

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V9N8

August 2011

Welcome to the V9N8 August 2011 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Online Social Networking**. These sites, resources and tools bring together all the latest information on social networking from the Internet. These resources will make an excellent bookmark for online social networking and to develop a critical path and network that will guide you through all the latest happenings!

Online Social Networking

An Internet MiniGuide Annotated Link Compilation

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director – Virtual Private Library
zillman@virtualprivatelibrary.com

Online social networks are becoming a true growth point of the Internet. As individuals constantly desire to interact with each other both in business and in personal contacts, the ability for the Internet to deliver this networking capability grows stronger and stronger. There are a number of excellent resources available to anyone interested in becoming part of the online social networking community of the Internet. I have listed and briefly annotated a number of resources and sites that will start you on your knowledge discovery for online social networking on the Internet. This Internet MiniGuide on Online Social Networking is a freely available download at the below Subject Tracer™ Information Blog and is frequently updated. Also available as a free download is the white paper link compilation

100 Million Spiders : An Experiment In Social Networking

<http://www.100millionspiders.com/>

100 Million Spiders is a social networking experiment operating on a principle similar to 6 degrees of separation. It creates social networks between users (friends, acquaintances and colleagues) by collating threads. It is a closed community, if you have not been sent an invite by someone on the system you'll not be able to use the system.

Affinity Engines

<http://www.AffinityEngines.com/>

Affinity-based social networking. Affinity Engines is a technology company that provides a secure infrastructure for private-label online social networks. Affinity networks help individuals build and maintain personal and professional connections in a trusted and secure online community

AlwaysOn

<http://alwayson-network.com/>

AO is the only media brand to combine traditional news and analysis, participatory journalism (blogging), and a powerful social network (AO Zaibatsu) for a growing membership base of senior executives, technology geeks, and investors from a broad selection of industries. No other media brand has dared allow such openness and collaboration amongst its readers and event participants.

Business Parc

<http://www.BusinessParc.com/>

Grant Watling founded Businessparc.com Limited in March 2003 to help internet users find products and services in a new way. Instead of the user making contact with businesses to research prices and services, Businessparc will forward requests to all relevant businesses and make the contacts free of charge.

Can You Connect – Personal and Professional Social Networking

<http://www.canyouconnect.com/>

Want to tap the true power of your personal and professional networks? Join Can You Connect today and connect with your friends, family, coworkers, community, and thousands of like-minded people throughout the world. We offer dozens of fun, powerful, and easy to use tools to help you create, manage, and use your social networks.

Classmates Online

<http://www.classmates.com/>

Classmates Online, Inc., founded in 1995 and based in Renton, WA, is a leader in online community-based networking. The Company operates Classmates.com, connecting more than 38 million members with friends and acquaintances from school, work and the military.

Craigslist

<http://www.Craigslist.org/>

Craigslist is about 1) giving each other a break, getting the word out about everyday, real-world stuff; 2) restoring the human voice to the Internet, in a humane, non-commercial environment; 3) keeping things simple, common-sense, down-to-earth, honest, very real; 4) providing an alternative to impersonal, big-media sites; 5) being inclusive, giving a voice to the disenfranchised, democratizing ...; and 6) being a collection of communities with similar spirit, not a single monolithic entity.

del.icio.us

<http://del.icio.us/>

del.icio.us is a social bookmarks manager. It allows you to easily add sites you like to your personal collection of links, to categorize those sites with keywords, and to share your collection not only between your own browsers and machines, but also with others. What makes del.icio.us a social system is its ability to let you see the links that others have collected, as well as showing you who else has bookmarked a specific site. You can also view the links collected by others, and subscribe to the links of people whose lists you find interesting.

Friendster (beta)

<http://www.friendster.com/>

Friendster is an online community that connects people through networks of friends for dating or making new friends.

GoodContacts

<http://www.GoodContacts.com/>

GoodContacts is a world leader in managing contact data quality. The Professional and Enterprise product families deliver solutions that span customers ranging in size from a individual business professional to a large enterprise. Solo products verify and update contact data for professionals and businesses managing large contact lists in Outlook, Outlook Express or ACT! while Enterprise products maintain the integrity and accuracy of contact data across enterprise-wide databases, CRMs or personal contact managers.

Guide To Online Social Networks, Social Software and Business Communities

<http://www.onlinebusinessnetworks.com/online-social-networks-guide/index.php>

You may notice, not all of the sites covered here fall into the category "social networking sites". They have elected not to make that distinction because... a) social networking takes place in online communities whether they are explicitly known as "social networking sites" or not, and b) the boundaries are just too fuzzy.

Huminty – Social Networking

<http://www.huminty.com/>

They believe that people will achieve more by helping each other and that it is time the Internet evolves for people as much as it has evolved for corporates. They believe the

Awareness Watch V9N8 August 2011 Newsletter

Internet's greatness is the interaction it brings between people and they hope that Huminity will take this one step further, and through combining Instant Messaging with Social Networks open a whole range of possibilities to enrich everyone's life. Huminity is built to facilitate friendships, make it easy for people to find and make friends, find jobs faster, make better deals and reach anyone in the world. Above all - to have fun!

IKNOW (Inquiring Knowledge Networks on the Web)

<http://www.spcomm.uiuc.edu/Projects/TECLAB/IKNOW/>

In short, IKNOW will answer the following: 1) Who knows who?, 2) Who knows what? 3) Who knows who knows who? and 4) Who knows who knows what?

Institute for Social Network Analysis of the Economy (ISNAE)

<http://www.isnae.org/index.html>

The purpose of ISNAE is to study social networks and use the resulting knowledge to promote economic growth and social well-being.

Its Just Coffee – A New Stir In Online Dating

<http://www.itsjustcoffee.com/>

At ItsJustCoffee.com your soul mate could be a sip away. So sit back, relax, and get ready to meet some intelligent, authentic, interesting people. But don't stay online too long - the local coffeehouse is where you'll really see if the spice is right. And remember, when you're ready for that first in-person encounter, keep it coffee, keep it simple.

JigSaw – The Business Contact Marketplace

<http://jigsaw.com/>

Jigsaw is an Online Business Contact Marketplace where business people buy, sell and trade business contact information. Jigsaw is a collaborative system. Each member provides a few pieces of the puzzle. Jigsaw assembles them for the benefit of the community. Jigsaw is a place to find the highest quality contacts in existence. All contacts have been added by Jigsaw members and include phone number and e-mail.

Journal of Digital Information A SPECIAL ISSUE on Social Aspects of Digital Information in Perspective (Volume 5, issue 4, December 2004)

<http://jodi.ecs.soton.ac.uk/?vol=5&iss=4>

This special issue showcases a series of studies that are guided by the methods and perspectives of Social Informatics. This line of inquiry extends a research stream of the late Rob Kling, a pioneer in social informatics studies who strived for over 30 years to make social issues central to discussions about computing and information systems.

