

# Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V9N5

May 2011

Welcome to the V9N5 May 2011 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

**Awareness Watch™ Featured Report**  
**Awareness Watch™ Spotters**  
**Awareness Watch™ Book/Paper/Article Review**  
**Subject Tracer™ Information Blogs**

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

## **Awareness Watch™ Featured Report**

This month's featured report covers **Current Awareness Discovery Tools on the Internet**. Current awareness has become a very timely topic with professionals and business executive/entrepreneurs especially those suffering from information overload in today's dynamic internet based information economy. It is no longer a “nice to have” resource but rather a “must have” internet tool that is part of our daily business routine! Obtaining these current awareness tools and constantly discovering the current happenings and information on the Internet is the driving force behind the creation of this white paper. This white paper will list the best and most competent current awareness resources available for the professional and business executive/entrepreneur in the following detailed subject classifications:

Articles and Trade Journals  
Listservs®  
News Groups, Message Boards and Forums

## **Articles and Trade Journals**

Articles, Papers and Trade Journals offer a plethora of current awareness resources from eMail alerts to table of contents alerts and emails. These articles, papers and journals arrive in a timely manner, are professionally designed and written, and as a rule are easily accessible both online and offline. The following resources will aid you in finding the appropriate articles and journals for your current awareness profession and/or business activities:

Articles, Abstracts, Documents, Papers, Reports and Literature Resources  
<http://AcademicResources.BlogSpot.com/>

BPubs.com – The Business Publications Search Engine

## **Listservs®**

Listserv®, Majordomo and related mailing list software have been used to create specific subject based mailing lists for years on the Internet. I have always considered mailing lists to offer one of the very best methods to stay current on your profession or business career. I personally still belong to hundreds of selected and niched mailing lists that keep me constantly current in key areas. The following is a resource of information on Listservs® (mailing lists) as well as search entities that allow you to find and subscribe freely to the list closely related to your profession and/or business career. Also mailing lists only require an active email account and I would recommend that you create a separate eMail account to subscribe your new lists to. Also you may set up list mail file folders in your email inbox to keep your mailing list subscription emails separated and easy to manage and search. Using Listservs® to keep up to date is extremely important: [AcqWeb's Directory of Journals, Newsletters and Electronic Discussion Archives](http://www.acqweb.org/journals.html)

## eMail Alerts

eMail Alerts allow current awareness monitoring via eMail with notification instantly. These alerts allow you to quickly identify and access new current awareness information as well as breaking news in your identified profession or business niche. eMail alerts can be forwarded to your cell telephones as well as to other PDAs. Custom alerts services are also available to alert you on many different areas and requirements based upon your profession and needs.

## **Web Site and Pages URL Monitoring Bots and Resources**

Web site and web page URL monitoring allows you to monitor key websites and related pages of information for current awareness updates and changes that will affect your profession or business. These bots monitor the web pages or sites that you desire on a 24/7 basis and send you an email upon the sites and related pages update or change. These services are available as web applications as well as software that you must install. Many of the services are available at little or no cost. I have used these services for years and without a question they are extremely beneficial for key current awareness monitoring and updates on the Internet.

## WEBLOGS (BLOGS)

Weblogs or “blogs” have become the fastest growing area of the Internet in the last year! These personal blogs now count in the millions with more bloggers being created daily! Tracking these blogs is well worth the time and efforts as they offer a tremendous amount of current awareness information and data. Corporate blogs through their intranets as well as throughout the Internet are now coming into the mainstream. My blog was created five years ago and just awarded as one of the top 10 informational blogs available for information search and research on the Internet. Blogs and current awareness are subjects

## NEWS AGGREGATORS AND RSS FEEDS

News aggregators and the related RSS News Feeds are the backbone of WebLogs (Blogs) ability to disseminate the ongoing current awareness information to the Internet global community. Aggregating the key blogs that you are monitoring for current awareness and updates can now be created either by installed browser software called News Aggregators or you may use some of the brand new web applications that require no software installation on your computer. The latest News Aggregators read the RSS news feeds and can be updated by a click of a button or you may preprogram the news aggregator to update in certain time frames. The latest News Aggregators feature “auto-discovery” that allows the news aggregator to automatically discover the related RSS feed associated with the blog that you subscribe to. My news aggregator currently monitors and updates over 200 RSS newsfeeds every 15 minutes that allows me to keep current with all blogs that I monitor for updates and current happenings.

**Figure 8: Scholarly Internet Resource Collections**

I have attempted to show you what excellent current awareness resources the Internet has for the professional/executive and how these tools can make your entire work process far more productive and efficient. But it takes more than just reading about these tools you

must have a true desire to make these Internet tools a part of your daily work life. You must decide to make the Internet a professional tool and use it to accomplish all your goals! These resources that I have listed above will start you on your professional path to continued discovery of current awareness tools.

## **Awareness Watch™ Spotters**

### **Qwiki - The Information Experience**

<http://www.qwiki.com/>

Qwiki is the world's first "information experience", powered by a technology that transforms static information into interactive stories. To start, Qwiki covers 2 million reference terms – including a wide variety of people, places and things. You can type in any indexed term and Qwiki will generate an "information experience" describing it. This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **National Science Digital Library (NSDL)**

<http://www.nsd.org/>

In 2000, the National Science Foundation created the National Science Digital Library (NSDL) to provide organized access to high quality resources and tools that support innovations in teaching and learning at all levels of science, technology, engineering, and mathematics (STEM) education. In addition to providing an organized point of access to high-quality STEM content, NSDL also provides open-access, non-proprietary tools to stimulate new ways to access and use science education information in an easily accessible online environment. NSDL currently catalogs over 60,000 resources from 57 digital collection providers and thousands of web sites. Individual resources in the library are characterized using qualified Dublin core metadata. NSDL makes an ideal testbed for researchers interested in exploring innovative approaches into "digging into data" over rich collections of web-based educational resources. NSDL uses a Fedora-based open-source digital library platform of technology and standards (NCore), creating a dynamic information layer on top of library resources. Collections, resources, and this information layer are easily accessible to researchers via a number of application programming interfaces. The repository contents can be accessed directly using the Digital Repository API. Additionally, a Search API is available for searching directly over NSDL collections. Finally, there is also the Strand Map Service API for searching and visualizing NSDL collections according to K-12 learning goals. This web service protocol supports the construction of interactive knowledge map interfaces based on the learning goals articulated in the American Association for the Advancement of Science (AAAS) Benchmarks for Science Literacy and the learning progressions and strand maps published in the AAAS Atlas of Science Literacy. The library's Dublin core metadata descriptions can also be harvested using OAI-PMH. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

## General Mathematics Notes

<http://www.geman.in/>

The main aim and scope of General Mathematics Notes is publishing of refereed, high quality original research papers in all areas where mathematics plays an important role. The General Mathematics Notes publishes also refereed, high quality survey papers; expository papers; research announcements describing new results; short notes on unsolved problems, book reviews, posters etc.

## National Technical Information Service (NTIS)

<http://www.ntis.gov/>

The National Technical Information Service (NTIS) is the nation's largest and most comprehensive source of government-funded scientific, technical, engineering, and business information produced or sponsored by U.S. and international government sources. NTIS is a federal agency within the U.S. Department of Commerce. Since 1945 the NTIS mission has been to operate a central U.S. government access point for scientific and technical information useful to American industry and government. NTIS maintains a permanent archive of this declassified information for researchers, businesses, and the public to access quickly and easily. Release of the information is intended to promote U.S. economic growth and development and to increase U.S. competitiveness in the world market. The NTIS collection of more than 2 million titles contains products available in various formats. Such information includes reports describing research conducted or sponsored by federal agencies and their contractors; statistical and business information; U.S. military publications; multimedia training programs; databases developed by federal agencies; and technical reports prepared by research organizations worldwide. NTIS maintains a permanent repository of its information products. More than 200 U.S. government agencies contribute to the NTIS collection, including the National Aeronautics and Space Administration; Environmental Protection Agency; the departments of Agriculture, Commerce, Defense, Energy, Health and Human Services, Homeland Security, Interior, Labor, Treasury, Veterans Affairs, Housing and Urban Development, Education, and Transportation; and numerous other agencies. International contributors include Canada, Japan, Britain, and several European countries. NTIS offers Web-based access to the latest government scientific and technical research information products. Visitors to <http://www.ntis.gov> can search the entire collection dating back to 1964 free of charge. NTIS also provides downloading capability for many technical reports, and purchase of the publications on CD as well as paper copies. National Technical Reports Library: New at NTIS, the National Technical Reports Library (NTRL) provides a more comprehensive offering that delivers high-quality government technical content in all subject areas directly and seamlessly to the user's desktop. The NTRL service gives access to more than 2 million NTIS bibliographic records and more than 500,000 full-text documents in PDF format. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

