate information that was previously unavailable or inaccessible. Research has also shown that even deeper information can be obtained from these files by searching and accessing the “properties” information on these files!

This report and guide is designed to give you the resources you need to better understand the history of the deep web research, as well as various classified resources that allow you to search through the currently available web to find those key sources of information nuggets only found by understanding how to search the “deep web”. This **Deep Web Research** report and guide is divided into the following sections:

- Articles, Papers, Forums, Audios and Videos
- Cross Database Articles
- Cross Database Search Services
- Cross Database Search Tools
- Peer to Peer, File Sharing, Grid/Matrix Search Engines
- Presentations
- Resources - Deep Web Research
- Resources - Semantic Web Research
- Bot Research Resources and Sites
- Subject Tracer Information Blogs

eJournal of eDemocracy and Open Government (JeDEM)

<http://www.jedem.org/>

The open access eJournal of eDemocracy and Open Government (JeDEM) provides a platform for all those interested in discussing issues and challenges democratic societies face today. It promotes contributions within an emerging science of the information age following the highest standards of peer review. It is a journal that focuses on

- * Policy and Legislation
- * Political Science
- * Business Information Technology
- * Business and Economy
- * Cyberpsychology
- * Usability
- * eDemocracy
- * eSociety
- * eGovernment
- * eParticipation
- * eVoting

with a special interest in critical studies in these thematic fields. Papers should present findings in relation to democratic usability and encourage user centred thinking in a global, sustainable and participatory information society. It is the journal's mission to encourage transdisciplinarity, unconventional ideas and multiple perspectives, and connect leading thinkers and young scholars in inspiring reflections. JEDEM is an innovative journal that welcomes submissions from all disciplines and approaches. They publish theoretical, practical and empirical research. Besides peer-reviewed papers, they publish reflections on current issues, reviews of books, comments on articles, discussions, interviews, etc that are related to the journal's mission. Papers accepted in German or English.

Piyyem - Questions Answered from Expert Friends

<http://www.piyyem.com/>

Piyyem is a great application to get answer for your questions. On piyyem, you can group your friends according to their abilities, and ask your question to appropriate group(s). If you have a question and some of your friends are qualified to answer that question, then group these friends and ask the question to that group. When you asked the question then all of your friends in the group are notified, and you will get an answer one of these friends. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

WikiRiver.org - All the News About WikiLeaks In One Place, Updated In Real Time

<http://www.wikiriver.org/>

All the news about WikiLeaks in one place, updated in real time. Programmed by Dave Winer, using the River2 aggregator running in the OPML Editor. Interface design and development by Nicolas Gallagher building on the work shared by Martin Duffy in his jQuery templating tutorial. Collaborative development on the River Of News mail list by Shawn McCollum, Ken Booth, Daniel Bachhuber, Havagan and Martimedia. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

Google Public Data Explorer

<http://www.google.com/publicdata/home>

The Google Public Data Explorer makes large datasets easy to explore, visualize and communicate. As the charts and maps animate over time, the changes in the world become easier to understand. You don't have to be a data expert to navigate between different views, make your own comparisons, and share your findings. This is a Google Labs project, which means it's work in progress. They are making it available now to gather feedback, but also to get in contact with public data providers who want to try publishing some data on this new platform. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Researchers World: Journal of Arts Science & Commerce

<http://www.researchersworld.com/>

Researchers World - Journal of Arts Science & Commerce is an open access peer review quarterly research journal that publishes articles in the field of Arts Science & Commerce. It is an international journal intended for Professors, scholars, academicians, professionals and students engaged in the area of Arts Science & Commerce Research.

Kwout - Brilliant Way To Quote

<http://kwout.com/>

Kwout is a way you quote a part of a web page as an image with an image map. To use this service, all you need is to add their bookmarklet to your favorite browser then a) Grab a Screenshot - Click our bookmarklet on a web page you wish to quote, and the screenshot of the entire web page will be popped up. (The size of the screenshot can be selected from small, medium or large.); b) Cut Out an Area - By dragging a mouse on the screenshot, select an area you wish to quote, and click the "Cut Out" button. Then the area you selected will be cut out as an image with an image map (hyperlinks); and c) Post It To Anywhere - Finally, the embed code, which is used to post the image (with the image map) to your web site, will be displayed. In addition, you can post it directly to Twitter, Facebook, Tumblr, and so on. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Magazinify - Convert Your Bookmarks and Favorite Articles Into a PDF