LinkedIn

<http://www.linkedin.com/>

Find the people you need through the people you trust - Your trusted friends and colleagues can help put you in touch with many more people than you expect; and those people can refer you to thousands of contacts.

Midentity

<http://www.midentity.com/>

Midentity helps you stay connected with important contacts by allowing you to create your own Business and Personal Profiles which you can share with them. If you change any of your contact details, simply update your profile(s) and all the contacts you've shared them with will receive the update instantly.

Military Advantage

<http://www.military.com/>

Military.com is the largest online military destination, offering free resources to serve, connect, and inform the 30 million Americans with military affinity, including active duty, reservists, guard members, retirees, veterans, family members, defense workers and those considering military careers.

Messenger Taps Social Nets

<http://snipurl.com/7rn8>

It often ends up that the information you need is just beyond your immediate reach, but probably sits at the ready in the mind of an unidentified friend of a friend of a friend. Extending the capabilities of ubiquitous communications tools like instant messaging and email could make that information easier to come by.

NetMiner - Social Network Analyzer

<http://zillman.blogspot.com/2004/12/netminer-social-network-analyzer.html>

NetMiner can be used for general research and teaching in social networks. Also, it can be effectively applied to various business fields, where network-structural factors have great deal of influences on the performance: e.g. intra- and inter-organizational, financial, Web, criminal/intelligence, informetric, telecommunication, distribution, transportation networks.

Online Business Networks

<http://www.onlinebusinessnetworks.com/>

This site is a guide to social network software, online communities, and other tools that help you leverage the internet to build more and better business relationships.

Online Social Networking for Business: An Interview with Konstantin Guericke, Marketing VP, LinkedIn By Debbie Bardon

<http://www.infotoday.com/online/nov04/bardon.shtml>

Online social networking is a hot topic in Internet circles. These online communities claim to create networks of friends and business colleagues based on referrals from other friends and colleagues. They connect people based on who those people know rather than who they are.

Open Business Club (openBC)

<http://www.openbc.com/>

The Open Business Club (openBC) is the worlds first multi-lingual on-line contact exchange and business networking club for professionals.

Orkut

<http://www.orkut.com/>

Orkut is an online community that connects people through a network of trusted friends. They are committed to providing an online meeting place where people can socialize, make new acquaintances and find others who share their interests.

Pal Junction – Meet With the Friends Of Your Friends

<http://www.PalJunction.com/>

Helping you find friends, dates, roommates, employees, employers, etc. etc. through your network of friends. Helping you build your own social network!

PeopleAggregator

<http://www.PeopleAggregator.com/>

An Open Source Social Network

Plaxo

<http://www.plaxo.com/>

Plaxo, Inc. keeps people connected by solving the common and frustrating problem of out-of-date contact information. In 2000, Sean Parker, co-founder of Napster, joined forces with two Stanford engineers, Todd Masonis and Cameron Ring, to create Plaxo, a service that securely updates and maintains the information in your address book.

Refernet for Referrals: Business Networking

<http://www.refernet.net/>

Refernet helps entrepreneurs find partners and referrals through online business networking. Business Networking is proven to be one of the best methods to establish credibility, build your contact list and obtain quality business referrals.

Semantic Web Draws On the Power of Friends

<http://www.freepint.com/issues/270504.htm#feature>

In today's environment of constant "Googling" of people's background, where someone's name or other identifying features are entered into the popular search engine for the sake of finding background information, ShareYourExperiences.com offers an unparalleled service. This online community allows people to directly connect with other individuals who have had direct positive or negative experiences with their search subjects.

Spoke - Extending Business Relationships

<http://www.spoke.com/>

Delivering insight, influence and access through relationships for greater business advantage.

SocialGrid

<http://www.socialgrid.com/>

SocialGrid was founded to provide the world with free search system to promote social networking and enable people to find their soulmate in a way that is cost-effective and universally appealing. SocialGrid is dedicated primarily to improving search quality for its members.

Social-informatics

<http://www.Social-informatics.org/>

The notion of social informatics relates to the interaction between society and information-communication technologies (ICT). In its broadest sense it includes (1) the social consequences of ICT at micro (e.g. social aspects of ICT applications in organisations) as well as at macro (e.g. information society studies), (2) the application of ICT in areas of social science and (3) the use ICT as a tool - within a general context of social science methodology - for studying social phenomena.

Social Networking Services Meta List

<http://socialsoftware.weblogsinc.com/entry/9817137581524458/>

The Social Networking Services Meta List. is broken out into nine loose categories that will be shifting soon. These social networking categories are: business; common interest; dating; face-to-face meeting facilitation; friend; MoSoSo (Mobile Social Software); pet; photo; and 'edge' cases or social networking 'plus' sites.

Software Product Marketing Quickbase for Social Networking Sites

<https://www.quickbase.com/db/9f72vfgx?a=q&qid=1>

Social networking sites and software database created by Cynthia Typaldos but is updated and maintained by everyone. A good resource listing many new sites and resource software.

The FOAF Project - Friend of a Friend

<http://www.foaf-project.org/>

The Friend of a Friend (FOAF) project is about creating a Web of machine-readable homepages describing people, the links between them and the things they create and do.

The Social Software Weblog

<http://socialsoftware.weblogsinc.com/>

The Social Software Weblog by Judith Meskill is the home of the Social Networking Services meta Lists as well as a very active Blog on all the latest and exciting happenings in online social networking.

ThinkBot

<http://www.pmbrowser.info/thinkbot.htm>

ThinkBot is an easy way to find other people who are thinking about the same things as you. With a simple command, you can search Thinkbot's database of users and chat instantly to someone who shares your thoughts.

Tickle Social Network

<http://web.tickle.com/>

Tickle is the leading interpersonal media company, providing self-discovery, matchmaking, and social networking services to more than 18 million active members in its community worldwide. Formerly known as Emode.com, Tickle was founded on the belief that personal insight and connections to others could be both scientific and fun.

Tribe

<http://www.Tribe.net>

This site is devoted to tapping the power of social networks. Their goal is to provide tools that help make your network most useful.

Visible Path

<http://www.visiblepath.com/>

Visible Path delivers unprecedented reach into companies and access to decision-makers by allowing sales teams to discreetly leverage the relationship capital of the enterprise throughout the sales cycle.

Word of Mouth Research

<http://www.WordofMouthResearch.com/>

WordofMouthResearch.com is a background research tool that allows users to access the valuable information source known as "word-of-mouth" on an international scale. People submit their shared experiences on people who they know. The authors of such information are either looking for knowledge or have knowledge to share.

