

Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.

<http://www.AwarenessWatch.com/>

V9N9

September 2011

Welcome to the V9N9 September 2011 issue of the **Awareness Watch™ Newsletter**. This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that “change” is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month’s featured report covers **Current Awareness Discovery Tools on the Internet**. These sites, resources and tools bring together all the latest information on current awareness from the Internet. These resources will make an excellent bookmark for online current awareness and to develop a critical path and network that will guide you through all the latest happenings! Resources for this report were taken from the below publication:

Current Awareness Discovery Tools on the Internet

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director - Virtual Private Library
<http://www.VirtualPrivateLibrary.org/>

Current awareness has become a very timely topic with professionals and business executive/entrepreneurs especially those suffering from information overload in today's dynamic internet based information economy. It is no longer a "nice to have" resource but rather a "must have" internet tool that is part of our daily business routine! Obtaining these current awareness tools and constantly discovering the current happenings and information on the Internet is the driving force behind the creation of this white paper. This white paper will list the best and most competent current awareness resources available for the professional and business executive/entrepreneur in the following detailed subject classifications:

Articles and Trade Journals
Listservs®
News Groups, Message Boards and Forums
eMail Alerts
Web Site and Page Monitoring Bots
WebLogs
RSS Feeds
News Aggregators
Subject Tracer™ Information Blogs
Search Engines, Answer Engines and Subject Trees

Articles and Trade Journals

Articles, Papers and Trade Journals offer a plethora of current awareness resources from eMail alerts to table of contents alerts and emails. These articles, papers and journals arrive in a timely manner, are professionally designed and written, and as a rule are easily accessible both online and offline. The following resources will aid you in finding the appropriate articles and journals for your current awareness profession and/or business activities:

Articles, Abstracts, Documents, Papers, Reports and Literature Resources
<http://AcademicResources.BlogSpot.com/>

BPubs.com – The Business Publications Search Engine

Listservs®

Listserv®, Majordomo and related mailing list software have been used to create specific subject based mailing lists for years on the Internet. I have always considered mailing lists to offer one of the very best methods to stay current on your profession or business career. I personally still belong to hundreds of selected and niched mailing lists that keep me constantly current in key areas. The following is a resource of information on Listservs® (mailing lists) as well as search entities that allow you to find and subscribe freely to the list closely related to your profession and/or business career. Also mailing lists only require an active email account and I would recommend that you create a separate eMail account to subscribe your new lists to. Also you may set up list mail file folders in your email inbox to keep your mailing list subscription emails separated and easy to manage and search. Using Listservs® to keep up to date is extremely important:

AcqWeb's Directory of Journals, Newsletters and Electronic Discussion Archives

eMail Alerts

eMail Alerts allow current awareness monitoring via eMail with notification instantly. These alerts allow you to quickly identify and access new current awareness information as well as breaking news in your identified profession or business niche. eMail alerts can be forwarded to your cell telephones as well as to other PDAs. Custom alerts services are also available to alert you on many different areas and requirements based upon your profession and needs.

Web Site and Pages URL Monitoring Bots and Resources

Web site and web page URL monitoring allows you to monitor key websites and related pages of information for current awareness updates and changes that will affect your profession or business. These bots monitor the web pages or sites that you desire on a 24/7 basis and send you an email upon the sites and related pages update or change. These services are available as web applications as well as software that you must install. Many of the services are available at little or no cost. I have used these services for years and without a question they are extremely beneficial for key current awareness monitoring and updates on the Internet.

WEBLOGS (BLOGS)

Weblogs or “blogs” have become the fastest growing area of the Internet in the last year! These personal blogs now count in the millions with more bloggers being created daily! Tracking these blogs is well worth the time and efforts as they offer a tremendous amount of current awareness information and data. Corporate blogs through their intranets as well as throughout the Internet are now coming into the mainstream. My blog was created five years ago and just awarded as one of the top 10 informational blogs available for information search and research on the Internet. Blogs and current awareness are subjects

that will continue to grow exponentially into the future!! Some very competent resources for current awareness and blogs are:

NEWS AGGREGATORS AND RSS FEEDS

News aggregators and the related RSS News Feeds are the backbone of WebLogs (Blogs) ability to disseminate the ongoing current awareness information to the Internet global community. Aggregating the key blogs that you are monitoring for current awareness and updates can now be created either by installed browser software called News Aggregators or you may use some of the brand new web applications that require no software installation on your computer. The latest News Aggregators read the RSS news feeds and can be updated by a click of a button or you may preprogram the news aggregator to update in certain time frames. The latest News Aggregators feature “auto-discovery” that allows the news aggregator to automatically discover the related RSS feed associated with the blog that you subscribe to. My news aggregator currently monitors and updates over 200 RSS newsfeeds every 15 minutes that allows me to keep current with all blogs that I monitor for updates and current happenings.