<http://magazinify.com/>

If you ever find yourself missing out on some interesting articles because you wanted to read something later and forgot, then Magazinify is for you. Magazinify seamlessly organizes all the articles you wish to read into beautiful text, order, removing all the annoying ads and pop-ups, converts it to pdf format and mails you the magazine at the end of the day. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

TwitNovels - Make a Novel More Social

<http://www.twitnovels.com/>

TwitNovels is a service that allows you to read and co-write a novel easily with Twitter account. On TwitNovels, you can write a continuation of any page of any novel. When you find a novel you like on TwitNovels, write an another story of it! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ELiSS: Enhancing Learning in the Social Sciences

<http://www.eliss.org.uk/>

The mission of ELiSS is to provide a forum for pedagogic research within the social sciences, and to utilise the opportunities afforded by new technologies to present this research in new and innovative ways. The journal seeks to attract the following:

- * A critical analysis of teaching and learning which takes account of national and international developments
- * Reflections on practice which can inform and support others
- * Exemplars of innovations which are theorised and supported through scholarship
- * Engagement with theoretical debates within the social sciences which inform learning and teaching
- * Exploration of the dynamic and changing processes in teaching and learning.

ELiSS is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML and PDF format.

easy2comply - Governance, Risk and Compliance Tools

<http://www.easy2comply.com/>

easy2comply online enterprise GRC software is a great solution for organizations of all sizes seeking to simplify their compliance and risk management processes. There are 5 product families of online application suites, available either on-demand (SaaS) or for on-site installation. easy2comply provides solutions to Risk Management (i.e Basel II, Solvency II), Internal Control (i.e SOX), Information Security, Internal Audit, as well as an Open GRC Compliance Framework to support additional compliance projects. easy2comply is tailored to meet compliance demands and complexities, while being easy to deploy, cost-effective and easily-customizable. RemindThis - Free Reminder

<http://www.RemindThis.com/>

RemindThis was established in 2010 by a group of entrepreneurs who found the way to make visitors return and visit websites. The use of RemindThis is simple, efficient, powerful and easy to implement. Moreover, the service is given free and helps many websites around the web to increase traffic to them and also to pleasantly and quickly remind them to return to websites they were interested in. Not once do we visit by chance or after a scrutinized search, a website and find interest in it. We're interested in returning to visit that same site a week from now, a month, or in a specific date; adding the website to the favorites list will cause it to disappear among dozens of other websites we've added. Turning on RemindThis will remind us to visit the website exactly in the date we want to. Thus for example, if we browsed in a website offering birthday gifts and we've tracked down a cool product that fits exactly to our partner, but his\hers birthday is only three months from now – there is no better way than RemindThis to remind us a few days in advance to revisit the website. The benefit is great even for both the site owner and the surfers. The popularity of RemindThis increases every day thanks to the huge trust of website owners and visitors who join the service and enjoy a statistical system to inspect traffic coming to the website thanks to RemindThis reminders. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

A World of Tweets - Real Time Visualization of Geolocated Tweets Around the World

<http://aworldoftweets.frogdesign.com/>

A World of Tweets is all about playing with geography and bits of information. Simply put, A World of Tweets shows you where people are tweeting at from the past hour. The more tweets there are from a specific region, the "hotter" or redder it becomes. This continuous collection of Twitter statuses also allows for the presentation of other interesting visuals as well as statistical and historical data about the tweeting world we live in. Through the activity of Twitter users it is possible to tailor a new map of the world that evolves during the day according to the timezones and the spreading of mobile technologies. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

International Journal of Proteomics

<http://www.hindawi.com/journals/ijpro/>

International Journal of Proteomics is a peer-reviewed, open access journal that publishes original research articles as well as review articles in all areas of proteomics.

INFOdocket - Information Industry News + New Web Sites and Tools From Gary Price and Shirl Kennedy

<http://infodocket.com/>

INFOdocket is compiled and edited by Gary Price and Shirl Kennedy. The site is free to access. Before launching InfoDocket, Price and Kennedy were the founders and senior editors at ResourceShelf and DocuTicker for 10 years. The site is updated as often as possible during the week and at least once a day on the weekends. FreeFullText.com is the sister site of InfoDocket. There you'll find direct access to new and free full text reports from think tanks, governments around the world, academia, as well as from other sources. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