## **Nebraska Digital Newspaper Project**

<http://cdrh.unl.edu/nebnewspapers/>

The Nebraska Digital Newspaper Project and its contractor, iArchives, have created 200,000 full-text digitized pages of 19th and early 20th Century newspapers from selected communities in Nebraska that can be used for text mining by DID research teams. The number of pages will grow over time. Files have been created in three forms: TIFF images, JPEG2000, and PDFs with hidden text. Optical character recognition has been performed on the scanned images, resulting in dirty OCR. Metadata associated with the project is TEI, XML, and METS/ALTO, following the guidelines provided by the Library of Congress for the National Digital Newspaper Program. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

## **New York Public Library**

<http://www.nypl.org/>

Libraries are the memory of humankind, irreplaceable repositories of documents of human thought and action. The New York Public Library is such a memory bank par excellence, one of the great knowledge institutions of the world, its myriad collections ranking with those of the British Library, the Library of Congress, and the Bibliothèque nationale de France. The NYPL Digital Gallery contains roughly 700,000 images that could be used for data analysis. The images are available via our RESTful API. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

## **Currents: New Scholarship in the Human Services**

<http://currents.synergiesprairies.ca/currents/index.php/currents/index>

While they welcome submissions from anyone involved in new developments in the human services (and will invite papers from established scholars on occasion) they have a special commitment to encouraging publication of the work of graduate students. This work is often important and new, employing innovative research methods to learn about current issues and it is often unknown outside the student's faculty. Currents is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

## **The New York Times Article Search API**

<http://developer.nytimes.com/>

The NYT Article Search API allows you to search more than 2.8 million New York Times articles from 1981 to today, retrieving headlines, abstracts, lead paragraphs and links to associated multimedia. The API supports the following type of searching: a) Standard keyword searching; b) Date range: all articles from X date to Y date; c) Field search: search within any number of given fields, e.g., title:obama byline:dowd; d) Conjunction and disjunction (AND and NOT) operations, e.g., baseball yankees -"red sox"; and e) Ordering by closest (variable ranking algorithms), newest and oldest. The Article Search API also offers faceted searching. The available facets include Times-

specific fields such as sections, taxonomic classifiers and controlled vocabulary terms (names of people, organizations and geographic locations). This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **Opening History (OH) - U.S. History Resources from Libraries, Museums, and Archives**

<http://imlsdcc.grainger.uiuc.edu/history/>

Opening History (OH) contains metadata describing digital collections specializing in United States history and culture and item-level metadata describing resources contained within these collections. As of May, 2009, the portal contains 553 collection records and over 918,000 item records. Opening History's mission is to provide organized access to digital resources of value for research on United States history and culture. OH aggregates a range of distributed and complementary cultural heritage collections from libraries, museums, and archives to increase their visibility and to enhance the value and usefulness of individual collections by integrating them with related collections, providing search and browse functions across collections, and linking to related resources outside of OH. The OH initiative encourages sharing of digital resources in open access formats and promotes coordinated access to regional, state, and local collections to support the creation of a digital cultural heritage aggregation of national scope. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **Scholarly Database at the Cyberinfrastructure for Network Science Center, Indiana University**

<http://sdb.slis.indiana.edu/>

The Scholarly Database (SDB) at Indiana University aims to serve researchers and practitioners interested in the analysis, modeling, and visualization of large-scale scholarly datasets. The online interface provides access to four datasets: Medline papers, U.S. Patent and Trademark Office patents (USPTO), National Science Foundation (NSF) funding, and National Institutes of Health (NIH) funding – over 22 million records in total. Users can register for free at to cross-search these datasets and to download result sets as dumps for scientometrics research and science policy practice. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **International Journal of Enterprise Computing and Business Systems (IJECS)**

<http://www.ijecbs.com/>

The International Journal of Enterprise Computing and Business Systems (IJECS) is a specialized, refereed, and indexed journal that is published Bi-Annually in English. IJECS invites contributions from Researchers, Scientists, Academicians and Practitioners from all over the world. It publishes papers in specialized topics of Enterprise Computing and Business Systems. International Journal of Enterprise

Computing and Business Systems is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **University of Florida Digital Collections (UFDC)**

<http://www.uflib.ufl.edu/ufdc>

The University of Florida Digital Collections (UFDC) hosts local and international collections, housing over 6.3 million pages of all material types (books, archival documents, newspapers, photographs, audio, video, museum objects, maps, etc.) in many languages. A full list of collections that are clickable to descriptions, with statistics for each. The largest collections are: 1) Digital Library of the Caribbean: 65,625 items and 1,304,277 pages; 2) Florida Digital Newspaper Library: 76,118 issues and 1,081,836 pages; and 3) Baldwin Library of Historical Children's Literature Digital Collection: 6,251 items and 927,893 pages. The Digital Library of the Caribbean contains historic through current materials in multiple languages (primarily in English, Spanish, and French). The Florida Digital Newspaper Library includes historic through current newspapers, and the Baldwin collection contains 19th century children's literature. All collections and items are openly accessible for use and for datamining. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **The Open Access Digital Library**

<http://grweb.coalition.org/oaddl/html>

The Open Access Digital Library, delivered through Gold Rush Electronic Resource Management System, provides free access to over 4,000 full text, scholarly journals in a variety of subjects. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **LucidChart - Collaboration Tool and Online Diagram/FlowChart Software**

<http://www.lucidchart.com/>

LucidChart is a web-based application that can be used to draw flowcharts, UML diagrams, network diagrams, org charts, site maps, and many other types of diagrams. Features include: 1) LucidChart offers real-time collaboration so multiple users can edit a document at the same time, with changes merged and synced instantaneously; 2) LucidChart is built in HTML5, rather than Flash, and can work on any browser, anywhere without any plugins (e.g., Flash); and 3) LucidChart is currently beta testing Microsoft Visio import which we'll soon be releasing to make it easy to port files over from Visio. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Membranes**

<http://www.mdpi.com/journal/membranes>

Membranes is an international, peer-reviewed Open Access journal of separation science and technology. It publishes reviews, research articles, communications and technical notes. Our aim is to encourage scientists to publish their experimental and theoretical

results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal:

- \* manuscripts regarding research proposals and research ideas will be particularly welcomed
- \* electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way - can be deposited as supplementary material.

This journal covers all topics related to synthetic, inorganic and biological membranes. Topics of interest include, but are not limited to:

- \* membrane permeation and membrane transport
- \* membrane structure and function
- \* membrane processes and phenomena
- \* biological membranes
- \* non-biological membranes
- \* membrane material or polymer
- \* separation technology

#### **University of North Texas Digital Collections**

<http://digital.library.unt.edu/browse/?browseby=collection>

The collections are heterogeneous in nature including books, posters, photographs, born digital reports, musical scores, newspapers, letters, maps, etc. The Portal to Texas History is the largest collection listed. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

#### **vCloud at Carnegie Mellon**

<http://www.pdl.cmu.edu/vCloud/>

In a large-scale collaboration, they are standing up and operating a state-of-the-art cloud based on VMware software and HP hardware (with Intel processors and Samsung DRAM and SSDs) implementing the vCloud APIs. The PDL vCloud will replace a multitude of single-purpose clusters, managed and underutilized by individual groups, with an IaaS private cloud for class projects, simulations, data analyses, and cluster and data-intensive computing activities. Moreover, it is an invaluable resource for studying the usage patterns and demands placed on clouds in academic settings, whose workloads we think will be representative of analytics-heavy non-academic activities. We are deeply instrumenting the infrastructure, at various levels and in cooperation with VMware and HP experts, working with different groups to understand their specific requirements, and exploring/developing automation approaches tuned to the challenging characteristics of not-for-profit academic environments. This will be added to [Grid, Distributed and Cloud Resources](#) Subject Tracer™.

## **Data-Mining Virtual Machines for Resource Optimization**

<http://groups.csail.mit.edu/EVO-DesignOpt/evo.php?n=Site.SysML>

Consolidation with virtual machines allows cost savings and offers energy savings and efficiency. However, the challenge is to maximize consolidation while honoring service commitments (often called SLAs or Service Level Agreements). We are addressing this challenge in ways that exploit genetic programming and reinforcement-based machine learning algorithms. We are evaluating whether it is possible to predict impending overload of a virtual machine's resources and effectively mitigate the situation in a timely way by reallocating resource types which respond at appropriate timescales. This will be added to [Data Mining Resources](#) Subject Tracer™. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

## **Styles of Communication**

<http://journals.univ-danubius.ro/index.php/communication>

The main purpose of Styles of Communication is to show the unity existing within global diversity. The European Year of Intercultural Dialogue (2008) was the starting point of our joint research which has continued with the European Year of Creativity and Innovation (2009). As communication implies, besides the transfer of information to others and the decoding of the others' messages, the production of meaning within (non)verbal texts/ objects, is closely connected to interculturality, creativity and innovation and it needs a refining of styles in order to avoid misunderstandings. This journal is a plea for interdisciplinarity as its aim is to include different perspectives on cultural studies, coming from different fields, such as linguistics, semiotics, literature, political and sociological studies, communication, public relations, anthropology, translation studies etc. Articles accepted in English, French and Russian. Styles of Communication is available free of charge as an Open Access journal on the Internet. Abstracts available online in English. Articles available in PDF format.