Figure 9: Scholarly Internet Resource Collections

I have attempted to show you what excellent current awareness resources the Internet has for the professional/executive and how these tools can make your entire work process far more productive and efficient. But it takes more than just reading about these tools you must have a true desire to make these Internet tools a part of your daily work life. You must decide to make the Internet a professional tool and use it to accomplish all your goals! These resources that I have listed above will start you on your professional path to continued discovery of current awareness tools.

Author Information: Marcus P. Zillman, M.S., A.M.H.A. Executive Director of the Virtual Private Library is an international Internet expert, author, keynote speaker and corporate consultant in the area of information retrieval, knowledge discovery, knowledge harvesting, artificial intelligence and bots/intelligent agents. He has created numerous world wide web sites including 53 Subject Tracer™ Information Portals and Blogs; written a number of internet miniguides, white papers, manuals and books; hosted over 160 weekly Internet television shows, writes a weekly and monthly column on Current Awareness on the Internet; writes a monthly newsletter Awareness Watch and delivers keynote presentations throughout the international marketplace. He also actively delivers one and two day workshops for key industry sectors displaying how the Internet can be used as a tool to maintain current awareness and professional competencies. Market Intelligence Resources 2010

<http://www.MarketIntelligenceResources.com/>

Marcus P. Zillman's just released professional Internet MiniGuide is titled Market Intelligence Resources 2010 and is now available for purchase online and immediate download. This 193 page digital miniguide represents a comprehensive listing of the latest resources, sources and sites to discover the latest Market Intelligence sources available on the Internet with many of them freely available! Designed specifically for today's entrepreneur, professional and/or investor.

Entrepreneurial Links 101

<http://www.EntrepreneurialLinks.com/>

Marcus P. Zillman's newly released 231 page eReference digital book for the up and coming entrepreneur. Entrepreneurial Links 101 gives an alphabetical listing of the very best Internet and World Wide Web sites covering Entrepreneur Resources, Business Intelligence Resources and an extremely comprehensive list of Online Research Tools. This is considered by many to be the entrepreneur's bible for finding relevant and competent online resources!

Internet Privacy and Security Resources

<http://www.InternetPrivacySecurity.net/>

Marcus P. Zillman's latest eReference digital publication is a selected comprehensive alphabetical listing of the latest resources and sites covering all aspects of privacy and security currently available over the Internet. From the board room to the family room, these resources and sites give you the information you need to maintain your privacy and security as you use the Internet in your business and personal life.

Research Resources Online Guide

<http://www.ResearchResourcesOnline.net/>

Marcus P. Zillman's latest [LinkSeries Publication](#) is a 235 page digital guide of a selected comprehensive alphabetical listing of the latest and greatest resources and sites covering all areas of research that is currently available over the Internet. The guide covers online research resources and tools for the Newbie to research as well as the Seasoned researcher. Contents include: a) Research Resources, b) Research Tools, c) Student Research Resources Toolkit, d) Knowledge Discovery/Management and Data Mining Resources, e) Knowledge Discovery/Retrieval and the World Wide Web Resources, and f) Subject Tracer™ Information Blogs.

vyoo.it - Real Estate Mobile Marketing

<http://vyoo.it/>

There is certainly no shortage of real estate listings on the web. The problem for people using a mobile device is that most are not optimized for viewing on a 4-inch screen. Vyoo.it is a mobile marketing application designed to make online property listings accessible via the mobile web. Driven by 3G adoption and the proliferation of smartphones such as the iPhone and Android-based devices, mobile web usage doubled in 2009 (source: Quantcast) and is expected to eventually be twice as big as the desktop Internet (source: Morgan Stanley). Providing a compelling mobile experience thus presents both an opportunity and challenge for all consumer-facing businesses — including real estate professionals. This will be added to [eCommerce Resources](#) Subject Tracer™.

PPLDIG - Comprehensive People Search on the Web

<http://ppldig.com/>

We all have many different kinds of relationships in our lives, both personal and professional. And the growing demands on our time and our increased mobility as a culture can make it easy to lose touch. PPLDIG helps you find people from anytime in your life, no matter where they are - all in one place. Whether you're trying to find your friends, reconnect with a lost loved one, stay in contact with family, or keep track of the dozens of other relationships you've created along the way, PPLDIG is here to help you do it. PPLDIG is the most effective and efficient way to find everyone in your life. This will be added to [Finding People](#) Subject Tracer™.