BoardReader - Connecting Communities Through Search

<http://boardreader.com/>

BoardReader connecting communities through search. Comprehensive Board Search Engine covering the following areas: a) Topics, b) Forums, c) Images, d) Videos, e) MicroBlogs, f) IMdb, g) Yuku and h) Lefora (free forums). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

HyperAlerts - eMail Alerts of Posts and Comments on a Facebook Page

<http://www.hyperalerts.no/>

Hyper Alerts is a feature for everybody who wants email reports of posts and comments on a Facebook Page. You don't have to be an administrator of the page to get their email alerts, and you can have as many subscriptions as you want. You can get the alerts within minutes, or a digest every hour, day, week or month. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Journal of Economics and Behavioral Studies (JEBS)

http://www.ifrnd.org/journals_jebs.htm

Journal of Economics and Behavioral Studies (JEBS) publishes research work related to business, economics, behavioral studies and other relevant areas. The research studies in JEBS address emerging issues and developments in local and international business world. JEBS encourages submission in but not limited to subjects of micro, macro and development economics, managerial and financial economics, finance, economics and financial psychology, accounting, strategic management, organizational behavior, marketing, human resource management, behavioral finance and management information systems.

TigerText - Secure Mobile Messaging

<http://www.tigertext.com/>

When sending a regular text message or picture over mobile phones, you have no control over how long it will live on the recipient's phone or the cell phone servers. TigerText is different because, even though it looks and feels like a normal text message, the sender controls when the message is deleted. Reclaim the privacy of your text messages and pics! This has been added to [Privacy Resources](#) Subject Tracer™.

Doomi - A To Do List Application

<http://www.doominow.com/>

Doomi was designed from the ground up to stay out of your way and out of your browser. It has all the features you use, and none of the ones you don't. Create, edit, set reminders, and keep archives of your old tasks. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Voice Map

<http://www.bl.uk/evolvingenglish/mapabout.html>

They need your voice. By adding your voice you can help with research into how language works. They hold recordings that capture the sounds of spoken English all over the world. They are asking people all over the world to read a children's story: Mr. Tickle by Roger Hargreaves. It's been chosen for the range of English sounds it contains when read out loud. Read more about why they chose it. Alternatively, you can just read out a list of six words. If you are keen, you may read both. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Diversities

<http://www.unesco.org/shs/diversities>

Diversities is a scholarly and professional journal, published by UNESCO, to provide a platform for international, interdisciplinary and policy-related social science research in the fields of migration, multicultural policies, and human rights. Established by UNESCO's social sciences research and policy division in 1998, it aims at improving the linkages between academic communities in various regions and across different social science disciplines. One of its particular features is to promote the policy-relevance of social science research. Each issue is devoted to a coherent thematic debate on a key issue in the field of migration and multicultural society. Diversities is available free of charge as an Open Access journal on the Internet. Content available in PDF format.

emailerr - Protect Against Spambots

<http://www.emailerr.com/>

Emailerr is a simple application that helps you protect your email address from spambots when making your email address public. They take your email address and generate 4 different usable outputs: permalink, direct image, Javascript encoded, HTML encoded. You can then use any one of those outputs to show your email address publicly. Emailerr is absolutely free to use, so go ahead and protect your email address from spammers. This will be added to [Privacy Resources](#) Subject Tracer™ Information Blog. This has been added to the Anto-SPAM section of [Internet Hoaxes](#) Subject Tracer Information blog.

Zoho Recruit - Applicant Tracking System

<http://www.zoho.com/recruit/>

Zoho Recruit is an easy-to-use Applicant Tracking System that helps staffing agencies and recruiting departments track job openings, resumes, candidates and contacts more quickly and efficiently. Zoho Recruit allows you to spend less time on the process and more time on what you do best: getting the right candidate. This has been added to [Employment Resources](#) Subject Tracer™ Information Blog.

yutongo - Ongrowing Ideas

<http://ideation.yutongo.com/>

yutongo is the best place to develop ideas for different creative challenges by using ideation process with a systematic approach. A challenge is a certain problem that needs a creative solution. By using the ideation process of yutongo you can solve any creative problem as finding a name, coming up with a smart product or service idea or even finding an intelligent solution for complex technical problems. Process includes: a) Idea Boost - In the Idea Boost many different idea fragments and inputs will be collected. Therefore, participants will encounter inspiration focused questions - answer them in a creative way! It is the nature of our process that these inspiration questions do not always relate to the creative challenge; b) Idea Compression - The Idea Boost is followed by the Idea Compression. In the Idea Compression, you will find all the idea fragment and input material which has been collected before by you and other members of the yutongo community participating in a particular challenge. Now, it is your task to describe surprising ideas related to a particular challenge by combining idea fragments creatively and by discovering the gems in the inspiration material; and c) Evaluation - Finally, you are asked to rate ideas created by others on a ranking scale (1 - 5) and to make comments on ideas. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