Zaibatsu

<http://community.alwayson-network.com/>

MedlinePlus Connect

<http://www.nlm.nih.gov/medlineplus/connect/overview.html>

MedlinePlus Connect is a free service of the National Library of Medicine (NLM), National Institutes of Health (NIH), and the Department of Health and Human Services (HHS). This service allows health organizations and health IT providers to link patient portals and electronic health record (EHR) systems to MedlinePlus, an authoritative up-to-date health information resource for patients, families, and health care providers. MedlinePlus Connect accepts requests for information on diagnoses (problem codes), medications, and lab tests, and returns related MedlinePlus information. It is available as a Web application or a Web service. Upon receiving a problem code request, MedlinePlus Connect returns relevant MedlinePlus health topics and other related information. MedlinePlus has hundreds of health topic pages that bring together information from NIH, other U.S. government agencies, and reputable health information providers. Health topic pages cover a wide range of conditions and wellness issues, and include key resources to inform patients about their health: overviews, information on symptoms and treatments, recent health news, clinical trials, and much more. You can browse the list of all health topics. This will be added to [Healthcare Resources](#) Subject Tracer™ Information Blog. This will be added to the code of [eHealthcareBot](#) Search Engine.

Project Insight - Web Based Project Management Software

<http://www.projectinsight.net/>

Project management software by Project Insight is the leading solution in the mid-market. Many high end portfolio and project management systems are overkill for many project teams. Most low end and free project management tools lack functionality for the more experienced project manager. Project Insight bridges savvy project managers, who require robust project management features, with team members that want an easy to use project management solution. The portfolio, project and resource management and collaboration features of Project Insight are second to none. With advanced functionality like intelligent scheduling, project managers can leverage task dependencies to shift tasks

on schedules with minimal effort. For resource managers, our cross project resource allocation allows the balancing of work across all projects in the portfolio using drag and drop. Project team members know what to work on as tasks are distributed to their personalized portals in real-time. They are empowered to update their own activities and work with just a couple of clicks. Now project managers no longer have to run around asking for status updates! Projects and tasks are updated in real-time allowing management and executives to view project status with dashboards and reports. No more waiting for manual report updates. Set up is easy. If you know how to fill out a web form, you can set our software up within a day. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Brock Education: A Journal of Educational Research and Practice

<http://brocked.ed.brocku.ca/>

Brock Education: A Journal of Educational Research and Practice is a peer-reviewed Canadian journal that publishes two issues a year. Brock Education welcomes papers from authors with an interest in the research and practice of teaching, teacher education and teacher development. The main purpose of the journal is to foster practitioner inquiry (in schools, universities and beyond) and promote a deeper understanding of the experiences of teachers, teacher educators and learners. This open-access journal is a forum for educators and scholars to disseminate their work and make a substantial contribution to the field in Canada and around the world.

My eStore App

<http://www.myestoreapp.com/index.php>

My eStore makes online selling as easy as possible. You don't need to: code, hire a developer, pay lots of money, waste time trying to build one into your site and etc. Their app lets you spend your quality time (because time is money) selling your actual product or service. They understand the complications of having to set up a pre-made store, setting up the database and configuring the source. That's why they have done it for you already. It takes a single line of javascript (copied and pasted into your site) to deploy the fully functional store, which runs directly on your site. Setting up a store just takes 5 minutes. You just set your store name, paypal email, color-theme and product layout variation; Then add your products (image, information and price). They host the database / data, images and scripts, so you don't have to upload or set up anything. This will be added to [eCommerce Resources](#) Subject Tracer™.

Norton Rescue Tools

<http://security.symantec.com/nbrt/overview.aspx?ssdc=221&lcid=1033&serviceid=81&pName=N360&pversionid=5.1&origin=scsum&env=prod&layout=esd&tooltype=nmr&osver=6.1>

Fix even the most severely infected computers with **Norton Rescue Tools**. Sometimes computers become infected with difficult to remove "scareware" programs or they get so infected by threats that are deeply buried in the computer's operating system that special tools are required to remove them. That's where Norton Rescue Tools can help. The

Introductory Astronomy Clearinghouse: Labs

<http://www.astro.washington.edu/courses/labs/clearinghouse/labs/labs.html>

Created by staff members at the University of Washington's Astronomy Department, this online clearinghouse consists of applications, lectures, and in-class activities is designed to be used in a range of introductory astronomy courses. The materials here are divided into eight areas, including "Observing the Sky", "Solar System", "Stars", and "Milky Way Galaxy". Visitors can download each file for their own use, and while there is no formal search engine on the site, it's easy enough to just scroll down to see each item. The "The Sun" and "Stars" areas are both true gems, and they each contain at least five separate items that can be used in classrooms to illustrate ideas and concepts that include distance measures and identifying lines in the solar spectrum. [KMG] From The Scout Report, Copyright Internet Scout 1994-2011. <http://scout.wisc.edu/>. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog.

International Business and Management

<http://www.cscanada.net/index.php/ibm>

International Business and Management aims to stimulate in-depth and rigorous empirical and theoretical research in the field of international business, trade and management. It also intends to encourage research on exploring the changing pattern in international business and management and how it is related to the economic growth of the current world. International Business and Management is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Trackn - Mobile Tracking Service

<http://www.trackn.me/>

Trackn, based in the United Kingdom have created a ground breaking business and family mobile tracking service that improves the way we use your mobile phone to communicate, locate and supervise business colleagues, loved ones, pets, vehicles and other objects from afar. The Trackn service provides live information on your desired group to ensure faithful, non intrusive supervision using your mobile phone or your computer. Through mobile tracking, Trackn can show you where people or objects are located live through map views providing addresses, times and your own set alerts if the user moves into or away from your predefined area. User privacy and communication security is vital for any user of Trackn, the system offers easy set up and intuitive privacy

Mobile Government

<http://www.gsa.gov/portal/category/101571>

Mobile technology is changing the way people find and use information and services. How does government interact with the public in this anytime, anywhere world? This Making Mobile Gov Project is helping agencies work together to make a more open, innovative government to meet 21st century citizen expectations.

They are starting by helping you discover information and make the case for mobile in your agency. Next, they want you to join in and discuss the challenges to mobile gov. Third, they will have a dialogue with people in government, industry, nonprofits, and the general public on how to design this mobile future. Based on your input, they will launch a community-generated wiki with tools to help you build and implement a mobile strategy for your agency and to share resources among agencies. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [New Economy Analytics, Resources and Alerts](#) Subject Tracer™ Information Blog.