Brief.ly - Easy To Open, Quick To Close, Handy To Share

<http://brief.ly/>

Now you can share more links in one go. Compiling several sites on one page was never that easy before. Just enter your links, one per line, and Brief.ly will do the rest within a second. Then click and share that jingly link with those readers you treasure. Enjoy simple and catchy designs with powerful analytical tools to help you with understanding your audience better. What Brief.ly does better than others:

- » Link editing
- » Link re-routing any time, any place
- » Share many web pages at once
- » Instant switching between the shared sites
- » A dozen of catchy and short URLs to choose from
- » Ask for as many random short links as needed
- » Conversion into a blog or a private site any time, either way
- » A handy tool to compile 30+ links for your mailing-to-send to be opened in just one click

LHC@home 2.0 Volunteer Computing Platform

<http://lhathome.web.cern.ch/LHCathome/Physics/>

LHC@home 2.0 is a volunteer computing platform for physicists working at the Large Hadron Collider - the world's largest particle accelerator - at CERN, the European Particle Physics Laboratory. This platform will host several sub-projects for different LHC physics groups. LHC@home 2.0 is an extension of the LHC@home platform, launched in 2004 to help physicists simulate protons beam dynamics in the LHC. At that time, doing full-fledged simulations of particle collisions was beyond the scope of volunteer computing. But the evolution of computer software and hardware, and in particular the use of virtual machine technology, has enabled a breakthrough...LHC@home 2.0! As a result you can now be part of a global effort to simulate data that physicists will use in their analysis of LHC data, by running simulations of particle collisions on your home computer. The first project to run on the LHC@home 2.0 platform - currently in test phase - is called Test4Theory. Join them, and help scientists from your home in their cutting edge research: it's important! This has been added to [Grid, Distributed and Cloud Computing Resources](#) Subject TRacer™ Information Blog.

Updated> Finding Experts By Using the Internet

<http://www.FindingExperts.info/>

I have just updated my white paper link compilation on Finding Experts By Using the Internet. This is a 28 page .pdf file (265KB) and freely available from the above URL. Finding Experts By Using the Internet is dedicated to giving you the internet sources to discover that needed expert(s) that you have been looking for. The Internet is a vast global resource of knowledge created by experts and the ability to find and contact these experts is extremely important for both academic activities as well as business and special interest needs. [Updated August 9, 2011 28 pages 247KB .pdf]. Additional white papers available by clicking [here](#).

International Journal of Disaster Risk Science

<http://www.ijdrs.org/>

The International Journal of Disaster Risk Science is an interdisciplinary English language journal that publishes research papers addressing theoretical and methodological issues in disaster risk science, emergency response technology, and risk management; disaster risk governance policies and regulations; and case studies and comparative research internationally on responses to major disasters. Its primary aim is to create an exchange platform for researchers, practitioners, and policy makers in the field of disaster and risk to communicate, learn, and progress in order to improve the international, national and regional capacities for disaster risk analysis, management, and governance. The journal promotes International Human Dimensions Program on Global Environmental Change Integrated Risk Governance Project or IHDP-IRG research under the strategic framework of global change research, including revealing the dynamic processes of disaster risk, especially catastrophic disaster risk formation, based on an adequate understanding of global, regional, and local social-ecological systems change;

International Journal of Educational Research and Technology (IJERT)

<http://www.soeagra.com/ijert.htm>

International Journal of Educational Research and Technology (IJERT) is an international journal that publishes high-quality solicited and unsolicited articles, in English, in all areas of education including education policies and management. The journal aims to provide a forum for scholarly understanding of the field of education. Contributions that span the divide between theory and practice are particularly welcome. Although principally concerned with the social sciences, the journal encourages contributions from a wider field. International Journal of Educational Research and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

DataWrangler - Data Cleaning and Transformation Tool

<http://vis.stanford.edu/wrangler/>

Wrangler is an interactive tool for data cleaning and transformation. Spend less time formatting and more time analyzing your data. Why wrangle? a) Too much time is spent manipulating data just to get analysis and visualization tools to read it. Wrangler is designed to accelerate this process: spend less time fighting with your data and more time learning from it; b) Wrangler allows interactive transformation of messy, real-world data into the data tables analysis tools expect. Export data for use in Excel, R, Tableau, Protovis, ...; c) Want to learn more about Wrangler's design? Take a look at their research paper; and d) Wrangler is still a work-in-progress. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Web Data Extractors](#) white paper.