International Journal of Computational Engineering and Management (IJCEM)

<http://www.ijcem.org/>

The International Journal of Computational Engineering and Management(IJCEM) is a peer reviewed international journal with a key objective to provide the academic and industrial community a medium for presenting original cutting edge research related to computational and management areas and its applications. IJCEM invites authors to submit their original and unpublished work that communicates current research on computational and management areas both the theoretical and methodological aspects, as well as various applications in real world problems from science, technology, business or commerce. International Journal of Computational Engineering and Management is available free of charge as an Open Access journal on the Internet. abstracts available online. Articles available in PDF format.

Said.fm - Audio That Moves You

<http://www.said.fm/>

Good listening recommendations are no longer hard to find. Said.fm is your trusted channel for excellent audio programs. Discover, enjoy, collect and sync to your mobile devices. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

DiscoverText - Import, Sort, Distribute and Analyze Electronic Content from eMail, Document Repositories, and Social Media

<http://discovertext.com/>

DiscoverText is Web-based software engineered for the task of reviewing public comments as well as many other types of textual data. If you have lots of digitized text, you can form a team of peers, create a project, upload data, discover important themes and issues, and organize your analysis with DiscoverText. This system is the end product of ten years of NSF-funded public comment classification work by Dr. Stuart W. Shulman, who has published numerous peer-reviewed papers on the subject. A few reasons to try DiscoverText: 1) The system is fast, secure and scalable; 2) This is currently a free service in beta testing based on award-winning research software; 3) It extends carefully researched principles of efficiency, accuracy, validity, usability, and transparency; 4) It leverages a novel new approach to integrating credentials and distributed work flow; 5) It is equally useful to public and private actors and accessible to all; 6) It allows you to show or share your work with anyone on the system, or keep it private; and 7) It deals a blow to the tyranny of carpal tunnel causing mouse-clicks. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Web Data Extractors](#) White Paper.

Twapper Keeper - Tweet Custom Archives

<http://twapperkeeper.com/>

Do you want to archive tweets from your conference? Maybe archive trending hashtags or keywords for historical or analysis purposes? Maybe save your own personal tweets? Twapper Keeper is here to help! How does it work? 1) Create a new Twapper Keeper archive based upon hashtag, keyword, or person; 2) Tell your friends about the archive; and 3) Read, track, export, and analyze as much as you want! They currently archive over ONE BILLION tweets across 14,000+ keywords, hashtags, and persons. Check out some of the most recently created archives... This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

International Journal of Dream Research (IJODR)

<http://archiv.ub.uni-heidelberg.de/ojs/index.php/IJoDR/index>

International Journal of Dream Research (IJODR) focuses on original articles about dreaming, lucid dreaming and psychological aspects of sleep in general. The scope of the journal is to publish peer-reviewed papers in the field of dream research including topics like dream recall, dream content, nightmares, lucid dreaming, dreaming in children and psychological aspects of sleep in general. In addition to empirical papers, comprehensive reviews and book/media reviews are also encouraged. International Journal of Dream Research is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. Content in English.

Dhiti - Content Discovery Engine for User Engagement

<http://dhiti.com/>

Dhiti enhances the user experience for your readers, helping them to engage, discover and stay longer on your site. Features include: 1) Smart Recommendations - Contextual recommendations powered by a real time semantic engine, highly relevant and extremely useful; 2) Co-Discovery - Popular exploration trails trigger reader curiosity, and makes your site better explored; 3) Guides Navigation - Information in your site is organized into nuggets and its relevant concepts, aiding easy navigation - covering the breadth of your site; 4) Content Strategy - Insights into reader interests and trails will influence your content strategy; 5) Automatic Content Enrichment - Topics which have excellent coverage on your site are automatically hyperlinked, increasing the value of every article; and 6) Hassle Free Installation - Self serve on popular publishing software, and a simple HTML script for others. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [eCommerce Resources](#) Subject Tracer™.