Food Desert Locator

<http://www.ers.usda.gov/data/fooddesert/>

Part of the First Lady's Let's Move! initiative, the proposed Healthy Food Financing Initiative (HFFI) will expand the availability of nutritious food to food deserts—low-income communities without ready access to healthy and affordable food—by developing and equipping grocery stores, small retailers, corner stores, and farmers markets with fresh and healthy food. The HFFI is a partnership between the Treasury Department, Health and Human Services, and the Agriculture Department (USDA). An Interagency Working Group from the three departments, along with staff from the Economic Research Service (ERS/USDA), developed a definition of food deserts to be used in determining eligibility for HFFI funds. The objectives of the Food Desert Locator are: a) to present a spatial overview of where food-desert census tracts are located; b) to provide selected population characteristics of food-desert census tracts; and c) to offer data on food-desert census tracts that can be downloaded for community planning or research purposes. The HFFI working group defines a food desert as a low-income census tract where a substantial number or share of residents has low access to a supermarket or large grocery store: 1) To qualify as a “low-income community,” a census tract must have either: 1) a poverty rate of 20 percent or higher, OR 2) a median family income at or below 80 percent of the area's median family income; and 2) To qualify as a “low-access

community,” at least 500 people and/or at least 33 percent of the census tract's population must reside more than one mile from a supermarket or large grocery store (for rural census tracts, the distance is more than 10 miles). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

ITB Journal of Engineering Science

<http://proceedings.itb.ac.id/>

ITB Journal of Engineering Science welcomes original research articles related to the application of physical, biological, chemical and mathematical sciences in engineering problems. Subject areas include aerospace engineering, biotechnology, chemical engineering, civil engineering, earth science, electrical engineering, engineering physics, environmental engineering, fluid dynamics, information engineering, mechanical engineering, materials science, manufacturing processes, microelectronics and petroleum engineering. ITB Journal of Engineering Science is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

ShowMe - Learn and Teach Anything

<http://www.showmeapp.com/>

ShowMe is a global learning community - a place where anyone can learn or teach anything. Their mission is to make learning as accessible as possible, while giving great teachers and experts a platform to reach even more students. Their community has created hundreds of ShowMe's, from chemistry to history to football strategy - and more knowledge is being shared everyday. Join the movement. Help them democratize learning. This has been added to [Tutorial Resources](#) Subject Tracer™. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

Computational Science Education Reference Desk (CSERD)

<http://www.shodor.org/refdesk/>

The Computational Science Education Reference Desk (CSERD) is part of the National Science Digital Library (NSDL) and it receives funding from the National Science Foundation (NSF). The aim of the CSERD is "to help students learn about computational science and to help faculty and teachers incorporate it into the classroom." First-time visitors can learn more in the "Getting Started" area and they can also sign up to create their own account to store various resources for future use. Users can dive right in by clicking on the "Featured Collection" on the left-hand side of the page and there's even a "featured Virtual Manipulative" that's worth a look. The site also contains a special area for students ("For Students") and one "For Educators" that includes information about upcoming educational workshops. Also, the Journal of Computational Science Education is worth a look as well. Finally, educators are also encouraged to submit their own resources for inclusion within the CSERD's metadata catalog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2011. <http://scout.wisc.edu/>

The Astronomy Center

<http://www.astronomycenter.org/>

The American Astronomical Society in Washington, D.C., created the Astronomy Center website to "provide a web-based databank that provides faculty with links to a wide range of teaching and learning resources for [an] Undergraduate Introductory Astronomy course." Faculty are also encouraged to suggest materials to add to the database, as well as to offer their own comments on the materials. Visitors will find that the website can be browsed by topic or by type of resource. Some of the topics include "Cosmic Time and Distance", "Historical Astronomy", and "Exoplanets". Examples of the types of resources available include "Pedagogy", "Simulations", and "Images". In order to demonstrate the size of the solar system, visitors will find that the lab, "The Thousand Yard Model" is valuable for teaching elementary through high school students, and lower undergraduate classes. This has been added to [Astronomy Resources](#) Subject Tracer™ Information Blog. From The Scout Report, Copyright Internet Scout 1994-2011. <http://scout.wisc.edu/>

Canadian Journal of Applied Sciences (CJAS)

<http://canajas.com/>

Canadian Journal of Applied Sciences (CJAS) publishes manuscripts describing the analytical characterization, discovery, methodologies and production of scientific moiety and their utilization with respective therapeutical outcomes. Articles dealing with agents or topics of natural products and semi-synthetic derivatives are also encouraged. Manuscripts will be published as original research papers, reviewed articles, case reports, peer reviews, and short communications. Canadian Journal of Applied Sciences is available free of charge as an Open Access journal on the Internet. Content available in PDF format.

Conceptboard - Realtime Teamwork on Thoughts and Documents

<http://conceptboard.com/>

Conceptboard provides an enormous work area, similar to a large flip chart that you can access via your browser and where you can work together with any number of people. You can upload your documents, proposals, presentations, technical drawings, etc. onto a board and add comments. The people you are working with can be in your company, or they may be guests that may work with you only once. Conceptboard is an online feedback software used to place comments, derive tasks and ultimately achieve the release of your designs and concepts. But not only that: Additionally, your board offers a simple option for starting ad-hoc live meetings. You have the option to expand your drafts directly on the boards using sketches and drawings, and you can link web examples or place a screenshot right next to your draft. The discussion about a design or website feedback produces quick, high quality results and can take place internally, or even with the customer. Conceptboard is a platform used for brainstorming, mind-mapping, collecting ideas and many other creative techniques. Everything you want to present on a bulletin board, or a flip chart can just as easily be created on a Conceptboard – plus: you can work together with participants who are not on-site, you have access to previous versions, you can insert screenshots, documents and references, link your results and

everything you do is clearly documented. Brainstorming can be used more flexibly and produce better results. Conceptboard is a lean online project software that is limited to some of the most essential elements of project management: People, content and results. With Conceptboard the teamwork of the project members is in the foreground, supported by a transparent, consistently available communication interface in the form of the board. Because the application is web-based and easy to operate, it can easily be integrated into existing processes and linked to more complex planning tools such as scheduling or ERP. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Opinionaided - Ask Questions, Give Opinions and Make Friends

<http://www.opinionaided.com/>

A few years ago, Kurani Interactive began incubating Opinionaided with the goal of helping people get quick opinions, in realtime, while they were shopping. After various twists and turns in an effort to get it just right, they launched a simple mobile utility app to achieve that goal in the summer of 2010. Immediately after launch, they were surprised to find that not only were people asking questions about lots of things besides shopping, they were going out of their way to connect with each other. They were pleasantly surprised at how many people loved to help others, leaving a plethora of opinions and advice and, in their own words, getting addicted to that simple action. Since then, their utility has turned into a vibrant community of vocal users that love helping people and connecting with like-minds. They welcome you to become part of one of the first social networks with a purpose. They have a feeling you'll enjoy helping people, benefiting from the timely advice, and spontaneously connecting with people that are a lot like you. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

Crowdbeacon - Location Based Application That Helps People with Relevant, Localized Information

<http://crowdbeacon.com/>

Crowdbeacon is a location-based service focused on providing relevant, localized communication and information to users based on what they need and where they are. Crowdbeacon was created with one goal in mind: to create a location-based application that helped people. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

Houdini - The Magical Human Labor API

<http://houdiniapi.com/>

Actually, it's not magic, it's just instant crowdsourcing. Sometimes you just need a real human. What if you could integrate human labor into any application with just a few lines of code? Features include: 1) Dead Simple - Integrate their code, fund your account, set it and forget it; 2) Cheap - Less expensive than outsourcing. Plus, it's one less thing to manage; 3) Quick and Reliable - Need a five minute turnaround? That's not a problem; and 4) Guaranteed - All work is checked several times, and they guarantee accurate results. This will be added to [Script Resources](#) Subject Tracer™ .