Open Grey - System for Information on Grey Literature in Europe

<http://www.opengrey.eu/>

System for Information on Grey Literature in Europe, is your open access to 700.000 bibliographical references of grey literature (paper) produced in Europe and allows you to export records and locate the documents. Examples of grey (gray) literature include technical or research reports, doctoral dissertations, some conference papers, some official publications, and other types of grey literature. OpenGrey covers Science, Technology, Biomedical Science, Economics, Social Science and Humanities. The site includes preprints from the GL conferences (GreyNet International) in full text. Their focus includes the following: a) Citations: 690211; b) Documents : 253; (total number of

HireRoom - Find Better Candidates Faster

<http://www.hireroom.com/>

HireRoom is a recruitment web app that helps you find the best candidates for a position without you having to read through hundreds of CVs. With HireRoom you can ask direct questions about things like education and past experience as well as opened-ended test questions, allowing you to easily filter out unsuitable candidates. Nobody wants to spend hours searching through CV's just to find the one piece of information you're really interested in, and no one wants to go through the hassle of arranging an interview only to find the applicant has no passion for the job. HireRoom can help. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Atmospheric and Climate Sciences

<http://www.scirp.org/journal/acs/>

Atmospheric and Climate Sciences aims to rapidly publish original scientific papers in all the fields of applied and/or climate atmospheric science. It covers the latest achievements and developments in the applied climate and atmospheric sciences, including but not limited to the following scopes as well as the theoretical and practical aspects of these disciplines:

- * Agricultural climatology
- * Air chemistry and the boundary layer, clouds and weather modification
- * Applied meteorology
- * Atmospheric acoustics, electricity, optics, physics, radiation and sounding
- * Atmospheric sciences
- * Aviation climatology
- * Biometeorology
- * Building climatology and forestry climatology
- * Climate Change and Broadcast Meteorology
- * Climate dynamics and variability
- * Clouds and precipitation physics
- * Cosmical meteorology
- * Dendroclimatology
- * Hydrometeorology
- * Marine meteorology and meteorology-associated geophysics

Local Area Unemployment Statistics (LAUS)

<http://www.bls.gov/lau/>

The Local Area Unemployment Statistics (LAUS) program is a Federal-State cooperative effort in which monthly estimates of total employment and unemployment are prepared for approximately 7,300 areas: a) Census regions and divisions, b) States, c) Metropolitan Statistical Areas and Metropolitan NECTAS (New England City and Town Areas), d) Metropolitan Divisions and NECTA Divisions Micropolitan Statistical Areas and Micropolitan NECTAs, e) Combined Metropolitan Statistical Areas and Combined NECTAs, f) Small Labor Market Areas, g) Counties and county equivalents, h) Cities of 25,000 population or more, and i) Cities and towns in New England regardless of population. These estimates are key indicators of local economic conditions. The Bureau of Labor Statistics (BLS) of the U.S. Department of Labor is responsible for the concepts, definitions, technical procedures, validation, and publication of the estimates that State employment security agencies prepare under agreement with BLS. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

How Students Use Technology [INFOGRAPHIC]

<http://mashable.com/2011/08/10/students-technology-infographic/>

It's clear that today's students rely heavily on electronic devices even when they're not incorporated in the classroom. In one survey of college students, 38% said they couldn't even go 10 minutes without switching on some sort of electronic device. But how students are using their devices, how technology is affecting their educational experience, and what effect it has on their well-being are questions that are harder to answer. In the

infographic below, online higher education database Onlineeducation.net has summed up some of the existing research on these points. This will be added to [Student Research Resources](#) Subject Tracer™.

International Journal on Network Security (IJNS)

<http://www.theaceee.org/journals/ijns/index.htm>

The journal features high quality papers on the theory and application of Communication and Network Security. Network security being a one of the highly vibrant area, IJNS will disseminate the innovative new ideas focusing on theories, methods, and applications in network security. International Journal on Network Security is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

GrabMyBooks - Free Software That Allows You To Grab Content Off the Web Into Your eBook Reader

<http://www.grabmybooks.com/>

You just bought a nice eBook reader and you realize what a fantastic piece of equipment it is. It doesn't tire your eyes, it has a very long lasting battery and is easily carryable. So now you just want to fill it with good content. That's where the problem is. You only have a few options available: a) Buy a book from one of the popular online stores; b) Download for free a very old book; and c) Try and convert content from other sources with most of the time poor results. Don't worry, the solution is here, GrabMyBooks is a firefox plugin that allows you to grab content from the web and easily convert it in an ePub file fully compatible with your reader. Here is a glimpse of how GrabMyBooks works: 1) Select automatically or manually the content to extract from the web sites you visit or from rss/atom feeds; 2) Visualize and edit your book; 3) Get your epub file ready to be transferred to your ebook reader; and 4) Enjoy a nice reading time !!! Updated> Grant Resources

<http://zillman.blogspot.com/2009/08/grant-resources-white-paper-link.html>

The white paper link compilation of the [Grant Resources](#) Subject Tracer™ Information Blog by [Marcus P. Zillman, M.S., A.M.H.A.](#) has just been updated and is now a freely available 17 page .pdf document (191KB) listing the latest and greatest online resources and sites for grants! **Updated August 14, 2011**. Other white papers are available by clicking [here](#).