140kit - Free Open Source Twitter Analytics Platform

<http://140kit.com/>

Come to this site with a search term in mind (like "Justin Bieber", "#IranElection", or "@aplusk"), and choose a time frame of up to a week for collecting Tweets that include your term. You can also collect tweets from specific users by passing us a list of comma-separated names (like "aplusk,dgaff,140kit,shitmydadsays,cnnbrk") and they will collect all of their tweets since the day they created their account. Also, if you just want to dabble quickly, you can curate collections by stringing together multiple existing data sets (like all the data sets that searched the term "lol"), and view the analysis conducted as a result of this curation. They use their cluster of machines to collect your data using their access to the Twitter API. If you search for tweets with a term, they employ the streaming API to collect data in a distributed fashion. When your data collection is finished, depending on your access level, they conduct an array of analytics on the data set, ranging from the ordinary dump of data in MySQL/CSV to Network graph visualizations, gender breakdowns, and more. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business](#)

[Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Web Data Extractors](#) white paper.

iSolon.org - Democracy for the Information Age

<http://isolon.org/>

iSolon.org seeks to bring paradigm-changing ideas on the policy implications of new information technologies to the fore of public discussion. New information technologies are creating great opportunities for democratic reform that are not being exploited because elected officials have a conflict of interest in using those technologies to make themselves more democratically accountable. iSolon.org studies how that conflict plays out in the design of democratic institutions and analyzes mechanisms, including the use of state constitutional conventions, redistricting juries, citizen assemblies, and semantic web ontologies to solve the conflict of interest problem. iSolon.org is a non-profit, non-partisan, tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

Advances in Materials Sciences

<http://www.versita.com/asmse/>

Advances in Materials Sciences is an internationally recognized source of up to date materials science information. The preferred topics include: environmental degradation, surface engineering and advanced materials in scope of fundamental aspects of materials science and engineering, and application problems. Content in English. Advances in Materials Sciences is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

WebReader - Full Featured Desktop Client for Google Reader

<http://www.getwebreader.com/>

WebReader allows you to sort subscriptions (rss,feed) and keep them organized into folders. You can also choose between 3 articles view modes: Full, Summary and Titles. This desktop application will notice you when something new appears. You can subscribe to your favorite sites and blogs for new content. Webreader helps you search through all subscriptions, starred items, folders and even specific one. Sharing a news story via email, Facebook, Twitter is as easy as 2 clicks. If the text is too small, you can easily resize it. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ReSearch.ly - Instant Communities in Real Time with Viral Analytics and Viral Search

<http://research.ly/>

They believe that search is a social act which relies on trust, and community. On the social web, communities form instantly around ideas, we just don't always see them, or have the context to understand which conversations to trust. ReSearch.ly solves this by creating instant communities while you write, engage, or search on twitter, providing you with the most relevant, and reliable information. Every search is a sharable object with its

own URL, encoded with the filtering, analytics, and community information you choose. By showing the context around information, ReSearch.ly allows you to dig deeper and with greater precision through Deep Search. You see the conversation before you write about it, understand the context before you trust it. and socialize the search when you want more. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

The Plant List

<http://www.theplantlist.org/>

The Plant List is a working list of all known plant species. Version 1 aims to be comprehensive for species of Vascular plant (flowering plants, conifers, ferns and their allies) and of Bryophytes (mosses and liverworts). Collaboration between the Royal Botanic Gardens, Kew and Missouri Botanical Garden enabled the creation of The Plant List by combining multiple checklist data sets held by these institutions and other collaborators. The Plant List provides the Accepted Latin name for most species, with links to all Synonyms by which that species has been known. It also includes Unresolved names for which the contributing data sources did not contain sufficient evidence to decide whether they were Accepted or Synonyms. The Plant List includes 1,040,426 scientific plant names of species rank. Of these 298,900 are accepted species names. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Reference Resources](#) Subject Tracer™ Information Blog.

Information Management and Business Review (IMBR)

http://www.ifrnd.org/journals_imbr.htm

Information Management and Business Review (IMBR) is an open access peer reviewed journal and publishes original unpublished research work related to contemporary business, information management and other relevant areas. The research studies in IMBR address emerging issues and developments in domestic and international business world. IMBR encourages submission in but not limited to subjects of finance, accounting, financial psychology, marketing, information management and human resource management.