## **Tree.io - Online Project Management Software**

<http://www.tree.io/>

Tree.io is a free service that provides cloud based productivity, collaboration, communication and integration tools for any size business. Tree.io focuses on providing cutting-edge Project Management, Sales & CRM and Service Support. Features include: a) Fast. Business at the speed of light; b) Easy to Use - No training needed, ready in seconds; c) Compatible - Supports IE and Integrates with other sites; d) Multilingual - . Tree.io supports multiple languages. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **BI-DW - Business Intelligence and Data Warehousing Directory**

<http://www.bi-dw.info/>

BI-DW Info is an independent Business Intelligence and Data warehousing directory. Our main objective is to gather high quality and useful resources and spread the knowledge about Business Intelligence, Data Warehousing, ETL process and Data Integration, Enterprise Performance Management and Reporting. The directory is a result

of thorough analysis and manual classification of the internet resources which made it possible to refrain from including pages that do not provide any value. It includes revisions and ratings of the listed resources and is constantly growing. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Data Mining Resources](#) Subject Tracer™.

### **ProjeLead - Project Management Solution**

<http://www.projelead.com/>

ProjeLead is the web-based project management software created by Pragmatis Consulting. ProjeLead is a simple open source tool that will make project managers focus more on their project than on their project management tool. Yet, ProjeLead offers the main features needed for an effective project management: 1) Resource, task, risk and project management; 2) Collaboration: newsgroups, document management (EDM) and timesheets; 3) Project reporting; 4) Organization setup; 5) Centralized authentication; 6) Global project calendar; and 7) etc... The features, the ease of use and setup, and the reasonable price make ProjeLead an alternative to MS Project and other project management tools.

### **Geoscience Frontiers (GSF)**

<http://www.elsevier.com/locate/gsf>

Geoscience Frontiers (GSF) is a quarterly journal that publishes in English significant original research articles and high quality reviews of recent advances in all fields of Earth Sciences - including stratigraphy and paleontology, mineralogy and petrology, economic geology and minerals and fuel exploration, structural geology, lithospheric tectonics, environmental and engineering geology, hydrogeology, astrogeology, marine geology, and geophysics and geochemistry.

### **PhraseUp - Assists with Writing By Finding and Filling-In Words You Can Not Remember**

<http://www.phraseup.com/>

Sometimes we know what we want to write, the sentence is phrased in our mind, but we can't figure out some of the words we need. This is where phraseup comes in. Using a patent pending algorithm, phraseup assists you with writing, by suggesting possible combinations to fill-in the words you can't remember. Each suggestion is accompanied by definitions, synonyms and translations to other languages. Give phraseup a try... This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Kiwili - Online Management Web Application and Social Utility**

<https://www.kiwili.com/>

Kiwili is a management web application and a social utility that connects businesses and entrepreneurs. Bill your time, manage your projects, estimate, invoice your services and promote your activities to your network. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Data Recovery Freeware**

<http://godskingsandheroes.info/software/>

This program will extract the text even from damaged or corrupted Microsoft Office and Open Office files 2.X and 3.X files with the extensions .doc, docx, xls, xlsx, ppt, pptx, odt, ods and odp as well as possibly the template and macro variants of these extensions such as dot, xlt and pps if they are changed to the correct corresponding extensions mentioned. It may succeed at doing so where MS Office Open Office itself fails to salvage text. It can also attempt to recover formatting in the form of a full Open Office file with a regular, odt, ods or odp extension. At this time unfortunately there is no facility for recovering anything but basic formatting for MS Office files through the previously mentioned text extractions. This program can be used as a viewer of text within healthy MS Office and Open Office files without having Open Office installed. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Administrative Sciences**

<http://www.mdpi.com/journal/admsci>

Administrative Sciences is an international, peer-reviewed, open access journal which publishes original theoretical and empirical work on organization studies. Administrative Sciences aims to advance and communicate knowledge concerning organization theory, strategic management, public administration as well as interdisciplinary research in related fields, such as business, economics, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society. To guarantee a rapid refereeing and editorial process, Administrative Sciences follows standard publication practices in the natural sciences. Administrative Sciences publishes regular research articles, reviews and short notes. There is no restriction on the length of the papers as we encourage researchers to publish their theoretical and empirical results in as much detail as possible. For theoretical papers, full details of proofs must be provided so that the results can be checked; for experimental papers, full experimental details must be provided so that the results can be reproduced. Additionally, electronic files or software regarding the full details of the calculations, experimental procedure, etc., can be deposited along with the publication as Supplementary Material.

Keywords:

- \* decision making
- \* organization structure and dynamics
- \* human resources management
- \* innovation management
- \* motivation
- \* ethics in public administration
- \* policy analysis
- \* public choice
- \* public budgeting

- \* public management
- \* governance
- \* accountability
- \* diversity
- \* balance

### **FindFiles.net - Finding Files On the Internet**

<http://www.findfiles.net/>

FindFiles.net is a rapidly developing search engine for all types of files, operating its own crawler. FindFiles database currently contains links to several hundred Millions of files. FindFiles supports all existing Mime Types (apart from standard html text-pages). Well known examples include: 1) mp3 audio and wav sound files; 2) midi musical instrument interfaces; 3) mp4, avi and quicktime videos; 4) jpeg, gif, png and tiff images; 5) Microsoft doc and Excel documents and exe executables; 6) pdf and plain text documents; 7) dwg AutoCAD and wrl virtual reality data files; and 8) archives like zip, gzip and jar. FindFiles provides you with direct links (so called deep links) to the files you are looking for, which you may then download directly from the hosting server. FindFiles also provides you, for your convenience, with a link to the referring webpage. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Data Science Toolkit**

<http://www.datasciencetoolkit.org/>

A collection of the best open data sets and open-source tools for data science, wrapped in an easy-to-use REST/JSON API with command line, Python and Javascript interfaces. Available as a self-contained VM or EC2 AMI that you can deploy yourself. It's essentially a specialized Linux distribution, with a lot of useful data software pre-installed and exposing a simple interface. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Data Mining Resources](#) Subject Tracer™.

### **SIGMA: Large Scale Machine Learning Toolkit**

<http://research.microsoft.com/en-us/projects/sigma/>

The goal of SIGMA is to provide a group of parallel machine-learning algorithms that can meet the requirements of research work and applications, typically with large-scale data or features. The toolkit includes more than 10 algorithms and it makes them run on single multicore machine or on a HPC cluster with hundreds of machines and thousands of CPU cores running. A SDK is provided for researchers and developers who want to invent their own algorithms and add them to the toolkit. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

## **BMC Biophysics**

<http://www.biomedcentral.com/bmcbiophys/>

BMC Biophysics is an open access journal publishing original peer-reviewed research articles in experimental and theoretical aspects of biological processes from the microscopic to macroscopic level, including thermodynamics, structural stability and dynamics, molecular biophysics, signalling, novel biophysical methods and computational biophysics.

## **Research Accelerators - Achieve Research Results Faster With These Tools, Services, and Resources**

<http://research.microsoft.com/en-us/collaboration/tools/default.aspx>

Research Accelerators are for students, computer and research scientists, and academics. These resources help you manage scholarly works, teach and explore science, analyze and visualize data, and publish the results of your research. Many of our releases are open source or have open interfaces, enabling communities to evolve and build on these solutions in collaboration with Microsoft Research engineers and researchers. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Undelete 360 - Restore Files Accidentally Deleted From Your Computer, Recycle Bin, Digital Camera, Flash Drive**

<http://www.undelete360.com/>

Undelete 360 is one of the best software to restore files accidentally deleted from your computer. It is made on fast and efficient algorithm that browse, search and recover files lost due to a different factors: accidental deleting, viruses, software and computer failures. It can recover files deleted from your Computer drives, USB drives, Camera devices, Pen Drives, Memory Cards and supports both file recovery and folder recovery. Genuine Freeware! No ads, No spyware, No time limits, No feature limits. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Microsoft Biology Tools (MBT)**

<http://research.microsoft.com/en-US/projects/bio/mbt.aspx#MSR-Biology-Ext>

The Microsoft Biology Tools (MBT) are a collection of tools that enable biology and bioinformatics researchers to be more productive in making scientific discoveries. Some of the tools provided here take advantage of the capabilities of the Microsoft Biology Foundation, and are good examples of how you can use MBF to create other tools. This has been added to [Biological Informatics](#) Subject Tracer™ Information Blog.