The Entrepreneur's Reference Guide to Small Business Information

http://www.loc.gov/rr/business/guide/guide2/guide2_main.html

This 4th edition of The Entrepreneur's Reference Guide to Small Business Information, while thoroughly updated to focus on titles published in the last five years, builds strongly on the excellent foundation provided by Business Reference Specialist, Robert Jackson, who compiled the the 3rd Edition, which in turn was based on an original guide prepared under the aegis of the Library of Congress Business Enrichment Advisory Team (BEAT). Thus, while maintaining the basic outline of the guide, most of the content within those sections has been updated to reflect new editions, if available, or to highlight recently published titles on those topics. Where tables of contents and publishers' descriptions are available, we have included links to this additional information. For additional information about this guide, please consult the Introduction. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Scriffon - Unique Text Publishing Website

<http://scriffon.com/>

Scriffon is a text-publishing website. It's a tool to publish any kind of written work on the web; from essays to short novels, from recipes to how-tos, etc. It's free and open to everyone. Its design is influenced by minimalism. On Scriffon, you can create drafts and spend the time you need to write them. When you feel like it's ready, you can publish them and share them to the world. Afterwards, you can modify them. And when you think the changes are ready, you can publish them. You can do it again and again. You're in control. Scriffon stores your drafts and your published works for you. You can access them from any web-connected device. You can destroy your computer without losing your drafts and published items. (But Scriffon won't replace your computer.) Scriffon has a different approach than blogs concerning text publishing. While the owner of a blog

chooses the visual theme, the way posts are displayed, the navigation elements etc., every writing published on Scriffon is presented the same way. The emphasis is on clarity and readability. Authors doesn't have to worry about it. They can focus on their texts. Writings are the number one element. On an importance scale, authors come just after. The visual design reflects this. Elements that could interfere with the ease of reading and writing are kept to the strict minimum. With Scriffon, writing doesn't rhyme with blogging anymore. Though the people who use a blog to publish their writings may feel alone, those who use Scriffon are part of something. On a blog, you're the only one on board. The "common room" aspect of Scriffon allows you to benefit from the knowledge, thoughts and skills of the others. The first feature that takes advantage of this is the collaborative translations. You write in english, right? Or at least you write in one language. But you do know that there are more readers on the web who can not read your language than readers who can. Scriffon provides a solution to this problem. When you publish a writing, you actually publish the original version of the writing. You're the only one who can edit and update it. But every user of Scriffon can contribute to the translations (including yourself, of course). It's called collaborative translations because there is a common draft for each language. Anybody can improve them, a bit like on Wikipedia. But you are the only one that have the power to publish them. With Scriffon, the world-wide web becomes world-wide again. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

International Journal of Applied and Basic Medical Research (IJABMR)

<http://www.ijabmr.org/>

International Journal of Applied and Basic Medical Research (IJABMR) publishes randomized controlled trials, intervention studies, studies of screening and diagnostic tests, outcome studies, cost effectiveness analyses, case-control series, and surveys with high response rate, phytochemical studies, analytical chemistry studies and any animal experimental studies in the form of original articles, reviews, brief communications, case reports. Articles related to basic and para-clinical aspects of medical sciences and their pragmatic applications are preferred. Original articles with post-graduate student as first author are published on priority basis. International Journal of Applied and Basic Medical Research is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in HTML, Mobile Full Text, EPub and PDF format.

Updated> eReference Library Link Toolkit

<http://www.eReferenceLibrary.com/>

The **eReference Library Link Toolkit** has just been updated and now is a 69 page freely available white paper link compilation for a selected group of reference resources that are available over the Internet for the creation of your own personal or corporate eReference Library. This Toolkit has been created by Internet guru and expert [Marcus P. Zillman](#) who is the Executive Director of the [Virtual Private Library](#). Updates to this toolkit are powered by [Subject Tracer™](#) Information Bots. [Updated August 15, 2011 .pdf 69 pages 434KB]

MyApartmentMap - Apartment Search Engine Covering All of United States

<http://www.myapartmentmap.com/>

MyApartmentMap is an apartment search engine that allows users to find apartment listings all over the United States. Searchers can view pictures, maps, rental data, find deals, post rentals and contact property owners. MyApartmentMap also has specific search features for college students, pet owners, and military families. We plot available housing on an interactive map, so that students can easily find housing near their desired location. We even show nearby grocery stores, laundry mats, and other amenities.