MinuteBox - Social Way To Buy and Sell Expertise

<https://www.minutebox.com/>

They connect you to an expert for you to talk to, about any problem that you just can't solve by yourself. They believe that with a short consultation with a real expert, you can solve your problem in a time and cost efficient manner. If you are a domain expert, MinuteBox offers a simple solution for you to monetise your expertise in small units of time, on whatever social platform you are using. You can take your online reputation with you, and offer your expertise for sale directly from your blog, website and other online community websites. This has been added to [Internet Experts](#) Subject Tracer™ Information Blog.

Yam - Make Meetings Matter

<http://www.yamlabs.com/>

Yam Making Meetings Matter includes: a) Capture - Keep anything and everything meeting-related organized in one secure place; b) Collaborate - Maximize meeting efficiency with real-time collaboration, analysis and decision-making tools, and c) Control - Turn your meeting minutes into trackable and productive action items. Features include: 1) Works for face-to face and remote meetings; 2) Runs in your browser (nothing to download or install); 3) Integrates with Outlook, works well with Skype and WebEx; and 4) Loaded with useful tools that will greatly impact your meeting productivity. Timeslot - Makes Planning Your Day a Breeze

<http://timeslot.me/>

Your day is constantly in flux, and planning it can be a pain. Shape it to your liking without even trying. Simply add items to your day's agenda, and specify how long each will take. Timeslot will automatically generate start and end times for each item, so when you have to make a change, your entire agenda will update to flow around it. You can add and edit items all on the same page, and the only fields you have to set are the name and duration. Everything else is optional. Set an item for at / after / before a certain time. Timeslot will honor your constraints and organize items around them. Prioritize items in your agenda simply by dragging them around. You can edit the agenda of any day in the calendar, in the future or the past, and it will always be available when you log back in. Timeslot makes it easy to see when you have empty space in your agenda so you can accordingly fill it with items as you need. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™ .

Nanomaterials and Nanotechnology

<http://www.intechweb.org/about-nanotechnology-journal.html>

The aim of the journal is to publish peer-reviewed papers at the forefront of nanoscale science and technology, bringing together the science and applications of nanoscale and nanostructured materials with an emphasis on the synthesis, processing, characterization, and applications of materials containing nanometric dimensions or nanostructures that enable novel/enhanced properties or functions.

The journal will highlight continued growth and new challenges in the nanotechnology field, both for application development and for basic research.

Nanomaterials and Nanotechnology publishes articles that focus on, but are not limited to, the following areas:

- * Synthesis of nanosized materials
- * Bottom-up, top-down, and directed-assembly methods for the organization of nanostructures
- * Modeling and simulation of synthesis processes
- * Nanofabrication and processing of nanoscale materials and devices
- * Novel growth and fabrication techniques for nanostructures
- * Characterization of size-dependent properties
- * Nano-characterization techniques
- * Properties of nanoscale materials
- * Structure analysis at atomic, molecular, and nanometric range
- * Realization and application of novel nanostructures and nanodevices
- * Devices and technologies based on the size-dependent electronic, optical, and magnetic properties of nanomaterials

data and digital media from Newspapers, Magazines, Blogs, Books, Wikipedia, Youtube, Twitter, Facebook, Flickr, Social Answers and additional online resources. Zomobo aims to simplify the access to information and content stored in different sites, reducing the time it takes to find relevant and fresh information on the internet. Uses for Zomobo include:

- Access the freshest information and multimedia content about almost any subject, person, place or event in one single place.
- Complete research tasks quickly and easily.
- Get a multi-perspective vision and real-time context for every topic.
- Eliminate the need to visit different online resources separately.
- Obtain new information each day - even if you are looking at the same article.
- Visualize multimedia and social-media content related to every topic.
- Embrace a didactic, intuitive, holistic approach to learning.
- Discover new, relevant content about your favorite topics and interests.
- Zomobo offers a fun and engaging learning experience.
- Topics research is moving from being "stateless" to being very much in the here and now

Updated> Healthcare Bots and Subject Directories

<http://www.HealthcareBots.info/>

I have just updated my Internet MiniGuide White Paper Link Compilation titled "Healthcare Bots and Subject Directories" which is now a 34 page research paper listing selected resources both new and existing that will help anyone who is attempting to find the latest information about healthcare search engines and subject directories available on the Internet. It is freely available as a .pdf file (277KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **July 12, 2011**. Other white papers are available by clicking [here](#).

oneDrum - Real Time Collaboration for Microsoft Office

<http://onedrum.com/>

oneDrum is a desktop application that allows users to share and work on documents together, inside their favorite applications – such as MS Office. Specifically oneDrum allows users to: a) share and synchronize files between each others' machines; b) author documents at the same time, seeing each others changes as they are made; and c) communicate more effectively about your shared documents with in-document chat, simple project management, and notifications that tell you what other authors are doing. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Address Search

<http://email.addresssearch.com/>

There are two ways in which someone can find email address information using this site. The first is commonly referred to as a "forward email search". This type of search is when someone uses a name with the hope of returning an email address. AddressSearch.com is one of the only sites to offer a forward search free of charge. While they make this service available for free, they do partially hide the email address in the results they provide, allowing the searcher to email the address using a contact form. No access to the actual email is ever given. This is done in an effort to protect the privacy of the email address' owner, while providing them with a way to be contacted by someone looking for them. This type of search can be useful to someone looking to reconnect with friends, classmates, relatives, even someone they don't have a personal relationship with but hope to contact. The second way visitors can search for information on this site is using what is known as a "reverse email search". A reverse search can be helpful when trying to identify the owner of an email address. With this, one can use an email address to find out the owners name and sometimes other identifiable information about them. This search can be used to validate the identity of a sender or ensure you have the correct email address before sending out an email. Their reverse email search provides searchers with the first name and last initial of the person they have found associated with an email address. When available, they will also provide the general location of the person emailing as well as other information they have found. This has been added to [Finding People](#) Subject Tracer™.

i-Perception

<http://i-perception.perceptionweb.com/>

i-Perception is a new open-access sister journal to Perception. For nearly 40 years Perception has been a leading journal for everyone interested in all the senses and the perceptual processes of humans, animals and machines. i-Perception covers the same academic areas but while Perception will continue as a free-to-publish, pay-to-read journal of the traditional sort, i-Perception is a pay-to-publish, free-to-read journal, thereby disseminating refereed accounts of research as widely as possible. Although the two journals will be treated separately bibliographically and as regards indexing and

other listings, they share a common editorial board, refereeing standards and have similar submission procedures.