## **International Journal of Agriculture and Biology (IJAB)**

[http://www.fsublishers.org/ijab/index\\_ijab.jsp](http://www.fsublishers.org/ijab/index_ijab.jsp)

International Journal of Agriculture and Biology (IJAB) publishes peer reviewed papers on all aspects of agriculture and biology, as reviews (solicited or submitted), research articles (full length and short communications). Although IJAB considers broad spectrum of submitted papers for publication, it is a prerequisite that the contributions have close

relevance to Experimental Work (Laboratory and Field) in agricultural and biological disciplines. For the convenience of authors, the priority areas Include: Life Sciences, Agricultural Chemistry, Genetic Engineering, Biotechnology and Bioinformatics, Environmental Sciences (papers related to life sciences only), Medicine and Health Sciences, Agricultural Engineering. Content in English.

### **Plan2Biz - Developing Your Business Idea**

<http://plan2biz.com/>

Plan2Biz is your free, online tool for creating, working on and collaborating on your business idea. It will guide you through to the entire process - from the executive summary to the financial section. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

### **StartupCrave - Where Aspiring Entrepreneurs Connect**

<http://www.startupcrave.com/>

StartupCrave is a web service for aspiring Internet entrepreneurs to find potential partners, employees or mentors for their own planned startups—or to find promising startups to help develop and launch. Join the millions who crave the entrepreneurial life. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **Webplanner™ - Collaborative Project Management Tool**

<http://webplanner.com/>

Webplanner™ is an online collaborative project management tool. Use the power of the cloud to brainstorm project goals, phases, tasks, and multiple levels of subtasks with your team. Assign responsibility for tasks to team members, who will be notified automatically, and then work out task details through comments. Upload and share project-related files. Print reports. Schedule your project using a dynamic Gantt chart with dependencies and a critical path view. Track the progress of your project using the Overscreen screen (at left), which includes a project status pie chart, a list of approaching tasks for the whole project and individual team members, a project activity feed, and a team status list. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **EuroEconomica**

<http://journals.univ-danubius.ro/index.php/euroeconomica>

EuroEconomica aims at promoting an interdisciplinary approach on a large range of topics covering economic phenomena and the major intellectual trends in Economic theory and Business Administration. EuroEconomica seeks to provide a framework for merging ideas from various fields studying the complex world of business and the relationships between society and business. Content in English.

### **Credo General Reference**

<http://www.credoreference.com/home.do>

Credo General Reference is a completely customizable online reference solution for learners and librarians. Offering 534 highly-regarded titles from over 70 publishers, Credo General Reference covers every major subject from the world's best publishers of reference. Their content, technology and customer service earn them rave reviews. Publisher Collections enable libraries to augment their collections with subject-specific content from highly-regarded publishers. Available as a stand-alone option or alongside a subscription to one of Credo's fully customizable General Reference solutions, Publisher Collections will offer these resources either as a complete collection for purchase or subscription or as individual titles for purchase. Users will experience the content as a fully integrated part of their Credo Reference experience. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) White Paper.

### **Internet Tutor**

<http://www.InternetTutor.info/>

Need a tutor with years of experience to learn about the Internet? Are you located in Southwest Florida for a one on one tutor session or outside of Southwest Florida available by Skype. Contact the Internet Tutor today. For additional information click on the above link.

### **Flow of Funds Guid**

<http://www.federalreserve.gov/apps/fof/>

This interactive documentation serves as a guide to the data compiled and published as part of the “Flow of Funds Accounts of the United States” (Z.1) data release and the Integrated Macroeconomic Accounts. This comprehensive documentation system is designed to help a user understand the links between series and underlying source data by providing the capability to search or browse the vast amount of information underlying the Z.1 and the Integrated Macroeconomic Accounts. This will be added to [Financial Sources](#) Subject Tracer™.

### **Topsy - Realtime Social Web Search Engine**

<http://www.topsy.com/>

Topsy is a realtime search engine powered by the Social Web. Unlike traditional web search engines, Topsy indexes and ranks search results based upon the most influential conversations millions of people are having every day about each specific term, topic, page or domain queried. Socially generated content is the fastest growing source of information on the Web, with social graphs replacing PageRank as the new “signal” for identifying relevant content for consumers, impacting how consumers are exposed to, communicate and consume Web content. Designed for true web-scale search and powered by the largest searchable index of Twitter data, Topsy’s algorithms dynamically identify influencers within the Social Web for any searchable criteria, using these

Awareness Watch V9N5 May 2011 Newsletter

influence calculations to rank results. This means realtime search results are highly relevant & devoid of noisy stream of conscious content. Topsy displays realtime results for related terms & articles, trending topics, identifies experts (influencers) for any queried term and shows you trackback pages for everything in its index, displaying what everyone is saying about that query. And, we syndicate our results so you can insert relevant realtime content into your pages & ads to improve the consumer experience and increase monetization rates. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Social Informatics](#) Subject Tracer™.

### **Agriculture and Agricultural Science Procedia**

<http://www.sciencedirect.com/science/journal/22107843>

Agriculture and Agricultural Sciences Procedia is an e-only product focussed entirely on publishing high quality conference proceedings. Conference proceedings will be accepted for publication in Agriculture and Agricultural Sciences Procedia based on suitability and will be required to meet certain criteria, including relevance to an international audience and covering highly cited or timely topics. Agriculture and Agricultural Science Procedia is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **MOKI.tv - The Ultimate Guide to Online Entertainment**

<http://www.moki.tv/>

The way people access and discover content is changing radically, and fast. With Netflix, Hulu, Amazon and others, there's never been a broader selection of movies & TV available to watch online, instantly. With so many options spread across multiple providers, finding what's worth watching and where to watch it can be daunting. They aggregate all your favorite sources (both paid and free), so that regardless of where it's available, you can find it here -- on Moki.tv. The ultimate guide to online entertainment. Moki.tv brings together all your favorite sources in one place. Moki.tv is the best kind of guide: both intelligent and social. They are more than just a directory. With thousands of options to choose from, they know it's not easy to find the good stuff. That's why they have built an intelligent system that learns your tastes and makes recommendations as you rate movies & TV shows. (You can also import existing ratings from Netflix and other sources). You can also follow your friends and other like-minded people on Moki.tv to discover what's popular. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [World Wide Web Reference](#) Subject Tracer™ Information Blog.

## Updated> Academic and Scholar Search Engines and Sources Annotated White Paper

<http://www.ScholarSearchEngines.com/>

I am very pleased to announce that my Internet MiniGuide Annotated Link Compilation White Paper titled **Academic and Scholar Search Engines and Sources** has been just updated and is now a 64 page research paper listing selected resources both new and existing that will help anyone who is attempting to find academic and scholarly information and knowledge available on the Internet. Each source is described along with the URL address than can be accessed. It is freely available as a .pdf file (417KB) at the above link from the [Virtual Private Library™](#) and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) [Updated April 13, 2011]

## Model Xtractor - Online Class Diagram Editor

<http://model-xtractor.com/>

Model Xtractor allows you to: a) Create or customize class diagrams online; b) publish diagrams to your blog; c) Visualize diagrams with contextual documentation, d) Print diagrams from PDF; and e) Browse preloaded metadata. Features include: 1) You have ready to use preloaded metadata, for dozens of popular frameworks, APIs, components and libraries. From different platforms and programming languages (.NET, ActionScript, PHP, IDL, VBScript), databases (MySQL, SQL-Server, Oracle, Access), IDL. I'm working on getting Java, Ruby, Objective-C, XML and way more under the same roof; 2) You have hundreds of ready to use class diagrams, for so many areas of a product or library. Each diagram can be visualized with its contextual documentation or can be cloned and customized to answer your specific needs; 3) You have a generic and universal model, evolved from UML and ER, that offers more flexibility. And you can simply “navigate” though the result of each method or function with simple drag and drops of shape items. The model is object-oriented and supports most programming languages, data models and XML. It's easy to move from a platform to another, because the model uses similar notation, concepts, conventions and techniques; and 4) Everything is online. No need to download, import, convert or install anything on your own computer. And everything is built with pure HTML and JavaScript on the client side. You can easily publish any unprotected diagram to your own blog or site! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## Amazon Cloud Drive