Room 77 - Personalized Hotel Room Recommendations

<http://www.room77.com/>

Your hotel stay begins and ends with your room. Yet when it comes to selecting a room, travelers are left with little transparency or control. They set out to change that uncertainty by creating the world's first database of hotel rooms. With the belief that choice and transparency are key to improving travel experiences, Room 77 offers room recommendations matching your preferences. Along with that goal, here are three truths they recite every day. Room 77 makes it easy to find the hotel room that's right for you. We've mapped virtually every floor in a given hotel, so you can see for yourself how they're laid out. Don't like to be near the elevator? No problem. Prefer an ocean view? Got it. Explore a hotel with their maps and expert advice, from the comfort of your seat

concepts. International Journal of Grid Computing & Applications is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

ForeUI - Easy To Use UI Prototyping Tool

<http://www.foreui.com/>

ForeUI is an easy-to-use UI prototyping tool, which can create mockup/wireframe/prototype for the application or website in your mind. Your prototype will be skinnable and you can change its style by switching the UI theme. You can design the behavior of prototype by defining intuitive flow charts to handle specific events. The prototype can be exported to wireframe images, PDF documents or DHTML simulation, which will be very useful for idea sharing, design review, feedback collection or usability testing etc. ForeUI works in Windows, Mac OS X, Linux, Solaris and web browsers that support Java. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

In4Grants

<http://www.in4grants.com/>

The In4Grants pre-award grant-management system combines the power of online search, social media and application software. It's designed to drive more funding revenue for universities, local governments, incubators and other organizations. It's proven to give grant seekers substantially more time to craft winning proposals. In4Grants is as easy to use as any social-networking site. Unlike expensive enterprise software, it requires zero IT support or in-depth training. And unlike "kitchen sink" research-administration solutions, In4Grants is focused on the pre-award process—offering a centralized workspace to manage everything associated with winning a grant. Grant seekers can expect: a) Discovery of more targeted funding opportunities at least 50 percent quicker than manual searches and with substantially more fine-tuning than any automated grant email service; b) project-based collaboration with selected peers using familiar social-networking tools, rather than just emails; and c) Automated tracking capabilities that finally end the need for cumbersome filing, disconnected spreadsheets and generic document-sharing sites. This has been added to [Grant Resources](#) Subject Tracer™.

Pudget - Science at Speed

<http://corporate.pubget.com/>

Pubget is the search engine for life science PDFs. Pubget makes scientific research easier by simplifying the process of finding, managing and analyzing scientific papers. The core solution at www.pubget.com provides article-level tools making content discovery, access and copyright management much easier for the user. Pubget's corporate services offer relevant banner and contextual advertisement for marketers and search services for libraries and R&D departments, including repository and text mining platforms. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Data Mining Resources](#) Subject Tracer™.

Journal of Advanced Bioinformatics Applications and Research

<http://bipublication.com/JABAR.html>

Journal of Advanced Bioinformatics Applications and Research is an Open Access, peer-reviewed journal that considers articles on all aspects of the Analysis, algorithm development, testing and novel application of multidisciplinary i.e. computational and statistical methods for analysis and solving of all kinds of biological complications. This Journal has broad vision about publishing the most exciting research with respect to the subjects of Bioinformatics.

UMapper - Create, Manage, Distribute and Monetize Online Maps

<http://www.umapper.com/>

UMapper is the first application of its kind; it is a visual, universal, web-based map authoring application. UMapper makes it easier than ever to create embeddable maps for Adobe Flash™ and distribute them through a website, blog, or social network.

UMapper's visual map editor enables users of any skill level to add points, draw shapes and add interactive overlays to a map. UMapper is powered by the UMap Component (Universal Mapping API for Adobe Flash™) from Advanced Flash Components.

Leveraging this technology allows us to provide a very stable development environment.

It also enables us to manage every aspect of UMapper's map creation and distribution process. With UMapper, you can display geo-data and any layer on top of any map data provider (Microsoft Virtual Earth, Google, Yahoo, OpenStreet, etc.). This makes

UMapper truly universal. UMapper utilizes advanced optimization algorithms for rendering vector shapes and displaying large data sets. These performance gains, along with the use of KML for data storage, make the UMapper maps efficient, flexible and

optimized for search engines. UMapper is an offshoot of Advanced Flash Components, based in Denver, CO. With several years of experience building custom components and interactive maps for a diverse audience of developers, designers and end-users, the

Advanced Flash Components team has built up a strong expertise in interactive map technology and rich Internet application development. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to

April 2011 Zillman Column - Semantic Web Research Resources

http://columns.virtualprivatelibrary.net/Semantic_Web_April11_Column.pdf

<http://www.zillmancolumns.com/>

<http://www.DeepWebResearch.info/>

The April 2011 Zillman Column is now available and is titled **Semantic Web Research Resources**. This April 2011 column is a comprehensive list of resources and sites that give you the latest and most important information concerning semantic web research available over the Internet including related and associated resources and sites. Download this excellent freely available 18 page .pdf (150KB) column today.