CanvasDropr - Creating the Bigger Picture by Collaboration

<http://www.canvasdropr.com/>

CanvasDropr was founded in June 2011, as a social utility that helps people communicate more efficiently with their friends, family and coworkers. The company develops technologies that facilitate the sharing of information through synchronic communication. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Updated> Searching the Internet - A Primer

<http://www.SearchingTheInternet.info/>

The annotated white paper titled "Searching the Internet - A Primer" by [Marcus P. Zillman, M.S., A.M.H.A.](#) has been updated and is a primer for those new to searching the Internet or those using only one search source. It is freely available as a 17 page .pdf document (366KB) from the above link from the [Virtual Private Library™](#). Other white papers are available by clicking [here](#). [Updated: July 13, 2011]

Fatminds - Discover, Learn and Succeed Succeed Web Educational Programs

<http://fatminds.com/>

It is frustrating and time consuming to find the best education quickly and easily from quality educational institutions on the web today. Search engines like Google® and Bing® are filled with the results from affiliate websites of the large, for-profit institutions providing limited choices while many other institutions have only unwieldy pdf catalogs on their websites. Fatminds has the most comprehensive collection of educational programs on the web – courses, certificates, degrees, seminars and webinars to meet all your educational needs. Fatminds enables adult students to engage with the institutions and the community of education seekers, career coaches and teachers. Fatminds gives you the ability to find and select quality continuing education based on your preferences – categories, institutions, location, price and more...in minutes. This will be added to [Tutorial Resources](#) Subject Tracer™ Information Blog.

Klok - Personal Time Tracking Made Easy

<http://www.getklok.com/>

When you think about your day or week, does it feel like it is getting "filled-up" with work? We thought so too. That's why Klok shows your time entries as blocks that fill up your days very much like your calendaring application works. Most applications just let you enter the total time spent on a project per day in a spreadsheet view. The problem with that approach is that you potentially lose some valuable information. For example, if you or your staff spend four hours each on two separate projects within a day, it might be useful to know that the time was spent in 16 individual 30 minute entries as you toggled between projects numerous times throughout the day. By having this information, you can identify inefficiencies that might be totally lost if you didn't track this level of detail. This

International Journal of Computer Science and Telecommunications (IJCST)

<http://www.ijcst.org/>

International Journal of Computer Science and Telecommunications (IJCST) is a peer-reviewed, open access scholarly journal that publishes original research works and review articles in all areas of the computer science including computer networks, communications, telecommunications and its applications for wired and wireless networks. IJCST mainly focuses and prefers papers with successful practical work, comprehensible description, and clear framework for mathematical modeling and algorithm. Authors are solicited to contribute to the journal by submitting articles that illustrate research results, projects, surveying works and industrial experiences.

WeDebate.it - Platform for Holding Online Debates

<http://www.wedebate.it/>

WeDebate.it was created in the spring of 2010 by local Pittsburgh entrepreneur John R. Cushma. This website was created to provide its users with a place to actively debate and discuss any topic or subject that they wish. We are in the process of adding new features to our website as well as creating an interactive iPhone application (available soon!). Our website is constantly growing so please continue to check back for future news and updates! This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Competitive Intelligence - A Selective Resource Guide - Updated and Revised July 2011

<http://www.llrx.com/features/ciguide.htm>

Sabrina I. Pacifici's completely revised and updated pathfinder focuses on leveraging selected reliable, focused, free and low cost sites and sources to effectively profile and monitor companies, markets, countries, people, and issues. This guide is a "best of list" of web, database and email alert products, services and tools, as well as links to content specific sources produced by government, academic, NGOs, the media and various publishers. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Business Intelligence Resources](#) Subject Tracer™ Information Blog.

xtranormal - Make Movies by Typing, Watch Movies and Educational Resource

<http://www.xtranormal.com/>

xtranormal's mission is to bring movie-making to the people. Everyone watches movies and they believe everyone can make movies. Movie-making, short and long, online and on-screen, private and public, will be the most important communications process of the 21st century. Their revolutionary approach to movie-making builds on an almost universally held skill—typing. You type something; they turn it into a movie. On the web and on the desktop. This has been added to the tools section of [Research Resources](#)

International Aging Research Portfolio (IARP)

<http://www.agingportfolio.org/>

The International Aging Research Portfolio (IARP) is an independent non-profit initiative serving the aging research community, academic, corporate, patient advocacy and charitable funding organizations worldwide. The AgingPortfolio.Org system is a flexible and highly scalable knowledge management system developed to enable funding organizations to collaborate, track, analyze, structure, make decisions and set directions for future research efforts in aging and also address the needs of research investigators, health care policy makers, government officials, interest groups and general public. The goal of the International Aging Research Portfolio is to become a centralized portal for aging research providing highly granular relevant information to scientists, funding organizations, policy makers and providing a platform for collaboration and research. At present, IARP incorporates databases of grants from multiple sources such as the NIH, European Commission, CIHR, and MRC. It also incorporates MEDLINE publication abstracts under a license from the National Library of Medicine. The database contains millions of research projects with funding information and is fully searchable. The system also provides a categorized directory for the aging research projects. In addition to the manual classification by the SAB members, the system uses semantic classification algorithms to automatically classify projects into research areas related to aging. The flexibility of the system provides different views on aging and age-related projects in order to find trends and analyze the current status of the investigations. It also gives the opportunity to build new classification taxonomies to look at the problem of aging research at different points. Thus, the first centralized system for tracking such complex, interdisciplinary and controversial area as aging research was developed and made available to the public via AgingPortfolio.org. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Healthcare Resources](#) Subject Tracer™.

Medical Education Development

<http://www.pagepress.org/journals/index.php/med/index>

OdeWire - News for Intelligent Optimists

<http://odewire.com/>

OdeWire presents news to inspire intelligent optimists. Their unique wire is constantly refreshed by an automated system that combines advanced semantic technology with the guidance of their editorial staff. Around the clock and around the world, OdeWire is always looking at the most authoritative news sources for stories that focus on solutions rather than problems, and on positive changes rather than negative ones. Unlike other news sources that are over-weighted with negativity, OdeWire contributes to a more balanced media diet. OdeWire is a collaboration between Ode Magazine, the global magazine for intelligent optimists, and Federated Media Publishing, which powers the best of the independent Web, using technology that originated at TextDigger, a Silicon Valley firm developing ground-breaking semantic search technology. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog.