<https://www.amazon.com/clouddrive/learnmore>

Amazon Cloud Drive is your hard drive in the cloud. Store your music, videos, photos, and documents on Amazon's secure servers. All you need is a web browser to upload, download, and access your files from any computer. Your Cloud Drive comes with 5 GB of free storage—enough space to store up to 1000 songs. This space is yours to use as you like and you will never be charged for it. Use your Amazon Cloud Drive as the go-to location for all your important files. At work, at home, during your commute or while on vacation—you'll always have access to everything you've uploaded to your Cloud Drive through your Amazon account. Store files in your Cloud Drive and never worry about

losing them if your computer crashes, or is lost or stolen. This will be added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

## **Polymers**

<http://www.mdpi.com/journal/polymers>

Polymers is an international, open access journal of polymer science. It publishes reviews, regular research papers (articles) and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. Polymers provides an interdisciplinary forum for publishing papers which advance the fields of (i) polymerization methods, (ii) theory, simulation, and modeling, (iii) understanding of new physical phenomena, (iv) advances in characterization techniques, and (v) harnessing of self-assembly and biological strategies for producing complex multifunctional structures. Scope:

- \* Polymer chemistry
- \* Macromolecular chemistry
- \* Biomacromolecules and complex polymer systems
- \* Polymeric hybrid materials
- \* Polymer physics
- \* Polymer characterization
- \* Thermodynamics
- \* Synthetic polymers
- \* Natural polymers
- \* Fibers, films
- \* Plastics, elastomers
- \* Advanced processing of polymers

## **Blazetrak - Search for Professionals and Opportunities**

<http://www.blazetrak.com/>

Blazetrak.com is the world's first website that allows you to get directly in touch with established industry experts and celebrity talent - and be guaranteed a direct video response. The site was developed to be used in four simple steps: Sign Up, Sign In, Search, and Submit! This has been added to [Internet Experts](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

### **Speedy Mirror - Geo Distributed Cluster For Your Content**

<http://www.speedymirror.com/>

Speedy Mirror is a distributed cluster for your content delivery. It is a system of computers containing copies of your data, placed at various geographical locations so as to maximize download speed and availability of the data. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Instascriber - Subscriptions For Instapaper**

<http://www.instascriber.com/>

Instascriber makes it easy to subscribe to your favorite RSS Feeds and have them automatically appear in Instapaper. Simply log in to Instascriber with your Instapaper credentials and enter the RSS Feeds you would like to appear in Instapaper. Instascriber will automatically add new items to Instapaper as they are published. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Journal on School Educational Technology (JSCH)**

<http://www.imanagerpublications.com/JournalIntroduction.aspx?journalid=65>

Journal on School Educational Technology (JSCH) aims to induce the commitment of our educators in giving unparalleled education with quality and innovative ideas worldwide. The Journal on School Educational Technology reflects the most modern trends and researches in K-12 education to make the academic community stay current with the new trends. The ultimate goal of the Journal is breeding a dynamic, visionary and creative younger generation.

### **rstat.us - Microblogger**

<http://www.rstat.us/>

Microblogging has taken the world by storm. Millions of people around the world now share their thoughts with friends, family, and random strangers every day. Links are shared, stories are told, and events are discussed. rstatus is the newest place to participate in the collective conscious of the planet. Simplicity is a core 'feature' of rstat.us. They pride ourselves on saying 'no' to lots of features. Our interface is clean, and easy to understand. They give you just enough features to be interesting, but not enough to be complicated and confusing. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Inside Jobs**

<http://www.insidejobs.com/>

The Inside Jobs team came together with passion and drive to simplify career searches. After all, there are tens of millions of jobs today, covering all skill sets and desires. Many offer the intellectual, artistic, and financial stimulation that can make you very happy. But with so many options, finding that dream job can be hard. You might not even know it exists. That's where they come in. They are developing a place where people can explore what opportunities exist and learn what paths can take them there. They know this experience must be simple and rewarding, and they are striving to make it easy for you to

navigate your career and education choices. This has been added to [Employment Resources](#) Subject Tracer™ Information Blog.

### **Memidex - Free Online Dictionary/Thesaurus and More**

<http://www.memidex.com/>

Memidex is a free online dictionary and thesaurus with a simple interface, complete inflections, auto-suggest, adult-filtering, frequent updates, a browsable index, support for mobile devices, and millions of external reference links for definitions, audio, and etymology. It's fast too. Use the Find box for exact matching or browse using the complete index. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

### **Theology**

<http://tjx.sagepub.com/>

Theology publishes articles addressing contemporary theological studies. It includes peer-reviewed contributions from leading scholars and first-time authors from across the Christian tradition. It aims to include the latest developments in all fields of enquiry impinging on contemporary Christian thought and practice, including biblical studies, historical theology, systematic theology, pastoral theology, history, philosophy and ethics. This will be added to [Theology Resources](#) Subject Tracer™.

### **SaleLocator - What's Onsale Now In Local Stores**

<http://salelocator.com/>

SaleLocator is a new shopping search engine that brings local retail sales information to local shoppers. A nationwide local retail sales finder, SaleLocator offers the country's largest collection of in-store sale information to help bargain hunters find the best ongoing sales near them. This has been added to [ShoppingBots and Online Shopping Resources 2011](#)

### **Updated> Online Research Tools White Paper Link Compilation**

<http://www.OnlineResearchTools.info/>

The white paper link compilation *Online Research Tools* by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been updated! It is a comprehensive listing of online research tools that offer various downloadable as well as web applications to allow you to do your research and searching on the Internet far more effective and productive. It is now a freely available 200 page .pdf document (1.02MB) that can be downloaded from the above URL. Other white papers and resources on information retrieval, information extraction and deep web research by Marcus P. Zillman, M.S., A.M.H.A. are available by clicking [here](#). The Online Research Tools White Paper Link Compilation was updated **April 15, 2011.**

## **Aesthetics + Computation Group: MIT Media Laboratory**

<http://acg.media.mit.edu/projects/>

The Aesthetics + Computation Group (ACG) of the MIT Media Laboratory is populated with people who have tremendous technical and artistic talents. The goal of the group is to encourage the "design of advanced system architectures and thought processes to enable the creation of (as yet) unimaginable forms and spaces." Upon entering the website, visitors may feel like they have stumbled upon an old factory-turned-loft, with the website's gray, yellow, and orange color scheme and spare font. The "Projects" section of the website has 20 current projects, plus multiple years of "Previous" projects, and a dozen or more "Theses" written by the participants in the ACG, at the end of their time there. Some of the projects include "Cinema Fabrique", which aims to produce "engaging cinematic experiences in realtime for live audiences through natural language and gestural control." "Treehouse Studio" is a project to teach children and adults about the digital arts and design using online exercises, tools, and activities. Finally, the problem of machines lacking a sense of space is explored in the project titled "Installation". From The Scout Report, Copyright Internet Scout 1994-2011.

## **Vincent Voice Library**

<http://vvl.lib.msu.edu/>

Based at the Michigan State University Libraries, the Vincent Voice Library is the largest academic voice library in the United States. The majority of the items in the collection are stored on reels of magnetic recording tape, and they include speeches, interviews, and lectures. The library began as the private collection of G. Robert Vincent, who was a noted sound engineer and pioneer in the field of recorded sound. On this site, visitors can peruse the Library's finding aids and their "Galleries" section. In the "Galleries" section, visitors can look over a selection of recordings by 20th century U.S. Presidents and their Michigan Writers Series. The presidents featured here include Warren G. Harding, Gerald Ford, and Harry S. Truman, among others. Moving on, the Michigan Writers Series "highlights the literary work of important writers who live in Michigan, including Terry Blackhawk, Patricia Clark, and Sarah Yettel. Overall, it's a great resource, and one that merits several visits. From The Scout Report, Copyright Internet Scout 1994-2011.

### **New England Complex Systems Institute**

<http://www.necsi.edu/>

The New England Complex Systems Institute (NECSI) is an independent academic research and educational institution that uses complex systems, the new interdisciplinary field of science, to approach the problems of the world today. The NECSI website states that they are examining subjects that include Haiti, ethnic violence, and economic market interdependence. Visitors interested in learning what complex systems involve should read the materials in the "About Complex Systems" link (found on the left menu on the homepage) and its four subtopics, which include a "concept map" and "visualizations". The "Research/Publications" link (also found at the top of the left menu) has a dozen or so topics that include healthcare, military conflict, and education. Visitors can click on each topic for a synopsis of the problem. Below each synopsis, visitors will find links to book chapters and articles that address the problem using the complex systems approach. From the "Books and Journals" link near the bottom of the menu on the homepage, visitors can download the full course/seminar textbook "Dynamics of Complex Systems" by the president of NECSI, Yaneer Bar-Yam. From The Scout Report, Copyright Internet Scout 1994-2011. <http://scout.wisc.edu/>. This has been added to [Research Resources](#) Subject Tracer™ Information Blog.