Google Code University - Google Code

<http://code.google.com/edu/>

This site provides sample course content and tutorials for Computer Science (CS) students and educators on current computing technologies and paradigms. Google Code University (GCU) does not require registration and materials are free to use. The site includes: a) Tutorials and Introductions that have few or no prerequisites; b) Courses on advanced or specialized topics; and c) Recorded videos lectures and talks and courses with the problem sets and exercises. All the courses on Google Code University are under the Creative Commons license, which makes it easy for educators to use for their own classes. Feel free to download documents, slides, and videos to use in your classes. This will be added to [Script Resources](#) Subject Tracer™. This will be added to [Tutorial Resources](#) Subject Tracer™.

NewsBlur - Feed Reader With Intelligence

<http://www.newsblur.com/>

NewsBlur is a feed reader with intelligence featuring: a) Read the original site or the RSS feed; b) Automatically highlight stories you want to read; and c) Filter out stories you don't want to read. NewsBlur allows you to learn how build and scale the entire web stack: front-end JavaScript, HTML5 layout, back-end view processing, large dataset schema migrations, relational and non-relational database clusters across multiple servers, and getting multiple machines to talk to each other. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

International Journal of Business Research and Management (IJBRM)

<http://www.cscjournals.org/csc/description.php?JCode=IJBRM>

As a peer-reviewed journal, The International Journal of Business Research and Management (IJBRM) invites papers with theoretical research/conceptual work or applied research/applications on topics related to research, practice, and teaching in all subject areas of Business, Management, Business research, Marketing, MIS-CIS, HRM, Business studies, Operations Management, Business Accounting, Economics, E-Business/E-Commerce, and related subjects. IJBRM is intended to be an outlet for theoretical and empirical research contributions for scholars and practitioners in the business field. International Journal of Business Research and Management is available

Website Optimizer by Google

<https://www.google.com/analytics/siteopt/splash?hl=en>

Website Optimizer is an easy-to-use tool for testing site content that delivers actionable results. Three of the many benefits that testing brings are as follows: 1) Testing makes it easy to get direct feedback from your site visitors. Their five minute demo explains how; 2) Testing makes it easy to increase your site effectiveness and visitor satisfaction, which leads to higher conversion rates and a higher return on your investments; and 3) With Website Optimizer, you can try any combination of content to find out what leads to the most conversions. Clear reports will tell you what worked the best. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

EASYLIZ - Rent Anything, Anywhere, Anytime

<http://www.easyliz.com/>

EASYLIZ.COM allows you to rent and rent out your goods or services. Linked to a calendar and location, your goods and services will be found and accessible for thousands of users who can reserve them. If you are a user, the use of EASYLIZ.COM is free of charge. They don't take any fees during the rental transactions or reservation. The owners pay an annual subscription that will guarantee the visibility of their objects. Key features include: a) Search of goods and services by location; b) Check for the availability with a calendar; c) View of the detailed description of the objects; d) Rent and rent out objects and service; and e) Evaluate and view the previous evaluations left by preceding users on objects, owners and users. This has been added to [eCommerce Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

BMJ Open

<http://bmjopen.bmj.com/>

BMJ Open is an online-only, open access general medical journal, dedicated to publishing medical research from all disciplines and therapeutic areas. The journal publishes all research study types, from study protocols to phase I trials to meta-analyses, including small or potentially low-impact studies. Publishing procedures are built around fully open peer review and continuous publication, publishing research online as soon as the article is ready. BMJ Open aims to promote transparency in the publication process

Footnote.com

<http://www.footnote.com/>

With access to well over 70 million documents, Footnote.com is quite the historical treasure trove. Footnote has partnerships with The National Archives, the Library of Congress, and other institutions. The whole endeavor started in 1999 (when it was known as iArchives), and today the site features interactive historical timelines, facts, and thematic collections. Visitors should just go ahead and type a term into their search engine to see what shows up, and if they have a temporal bent they can explore by historical era. The site also includes "Footnote Pages". Here visitors can use over 80 million pages of US government data to learn about local history, family history, or just about anything else. Also, visitors can use the site to browse pages created by other users. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. Vertabase - Web Based Project Management Software