Through sources such as real estate agents and apartment complexes, we update the search results daily to remove old listings and add new listings to ensure our searches are reliable. MyApartmentMap has also put a lot of research and development into its Rental Data technology. Millions of apartment listings are recorded and used to generate accurate rental data. The listings are cleaned and purged to prevent spam and duplicate listings from altering the final results. One last note - their site is free to use for renters!

This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

The Getty Search Gateway

<http://search.getty.edu/gateway/landing>

The Getty Search Gateway allows users to search across several of the Getty repositories, including collections databases, library catalogs, collection inventories, and archival finding aids. This tool is designed to help researchers, scholars, and educators discover the variety of resources available across the Getty's collections, which include collections in each the four programs: the J. Paul Getty Museum, the Getty Conservation Institute, the Getty Foundation, and the Getty Research Institute. Users can use the tool to browse their collections broadly, by type of resource (i.e., paintings, books, archives), or to search directly for assets related to very specific subjects—historical periods, artists, object types, etc. While users can search some of these collections individually using online search engines associated with the specific repository, Getty Search Gateway brings records from several of these databases together under one umbrella. Most of these repositories are not searchable through the Getty website's search tool, and some are only searchable here through Getty Search Gateway. Currently, Getty Search Gateway searches the following collections: a) J. Paul Getty Museum Collection Database; b) Getty Research Institute Research Library Catalog; c) Getty Research Institute Collections Inventories and Finding Aids; and d) Getty Research Institute Digital Collections. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This will be added to [Academic and Scholar Search Engines and Sources](#) white paper.

Quirky - Brand New Consumer Products Weekly

<http://www.quirky.com/>

For centuries, becoming an “inventor” has been a hard gig to crack. Complexities relating to financing, engineering, distribution, and legalities have stood in the way of brilliant people executing on their great ideas. Since launching in 2009, Quirky has rapidly changed the way the world thinks about product development. They bring two brand new consumer products to market each week, by enabling a fluid conversation between a global community and Quirky's expert product design staff. The world influences their business in real-time, and they share revenue directly with the people who helped them make successful decisions. This will be added to [Entrepreneurial Resources](#) Subject Tracer™.

Neuroscience & Medicine

<http://www.scirp.org/journal/nm/>

Neuroscience & Medicine is a peer reviewed international journal dedicated to the latest advancement of neuroscience. Topics to be covered by this journal include, but are not limited to:

- * Autonomic Nervous System
- * Alzheimer's Disease
- * Biological Psychology
- * Cell Proliferation
- * Dimorphic Sexual-Behavior
- * Drug/Alcohol Effects
- * Hebbian Learning
- * Hypothalamic-Pituitary-Gonadal Axis
- * Memory Loss
- * Neurobiology
- * Neurocytology
- * Neuroendocrinology
- * Neuroimmunology
- * Neurology
- * Neurosurgery
- * Neurotransmitters
- * Organizational/Activational Effects of Hormones
- * Parkinson's Disease
- * Physiological Psychology
- * Protein Trafficking
- * Sensory Processing
- * Social Neuroscience
- * Voltage-Gated Ion Channels

Neuroscience & Medicine is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

CirrusGrid by CPUUsage - Distributed and Extensive Computing

<http://www.cpusage.com/>

Whether you are a large enterprise or a small and emerging life science company, you wait days, weeks or even months for the results of your work. Research no longer needs to be limited based on the computing power available. Many of these computing tasks are time consuming, not because of their complexity, but because of the sheer amount of work to be done. The CirrusGrid has the ability to distribute computer work. The processing power that CPUUsage delivers through the CirrusGrid is not limited to just science or rendering. Nearly anything that requires extensive computing time and/or power can be processed on the CirrusGrid. Other applications include: Financial analysis, forecasting and risk mitigation Climate simulation and weather forecasting Engineering and product design Imaging, optical character recognition and file. With the power of CirrusGrid, you don't have to wait hours to see the rendered results of your motion graphic work. With the click of a button, you can now harness the power of thousands of computers. Unleash your imagination! Don't be held hostage by limited rendering resources. Render stunning graphics in minutes. Don't replace or add another server for your rendering needs. This has been added to [Grid, Distributed and Cloud Computing Resources](#) Subject Tracer™.