EFactor - World's Largest Entrepreneurial Community

<http://www.efactor.com/>

EFactor, the world's largest entrepreneurial community, provides resources that every small business owner needs: funding, knowledge, gain revenue and save cost. At EFactor, entrepreneurs exchange ideas with experts, receive exclusive discounts on business tools, interact with potential partners or clients, and discover funding for their startups. With close to a million users in 168 countries, EFactor offers a unique mix of online and offline E.vents in the US and internationally. Members join EFactor to make relevant connections, taking their businesses to the highest level. EFactor is headquartered in San Francisco, and founded by a team of successful serial entrepreneurs. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Journalist's Resource - Knowledge-based Reporting

<http://journalistsresource.org/>

The mission of Journalist's Resource is to promote knowledge-based reporting and curate scholarship relevant to journalism. A project of the Carnegie-Knight Initiative on the Future of Journalism Education, the site is run by the Harvard Kennedy School's Joan Shorenstein Center on the Press, Politics and Public Policy. The project provides access to scholarly reports and papers on a wide range of topics, syllabi for educators and skills-based reference material. All content is free, open to the public, and considered to be public domain, operating under a Creative Commons license (see below). The chief components of the site are: a) Policy studies provide links to reliable, timely research in the categories of environment, economics, society and government. Each study is accompanied by a brief overview summarizing its findings, teaching notes and links to other relevant material. Studies are selected by a research team based at Harvard's Shorenstein Center. To be included, research should be empirically based, peer-reviewed, published and the product of a major university, government body or nonpartisan research organization. See more on criteria for inclusion; b) Reference articles offer information on core journalism skills, including interviewing, style, ethics and more, as

well as links to online tutorials; and c) Instructor's material is intended to help educators use Journalist's Resource. It includes information on how the teaching material is organized, its use and typical journalistic problems. We also have sample syllabi that you can adapt to your specific needs as well as a case study on teaching knowledge-based reporting. This will be added to [Journalism Resources](#) Subject Tracer™.

Journal of Women's Entrepreneurship and Education (JWE)

http://www.iien.bg.ac.rs/index.php?option=com_content&view=article&id=51&Itemid=13&lang=en

Journal of Women's Entrepreneurship and Education (JWE) emphasizes research that is current and relevant, contributing to the body of legal knowledge in the fields of entrepreneurship and business through publication of a high quality and professional periodical. JWE contributes to the field through a unique, interdisciplinary approach, applicable to a broad audience. Readership includes policy-makers, researchers, students, teachers, and practitioners in women's entrepreneurship and education. JWE views that small businesses owned by women are the backbone of the economies of many nations worldwide. Content in English. Journal of Women's Entrepreneurship and Education is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

GratefulGram - Send a Free Video Thank You

<http://www.gratefulgram.com/>

Gratefulgram is a simple service to allow you to send a video "thank you" note to someone (or a group of people). All you need is a video taken on your phone, a webcam or other digital camera, an email address and the email address(es) of your recipient(s). If your recipients have access to the web, they will be able to see your thank you video. It is completely free for everyone and is guaranteed to make you and the recipient(s) feel good. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

InMojo - Open Source Hardware

<http://www.inmojo.com/>

InMojo is a community market, collaboration, and project support site for Open Source Hardware (OSHW) and DIY makers. They built the site to help individual makers with the less-than-fun side of sharing their ideas (manufacturing, licensing, selling, etc.) and leave them to the part they like: designing hardware. Open Source Hardware (OSHW) is about being a part of the creation process and having the ability to personalize everything in your world to meet your individual needs. It's an alternative to mass production, top-down design, and to proprietary products and technology. By opening the design process we can pool our resources to build more complex projects than we could ever build alone, and it gives makers the information they need to hack and customize at will. InMojo is here to help everyone who wants to make, share, design, or customize their own products. It for hackers and makers. Innovators and hobbyists. Problem solvers and visionaries. Artists and engineers. Renovators and revolutionaries. (And of course geeky grad

hidentify - Most Advanced Yet Simple Way to Find Consumer Electronics

<http://www.hidentify.com/>

hidentify wants to help consumers make educated buying decisions without the hassle of conducting complicated research. The tools that are available on the Internet today include web search engines, filter bars that are based on technical data, products Wikis, review aggregators, professional reviews aggregators, product specifications browsers, and price comparisons sites, each gives the customer a different view of available products but the objective decision of which product best fits consumer's needs relies on his/her ability to perform analysis that in many cases requires strong technical knowledge. In hidentify, they think that there must be a better way to look for your product. They also believe that consumers do not need to be technology savvy in order to be able to choose a product. Why shouldn't a consumer be able to express his/her needs in natural language using functional requirements and not technical details. They believe that shoppers should be able to look for a product in a simple, user friendly, effective and fast way and as well be able to enjoy the process. This is why they have developed a system that helps consumers ignore the technical details and focus on their own true needs. hidentify users can describe in their own words the characteristics of desired product, and hidentify engine will track the product that best matched their needs. hidentify unique features include: a) ability to understand user needs and requirements; b) Simple interface that can be used by a common consumer; c) Ability to translate technical details into common language; d) Effectively collect products data from the Internet and find the best match for a consumer based on her/his needs; and e) Reduce the amount of time a consumer needs to spend looking for a product. Once the user has identified the product he/she wishes to buy, hidentify engine will also help in finding the best place to make the purchase. Customer will be able to choose from a list of sellers based on different parameters such as price, and seller rate. The user then will be directed to the seller's website where the product is available. This will be added to [ShoppingBots and Online Shopping 2011](#) .

Journal of Emerging Knowledge on Emerging Markets (JEKEM)

<http://digitalcommons.kennesaw.edu/jekem/>

The India, China & America Institute's Working Papers Journal, Journal of Emerging Knowledge on Emerging Markets (JEKEM), seeks to facilitate the exchange of ideas and shared learning experiences among policy makers, business executives and thought leaders on issues related to the rise of emerging economies, in particular China and India, and their impact on global markets, global resources and geopolitics of the world. The ICA Institute offers this journal in order to provide an open access forum to identify and drive synergies among India, China and America in the areas of emerging markets, commercial growth and alignment of policies for the benefit of a vast number of people. For our purposes, Working Papers are defined as any pre-publication version of academic articles, book chapters, hypothesis, or reviews. Manuscript submission via online system. Journal of Emerging Knowledge on Emerging Markets is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