<http://www.vertabase.com/>

Vertabase was founded in 1997 with a vision to offer innovative productivity solutions. First launched in 1999, Vertabase's flagship product Vertabase 4.5 provides advanced resource planning, easy-to-use project management, project tracking and comprehensive document management. Vertabase project management software organizes people and projects by simplifying, centralizing and accelerating access to critical up-to-date information. Vertabase project management software facilitates management by providing a framework for increased productivity. Vertabase is a web-based project management software solution by Vertabase. The project management software solution is online project management software which you can either host yourself (installed on your servers) or we can host it for you as ASP, On-demand or Software-as-a-Service (SaaS) project management software. It has some project management software features like MS Project, project management features that facilitate project planning, project tracking, scheduling and Gantt charts. But, customers find it much easier to use than tools like MS Project and, being an online project management software solution, it is project management software that works on both Windows OS and Mac OS. We are committed to our customers. Training, project management consulting and customer support come included with every purchase. Vertabase project management software has features like document management, online web-based timesheets, customizable project reports and graphs. Also, the project management software integrates with Quickbooks accounting software for faster, easier invoicing. It is used by industry leading companies to help manage projects in marketing, communications, web-development, IT and general operations or production. Virtual Library of Human Sciences

<http://www.bvce.org/>

The Virtual Library of Human Sciences offers free access to a set of virtual libraries developed by The Edelstein Center for Social Research or in partnership with other institutions. Their libraries includes more than 40.000 texts with search system by author or title and are constantly expanded. This has been added to [Reference Resources](#) Subject Tracer™ Informastion Blog.

MorgueFile - Public Image Archive for Creatives by Creatives

<http://www.morguefile.com/>

Free images for your inspiration, reference and use in your creative work, be it commercial or not! It's also easy to add your own photos to the morgueFile. So, give back because this archive is for creatives by creatives. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

FeedBackers.biz - Get Professional Feedback For Your Ideas

<http://www.feedbackers.biz/>

Feedbackers.biz is a service for individuals, startups, and companies seeking quick and professional feedback for their ideas, websites, business plans, marketing campaigns, and more. They provide you with a realistic and objective assessment, as well as recommendations, to ensure you will achieve better results. This has been added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

International Journal of Language Studies (IJLS)

<http://www.ijls.net/>

International Journal of Language Studies (IJLS) is the continuation of Iranian Journal of Language Studies (IJLS)--ISSN 1735-5184, eISSN 1735-7047--which was published until October 2009. International Journal of Language Studies (IJLS) is a refereed international journal publishing articles and reports dealing with theoretical as well as practical issues focusing on language, communication, society and culture. IJLS publishes contributions from researchers in all fields relevant to the study of language. The investigation of language and its communicational functions are treated as a concern shared in common by those working in anthropology, the arts, artificial intelligence, education, ethology, literature, linguistics, physiology, philosophy, psychology and the social sciences. International Journal of Language Studies is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. Content in English.

Atmosphere

<http://www.mdpi.com/journal/atmosphere/>

Atmosphere is an international and cross-disciplinary scholarly journal of scientific studies related to the atmosphere. It publishes reviews, regular research papers, communications and short notes, and there is no restriction on the length of the papers. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodical details must be provided for research articles. There are, in addition, unique features of this journal:

- * manuscripts regarding research proposals and research ideas will be particularly welcomed
- * computed data or files regarding the full details of the experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material
- * manuscripts concerning summaries and surveys on research cooperation and projects (that are founded by national governments or others) provide information for a broad field of users.

Subject Areas:

- * atmospheric sciences
- * atmospheric physics and chemistry
- * air
- * meteorology
- * environmental sciences

Watch™ Paper Review

Tweeting About TV: Sharing Television Viewing Experiences Via Social Media Message Streams by *D. Yvette Wohn, Eun-Kyung N*

<http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3368>

Abstract:

Through content analysis of messages posted on Twitter, we categorize the types of content into a matrix — attention, emotion, information, and opinion. We use this matrix to analyze televised political and entertainment programs, finding that different types of

messages are salient for different types of programs, and that the frequencies of the types correspond with program content. Our analyses suggest that Twitter picks up where formal social television systems failed: people are using the tool to selectively seek others who have similar interests and communicate their thoughts synchronous with television viewing.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