Seembee - Document Management Application

<https://www.seembee.com/>

Seembee is a document management application designed to save folks from having to ever again clumsily search through kitchen and office drawers looking for misplaced documents. With Seembee users can store and more easily categorize and chronicle important (and so often misplaced) notes, documents, receipts, scribbling, notations and transaction records. Seembee, available at the Apple app store for free of cost, allows users to upload snapshots, scanned documents or image files into a personalized web-based archive. Users can better categorize and manage small data documents and avoid the heartache of misplacing important information and records. Seembee also makes it easier to use uploaded imagery, notation and audio – capture the essence of important, if fleeting, moments and thoughts that occur daily in one's life. Features include: a) Upload data to your personal online archive via Wi-Fi or 3G; b) Notes (written or audio) can be attached to document images; c) Convert docs into PDFs and send through email; d) Add titles, tags notes and add-on pages to uploaded documents; e) Virtual stapling/un-

stapling; f) Multiple folder/sub-folder options; g) Various tagging methods; h) Convenient segregation of documents, moments; and i) Auto upload (automatic saving and upload to the Web), or upon command. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information.

International Journal of Computer Science and Technology (IJCST)

<http://ijcst.com/>

The International Journal on Computer Science and Technology (IJCST) provides an outlet for research findings and reviews in areas of computer science and technology found to be relevant for national and international development. The quarterly journal is intended, in its publications, to stimulate new research ideas and foster practical application from the research findings. International Journal of Computer Science and Technology is available free of charge as an Open Access journal on the Internet. Articles available in PDF format.

Updated> Online Social Networking

<http://zillman.blogspot.com/2009/08/online-social-networking.html>

I have just updated my Internet MiniGuide Annotated Link Compilation white paper titled "Online Social Networking" now a 47 page research paper listing many resources both new and existing that will help anyone who is attempting to find information and knowledge research about online social networks available on the Internet. It is freely available as a .pdf file (343KB) at the above link from the Virtual Private Library™ and authored by [Marcus P. Zillman, M.S., A.M.H.A.](#) It was updated **August 18, 2011**. Other white papers are available by clicking [here](#).

Nemo Documents

<http://www.nemo-docs.com/>

Nemo is a Windows application for people with a lot of documents. It inspects your current folder structure to give you a new view of your files. Documents, images and other files are mapped into a calendar-like view that you are used to from Outlook or Google Calendar. This makes your files a lot easier to find so that you can focus on other things. Nemo stays out of the way as much as possible, but lives in the notification area so that it's always just a click away. By integrating with Windows Desktop Search (built-in on Vista and Windows 7) you can search for phrases or words inside documents and combine that with other clues that you can remember about the document, such as a specific month or the file type. It works with a wide range of files. Office files such as Word, Excel and Powerpoint, PDF, Adobe Photoshop, Illustrator, images, video files and more are supported. Nemo adds labels on top of your current folder structure as a way to help you organize things. Label a document with review, if you need to review it later. Or use labels to supplement your folder structure to help you find documents easier. Nemo Documents has been translated into many languages by our awesome community: Catalan, Chinese (Traditional), Danish, Dutch, French, German, Hebrew, Japanese, Lithuanian, Russian, Portuguese (brazil) and Spanish. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

This freely available publication includes senior discounts available from the following categories: a) Restaurants, b) Retail & Apparel, c) Grocery, d) Travel, e) Activities and Entertainment, and f) Cell Phone Discounts. Please email me with any additional resources that are currently available so I can keep the listings up to date and current.

Teambox - Online Project Collaboration Tool

<http://www.Teambox.com/>

They are the pioneer in joining social collaboration tools with online project management. Their mission is to change the way people work by making it easier and more fun to get things done. The company was founded by a team who felt that other project management and online collaboration tools were too complicated for every day users. With simplicity as the core focus, the team set forth to create an offering that was easy and fun to use. They take pride in offering a tool that actually changes the way people work. By making project management more social and accessible from all places and all forms of technology, it is no longer complicated to manage what needs to get done. It only takes a minute to sign up for Teambox and it is free for up to 3 projects. Features include: a) They are dedicated to integrating social networking utilities into functional project management. They offer activity streams, threaded conversations and commenting, inbox management and alerts, RSS feeds and well anything that makes it

Download this excellent freely available 30 page .pdf (198KB) column today and begin your search for the expert you need for your business or special interest.