### **May 2011 Zillman Column - Online Grant Resources**

[http://columns.virtualprivatelibrary.net/Online\\_Grant\\_Res\\_May11\\_Column.pdf](http://columns.virtualprivatelibrary.net/Online_Grant_Res_May11_Column.pdf)

<http://www.zillmancolumns.com/>

<http://www.GrantResources.info/>

The May 2011 Zillman Column is now available and is titled **Online Grant Resources**. This May 2011 column is a comprehensive list of resources and sites that give you the latest and most important information concerning online grants available over the Internet including related and associated resources and sites. Download this excellent freely available 16 page .pdf (190KB) column today and begin your search for that special grant designed for your business or non profit group!!

### **Ditto - What Are You Up To?**

<http://www.ditto.me/>

Looking to hang out? Find out what your friends are up to, have a conversation, or get a group together. Ditto makes it easy to get recommendations about restaurants, movies and things to do. ## **FBI Records - The Vault**

<http://vault.fbi.gov/>

The Vault is their new electronic reading room, containing more than 2,000 documents that have been scanned from paper into digital copies so you can read them in the comfort of your home or office. Included here are more than 25 new files that have been released to the public but never added to this website; dozens of records previously posted on our site but removed as requests diminished; and files from our previous electronic reading room. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

## **International Journal of Humanities and Social Science (IJHSS)**

<http://ijhssnet.com/>

The main objective of International Journal of Humanities and Social Science (IJHSS) is to provide an intellectual platform for the international scholars. IJHSS aims to promote interdisciplinary studies in humanities and social science and become the leading journal in humanities and social science in the world. The journal publishes research papers in the fields of humanities and social science such as anthropology, business studies, communication studies, corporate governance, criminology, crosscultural studies, demography, development studies, economics, education, ethics, geography, history, industrial relations, information science, international relations, law, linguistics, library science, media studies, methodology, philosophy, political science, population Studies, psychology, public administration, sociology, social welfare, linguistics, literature, paralegal, performing arts (music, theatre & dance), religious studies, visual arts, women studies and so on. IJHSS publishes original papers, review papers, conceptual framework, analytical and simulation models, case studies, empirical research, technical notes, and book reviews. Special Issues devoted to important topics in humanities and social science will occasionally be published. International Journal of Humanities and Social Science is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

## **Diagnosis - Medical Drug Search Engine**

<http://www.diagnosis.com/>

Diagnosis is the premiere independent European source for medical drug information. Together with national and European authorities we provide verified package leaflets for patients and professional information for doctors. This has been added to [Healthcare Resources](#) Subject Tracer™.

## **2010 Census**

<http://2010.census.gov/2010census/>

The U.S. Census counts every resident in the United States. It is mandated by Article I, Section 2 of the Constitution and takes place every 10 years. The data collected by the decennial census determine the number of seats each state has in the U.S. House of Representatives and is also used to distribute billions in federal funds to local

communities. The 2010 Census represented the most massive participation movement ever witnessed in our country. Approximately 74 percent of the households returned their census forms by mail; the remaining households were counted by census workers walking neighborhoods throughout the United States. National and state population totals from the 2010 Census were released on December 21, 2010. Redistricting data, which include additional state, county and local counts, will be released starting in February 2011. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This will be added to [Statistics Resources](#) Subject Tracer™.

### **Federal Register**

<http://www.gpo.gov/fdsys/browse/collection.action?collectionCode=FR>

Published by the Office of the Federal Register, National Archives and Records Administration (NARA), the Federal Register is the official daily publication for rules, proposed rules, and notices of Federal agencies and organizations, as well as executive orders and other presidential documents. It is updated daily by 6 a.m. and is published Monday through Friday, except Federal holidays. FDsys contains Federal Register volumes from 59 (1994) to the present. Documents are available in Summary, PDF, ASCII text, or HTML format. HTML documents are available from 2000 forward and provide hypertext links to Web sites mentioned in the FR document. The active HTTP-link feature will be added to previous Federal Register databases in the near future. The HTML documents can be saved as text files with no loss or change in data. The Unified Agenda, which appears twice a year in the printed version of the Federal Register, is maintained as a separate application on FDsys. Frequently requested materials from the Federal Register: a) Grant information, and b) Relative Value Units (RVU) -- Also known as Unique Physician Fee Schedule (RVUs are released once a year, usually during November). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog. This has been added to [Grant Resources](#) Subject Tracer™ Information Blog.

### **International Journal of Environmental Research and Public Health (IJERPH)**

<http://www.mdpi.com/journal/ijerph>

International Journal of Environmental Research and Public Health (IJERPH) is a peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications in the interdisciplinary area of environmental health sciences and public health. It links several scientific disciplines including biology, biochemistry, biotechnology, cellular and molecular biology, chemistry, computer science, ecology, engineering, epidemiology, genetics, immunology, microbiology, oncology, pathology, pharmacology, and toxicology, in an integrated fashion, to address critical issues related to environmental quality and public health. Therefore, IJERPH focuses on the publication of scientific and technical information on the impacts of natural phenomena and anthropogenic factors on the quality of our environment, the interrelationships between environmental health and the quality of life, as well as the

© 2011 Marcus P. Zillman, M.S., A.M.H.A.

socio-cultural, political, economic, and legal considerations related to environmental stewardship and public health. The primary areas of research interests to the IJERPH include:

- \* Gene-environment interactions
- \* Environmental genomics and proteomics
- \* Environmental toxicology, mutagenesis and carcinogenesis
- \* Environmental epidemiology and disease control
- \* Health risk assessment and management
- \* Ecotoxicology, and ecological risk assessment and management
- \* Natural resources damage assessment
- \* Environmental chemistry and computational modeling
- \* Environmental policy and management
- \* Environmental engineering and biotechnology
- \* Emerging issues in environmental health and diseases
- \* Environmental education and public health

Therefore this international journal covers a broad spectrum of important topics which are relevant to environmental health sciences and public health protection. It provides comprehensive and unique information with a worldwide readership. Emphasizing holistic approach, the journal serves as a comprehensive and multidisciplinary platform, addressing important public health issues associated with environmental pollution and degradation. International Journal of Environmental Research and Public Health is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **Twister Tracker - Real Time Accurate Tornado Tracking**

<http://www.twistertracker.com/>

Twister Tracker is next generation of severe weather monitoring and tracking. Our product allows you to track tornadoes in real-time as they are happening. You'll never have to wait for the next update from your local news or weather outlet to have an estimated location of tornado. Twister Tracker works on your favorite mobile device as well so if you are away from home you'll still have the latest severe weather information at your fingertips. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **SeeClickFix - Report Non-Emergency Issues and Receive Alerts in Your Neighborhood**

<http://www.seeclickfix.com/>

SeeClickFix allows anyone to report and track non-emergency issues anywhere in the world via the internet. This empowers citizens, community groups, media organizations and governments to take care of and improve their neighborhoods. Two heads are better than one and 300 heads are better than two. In computer terminology, distributed sensing is particularly powerful at recognizing patterns, such as those that gradually take shape on

a street. Besides, the government can't be in all places at all times. We make it easy and fun for everyone to see, click and fix. Citizens who take the time to report even minor issues and see them fixed are likely to get more engaged in their local communities. It's called a self-reinforcing loop. This also makes people happy and everyone benefits from that. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

### **WatchKnow - Free Videos For Students To Learn From**

<http://www.watchknow.org/>

WatchKnow has indexed over 20,000 educational videos, placing them into a directory of over 3,000 categories. The videos are available without any registration or fees to teachers in the classroom and to students at home 24/7. Users can dive into our innovative directory or search for videos by subject and age level. Video titles, descriptions, age level information, and ratings are all edited for usefulness. Our Web site invites broad participation in a new kind of wiki system, guided by teachers. They have had a tremendously positive response from educators to the website. If we continue to work together, they can create an incredible, free, educational resource for students across the world. This has been added to [Tutorial Resources](#) Subject Tracer™.

### **Australasian Journal of Regional Studies**

<http://www.anzrsai.org/index.pl?page=9>

The Australasian Journal of Regional Studies is published by the Australia and New Zealand Regional Science Association International Inc. (ANZRSAI), which is a non-profit organisation dedicated to the promotion of efficient and effective regional development policies through research, education and the discussion of ideas. Its interests cover a wide range of Australian and international regional issues with a major focus on the Asia-Pacific region. Its goal is to provide a platform for a multi-disciplinary approach to regional analysis. Submissions which fall within this general framework of regional analysis, policy, practice and development are welcome. The journal includes research notes and reviews of books, is a refereed journal published three times yearly. The website contains all issues of the journal from 2001 onwards, with the latest issue being available to members and subscribers only.