OffBureau - Online Collaborative Workspace

<http://www.offbureau.com/>

Its simple and universal structure can adapt to any workflow and can be used as a collaboration platform, intranet/extranet, document system, or FTP replacement. Features include: 1) Online collaboration software that adapts to your needs. Pay for what you need. Start working for free. A free workspace has all the features of a subscriber workspace except that it has limited storage space. As your business grows you can adapt your account as necessary. Signup for free; 2) Simple, secure online workspace. Simple to use, nothing to install, no long-term contracts, pay-as-you-go. An OffBureau subscriber account starts at only \$15/month; 3) Team collaboration with file sharing and document management. OffBureau provides essential tools for file sharing and effective collaboration at a fraction of a cost of intranet/extranet solutions. OffBureau lets your team spend more time working and less time waiting; and 4) Who uses OffBureau? Individuals, Creative services, Brands, Professional services, Governmental offices, Academics, and Social groups. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Sidaza - Group Text and Photo Messaging on Any Phone

<http://www.sidaza.com/>

Sidaza provides a free Group Phone Number for you to automatically message everyone in your group. When a group member responds, their message is sent back to the entire group. Think of Sidaza as a free, mobile chat room for you and your friends. Whether you're telling the kids that dinner is ready or planning the next reunion, Sidaza is great for keeping families in touch. And since Sidaza is a private social network, your conversations with family will stay separate from conversations with friends. Sidaza.com allows you to message your group member's phones directly from your computer. All responses from your group will be displayed on your computer in real-time. This has

Leafsnap: An Electronic Field Guide

<http://leafsnap.com/>

Leafsnap is the first in a series of electronic field guides being developed by researchers from Columbia University, the University of Maryland, and the Smithsonian Institution. This free mobile app uses visual recognition software to help identify tree species from photographs of their leaves. Leafsnap contains beautiful high-resolution images of leaves, flowers, fruit, petiole, seeds, and bark. Leafsnap currently includes the trees of New York City and Washington, D.C., and will soon grow to include the trees of the entire continental United States. This website shows the tree species included in Leafsnap, the collections of its users, and the team of research volunteers working to produce it. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Museum

<http://www.aam-us.org/pubs/mn.cfm>

Museum publishes timely, well-written, well-informed pieces on issues of importance to museum professionals. Museum articles offer a more comprehensive, insider's look at museum-related stories than the mainstream press.

TaskAnt - Team To-Do Repository

<http://www.taskant.com/>

TaskAnt is your team to-do repository. It saves your time and your team's time, by assigning, tracking and searching tasks. Efficient, simple, clean, web-based, easy-to-use. TaskAnt is like your Email. With similar usage, there won't be much to learn to get started. TaskAnt is like a Bug Tracking System, for rest of us. They combine bug tracking system's power, with great usability. TaskAnt is like Basecamp's To-Do List. Only much better at handling large volumes of to-dos and to-do lists. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Infographics - World's Largest Community for Exploring, Sharing, Creating, and Promoting Data

<http://visual.ly/>

Infographics and data visualizations are shifting the way people find and experience stories, creating a new way of seeing the world of data. They help communicate complex ideas in a clear, compact and beautiful way, taking deep data and presenting it in visual shorthand. They have collected the best examples on the web and gathered them for you to reference, share, and enjoy. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Typecast - Answer Questions from Your Readers, Friends and Fans Live

<http://www.gotypecast.com/>

Typecast lets you be interviewed by anyone. Invite your readers, friends & fans to ask questions, choose which ones you want to answer and start typing. Sign up early and you could be upgraded to Pro for life. We're still in beta, but when we launch - if you were one of the randomly selected lucky few - you'll have a free lifetime Pro account. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

MiMedia - Access Your Media Anytime

<http://www.mimedia.com/>

MiMedia brings you a totally new approach to online backup – a way to protect, access, enjoy and share your digital life all in one place. MiMedia will back up and protect your files in a secure online storage account. Beyond online backup, MiMedia also provides instant on demand access to your files from anywhere. With MiMedia, you can listen to your music, watch your latest videos, view any of your photo galleries, and access your other files all in one user friendly location. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

SS International Journal of Economics and Management (SSIJEM)

<http://www.ssirn.com/>

SS International Journal of Economics and Management (SSIJEM) a double blind refereed bi-monthly (6 issues in a year) journal on Economics, Marketing and Management. Its basic objective is to disseminate knowledge of latest economic developments, professional marketing and management. The major focus of this journal is on research and reflections relevant to academicians and practicing managers. OhSoWe - Brings Neighbors Together

<http://www.ohsowe.com/home>

OhSoWe is about the personal and neighborhood level things we can do to safely build bonds with our neighbors, save money, and increase our quality of life while making our neighborhoods better (and saving the Earth's resources). OhSoWe is focused on helping us all re-discover the things we can do with our neighbors. OhSoWe can share a meal with a neighbor, OhSoWe can easily borrow the things from our neighbors, OhSoWe can organize a block party simply and easily. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

Kodesk - My Office Is Your Office

<http://www.kodesk.com/>

Have unoccupied desks or office space? Kodesk allows you to rent the extra space out to others that wouldn't necessarily spring for an entire office. Kodesk has peer to peer office sharing across many countries including the United States, Canada, Spain, France, China, Singapore, and Peru. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Airbnb - Unlocking Unique Spaces

<http://www.airbnb.com/>

They connect people who have space to spare with those who are looking for a place to stay. Guests can build real connections with their hosts, gain access to distinctive spaces, and immerse themselves in the culture of their destinations. Whether it's an urban apartment or countryside castle, Airbnb makes it effortless to showcase your space to an audience of millions, and to find the right space at any price point, anywhere. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Energy and Power Engineering

<http://www.scirp.org/journal/epe/>

Energy and Power Engineering publishes research and review articles in all important aspects of electric power engineering and other professionals involved in the electric power industry. Both experimental and theoretical papers are acceptable provided they report important findings, novel insights, or useful techniques in these areas. The topics to be covered by Energy and Power Engineering include, but are not limited to:

- * Analysis of hybrid generation systems
- * Artificial intelligence in complex power and energy systems
- * Building Energy Use and Energy Conservation

Watch™ Paper Review

P-MART: Towards a Classification of Online Prediction Markets by *Dorit Geifman, Daphne Ruth Raban, Rafaeli Sheizaf*

<http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3203>

Abstract:

Prediction Markets are a family of Internet-based social computing applications, which use market price to aggregate and reveal information and opinion from dispersed audiences. The considerable complexity of these markets inhibited the full realization of the promise so far. This paper offers the P-MART classification as a tool for organizing the current state of knowledge, aiding the construction of tailored markets, identifying ingredients for Prediction Markets' success and encouraging research. P-MART is a dual-facet classification of implementations of Prediction Markets describing traders and markets. The proposed classification framework was calibrated by examining a variety of real-world online implementations. A publicly accessible wiki resource accompanies this paper in order to stimulate further research and future expansion of the classification.

Awareness Watch Newsletter Editor's Note: I have owned the domain name PredictionMarkets.com for a number of years as I have always seen the value in what prediction markets can do

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