Open Source -Open Libraries

<http://opensource.califa.org/>

Open Source – Open Libraries is a consortia of libraries, library systems, and other organizations committed to pursuing Open Source Software (OSS) alternatives for libraries. The primary focus of the project is on Open Source Library Systems (OSLS) as potential replacements for commercial, proprietary integrated library systems (ILS). The principles of Open Source (e.g. commitment to freedom of information, transparency, collaboration and empowerment) are entirely consistent with libraries. Just as libraries provide opportunities for people to empower themselves, Open Source software provides an opportunity for libraries to empower themselves by asserting more control over the software tools used to run their libraries. With an OSLS, libraries can more quickly respond to the needs of library customers, optimize the work of library staff, create new models for resource sharing, and take advantage of the power of collaboration. The project will focus on making members aware of the OSLS products currently available as well as the companies available to provide support, migration assistance, development, customization, and hosting. In addition, the project will educate members about Open Source business model and why it works for libraries using Open Source software and the vendors providing services. Members will also learn the ins and outs of licensing, how the software is maintained and developed, and what we mean by "collaborative development." The goal is to empower libraries and library consortia by encouraging participation and collaboration in software products generally, and encouraging them to consider an Open Source Library System such as Koha or Evergreen. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

WorkSnug - Connecting Mobile Workers to the Nearest and Best Places to Work in the Major Cities of the World

<http://www.worksnug.com/>

Work has changed. It's not a place we go, it's a thing we do. For millions, the city is our office. WorkSnug is a tool that connects mobile workers to the nearest and best places to work in the major cities of the world. Their teams, dozens around the world, have visited and reviewed hundreds of viable workspaces. They have reviewed WiFi, noise levels, power provision, community feel, even the quality of the coffee, in workspaces across the

OpenPlans - Using Open Source Technology To Change the Way That Cities and Citizen Interact

<http://openplans.org/>

OpenPlans is a non-profit technology organization helping to open up government and improve transportation systems. They build open source software. They help agencies open up their data. They report on urban issues. They offer technical assistance to public agencies, and they build communities around their initiatives in order to seed an open and evolving ecosystem of technology tools that further the public interest. They have launched OpenGeo, Streetfilms, Streetsblog, GothamSchools, Civic Commons, OpenTripPlanner and more. They have a particular interest in transportation and urban planning. And they are just getting started. They are a team of 50 transit nerds, journalists, and engineers and are based in New York City, but have staff and projects located in far off places (like Portland and Australia). This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog.

USA.gov Mobile Apps

<http://apps.usa.gov/>

The government apps and mobile sites allow you to access official information on various topics from the palm of your hand. This has been added to the tools section of [Research Resources](#) Subject Tracer™ Information Blog. This has been added to [Reference Resources](#) Subject Tracer™ Information Blog

Asiatic Journal of Biotechnology Resources

<http://www.pacificjournals.com/ajobr>

Asiatic Journal of Biotechnology Resources is dedicated to all aspects of the biological science; microbiology, biochemistry, genetics and its engineering and relevant biotechnology. It focuses on the innovative research aspects needed to create trustworthy and high quality database. It is also emphasizing on dissemination of quality and reliable information to global scientific community. Within this, reviewers especially concerned with evaluation of the efficiency and effectiveness of submitted work in making issue more informative. Definitive case studies and research communication involving scientific data are especially welcome. Asiatic Journal of Biotechnology Resources is available free of charge as an Open Access journal on the Internet. Abstracts available online. Articles available in PDF format.

Bundlr - Web Curation Tool

<http://gobundlr.com/>

Bundlr is a tool for online curation: clipping, aggregation and sharing of web content. They are afoot with an information overload. New sources and mediums are emerging and each specialist is finding his way through everything being published online. But we're lacking the tools to quickly select the best we find on the web, organize and share it. With Bundlr you can create bundles of any kind of content: articles, photos, videos, tweets and links. Cover real-time breaking news from your sources. Wrap up an event with a collection of online feedback. Build a page where you pick the most relevant

Watch™ Paper Review

The Visibility of Wikipedia In Scholarly Publications by *Taemin Kim Park*
<http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3492>

Abstract:

Publications in the Institute of Scientific Information's (ISI, currently Thomson Reuters) Web of Science (WoS) and Elsevier's Scopus databases were utilized to collect data about Wikipedia research and citations to Wikipedia. The growth of publications on Wikipedia research, the most active researchers, their associated institutions, academic fields and their geographic distribution are treated in this paper. The impact and influence of Wikipedia were identified, utilizing cited work found in (WoS) and Scopus. Additionally, leading authors, affiliated institutions, countries, academic fields, and publications that frequently cite Wikipedia are identified.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