### **321Meeting - Unlimited Online Meetings**

<http://www.321meet.com/>

321 Meet is the easiest way to share your screen with anyone who is online at the same time. Typically, you will call someone on the phone to discuss a sale or an issue and find out that you need to show them something - or - that they need to show you something. With just a few clicks - and no downloads - you will be in visual contact! Signing up for an account just requires you to give us a name, email, and password. Once you have an account there are just 4 simple steps that you need to follow to start showing someone else your screen. It can be used for: a) On the fly sales presentations - make it possible for a lead on the phone to see your presentation or product with just a few simple

instructions; b) Pre-arranged or ad hoc meetings - make it possible to meet online to show presentations to each other; and c) Service and support - with a few clicks you can let a user show you what they are experience on their screen. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ Information Blog.

### **Webinos - Secure Web Operating System Application Delivery Environment**

<http://webinos.org/>

The webinos project will define and deliver an Open Source Platform and software components for the Future Internet in the form of web runtime extensions, to enable web applications and services to be used and shared consistently and securely over a broad spectrum of converged and connected devices, including mobile, PC, home media (TV) and in-car units. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Quotegine - Your Online Quote Engine**

<http://www.quotegine.com/>

Quotegine is an online tool that enables you to create dynamic and professional proposals. Quotegine proposals are much more powerful than a standard Word document proposal. They are easier to create, have more features, are interactive and provide trackable results. Quotegine allows for team collaboration on sales proposals as well. This tool can be used by literally any type of organization or industry. This has been added to [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **International Journal on Computer Trends and Technology (IJCTT)**

<http://www.ijcttjournal.org/>

International Journal on Computer Trends and Technology (IJCTT) is an international journal for publication of new ideas founded by engineers, academicians and corporate people. The research results and fundamental advances are all aspects of computer science trends & technology and various engineering discipline. The core of the vision IJCTT is sharing the innovative ideas and current trends in computer science engineering. In every year majority of the research efforts get lost due to lack of effective scientific archival systems. It also provides a place for high opportunities for practitioners, corporate people, MPhil student, PhD students to present ongoing research and development in these areas. International Journal on Computer Trends and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **eBackpack - Simple Secure Educational Sharing**

<https://www.ebackpack.com/>

Teachers: Save time by making changes once and eliminate duplicated efforts! eBackpack provides secure homework drop boxes and allows you to distribute handouts and assess student work easily. Take control over your classroom. It has never been

easier to interact with students, parents, and colleagues. Your materials are at your fingertips! eBackpack lets you focus on teaching, not paperwork!

### **IssueMap - Joins Your Data to Boundaries So That You Can Easily Create Thematic Maps and Share Online**

<http://issuemap.org/>

IssueMap is a project by the FCC and FortiusOne to make it easier for citizens to create their own maps and share them widely. The process is super simple. You just need a spreadsheet or table of data that references a common geographic boundary and a set of values you would like to map to those boundaries. Follow the simple two step process and you'll have a thematic map you can share across your social networks (Twitter, Facebook, email) and your audience can grab the map as an embed, download an image, grab the map as KML or get the raw data as a .csv. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **twitQA - Question and Answers on Twitter**

<http://www.twitqa.com/>

TwitQA is the best way to ask or answer a question and it's fast and easy. twitqa is a place where you can see the twitters interacting with each other in a most knowledgeable way. Everything is asked, answered and discussed by people like you. Features include: 1) Discover the questions asked on twitter with Question Spy; 2) Be the first to answer Unanswered Questions; 3) Find more questions in the categories; 4) Answer Questions to be heard; 5) Ask Questions to your followers and to the community; and 6) Shout your questions to the world easily with the share. This has been added to the AnswerSpot [Internet Experts](#) Subject Tracer™.

### **Journal of Knowledge Management, Economics and Information Technology**

<http://www.scientificpapers.org/>

Journal of Knowledge Management, Economics and Information Technology is a journal dedicated to promote and publish original articles in knowledge management, economics and information technology, aim to reduce the gap between research and practice. It contributes to the development of theory and practice of knowledge management, economics and information technology. It accepts academic papers, case studies, articles that contribute to current research areas mentioned. Journal of Knowledge Management, Economics and Information Technology is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format. Content in English.

### **TalkInTheCloud - Hassle Free Audio Conferencing**

<http://www.talkinthecloud.com/>

Personalized greetings, personalized conference room ID numbers, support Skype callers and other "why doesn't my conference call provider have" features. Their system allows you to ping late comers, to know who's on the call, to enjoy super voice quality (unlike those free conference call services after you get a few people on the line!) and industry

### **Sciweavers - Academic Bokmarking Network Aggregates Links to Research Papers Preprints**

<http://www.sciweavers.org/>

Sciweavers is an academic bookmarking network that aggregates links to research paper preprints then categorizes them into their respected proceedings. The preprint links of a given proceedings are sorted using different mechanisms derived from our traffic to help researchers quickly discover top ranked papers. Moreover, Sciweavers offers very useful free online academic tools. Our mission is to promote significant work and author visibility. This has been added to Knowledge Discovery Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#). This has been added to [Knowledge Discovery](#) Subject Tracer™ Information Blog. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Invisible Hand - Automatically Gets You the Lowest Price On Shopping and Flights**

<http://www.getinvisiblehand.com/>

It's a browser extension which discreetly notifies you if the product or flights you're shopping for is available more cheaply from another retailer or travel site. The notification provides a convenient button which links you straight through to the relevant page on the competing website. It also provides a drop-down menu, so that you can see the prices at the other sites which sell that product or flight. This will be added to [ShoppingBots and Online Shopping 2011](#).

### **TextLang - Instantaneous Language Translation On the Go**

<http://textlang.com/>

Imagine requesting a phrase and a language using your basic phone, and receiving a voice translation instantaneously. Then, you can repeat the phrase yourself or hand your phone to a foreign speaker and immediately communicate your thoughts. This is now possible, and is free. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to the [Entrepreneurial Resources](#) Subject Tracer™.

### **Archives of Clinical Microbiology (ACM)**

<http://www.acmicrob.com/>

Archives of Clinical Microbiology (ACM) is an open access journal with rapid publication of articles in all fields and areas of microbiology and infectious diseases. ACM covers all aspects of basic and clinical microbiology relevant to infectious diseases including current research on diagnosis, management, treatment, preventive measures,

vaccination, and methodology. Clinical microbiology relevant immunology, pathophysiology, genetics, epidemiological, and genomics studies are also welcome.

### **Benzinga - The Trading Idea Network**

<http://www.benzinga.com/>

Benzinga is an innovative news and analysis service that focuses on global markets. Benzinga prides itself on providing original, accurate and timely global financial content every day. The service features content from industry experts and experienced analysts while also covering the news of the day. This will be added to [Financial Sources](#) Subject Tracer™.

### **CronSync - Web Based Time Tracking Solution**

<http://www.cronsync.com/>

You are looking for a web based, transparent, inexpensive and easy to use time tracking solution? You want to simplify and professionalize billing and invoicing procedures? You want to know how profitable clients and projects are? CronSync offers these features: a) Web-based time tracking and invoicing; b) Unlimited number of clients, projects, invoices and team members; c) SSL Encryption; d) Daily data backups; and e) Still free. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Journal of Macrodynamics Analysis (JMDA)**

<http://journals.library.mun.ca/ojs/index.php/jmda>

Journal of Macrodynamics Analysis (JMDA) aims to act as a forum for new ideas and applications of macrodynamics. Responses to each article are encouraged and will be posted on the JMDA website. A selection of the responses may also appear in a subsequent issue, with an opportunity for the author to respond. Thus, the articles in the JMDA, although peer-reviewed, are meant to be considered as works in progress, each contributing towards a larger collaborative project. Journal of Macrodynamics Analysis is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **Amzini - Social Navigator**

<http://www.amzini.com/>

The rise of the social web has created an environment with thousands of interactive networks and communities, each providing a powerful new set of opportunities. With so many powerful and specialized social tools, how do you find which ones are best suited for your needs? Amzini makes it simple to find the community for you. They understand the social landscape and realize that defining 'a great social network' is highly dependent on your unique needs and interests. Amzini has developed a diverse set of navigation tools specialized for this unique climate. Their services allow you to quickly discover and compare options based on the criteria that matter to you. Core Features include: 1) Categorical Search, 2) Keyword Search, 3) Advanced Search, 4) Top 10 Lists, 5) Detailed Site Information, 6) User Ratings and Reviews, 7) Create and Share Favorites Lists, 8) Relevant News and Resources, and 9) Personalized Recommendations. This has

been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

### **Zen.do - Efficient Learning for Passionate Students**

<http://zen.do/>

Students are asked to learn an extraordinary amount of information in a short period of time. When it comes time to review, they have to sort through book and lecture notes to determine what really matters and review it effectively. As a result, they spend a lot of their study time figuring out what to learn and reviewing stuff they already know. Start by doing what you're doing. Yes, that's right. Take notes in class (on your laptop) as you do normally. Just one difference: Whenever you are writing down a concept, name, important date, etc. add a hyphen between a term and definition. Now you're ready to dramatically optimize your studying. Study your notes as flashcards. Indicate what you know and how important it is to you and that's all there is to it. You learn. Zen.do optimize your time. This will be added to [Student Research Resources](#) Subject Tracer™.

### **LogicalDOC - Document Management System**

<http://www.logicaldoc.com/>

LogicalDOC is a document management system targeted to business users. The solution is designed to be very user friendly. This software gives you the possibility to store any type of document, to quickly search for needed information and to cooperate with other team members. LogicalDOC provides a more flexible, cost-effective alternative to proprietary software. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **Rhythmos**

<http://rhythmos.dyndns.org/index.php/Rhythmos/index>

Rhythmos is a quarterly medical journal, aiming at apprising colleagues and readers of the latest events and developments in Cardiac Electrophysiology and Pacing and in Cardiology in general. It publishes editorials, reviews, interviews, original articles, case reports, images in Cardiology and cardiovascular news. Rhythmos is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

### **Inimeo - Easily Create Professional Multimedia Online Presentations**

<https://www.inimeo.com/>

Using inimeo you can easily create professional multimedia online presentations in no time. No software installation necessary, just use your browser! You can embed your Presentations on web pages and even integrate them into your web applications using the inimeo-APIs. This will be added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **uQR.me - Where Your Virtual World Becomes Real**

<http://uqr.me/>

uQR.me is a free social utility designed to share web content with the real world, letting you turn just about anything into a link: a wall, a tree, a shop window, a t-shirt, a pin, a concert poster, a wine bottle, a business card, your own body, the sky's the limit...

uQR.me enables you to connect your online life to the actual one, expanding your horizons, broadening your networks and getting your word out. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Social Informatics](#) Subject Tracer™.

### **PhoneGetters - Call Your Cell Phone**

<http://www.phonegetters.com/>

Lost your cell phone? Call your cell by Internet for free! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Lexis: E-Journal in English Lexicology**

<http://screcherche.univ-lyon3.fr/lexis/>

The aim of Lexis, an e-journal with an international scientific committee is to publish articles about the English lexicon with 2 annual thematic issues, as well as a "book review" section and some special issues (conference proceedings), from a synchronic as well as from a diachronic angle. If the principal aim of the journal is the study of the English lexicon (its formation, its morphology, its evolution, its links with the society, with culture, etc.), the journal could also focus on the links between lexicology and morphology, phonology, syntax, stylistics, etc. Contrastive studies - especially with French - can also be dealt with. Issues generally follow a theme. The journal will accept articles in English and in French. Lexis is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

### **CurrentCircle - Where Professionals Meet**

<http://currentcircle.com/>

Connect with financial and real estate professionals. Get access to unlimited opportunities and build business relationships with investors, mortgage brokers, private lenders developers, financial consultants, commodity brokers, hedge funds, life insurance, REITs, real estate agents and much more. Increase your business traffic by listing commercial loans, real estate for sale, business plans and market your business to professionals in your industry. Create your professional profile with your unique URL name and build your identity online. This has been added to [Social Informatics](#) Subject Tracer™.

### **Flink12 - The Power of 12 Social Networking Platform**

<http://flink12news.com/>

There are many social networking platforms available today to share your public self. But where do you go to privately and safely share your personal, day-to-day thoughts and experiences? Flink12 was created as a safe and secure way to share your private life. It is

Awareness Watch V9N5 May 2011 Newsletter

playful, safe, extremely private and easy to use. A unique way of sharing and communicating, Flink12 allows you to share your life in a meaningful way with the people you know and care about the most. What is a Flink? A Flink is a group of twelve cows. Flink12 allows you to create individual groups of twelve people or Flinks for your friends, family, or coworkers. These Flinks allow you to communicate in a discreet way, sharing professional information with coworkers and personal information with friends and family. These groups of twelve are ideal for sharing different information for different types of relationships. This will be added to [Social Informatics](#) Subject Tracer™.

### **ManageFliiter - Twitter Account Management**

<http://managefliiter.com/>

Twitter account management with the following features: a) Clean up and manage who you follow, b) Find out who isn't following you back, c) Find out which inactive accounts you follow and d) Easily search inside your Twitter stream. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Journal of Nursing**

<http://www.imanagerpublications.com/JournalIntroduction.aspx?journalid=94>

Journal of Nursing focuses on the healthcare of individuals, families and communities to help them attain or recover health and quality of lifethrough their entire life span. The aim of the nursing community worldwide is to ensure quality care for all, while maintaining their code of ethical standards and continuing their education. i-manager's Journal on Nursing is a step towards serving the healthcare community by presenting high quality research and practice papers on innovative techniques and successful practices in nursing with potential to advance knowledge for practice, Education, management or policy.

### **FRANK - Hire and Manage Freelancers**

<http://www.FrankWork.com/>

With FRANK, you get all your freelance contacts in one place. Sort by skills, see who's available and book in seconds with just a few clicks. FRANK lets you 'hold' freelancers in advance for upcoming jobs, locking down the talent you want and avoiding last-minute staffing disasters. FRANK leverages your social media presence by effortlessly building your contact list through your own trusted contacts and friends. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Employment Resources](#) Subject Tracer™. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

### **TradeShift - Revolutionizing Invoicing and More**

<http://tradeshift.com/>

With Tradeshift, every business – from small suppliers to global enterprises – can use the same network, and invite all their suppliers and customers to join. It's easy to get started and the cost savings are significant, as are the environmental benefits of bringing the era

of paper invoicing to an end. And as the world's fastest growing business network, connecting businesses in more than 100 countries, Tradeshift is more than proving its worth. Tradeshift is based in Copenhagen, Denmark with offices, in London (UK), Munich (Germany), Bern (Switzerland) and Brasilia (Brazil). Tradeshift provides an innovative and easy to use business network to send, receive and manage e-invoices. And the best of it all: it's free! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **getupp - Location Based Commitment Service**

<http://www.getupp.com/>

getupp is a location-based commitment service that empowers you to achieve your personal goals and to overcome procrastination. With getupp you can commit to activities that require your presence at a specific location at a certain time, like going to the gym after work, studying in the library on the weekend or getting home on time for dinner. getupp automatically verifies and shares whether you keep or break such commitments. To complete a commitment, show up at the agreed location at the right time, and open the getupp smartphone app to submit your coordinates. Otherwise, in case you fail to show up, your commitment is broken. Outcomes are automatically shared with your friends on Facebook. So if you want to keep your face, you better keep your commitments! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

### **Journal of Medical Imaging and Health Informatics (JMIHI)**

<http://www.aspbs.com/jmihi/>

Journal of Medical Imaging and Health Informatics (JMIHI) is a medium to disseminate novel experimental and theoretical research results in the field of biomedicine, biology, clinical, rehabilitation engineering, medical image processing, bio-computing, D2H2, and other health related areas. As an example, the Distributed Diagnosis and Home Healthcare (D2H2) is an outgrowth of miniaturization and integration of instrumentation (wearable and implanted) for measurement, computing, signal processing, communication, and healthcare informatics. This integrative systems approach will revolutionize the practice of medicine in the new century, enabling the delivery of healthcare to patients anywhere in the world by combining bio-sensing and information technologies with medical expertise. It will facilitate the transition from "central" and "hospital-based" medical diagnosis and healthcare delivery to "distributed" diagnosis and "home" healthcare. In other words, the existing medical systems are constantly being modified to fit particular circumstances and to solve specific problems such as home-based diagnosis and healthcare. The concept of D2H2 aims to improve the quality of patient care and patient wellness by transforming the delivery of healthcare from a central, hospital-based system to one that is more distributed and home-based. Different medical imaging modalities used for extraction of information from MRI, CT, Ultrasound, X-ray, Thermal, Molecular and fusion of its techniques will also be the focus of this journal. JMIHI publishes Original Research Articles, Reviews, Technical Notes and Rapid Communications.

## **Watch™ Paper Review**

**The impact of group attributes on communication activity and shared language in online communities** by *David A. Huffaker*

<http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3450>

### **Abstract:**

This study examines how group size, network density, participation equality and member turnover are related to communication activity and shared language in online communities. It examines the social interactions of sixteen randomly selected discussion groups (33,450 participants and 632,622 messages) covering topics in politics, health, hobbies, and science and technology over a 20-month period. It relies on social network analysis, computational linguistics and hierarchical linear modeling to uncover the extent to which group attributes impact message replies, conversational thread length and shared word choices. The results show that group size and network density are positively related to communication activity and shared language, while participation equality and member turnover are not significant predictors.
